"Since my return from Odessa I have had the entire inclosure round Cathcart Hill Cemetery fully repaired and repointed with cement. I have also had a large portion of the kerb-stone inclosure around the Guards' Monument taken away, and fine hammered Inkerman stone reset, all the weeds pulled up, and the inscriptions on most of the head-stones repainted, that is the lettering in black paint, as they were before. The cemetery looks as well, if not better, now than when it was originally constructed. I have also prepared the concrete, over the remains of General Estcourt, to be fully ready for the reception of the kerb-stones, iron fence, &c., Lady Estcourt is about sending from England. There was much work on it, and I think I described it fully to you in my last.

"The Engineers' cemetery and the cemetery of the 2nd Division, near the Picket House, have been placed in fine condition. I have a man who is taking a photograph of Cathcart Hill, and also of the monument of the Guards today, which I shall send you by an English gentleman, who returns from a visit to the Crimea in the course of two weeks. Signed, JOHN GOWEN,
Colonel United States Army.

"To Her Majesty's Consul, Theodosia."

[The gentleman in question is, we believe, engaged in raising the Russian men-of-war which have been sunk in Sebastopol, and has already been very successful in his operations. The land on which we encamped is private property, and it is rather unfortunate the allies did not respect the Russian graves at Komara and elsewhere more religiously, as we should then have better grounds of complaint.—ED.]

LIST OF KILLED AND WOUNDED IN THE ATTACK ON THE 27TH JUNE AT PUKETAKAUERE.

Royal Naval Brigade—Captain H. Beauchamp Seymour, R.N., wounded severely in leg; Lewis Delbridge, Sergeant, R.M., ditto ditto; Henry Baker, R.M.A., ditto in arm; Charles Churchill, A.B., ditto ditto; Isaac Cure, Leading Stoker, dangerously in arm and chest; John Tremain, A.B., slightly, in back; Samuel Jenkins, A.B., severely, in arm; Walter Hannaford, A.B., severely, in leg; James Belford, A.B., severely, in leg; John Minshall, A.B., severely, in leg.

CONTRACTS FOR SUGAR, TEA, SPLIT-PEAS, WHITE WHEAT, AND VINEGAR.

Department of the Comptroller for Victualling and Transport Services,

Somerset House, 24th October, 1860.

THE COMMISSIONERS for executing the Office of Lord High Admiral of the United Kingdom of Great Britain and Ireland, do hereby GIVE NOTICE, that on TUESDAY, the 6th NOVEMBER next, at half-past one o'clock, they will be ready to treat with such persons as may be willing to contract for supplying and delivering into Her Majesty's Victualling Stores at DEPTFORD, the undermentioned articles, viz.:—

		When to be delivered.
SUGAR	400 Tons.	Half of each in three weeks, and the remainder in three weeks afterwards, or earlier if preferred by the party tendering.
TEA ...	100,000 lbs.	
SPLIT PEAS ...	800 Qrtrs.	
WHITE WHEAT	2,000 ,,	
VINEGAR ...	20,000 Galls.	Half in one month, and the remainder in one month afterwards, or earlier if preferred by the party tendering.

Tenders may be made for the whole or any portion of the articles.

Their Lordships reserve to themselves the power, when the tenders are opened, of contracting either for the whole, or for such part thereof only as they may deem fit, or for a greater quantity, or of not contracting for any, and also an unlimited power of selection.

The Sugar and Tea to be exempted from the Customs' Duties, and parties tendering are to state where they are respectively lying.

Samples of the Split-Peas and White Wheat (not less than two quarts of each), and of the Tea (not less than two pounds from the bonded warehouse), must be produced by the parties tendering.

Samples of the Vinegar (not less than a quart) which the parties tendering may purpose to supply must accompany their tenders, as the delivery will be required to be made in accordance with the samples which may be accepted, and the Vinegar tendered to be No. 20, Trade denomination.

The Vinegar to be delivered in good, sound, strong, and substantial casks, which are to be retained as long as required by the said Commissioners or their Officers without payment thereof, but are to be taken back from the said Victualling Stores (when emptied), by and at the expense of the contractor.

Each tender for Sugar must specify the mark and landing number of each cask or package, the ship in which imported, and the country or place of its growth or produce, and an average sample (not less than two pounds for each import mark) must be produced by the parties tendering, and not an average of different marks or several imports, and any parcel that is found not to be of the same mark or average quality as the samples tendered and accepted, will be rejected by the Officers.

The samples produced by persons whose tenders are not accepted, are requested to be taken away by them immediately after the contracts have been decided.

No tender will be received unless made on the Printed Form provided for the purpose, and which may be obtained on application at the said Office, or to the Officer conducting the Packet Service at Liverpool, or to the Collector of Customs at Bristol.

Particular attention is called to the Conditions of the Contracts, which may be seen at the said Office, and at Liverpool and Bristol.

No tender will be received after half-past one o'clock on the day of treaty; and it will not be required that the party tendering, or an agent on his behalf, should attend at the Office on the day of contract, as the result of the offer received from each person will be communicated to him and his proposed sureties in writing.

Every tender must be addressed to the Secretary of the Admiralty, and bear in the left-hand corner the words, "Tender for ," and must also be delivered at Somerset House.

MESSRS. A. K. KING AND COMPANY, ARMY & GENERAL COMMISSION AGENTS, 41, OLD COURT HOUSE STREET, CALCUTTA.

TO OFFICERS, REGIMENTAL MESSES, &c.

MESSRS. SAUNDERS, OTLEY, & CO., East India Army Agents, 50, Conduit Street, Hanover Square, W., draw and remit Pay, Pensions, Dividends, &c., and transact every description of Financial Business. They purchase and forward Miscellaneous Supplies, and ship them to Officers, Regiments, and Messes in India and the Colonies. Letters and Parcels received and forwarded.—SAUNDERS, OTLEY, & Co., East India, Army, & Colonial Agents, 50, Conduit St., Hanover Square, London, W.

MESSRS. ADDISON & CO., ARMY AGENTS, 11, WATERLOO PLACE, PALL MALL, S.W. Exchanges negociated.

Pecuniary accommodation afforded to officers on full pay, on their notes of hand only, at a few hours' notice.

Applications by letter promptly attended to.

Every description of army business transacted.

REMITTANCES TO INDIA AND AUSTRALIA.—The undersigned GRANT DRAFTS and LETTERS OF CREDIT on Calcutta, Madras, Bombay, Melbourne, and Sydney, at the exchange of the day. Rupee Paper and Interest Bills negociated.—GRINDLAY & Co., East India Army Agents, 55, Parliament Street, S.W.

MONEY ADVANCED at a FEW HOURS' NOTICE, AND IN STRICT CONFIDENCE.—Gentlemen of property, or with good expectations, officers in the army, and other responsible parties requiring an immediate advance, on reasonable terms, can be accommodated with any amount on their note of hand without securities. Also at 5 per cent. interest on reversions. Property under wills or marriage settlements, &c.—Apply in confidence by letter only to Mr. PORTLAND, 22, Newman Street, Oxford Street, W.

MONEY.—MONEY ADVANCED at a few hours' notice, on the most advantageous terms, to Noblemen, Officers in the Army, Heirs to entailed estates, and Gentlemen of property, on their personal security, also on security of reversions to landed estates, at 5 per cent., payment of which may be deferred until possession, on application to Mr. DICKER, 10, Craig's Court, Charing Cross, S.W.

MONEY.—Noblemen, Officers in the Army, Persons holding Government Appointments, Clergymen, and other Gentlemen, can have ADVANCES upon their notes from a private channel without life insurance or delay, and with secrecy.—Apply to Mr. HUDSON, 28, Regent Street, Piccadilly, W.

SPORTSMEN AND GENTLEMEN OF THE ARMY AND NAVY.—S. & B. SOLOMONS, Opticians, 39, Albemarle Street, Piccadilly, W., opposite the York Hotel. Portability combined with great power in FIELD, RACECOURSE, OPERA, and general out-door day and night powerful waistcoat-pocket PERSPECTIVE GLASSES, weighing only 4 ounces each, containing 12 and 18 lenses, constructed of German glass, will show distinctly persons to know them at two-and-a-half and three miles. They serve every purpose on the Racecourse and at the Opera House. Country scenery and ships are clearly seen at eight to ten miles. They are also invaluable for Shooting, Deerstalking, and Yachting. Her Majesty's Coast Guards are making use of them as day and night glasses. The terms for them are powerful and brilliant Telescopes for both eyes. The most powerful Telescopes, possessing such extraordinary power that some, three-and-a-half inches, with an extra astronomical eyepiece, will show distinctly Jupiter's moons, Saturn's ring, and the double stars; with the same telescope a person can be seen and known three-and-a-half miles distant, and an object from fourteen to sixteen miles. They are in endless variety, of larger and all sizes, with increasing powers, and are secured by Her Majesty's Royal Letters Patent.

FIELD GLASS.—The BEST is BURROW'S MALVERN LANDSCAPE GLASS, invaluable to Sportsmen, Military and Naval Officers, Travellers, &c. Compact, portable, and efficient, combining a wide field of observation with extraordinary defining power. In sling case, 3½ guineas. Sent free on receipt of post office order to W. & J. BURROW, Great Malvern, Worcestershire.

MODERATE PRICES WITH GENERAL EXCELLENCE.

E. MOSES & SON can confidently assert, that they possess advantages and facilities which are quite beyond the reach of any other house in the trade, and are thereby enabled to offer a REALLY GOOD ARTICLE at a VERY LOW PRICE. The most skilful cutters are employed, and durability of material and workmanship may be relied on.

The BESPOKE TAILORING DEPARTMENT is almost daily replenished from the best home and foreign markets.

The READY-MADE CLOTHING DEPARTMENTS are furnished with an immense assortment of goods for all classes, and all occupations. Also a great variety of CLOTHING for JUVENILES of all ages.

The HOSIERY and DRAPERY, HAT and CAP, and BOOT and SHOE DEPARTMENTS, contain a carefully-selected stock of the best and newest Manufactures.

N.B. Should any article not be approved of, it will be exchanged, or the money returned.

Offices and Warehouse, 48, Pall Mall, St. James's, London, S.W.

DINNEFORD'S PURE FLUID MAGNESIA

Has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for ACIDITIES, HEARTBURN, HEADACHE, GOUT, AND INDIGESTION.

As a MILD APERIENT, it is admirably adapted for DELICATE FEMALES, *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the ACIDULATED LEMON SYRUP, it forms an *Effervescing Aperient Draught*, which is highly agreeable and efficacious.

PREPARED BY DINNEFORD & CO., DISPENSING CHEMISTS, (and General Agents for the *Improved Horse Hair Gloves and Belts*), 172, NEW BOND STREET, LONDON, W.,

And Sold by all respectable Chemists throughout the Empire.

NERVO-ARTERIAL ESSENCE, prepared only by Dr. WM. BATCHELOUR, M.R.C.S.P. 1835, and M.L.A.C. 1834. It strengthens the vitality of the whole system without reaction, and speedily removes nervous complaints. In bottles, at 2s. 6d., 4s. 6d., 11s., and 33s., at Goodyer's, 31, Regent Street, W.; Butler & Crispe's, 4, Cheapside, E.C.; Sutton & Co., Bow Churchyard, E.C.; Barclay & Sons, Farringdon Street, E.C.: 12, Finsbury Place South, City, E.C., and all Chemists.

RUPTURES.—HUXLEY'S IMPROVED PATENT MOC-MAIN TRUSS dispenses entirely with the lever spring. A flexible band, perfectly imperceptible, encircles the body (in lieu of the old steel spring), and an elastic pad secures the hernia. Measure required—circumference two inches below the hips. Price single, 12s.; double, 15s.; postage 10d. and 16d. Illustrated circulars on application to Mr. E. HUXLEY, 12, Old Cavendish Street, Oxford Street, W.

SAVARESSE'S PATENT FLEXIBLE CAPSULES, by which Castor Oil and nauseous balsamic Medicines may be taken without inconvenience. These Capsules are made of animal membrane of low solubility, thus obviating the usual nausea and unpleasant eructations which follow the use of those made with Gelatine. These Capsules may be obtained of BELL, 338, Oxford Street, W.; SANGER, 150, Oxford Street, W.; HOOPER, Pall-Mall East, S.W.; KENNO, St. Paul's Church Yard, E.C.; and medicine vendors throughout the kingdom.

EVANS & LESCHER, London, Patentees.

A BOON TO NERVOUS SUFFERERS.

HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., will send, post free, on receipt of a stamped directed envelope, THE WARNING VOICE, a new medical work on the most effectual cure of Nervous Debility, Loss of Memory, Indigestion, &c., which, if neglected, result in consumption and premature decay; with plain directions for perfect restoration to health and vigour. The true guide to those who desire a speedy cure. Every young man should peruse this excellent little work, if he values his health, happiness, and peace of mind. Sent direct from the Author's residence, 8, Burton Crescent, Tavistock Square, London, W.C.

Post free for two stamps.

EXTRAORDINARY DISCOVERY OF A entirely NEW THEORY of CURING DISEASE, being the recorded experience of 30 years' special practice in Great Britain, France, and America—with evidence of the actual effects of the latest Scientific Discoveries, denominated NEW LOCAL REMEDIES, with the adjuncts of Constitutional Treatment now generally known, even by the medical faculty of the British Empire, but which have been recently introduced into England. Sent free on receipt of two stamps to defray postage, &c., by W. HILL, Esq., M.A., No. 27, Alfred Place, Bedford Square, London, W.C.—Daily consultations from 11 till 2, and 6 till 8 Evening.

DR. BUCHAN'S PATENT SUGAR-COATED VEGETABLE PILLS, VEGETABLE SKIN OINTMENT, and CONCENTRATED VEGETABLE ESSENCE, for Purifying the Blood, Regulating the Bowels, and Removing Vitiated Humours, Bilious and Liver Complaints, Rheumatism, Gout, Scorbutic Affections, Costiveness, Skin Eruptions, deep-seated Ulcers, and all Diseases of the Nervous System, from whatever cause, &c., affording at once a new lease of life to the sickly and aged of both sexes, also giving a beautiful and clear complexion. Proved by the sworn testimonies made before the Lord Mayor of London and sitting Magistrates. Sold by Buchan & Co., Patentees, 22, Newman St., Oxford St., London, W., and all chemists in town and country. Prices:—Pills, per box, 1s. 1½d., 2s. 9d., and 11s.; Ointment, per pot, 1s. 1½d., and 2s. 9d.; Essence, per bottle, 4s. 6d., 11s., or bottle containing four times the quantity, 33s. Agents:—Barclay, 75, Farringdon Street, E.C.; J. Sanger, 150, Oxford Street, W.; Hannay, 63, Oxford Street, W.; Butler, 4, Cheapside, E.C.; Hooper, 43, King William Street, London Bridge, E.C.; R. Howden, 78, Gracechurch Street, E.C.; Prout, 229, Strand, W.C.; &c. &c.

Gratis, or post free for one stamp, of all Agents, or of 22, Newman Street, W., Dr. Buchan's Work, entitled BUCHAN'S DOMESTIC MEDICINES, containing instructions for the cure of every ailment incidental to man, woman, or child.

A Physician and Member of the Royal College of Surgeons, England (Registered under the New Medical Act), attends daily to give advice, without fee, to those purchasing Buchan's Medicines.

PERRY & CO.'S celebrated STEEL PENS, PATENT PROPELLING & WITHDRAWING PENCILS; RED INK PENS, warranted not to change colour Red or corrode with other Inks; ANTIDOTAL ELASTIC BANDS at reduced prices; ANTIDOTAL SIVE STEEL PEN INK, &c., &c. Sold by all Stationers. Wholesale at 37, Red Lion Square, W.C., and 3, Cheapside, London, E.C.

CHUBB'S PATENT DETECTOR LOCKS. CHUBB'S FIRE & BURGLAR-PROOF SAFES. CHUBB'S FIRE-PROOF STRONG ROOM DOORS. CHUBB'S STREET-DOOR LATCHES. CHUBB'S CASH AND DEED BOXES.

Illustrated Price List sent free.

CHUBB & SON, 57, St. Paul's Churchyard, London, E.C.; 28, Lord Street, Liverpool; 16, Market Street, Manchester; and Wolverhampton.

GUSH & FERGUSON, ARTISTS AND PHOTOGRAPHERS, beg respectfully to invite the Nobility and Gentry to view their Fascimile PORTRAITS, in Oil and Water-Colours.

MUDIE'S SELECT LIBRARY.

C. E. MUDIE has the pleasure to announce that the alterations in progress at his Library are now sufficiently advanced to provide increased accommodation for the Subscribers, and greater facilities for the rapid exchange of books.

The Great Hall, now approaching completion, will afford space for an improved arrangement of the New Books as they appear, and admit of a greatly increased supply of WORKS OF ESTABLISHED REPUTATION (English and Foreign), to promote the circulation of which the Library was originally established.

The following classified List of Works, added since January, 1858, may be regarded with interest, as it indicates, to some extent, the relative circulation, during that period, of Works of various classes in our current literature.

	VOLUMES.
HISTORY AND BIOGRAPHY	87,210
TRAVEL AND ADVENTURE	50,572
FICTION	165,445
MISCELLANEOUS, INCLUDING WORKS OF SCIENCE AND RELIGION, AND THE PRINCIPAL REVIEWS	87,856
	391,083

The number of volumes added during the present year exceeds ONE HUNDRED AND SEVENTY THOUSAND, consisting chiefly of Works of permanent interest and value.

NEW OXFORD STREET, October, 1860.

MAPPINS' TABLE CUTLERY.—SEASON 1860.

CAUTION.—MAPPIN BROTHERS beg to advise their customers and correspondents that they have only one establishment in London, viz., at London Bridge, and they hope that their friends will be careful to address them in full, either Mappin Brothers, London Bridge, London, E.C.; or Mappin Brothers, Queen's Cutlery Works, Sheffield. Established in Sheffield, A.D. 1810. None are genuine without their corporate mark, the "Sun," granted to their father by the Cutlers' Company of Sheffield, June 26, 1835.

Messrs. MAPPINS' Table Knives still maintain their unrivalled superiority; all their Blades being their own Sheffield Manufacture, are of the very first quality, with secure Ivory Handles, which do not come Loose in Hot Water; and the difference in price is occasioned solely by the superior quality and thickness of the Ivory Handles.	Ordinary Quality.-	Medium Quality.	Best Quality.
	£ s. d.	£ s. d.	£ s. d.
Two Dozen full-size Table Knives, Ivory Handles	2 4 0	3 6 0	4 12 0

Complete Service	£4 14 6	£6 18 6	£9 16 6

MANUFACTORY, QUEEN'S CUTLERY WORKS, SHEFFIELD.

DAVIESON'S EVERLASTING TEETH.

THE LATEST DISCOVERY.

MR. EDWARD DAVIESON, SURGEON-DENTIST, has introduced a material for the construction of ARTIFICIAL TEETH so extraordinary that nature appears to have made good the ravages of TIME, DISEASE, or ACCIDENT, and when fitted detection is impossible, even though the wearer's mouth be closely examined. The price is so moderate that it is within the reach of all, and it is fitted without springs or other unsightly fastenings. The removal of stumps is unnecessary, and thus all pain is avoided. MR. EDWARD DAVIESON invites one visit of inspection to his establishment, which will convince the most sceptical of the truth and straightforwardness of this statement. The LIQUID ENAMEL, for Stopping Decayed Teeth, is ENAMEL WHITE, keeps its colour, and lasts for ever. It is invaluable for Front Teeth. Attendance daily from Ten till Six. Consultations free. MR. EDWARD DAVIESON, Electric Telegraph Office, 418, West Strand, London, W.C. The Descriptive Pamphlets free for two stamps.

THE PATHOLOGY AND TREATMENT OF VENEREAL DISEASES, comprising the most recent doctrines on the subject. By JOHN HARRISON, F.R.C.S. CONTENTS:—

Pathology.

1. Chancres.
2. Constitutional Symptoms.
3. Syphilis in Infants.
4. Inoculation.
5. Transmission of Infection.
6. Poison of Syphilis.
7. Induced Immunity of the System against new Constitutional Infection.
8. Extinction of Syphilitic Diathesis by Syphilization.
9. Influence of Climate, Age, and Sex.
10. Non-Specific Sores, &c.
11. Gonorrhœa, &c.
12. Discharges from the Urethra.
13. Non-Identity of the Syphilitic Virus.
14. Buboes.
15. Prognosis in Syphilis.

Treatment.

1. General Remarks.
2. Treatment of Chancres.
3. Treatment of Constitutional Symptoms.
4. Syphilis in Infants.
5. Non-Specific Sores, &c.
6. Gonorrhœa, &c.
7. Discharges from the Urethra.
8. Treatment of Buboes.
9. Treatment of Phagedena.
Conclusion.

"The claim to a scientific character which Mr. Harrison puts forward in favour of the subject of Venereal Diseases will be found amply justified by a perusal of this work. It contains much information. To the practitioner, who wants merely a view of the most recent doctrines on the subject, it is not too long; to the student, who wants practical instruction, it is not too short."—*Lancet.*

Also, by the same Author, demy 8vo. price 7*s.* 6*d.*

A MESSMAN requires a RE-ENGAGEMENT. References of the highest character. Address J. C., Mess House, 1st and 2nd Depôt Battalions, Chatham Barracks.

WANTED, by a young Man, aged 20, with three and a half years' good character from his former place, a SITUATION as CAPTAIN'S SERVANT, or SERVANT to the WARD-ROOM MESS, on board a frigate or line-of-battle ship. The Advertiser understands the duties of Valet as well as those of a general servant; he is also able to cook. Address letters, prepaid, to J. CHATER, 1, Compton Place, Compton Street, Brunswick Square, London, W.C.

MESSMAN WANTED.—Apply to the Mess President, 2nd Battalion 25th Regiment, Aldershot.

WANTED, an efficient DRILL SERGEANT, who is also thoroughly qualified to instruct in Rifle Practice, according to the School of Musketry practised at Hythe, for a corps recently established. Salary £1 per week. Apply to the Secretary, North Essex Borderers Rifle Corps, Saffron Walden.

CAVAN MILITIA.—To Non-Commissioned Officers about to be Discharged from the Line.—Vacancies on the Staff of the Cavan Regiment of Militia, one PAYMASTER SERGEANT, one COLOUR SERGEANT, one DRUM MAJOR. Applications, with testimonials, to be addressed to Captain GOSSELIN, Adjutant, Cavan.

2ND STAFFORD MILITIA.—WANTED, for the above corps, a PAY and COLOUR SERGEANT, and a DRILL SERGEANT. Apply, enclosing copies of testimonials and stating particulars, to the Adjutant 2nd Stafford Militia.

NAVAL CADETS.—Young Gentlemen are EDUCATED for the Navy by W. BELL, Chaplain; A. BURROW, Chaplain and Naval Instructor; W. JOHNSON, Naval Instructor. NORTH GROVE HOUSE, SOUTHSEA.

NAVAL CADETS, &c.—ALL the PUPILS prepared at the Royal Naval Academy, conducted by MR. CHARLES F. COOPER, R.N., have PASSED, and eight have taken 1st, 2nd, and 3rd places at the Royal Naval College. Terms moderate.—Address, Beresford Place, Southsea.

NAVAL CADETS, MARINE CADETS, ETC.

EASTMAN'S ROYAL NAVAL ESTABLISHMENT,
EASTERN PARADE, SOUTHSEA.

357 Gentlemen have passed from this Establishment as Naval Cadets, and more than 200 as Marine Cadets, &c.

At the last Examination, FIRST, SECOND, THIRD, FOURTH, FIFTH, and SIXTH Places were taken by Pupils in different classes.

Pupils receive a Classical and sound General Education, and careful preparation for Naval Examinations.

Applications to be addressed to the Head Master, Mr. G. EASTCOTT SPICKERNELL. Prospectuses and other information may be had at Messrs. Booth's Library, 307, Regent Street, W.

BARON KOLLER, assisted by a Graduate in Mathematical honours of high repute, and by the most distinguished Professors, continues to READ with Officers for the Staff College, and PREPARES Gentlemen entering the Army for Examinations, at his residence, Dawson Villa, 6, Dawson Place, Bayswater, W.

BECKENHAM, NEAR LONDON.—TEN BOYS carefully PREPARED for the PUBLIC SCHOOLS by the Rev. LLOYD PHILLIPS, B.A. (late Secretary to the Editorial Department of the British and Foreign Bible Society). Inclusive Terms: Eighty Guineas and a Hundred Guineas. References: the Rev. W. Marsh, D.D., Beddington Rectory, near Croydon; the Rev. F. Chalmers, B.D., Beckenham Rectory, near London, and the parents of pupils.

STAFF EXAMINATIONS. — Twenty-four Officers have already joined the Military College of Sunbury this year, to read either for the Staff College, or for direct appointment on the Staff. Apply to Captain LENDY, Sunbury, S.W.

MILITARY EXAMINATIONS.—A Gentleman in Her Majesty's Service, who has had great experience in the preparation of Officers for the Military and Naval Professions, is willing to superintend personally the studies of a few gentlemen (not more than four) who may be desirous of qualifying themselves for Commissions in the Army, or Corps of Royal Marines.—Address to A. B., Caine's Library, Wish Street, Southsea, Hants.

ARMY EXAMINATIONS.—Candidates for the Artillery, Line, and Cavalry, are rapidly and efficiently prepared at an establishment, the pupils of which have, within the last two years, come out eight times first, five times second, and three times third on the list. Apply to Captain LENDY, Sunbury, S.W.

MILITARY EDUCATION. — A Military Engineer, of great experience in the scientific branch of the War Department, PREPARES PUPILS for all Military Examinations very successfully, and, owing to his practical experience, affords, especially to those preparing for the Staff, Engineers, or Artillery, such an opportunity as they are not likely to meet elsewhere.—Address DELTA, ARMY & NAVY GAZETTE office.

HIGH MILITARY EDUCATION.

THE CEDARS MILITARY COLLEGE, PUTNEY, for Gentlemen preparing for the Line, Cavalry, Artillery, Engineers, Staff, and Addiscombe. Director, Major Corte, Major of the Staff of the Sardinian Army during the late War; Professors Oswald Hunter (Wrangler), Cantab., Dr. Hassell, and others. The number of Professors is arranged to afford to each Pupil the advantages of Private Tuition. Applications addressed to OSWALD HUNTER, Esq., The Cedars, Putney, S.W.

ARTILLERY EXAMINATIONS. — Candidates for the Competitive Examinations are individually prepared at an establishment which receives six pupils only for that branch of the Service. Four resident professors. Apply to X., care of Messrs. PARKER, 445, Strand, W.C.

[COPY.]

"Ordnance Select Committee, Royal Arsenal,
Woolwich, April 17th, 1860.

"Sir,—Since I last addressed you on the subject of your Waterproof Cartridges, I have to inform you that 60 of them have been exposed in an atmosphere saturated with moisture, at a temperature of 90 degrees, for a fortnight. The result has been favourable, as far as this test is concerned, to their Waterproof qualities.

"I have, therefore, to request you will be good enough to state, for the information of the Committee, the nature of the lubrication you employ; whether it is in any way connected with the Waterproof properties of the Cartridge, and whether, in the event of their being adopted, the Service lubrication, which is wax, might not be employed.

"I have the honour to be, Sir,
"Your obedient Servant,
"J. H. LEFROY, Colonel, R.A.

"Mr. Thos. H. Anthony,
"37, Broad Street, Birmingham."

☞ *It is particularly requested that applications for copies of the* ARMY AND NAVY GAZETTE, *&c., and Advertisements, should* NOT *be sent to the Editor, but to the Publisher,* MR. ARCHIBALD GRAHAM, *to whom remittances are payable. The subscription to the paper is 7s. 7d. per quarter, or 30s. 4d. per annum, payable in advance, postage included.*

WHAT have the Dockyards done that they are continually put upon their trial? It is true the Navy Estimates are large, and the country is far from satisfied that we get anything like value for our money; but it is equally true, and has been proved by abundance of evidence, although scarcely ever seriously questioned, that the work which is performed in the Dockyards is of the very best description. No one has ventured to say that the Marlborough or Royal Albert would have been better built in private establishments; and if they cost a little more per ton from having been built in the royal docks, ships of war are surely not such articles of commerce as fall under the maxim of political economists, to be bought in the cheapest market, as if intended to be re-sold. Besides, if true economy consists in buying not nominally the cheapest but really the best article for ordinary wear and tear, it must be manifest *à fortiori*, that in the matter of ships and ordnance, and all the implements and munitions of war, only what is the very best in material and workmanship ought to be considered tolerable for the public service. We remember the Brummagen pick-axes and spades which failed us in the Crimea; and if we do not instance the rotten gun-boats as another warning against the "cheap and nasty," it is because they were rather frauds which escaped detection for a time, and for which the defaulting contractors ought to have been held responsible, than simple cases of the purchase of inferior articles with open eyes. Was it from Dockyards mismanagement that our stock of seasoned timber was brought so low in 1854? Was it their fault if our ships of the line were allowed to die off one by one without being replaced, till Sir John Pakington's "re-construction of the Navy" became necessary? Was it the Dockyards' fault if steamers were built of a size and tonnage not suitable for the engines intended to be put in them? And now, what have the Dockyards to do with the tardy invitations given to some half-dozen shipbuilders, to tender for two more iron-cased vessels, in consequence of the alarm felt throughout the country, and expressed in the press, at the proceedings of the French Emperor and the apathy of our own Government?

The Dockyard Commission is again without a head. While we write, we have not heard who is to be Mr. F. Peel's successor; but we are more anxious to know whether the Commission has proposed to itself any definite object of inquiry, than to ascertain who is to be the new chairman. We fear they have sat themselves down to a game of table-turning; and that Mr. Ricardo — of whom so much was expected as chairman — fairly ran away in a fright, when he saw the commotion among official spirits, and heard the tapping of contradictory ayes and noes — here, there, and everywhere; whilst in vain he endeavoured to grasp some hand put forth from red-tape hangings, whose dreamy substance collapsed and vanished as he tried to close his fingers upon it. We think Mr. Ricardo was bound, as a public man, to give his reasons publicly for withdrawing from his position. He could never, as a Member of Parliament with a fair reputation for business, have shirked conducting such an inquiry merely because of its magnitude and importance. And if he was of opinion that, after all, the Dockyards have always been fairly obedient to those who really control them, and that they have done always what they were required to do, and have always undone what they were required to undo—no unimportant part of their work for several years!—if, in fact, he felt there was nothing to inquire about as regards the Dockyards, and therefore declined to act, why then we think that as a public man he was all the more bound to let the public know the grounds of his resignation. Mr. F. Peel has been taken away; as it would appear from a leading contemporary, because, great as the naval expenditure is, and foul as may be the corruption or mismanagement in the Dockyards, there is a still greater evil elsewhere which requires Mr. Peel's herculean strength to restrain it. We ought, it seems, to have had a Royal Commission to inquire into Mr. Gladstone, rather than into Dockyard management! The last is but a secondary affair, for which Mr. Frederick Peel cannot longer be spared. The Chancellor of the Exchequer requires looking after immediately!

Well, well! the chairman of the Royal Commission must, we suppose, be somebody not in office—why not Sir James Graham, or why not even Sir John Pakington? If Sir James's health would admit of his accepting the post, we believe it will be generally conceded that he is the very best man the country can produce—even comparing him with gentlemen now at the Treasury. Perhaps the most creditable report of last session was that of the Committee on Army Organisation, of which Sir James Graham was chairman; and we may be sure that were he on the present Commission he would go to the root of the matter, and might find perhaps that naval mismanagement is not to be primarily sought for in the Dockyards.

Of one thing we are perfectly certain, that let the chairman be who he may, or let the inquiry be ever so discursive, the remedy for Admiralty mismanagement will not be in the establishment of new systems of routine, but in the appointment of sufficient men of sufficient ability to do the enormous work now expected from one man. Let there be a Board of Construction, with the senior member in charge of the various Dockyards as chairman, and we need neither hear more of imagined Dockyard mismanagement, nor of newspaper articles being necessary, before we can hope to see new inventions adopted, or our Navy improved except by copying from the French. These gentlemen would be able to visit the Dockyards, not surrounded by Siren pleasures in the Admiralty yacht, as a holiday amusement, but really to do business, and to rival one another in the economical and efficient management of the establishments placed severally under their control. They would have time to consider improvements in ship-building, and all new inventions; perhaps they might invent something themselves; and England might take the lead from France in naval affairs. If the Dockyard Commissioners will only think what is expected of one man, and of what is mainly dependent upon his strength or weakness, they will know all, and may write their report at once.

We are glad our leading contemporary has again called attention to what we are doing with respect to iron-cased ships. On Wednesday last the matter was gone into with special reference to the present decision of the Board of Admiralty, to lay down three other vessels, all upon the model of the Warrior, although it is very "doubtful whether that model is the best." As this decision really followed upon the previous articles in the *Times*, calling for more iron vessels, it has a right thus plainly to say that it does not wish to be held responsible as to the particular form of the vessels the Admiralty have ordered. It complains that no experiments whatever have yet been made to test the sea-going qualities of the Warrior class; and that all the experiments have been confined to testing what plates could best resist shot; while after these experiments have been made, the successful angulated principle seems to be quietly ignored, and perpendicular plates, which were penetrated or broken, seem still to be adhered to. "If," says the *Times*, "a single vessel, such as the Warrior, had been laid down directly after the trial at Kinburn, we might by this time have had an iron-cased frigate at sea." In other words, if only a little of the common sense exhibited across the Channel had fallen to our lot, we should not cut the sorry figure we now do. But we see that the La Gloire is afloat, and has attained a speed greater than our wooden vessels. We hope we can at least depend upon the Admiralty being able to make the necessary calculations as to the displacement and probable qualities of the projected frigates. The problem need not be very difficult; or is it to be said we cannot set an egg on end, even after seeing it done? The contractors, we apprehend, are willing to accept some responsibility as to this point. It is well and popularly put in the able article on "Iron Sides and Wooden Walls," in the last *Quarterly Review*:—Look at a towering three-decker like the Marlborough; calculate the weight of her two upper decks, with their armament, fittings, and crew, and of her heavy masts and sailing gear; and find whether all this weight is or is not heavier than the armour necessary to coat her lower-deck-sides and cover in her deck with 4½-inch iron, and to fit her out as a frigate. The *Times* also calls attention to the great advantage of sloping-in the sides of such vessels, as in Jones's model; thus bringing the weight of the guns and armour more in the centre, and rendering the motion of the vessels easier, which can be done, we are told, without any difficulty in the way of working the guns or the ship. This shape was adopted for the Spanish batteries which attacked Gibraltar many years ago; and its advantages for giving stability were pointed out by Captain Gardiner Fishbourne in one of his valuable lectures at the Royal United Service Institution, to which we have previously referred. An objection has been raised, that the water would run up these sloped sides "as over a rock at half tide." This view disregards the fact that the rock is not afloat, and that the dashing of the waves out at sea are actually greatest against the parts of the vessel that slope outwards the other way. Amongst "breakers" it would certainly be different, but that is scarcely the point.

We trust the *Times*' article may not be seized upon by the authorities as a ground for countermanding the new vessels, until the Warrior can be launched and tried! Of course that was not intended by the leading journal; but neither did it intend that the Warrior should be merely copied and none of the improvements suggested by recent experiments adopted. If an angular-sided ship can be made so as to steam, or can be proved to be the best for resisting shot, we may calculate on being able to keep out the salt water; and we should certainly like to see the first of these vessels built in England, and not copied only, after the French have adopted the invention. In *Blackwood*, Captain Coles's shield-cupolas for guns are strongly advocated in connection with iron-cased vessels; but, strangely enough, nothing is said of the kind of vessels suitable for the cupolas! These, Captain Coles himself proposes, should have angulated sides, as on Mr. Jones's principle; and unquestionably, before the cupola-shields can be adopted, it will be requisite to have vessels in which to place them. In the *Quarterly Review* only the ships are spoken of; while the writer in *Blackwood* does not explain how the cupolas can be adapted to ships with perpendicular sides, having open port-holes; and perhaps the most complete view of this all-important subject will be found in the *Cornhill Magazine* for last October.

NEW EMBRASURES.—Very interesting and important experiments have lately taken place at Shoeburyness under the direction of the Ordnance Select Committee on various kinds of embrasures, artificially protected. One of them, proposed by a Mr. Thornecroft, resisted so successfully the attack of Armstrong's 40-pounders at 600 yards, that it is thought it will be adopted. The checks of this embrasure are faced with the hardest granite, and the exterior slopes lined with bars of five and ten-inch iron, dovetailing one into the other, and fastened into the granite face with long iron bolts. If we can make ships which are invulnerable to shore batteries, and shore batteries which are impregnable to ships, it is difficult to foresee the direction which future wars will take. To acquire for these iron vessels a superior rate of speed, so as to enable them to choose and keep their own distances, and to make sudden descents on unprotected places, would appear the only feasible plan left whereby to hold a sure advantage over an enemy. Will the proverb in future hold good that "the race is not to the swift, nor the battle to the strong?"

THE ARMY.

5th Dragoon Guards. On Monday last the whole of the 5th Dragoon Guards stationed at Brighton were drawn up in parade order, in Preston Barracks, to witness the presentation of medals to several men of the above regiment. The following men were then called to the front and the medals pinned on their breasts by Sir Thomas W. M'Mahon:—Sergeant Bryant, Private Tagg, Private Doherty, Private Williams.

1st Dragoons. Lieutenant Caldwell has leave of absence from October 16th to January 10th, 1861; Cornet Hay has leave of absence from October 12th to January 12th, 1861.

2nd Dragoons. The following officers have leave of absence: Captain Buchanan from October 11th until January 10th, 1861; Captain Price, from October 15th to January 14th; Captain Nugent, from October 11th to January 10th; Captain McNeill, from October 15th to January 10th; Lieutenant Dunbar, from October 11th to January 10th; Lieutenant Stewart, from October 11th to January 10th; Lieutenant Cleghorn, from October 11th to January 10th; Lieutenant Browning, from October 11th to January 10th; Lieutenant Parr, from October 11th to January 10th: Cornet Du Cane, from October 11th to January 10th; Cornet Hunt, from October 11th to January 10th; Veterinary-Surgeon Hart, from October 15th to December 30th.

4th Light Dragoons. The following officers have leave of absence: Major Cornwallis from October 14th to January 14th, 1861; Captain Ellis, from October 14th to January 14th; Captain Lindesay, from October 14th to January 14th; Lieutenant Jones, from October 14th to January 14th; Lieutenant Gist, from October 14th to January 14th; Lieutenant England, from October 14th to January 14th; Lieutenant Brooke, from October 14th to January 14th; Lieutenant Hodgkinson, from October 14th to January 14th; Surgeon-Major Alexander has leave of absence from October 18th to December 18th.

5th Lancers. Surgeon Huish has been granted leave of absence from the 30th of October to the 20th of December, on private affairs.

14th Light Dragoons. Brevet-Major Need has leave of absence from October 15th to December 10th; Cornet Eagle has leave of absence from October 27th to November 27th, 1860.

Royal Artillery. The following officers have leave of absence: Lieutenant Sandham, from October 12th to December 30th, 1860; Lieutenant Isacke, from October 15th to January 10th; Lieutenant Handcock, from October 17th to December 31st. Major Field will take up his appointment to-day as Deputy-Assistant-Quartermaster-General to the regiment, at head-quarters, in succession to Captain Freeth, who retires from the office, after five years' service, and will resume the command of the 4th battery 1st brigade of garrison artillery. — The 3rd battery of the 4th brigade, under the command of Captain Mercer, was, on Tuesday, placed under orders to embark at Gravesend for New Zealand on the 10th November. The battery is equipped with Armstrong guns, and the non-commissioned officers have been fully instructed in the management of these weapons at the school of gunnery, Shoeburyness. On account of the long voyage, the horses belonging to the battery will not be taken out, but the requisite number will be purchased in Australia and forwarded thence to New Zealand, under the charge of an officer of the regiment selected for that purpose.—Second Captain F. G. Bayley, in charge of invalids from the Cape frontier, arrived in Southampton, in the mail steamer Athens, on the 28th ult., and proceeded to the head-quarters of his regiment, in the south-west district, in the Gun Wharf Barracks at Portsmouth, where the men were accommodated. Captain Bayley proceeded on the 30th ult. to Chatham, with 65 invalids and 6 women and children.

Royal Horse Artillery. Brevet-Major Newton has leave of absence from October 15th to January 30th, 1861.

Royal Engineers. The 27th company of Royal Engineers, under the command of Captain Durnford, will shortly proceed to Gibraltar, to be employed at that station. The Government has also decided on considerably augmenting the companies of Royal Engineers stationed at Malta and Corfu. Captain William H. D. Dumaresq, has joined the head-quarters of the Royal Engineer establishment, and taken over the command of the 4th company, recently arrived from India, from Lieutenant G. S. Berkeley, who has proceeded to Dublin for duty with the Royal Engineers at that station. In consequence of the few officers of the Royal Engineers available for duty, the authorities have considered it advisable to retain the commanding Royal Engineer at Dover, Colonel (now Major-General) R. J. Stotherd, in the command at that station until the important works now in progress at Dover have been completed. Colonel Stotherd, on his promotion to the rank of major-general, would, according to the rules of the Service, go on the unemployed list of officers of the corps. An inquiry by a board of officers into the conduct of a shoeing-smith of the corps of Royal Engineers, left in charge of the horses belonging to the detachment of the A troop of the Royal Engineer Train, at Chatham garrison, during the past summer, has resulted in a report to the authorities, accusing that individual of gross neglect of duty and disobedience of standing orders. The feet of the horses have been scandalously neglected, and improperly treated in the shoeing, and it is feared that several will be rendered permanently lame. It is expected that a severe punishment will be awarded the delinquent on the facts being investigated by the Duke of Cambridge. So great is the demand for the services of the Royal Engineers, that it is confidently expected a large increase will be made to the corps, as soon as officers can be procured, and are sufficiently advanced in their studies at the Royal Military Academy to be brought forward for their commissions.

1st Regiment, 1st battalion. Ensign Norman has leave of absence from his depôt at Colchester, until December 31. —2nd battalion. A detachment arrived at Chatham on Tuesday.

5th Fusiliers, 1st battalion. Captain Chapman of this depot has short leave of absence from Colchester camp, and Lieutenant Hoare will not return to his duties till December 31st.

8th Regiment, 1st battalion. Colonel Haines has proceeded on leave of absence, and the duties of the Gosport district are carried on by Colonel Anderson, Royal Marine Light Infantry, who is the next senior officer.

10th Regiment, 1st battalion. Colonel Longden, C.B., has leave from October 26th, 1860, to January 26th, 1861, on private affairs. Lieutenant and Adjutant Beale has leave from November 5th to December 30, 1860, on private affairs.

11th Regiment. A detachment arrived at Chatham on Tuesday from Portsmouth. The men have been turned over to the invalid depôt, to await the examination of a Chelsea board. The officers and men of this regiment, quartered at Anglesey barracks, Portsea, rendered important service at a destructive fire that occurred on Saturday last on the premises of Mr. Chamney, Commercial Road, Landport, bread and biscuit baker to the Queen. The fire originated over the ovens, and was so rapid in its progress, that in three quarters of an hour the stock and premises were destroyed. But even in this short space of time the exertions of the officers and men of the 11th Regiment, as well as a corps of Sappers, we most praiseworthy. We regret, however, to add, that several of the gallant fellows of the 11th were seriously hurt by the falling in of the walls, and were carried tothe hospital, where, however, they are in a fair way of doing well. The authorities of the hospital afforded every accommodation not only to the sufferers, but for the reception of the property saved from the fire. A general court-martial has been sitting at Portsmouth during the last fortnight, convened under the presidency of Colonel Dunlop, R.A., C.B., for the trial of Quartermaster Napier, of the 2nd battalion, accused of using threatening and insulting language towards his commanding officer, Lieut.-Colonel Jenner, in saying to the Adjutant that "if he saw him, Lieut.-Colonel Jenner, at the head of his regiment, he would pull him out of the ranks, and kick him before all the men." The prisoner grounded his defence upon provocations which he had received from the commanding officer, which induced him to make an application for half pay; and which, having placed in the colonel's hands, he then considered himself a civilian, and not amenable to military discipline, while his application was under consideration. It is believed that this view will not be borne out, and that the sentence of the court, when promulgated, will confirm the present general belief that no commissioned officer can, under any circumstances, sell, or resign, or retire from the Service, until the consent of the Crown has previously been obtained.

25th Regiment, 2nd battalion. Lieutenant Robertson has been granted leave of absence from the 27th of October to the 17th of April next, at the recommendation of a medical board.

26th Regiment. The following officers have leave of absence: Brevet-Lieut.-Colonel M'Donald, from October 15th to November 14th; Major Clerke, from October 16th to January 16th, 1861: Captain Kerrich, from October 16th to January 14th; Captain Mosse, from October 16th to January 14th: Captain Calcott, from October 18th to January 14th; Lieutenant Armstrong, from October 16th to January 14th; Lieutenant Fawkes, from October 16th to January 14th; Lieutenant Story, from October 16th to January 14th; Lieutenant Gregson, from October 16th to December 30th: Ensign Buchanan, from October 16th to December 30th; Ensign Sharp, from October 16th to December 30th; Ensign Cresswell, from October 16th to December 30th.

29th Regiment. Paymaster Longden has leave from November 4th to December 15th, 1860, on private affairs.

36th Regiment. The following officers have leave of absence: Lieut.-Col. Hort, from October 20th to December 31st, 1860; Captain Lloyd, from October 13th to January 14th, 1861; Captain Carr, from October 13th to January 14th; Captain Ingham, from October 13th to January 14th; Captain Biddle, from October 20th to November 14th, 1860; Lieutenant Willett, from October 13th to January 14th; Lieutenant Sale, from October 13th to January 14th; Lieutenant Scott, from October 13th to January 14th; Lieutenant Hawkes, from October 13th to January 14th; Lieutenant Taylor, from October 15th to January 30th; Lieutenant and Adjutant Kelsey, from November 1st to December 28th.

41st Regiment. A medical board assembled at the medical officers' consulting room, Aldershot, for the purpose of examining and reporting upon an injury received by Major Bush, at the battle of Inkermann.

Royal Marines. In consequence of the number of Royal Marines belonging to the light infantry companies who have joined the artillery division, into which they have been allowed to volunteer, the strength of the several companies has been considerably reduced, numbers of marines belonging to the ships comprising the Channel squadron having also volunteered for the artillery companies. Recruiting, however, is proceeding exceedingly satisfactorily, and the various recruiting parties stationed at the several seaport towns have been very successful in raising men for that branch of the Service. A number of fine young men arrived on Monday at head-quarters from Hull, and during the past week several parties of recruits were sent up to head-quarters from the other recruiting districts.

56th Regiment. Ensign Barnell has short leave of absence from his depot in Colchester camp.

60th Rifles, 4th battalion. The following officers have leave of absence: Lieut.-Colonel Hawley, from October 13th to January 14th, 1861; Captain Pemberton, from October 13th to January 14th; Captain Robinson, from October 13th to January 14th; Captain Cookworthy, from October 13th to January 14th; Captain Hinxman, from October 13th to January 14th; Captain Travers, from October 13th to January 14th: Lieutenant Hamilton, from October 13th to January 14th; Lieutenant Mulligan, from October 13th to January 14th; Lieutenant Poole, from October 13th to January 14th; Lieutenant Massy, from October 13th to January 14th: Ensign Mariette, from October 13th to January 14th; Ensign Miller, from October 13th to January 14th; Ensign Terry, from October 13th to January 14th; Ensign De Roebeck, from October 13th to January 14th.

64th Regiment. Although it had been almost arranged that the 85th Regiment should proceed from India to New Zealand, in the event of the Indian Government not being able to spare a regiment, we believe it has been decided that the 64th shall go to measure their strength with the brave natives of New Zealand. Remembering the fatal field of Cawnpore and the officers who fell there, we say, God grant these gallant fellows may be well commanded.

66th Regiment. Captain Walsh has leave of absence from his depôt till the 18th inst., when he will embark and join his regiment in India.

96th Regiment. The following officers have leave of absence: Brevet-Lieut.-Colonel Honourable A. M. Cathcart, from October 16th to January 10th, 1861; Captain Mac Carthy, from October 17th to January 10th; Captain Cumberland, from October 16th to January 10th; Captain Douglas, from October 17th to January 10th; Lieutenant Houghton, from October 17th to January 10th; Lieutenant Reid, from October 17th to January 10th; Lieutenant Aytoun, from October 16th to January 10th; Lieutenant Henniker, from October 20th to January 10th; Ensign Josselyn, from October 16th to January 10th; Ensign Curteis, from October 20th to January 10th.

St. Helena Regiment. His Royal Highness Prince Alfred did the St. Helena Regiment the distinguished honour of presenting it with new colours on the occasion of his short visit to the island. This ceremony took place on the 29th of September in the Town Square, on the return of His Royal Highness from a visit to Longwood. He was received with a royal salute. The regiment then formed three sides of a square, with the company of Volunteer Rifles in subdivisions on either flank, the new colours being laid upon an altar of drums erected before a daïs covered with scarlet cloth, on which His Royal Highness stood; behind him were rows of chairs, filled with elegantly dressed ladies. The old colours then advanced in slow time, the band playing the regimental march. They were then saluted for the last time, cased, and marched to the rear. The ensigns then advancing to the daïs, the ceremony of consecration was performed by the Rev. W. Helps, garrison chaplain, the Lord Bishop of the diocese adding a short and feeling address and the blessing. The officers being called to the front, the new colours were handed to the Prince by Lieut.-Colonel Gahan and Captain Loudon, who presented them to the senior ensigns, Donelan and Drummond Hay, who received them kneeling. His Royal Highness then addressed the regiment as follows:—"I am most happy to present these new colours to the St. Helena Regiment, and do so with full confidence that if it is ever called upon to defend this important island, they will be borne with the same gallantry that has at all times distinguished the British infantry." To which Lieut.-Colonel Macbean replied:—"Your Royal Highness, in the name of the officers, non-commissioned officers, and soldiers of the St. Helena Regiment, I beg to thank you for the very great honour which you have this day conferred upon it, by presenting it with new colours, an honour which will be remembered by all to their last day; it is true they are not emblazoned with victories, although there are many amongst us who bear upon their breasts tokens of the favour of our Queen and country; but I trust I may assure your Royal Highness that should we ever be called upon to defend the colours you have now so graciously entrusted to our keeping, it will be found that we shall not be wanting in that gallantry which has ever been the proverbial characteristic of the British army. Once more I beg to offer to your Royal Highness the expression of our deep and devoted thanks." The colours were then saluted, and on the regiment re-forming line were trooped to their place in the centre, the band playing "Rule Britannia." The escort for the colours was composed of a division of men wearing the Crimean and other medals. The regiment then marched past in slow time, the Volunteer Rifles bringing up the rear. The ground was kept by the battery of Royal Artillery. A *dejeuné* was to have been given to the Prince by the officers of the regiment, but owing to the very hurried visit of His Royal Highness, it was necessarily dispensed with. His Excellency the Governor, the Honourable Lieut.-Colonel Beatty, R. E., commanding the troops; the whole of the civil and military authorities; the French officers from Longwood, and an immense crowd of spectators, were present. The whole ceremony was most gratifying to the regiment, and its remembrance will be cherished as long as a man remains who was present on the occasion. The children of the regiment were present, carrying banners on which were inscribed, "God Save the Queen," and "Welcome Prince Alfred;" the staves were surmounted with crowns, and were decorated with flowers. His Royal Highness afterwards added to the honour already conferred, by graciously presenting the officers of the regiment with portraits of her most gracious Majesty, His Royal Highness the Prince Consort, and His Royal Highness the Prince of Wales.

9th Depot Battalion. Staff-Surgeon Chartres, doing duty with this battalion in Colchester Camp, and who is about to be gazetted to the 100th regiment, is ordered to hold himself in readiness to proceed to Gibraltar to join that regiment, as soon as passage will be provided for him, and he has received leave of absence till the time of his embarkation. A detachment of 65 casuals and 25 recruits belonging to this battalion left for Landguard Fort at the early part of the week.

10th Depot Battalion. A draft, consisting of three officers and 105 men of all ranks, from this battalion, was relieved on Saturday from Landguard Fort by one sergeant and 33 privates from the same battalion.

11th Depot Battalion. Private Albert Plomer, Lance-Corporal Edwin Bickerton, and Private James Simpson, 2nd battalion 10th Regiment, tried at the Preston Sessions for robbing Major Creagh, Paymaster of this battalion, of nearly 80*l*., have been convicted and sentenced to imprisonment, with hard labour, for two years, 18 months, and one year, respectively, in the House of Correction.

The Prince Consort visited his military library at Aldershot Camp on the 31st ultimo, evincing the warmest interest in the welfare of the establishment.

The following Circular Memorandum has been addressed to the infantry:—"Horse Guards, S.W., Oct. 20, 1860.—His Royal Highness the General Commanding-in-Chief is pleased to direct that when a regiment of infantry is formed in line, the band shall be drawn up in two ranks in rear of its centre, and shall march past and retain, whilst the regiment passes, the same formation, receiving the word of command 'left turn, right wheel,' when near the saluting point. The

Digitized by Google

drummers will form a third rank. This does not apply to bands of a brigade massed whilst the brigade marches past. —By command, James Yorke Scarlett, Adjutant-General."

The following Circular Memorandum has been addressed to the Army at home and abroad :—"Horse Guards, S.W., Oct. 22, 1860.—Her Majesty having, by a recent Warrant, largely extended the indulgences conferred upon the married soldiers, His Royal Highness the General Commanding-in-Chief requests that officers commanding regiments will use their best endeavours to secure these benefits for deserving soldiers. His Royal Highness has reason to believe that, in some instances, these advantages have been conferred upon men of indifferent character, to the prejudice of those who by their good conduct and length of service have established a claim to these indulgences. It is the duty of commanding officers most carefully to consider these claims, and when deserving soldiers cannot be admitted on the strength of their corps as married men their applications should be registered.—By command, James Yorke Scarlett, Adjutant-General."

A new pattern oil-bottle for the use of the Enfield rifle is to be reported upon by order of the Right Honourable the Secretary at War.

SHORNCLIFF CAMP.

Just now the 2nd battalion of the 17th Regiment, stationed at Shorncliff, is making itself notorious for insubordination ; as within the last few weeks no less than three general courts-martial have been held for the purpose of trying three privates of this battalion for the high military offence of striking commissioned officers ; and on Monday last Private William Chatley being brought before a district court-martial for trial, used highly threatening, impertinent, and disgusting language to the president and members, refusing to be tried by the court; on which he was put back, and will be tried by a general court-martial for this offence. It would be satisfactory to both the officers and men of the 17th Regiment if a court of inquiry was holden to ascertain where the fault is, and thus remedy the evil, if possible.

A prolific cause of crime in the Army, and one that admits of an easy remedy, is the practice of allowing prisoners waiting their trial, and also those waiting the sentence of courts-martial, to be in the guard-room of the regiment, where they have the opportunity of corrupting the minds of young soldiers who may by chance be placed in the guard-room either as sentinels or perhaps prisoners for minor offences ; men who will not hesitate to strike or shoot down a superior officer ought to be prevented from poisoning the minds of many with whom they are thus brought into intimate connection.

COLCHESTER CAMP.

Major-General Wood, who has been in command of this camp since March last, and succeeded General Blomfield, attended at his office on Wednesday afternoon for the last time, and having signed the usual monthly returns, he surrendered the command into the hands of Colonel the Hon. Alexander Gordon, his successor. Within so short a period few military men have so won the confidence and respect of all classes in a camp, or have left an important command more sincerely regretted than Major-General Wood; his courteous affability securing the esteem of all classes of officers under his command, whilst in him the common soldier found a friend as well a rigid disciplinarian. As soon as it became known that the gallant officer would leave Colchester by the afternoon train, the Colchester Volunteer Rifle Corps, attended by their officers, assembled in the High Street, and marched to the railway station, to pay a fitting compliment to one who had always evinced a lively interest in their welfare. They were drawn up in a double line at the entrance to the railway station, when Major-General Wood, accompanied by Colonel Dixon, in command of the 9th battalion, Major Gore, Captain Clark, R.E., Sir William O'Malley, Barrack-Master, and several officers of depôts in the camp, drove up, and was received with a general salute, officers and men presenting arms. The men were then inspected by General Wood, who, walking to the front, said he was at a loss to find words to express himself for the high compliment they had paid him in attending there that day. It was but a few months since he came to Colchester, a stranger to them all, and that they should think him worthy of so high a mark of their respect, after so short a time, could not fail to make a deep impression on his mind. The support which he had always received, not only from members of his own profession, but from the civil authorities of the town, made him resign the command with great feelings of regret ; and it would always make him look upon his short residence in Colchester as one of the brightest and pleantest periods in his military career. Should he ever be called from retirement into active service he should be pleased and proud that the Essex Volunteer force should again be placed under his care. Three cheers were then given for the General, who immediately after left by the train, and the Volunteers returned into town, and were dismissed.

In the Garrison Orders for Thursday there was the following paragraph :—"Her Majesty, having appointed the Honourable Colonel Gordon, C.B., to succeed Major-General R. B. Wood, C.B., in command of this camp, all the reports will be made to that officer. The Major-General takes this opportunity of tendering his cordial thanks to the officers, non-commissioned officers, and men, for the support he has uniformly received, and he takes leave of all ranks with feelings of regret." The new commandant, who is a son of Lord Aberdeen, and connected by marriage with the family of his grace the late Duke of Richmond, has entered upon the duties of his office.

The Secretary for War having approved of the appointment of Deputy-Assistant Commissary-General Ward to this camp, vice Deputy-Assistant Commissary-General Marsh, ordered to proceed to the Curragh camp, that officer commenced his duties on Thursday.

In consequence of the coldness of the huts, the colonel-commandant has directed the issue of fuel to the several depôts in camp. This will shortly be much more necessary than now, the wooden erections being as miserably cold during the severity of winter, as they are intolerably hot in the months of summer.

ALDERSHOT.

Captain M. W. De la Poer Beresford, 49th Regiment, is appointed temporarily as Superintendent of the Fire Brigade, vice Captain Bent, East Middlesex Militia, who resigns that appointment.

His Royal Highness the General Commanding-in-Chief has been pleased to approve of Deputy-Assistant Commissary-General West being removed from the Curragh camp to Aldershot.

Major-Generals and officers commanding brigades and corps are ordered to practice their men in carrying out the orders connected with the alarm of fire ; those in the south camp and permanent barracks on the first Friday, and in the north camp on the first Wednesday of each month, from November until the end of April. The alarm to sound at 12 o'clock.

Two Boards of Examination will assemble at 12 o'clock on Friday next; one in the mess-room of the 9th Lancers, for the purpose of examining and reporting upon Cornet Ormerod, of that corps; and the other in the mess-room of the 41st Regiment, to examine and report upon Ensigns Gray and Wynne, of that corps, as to their qualifications for promotion to the senior grade.

Lieut.-Colonel the Hon. H. H. Clifford, V.C., Assistant Quartermaster-General, has leave of absence from 1st of November to 15th of December, 1860, on private affairs.

The Army Gazette.

WAR OFFICE, PALL MALL, October 30.

Rifle Brigade—Major-General Sir George Buller, K.C.B., from the 88th Foot, to be Colonel-Commandant, vice Lieutenant-General Sir Henry G. W. Smith, Bart., G.C.B., deceased.

88th Regiment of Foot—Major-General John Cox to be Colonel, vice Major-General Sir George Buller, K.C.B., transferred to the Rifle Brigade.

INDIA OFFICE, October 30, 1860.

The Queen has been pleased to appoint Sir William Thomas Denison, K.C.B., Colonel in the Corps of Royal Engineers, to be Governor of the Presidency of Madras.

WAR OFFICE, PALL-MALL, November 2, 1860.
Commissariat Department.

Deputy Assistant Commissary-General James Augustus Frederick Mitchell, having completed the prescribed period of service on the Coast of Africa as Acting Assistant Commissary-General, to be confirmed in the rank of Assistant Commissary-General.

THE SIXTH BENGAL EUROPEAN INFANTRY.

The following letter has been addressed to the editor of the *Homeward Mail*, London :—

"Sir,—Your paper of the 16th instant contains, under the head of 'General Military Intelligence,' a statement, said to have been taken from the *Calcutta Englishman*, of the 6th Europeans having been ordered to Barrackpore, 'in consequence of great dissatisfaction having shown itself in the regiment regarding the bounty money. The men claim the bounty for being transferred to the Queen's Service.'

"I trust you will do me the favour to give this statement the most unqualified contradiction in your next issue.

"Her Majesty's 6th Bengal European Infantry, a young regiment (as yet *sans reproche*, and long may it maintain its good name), has simply been ordered down from Hazaree Bagh (one of the most healthy cantonments in India) for duty at the Presidency, where it is to relieve another corps that has of late suffered very greatly in health from the Calcutta climate, and has in consequence been directed to proceed up country.—I am, &c.,

"J. C. Macpherson,
"Lieut.-Colonel and Brevet-Colonel, H.M.'s 6th Regt. Bengal European Infantry."

[We observe a statement in the telegraphic dispatches from India this week that the 6th Europeans have exhibited a mutinous spirit at Dinapore, and there may be some mistake between the two regiments.]

STATIONS OF THE BRITISH ARMY.

Corrected up to 1st November, 1860.

[Where two places are mentioned, the last-named is that at which the Depôt is stationed.]

1st Life Guards — Regent's Park
2nd do.—Hyde Park
Royal Horse Guards—Windsor
1st Dragoon Guards—Madras ; Canterbury
2nd do.—Bengal ; Canterbury
3rd do.—Bombay; Canterbury

THE NAVY.

ADMIRALTY, October 29.

PROMOTIONS.

Lieutenants to be Commanders on the Retired List—Joseph Irwin, who entered the Navy in April, 1806; George Henry Heathcote, who entered the Service in 1812; Charles Horace Lapidge, who obtained his lieutenancy in 1824; Charles Moss, who entered the Navy in 1808; Richard Gunning Jeffreys, who entered the Service in 1812; Henry Wall, who entered the Navy in 1819; and Charles Orlando Henry Perkins St. John, who passed his examination in 1840.

Acting Assistant-Surgeons confirmed in the following ships—Henry A. Close, in the Clio, 22, in the Pacific; George W. Locke, in the Leopard, 18, flag-ship on the South-East Coast of America station; Thomas L. Bickford, in the Scout, 21, at China; John Ligertwood, M.D., in the Impérieuse, 51, at China.

APPOINTMENTS.

Commander—Sir Malcolm M'Gregor, Bart., to the Harrier.

Lieutenants—Alfred J. Cheek to the Desperate, 8, at Devonport; Robert H. Moubray, from Camber to Priory, Hastings Coast-Guard Station, vice Lapidge, promoted; Arthur Bagley, to be chief officer in command of the Queen's-ferry, Fife, Coast-Guard Station, vice Jeffreys, promoted; E. T. Nott to the Himalaya, and John H. Vidal to the Scourge.

Master—Henry C. Sedmond, to the Harrier.

Surgeon—William G. J. Ayre to the Harrier.

Paymaster—Silus W. Parker, from the Majestic, to the Harrier.

Assistant-Surgeons—David A. Moxey (acting), to the James Watt; W. F. C. Bartlett, to the Asia; William A. Turner, to the Harrier.

Second-Master—Vernon Jones to the Gorgon, additional.

Midshipmen—A. E. Hutchinson to the Bacchante; F. R. Brownlow to the Emerald; E. A. F. Baxter and C. S. W. Willis to the Mersey.

Masters Assistants—Edward Kearns to the Desperate; Edward J. T. Behenna to the Royal Albert; Henry G. Walsh to the Conqueror; Frederick K. Taylor to the Gorgon.

Assistant Paymaster—Charles H. Wells to the Majestic.

Chief Engineer—Robert Moore confirmed in the rank of chief engineer and appointed to the Asia, for charge of the machinery of the Tribune.

First-Class Assistant-Engineer—John P. Allen to the Harrier.

Second-Class Assistant-Engineers—Thomas W. Sanders (acting) to the Harrier; T. Redford to the Diadem; and J. Staley, to the Dauntless for service in the Leveret; Samuel M'Callum to the Asia, for charge of the Beaver; Samuel E. Derrick to the Cumberland, for charge of the Griper.

Third-Class Assistant-Engineers—John Dyson to the Harrier; C. H. Thompson to the Dauntless; James Imrie (for service in the Wellington), Thomas Sanders (for service in the Shannon), John Leigh (for service in the Princess Royal), and James Wootton (for service in the Immortalité) to the Asia (acting); Edward H. Willey (for service in the Revenge), Henry Bunting (supernumerary), William Thomas Bray (supernumerary), and N. F. Hockerston (supernumerary) to the Indus (acting); Edwin Last (acting) to the Himalaya.

ADMIRALTY, November 2.

APPOINTMENTS.

Captain—George Parker to the Charybdis.

Lieutenants—A. A. Hansom to the Centurion; A. Williams to the Firebrand; William H. Childers and Henry Salmond to the Charybdis; H. M. Miller (flag) to the Impregnable.

Masters—George Giles to the Charybdis; David Batt to the Emerald.

Surgeons—James Walsh to the Hogue; Christopher K. Ord to the Charybdis.

Paymaster—Edward J. Giles to the Charybdis.

Assistant-Surgeon—Benjamin Browning to the Victory (additional).

Midshipmen—Edward L. Trafford to the Royal Albert; R. A. Smith, A. R. Hewett, and V. E. J. B. Donop, to the Charybdis.

Naval Cadetship—Marcus L. Bridges (nominated).

Assistant-Paymaster—John Hay to the Porcupine.

Chief Engineers—Joseph Churcher to the Emerald; Felix Freeman to the Cumberland, for charge of the machinery of the Anson; John Hood (promoted) to the Asia, for charge of the machinery of the Medea.

Third-class Assistant-Engineers—William Fisher Rowe (acting) to Indus.

COAST-GUARD OFFICE, Nov. 1.

REMOVALS.

Inspecting Commanders—M'Leod B. Cockraft, from Kinsale to Malahide, Dublin Coast-Guard Station, vice Irwin, promoted; James P. Thurburn to Kinsale Division, vice Cockraft; John De C. A. Agnew to Leith, vice Wm. Mould, removed to Aberdeen.

Inspecting Lieutenants—Lieutenants E. J. B. Clarke, from Donaghadee Station, to Ballycastle (K.) Division, vice Shairp, promoted to Retired List; D. Elliot, from Clontarf, to Keel, vice Adam, removed; H. Bainbridge, from Whitby to Elie, vice Carey, promoted to Retired List; R. I. St. Aubyn, from Shoeburyness to Barton-on-Humber, vice Smyth, promoted to Retired List; C. E. Powys, from Lymington to Bournemouth, vice Parsons, promoted to Retired List; W. Bailey, from Brighton to Castletown, vice Hungerford, promoted to Retired List; John W. G. Dawson Damer, from Chidcock to Holbeach, vice Batt, promoted to Retired List; F. Parke, from Stokes Bay to Seafield, vice Morriss, promoted to Retired List; A. T. Freese, from Burghead to Patrington, vice Poynter, promoted to Retired List.

Inspecting Chief Officers—Captain William K. Shoveller, R.M., from Ballycotton to Mullaghmore Division, vice Elliott, promoted to Retired List; Messrs. F. C. Fitzgerald, from Townsend to Blackwater, vice Carr, promoted to Retired List; C. W. M. S. M'Kerlie, from Almouth to Howth, vice Prosser, removed; John Miller, from Tynemouth to Wrangle, vice Butcher, promoted to Retired List; T. Bate, from Rutland to Belmullet, vice Dawson, promoted to Retired List; John Adam, from Keel to Rutland, vice Bate; H. Prosser, from Howth, to Sheephaven, vice Collins, promoted to Retired List.

Chief Officers—Lieutenant J. C. Clark, from Polkerris to Greenbank, Falmouth, vice Pooley, promoted to Retired List; Messrs. H. B. Gawler, master, from Yealm to Teignmouth, vice Lawless, promoted to Retired List; Joseph Cutajar, master, from Atherfield to Brook, vice Goold, promoted to Retired List; William H. Williams, master, from Portwrinkle to Cawsand, vice Edwards, promoted to Retired List; Geo. A. Stabb, master, from Gorran Haven to Polkerris, vice Clark, removed; William Wood, master, from Ringsend to Crandfield Point, vice Petch, promoted to Retired List.

Chief Officer of Second Class—Mr. John C. Harry, from Erith to St. Ives, vice Pearson, promoted to Retired List.

Algiers, 91, screw, was paid wages alongside the slip in Portsmouth dockyard on Thursday, and the men were afterwards granted leave. A large body of women were waiting at the dock-gates to receive them, as they emerged from the pay-office.

Archer, 13, screw steam-corvette, Captain Frederick A. B. Crawfurd, was lying off the Island of Ascension on the 5th of October.

Ariadne, 26, screw frigate, Captain E. W. Vansittart, sailed from Portland on the 20th of October in company with the Hero for England.

Brisk, 13, screw steam-corvette, Captain Algernon F. De Horsey, with the flag of Rear-Admiral Sir Henry Keppel, K.C.B., on board, had not returned to the Cape from her cruise to Zanzibar, by the last accounts, which reach to the 22nd of September.

Clio, 22, screw steam-corvette, Captain Thomas Miller, was at Panama on the 7th of October.

Cossack, 20, screw steam-corvette, Captain Richard Moorman, was at Grenada on the 10th of October.

Cuba, schooner, tender to Imaum, was in Port Royal Harbour on the 10th of October.

Cygnet, 5, screw steam-sloop, steamed out of Portsmouth Harbour, on Wednesday, for trial of her engines.

Dee, 4, paddlewheel steam-ship, Master-Commander T. C. Pullen, went into Portsmouth Harbour on Monday, to discharge boilers and machinery for the several men-of-war fitting in the steam-basin.

Duke of Wellington, 131, screw liner, was placed in the steam-basin at Portsmouth on Tuesday, to be docked. It is rumoured that she will be commissioned to take the place either of the Marlborough, as the flag-ship of the Mediterranean fleet, or of the Royal Albert, as the flag-ship of the Channel squadron.

Emerald, 51, screw frigate, Captain Arthur Cumming, has been ordered from Portsmouth to Devonport, and will join that portion of the Channel squadron under Rear-Admiral Stopford, and will proceed to sea in company with the other ships.

Euryalus, 51, screw steam-frigate, Captain J. W. Tarleton, C.B., left Table Bay on the 19th of September, with His Royal Highness the Prince Alfred on board. The Euryalus was to touch on her passage home at St. Helena, Ascension, and Sierra Leone, but as her stay at each of these places would be very short, she may be hourly expected at Spithead.

Firebrand, 6, paddle steam-sloop, Commander James M. Bruce, went into Portsmouth harbour on Saturday last to coal and otherwise refit.

Firefly, 4, steam-vessel, Commander A. L. Mansell, was at Beyrout on the 21st ult.

Flying Fish, 6, screw steam-sloop, Commander Charles W. Hope, left Portland with the Royal squadron on the 20th of October.

Forte, 51, screw steam-corvette, Captain Edward W. Turnour, was at the Cape of Good Hope on the 19th of September. She had accompanied the Euryalus a short distance to sea on the occasion of the departure of Prince Alfred for England. Letters from this ship express deep regret at the stigma which has been cast upon her by the occurrences which led to a rupture between the Governor, Sir George Grey, and Rear-Admiral Sir Henry Keppel, and which caused the absence of the latter officer from the chief station of his command during the visit of Prince Alfred. The Duke of Newcastle will now in a very few days be in a position to place the information which during his absence has reached the Colonial Office on the subject before his colleagues.

Gorgon, 6, paddle steam-sloop, Commander Bedford Pim, made a trial of her machinery on Thursday at Portsmouth.

Greyhound, 17, screw, Commander F. W. Sullivan, left Beyrout on the 16th of October for a short cruise, and returned on the 18th, and sailed again in company with the Liffey and Doris for a cruise on the Coast of Syria.

Hero, 91, screw steam-liner, Commodore G. H. Seymour, C.B., embarked His Royal Highness the Prince of Wales at Portland on the 20th of October, and sailed for England at 4 p.m. on the same day, and was clear of the land by 7 p.m.

Hydra, 6, paddle steam-sloop, Commander R. V. Hamilton, was in Port Royal Harbour on the 10th of October.

Imaum, 72, sailing line-of-battle ship, Commodore Hugh Dunlop, Captain Samuel Morrish, was lying in Port Royal Harbour on the 10th of October.

Lapwing, 4, screw, Commander M. F. O'Reilly, left Beyrout on the 20th of last month for Latakia.

Liffey, 51, screw, Captain G. W. Preedy, left Beyrout on Saturday the 20th ult. in company with the Doris, 32, Captain Heathcote, and Greyhound, 17, Captain Sullivan, for a cruise along the Syrian Coast.

Liverpool, 51, screw frigate. This fine frigate was safely launched from Devonport Dockyard on Tuesday afternoon, shortly after 4 o'clock. Her principal dimensions are—length between perpendiculars, 235ft.; breadth extreme, 50ft. 1in.; ditto for tonnage, 49ft. 7in.; ditto moulded, 48ft. 9in.; depth in hold, 18ft. 5in.; burden in tons, 2654 46-47; armament on the main deck, 30 8-inch guns, 65cwt., 9ft. long; on the upper deck, 20 32-pounders, 58 cwt., 9ft. 6in. long; light draught—afore, 13ft. 6in.; abaft, 18ft. 3in.; load ditto—afore, 20ft. 11in.; abaft, 22ft. The lines of the Liverpool are the same as those laid down by the Comptroller of the Navy for the Liffey, 51, and Topaz, 51, which answer well both under canvas and steam. She was constructed by Mr. James Peake, the master-builder at Devonport, under the superintendence of Mr. William Mitchell, acting foreman of the yard. Considerable activity has been evinced in bringing her forward, as she was only commenced in November, 1859—she has been therefore completed in eleven months. This is a striking contrast to the old-fashioned doings in our own dockyards, as well as in those of America, as a reference to an account of the United States' Navy in another column will prove.

Lucifer, paddle steam-vessel, sailed from Portsmouth on Wednesday morning for Portland, with the Hyacinth, coal depôt, in tow, and has since returned to the first-named port.

Meander, 44, sailing-frigate store-ship, Captain W. F. Burnett, C.B., was lying at Ascension on the 5th of October.

Meteor, 16, iron floating battery, has been removed into the ship basin at Portsmouth to be docked for repairs, which it is expected will be of an extensive nature. This will undoubtedly be the case if it be intended to adapt this vessel for the purpose of coast defences.

Neptune, 90, screw liner, Captain F. A. Campbell. Letters received from this ship when off Beyrout, mention a gallant act on the part of two seamen belonging to that ship while engaged in one of the boats in watering the ship from the shore. A boat from one of the French men-of-war was similarly engaged, when, owing to the heavy surf running on the beach, she was capsized. Two of the Neptune's boat's crew, named Farlane and Fry, jumped overboard, and succeeded in bringing one of the Frenchmen on shore, two of the crew being drowned before assistance could reach them. The half-drowned French seaman, on being brought ashore by his preservers, nearly lost his life at the hands of the crowd assembled on the beach, who, in their haste to complete the work of resuscitation, held the man up by his legs to allow the water to run out of his mouth. The naval cadet in charge of the Neptune's boat, Mr. C. B. Anson, was fortunately observing the proceedings, and, recollecting the instructions contained in *Nares' Cadets' Guide*, applicable to such circumstances, and which he had learnt as a cadet on board the Britannia, he took the man out of the hands of the crowd, and gave proper directions for his treatment, which resulted in his recovery.

Prince of Wales, 131, screw liner, made an official trial of her speed at the measured mile in Stokes Bay on Wednesday. She made six runs, and averaged a speed of 12¼ knots, her machinery working remarkably well. Captain Gordon, of the steam reserve was in charge of the ship.

Princess Royal, 91, screw liner, in the first-class steam reserve at Portsmouth, on Monday, made her half-yearly trial of machinery, &c., which was satisfactory on every point.

Racoon, 21, screw, Captain W. C. Chamberlain, was at Beyrout on the 21st of last month with the Firefly, a French line-of-battle ship, a frigate, and two small craft, a Turkish line-of-battle ship, and a Russian frigate.

Serpent, 4, screw steam-sloop, of 200 horse-power, built by contract at Millwall for the Government, has been forwarded to Woolwich, and after inspection by competent officers, she will be completed for service. She is a smart vessel, having two funnels, and will prove a valuable addition to the Royal Navy.

Sidon, 22, paddlewheel steam-frigate, Captain R. B. Crawford, was at the Cape of Good Hope on the 19th of September. The Sidon escorted the Euryalus clear of the land on the occasion of the departure from the colony of His Royal Highness the Prince Alfred.

Sparrow, 5, screw gun-vessel, having been fitted with her machinery and engines of 80-horse power, proceeded down the river on Tuesday to the measured mile on a trial trip, under the charge of an officer from the factory department. The result was entirely satisfactory.

Tartar, 20, screw corvette, Captain John M. Hayes, sailed on Tuesday evening for the Pacific station.

Wasp, 3, screw steam-sloop, Commander Charles Stirling, having unfortunately got on shore, has been compelled to run down from the Cape of Good Hope to the Mauritius to be thoroughly examined and refitted.

The Royal Commission appointed to investigate and report as to the several Government dockyards, visited Woolwich on Thursday, and conferred with Commodore-Superintendent the Hon. J. R. Drummond. It is expected that the Commissioners will hold their first sitting and examination at Woolwich Dockyard on Monday next.

The *Moniteur de la Flotte* states the steam-corvette Coligny has sailed from Lorient, to cruise on the coast of Spain and Portugal.

The *Moniteur* of Monday quotes the following from the *Gazetto di Genova*: "We know positively that the English admiral, Mundy, has received orders from his Government to place a vessel of war at the disposal of Francis II. and his family, for the purpose of conveying him away from the Italian States."

Royal National Life-boat Institution.—A special general meeting of the subscribers of this institution was held on Thursday at its house, John Street, Adelphi, to consider and pass some bye-laws under the Charter of Incorporation recently granted to the society by the Queen. Thomas Baring, Esq., M.P., F.R.S., Chairman of the Institution, presided. The chairman having explained the objects of the meeting, the various bye-laws for the regulation of the institution were afterwards moved and carried unanimously. By its charter of incorporation the institution has become one of the most important benevolent societies in the country; and in order to enable it to perpetuate its humane and national objects, the charter has made special provision that any person may hereafter grant, sell, alien, or convey in mortmain, unto it, lands, tenements, or hereditaments, not exceeding 2000*l.* a year. The Third Service Clasp of the institution was voted to Captain Wasey, R.A., Inspecting-Commander of the Coast-Guard, who had, for previous gallant exertions, received its silver medal and Second Service Clasp—for his recent services in the Fleetwood life-boat, belonging to the institution, in saving 16 persons from the barque Vermont of Halifax, Nova Scotia. Payments amounting to 80*l.* were ordered to be made to the crews of the life-boats at Fleetwood, Appledore, Margate, Yarmouth, Fraserburgh, Silloth, Holyhead, Portmadoc, Barmouth, and Tyrella, for saving, or attempting to save,

Digitized by Google

life from various wrecks during the recent heavy gale. It was reported that the St. Andrew's life-boat, belonging to the institution, had proceeded and rendered, in conjunction with a steam-tug, some important services to several fishing boats from Bachhaven, which during the hurricane of the 3rd ult. had drifted out of the Firth of Forth; and that the poor fishermen had sent 3*l.* a few days afterwards, towards the support of the life-boat, with expressions of much thankfulness. It was also reported that the cost of the new life-boat stations of the institution now in course of formation at Thurso, Margate, Buckie, Portwick, St. Ives, Silsey, Llandudno, Southport, Llandwyn, and Ponarth amounted to upwards of 3000*l.* To meet this large and important outlay the society earnestly appealed to the public for help. Various rewards were also voted to fishing and other boats for highly laudable services in saving life from different wrecks during the heavy storms of the past month. It was reported that the effect of those storms had been very destructive to ships; but in consequence of the noble services of life-boats, shore-boats, and the life-saving apparatus, the loss of life had been comparatively small on those fearful occasions. A communication was read from Mr. Lockhart Thomson, of Edinburgh, stating that a lady, resident in that city, was desirous of benefiting mankind by forming a life-boat station on some part of the west coast of Scotland; and that it was her wish that the life-boat should be called after her late husband. The cost of the station, when complete, would probably be upwards of 500*l.* A letter was also read from Henry Pease, Esq., M.P., stating, in reference to the suggestion of the institution, to build a life-boat, by public subscription, to the memory of the late Mr. Herbert Ingram, M.P., that Members of Parliament might appropriately contribute towards its cost in remembrance of their late co-adjutor, and as a lasting token of sympathy with those who had been suddenly bereaved by his untimely end by shipwreck. A lady from Staffordshire, who had already given the institution 400*l.*, to pay for two life-boats, had sent 10*l.* to it towards the cost of the Herbert Ingram life-boat. Payments amounting to upwards of 800*l.* having been made on various life-boat establishments, the proceedings closed.

Rear-Admiral J. E. Erskine struck his flag on board the Edgar, 91, at Portsmouth, on Tuesday evening, having obtained leave of absence.

We learn by the *Moniteur de la Flotte* that the sailing corvette-of-war, the Cornalie, sailed from Toulon last week for the Pacific Ocean, to reinforce the squadron under the command of Rear-Admiral Larrieu.

The Navy Gazette.

ADMIRALTY, NOVEMBER 2.

Notice to Mariners—(No 35.) Australia—East Coast—*Alternating Light near Cape St. George*—The Pilot and Steam Navigation Board of Sydney have given notice, that on and after the first day of October, 1860, a light would be exhibited from the lighthouse recently erected on a prominent headland, situated about 1¼ miles northward of Cape St. George, and 2½ miles southward of the south point of entrance to Jervis Bay, East coast of Australia. The light is an *alternating* light, showing consecutively a *red*, *green*, and *white* light at intervals of *thirty seconds*. It is elevated 224 feet above the level of high water and is visible seaward when bearing between S. S. W. ¼ W. and N. It is seen as far as N. by E. ¾ E., over a sloping hill situated south of the lighthouse; but then a vessel must be a considerable distance to the southward of it. In entering Jervis' Bay the light will be eclipsed by Bowen Island, forming the south point of entrance, when bearing S. ¼ W.; and it will only be visible from a portion of the bay, between the bearings of S.S.E. ½ E. and S.E. The white light will be seen in clear weather at a distance of about 19 miles, and the green and red lights at 14 miles. The illuminating apparatus is catoptric or by reflectors of the third order. The light tower is 61 feet high, built of white stone, and stands in latitude 35° 9′ 16″ S, longitude 150° 47′ 8″ East of Greenwich. *Directions.*—Vessels approaching Cape St. George from the southward, should always endeavour to make this light, to avoid being embayed in Wreck Bay, the deep indentation westward of the Cape. The light will first open over the sloping hill to the southward of it, bearing N. by E. ¾ E.; caution must, however, be observed in nearing the Cape, which is a low, dangerous, rocky point, on which the sea breaks. When within the distance of about 8 miles, the light should not be brought to the northward of N. by W.; for if the vessel should be near the land, to the south-westward of this bearing, the light will be partially, if not wholly obscured, but by standing to the eastward it will gradually open out, and when bearing N.N.W. ¼ W. it may be passed with safety at a distance of from one to two miles. In approaching from the northward the light will open of Crocodile Head, bearing S.S W. ¼ W., and by keeping it in sight a vessel will pass the Head in safety at a distance of from one to two miles. Jervis' Bay affords good and safe anchorage in all winds. The bearings are Magnetic. Variation 10¼ East in 1860.—By command of their Lordships, *John Washington*, Hydrographer, Hydrographic Office, Admiralty, London, 23rd October, 1860. This notice affects the following Admiralty Charts:—Australia General, No. 1042; and East Coast, Sheet 2, No. 2142. Also Australia Lights List, No. 116; and Australia Directory, vol. 1, page 212.

The Treasury, New South Wales, 16th August, 1860.—His Excellency the Governor-General directs the publication of the following notice respecting the exhibition of a Light at the new Light House, near Jervis' Bay.—E. C. WEEKES.

New South Wales—East Coast of Australia—*Light-house near Jervis' Bay.*—The bearings given are magnetic, the distances are in nautical miles, and the variation is 10° 15′ E. A white stone tower has been erected on a prominent headland, situated 2½ miles south of the southern bluff (Bowen Island) of Jervis' Bay, and 2 miles north of the projection known as Cape St. George, on the coast of New South Wales, from which a light will be exhibited on and after the 1st of October next. The tower is 61 feet high and the centre of the light will be 224 feet above high water level, and will be visible in all directions of the horizon from north 27° E., round by the eastward to south 0° 40′ W. It will also be visible 19° 52′ further to the westward over a sloping hill, situated to the southward of the light-house, but only when at a considerable distance to the southward of the same. The light is on the catoptric principle of the third class, and revolving, exhibiting at intervals of 30 seconds, a red, green, and white light alternately. The intensity of the *white* light is visible from an elevation of 16 feet, in clear weather, at a distance of 20 miles, while its green and red rays vanish at a distance of 15 miles. The latitude is 35° 9′ 16″ S., and the longitude 150° 47′ 48″ E. Vessels coming from the south, will open this light over the sloping hill to the southward of it, on a bearing of north 20° 32′ E.; caution must, however, be observed in approaching Cape St. George (a low, dangerous, rocky point, on which the sea breaks), and when within a distance of 8 miles or thereabouts, the light should not be brought to bear to the northward of north 15° W., as, when a vessel is near the land, to the south-westward of this bearing, it will be partially, if not wholly, obscured, but by standing to the eastward it will gradually open out, and when bearing north 25° W., or N.N.W. ¼ W., it may be passed with safety at a distance of from one to two miles. Vessels from the southward should always endeavour to make this light, so as to prevent being embayed in the deep indentation lying to the westward of the cape designated "*Wreck Bay.*" Vessels approaching from the northward will open this light clear of "Crocodile Head," on a bearing of south 27° west, and by keeping it in view may pass in safety to the south, at an offing of from one to two miles. Vessels entering Jervis' Bay (a good and safe anchorage in all winds) will shut the light in with the north end of "Bowen Island," on a bearing of south ½ W.

[ADVERTISEMENT.]—Messrs. WOODHEAD & Co., Navy Agents, have removed from 1, James Street, Adelphi, to 41, Charing Cross, London, S.W.

STATIONS OF THE ROYAL NAVY IN COMMISSION.

With the dates of Commission of the Officers in Command.

Aboukir, 90, sc., Capt. D. Curry, 1846, Channel Squadron.
Acorn, 12, Com. R. B. Pearse, 1856, East Indies.
Actæon, 26, surv.-v., Com. J. Ward (b), 1858, East Indies.
Adelaide, tender to flag-ship, Cape of Good Hope.
Adventure, sc. store-ship, Com. E. Lacy, 1856, East Indies.
Advice, st.-ves., tender to Sanspareil, Cork.
Agamemnon, 91, sc. Capt. T. Hope, 1852, Mediterranean.
Ajax, 60, sc. Capt. J. M. M'Niell Boyd, 1856, Coast Guard.
Alacrity, 4, sc., Com. J. K. E. Baird, 1857, Mediterranean.
Alecto, 5, st.-ves., Com. H. J. Raby, V.C. 1855, Coast of Africa.
Alert, 17, sc., Com. W. A. R. Pearse, 1855, Pacific.
Algerine, sc. gunboat, Lieut.-Com. W. Arthur, 1854, East Indies.
Algiers, 91 sc., Capt. G. W. D. O'Callaghan, 1846, Channel Squadron.
Alligator, at Whampoa, lent to Consular Department.
Amethyst, 26, Capt. S. Grenfell, 1853, Pacific, ordered home.
Amphion, 36, sc., Capt. T. Cochran, 1857, Mediterranean.
Archer, 13, sc., Capt. F. A. B. Craufurd, 1856, Coast of Africa.
Ardent, 3, st.-v., Com. J. E. Parish, 1857, S. E. Coast of America.
Argus, 6, st.-v., Com. H. F. W. Ingram, 1856, Mediterranean.
Ariadne, 26, sc., Capt. E. W. Vansittart, 1856, special service.
Ariel, 9, sc. Com. J. R. Alexander, 1858, Portsmouth.
Arrogant, 47, sc., Commodore W. Edmonstone, West Coast of Africa.
Asia, 84, steam-ordinary ship, Capt. G. T. Gordon, 1846, Portsmouth.
Asp, st.-ves., tender to Saturn, Bristol Channel.
Assurance, 4, sc., Com. C. M. Aynsley, 1856, Mediterranean.
Atholl, 4, Com. E. Wilson, 1845, Greenock.
Avon, st.-ves., tender to Impregnable, Plymouth.
Azov, schooner, tender to Hibernia, Malta.
Bacchante, 51, sc. Rear-Admiral Sir J. Maitland, C.B., Capt. D. M. L. Mackenzie, 1859, Pacific.
Bann, st.-ves., tender to Fisgard, Coast of Cornwall.
Banshee, 2, steam-vessel, Com. C. A. Campbell, 1858, Mediterranean.
Banterer, sc. gunboat, Lieut.-Com. H. P. Knevitt, 1855, East Indies.
Barracouta, 6, st.-v., Com. W. Wood, 1854, West Indies.
Beagle, 4, sc., Com. E. Hay, 1858, East Indies.
Biter, 2, sc. gunboat, tender to Colossus.
Black Eagle, st.-yac., Mast.-Com. J. E. Petley, 1844, particular service
Blenheim, 60, sc., Capt. E. Tatham, 1854, Coast Guard.
Bloodhound, 3, st.-ves., Lieut.-Com. F. W. Bennett, 1854, Coast of Africa.
Bouncer, 2, sc. gunboat, Lieut.-Com. A. R. Owen, 1852, East Indies.
Boxer, 1, sc.-gunboat, tender to Marlborough, Mediterranean.
Brilliant, 20, Com. G. H. Gardner, 1848, Naval Reserve training ship, City Canal.
Brisk, 16, sc., Capt. A. F. R. D'Horsey, 1857, Cape of Good Hope.
Britannia, training-ship, Capt. R. Harris, 1849, Portsmouth.
Brune, 2, paddle st.-ves., tender to Arrogant, Coast of Africa.
Buffalo, screw, Mas.-Com. A. Brown, 1854, Coast of Africa.
Bulldog, 6, st.-ves., Capt. Sir F. L. M'Clintock Kt., 1854, Coast of Iceland, particular service.
Bullfinch, 2, sc.-gunboat, tender to Britannia, Portsmouth.
Bustard, 2, sc. gunboat, Lieut.-Com. F. W. Hallowes, 1856, E. Indies.
Buzzard, 6, st.-v., Com. J. Trevenen (acting), S.E. Coast of America.
Cadmus, 21, sc., Capt. H. S. Hillyar, C.B., 1854, N. America, and W. Indies.
Cæsar, 90, sc., Capt. T. H. Mason, 1849, Mediterranean.
Calypso, 18, Capt. F. B. Montresor, 1851, Pacific.
Cambrian, 40, Capt. J. J. M'Cleverty, C.B. 1848, East Indies.
Cambridge, gunnery-ship, Capt. A. W. Jerningham, 1851, Devonport.
Camilla, 16, Com. G. T. Colville, 1855, East Indies.
Caradoc, 2, st.-ves., Lieut.-Com. J. B. Scott, 1846, Mediterranean.
Castor, 36, Com. J. Palmer, 1855, Naval Reserve training ship, North Shields.
Centaur, 6, st.-v., Com. E. D'o, D'a, Aplin, 1853, East Indies.
Centurion, 80, sc., Capt. H. D. Rogers, C.B., 1846, Channel Squadron.
Chesapeake, 51, sc., Vice-Admiral J. Hope, C.B., Capt. G. O. Willes, 1856, East Indies.
Clinker, 2, sc.-gunboat, tender to Indus, Plymouth.
Clio, 22, screw, Capt. T. Miller, 1855, Pacific.
Clown, sc., gunboat, Lieut.-Com. W. F. Lee, 1855, East Indies.
Cockchafer, 2, sc. gunboat, Lieut.-Com. H. L. Holder, 1854, East Indies.
Colossus, 80. sc., Capt. F. Scott, C.B., 1848, Coast Guard.
Conqueror, 101, sc., Capt. E. S. Sotheby, C.B., 1852, Channel Squadn.
Cordelia, 11, sc., Com. C. E. H. Vernon, 1855, Australia.
Cornwallis, 60, sc., Capt. G. G. Randolph, C.B., 1854, Coast Guard.
Coromandel, 5, st.-ves., Lieut. Symons, tender to Flag-ship, Hong-Kong.
Cossack, 20, sc., Capt. R. Moorman, 1857, N. America and W. Indies.
Cressy, 80, sc., Capt. J. Harvey, 1848, Mediterranean.
Crocodile, 8, rec.-sh., Com. W. Greet, 1854, off the Tower.
Cruiser, 17, sc., Com. J. Bythesea, V.C., 1856, East Indies.
Cumberland, 70, Capt. C. F. Schomberg, 1851, Sheerness.
Curaçoa, 31, screw, Capt. A. Phillimore, 1855, S.E. Coast of America.
Curlew, 5, sc., Com. E. W. Shaw, 1857, S.E. Coast of America.
Cyclops, 6, st.-ves., Capt. W. J. S. Pullen, 1856, East Indies, ordered home.
Dapper, 2, sc. gunboat, tender to Majestic.
Dasher, 2, st.-ves., Com. P. De Saumarez, 1845, particular service.
Dauntless, 31, sc., Capt. L. G. Heath, C.B., 1854. Coast Guard.
Dee, 4, tr.-sh., Mast.-Com. T. C. Pullen, 1844, particular service.
Desperate, 8, sc., Com. J. F. Ross (1856), Devonport.
Diadem, 32, sc., Capt. J. H. Cockburn, 1850, Channel Squadron.
Donegal, 101, sc., Capt. H. Broadhead, 1846, Channel Squadron.
Doris, 32, sc., Capt. E. Heathcote, 1852, Mediterranean.
Dove, 2, sc.-gunboat, Lieut.-Com. Bullock, tender to Actæon, China.
Drake, sc., gunboat, Lieut.-Com. A. R. Blane, 1856, East Indies.
Eagle, 50, training-ship, Com. F. T. C. Strode, 1854, Portsmouth.
Edgar, 91, sc., Rear-Adm. J. E. Erskine, Capt. J. E. Katon, 1856, Channel Squadron.
Edinburgh, 58, sc., Capt. E. C. T. D'Eyncourt, 1849, Coast Guard.
Elfin, st.-yac., tender to Victoria and Albert, Portsmouth.
Emerald, 51, sc., Capt. A. Cumming, 1854, Channel Squadron.
Encounter, 14, sc., Capt. R. Dew, 1858, East Indies.
Erne, 2, sc. gunboat, tender to Edinburgh.
Esk, 20, sc., Capt. Sir R. J. Le M. M'Clure, C.B., 1850, East Indies.
Espoir, 5, sc., Com. S. Douglas, 1858, Coast of Africa.
Euryalus, 51, sc., Capt. J. W. Tarleton, C.B., 1852, particular service.
Excellent, 46, gunnery-ship, Capt. R. S. Hewlett, C.B., 1850, Portsmouth.
Exmouth, 90, sc., Capt. J. A. Paynter, 1854, Mediterranean.
Fairy, screw-yacht, tender to Victoria and Albert yacht, Portsmouth.
Falcon, 17 sc., Com. A. G. Fitzroy, 1857, Coast of Africa.
Fanny, cutter, tender to Victory, Portsmouth.
Fawn, 17, sc., Com. R. P. Cator, 1858, Australia.
Fearless, st.-ves., tender to Cumberland, Sheerness.
Ferret, 8, Com. W. E. Fisher, 1856, tender to Sanspareil.
Firebrand, 6, st.-ves., Com. J. M. Bruce, 1855, particular service.
Firefly, 4, st.-ves., Com. A. L. Mansell, 1855, Mediterranean.
Firequeen, st.-ves., tender to Victory, Portsmouth.
Firm, sc., gunboat, Lieut.-Com. W. R. Boulton, 1854, East Indies.
Fisgard, 42, Commod. Hon. J. R. Drummond, C. B., Woolwich.
Flamer, sc. gunboat, Lieut.-Com. H. M. Bingham, 1851, East Indies.
Fly, 2, sc. gunboat, tender to Cornwallis.
Flying Fish, 6, sc., Com. C. W. Hope, 1854, special service.
Forester, 2, sc. gunboat, Lieut.-Com. A. J. Innes, 1853, East Indies.
Formidable, 84, Vice-Admiral W. J. H. Johnstone, Capt. W. G. Luard, 1857, Sheerness.
Forte, 51, sc., Rear-Admiral Hon. Sir H. Keppel, K.C.B., Capt. E. W. Turnour, 1857, Cape of Good Hope.
Forward, 2, sc., Lieut.-Com. C. R. Robson, 1851, South America.
Foxhound, 4, sc., Com. Alfred Mitchell, 1856, Mediterranean.
Furious, 16, st.-ves., Captain O. J. Jones, 1855, East Indies.
Fury, 6, st.-v., Com. J. C. Wilson (acting), East Indies.
Ganges, 84, Rear-Admiral Sir R. L. Baynes, K.C.B., Capt. J. Fulford, 1848, Pacific, ordered home.
Gannet, 11, Com. E. H. G. Lambert, 1854, Mediterranean.
Geyser, 6, st.-ves., Com. G. M. Jackson, 1855, particular service.
Gipsy, cutter, tender to Sanspareil, Cork.
Gladiator, 6, st.-ves., Com. H. D. Hickley, 1858, N. America and W. Indies.
Gorgon, 6, st.-v., Com. B. C. T. Pim, 1858, Portsmouth.
Grappler, 2, sc., Lieut.-Com. A. P. H. Helby, 1849, Pacific.
Grasshopper, sc. gunboat, Lt.-Com. J. C. Tucker, 1855, East Indies.
Greyhound, 17, sc., Com. F. W. Sullivan, 1859, Mediterranean.
Growler, 2, sc. gunboat, Lieut.-Com. H. E. Crozier, 1854. Mediterran.
Hannibal, 91, sc., Rear-Admiral G. R. Mundy, C.B., Capt. A. Farquhar, 1849, Mediterranean.
Hardy, 2, sc. gunboat, Lt.-Com. A. G. Bogle, 1855, East Indies.
Harpy, st.-vessel, tender to Hogue.
Harrier, 17, sc. st.-sloop, Com. Sir Malcolm MacGregor, Bart., 1856 Portsmouth.
Hart, cutter, tender to Formidable, Sheerness.
Hastings, 60, sc., Com. C. M. Luckraft, 1855, Naval Reserve training ship, Liverpool.
Haughty, 2, sc. gunboat, Lieut.-Com. G. D. Broad, 1851, East Indies.
Havock, 2, sc. gunboat, Lieut.-Com. C. Fairholme, 1851, East Indies.
Hawke, 60, sc., Capt. W. Crispin, 1852, Coast Guard.
Hecate, 6, st.-ves., Com. A. H. Hoskins, 1858, Pacific.
Herald, 8, sur.-ves., Capt. H. M. Denham, 1846, Feejee Islands, ordered home.
Hero, 91, sc., Commodore G. H. Seymour, C.B., special service.
Hesper, sc. st.-ship, Master-Com. W. H. Harris, 1853, East Indies.
Hibernia, rec.-ship, Rear-Admiral H. J. Codrington, C.B., Com. Hon. A. C. Hobart, Malta.
Highflyer, 21, sc., Capt. W. A. Heath (acting), East Indies.
Himalaya, sc. store-ship, Capt. J. Seccombe, 1859, particular service.
Hind, 2, sc. gunboat, tender to Russell.
Hogue, 60, sc., Capt. R. J. J. G. Macdonald, 1854, Coast Guard.
Hornet, 17, screw, Com. W. B. Elphinstone, 1856, East Indies.
Hydra, 6, st.-ves., Com. R. V. Hamilton, 1857, North America and West Indies.
Icarus, 11, sc., Com. N. Salmon, V.C., 1858, North America and West Indies.
Illustrious, 72, Rear-Admiral the Hon. G. Grey, Com. H. C. Harston, 1845, Portsmouth.
Imaum, 72, Commodore H. Dunlop, Capt. O. Morrish, 1857, Receiving Ship, Jamaica.
Imperieuse, 51, screw, Rear-Admiral L. T. Jones, C.B., Capt. R. Maguire, 1854, East Indies.
Impregnable, 104, Vice-Adm. Sir H. Stewart, K.C.B., Capt. Lord F. H. Kerr, 1852, Devonport.
Implacable, 72, Com. J. W. Dorville, 1853, training ship, Devonport.
Indus, 78, steam-ordinary ship, Capt. A. C. Key, C.B., Devonport.
Industry, st.-v., 2, store-ship, Mast.-Com. G. J. Hodges, 1841, particular service.
Inflexible, 6, st.-v., Com. G. A. C. Brooker, 1856, East Indies.
Insolent, 2, sc.-gunboat, Lieut.-Com. E. H. Seymour, 1860, East Indies.
Intrepid, 6, sc., Com. J. H. Marryat, 1855, Mediterranean.
Iris, 26, Commodore W. Loring, C.B., Australia, ordered home.
Jackal, 4, st.-v., Lieut.-Com. E. F. Lodder, 1854, particular service.
Jackdaw, 2, gunboat, tender to Hogue.
James Watt, 91, screw, Capt. E. Codd, 1831, Mediterranean, ordered home.
Janus, sc. gunboat, Lieut.-Com. D. G. Davidson, 1855, East Indies.
Jasper, sc. gunboat, Lieut.-Com. W. H. Pym, 1849, West Indies.
Jersey, cutter, tender to Dasher, Portsmouth.
Kestrel sc. gunboat, Lieut.-Com. H. Huxham, 1855, East Indies.
Kingston, schooner, tender to Imaum, Jamaica.
Kite, st.-tug, Bermuda.
Landrail, 5, sc., Com. T. H. M. Martin, 1859, Portsmouth.
Lapwing, 4, screw, Com. M. F. O'Reilly, 1856, Mediterranean.
Leopard, 18, st.-v., Rear-Admiral Sir S. Lushington, K.C.B., Capt. F.B. Wainwright, 1856, S.E. Coast of America.
Leven, 1, sc. gunboat, Lieut.-Com. J. S. Hudson, 1854, East Indies.
Leveret, 2, gunboat, tender to Dauntless.
Liffey, 51, sc., Capt. G. W. Preedy, C. B., 1855, Mediterranean.
Lightning, st.-ves., tender to Saturn, Pembroke.
Lively, 2, sc.-gunboat, tender to Cumberland, Sheerness.
Lizard, 3, st.-ves., tender to Formidable, Sheerness.
London, 90, sc., Capt. H. Chads, 1848, Mediterranean.
Louisa, 2, gunboat, tender to Edinburgh.
Lynx, 4, sc., Lieut.-Com. H. Berkeley, 1854, Coast of Africa, ordered home.
Lyra, 9, sc., Com. R. B. Oldfield, 1855, Cape of Good Hope.
Madagascar, store-ship, Capt. R. D. White, 1856, Rio Janeiro.
Mæander, 44, Capt. W. F. Burnett, C.B., 1854, Ascension.
Magicienne, 16, st.-ves., Capt. J. E. Commerell, V.C. (1859), E. Indies.
Magnet, 2, gunboat, tender to Pembroke.
Magpie, 2, gunboat, tender to Hawke.
Majestic, 80, sc., Capt. W. R. Mends, C.B., 1852, Coast Guard.
Marlborough, 131, sc., Vice-Admiral W. F. Martin, Capt. W. H. Stewart, C.B., 1854, Mediterranean.
Mars, 80, sc., Capt. J. N. Strange, 1854, Mediterranean.
Medina, 4, st.-ves., Capt. T. A. B. Spratt, C.B., 1855, Mediterranean.
Megæra, 6, sc., Com. S. H. Henderson, 1855, particular service.
Melpomene, 50, sc., Capt. C. J. F. Ewart, 1855, Mediterranean.
Melville, hosp.-ship, Hong-Kong.
Mercury, cutter, tender to Dasher, Portsmouth.
Mersey, 40, sc., Capt. H. Caldwell, C.B., 1853, Channel Squadron.
Miranda, 15, sc., Com. H. C. Glyn, 1855, Sheerness.
Mohawk, 4, sc., Com. E. H. Howard, 1857, Mediterranean.
Mutine, 17, sc., Com. W. Graham, 1858, Pacific.
Naiad, 42, store-sh., Mas.-Com. W. W. Dillon, 1843, Callao.
Nautilus, 6, Lieut.-Com. W. B. Grant, 1852, apprentice ship.
Neptune, 91, sc., Capt. F. A. Campbell, 1857, Mediterranean.
Nereus, 42, store-depôt, Mas.-Com. J. C. Barlow, 1853, Valparaiso.
Nettle, 2, sc.-gunboat, tender to Terror, Bermuda.
Niger, 14, sc., Capt. P. Cracroft, 1854, Australia, ordered home.
Nile, 90, sc., Rear-Admiral Sir A. Milne, K.C.B, Capt. E. K. Barnard, 1857, North America and West Indies.
Nimrod, 6, sc., Com. R, J. Wynniatt, 1859, East Indies, ordered home.
Oberon, 3, st.-ves., Lt.-Com. F. G. C. Paget, 1852, South-East Coast of America.
Odin, 16, st.-ves. Capt. Lord J. Hay, C.B., 1854, East Indies.
Onyx, 2, sc.-gunboat, tender to Terror, Bermuda.
Opossum, 2, sc. gunboat, Lieut.-Com. Brine, E. Indies.
Orion, 91, sc., Capt. J. B. E. Frere, 1854, Mediterranean.
Osborne, st.-ves., Mas.-Com. C. H. K. Bower, 1842, Portsmouth.
Pearl, 21, sc., Capt. J. Borlase, C.B., 1855, East Indies.
Pelorus, 21, sc. Commodore F. B. P. Seymour, 1854, Australia.
Pembroke, 60, Capt. E. P. Charlewood, 1855, Coast Guard.
Perseverance, 2, troop-ship, Com. E. R. Power, 1850, particular service.
Persian, 12, Com. E. Hardinge, 1856, Cape of Good Hope.
Pigmy, 3, st.-ves., Mast.-Com. W. Johnston, 1856, Portsmouth.
Pioneer, 6, screw, Com. H. A. Reilly, 1858, East Indies.
Plumper, 9, screw, Captain G. H. Richards, 1854, Pacific, ordered home.
Porcupine, 3, st.-ves., Capt. C. H. Otter, 1854, particular service.
Porpoise, 2, sc.-gunboat, tender to Royal Albert.
Princess Charlotte, receiving-ship, M.-Com. H. G. Thomsett, 1854, Hong-Kong.
Prometheus, 5, st.-ves., Com. S. S. Skipwith, 1856, Coast of Africa.
Pylades, 21, sc., Capt. M. de Courcy, 1852, Pacific.
Pyramus, hulk, Halifax.
Quail, 2, sc., gunboat, Lieut.-Com. N. Osborn, 1856, Mediterranean.
Queen, 86, sc., Capt. C. F. Hillyar, 1852, Mediterranean.
Racer, 11, sc., Com. A. M'L. Lyons, 1858, North America and West Indies.
Racoon, 21, screw, Capt. W. C. Chamberlain, 1856, Mediterranean.
Rainbow, 2, gunboat, tender to Ajax.
Ranger, 5, sc., Com. H. R. Wratislaw, 1853, Coast of Africa.
Recruit, 8, st.-ves., Com. D. Spain, 1856, Mediterranean.
Redpole, 1, Capt. Warden, C.B., 1845, Gibraltar.
Redwing, 2, sc.-gunboat, tender to Cambridge, Plymouth.
Renard, 4, sc., Com. J. G. Goodenough, 1858, East Indies.
Renown, 91, sc., Capt. A. Forbes, 1846, Mediterranean.
Retribution, 28, st.-ves., Commod. H. E. Edgell, C.B., East Indies, ordered home.
Rhadamanthus, 4, st.-ves., Master-Com. F. R. Sturdee, 1843, particular service.
Ringdove, 4, sc., Com. R. G. Craigie, 1856, East Indies.
Roebuck, 6, sc., Com. Marten, East Indies.
Rolla, 6, Lieut.-Com. C. G. Nelson, 1854, Portsmouth.
Rose, tender to Impregnable.
Royal Adelaide, 104, training-ship, Capt. W. K. Hall, C.B., 1853, Devonport.
Royal Albert, 121, sc., Rear-Admiral R. F. Stopford, Capt. H. J. Lacon, 1856, Channel Squadron.
Ruby, 2, gunboat, tender to Cornwallis.
Russell, 60, sc., Capt. G. Wodehouse, 1854, Coast Guard.
St. George, 90, sc., Capt. The Hon. F. Egerton, 1855, Channel Squad.
St. Jean D'Acre, 101, sc., Capt. The Hon. C. G. J. B. Elliot, 1841, Mediterranean.
St. Vincent, 102, Capt. T. Wilson, 1853, Portsmouth.
Sampson, 6, st.-ves., Capt. G. S. Hand, C.B., 1852, East Indies.
Sandfly, 2, gunboat, tender to Cornwallis.
Sanspareil, 70, sc., Rear-Admiral C. Talbot, Capt. A. P. E. Wilmot, C.B., 1854, Cork.
Sapphire, hulk, Trincomalee.
Sarnen, 4, Master-Com. W. Stanton, 1852, East Indies.
Satellite, sc., 21, Capt. J. C. Prevost, 1856, Pacific, ordered home.
Saturn, 72, Capt. G. Ramsay, C.B., 1843, Pembroke.

Wrangler, 4, sc., Com. H. H. Beamish, 1858, Coast of Africa.

THE MILITIA.

The Royal Pembroke Artillery, under the command of Lieut.-Colonel Owen, were inspected on the Portfield, Haverfordwest, on Saturday last, by Colonel Lord Frederick Paulet, C.B., Inspector of disembodied Militia. Notwithstanding the inclemency of the weather the corps was drawn up and received the inspecting officer in the usual manner. He inspected the men, and after expressing himself in the highest terms as to their clean soldierlike appearance, and as to their progress in drill in so short a time, he ordered the regiment home. The corps now musters about 243 men, of whom 47 have joined during the present training, and the number of effectives on parade was 98 files. They broke up yesterday.

The Royal Radnor Rifles assemblage at Presteign on Tuesday under the command of Major Lawrence H. Peel. The muster represented as having been extremely good.

The Militia Gazette.

WAR OFFICE, PALL MALL, October 30.

Forfar and Kincardine Artillery Regiment of Militia—John King, Gent., to be Quartermaster, from the 7th of September, 1860.

7th Regiment of Lancashire Militia—Edward Houlditch, Esq., late Captain King's Own Light Infantry Militia, to be Captain.

Cornwall Rangers Militia—Ensign John Morris Prepure to be Lieutenant; Ensign Owen Henry Morshead to be Lieutenant; Ensign Richard Hambly Andrew to be Lieutenant; Joseph Lyle, jun., Gent., to be Supernumerary Lieutenant; Francis Rashleigh Rodd, Gent., to be Supernumerary Lieutenant.

WAR OFFICE, PALL MALL, November 2.

Royal North Lincoln Militia—Her Majesty has been graciously pleased to accept the resignation of the Commissions held by Lieutenant Lionel Wentworth Atkinson and Ensign Francis Johnston Murray.

Memorandum—The Queen has been graciously pleased to approve of Robert Hindley Wilkinson, Esq., late Lieutenant-Colonel, in the Bedfordshire Militia, being allowed to hold Honorary Rank as Lieutenant-Colonel, and to wear his Uniform.

Most of our naval and military readers will regret to hear that Mr. Ezekiel Emanuel, of the Hard, Portsea, goldsmith to Her Majesty, died suddenly on Tuesday last. He was in his usual exce lent health and spirits up to a few minutes of his death. There are few officers either in the Army or Navy to whom Mr. Emanuel was unknown.

A new pattern of rocket scale, adapted to all descriptions of rockets, submitted by Captain Jerningham, R.N., has been approved for service, and one of these new scales, with bits, has been demanded for each battery of the Horse Brigade on home service, in exchange for the brass scales now in possession. A new vent-piece for 12-pounder Armstrong guns has been approved under authority, and steps have been taken to have the vent-pieces now in use exchanged for those of the new pattern.

Risum Teneatis?—An aged pensioner, by name Laughlen Morris, who served on board the Bellerophon, and is now resident in the village of Ballaghadereen, county Mayo, claims the honour of being father of the French General Lamoricière, he having, after the taking of Napper Tandy, married a French lady, of the name of De Grammont, by whom he had one son, and who Frenchified his name from Laughlen Morris to "La Moriciere." It is remarkable that the same individual was one of the party who conveyed Napoleon I. to St. Helena.—*Derry Sentinel.*

Erratum.—In our remarks last week upon the position of the Naval Instructors, it was stated that the time allowed for Midshipmen to qualify themselves for the rank of Lieutenant was reduced from "five to six years," instead of from "six years to five."

VOLUNTEERS.

METROPOLITAN.

City of London Rifle Brigade.—This brigade marched out on Saturday last to the Regent's Park for battalion drill, under the command of Lieut.-Colonel Hicks, and there was a very good muster.

9th (West) Middlesex Rifles. — The inspection by Colonel M'Murdo will take place on the 10th of November, and the prize meeting on the 20th of November.

14th (Highgate) Middlesex Rifles. — There was an incident connected with the late presentation of a bugle to the above corps by Miss Burdett Coutts which is worthy of mention, as showing the graceful sympathy that lady has with the movement. Miss Coutts was attired in a silk dress, trimmed with green silk velvet, the bonnet, trimmed with the same material, both being the colour of the uniform of the corps.

21st (Civil Service) Middlesex Rifles. — There will be a full-dress parade of the regiment on the 9th of November, in commemoration of the anniversary of the birthday of His Royal Highness the Prince of Wales, the hon. colonel of the regiment.

26th (Customs) Middlesex Rifles.—This corps will assemble on the Custom House Esplanade, this day, Saturday, and march out, under command of Major W. R. Grey, at 4 o'clock, accompanied by the band of the Guards. The new adjutant, Captain Elliot, will be present. The band of the corps will, it is expected, be provided with their uniform ready for their next march out. Three drums of the old Volunteers have fallen into their possession, in capital order, lettered "Royal Revenue Corps," and "G. R." The band (all officials and Volunteers) have attained considerable proficiency in a very short time, under the able management of Mr. Shapcott.

28th (London Irish) Middlesex Rifles.—This corps on Saturday last left Burlington House, at five o'clock, p.m., for their last blank cartridge practice this season, headed by their band, and under the command of Major Verner, who has become exceedingly popular among the members. Ten rounds of blank ammunition having been served out, the corps, on their arrival at the Exhibition Ground, Hyde Park, proceeded to fire volleys by companies, by wings, and as a whole battalion. So excellent were all the volleys that it is almost impossible to select for commendation any particular company, but the volleys of Nos. 1 and 4, the latter composed of members of the East End detachment, drew down the vociferous applause of the immense number of spectators who accompanied the regiment to the park.

29th North Middlesex Rifles. — On Saturday afternoon last, this corps marched out from its new parade ground, Mornington Road, to the Regent's Park Barracks, for battalion drill, under its captain commandant, Captain Ross. The ladies of the Regent's Park and the vicinity, have formed a committee for the purpose of presenting the corps with a silver bugle, and Lieutenant T. W. Lemmon, of 50, Gloucester Road, Regent's Park, has kindly consented to act as honorary secretary. During the week the sixth company—Messrs. Hopkinsons', who have augmented their numbers to nearly 100, its maximum strength—assembled for the purpose of nominating commissioned and non-commissioned officers. For captain the choice fell upon Mr. Boosey, one of the heads of the firm of Boosey & Co., the military band instrument makers to Her Majesty's forces, and for lieutenant, upon Mr. Gowland, the manager of Messrs. Hopkinson & Co.'s pianoforte establishment.

1st (South Kensington) Middlesex Engineers.—This corps, consisting of five companies, headed by its splendid band of 30 performers (all Volunteers), marched out to Beaufort House last Saturday, under the command of Major-Commandant McLeod of McLeod. On arriving on the ground, a certain number of men were told off, and in conjunction with some of the South Middlesex, constructed a formidable sandbag battery in the short space of 23 minutes. Arrangements have been concluded for the erection of a butt, with a range of 1200 yards, within an easy distance of head-quarters, where the corps will have ample opportunity of proving the efficiency of the Lancaster rifle, with which its members are armed. There is no doubt, in the event of the Volunteers being called into active service, this corps would be found of great assistance in its special department.

1st (South London) Surrey Rifles.—On Monday evening a numerous meeting of inhabitants of Walworth, Camberwell, Newington, and the neighbourhood was held at the Walworth Literary Institution, Carter Street, Walworth; the Rev. J. Going, incumbent of the district, occupying the chair. The chairman, in opening the proceedings, expressed his opinion that for many years the most important movement that had taken place was the Volunteer movement. It was to that that we owed our present prestige as a nation. There was a marked improvement in the behaviour of the young men who had joined the movement, both in health, strength, and manliness. Captain Howes, R.N., moved the first resolution :—"That this meeting, acknowledging the success which has hitherto crowned the Volunteer movement, and believing that under Providence it has been the main instrument of securing to this country the continuance of peace, and is of opinion that the system should be permanent, and that exertions should be made from time to time to keep the movement before the public mind, and to give accessions of strength to the various corps established in the various districts." The Rev. Mr. Smith briefly seconded the motion, which was supported by Mr. Smith, churchwarden of Newington, and carried by acclamation. Captain Dresser Rogers moved the second resolution, which urged the young men to join the 1st Surrey Volunteers, and those that could not join to subscribe to the funds of the corps. Mr. Noldwritt seconded the motion, which was also carried with enthusiasm. A vote of thanks to the chairman, moved by Lieut.-Colonel M'Donald and seconded by Mr. T. Clarke, was carried enthusiastically, and closed the proceedings.

19th (Lambeth) Surrey Rifles.—On Wednesday last the 7th company, under the command of Captain Watkins, met at the Streatham butts for ball practice, when several prizes were awarded to the men who obtained the highest number of points. The 1st prize was gained by Sergeant J. Tammadge; the 2nd by Private Emberg; the 3rd by Private Lever; the 4th by Private Garrad; the 5th by Sergeant W. Tammadge; the 6th by Private N. Shaw; the 7th by Corporal Davies; and the 8th by Private Briggs. The ranges were 150 and 200 yards. This regiment now consists of nine companies, its strength being greater than any other corps in the county, and is still increasing. There will be firing at the Streatham butts every Wednesday and Friday, to commence at 1 o'clock, military time.

Surrey Artillery (Brixton).—A company under the above title has just been formed, under the auspices of Captain Durnford, to meet the requirements of the immediate localities of Brixton, Clapham, Streatham, Dulwich, Stockwell, and Camberwell. The uniform adopted is similar to other Volunteer Artillery companies, with a slight improvement. The institution in the Gresham Road is fixed as the head-quarters of the company. The honorary secretary attends at head-quarters every Monday, Thursday, Friday, and Saturday evening from seven to nine o'clock, in order to enrol members and afford information to applicants.

DEVONSHIRE.

Woodbury Artillery.—The first field-battery of the Devon Coast Artillery Volunteers, under the command of Captain Brent, with First-Lieutenants Daw and Beedle, one sergeant-major, one quartermaster-sergeant, four sergeants, four corporals, four bombardiers, four acting-bombardiers, five drivers, and forty gunners, accompanied by the fife and drum band of thirteen members, proceeded from the barracks on the 25th ult., at half-past eight o'clock, and reached Budleigh Salterton at a quarter-past ten, performing the distance of upwards of six miles, over a hilly country, in the short time of one hour and three-quarters. Considering the gun and carriage being four tons in weight, the distance was performed most creditably and rapidly by six splendid horses, with new artillery harness and three drivers; the ammunition-waggon had four horses and two drivers. The appearance of the battery as a whole was most soldierlike and perfect; and at the entrance to Budleigh Salterton the 24th (Bicton) Rifles, under the command of Captain F. Blandy, mustered strong, and was in line on the left side of the road, and presented arms as the battery passed, which the battery returned by carrying swords. By that time the head of the battery had reached the gate of the residence of the worthy magistrate of the district, Gervas King Holmes, Esq., who complimented the gallant captain on the fine day and the splendid appearance of his battery. The Rifles then formed part of the main body, and after the Artillery and Rifles had been liberally supplied by the kind-hearted magistrate with a cup of good cheer each, the whole marched (preceded by the Artillery and Budleigh Salterton bands) to the beach on the left of the parade. The horses were then unhooked, and filed to the stables, and the men proceeded to the Rolle Arms for refreshment. In half an hour they were marched to the beach, the gun was unlimbered and brought into action, and firing commenced, under the superintendence of Captain Henry, Royal Artillery. Colonel Sir W. Hele Tonkin, 1st A.B., D.C.A.V., Lieutenant Wadge, 3rd D.C.A.V., Lieut. Wood, 7th D.C.A.V., Capt. Torriano, R.A., Colonel Philott, various other officers, and a large concourse of spectators, were present, comprising the leading gentry of the place and for many miles round. Shooting on the first day was at a target seven feet square, at 1020 yards. Sixteen rounds of shot were fired, and five went through the target; Nos. 7 and 9 by Captain Brent; 10 and 11 by Sergeant-Major Ware; and 15 by Bombardier Ekers. Five shells were fired — No. 3, by Captain Brent, placed a splinter in centre of target; No. 5, by gunner Bradbear, carried away flag-staff, and the firing ceased for the day. The gun was then limbered up, and the stores removed to a place of safety. The whole of the men were regaled at the Rolle Arms with a substantial dinner by the officers, and, after a sufficient time had elapsed, by seven o'clock the battery was on the march for Woodbury. Friday, October 26th.—The firing commenced at half-past eleven a.m., and continued until about three p.m. Ten shells were fired with precision, but all fell too short: forty-six rounds of shot were fired, and the following numbers placed in the target :—No. 7, by Bombardier Ekers; No. 9, by Corporal Blake; No. 11, by Captain Brent; No. 19, by Sergeant-Major Ware; Nos. 27, 28, 29, 31, 32, 34, 35, 38, 40, 41, 43, and 46, by Captain Brent. The 46th carried away the iron support of the target, causing it to fall backwards, and thereby rendering it useless. The firing then ceased, and the captain was deservedly complimented on the practice, and more especially on his own success in having struck the target himself in the two days fifteen times out of twenty-nine shots. The battery then proceeded to the Rolle Arms, where they were provided with an excellent dinner, at the expense of the officers. Saturday, the 27th, the gun and waggon were conveyed by the drivers and horses, under the command of Instructor-Sergeant Smitherson, to the barracks at Woodbury; a party of men mounted on the waggon with the remains of the target paraded the village to the great gratification of the parishioners. It is very pleasing to know that the greatest order prevailed throughout the whole three days, and that no accident occurred.

KENT.

34th (Deptford) Kent Rifles.—On Saturday afternoon an interesting event in connection with the Volunteer rifle movement came off at Lewisham on the occasion of the inauguration by this corps of a new practice-ground for rifle-shooting. There was a large attendance of residents of the town and neighbourhood, including the Rev. C. F. S. Money, incumbent of St. John's Deptford; Captain Buckle, C.B., superintendent of the Royal Victoria Victualling and Dockyards, Deptford; Captain Jackson, adjutant of the 1st Kent Battalion of Volunteer Rifles; Captain Wilkinson, of the Deptford Dockyard Volunteer Corps; Ensign Marchant 13th (Greenwich) company, &c. At four o'clock the members of the 34th company, under the command of Captain Montgomerie; and preceded by an excellent band, entered the grounds, and shortly afterwards positions were taken at a distance of 200 yards from a target, and firing commenced, the applause of the spectators being evinced on each occasion of the target being hit. Some extraordinary shooting was displayed by Mr. Kerr, musketry instructor to the London Scottish Rifle Volunteer Corps, and the superin-

Digitized by Google

tendent of the London Armoury, Bermondsey, who, with a Sharp's breech-loading gun of 7½lb. weight, struck the target nine times out of ten in succession, being loudly applauded.

HAMPSHIRE.

3RD (PORTSMOUTH CIVIL SERVICE) HANTS ARTILLERY.—In our notice last week of the review at Winchester, the presence of this very fine body of men was accidentally ignored. This corps has devoted much time after the usual hours to bring itself into a state of efficiency, and at the review in question, Major Sturdee had the satisfaction of receiving many congratulations on the appearance of his men, as also on the manner in which they went through the various evolutions of the day.

The cadets of the Collegiate Institution at Liverpool were on Saturday last inspected and reviewed in the grounds of Major Clay, Parkhill-road, and additional interest attached to the proceedings in consequence of the presentation which was made by the boys to Lieut.-Col. Bousfield, the commander of the 1st battalion of Rifles, of which the Collegiate Corps forms an integral portion. The young collegians mustered in the school-ground early in the afternoon, and commenced their march a little before three o'clock, under the command of their gallant colonel. The corps was headed for the first time by its capital band, twenty-five in number, and all collegians. During the proceedings the corps remained under the immediate command of Colonel Bousfield, and amongst the other officers on the ground were Lieut.-Colonel Gladstone, Lieut.-Colonel Brown, Major Walter, Captain Ellison, of the Engineer Corps; Lieut. Whitty, of the same corps; Lieut. Berry, of the Borough Guard; Captain King, 1st. Lancashire Rifles; Captain Duncan, 8th Artillery; Lieut. Stanley, of the 20th Artillery; Captain Chambres, 3rd Cheshire; Captain Faulkner, Inspector of Pensioners; Capt. M'Neile; and numerous other Volunteer officers. Among the directors of the Collegiate Institution present, we noticed the Rev. Rector Campbell, Rev. J. A. Wilson, Mr. Alderman Cooper, Mr. Josias Booker, and Mr. William Jones. In front of the saluting flag were Mrs. T. D. Anderson, Mrs. Alexander Brown, Mrs. Howson, Mrs. Gilbert Henderson, Mrs. Samuel Kearsley, and other ladies. After performing the usual evolutions, the band played the air known as "I am ninety-five," to which the 1st battalion marched past at Knowsley. The cadets were formed into a three-sided square, the principal officers in the centre, for the presentation to Colonel Bousfield of a richly-engraved silver flask, designed and executed by Mr. Mayer, and which is an elegant specimen of the silversmith's skill. Upon one side is the following inscription: "Presented to Lieutenant-Colonel Bousfield, 1st L.R.V., by the cadet corps of the Liverpool Collegiate Institution, in gratitude for his kind and cordial encouragement of their school drill, and with the proud reflection that the origin of the Volunteer movement of England is attributed to one who was formerly a pupil in the same institution." On the other side is inscribed, "The subscription towards this small birthday gift was begun on the field at Knowsley, the invitations to which the contributors owed to Lieutenant-Colonel Bousfield's courtesy. Oct. 13, 1860." Captain Cordeaux in an excellent speech presented the testimonial to the Lieutenant-Colonel, who made a suitable acknowledgment, and Colonel Wilbraham, C.B., the reviewing officer, then paid a high compliment to the corps for the manner which they had executed the various manœuvres of the day, and added that he was thoroughly convinced of the value which should be attached to the training of youths in our public schools in the Volunteer service.

THE VOLUNTEER RIFLE GROUNDS AT BEAUFORT HOUSE, FULHAM.—There was a perfect field day on Saturday last at Beaufort House, Fulham, the new and splendid practice-ground being specially thrown open on the occasion by Lieut.-Colonel Lord Viscount Ranelagh. His lordship was well supported on the occasion by Colonel Knox, M.P., the Hon. Mr. Curzon, Colonel Vereker, Captain Norton, Captain Wilde, Captain Thompson, Lord and Lady Rodney, Colonel Ferguson, Colonel Balls, Captain Turner, Mr. Napier Sturt, M.P., &c. Immediately after entering the vestibule of Beaufort House, within half an hour from the metropolis, you come to the spacious club-room, designed for the accommodation of a perfect army of rifle rangers, with the greatest architectural regard for light, convenience, and accommodation, furnished with all the London dailies, and a capital cuisine under the able management of Mr. Biglin. Beneath is a lavatory and mess-room, where an admirable dinner was done justice to in the evening, and adjacent to the club-room, the armoury, and accoutrement accommodation rooms. The club-room is artistically lit with pendant *jets de feu* of gas, after the manner of St. James's Hall. The club-room looks out upon a lawn of 2000 yards, seated in a valley beautifully sheltered from winter practice, and with a magnificent shooting range of 500 yards over the green sward, which terminates in a work—the butt—that must command the admiration of every Royal and civil engineer that sees it. It is the first of its kind in this country, and throws the Government practice-grounds at Aldershot and Hythe into the shade. The "butt" is a wall of brick and mortar, 40 feet high by 300 feet long, faced, or rather footed with a solid embankment of earthwork, grassed over at a comparatively economical cost; whereas had the facing been made as usual of iron it would have necessitated an expenditure of some 2000*l.* for that alone. Shouldering your rifle before this fine firing-screen or frontispiece, you find yourself in possession of no fewer than four-and-twenty iron targets to take aim at. As the grounds became gradually filled with many hundreds of visitors, with the gallant battalions with their bands of the South Middlesex, followed by detachments of the Engineer Volunteer Corps in their vermilion coats, the Scotch troop, and the members of the Artists' corps, altogether a splendid *coup d'œil* was presented. The *chef d'œuvre* of the day, however, in addition to the ordinary details of rifle drill and evolution, consisted of an admirably planned and protected piece of the simplest but most serviceable military fortification, to be improvised in the event of any invading emergency, in the shape of a sand-bag breastwork or battery, and which was so beautifully engineered under the command of Captain Hawker as to show that with a comparatively small regiment of riflemen in any of our metropolitan passes it would prove an almost impregnable means of defence. The "fatigue" party erected the sand-bag buttery, 5 feet high and 40 feet wide, in less than 25 minutes on the field. They then, as though in the face of an invader, fired volleys from behind the battery, and afterwards commenced file firing with a power and precision that would have charmed some of the best shots at Hythe or Chatham. Captain Hawker, who was assisted by Mr. M'Leod of M'Leod, and his comrades, was most agreeably greeted at the conclusion of the affair by the military and other spectators on the ground. The application of the electric telegraph to the science of war and for the purpose of field and rifle practice was exemplified on a practical and interesting scale by Professor Wheatstone, Lieut. Chevalier, of the 1st West India Regiment, and by Lord Ranelagh, who has constructed a simple and extensive rifle telegraph of his own, available at a very small cost by every corps in the kingdom. The communication on the field, or between the target and the gun, is maintained in the ordinary alphabetical language, by the most simple means, so that any person without previous instruction (provided he can read and spell) is able to work it—the speed of the transmission attained after a little practice being at the rate of 100 letters a minute. With a pair of these instruments, the position of the ball in striking the target is immediately indicated and registered with unerring accuracy by the simple combination and transmission of two letters, as AN, BC, BE, BQ, &c., according to the arrangement of the targets. Several targets can be registered at once by the same instrument, provided they are within range of vision. These telegraphs have already received the sanction of the Emperor of the French, who ordered four sets for his especial use at the commencement of the late campaign. It is said that the secret of the "Greek fire" has been lost in the lapse of ages, but Captain Norton was present to contradict the misconception, and to show us that with his luminous streams of liquid fire, he could burn with destructive certainty, not only the sails but the bodies of men of war that are not panoplied in steel. The commissariat department was well represented by Mr. W. H. Clarke, the partner of the late estimable Soyer, who since the Crimean campaign has been in attendance with the field-kitchen committee appointed by the War Office to inquire into and approve the best means of supply and cooking apparatus for her Majesty's troops on march or in camp, but upon which we understand no decision has yet been come to. Mr. Clarke is fresh from a visit to France, where he inspected the new arrangements adopted by the Emperor for the separate messes of officers' camp equipage and cookery in the French army, and his ambulance apparatus, applicable to trench-cooking, is unquestionably one of the most convenient and unique. It is susceptible of being worked in connection with any boiler or vessel for roasting or baking, mounted on an ordinary artillery waggon, accompanying the Army or the Volunteers whenever called on permanent duty; and amongst other ingenious contrivances, Mr. Clarke exhibited a small cooking apparatus for six persons, known as the *cordon bleu*, put into perfect operation at an expense of a halfpennyworth of fuel. The latest improvements in the rifle were represented by specimens of breech-loading by Colonel Colt and Dr. Maynard, of America. The seamless skin cartridge was also exhibited, said to be the best modern kind of ammunition on account of its easy loading, clean and correct fire. Mr. Bussey displayed his registered Volunteers' canteen, which has received the approval of the Secretary at War and the Volunteer corps generally as one of the neatest and most ingenious contrivances for carrying a Volunteer's rations on a march out. The principal officers of the various corps were entertained at an excellent mess-table dinner by Lord Ranelagh in the evening. The commanding officer has issued instructions to keep the ground for the West Middlesex corps, at their approaching review on the 10th proximo.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, OCTOBER 30.

1st Battalion Westmoreland Rifle Volunteers—Robert William Sanderson Roper Hunter, late Lieutenant 92d Highlanders, to be Adjutant, from the 23d of August last.

3d Battalion of Sussex Rifle Volunteers—Philip Primrose, Gent., to be Adjutant, from the 3d of September.

1st Corps of Northumberland Artillery Volunteers—Second Lieutenant John Shield to be First Lieutenant; John Hopper, Gent., to be First Lieutenant; James Henry Ingleden, Gent., to be Second Lieutenant.

Corrections—1st Northumberland Artillery Volunteers—Robert Morrison, Esq., to be Captain. (This was gazetted Munson.)

Duke of Lancaster's Own Regiment of Yeomanry Cavalry—The Hon. Arthur Frederick Egerton to be Lieutenant, vice Viscount Grey de Wilton, resigned.

12th Lancashire Artillery Volunteer Corps—Captain Peter Thomson to be Major.

15th Lancashire Artillery Volunteer Corps—Joseph Henry Robinson, Gent., to be 1st Lieutenant, vice McConnell, resigned.

4th Lancashire Rifle Volunteer Corps—Lieutenant Servetus Aitken to be Captain, vice Munn, promoted; Ensign Samuel Hall to be Lieutenant, vice Servetus Aitken, promoted; John Aitken, Gent., to be Ensign, vice Hall, promoted; the Rev. Robert Smith, A.B., to be Honorary Chaplain.

47th Lancashire Rifle Volunteer Corps—Ensign William Blinkhorn, the younger, to be Captain; William Rigby, Gent., to be Lieutenant; William Pilkington, the younger, Gent., to be Ensign, vice Blinkhorn, promoted; George Parr, Gent., to be Ensign.

68th Lancashire Rifle Volunteer Corps—James Alexander Forrest, Gent., to be Lieutenant; Charles Phillips, Gent., to be Ensign.

1st Battalion Isle of Wight Rifle Volunteers—5th Company—Lieutenant Albert John Hambrough to be Captain; Ensign Charles Francis Fisher to be Lieutenant, vice Hambrough, promoted; William Mew Judd, Gent., to be Ensign, vice Fisher, promoted; John B. Martin, M.R.C.S., to be Honorary Assistant-Surgeon.

Memorandum—The Queen has been graciously pleased to accept the resignation of the commission held by Captain John Brown Willes Fleming, in the 3d Isle of Wight Rifle Volunteers, and of that held by Lieutenant Maximilian Hodgson Geneste, in the 7th Isle of Wight Rifle Volunteers.

17th Rifle Volunteers—The Hon. Charles Cornwallis Neville to be Captain; Henry Byng, Esq., to be Lieutenant; Douglas Lane, Esq., to be Ensign; the Rev. John Lane Oldham, Clerk, to be Honorary Chaplain; Alfred Nicholas Jones, Esq., to be Honorary Assistant-Surgeon.

3d Monmouthshire Rifle Volunteer Corps—George Hatfield Banks, Esq., to be Captain; Thomas Peck Banks, Gent., to be Lieutenant; John Morris Morgan, Gent., to be Ensign.

7th Monmouthshire Rifle Volunteer Corps—Walter Henry Williams, Gent., to be Ensign.

2d Battalion of Hertfordshire Rifle Volunteers—The Right Hon. the Earl Cowper to be Lieutenant-Colonel.

1st Hertfordshire Rifle Volunteers—Jasper Gripper, Gent., to be Captain; Benjamin Young, Gent., to be Lieutenant; Augustus Hawks, Gent., to be Ensign.

12th Hertfordshire Rifle Volunteers—Charles Times, Gent., to be Ensign.

2d Midlothian Artillery Volunteer Corps—First Lieutenant David Young to be Captain, vice Taylor, resigned; Second Lieutenant George Vertue to be First Lieutenant, vice Young, promoted; Charles Morrison, jun., to be Second Lieutenant, vice Vertue, promoted.

The Queen has been graciously pleased to approve of Captain William Edwin Cotton Fell bearing the title of Captain Commandant in the above mentioned corps.

7th Company of Leicestershire Rifle Volunteers—Arthur William Arkwright, Gent., to be Ensign.

South Middlesex Rifle Volunteer Corps—Lieutenant Henry Langley to be Captain, vice Lord Ashley, resigned.

20th Middlesex Rifle Volunteers—Assistant-Surgeon Horatio Sillifant to be Surgeon; Charles George Mott, M.D., to be Assistant-Surgeon, vice Sillifant, promoted.

15th North Riding of Yorkshire Rifle Volunteer Company—Lieutenant Leonard Jaques to be Captain, vice Roper, resigned; Ensign George Roper to be Lieutenant, vice Jaques, promoted; Leonard Cooke, Gent., to be Ensign, vice Roper, promoted.

3d West Riding of Yorkshire Rifle Volunteers (Bradford)—William Henry Shepherd, Gent., to be Lieutenant; John Beach, Gent., to be Assistant-Surgeon.

36th West Riding of Yorkshire Rifle Volunteers (Rotherham)—Edward Robinson, Esq., to be Captain; Fretwell William Hoyle, Gent., to be Lieutenant; Matthew Edward Chambers, Gent., to be Ensign.

Memorandum—In the list forwarded on the 3d of March last, the undermentioned commissions should have appeared in the following order—viz.,

7th (now 4th) West Riding of Yorkshire Rifle Volunteers (Halifax)—Joseph Moxon Kirk, Esq., Lieutenant John Richard Ingram, and John Crossly Sutcliffe, Esq., to be Captains; Ensign Charles Fuller, John Bailey Holroyde, Gent., and Charles Emmet, Gent., to be Lieutenants.

1st East Riding of Yorkshire Artillery Volunteers—Burlington Corps—First Lieutenant Edward Foster Holden to be Captain, vice Harding, resigned.

Memorandum—Kent Rifle Volunteers—1st Battalion, 27th Corps—Captain Edward Wilkinson to bear the title of Captain-Commandant.

3d Battalion, 38th Corps (disbanded)—Her Majesty the Queen has been pleased to accept the resignations of the following commissions:—Lieutenant Leonard Barber Groves; Ensign John Cole Gubbins.

WAR OFFICE, PALL MALL, NOVEMBER 2.

2nd Administrative Battalion of Surrey Rifle Volunteers—William Temple Parratt, Esq., to be Adjutant. From 6th September, 1860.

3rd Forfarshire Rifle Volunteer Corps—Patrick Thorn Thomson to be Ensign.

1st Surrey (or South London) Rifle Volunteer Battalion—Dr. William Parker, M.D., to be Honorary Assistant Surgeon.

Memorandum—The Queen has been graciously pleased to accept the following resignations: viz., of that of Lieutenant Henry Hersee, of the Commission held by him in the 10th Surrey Rifle Volunteers.

Of that of Major William Prince Jones, of the Commission held by him in the 1st Surrey, or South London Rifle Volunteer Battalion, with the view of his receiving from the Queen the Commission of Adjutant of the 7th Surrey or Southwark Rifle Volunteer Battalion.

Of that of Captain Adam Stewart, of the Commission held by him in the 2nd Surrey Rifle Volunteers, with the view to his receiving from the Queen the Commission of Adjutant of the 1st Surrey Administrative Battalion of Surrey Rifle Volunteers.

Of that of Captain Frederick Andrew Durnford, of the Commission held by him in the 1st Surrey or South London Rifle Volunteer Battalion.

And of that of Captain Henry Plews, of the Commission held by him in the 19th Surrey or Lambeth Rifle Volunteer Battalion.

4th Middlesex Rifle Volunteer Corps—Ensign Camplin to be Lieutenant.

19th Middlesex Rifle Volunteer Corps—Thomas Preston to be Lieutenant; Augustus Charles Lawrence to be Ensign.

39th Middlesex Rifle Volunteer Corps—Joseph Beardoe to be Captain.

41st Middlesex Rifle Volunteer Corps—John Jackson to be Lieutenant, vice Sendey, promoted.

Memoranda—1st Middlesex Artillery Volunteer Corps—The Queen has been graciously pleased to accept the resignations of the Commissions held in this Corps by Captain-Commandant John McGrigor Augustus Thomas Croft, Captain John Samuel Erlam, and 1st Lieutenant Charles Wyndham.

20th Middlesex Rifle Volunteer Corps—The Queen has been graciously pleased to accept the resignation of the Commission held in this Corps by Ensign Charles Edward Phair.

39th Middlesex Rifle Volunteer Corps—The Queen has been graciously pleased to accept the resignation of the Commission held in this Corps by Lieutenant Henry Flear.

City of Norwich Rifle Volunteer Corps—Major John Davy Brett to be Lieutenant-Colonel.

9th Norfolk Rifle Volunteer Corps—Ensign Richard Henry Gilbert to be Lieutenant, vice Beauchamp, promoted; William Burton, Gent., to be Ensign, vice Gilbert, promoted.

5th Cumberland Rifle Volunteers—2nd Company—Lawrence Harrison, Gent., to be Captain; Mark Nicholson, Gent., to be Lieutenant; William Burra Arnison, Gent., to be Ensign.

2nd Suffolk Artillery Volunteer Corps—John Rand, Gent., to be Honorary Assistant-Surgeon.

17th Suffolk Volunteer Rifles—William Woodham Webb, M.D., to be Honorary Assistant-Surgeon.

1st Lincolnshire Rifle Volunteers—William Alfred Wood, Gent., to be Ensign, vice Clayton, promoted; William Pauli, Gent., to be Honorary Assistant Surgeon.

2nd Lincolnshire Rifle Volunteers—William Blathwayte, Esq., M.D., to be Honorary Assistant Surgeon, vice Trought, resigned.

11th Lincolnshire Rifle Volunteers—Her Majesty has been graciously pleased to accept the resignation of the Commission held by Lieutenant Augustus Laurent; Ensign Higgins to be Lieutenant, vice Augustus Laurent, resigned; Lister Wilson, Gent., to be Ensign, vice Higgins, promoted.

Bedfordshire Rifle Volunteer Corps—1st Battalion—Major Francis Charles Hastings Russell to be Lieutenant-Colonel.

2nd Company—Charles Stockdale Benning, Gentleman, to be Lieutenant.

4th Company—Thomas Grimstead, Esq., to be Captain, vice Macnamara, resigned.

5th Company—George Maule, Clerk, to be Honorary Chaplain.

Suffolk Rifle Volunteers—Frederic William Schreiber, Esq., to be Lieutenant-Colonel of 2nd Administrative Battalion.

18th Suffolk Rifle Volunteer Corps—William Gaskoin Stutter, Gent., to be Lieutenant; Joseph Robarts Bromley, Gent., to be Ensign.

Robin Hood Rifle Volunteer Corps—Samuel Watson, Gent., to be Captain, vice Morley, resigned.

Kent Rifle Volunteers—37th Corps—Ensign Henry Jeffreys Farrar to be Lieutenant; Anthony Whitford, Gent., to be Ensign, vice Farrar promoted.

1st Battalion Ayrshire Rifle Volunteers—Major James Hay Boyd to be Major.

10th Company Ayrshire Rifle Volunteers—William Cunninghame Cunninghame, Esq., to be Captain; William Brown, Gent., to be Lieutenant; John James Monrieff Blair, Gent., to be Ensign.

1st Lanarkshire Rifle Volunteer Corps—Lieutenant Robert Leadbetter to be Captain, vice Charles Hutcheson Smith, promoted; Ensign Hugh Brown to be Lieutenant, vice Robert Leadbetter, promoted; Henry Watson, Gent., to be Ensign, vice Hugh Brown, promoted.

3rd Lanarkshire Rifle Volunteer Corps—James Leitch Lang, Esq., to be Captain, vice William Morier, resigned; Robert Cassells, Gent., to be Ensign, vice James London, resigned.

4th Lanarkshire Rifle Volunteer Corps—Lieutenant John Fulton to be Captain, vice James Gilfillan Anderson, resigned; Ensign Archibald Pollock to be Lieutenant, vice John Fulton, promoted; John Coates, Gent., to be Ensign, vice Archibald Pollock, promoted.

5th Lanarkshire Rifle Volunteer Corps—Ensign James Alexander Wilson to be Lieutenant, vice John Wilson, resigned; Mungo Currie Graham, Gent., to be Ensign, vice James Alexander Wilson, promoted.

19th Lanarkshire Rifle Volunteer Corps—George Buchanan, Esq., to be Captain, vice Richard McCulloch, resigned.

94th Lanarkshire Rifle Volunteer Corps—Robert Meikle, Esq., to be Honorary Assistant-Surgeon.

Memorandum—37th Lanarkshire Rifle Volunteer Corps—The name of the Honorary Assistant-Surgeon appointed to this Corps is John Lindsay, and not James, as stated in the *Gazette* of 3rd August last.

Memorandum—Oxford University Rifle Volunteer Corps—Her Majesty has been graciously pleased to accept the resignation of the commission held by Captain William Holding.

Memorandum—Her Majesty has been graciously pleased to accept the resignation of the commission held by Ensign George Birt in the 4th Hampshire Rifle Volunteer Corps.

THE ORPHAN CHILDREN OF CAPTAIN T. TAYLOR, 17TH LANCERS.

This officer preceded his Regiment over-land to India in October, 1857, to assist in procuring and breaking horses, in which duty his unceasing energies enabled the 17th to be mounted and ready for the field long before the time anticipated. The anxiety and labour consequent in breaking 400 or 500 horses for immediate service, and the seven months campaign that followed in the pursuit and capture of the rebel chief Tantia Topee—neccessarily marching day and night, under circumstances of unaccustomed exposure and privation, in a climate so fatal to thousands at the time—he became worn down, and died at Jhansi, 26th May, 1859.

On an application to the War Office, through Colonel Learmonth, the children have been allowed 14*l.* each a year, until they become of age. This allowance, and the interest of 300*l.*, the proceeds of their father's effects, is all they have for the present and future of life, which materially lessens their condition. Such very limited means being inadequate to provide them with the common necessaries of life, even at their present early age of seven, nine, and eleven years respectively; therefore, under the impression that their case was one fully entitled to relief from the Indian Mutiny Fund, I solicited the committee on their behalf; but from their father's death having transpired subsequent to the 31st March, 1859, their case for that reason was not considered eligible for relief, although evident as the facts are, that, but for the mutiny, the services of the father would not have been required in India, and, in all human probability, he would now be living to comfort and provide for his children; and, though his death took place two months after the prescribed date, which limits the extension of relief from the mutiny funds, it is well known, that hard work and privation for months previous were the causes which deprived these poor children of their only parent; and under such circumstances, their case is one of extreme hardship, that, in charity, is fully exceptional to rule.

The children at present are under the protection of a female, who has had the care of them since their mother's death in 1853, and they are without relations or friends to afford them any care or assistance in their helpless state; and therefore I venture to submit their case to the consideration of the humane and charitable, in the hope that means may be contributed in sufficient measure to secure these orphans from difficulty and want, and insure them a moderate welfare in life. J. STEPHENSON, Major Paymaster, Cavalry Depôt, Canterbury. Late 17th Lancers.

[Contributions will be thankfully received at the Office.—ED.]

FUNERAL OF THE DUKE OF RICHMOND.

The interment of the mortal remains of the late Duke of of Richmond (Charles Lennox, Duke of Richmond, Lennox, and Aubigny) took place on Tuesday.

The late duke had especially directed that his funeral obequies should be conducted in a manner the most unostentatious considering his rank, and his wishes were carried out to the fullest extent.

The remains were conveyed to Goodwood Park on Monday night, and at nine o'clock on Tuesday morning left for Chichester Cathedral. There were only three mourning coaches. The first contained only the sons of the deceased, namely, the present Duke of Richmond (Earl March, M.P. for West Sussex); Lord Henry Lennox, M.P. for Chichester; Lord Alexander Lennox, and Lord George Lennox, M.P. for Lymington. The second carriage contained the husbands of daughters of the deceased, namely, his Serene Highness Prince Edward of Saxe-Weimar, the Earl of Besborough, and Lord Bingham. In the third carriage were the Marquis of Anglesea, brother of the Duchess (Dowager) of Richmond; Lord Arthur Lennox, brother of the deceased duke; and Lord Leconfield; and in an extra carriage were Captain Valentine, steward to the deceased; the medical attendant; Captain Peel and Mr. Arthur Peel (sons of Lady Jane Peel, sister of the deceased), and Colonel Maitland (son of Lady Sarah Maitland, another sister of the deceased). Lord Sussex Lennox was also present.

So much was the lamented nobleman beloved that every means were offered by the inhabitants of the city of Chichester in order to testify their deep esteem, but these offers were of course declined. The plain hearse and four, without trappings or plumes, started, followed by the few mourning coaches that bore the small band of mourners.

All along the road, three miles and a half, work was suspended, and at the various crossings and junctions of roads were assembled rustic groups of the country people to testify their love and respect. In Chichester all business was suspended. Every shop was closed, every house had the blinds drawn, and even the labourers' tenements had the outer shutter closed.

The bells of the various churches tolled, and crowds thronged the streets through which the simple *cortége* reached the gates of the cathedral yard. There the coffin was met by the dean, Dr. Hook, who officiated in a most impressive manner. He was accompanied by the bishop, Sir George Shiffner, and the rest of the cathedral clergy. The cathedral was densely packed with an attentive and sympathising audience, many of whom had attired themselves in mourning, and clearly showing how deeply they deplored their loss. During the Lessons the coffin was deposited in front of the altar, and at their conclusion was conveyed through the south cloisters, out, and round the extreme east end of the cathedral, to the north side, in which a door had been opened leading to the vault. Here the rest of the ceremony was performed. A circle was kept open for the mourners round the vault by the proper feeling of the large body of spectators.

His Royal Highness the Duke of Cambridge, it is understood, expressed his desire to be present, but this was respectfully refused.

Among other spontaneous and touching marks of respect was the following:—The whole of the children of the workhouse, where the late duke laboured so many years in bringing into operation the new poor law, were drawn up by the side of the road, with the master, all bareheaded. It was altogether the most simple, the most striking, the most affecting scene to witness,

THE ARMY AND NAVY GAZETTE
AND
JOURNAL OF THE MILITIA AND VOLUNTEER FORCES.
EDITED BY W. H. RUSSELL, ESQ., LL.D.,
(Late Special Correspondent of *The Times*.)
The subscription is 7*s.* 7*d.* per quarter, or 30*s.* 4*d.* per annum, payable in advance, postage included (excepting abroad, which varies according to the route and destination). All Editorial Communications should be addressed to W. H. RUSSELL, Esq., and business letters and advertisements to MR. ARCHIBALD GRAHAM, to whom post-office orders, &c., are payable. Advertisements received up to Thursday evening. The Paper is published every Saturday in time for the Morning Mails.

MONEY ADVANCED on BILLS, PROMISSORY NOTES, POST-OBIT BONDS, or other securities, and at 5 per cent., on property derived under wills or settlements, without publicity or delay. Confidential applications may be addressed to Mr. MORRIS, Solicitor, 11, Beaufort Buildings, Strand, opposite Exeter Hall, W.C.

NOTICES TO CORRESPONDENTS.

Several questions referred to us by correspondents whom we are anxious to oblige by infringing on the rule which we have prescribed for ourselves, shall receive replies to their questions next week.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the EDITOR cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

It is particularly requested that applications for copies of the ARMY AND NAVY GAZETTE, &c., and advertisements be sent to the Publisher, MR. ARCHIBALD GRAHAM, and not to the EDITOR.

Army & Navy Gazette.

LONDON, SATURDAY, NOVEMBER 3, 1860.

It is extraordinary to find such adhesion to the traditions of wooden ships, with all their paraphernalia of heavy masts, yards, and spars, as are required for sailing vessels. If iron-cased ships are only formidable in the Channel,—that may be enough for our destruction. But it requires no great stretch of imagination to suppose these vessels towed out to more distant positions, and economising their coal till the fighting is close at hand; or that there might be coaling-jackals with which to provide these lions of the sea with fuel. Without these obvious aids, however, a good deal could be done in 8 or 10 days with an invulnerable vessel capable of going 13 knots an hour. A feeling similar to that which now exists as to iron-cased vessels, was exhibited at the Admiralty against steam for many years. The screw propeller was in like manner opposed by successive Boards, if the Boards are the real sinners. But then all the scientific and other journals laughed at the Whitehall obstructives. That was because steam and the screw were introduced into the mercantile marine, being useful in the service also of peaceful commerce. The public then knew well enough what it was talking of, though the officials continued obtuse. But in this matter of iron-cased vessels the general public cannot have similar knowledge. It is true they are aware what Louis Napoleon is doing, and they know he is no blockhead. They read the *Times*, of course. They know how two 8-inch shells set fire to the wooden Undaunted some twelve months ago at 400 yards, and that the fire could not be extinguished. They know that if such shells had struck the sides of even the half-rotten Trusty, her iron-casing would have cracked them like eggs, and she would have suffered no damage. They know, also, that round-shot at 200 yards, or Whitworth and Armstrong guns at greater distances, have penetrated the Trusty's sides, and smashed all 4½-inch plates, except those that were placed at an angle of 45 degrees, from which the shot glanced. They know the *Times* stated on the 14th of September, that "after trying various plates, under the direction of Captain Hewlett, the only result obtained was the establishment of the success of the Jones's angulated principle." But they know no more. The Admiralty appears only half convinced, and rather by the leaders of the *Times* than by official reports. Three additional iron-cased frigates, it appears from the newspapers, are ordered. But there is evidently no hurry about them. Only some half-dozen people are applied to to build them; and these include the names of the very contractors who have such difficulty and are so slow in building those already ordered. Yet we are told our means and appliances are so great that we shall soon distance the French Emperor. We can never distance him, if we do not order as many vessels as he does. The Emperor Napoleon has certainly earned the blue ribbon we lately gave him—if for nothing else—as the real Chief Constructor of the British Navy! He taught us to build batteries during the Russian war; but he beat us in building them, notwithstanding all our boasted means of working in iron. We have of course the means—all we want is a head with brains, like Louis Napoleon. He afterwards read us a lesson in building line-of-battle ships, at a time when the whole British Navy was fast becoming a mere shoal of gun-boats. He does not seem to have cared that we should follow him quite so close in building his new iron-cased vessels. He has kept his own counsel about them, and been very busy; and he is going on building and building, while we here in merry England are chaffing "inventors,"* and some old hands are found to declare they agree with the Board at Whitehall even yet as to the merits of wood. Meantime their lordships have become shaky in their views. Thanks to the press, three more iron-cased vessels are to be built. When they will be built is another point. The *Quarterly Review* thinks we shall not have one afloat till Louis Napoleon's ten are all finished! The whole business seems as if it were conducted by men whose hearts are not in it. Might not the Dockyard Commissioners call for the official documents bearing upon the whole question, as one that will sufficiently illustrate how the most important affairs of a great nation can be muddled and neglected? It would be interesting to know what Captain Hewlett has reported as to iron-plates, and how shot can be best resisted or turned-off; for how to keep shells out of ships, and an enemy off our shores, are the paramount questions of the day. What we do, or fail to do, in our Dockyards, will bear significantly upon both.

We continue to receive numerous letters on the subject of the unfortunate occurrence on board Her Majesty's ship Forte, to which we called attention the week before last. From these it would appear there was quite sufficient occurred on board to explain the putting back of the ship to Rio. We cannot go into all that may have previously occurred between the three personages concerned, which may, in a certain sense, account for, though it cannot justify, the sequel. We are sure the gallant Admiral would be the last to wish us to throw any of the blame off himself, and least of all upon one of the others. And it could do no good to correct any version of the transaction our readers may have heard, by stating the actual details, or saying more than we now do. If anything, however, were wanting

* We regret to find in a usually grave and scientific contemporary, the *Mechanic's Magazine* of last week, two articles and a letter all of this merely chaffing description. When we notice that the inventors thus treated include Lord Dundonald, Captain Norton, and Mr. Trotman, we need say no more. Perhaps the article relating to "angular" plates has gone beyond mere "chaffing." At any rate, its facts disagree with those related in the *Times* in many respects, and its deductions are unsatisfactory, being in favour of something that has not been tried, and which it only hints at, and against that which has been reported to have been tried successfully.

Digitized by Google

to prove that we adopted the fairest course in referring publicly to such a universally talked-of scandal, it is the fact that we are, in consequence, now enabled to inform many who will hear the correction for the first time, that there has been exaggeration in the story, and that there were some extenuating circumstances in this miserable case. We are glad to be able to say so much, and we do so with unfegined pleasure. We heartily wish we could have added that the whole story was a fabrication. We decline to write either as casuists or moralists, and still less to treat this matter with metaphysical sentimentality. We do not think Admiral Keppel, in his maturer years, should be put upon a level with some weak-minded youth of twenty, in the pages of a French novel. We wrote of a British Admiral, having some experience of the world, occupying a public command, and we treated him as a man in such high position, who would have been little complimented, indeed, had we regarded him as a person not to be held accountable for his actions. It must be manifest, also, to all who have read our remarks, that if we did not extenuate, till we had some grounds for doing so, we have certainly set not down aught in malice in a single sentence we have written.

On further inquiry we find that the Commissioners for the Amalgamation of the Armies have not recommended that the European Regiments of the Indian forces should be allowed to "die out." We have also reason to believe that no further or supplementary Report has been called for on the important questions which have been submitted to the attention of the Commissioners.

On Wednesday the several Line regiments forming the garrison of Paris were supplied with *tentes d'abri*, and the usual tools and other articles generally used by troops when in camp or bivouac.

By the death of the Earl of Dundonald an Admiral's good service pension falls to the gift of the Duke of Somerset. The office of Rear-Admiral of the United Kingdom is also at the disposal of His Grace. Admiral of the White Sir Lucius Curtis, Bart., succeeds to the Red squadron; Admiral of the Blue William Bowles, C.B., to the White; Vice-Admiral of the Red Sir Barrington Reynolds, K.C.B., becomes Admiral of the Blue. Vice-Admiral of the White Sir Arthur Fanshawe is made Vice of the Red; and Vice-Admiral William Fanshawe Martin, Commander-in-Chief in the Mediterranean, will change his flag from Blue at the fore to White at the fore. Rear-Admiral of the Red Sir Michael Seymour, G.C.B., is promoted to be Vice-Admiral of the Blue. Rear-Admiral of the White Christopher Wyvill is advanced to the Red list, and Rear-Admiral of the Blue Frederick Bullock is advanced to be Rear of the White. Captain Thomas Matthew Charles Symonds, C.B., becomes Rear-Admiral of the Blue, vacating his captain's good service pension, which falls to the gift of the First Lord of the Admiralty. Captain Thomas Leeke Massie is now the senior captain for promotion to the rank of Admiral. Captain Sir George Graham Otway, Bart., is entitled to the increased half-pay of 14*s.* 6*d.* per diem; and Captain Edmund Heathcote, now in command of the Doris, will be entitled when paid off to 12*s.* 6*d.* half-pay. We give in another portion of our impression an abstract of the services of the deceased gallant nobleman.

It is with sincere regret that we announce the serious illness of Admiral Sir Charles Napier, M.P., who was seized early in the week with an attack of paralysis, at his seat, Murchistoun Hall, near Portsmouth, where he continues in a dangerous state. Sir Charles is in his 75th year.

His Grace the Duke of Somerset, First Lord of the Admiralty, quitted his official residence at Whitehall on Tuesday afternoon for Devonshire, but returned again to Whitehall on Thursday evening. The attention which the Duke gives to the discharge of his public duties cannot be surpassed.

The Comptroller of the Navy, Rear-Admiral Sir Baldwin Walker, proceeded yesterday to Chatham for the purpose of making the necessary arrangements for the construction of the iron-plated ships lately ordered to be built at the Royal Dockyard.

Commander His Serene Highness the Prince of Leiningen has been promoted to the rank of captain. The command of the Fairy, Royal Yacht, will therefore be vacant. We have heard numerous officers named as the likely successors to the Prince, but until the pleasure of Her Majesty the Queen be known on the subject no appointment will take place. We hear that whoever is selected for the vacancy will be given to understand, that his promotion will be deferred for three years from the time of his nomination, instead of being granted, as lately was the rule, at the expiration of one year's service.

Lieutenant George Tryon (1854), who joined the Royal Yacht, the Victoria and Albert, previous to Lieutenant Townsend, and who, therefore, according to the rules which have been laid down for promotion of officers serving in this vessel, was entitled to receive the commander's commission, has been promoted, notwithstanding Lieutenant Townsend being senior to him in the Service. Lieutenant Townsend will, as a matter of course, be the next fortunate recipient of the prize. Commander Tryon is an energetic officer, and his promotion has given much satisfaction in naval circles.

Mr. James Wright, who for many years has been one of the principal draughtsmen in the steam department of the Comptroller of the Navy, in which position he has gained the esteem and support of his superiors has been nominated assistant to Mr. Lloyd, the Engineer-in-Chief of the Navy, in succession to the late Mr. Robert Hughes.

The division of the Channel Squadron stationed at Plymouth, under the command of Rear-Admiral Stopford, has been ordered to proceed to sea. Some of the ships will proceed probably as far as the Tagus, while others will cruise in the chops of the Channel; so that the Hero, with His Royal Highness the Prince of Wales on board, cannot pass up unnoticed.

The China Mail will not arrive till after we have gone to press this week, and we are consequently unable to appreciate the value of the comments which have been made on the supposed nature of the operations, or on the cause of the losses of the expedition in taking the Taku Forts. As some 3000 men were engaged on the land side, and possibly a large number of the gun-boats in the sea attack, the loss of 400 men, though heavy, is not very surprising, particularly when we remember the disaster we met last year at the same place. It would, indeed, be deplorable if the Allied Plenipotentiaries were to consent, after their success, to approach Pekin in any other way than at the head of the allied armies side by side with the generals in command. There are many reasons, however, which might have induced them to abate their high pretensions, such as sickness, want of transport and provisions, or physical impediments of which we know nothing—all not the less to be regretted for their results. The loss of 400 men if divided with our allies is not very serious; and as no British officer has been killed, we almost believe our forces were not so seriously engaged as the telegraphic dispatch might lead us to believe at first sight.

A correspondent from China has written to us complaining of the irregularities existing in the management of the post-office at Hong Kong; and strange enough his own letter brought conviction to our minds as to the truth of his statements, for on the envelope distinct directions were written that the missive should be forwarded to us *viâ* Marseilles. These were utterly disregarded, and the correspondence, which might have been useful to us had it been sent by the channel indicated, was comparatively valueless when received by Southampton.

Up to a late hour last night there was no intelligence at the Admiralty of the arrival of either His Royal Highness the Prince of Wales or Prince Alfred. A sharp look out is however kept at Plymouth and Portsmouth, and the authorities are on the *qui vive* to render every attention to the young princes as soon as they approach the land.

We understand that further experiments with Professor Way's electric light will shortly take place before the members of the Ordnance Select Committee, prior to a report on the subject being laid before the Government.

The *Quarterly Review*, *Blackwood*, and the *United Service Magazine*, have taken up the great question of iron *versus* wood ship-building; and although they treat the subject from different points of view, they all bear testimony to the value of iron casings to men-of-war.

We stated last week that we had heard, upon good authority, that the French Emperor had ordered the construction of a number of iron-cased gun-boats. We now learn, through the *Nouvelliste de Rouen*, that it is resolved to build one hundred and fifty of these vessels by private contract, after the model of the gunboat designed by the Emperor at Bordeaux, each to be armed with a powerful rifled gun.

A letter from Toulon, received in Paris, states that in addition to the six iron-plated ships now building, ten more are ordered to be laid down with all dispatch, viz., two at Toulon, two at Brest, two at Rochfort, two at Lorient, and two at Cherbourg. This, if confirmed, will prove that a smart race is cut out for us, and it will undoubtedly be our own fault if we lose the stakes.

Le Phare de la Manche, a paper published at Cherbourg, gives, among other items of news of interest connected with the port the information, that another large steam transport is to be built immediately. She is to be of the same size as La Sarthe, now in progress of being built.

We learn from the *Moniteur de la Flotte* that the yacht Jérome Napoléon is fitting out at Cherbourg, and from the orders which have been received from the Minister of Marine respecting her, it would look as if a lengthened voyage were in contemplation. It is expected that Prince Napoleon will re-embark before long, and a report is current that he will circumnavigate the globe.

Le Pays de Caux states that a good deal of activity is observable along the sea-board of France in the formation of a reserve of seamen gunners. This force is to be composed of sailors who have not completed the necessary time at sea to enable them to demand their retirement, which they will be allowed to do under this new system of service. The men will not be permitted to proceed on long voyages, but are to confine their labours to the coasting and fishing trades, so that when required they can be assembled without difficulty at any given point for the purpose of being drilled and exercised.

The *Moniteur de l'Armée* of November 1st publishes a seniority list of no less than 51 officers of instruction, who passed through the Ecole Impériale of cavalry on the 15th September last. It is understood that the cavalry instruction and exercises in the French army are undergoing very extensive and important changes and modifications.

In the list in order of merit of the 261 students admitted to the Imperial special Military School on the 11th August, there appear, among the noblest titles in France, the names of more than 30 private soldiers, and the second on the list is that of a private of the 18th Regiment of the Line.

GREAT SALE OF ARAB HORSES.

The following catalogue of horses which are to be sold at the Palace of Abassia, near Cairo, has been sent to the Government by Mr. Colquhoun, Her Majesty's Consul-General in Egypt, as being of importance to all breeders of blood horses in England:—

Catalogue of horses of known high breeding in the stud of His late Highness Elhamy Pacha, remaining from the stud of the late Viceroy Abbas Pacha.

33	Stallions. (One of these was bought of Colonel Blood for 4000*l.* sterling.)	
137	Mares of Arabian and Syrian Stock.	
170		
51	Colts entire	Produce of the above.
59	Fillies	
110		
2	Mares, highest Egyptian breed.	
52	Stallions do. do.	
54		

The above will be sold by public auction at the Palace of Abassia, near Cairo, on Monday the 10th of December, 1860; and the sale will be continued on two days of each week till the whole stock be disposed of.

By order of the official trustee, Edheen Pacha.
Alexandria, October 11th, 1860.

In our last Number we had a few words to say *apropos* of the Balaclava charge, and of the anniversary dinner, of which, by the by, little notice has been taken in the public journals, inasmuch, perhaps, as the officers who were present—though not indifferent to the *popularis aura* at the time of the war, and not altogether regardless of the influence of the trumpet-note of the press, which made the glories of their charge ring through the land and through the hearts of their country—have since found out that their laurels require no watering, and have grown quite fast enough. The establishment of the dinner is a good idea, but it would be still better if some steps were taken to provide those who contributed so much to the splendour of the charge of the 25th of October with an entertainment on that day by their various regiments. In reference to this subject we beg to call the attention of all those who are interested in the charge of Scarlett's brigade to a very spirited and very truthful engraving of the scene by Mr. Thomas Sherrett, from a drawing by Major—if not at last Lieut.-Colonel—Elliot, who was not only actively engaged, but severely wounded in the combat—published by Messrs. Graves. The nature of the ground is very well explained, and the difficulties with which our troopers had to contend in getting out of their own camping ground, tent ropes, and pegs, and heavy vines, can be understood by an inspection of the engraving, which represents the action of the brigade at the moment when Lord Lucan hurled the Greys and Inniskillings at the left centre of the Russians, who are advancing in formidable masses at reduced speed upon our position. The 4th and 5th Heavies are forming as fast as they can to meet the Russian right, which is overlapping the Scotch and Irish regiments as they cleave their way through the central squadrons of their opponents; and the confusion, tumult, and apparent disorder of the rapid, but admirably-managed dash of the British cavalry are exceedingly well-rendered—so much so, that Major Elliot scarcely would have the right to shelter himself from any criticism by the remark that he was an amateur.

PRESENTATION OF PRIZES TO THE ST. GEORGE'S RIFLES.

On Monday afternoon Sir Hamilton Seymour distributed the prizes to those members of the St. George's Rifles who had been successful in the recent shooting competition. The prizes were to have been delivered in Hyde Park, but the ranger would not allow the erection of a daïs for displaying them, and it was then determined that the presentation should come off in the grounds of Burlington House, Piccadilly. About three o'clock the four companies of the regiment, commanded by Colonel Lindsay, entered the grounds, and were shortly followed by a detachment of the Paddington Rifles. A number of evolutions having been executed with a steadiness and precision which excited general admiration, the men were drawn up in line in front of the daïs on which the prizes were displayed. Sir Hamilton Seymour having ascended the daïs said: "I find myself occupying a place for which I am extremely unworthy, which I feel I do not occupy through my own merits, but owing to my good fortune of being in connection with the St. George's Rifles, of which I feel very proud. It is not necessary to detain you very long upon the subject of the great national movement which has given rise to the formation of this corps. I would only be saying ill what has so often been said well. You felt there was a necessity upon you to organise this movement. The necessity, although it was long overlooked, was at last universally admitted. The movement was carried on by your own exertions and by the expression of your own will. We were under no obligation to the Government—you will excuse me, being a member of the committee, speaking in the plural—I say we were under no obligation to the Government or the houses of parliament. Yourselves devised, and what you devised you carried into execution. And allow me to say that I believe it is true in this free and magnificent country that so often as a want is strongly felt and warmly expressed, so often will the wishes of the people be accomplished. When that fails to be the case—when the want is but partially felt and expressed—then I take the liberty of imagining that something differing very much from the Volunteer movement will be the result. But a certain number say that, although the movement is magnificent, we are not sure that it will continue. Now I am morally and positively certain that it will continue. It will continue, for one very good reason—because it has become an institution, because it has become part and parcel of ourselves. It will continue because it has become identified with our daily habits and with our daily amusements. You will not be able to give it up, supposing you should wish to do so. If you do not think there is reason enough in that, then I will give you a much better reason, and it is this. More or less we live under a tyranny—a tyranny which, although gently exercised, ir strongly felt—the tyranny of the gentle sex, who are so handsomely represented around me. I think if you desired to back out of the movement these ladies in silks, and satins, and crinolines would not let you. There is another good reason why the movement will not be given up. It is found to be so extraordinarily conducive to good health that it is already affecting the bills of mortality. You laugh, but such is really the fact. We have all benefited by the movement. There is only one class that has suffered from it, and that is the vendors of pills. Die no more, gentlemen. It is found that a good drill in Hyde Park, or good practice in the Scrubs, is infinitely better than pills for the constitution. Well, now, gentlemen, I will not trouble you with any more observations of this nature, but I shall come at once to the business that has called us together to-day. I must say that I never felt prouder than on this occasion, when circumstances have brought me into connection with the St. George's corps. The year has been very unfavourable to agriculture, and we hear that the farmers are very deeply and naturally complaining. But this inconvenience has not extended to you. Your harvest, gentlemen, has been fully cut, it has been well got in, and now its results are about to be presented to you." Sir Hamilton then presented the prizes, as follows:—1. A silver tankard (presented by the Right Honourable Sir Hamilton Seymour), to the member who gained the greatest aggregate number of points in the three classes throughout the course, with the proviso of his being a marksman with a minimum of seven points. Lieutenant Charles Savory (46 points). 2. A silver goblet, value 7*l.* 10*s.*, to the best shot in the third class, standing. Mr. Otto Klopp (27 points). 3. A silver cup, value 5*l.*, to each of the best marksmen in the four companies. P. Grey, A. N. Lavender, E. Ortner, E. Asper. 4. A challenge cup, the property of the corps for ever; to be held for one year by the member who gained it—Sergeant C. N. Peal. 5. The gold medal of the St. George's, to be awarded to the winner of the challenge cup—Sergeant C. N. Peal. 6. A Whitworth rifle (the gift of Miss Lintot, and presented by her), to the best shot at 500 yards—Mr. F. Crooks. 7. A Lancaster rifle (the gift of Mr. C. Lancaster) to the best shot at 400 yards—Mr. W. Sandford. A Westley Richards rifle was also presented to Mr. C. N. Peal. The Turner Plate, to be competed for annually by ten picked men from the Victoria, Queens Westminsters, and the St. George's, was presented to the St. George's, who had gained it; and the medal accompanying it was given to Mr. F. Crooks. When the distribution had been completed, Sir Hamilton Seymour made a few humorous remarks. A lady (he said) was to have distributed the prizes, but she had not had the courage to make her maiden speech. A good deal of brass was required for these things. Sir Hamilton then eulogised Mr. Turner for his liberality, hoped that his plate might long remain with the St. George's Rifles, and expressed his opinion that the members in their zeal for practising might not be led to forget their ordinary business. The Rev. Dr. Irons then presented the corps with a silver bugle, the gift of Mrs. Lincoln. The rev. gentleman, in a lengthened and fervent speech, advocated the Volunteer movement as a means of defence against foreign aggression. Colonel Lindsay then, in the name of the corps, thanked Sir Hamilton Seymour for distributing the prizes, and proposed that three cheers should be given in his honour. The request was readliy complied with, and the proceedings terminated with three enthusiastic cheers for the Queen. A public meeting of the members of the corps was held in the evening in the Hanover Square Rooms, for the purpose of considering the propriety of reducing the entrance fee and the annual subscription. Mr. George Smith presided, and briefly explained the object of the meeting. Colonel Lindsay, who was very cordially received, moved a resolution to the effect that the entrance fee be 10*s.* 6*d.*, and the annual subscription one guinea. He was thoroughly convinced the reason why the corps was so small was the very large expense attending enrolment. The muster-roll had been originally 500, but now it scarcely amounted to two-thirds of that number. He thought it was their bounden duty to meet the young men half-way, for if they did not get them they would have none to draw from. It was only the other day they missed obtaining a fine body of men in Vere Street on account of the expense. It had been proposed that the young men should pay by weekly instalments, to be guaranteed to the commanding officers by their employers, and he highly approved of such an arrangement. Lieutenant Savory seconded the motion. Mr. Cooper thought the entrance fee should be 21*s.*, like the annual subscription, and he moved an amendment to that effect. Mr. Cridle said he could not understand why the standard of St. George's should be reduced to meet the exigencies of the other men. He seconded the amendment. Mr. St. John supported the resolution most cordially. Captain Sir John Harrington thought the paucity of the corps was a disgrace to it. The expensive uniform kept out great numbers. The amendment was then put, but as only nine hands were held up in its favour, it was declared to be lost. Another amendment, proposing the abolition of entrance fees, and the substitution for them of weekly subscriptions of 1*s.* 6*d*, was also moved, seconded, put, and lost. The original motion was then declared to be carried by an immense majority.

Rifle Volunteer Statue.—Mr. Doherty, a young sculptor who is rapidly advancing to a high position in his art, has happily executed a statue of a Rifle Volunteer. It is a full-length standing figure, the head uncovered, and the hand of the extended right arm grasping the rifle at the muzzle, whilst the left arm carelessly crosses the body, and rests on the right arm, the right leg being thrown forward in an easy position so as to meet the butt of the weapon. The attitude is determined without being defiant; calm, but vigilant, as if the artist essayed to offer an emblem of England armed, not for attack, but defence, solemn and patient, abiding trustfully whatever issues Providence may have in store for her. The statue stands amid other poetic idealities of the artist's studio, the first dreams of youthful genius—two of which, "Gondoline" and "Erin," are already well known—and does no discredit to its beautiful companions.

Grand Rifle Fete at Rye of the Counties of Sussex, Surrey, and Kent.—On Monday a grand rifle fête of the members of the various rifle corps in the respective counties of Sussex, Surrey, and Kent took place at the practice ground of the 3rd Cinque Ports at Rye. The ground is admirably adapted for the purpose to which it is applied. The fête commenced with a match between 12 members of the Hastings corps and 12 members of the Rye corps, Lieutenant Crake and Ensign Bellingham respectively commanding. The competition was five shots by each party at 200, and five at 300 yards, and resulted in the Hastings men making 127 points as against 110 accomplished by the Rye. The Hastings Artillery were present by special invitation, headed by their band under Mr. Hermitage. The following corps were also present:—3rd Cinque Ports (Rye), Ensign Bellingham; 1st Cinque Ports (Hastings), Lieutenant Crake; 29th Kent (Ashford), Captain Groves and Lieutenant Burra; 37th Weald of Kent (Hawkhurst), Lieutenant Ayerst; 4th Cinque Ports Artillery (Hastings), Captain Scrivens; 4th Cinque Ports (Hythe), Ensign Watts; 5th Cinque Ports (Folkestone), Lieutenant Leith; 4th Surrey (Streatham); 9th Surrey (Richmond); 12th Surrey; 5th Sussex Artillery (East Grinstead); 5th Kent (Canterbury); 16th Sussex (Battle); 5th Surrey (Reigate); 3rd Kent, and several others. From these various corps about 120 members entered into competition for a silver cup as the first prize, and a silver medal and a bronze one as the second and third. After a highly-spirited contest, with five rounds at 300 yards, Sergeant Penhall, of the Hastings corps, was declared the winner with nine points; and Lieutenant Crake (Hastings), Sergeant Brittenden, and Private Kennett made eight points; and on shooting off the ties Mr. Kennett won the second prize, and Lieutenant Crake took the third.

Review at Kingston.—On Saturday last a review of the 2nd Surrey administrative battalion took place at Kingston, by Sir Henry Fletcher, the major commanding. They mustered and marched to the cricket-field, about two miles from the station. The Chertsey were commanded by Captain Murray and Lieutenant F. L. Dowling; Wimbledon, Lieutenant Richardson; Egham, Lieutenant Booth; Esher, Lieutenant Higginbotham; and Richmond, Major Yeatman. The Richmond corps were accompanied by the band, and the men having gone through a variety of field evolutions, were addressed by Sir H. Fletcher in complimentary terms, and marched back to their respective divisions, and were dismissed.

Workmen's Volunteer Brigade.—A deputation of the officers of the Workmen's Volunteer Brigade, consisting of Sir William De Bathe, Captain Geddes, Messrs. Nicholay, Richards, and others, attended at the Court of Lieutenancy, Guildhall, last week, to urge the court to recommend the acceptance by Government of the services of the brigade, numbering upwards of 1200 men. Sir W. De Bathe, in most impressive and emphatic terms, entreated the court to lose no time in deciding on the application. The deputation was asked if the Marquis of Salisbury (the lord-lieutenant of the county) had been applied to; the reply was such application had been made, and the marquis, in answer thereto, stated that it was not within his jurisdiction, but of the City Court of Lieutenancy. Mr. Nicholay urged immediate consideration and deliberation on this momentous question, as delay was most damaging to this enthusiastic, patriotic, and popular movement; and he wished to be informed if the deputation was correct in applying to this court, for if not, an aggregate meeting would be immediately organised to apply to and memorialise the Government. The chairman said he believed the deputation was adopting the proper course. The court ultimately fixed a special day—the 5th of November—to consider and discuss the proposition.

HAMPSHIRE MOUNTED VOLUNTEERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—In your Correspondent's account of the review at Winchester on the 24th ult., the Hampshire Mounted Volunteers are said to have charged squares in echelon, regardless of Balaclava experience.

This seems a trivial matter for newspaper notice; but since the corps I have the honour to command has become an object of criticism, as well as of attraction, permit me to observe that infantry do not resort to squares unless threatened by cavalry; and when the Volunteer infantry had recourse to this formation, it was to be supposed that an attack of "imaginary cavalry" had to be repelled.

And then came my orders to charge this "imaginary cavalry," not the squares in echelon, which happening to have formed themselves on an exposed slope within range of some three thousand Enfields, would probably have got out of that, had actual bloodshed, and not the amusement of the populace been our object.—I am, &c.,

J. Bower,
Lieut.-Colonel and Capt. 1st Hants Mounted Volunteers.

PORTSMOUTH CIVIL SERVICE ARTILLERY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Observing that the Army and Navy Gazette has repeated a mistake, made by most of the London daily journals in their reports of the grand review and sham-fight by the Hants and Isle of Wight Volunteer corps at Winchester on the 24th ult, in omitting, when enumerating the corps present, to mention the Portsmouth Civil Service Artillery (3rd Hampshire), it is my duty as the commandant of that corps to acquaint you that we were present, and took part in the evolutions of the day, our numbers on the ground being 230 of all ranks, including the adjutant, surgeon, and honorary chaplain; and judging from your usual efforts to encourage the Volunteer movement, I feel its unnecessary to ask you to publish and record the above fact in your valuable journal, the principal Volunteer Gazette, in order that the members of the 3rd Hants Artillery Volunteers, now one of the largest corps in this county, may not feel discouraged by the silence of the press, after their strenuous efforts to enable them to take part in this review, which took place exactly two months only after the corps was started. Their exertions to qualify themselves for the review, and their movements on the ground having already elicited the greatest praise in the proper quarter.—I am, &c.,

Alfred B. Sturdee.
Major and Commandant, 3rd Hants Artillery Volunteers, and Second in Command of the Artillery Battalion at the Review at Winchester on 24th ult.

Rifle Shooting Match.—A spirited rifle match was fired at Ash Common, Aldershot, on the 30th of October. The contest lay between the 29th and 45th Regiments, and 1st Battalion Rifle Brigade; these regiments compose the 3rd infantry brigade at Aldershot. Brigadier-General Russell, C. B. offered 3 prizes of 2*l.* 10*s.*, 1*l.* 10*s.*, and 1*l.* to be shot for by the best shots of each company, at the termination of the annual course. Five rounds were fired at 400, 600, and 800 yards. The gallant old Rifle Brigade, roused to emulation by late remarks on their position in the late official returns, held their superiority throughout, as shown by the following table of average points:—

	400 yards.	600 yards.	800 yards.
1st Batt. Rifle Brigade ...	3·64	2·18	1·18
45th Regiment	3·36	2·18	0·52
29th Regiment	2·18	1·64	0·36

The first prize was won by Sergeant Tubb, 1st battalion Rifle Brigade, who obtained eleven points at the three distances; the 2nd prize was awarded to Colour-Sergeant Strecelger, who gained 10 points; the 3rd prize was divided between Private Gorman, Colour-Sergeant Wood, and Private Wood, 45th Regiment, who each obtained 9 points. Unfortunately a fog prevented the tie from being shot off. It is a remarkable fact that the Rifles fired with the old short Enfield, which has gained them so little honour in their figure of merit for the past year, and to which we alluded in our last number. At the conclusion of the match the brigadier-general addressed the men in manly soldier-like terms, pointing out the advantage of acquiring dexterity in the use of firearms, exhorting careful attention to the excellent system of musketry instruction, as carried out by the present zealous and able instructor at the camp, enjoining the greatest care in keeping the rifles clean, and promising to renew the contest during the next season. This well-timed match and speech gave evident satisfaction, and the meeting broke up with the conviction that the best men had carried off the prizes. We compliment the men of the Rifles on their success and skill, also the gallant officer who generously gave them the opportunity of proving it.

Monthly Military Obituary.—General—Frederick R. Thackeray, C.B., colonel commanding Royal Engineers. Lieutenant-General—Sir Harry George Wakelyn Smith, Bart., G.C.B., colonel commanding Rifle Brigade. Colonel—Arthur John Reynell Pack, C.B., lieut.-colonel, half-pay 7th Foot. Lieut.-Colonels—Joseph Maycock, captain 53rd Foot; John Field Oldham, captain retired full pay, 5th Foot; Veterinary Battalion. Majors—Henry Draper Neville, 22nd Foot; Robert Follett Synge, 1st West India Regiment. Captains—William Webber Martin, 2nd Foot; Annesley Cary, 16th Foot; Alexander Edgar M'Gregor, 21st Foot; James F. Baxter, 56th Foot; John Owens, 1st West India Regiment. Lieutenants—Power Digby Le Poer Trench, Royal Artillery; William Haslett, 13th Foot; Charles William Quin, 70th Foot; William Henry M'Coy, 2nd West India Regiment; Charles Bury Cradock, ditto; Purefoy Poe, half pay, 39th Foot; James Whimster, half pay Sicilian Regiment. Paymasters—Hamilton Finlay, 56th Foot; John Andrew Pope (captain), 67th Foot; G. Augustus Durnford (major), half pay, 39th Foot. Quartermaster—John Kirby Mountain, 6th Dragoons. Deputy Commissary General—Buchan Fraser Telfer, half pay. Assistant Commissary General—William Robinson, half pay. Assistant Surgeons—Charles Bagot, M.B., 2nd West India Regiment; Thomas Chaytor Beale, staff; William Michael Trestrail, staff; Charles Drelincourt Campbell, M.D., staff.

NAVAL INSTRUCTORS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—As one who has derived no inconsiderable benefit from the ill-treated class, whose claims you advocated in your number of last Saturday—I mean the Naval Instructors of the Navy—I would, in gratitude, wish to say one word in their favour, and correct an impression which, if it gained ground, might be mischievous in the extreme to those officers, who, God knows, have already enough to complain of. You alluded to their desire to wear uniform. You are in error on this point. Their wish is that the uniform, although a voluntary one, now assigned to them, should be abolished, and that the obnoxious clause referring to it should be erased from the Navy List. This clause they consider a standing insult to them. Why should they be told, as Ward-Room officers, that they are allowed to wear the uniform of the most subordinate officer of the ship? Such treatment on the part of the Admiralty can only have one effect, that of lowering the Naval Instructors in the eyes of their pupils. I have been brought up by these officers, and to them I feel that much of my success in my profession is due. You will therefore, not wonder at my taking an interest in their well-being. I have studied their case thoroughly, and I am satisfied that at the present moment there is no class with higher claims on the consideration of their Lordships.—I am, &c.,

A POST-CAPTAIN.

NAVAL MEDICAL SUPPLEMENTAL FUND.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—One of the most objectionable points in the recent report of the committee was the recommendation to deprive the insured members of their rightful security, and throw them into the hands of a certain London Assurance Company.

If "Abolitionist," in your last week's paper, is correct, we have a clue to the wherefore of this most unjustifiable recommendation. "Abolitionist" states that "The worthy chairman of that committee is a director of the Assurance corporation specially recommended." Can this be true? If so, the thing has an ugly look about it, and affords another stout reason why the noble president and patron should give the committee's report the treatment which it would deserve.—I am, &c., NOT AN ABOLITIONIST.

NAVAL CADETS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Are the Admiralty going to allow the Britannia training-ship for naval cadets to become what the Naval College was?

Depend upon it, sir, that in a few months time the whole system of training will be condemned. There is time yet to save the Britannia from meeting with the same fate as the college.

When the Illustrious first commenced distributing her offspring, every one was full of praise of a system which so soon brought to the Service youngsters well trained and ready at once to be sent away in charge of a cutter, or stationed aloft, surpassing the mids of two years' standing in the theoretical knowledge of their profession, and becoming equal to them in practical knowledge in a few months.

"The right men are in the right place on board the Illustrious, at all events," was in every naval officer's mouth.

The new broom swept uncommonly clean, but it is now worn out; or you want more brooms, or rather, in plain English, a change is wanted. Instead of having one training-ship, have three. Let the captain and officers of the one at A say, "My youngsters shall turn out better than those at B or C." Take them away from Portsmouth. All they learn there had far better be deferred.

Competition in educating naval cadets is required as well as in anything else; and if the captain and officers of the Britannia are satisfied with their work, and think they have done all that is necessary, that they have wound up the clock, and now it must go, they are very much mistaken; and so will every commanding officer say who has taken the smallest trouble to observe.

The naval cadets you now receive would have been far better had they never seen the Britannia or Portsmouth. They have gradually deteriorated within the last year, but their run down hill has been alarmingly fast; they may have learnt how to colour a clay, but nothing better have they picked up on board the training-ship (?) in Portsmouth harbour.

A word in time from you may save, sir, one of the most important schools of Old England from destruction. I could write more fully on this subject, but your space is too well filled. Knowing the interest you take in our noble profession is the excuse I offer for thus trespassing on your valuable columns.—I am, &c.,

ONE WHO IS SERVING, AND HAS SERVED FOR TWENTY YEARS IN SUCCESSION.

THE VOLUNTEERS AND THE EARLY CLOSING MOVEMENT.—At a meeting of the first anniversary of the Liverpool Early Closing Association, Major Walters, of the Liverpool Artillery Volunteers, in the course of his address said the Volunteer brigade of which he was the commanding officer consisted principally of young men employed in mercantile establishments; and it had been his duty to call at some of these establishments with a view of obtaining some modification of the hours of labour; and he said the relaxation obtained had been productive of good in every way. He had it also on the very best authority that the known haunts of vice which were frequented by the class of young men forming the Volunteer force of this town were now almost entirely deserted.

HUMBUG!—It was announced in the military and naval intelligence of *The Times* the other day that a trial was being made at Harwich of a new cannon-ball manufactured by Messrs. Ransome and Sims, of Ipswich. Mr. G. A. Biddell, of Ipswich, writes to our contemporary:—"The invention is exclusively my own, and the projectiles were made as a private experiment for my own use; but Messrs. Ransome and Sims are in no way interested in the matter, and on its coming to the knowledge of Messrs. R. and J. A. Ransome and Mr. Sims they have desired that the experiments should not be repeated at their works, as they object to be in any way engaged in the manufacture of war implements."

CAVALRY EXPENSES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—One word more to "A Guardian." Being myself a parent and guardian with sons in the Army, and having also been many years a commanding officer, I fully concur with him that the best theoretic orders are nugatory without obedience. I believe also as he states that many cavalry officers of the old school represent 300*l.* per annum as the minimum required for a subaltern; somewhere about equivalent, in truth, to the old and indispensable qualification for an M.P., 500*l.* a year. Doubtless it should be the object of a Minister of State presiding over the welfare of the National Army to correct every possible grievance which appears to be corrigible. No man who is practically acquainted with the Service, or who reads your journal, can deny that reforms have been periodically made, when inquiry has satisfied the authorities that complaints have been well founded. Witness the many reported in your own columns. Two, even in your last number, viz., "The selection of chargers," "the appropriation of the Regent's allowance to the general expenses of the mess," and thus repudiating factitious notions of respectability. Unhappily, however, my own long experience as a commanding officer convinces me that nine-tenths of those ruined in the Service are the victims of their own folly, indiscretion, or profligacy. Does a guardian suppose that there is any special virtue in the tutelary function of a commanding officer? Nay, does not our own more circumscribed office often convince us of the inefficiency of the words parent and guardian? Let but the authorities carefully remove all just reproach as to a necessity for the least compulsatory expenditure for personal gratification, and the officer of the Army must then, as is the case with every member of every other class in the community, be left to his own self-denial, energy, and independence of thought and character: virtues far more protective and defensive than the eternally invoked surveillance of the commanding officer.—I am, &c., DROIT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—As one who has paid some attention to the subject of the difficulty in procuring subalterns for the cavalry, to which you alluded in last week's ARMY AND NAVY GAZETTE, I am decidedly of opinion that, although the conventional expenses, whether for chargers, messing, or other extravagances, depending on the peculiar fancies or tastes of colonels, may have some effect in keeping candidates back, yet the principal obstacle is unwillingness to pay the great regimental sum above the regulation price that is required in advancing the young officer after he has bought his first commission at the regulated price. The lowering of the regulation price of cavalry commissions will not attain the object as long as this vile system is allowed to be; for, depend on it, there are many men who can well enough afford to give the regulation prices for their steps, and would gladly do so, who will not enter a service in which they must either risk much money to advance in it, or must remain without hope of promotion and see juniors pass over them.

The Commander-in-Chief has attempted much for the benefit of the cavalry officer, but he must do more; and until he strikes some great blow against this systematic breaking of the Queen's regulations in this way, his task will be but half done.

Very lately a case, to which my attention was called, serves well to demonstrate the pernicious effects the system has against the well-being of the Service. A step was going in a regiment in consequence of the retirement of one of the captains. Of course, as he had paid for his various steps, he wished to recover the sum. He looked to the lieutenant who was to succeed to his troop for the money, and he again looked to the senior of the next grade to make up his share. Unfortunately, in this instance the senior cornet, though a good soldier, was a poor man, but still he had sufficient money to purchase the step at the price authorised by the Queen, and was most anxious to do so. Such a thing was not to be tolerated, and after a good deal of disgraceful higgling, bargaining, and hard words, the poor man — in fact he had risen from the ranks — was obliged to give in, and to allow a junior, who was the fortunate possessor of the illegal but necessary five or six hundred pounds more than regulation, to pass over him, the only fortunate man in the transaction being the lieutenant, who actually made money by the deal, as by a lucky chance he had obtained his lieutenancy without this outlay. In consequence of the affair ill-feeling arose against the bold interloper who had dared to risk "to stick for regulation." Of course all the officers of the regiment were against him, and more especially some, who from the executive positions held by them should rather have assisted to carry out the Queen's regulations.

This is one of many instances where a real soldier, and one who must stick to the Service, being dependent on it for his living, is obliged to give way to others who probably intend amusing themselves for a few years till the coveted handle to the name is obtained, and then to leave the Service.—I am, &c. O.

Five hundred of the late Irish brigade passed through Paris last week on their way to Havre. They appeared to be fine manly-looking fellows, with abundance of beard and great breadth of shoulders, and in appearance the very stuff for soldiers. A large crowd attended them up to the railway station, but no cry or manifestation of opinion whatever was indulged in. It is to be hoped that the recruiting-sergeants in the south-west district have not lost the chance of securing some of these men, who, with ordinary good treatment, would make capital soldiers.

The Rev. C. Forman, Roman Catholic priest at Christchurch, Hants, has received notice from the Secretary of State for War that his services, for the spiritual charge of the Roman Catholic soldiers in the barracks, have been accepted; and that in future, when their numbers exceed twenty-five, his salary may be drawn through the district paymaster, according to the rates laid down in the War Office Regulations on that head.

We regret to hear that the crimes of desertion, insubordination, selling of kits, and drunkenness, are very rife in the south-western district, and that numerous courts-martial will be the consequence.

LUCKNOW PRIZE-MONEY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—You recommend (and justly) brevity in correspondence. May I ask, is the prize-money for relief of Lucknow to be apportioned distinctly from that of the capture?—both being very different services, one with a handful of men, the other with an overwhelming force. Oblige with this information.—I am, &c., RELIEF.

[There was no prize taken by the relieving force under Havelock and Outram. Sir Colin Campbell escorted the treasures which had been saved in the Residency, and it was his second force which captured the city in 1859.—ED.]

CHINA PRIZE-MONEY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—An officer who was at the capture of Canton, and is a subscriber to the ARMY AND NAVY GAZETTE, presents his compliments to the Editor, and would feel much obliged to him if he he would inform him if the Commissioners of the Indian Prize Money have given their decision how the Canton booty is to be distributed; and when it is probable the booty, taken now nearly three years since, will be distributed, and what is the cause of the delay?—and why the £33,000, voted by Parliament for services in China three months since, has not been paid? S.

[The Canton Booty—naval share—hangs fire at the Treasury: a question of apportionment, we believe. The lists to pay the 33,000*l.* are nearly completed at Somerset House. In a month probably the notices will be issued.—ED.]

EXAMINATION FOR COMMISSIONS.—The Council of Military Education, composed of Major-General Rumley, vice-president, Major-General Portlock, Colonel Elwyn, and Lieut.-Colonel Addison, commenced the examination of candidates for direct commissions on Monday morning, at the Royal Hospital, Chelsea. There were above 140 candidates on the occasion. The examination will extend over the week, terminating to-day.

CHANNEL ISLANDS.—An order has been issued from the War Office, with reference to the regiments' allowance granted to the Channel Islands, to the batteries of Artillery there stationed, directing that this is only to be drawn at the rate of 25*l.* a-year per battery. As the allowance to all the other batteries of the kingdom is at the rate of 37*l.* 10*s.* a-year, being estimated for the consumption of five officers per battery, we are at a loss to understand why a difference should have been made as above stated. The allowance will commence from the 8th of September of the current year.

We hear that it is contemplated to arm the Rifle Brigade with a weapon resembling the Marine Artillery rifle, having five instead of three grooves, as the ordinary Enfield has. We can only hope that it is a first-class arm, as the country must claim that the best arms should be placed in the hands of this veteran corps, which, we hope, will one day consist of the best shots in each regiment in the Service, with privileges, arms, and pay proportionate to the men.

THE MONSTER GUN.—No further steps have been taken with regard to the removal of the monster gun on the Clarence Esplanade, near Southsea Castle, where the brace of 40-feet shears, like a pair of gigantic nutcrackers, hang over their cumbrous customer. The fact is, we suppose, the nut has proved rather too difficult, or else not worth cracking; we incline to the latter opinion, because it was expected that the brute would be removed by sea to Lump's Fort, but that the voyage was postponed on account of bad weather, which would render such a transport dangerous, if not impossible. But the Royal Engineers, to the great delight of the whole country, having succeeded in patching up the Zodiac, and given us the blessings of fine weather for the last week, it would appear that the report of its removal was premature. We therefore trust and suspect that the monster will remain where he is, a monument of the great work which the brawny arms of Englishmen can create; though, we regret, common sense and experience of the true requirements of the Service, are not present to guide their skill.

ALDERSHOT.—The Rev. M. Crooke having been ordered to Sheffield, is struck off the strength of the Division from this date.

A CONSIDERATE ORDER.—The Major-General commanding at Portsmouth has issued an order that in wet weather the Garrison Guards shall be paraded with leggings. Great-coats are to be worn by the picquets at the discretion of the Sergeants-major of the regiments.

A SENSIBLE REGULATION.—A divisional order has been issued at Aldershot, notifying that men quartered in huts can have an extra blanket on application to the barrack-master.

The Balaclava, war department steam-transport, for the conveyance of stores, arrived off the jetty of the gun department, Portsmouth, on the 1st inst., and landed there 2500 rounds of ammunition for Armstrong's 40-pounder guns, besides other war materiel; 20 carriages for these 40-pounder guns are ready for instant service, but the guns themselves have not arrived, owing to a defect in the breech having been discovered in the proof department at Woolwich, and which will take some time to remedy. Several 100-pounder Armstrongs, and their ammunition, are expected to be sent down to the South-Western district, and the manufacture of these tremendous weapons of war is being vigorously pushed on. The Excellent and Stork, gun-boat, have each a 40-pounder for practice; and 12-pounders have been issued to the Royal Marine Artillery at Fort Cumberland for the same purpose. There are upwards of 100 ships' armaments in the gun department, all ready for embarkation, and duly numbered and lettered with the name of Her Majesty's vessel to which they belong.

In military circles at Paris people are talking of a violent scene between General de Goyon and Lamoricière. A scene did take place, but there is a mistake as to the persons concerned. It was M. de Merode, not his brother-in-law, Lamoricière, who reproached Goyon with the treachery which had given up the Papal army to the tender mercies of the Sardinians.

THE WHITWORTH RIFLE.

The *Moniteur de l'Armée* has the following remarks on the performances of the Whitworth rifle at Vincennes :—

"During the late national rifle match, where the committee had to class no less than 80,000 shots, the Whitworth rifle was tried, in presence of Mr. Whitworth himself, and by one of his men, against a rifle in the French Chasseurs. It had a very decided advantage at all distances, but it must be mentioned that our rifle with a bore of 18 millimetres competed with one a bore half less. The Whitworth system seems, however, to be superior to ours, at least in theory, but it is as yet an experimental weapon, not a weapon for the soldier. Mr. Whitworth brought with him the rifle which was used in the trials ; it was made expressly for the English rifle match at Wimbledon. If we are not mistaken, General Guiod, president of the commission, struck with the results obtained, asked the inventor if he felt certain of obtaining the same results with two of his rifles belonging to the French government. He replied in the affirmative, but found himself greatly mistaken, for our Whitworth rifle, though fired by Mr. Whitworth's own man, an excellent shot, whom he had brought with him did not equal the French Chasseur's rifle. The inventor then examined the weapon, and finding several screws not tight enough, asked permission to put them right, which was at once granted. He then went to the workshop of the fort, took the rifle to pieces, put it together again in his own way, and came back with it in the afternoon. The results obtained were much better, being superior to those with the Chasseur's arm, but inferior to those given by the rifle which he had brought with him. Thus it appears that one of his rifles will carry better than another, and that the least negligence in putting the weapon together affects the accuracy of the aim. This is a great defect in a weapon of war, liable to be placed in the hands of so many men who may not be over-intelligent, or awkward, and at times tired and hurried. The cartridges are not admissible for the Army ; they absolutely require a small disc of grease which would melt in the soldiers' knapsack or cartridge-box and the rifle would then be useless. Nevertheless, the Whitworth rifle is a very remarkable weapon, and deserves serious attention ; for if means should be found to render it rather less delicate, less precise, and more capable to endure rough usage, it will give a fearful advantage to troops armed with it. It is easy to see that this invention will receive further improvements."

Major-General W. F. Forster, the military secretary at the Horse Guards, has issued the following Memorandum in reference to officers of militia who are candidates for commissions in the Army :—"Memorandum. It having been decided that officers of militia regiments, who are candidates for commissions in the Army, should not be required to undergo the same examination as that laid down in the Memorandum, dated Horse Guards, Oct. 1, 1859, the following regulations will be adopted henceforth in the cases of militia officers who have served continuously as such for 18 months. The examining board will consist (if possible) of three field officers. This board is to report* to the military secretary, for the information of the General Commanding-in-Chief, that the candidates possess the required qualifications as follows :—*Subjects of Examinations.* 1. English Spelling and Composition.—The candidates' proficiency in these respects will be estimated from their written answers to the examination questions. 2. Regimental Accounts and Regimental Savings Bank Accounts.—Candidates will be expected to be well acquainted with this subject, which is essential to qualification. 3. The candidates must have a thorough knowledge, and must give an account, of the duties they have to perform as regimental orderly officers, as officers commanding guards, or as subaltern officers of guards under officers of superior rank. 4. They must have a thorough knowledge of, and be able to put a company through, the manual and platoon exercise, and be capable of exercising both a squad and company in the drill and evolutions as prescribed in the first two parts of the regulations for the field exercise of the infantry. 5. They must know exactly the place of all the company officers in every situation of the battalion, and be able to command a company in battalion exercise. 6. They must be acquainted with such parts of the Queen's Regulations and Orders for the Army as relates to the duties and conduct of a subaltern officer, and with the Mutiny Act and Articles of War, so far as is necessary for the performance of their duties as members of a court-martial. 7. They must be acquainted with the Queen's Regulations in regard to pay and messing of the troops and the supply of necessaries. 8. They must know the weight of the knapsack, the weight of the soldier's firelock, with and without the bayonet ; of his pouch, with and without ammunition, the quantity of ammunition it is calculated to carry, and the weight of his accoutrements. The Board of Examiners will ascertain by practical examination, and not by the acceptance merely of verbal or written answers to questions, whether the officer is instructed in the subjects specified in the above paragraphs 4 and 5. The general or other officer commanding the districts or stations will forward the report of the Board (with the written questions and replies) to the military secretary, accompanied by his own observations thereon."

The following Order has been issued by Major-General Hutchinson, commanding the Western district :—"The fact of officers in uniform omitting to wear the honourable decorations they have acquired by service in the field, and in some instances by proof of conspicuous personal gallantry, might materially tend to lessen the value which they should attach to such distinctions, the Major-General hopes that this consideration, without his taking any further notice of the matter, will prevent the recurrence of an omission which might be misconstrued into slighting decorations bestowed by Her Majesty."

A board of officers, under the presidency of Colonel Jenner, of the 2nd battalion of the 11th Regiment, composed of the officers who have served in New Zealand, is now sitting in the War Office, for the purpose of considering and determining the amount and nature of the stores, provisions, and clothing, &c., which shall be immediately sent to that colony for the use of Her Majesty's troops in conducting the present native war.

* N.B. The written questions and replies are to be sent with the report of the Board.

Obituary.

We regret to announce the death of the Earl of Dundonald, Rear Admiral of the United Kingdom, who died on Wednesday morning, at Queen's-road, Kensington, after a few hours' illness. The venerable nobleman retained all his faculties to the last. It will be in the recollection of many of our readers that his lordship, though in advanced years, underwent a painful operation for the stone, from which, by the skilful treatment of his medical attendant, and a naturally vigorous constitution, he had completely recovered. On Tuesday afternoon at half-past five o'clock he was suddenly attacked with alarming illness, and at one a.m. on Wednesday he expired. Owing to the suddenness of the attack several members of his family were unable to have the consolation of being present at his dissolution. The venerable and gallant deceased, Thomas Cochrane, Earl of Dundonald, Baron Cochrane, and Lord Cochrane of Paisley and Ochiltree in the peerage of Scotland, and a baronet of Nova Scotia, was the eldest of the six sons of Archibald, ninth earl, by his first marriage with Anne, second daughter of Captain James Gilchrist, R.N. He was born Dec. 14th, 1775, so that he was within a few weeks of his 85th year. At a very early age he was entered on the books of the Vesuvius, commanded by his uncle, Captain the Hon. Alexander Inglis Cochrane. He did not, however, go to sea until June, 1793, when he embarked as a boy with Captain Cochrane, in the Hind, 28. The following notice of his distinguished services is taken, slightly abridged, from O'Byrne's "Naval Biography" :—"Removing with his relative, in the course of the same year, to the Thetis, of 42 guns, and 261 men, Lord Cochrane sailed for the coast of North America, where, as acting lieutenant of that frigate, we find him on May 17, 1795, contributing to the defeat, in company with the Hussar, 28, of a French squadron of five sail, two of which, La Prevoyante, of 24, and La Raison, of 18 guns, were captured, after a close conflict of more than an hour's duration, and a loss to the Thetis of eight men killed and nine wounded. His lordship, whose confirmation to the Thetis took place May 24, 1796, subsequently joined the Africa, 64, Captain Roddam Home ; Resolution, 74, bearing the flag of Admiral Vandeput ; Thetis again, Captain Cochrane ; and Foudroyant, Barfleur, and Queen Charlotte, flag ships in the Mediterranean of Lord Keith. On Dec. 21, 1799, having taken command, with Lieut. William Bainbridge, of the boats of the Queen Charlotte and Emerald frigate, he was dispatched from Gibraltar Bay for the purpose of affording assistance to the Lady Nelson cutter, then surrounded off Cabritta Point by several of the enemy's privateers and gun boats, some of the latter of which he pursued and boarded with the utmost gallantry. On the capture, Feb. 18, 1800, of the French 74 gun ship La Généreux, Lord Cochrane was appointed her acting captain, and he appears to have conveyed her from Malta to Minorca under circumstances of great difficulty. Being promoted to the command, March 28 following, of the Speedy sloop, of 14 guns and 54 men, he commenced a series of operations against the enemy, unparrelleled for activity and success, becoming the personal captor, within the short space of 14 months, of 33 vessels, carrying altogether 128 guns and 533 men, besides assisting at the capture of many others. To particularise every dashing exploit performed by Lord Cochrane during his continuance in the Speedy would lend us far beyond our limits ; but there is one feat, from its transcendent heroism, that we cannot pass over in silence. On May 6, 1801, being off Barcelona, the Speedy fell in with the Spanish frigate El Gamo, of 32 heavy guns and 319 men, one of several vessels that had been sent to effect his capture. Undaunted by a force so comparatively enormous, her gallant commander instantly commenced a close action, and after a cannonade of 45 minutes, ran alongside his lofty antagonist, whom, at the head of only 40 men, he impetuously boarded and carried. The British vessel, whose force, as we have seen, consisted originally of not more than 54 men, sustained a loss on the occasion of 3 killed and 8 wounded ; and the Gamo (which although immediately afterwards attacked by a division of gun boats was ultimately conducted in safety to Minorca) of 15 killed and 41 wounded. On the 3rd July following, however, the Speedy was herself captured by a French squadron under M. Linois ; but not until she had exhausted every means of defence and had behaved in a manner so conspicuous, that on Lord Cochrane's presenting his sword to the captain of the 74-gun ship Dessaix, it was returned to him with the complimentary request that he would continue to wear what he had so nobly used. On the 6th of the same month it was his fortune to be present on board the French squadron when attacked by Sir James Saumarez, in the Bay of Algeciras ; but being soon afterwards exchanged, he returned to England, and on his arrival was presented as a reward for his wonderful gallantry in the affair of the Gamo with a post commission, dated August 8, 1801. From that period Lord Cochrane remained on half-pay until appointed, Oct. 5, 1803, to the Arab, 22, from which ship, after intermediately serving with great risk at the blockade of Boulogne, he removed, December 5, 1804, to the Pallas, 32. In the following March, being sent to cruise off the coast of Spain, he succeeded in capturing a galleon, Il Fortuna, laden with specie to the amount of 150,000*l.*, and with merchandise of nearly equal value ; but he generously returned 10,000 crowns of the spoil to the unfortunate sufferers, and restored them to liberty. On April 6, 1806, while her boats, with all but 40 of her crew were absent on an expedition up the Garonne, the Pallas gave chase to, and drove on shore, two corvettes and a large armed frigate-built store ship, mounting in the whole 64 guns. In May, 1806, Lord Cochrane distinguished himself by the destruction of the semaphores along the French coast, where he landed with the marines and boats' crews, and, notwithstanding the defence of the militia, demolished the posts at Pointe de la Roche, Caliola, and L'Ance de Repos, burnt down the buildings, and bore off the signal flags. He also carried by storm the battery at Pointe d'Equilon, destroyed its stores, and blew up the barracks and magazine. Four days after the latter event the Pallas, under a heavy fire from the batteries on Ile d'Aix, singly attacked the French 40-gun frigate La Minerve, in company with three 18 gun brigs, but, while preparing to board, she unfortunately ran foul of the former, and by the tremendous shock was reduced to a complete wreck. Assuming command, August 23, 1806, of the Impérieuse, of 44 guns, Lord Cochrane, in the short period of one month, took and destroyed 15 vessels, chiefly laden with wine and provisions. He was afterwards sent to co-operate with the patriots on the coast of Catalonia, and he there, on July 31, 1808, compelled the Castle of Mongat to surrender, by which the road to Gerona, then besieged by the French, had been completely commanded. In September, 1808, his lordship renewed his operations against the semaphores on the coast of France, where he completely destroyed those which had since been erected at Bourdique, La Pinde, St. Maguire, Frontignan, Canet, and Foy, with the houses attached to them, fourteen barracks belonging to the gens-d'armes, a battery, and a strong tower on Lake Frontignan. Indeed he kept the whole of the enemy's coast in a constant state of alarm, suspended their trade, and by the diversion he thus created prevented those troops which had been intended for Figueras from advancing into the Peninsula. Returning to the coast of Spain Lord Cochrane volunteered the defence of Trinidad Castle, attached to the fortress of Rosas, then besieged by the French, a thousand of whose picked men, at the head of 80 of his own people, and about an equal number of Spaniards, he repelled, Nov. 30, 1808, in an assault made by them on the castle. He protracted the siege for 12 days, and then finding further opposition useless in consequence of the citadel having capitulated, he blew up the magazines of Trinidad Castle and returned to his ship. The captain of the Impérieuse subsequently rendered the commander-in-chief the important service of presenting him with the key of the enemy's telegraph signals on the heights of Toulon, which enabled him to derive information twice a-day, not only of the movements of the enemy but of his own cruisers, from the south promontory of Italy to Cape Rosas, in Spain. In April, 1809, Lord Cochrane was selected by the First Lord of the Admiralty, in preference to many senior officers, to command a fleet of fire and explosion ships intended for the destruction of the French shipping as they lay at anchor in the road of Ile of Aix. The glowing success which attended his lordship's personal efforts will ever remain prominent in the page of history. On the night of the 11th he went on board one of the explosion vessels, containg 1500 barrels of gunpowder, which, being conducted close to windward of the boom that had been placed for the protection of the French ships, shattered that means of defence. Favoured by the wind and current, the fire vessels having a passage thus opened for them, rushed onward in blazing piles, carrying with them so much consternation that by the next morning it was found that seven line-of-battle ships had cut their cables and run on shore. Of these La Ville de Varsovie, 80, and Tonnant and Aquillon, 74's were afterwards destroyed, as were also also the Indienne, of 44, and Calcutta, of 56 guns, the latter after having been captured by Lord Cochrane, who, unsupported, approached in the Impérieuse, and commenced an action which lasted until she struck her colours. On the 26th of the same month, his Majesty, to testify the sense entertained by himself and by the country at large of the hero's conduct, conferred on him the dignity of a Knight of the Bath, the only instance but one (and that in the case of Sir John Jervis) in which so high an honour had been bestowed on an officer holding the rank of captain. Lord Cochrane continued in the Impérieuse until August 4, 1809 ; but, in consequence of feelings of hostility engendered against him by the opposition he had offered in parliament to a vote of thanks propose to Lord Gambier as commander-in-chief of the British fleet stationed in Basque Roads during the operations we have just recorded, and but for whose ineffectual support, it was asserted, the whole of the French shipping might have been destroyed, he was suffered to continue unemployed until Feb. 9, 1814. He then at length obtained command of the Tonnant, 80, as flag-captain of his uncle, Sir Alex. Cochrane, at that time commander-in-chief in North America, but he resigned the appointment on the 5th April following. On the general election in May, 1807, Lord Cochrane became a candidate for the representation of the city of Westminster, in conjunction with Mr. Sheridan, Mr. Elliot, and Mr. Paull ; but at the eleventh hour, however, the late Sir Francis Burdett, who was confined by a dangerous wound which he had received in the duel with Mr. Paull, was put in nomination, even without his knowledge, and soon headed the poll. After severe contest of 15 days Sir Francis and Lord Cochrane were elected. At the ensuing general election in 1812 Sir F. Burdett and Lord Cochrane were again returned, on that occasion without solicitation or expense, so popular were the Radical baronet and his gallant naval colleague with the electors. In the early part of 1814 Lord Cochrane fell into the snare of some designing knaves, and was charged with fraudulent designs on the Stock Exchange. The fraud in which he was said to have been implicated was committed by a rascal named Random de Beranger, who contrived that, on Feb. 22, an express should be sent from Dover with the information that a French officer had arrived announcing the death of the Emperor Napoleon by assassination. The funds rose nearly 10 per cent, in consequence of the false news. The fraudulent speculators anticipated to realise a considerable amount by their nefarious conduct ; but they were disappointed in their evil gain, as all bargains on that account were nullified. Lord Cochrane and others were tried and convicted. His lordship was sentenced to pay a fine of 500*l.*, to be imprisoned for twelve months, and at the end of that time to stand in the pillory ; but this last disgraceful part of his punishment was remitted on account of his great popularity. He was expelled the House of Commons on his conviction, in which assembly he took, however, the oaths and his seat on his temporary escape from the King's Bench prison in July, 1815. The public, at least, did not believe him capable of the base act laid to his charge, for they re-elected him eleven days after his expulsion, and as a further proof of their belief in his innocence defrayed the fine imposed by the judges by "a penny subscription." That his lordship was the dupe of designing persons there is not the remotest doubt, but the popular belief at that time was that he was the victim of political or interested knavery. Perhaps the greatest indignity he had to suffer for his indiscretion was his degradation as a Knight of the Bath, for in August, after his conviction, his lordship's arms and banner were removed by the heralds with contumely, and kicked out of Henry VII.'s chapel in Westminster Abbey. His name was likewise removed from the *Navy List*. Lord Cochrane declined to come forward previously to the general election in 1818, having accepted the command of the naval force of the then new republic of

Digitized by Google

Chili. Having become 'a sailor of fortune,' it was to be expected that by 'deeds of daring' he would maintain that reputation he had gained in the service of his country, and which none of the most bitter of his personal enemies could, in their malice, deprive him of. He took the command of the navy of the new state of Chili, and by his exertions and achievements finally secured the independence of that republic. He was mainly instrumental in the capture of the city of Valdivia, and the frigate Esmeralda, and in clearing the Pacific of all hostile vessels of war. His services were next sought by Don Pedro to assume the control of the Brazilian navy, and he so ably discharged those duties that in 1823 Don Pedro created him Marquis of Maranham, for he drove, amongst other acts, the Portuguese from the northern provinces of Brazil. After the peace between Brazil and Portugal, he returned home, to subsequently proceed to Greece, in which service he accepted employ during 1827 and '28. On the occasion of the accession of William IV. to the throne, that kind-hearted sovereign took into his generous consideration the case of Lord Cochrane. The result was the re-instatement of Lord Cochrane in his former position in the British Navy, an act of grace on the part of the sovereign so promptly done, that it did honour both to the monarch and to the subject. In January, 1848, he was selected for the command in chief of the North American and West India station, which he held up to November, 1853, when his lordship was succeeded by Rear-Admiral William Fanshawe."—The Earl of Dundonald had devoted much of his leisure in writing several pamphlets connected with the profession of which he was such a conspicuous ornament, and had acquired no mean reputation for his mechanical improvements; a newly-constructed boiler by him is now on trial by the authorities at Woolwich. To those desirous of a more detailed record of his career we refer them to "The Autobiography of a Seaman," the first volume of which, from the pen of the noble admiral, has been published, and the second and concluding volume has been announced as "nearly ready." In 1856 the lamented admiral was elected an elder brother of the Trinity House; was restored in 1847 among the knights of the Order of the Bath, being reappointed 22nd May that year a Grand Cross of that most honourable institution of knighthood. For his eminent services abroad he was decorated a Grand Cross of the Order of the Cruzero of Brazil, a Knight of the Saviour of Greece, and of Merit of Chili. The late admiral's commissions bore date as follows:—Lieutenant, May 21, 1796; commander March 28, 1800; captain, August 8, 1801; rear-admiral, May 2, 1832; vice-admiral, November 23, 1841; and admirtl, March 21, 1851, and was rear-admiral of the United Kingdom. The late Earl of Dundonald succeeded to the ancient honours of his house on the death of his father, who died in his 84th year, in 1831. The late earl married 8th August, 1812, Katherine Frances Corbett, daughter of the late Mr. Thomas Barnes, and leaves surviving issue by her ladyship, who survives her husband, four sons and a daughter—namely, Thomas Barnes, Lord Cochrane (now the Earl of Dudonald), born 18th April, 1814, and married, 1st December, 1847, to Louisa Harriet, daughter of Mr. Wm. Alexander Mackinnon, M.P., formerly in the 2nd Foot; Hon. Horace Bernard William, born in 1818, and married to Frances Jacobina, only daughter of the late Alexander Nicholson; Captain the Hon. Arthur Auckland, R.N., C.B., born in 1824; Commander the Hon. Ernest Grey, R.N., born 4th June, 1834; and Lady Katherine Elizabeth, born Dec., 1821, and married to Mr. John Willis Fleming, of Stoneham Park, Hants.

The death of Captain Alexander Maconochie, Royal Navy, on the retired list, has been announced. This officer entered the Navy in August, 1803, and, according to O'Byrne, first served as first-class volunteer on board the Northumberland 74, Captain (afterwards Rear-Admiral) Hon. Alexander Cochrane, under whom he was for some time employed off Ferrol, and then proceeded to the West Indies in pursuit of a French squadron escaped from Rochefort. In September, 1805, he removed as Midshipman (a rating he had attained in March, 1804) to the Seine, 36, Captain David Atkins, also on the West India station, where, in September, 1806, he again joined Sir A. Cochrane in the Belleisle, 74. During the next two years we find him chiefly serving on board the Dispatch, tender to the ship last mentioned. He then became attached to the Ardent, 64, bearing the flag of Vice-Admiral James Vashon in the Leith Roads; but being a third time, in March, 1809, placed under the orders of Sir A. Cochrane, in the Pompée, 74, was by that Admiral nominated Lieutenant, 15th September following, of the Ethalion frigate, Captain Thomas John Cochrane, stationed at first among the Leeward Islands, and then off Cadiz—an act which the Admiralty confirmed. In November, 1810, Mr. Maconochie obtained an appointment to the Grasshopper, 18, Captain Henry Fanshawe, in which vessel he continued until, in order to avoid being lost, as was her consort the Hero, 74, she surrendered to the Dutch fleet in the Texel, 24th December, 1811. The peace of 1814 restoring him to liberty, he once more, in the course of the same year, joined, on board the Tonnant, 80, his friend and patron Sir A. Cochrane, who, in January, 1815, invested him with the command of the Calliope, 10. He was officially promoted to the rank of Captain, 8th September in the same year, and has since been on half-pay. Captain Maconochie was nominated a K.H. on the 4th of May, 1836, and was well known as an advocate of improved prison discipline. He was also an author of some repute.

The death of Captain Nathaniel Rowe, on the retired list of the Royal Navy, has taken place. This officer saw much service during the French revolutionary war. He was present in the Ajax in Sir Robert Calder's action, and shared in the glories of Trafalgar. He was also a volunteer on board the Windsor Castle, in forcing the passage of the Dardanelles. We are unable to give this week a detailed account of the services of the gallant deceased, but hope to do so in our next number.

The Cawnpore and Lucknow Martyrs' Memorial of the 32nd (or Cornwall) Regiment of Light Infantry, about to be placed in Exeter Cathedral, is, together with models of former works, for a few days on view at the sculptor's (Mr. Richardson), Melbury Terrace House, Harewood Square, N.W., near Dorset Square, to officers and friends interested, by presentation of private card.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

CROMARTIE—October 27, at Gosport, the wife of Captain F. Cromartie, R.A., of a daughter.

KNAGGS—September 2, at Fort Peddie, South Africa, the wife of Henry Knaggs, Esq., M.B., Assistant-Surgeon Cape Mounted Riflemen, of a daughter.

NICHOLLS—October 26, at Cleve Court, Isle of Thanet, Kent, the wife of Captain R. M. Nicholls, late 65th Regiment, of a daughter.

NORMAN—October 27, at 2, Berkley Pince, the wife of Lieutenant-Colonel H. W. Norman, C.B., Her Majesty's Bengal Army, of a daughter.

PIGOU—October 27, at Guildford, the wife of Captain A. Comyn Pigou, Royal Artillery, of a son.

STOKES—October 14, at Galatz, the wife of Major Stokes, R.E., H.M.'s Commissioner on the Danube, of a son.

MARRIAGES.

BICKFORD—TOMLIN—October 27, at St. George's Chapel, Stonehouse, by the Rev. W. H. Nantes, Commander James E. Bickford, R.N., youngest son of the late Joseph Bickford, Esq., of Newport House, to Sophie Y., second daughter of the late Lieutenant George Tomlin, R.N.

CHEESMAN—HUNTER—October 30, at the church of St. Alphege, Greenwich, by the Rev. Lloyd Jones, Alfred, youngest son of the late Charles Cheesman, Esq., of Hampsteds, Sussex, to Elizabeth Amelia, youngest daughter of William Christopher Hunter, Esq., of Greenwich, and grand-daughter of the late Captain Patterson, R.N.

MATTHEW—YOUNG—October 27, at Flitcham, Norfolk, by the Rev. Wm. Leech, rector, Thomas Patrick Matthew, Esq., Army Staff Surgeon-Major, to Emilie Frances, fifth daughter of Dr. Young, late of Clapham Common, Surrey.

WALLACE—MILLIKIN—October 17, at Halifax, Nova Scotia, by the Ven. Archdeacon Willis, John K. Wallace, Esq., to Eliza Fryar, daughter of the late William Millikin, Assistant-Commissary-General.

DEATHS.

ATCHISON—October 27, at 63, Marine Parade, Brighton, Lydia, the beloved wife of Colonel Atchison, Royal Lancashire Artillery, and last surviving daughter of the late Rev. John Simons, rector of St. Paul's Cray, Kent, aged 65.

BASSANO—October 22, at Belmont, Douglas, Isle of Man, Mary, wife of Lieut.-Colonel Alfred Bassano, 32nd Light Infantry, aged 23.

CORNWALL—October 28, at Elstead, near Godalming, Surrey, John, eldest son of Captain Cornwall, R.N., aged 34.

DUNBAR—October 30, at New Brompton, Chatham, Kent, of bronchitis, Grace Wilhelmina Katharina Mary, infant daughter of Brevet-Major Dunbar, 75th Regiment, aged 3 months.

EMANUEL—October 30, at his residence, 3, The Hard, Portsea, Mr. Ezekiel Emanuel, senior partner of the firm of E. & E. Emanuel, of Portsea and Portsmouth, aged 59.

FOSTER—October 30, at the house of his father, of fever, Francis John Foster, Lieutenant 7th Royal Fusiliers, oldest son of John N. Foster, Esq., St. Andrew's, Biggleswade, aged 23.

HEWETSON—October 28, suddenly, at Cambridge Terrace, Hyde Park, William Hewetson, Esq., Commissary-General to H.M.'s Army, aged 71.

IRWIN—October 28, at Charlynch Rectory, Somerset, Emily, the beloved wife of the Rev. T. Nesbitt Irwin, and third daughter of the late Major-General James Alexander.

MACONOCHIE—October 25, at Morden, Surrey, Captain Maconochie, R.N., K.H., aged 73.

MANVERS—October 27, at Thoresby Park, Notts, the Earl Manvers, aged 82.

MARCHANT—October 25, at Laurel Cottage, Hampton Wick, Georgina Annie, the only child of the late Staff-Surgeon W. D. Marchant, aged 6 years and 5 months.

ROWE—October 24, at his residence, No. 3, Barrington Cottages, East Brixton, Captain Henry Nathaniel Rowe, R.N., aged 78.

SCOTT—October 11, at Malta, Martha, the beloved wife of James Edward Scott, Esq., M.D., Surgeon, Rifle Brigade.

SCOTT—October 11, at Malta, James Edward Montgomery, the infant son of James Edward Scott, Esq., M.D., Surgeon, Rifle Brigade.

STODDART—October 26, at 10, Bellevue Crescent, Edinburgh, Frances Sprot, relict of the late Admiral Stoddart.

TICKELL—October 24, at Brighton, of diphtheria, Major R. S. Tickell, Bengal Army, of 22, Leinster Gardens, aged 51.

WOLRIGE—October 29, at Chatham, Barclay Wolrige, youngest son of Major Wolrige, Royal Marines, aged 12.

ROYAL ARTILLERY.—We have reason to believe that a tardy act of justice will soon be rendered to officers of the Royal Artillery in command of the great subdivisions and districts of the kingdom, where not only the brigades of the Royal Artillery, and the regiments of militia artillery, comprising generally several thousand men, are under their orders, but the whole of the materiel included in fortifications, armaments, guns, magazines, &c., and all kinds of warlike stores, are placed to their especial charge. The correspondence alone entailed is enormous; and hitherto it has all been performed by these officers without renumeration; or even without the rank corresponding to that attained by infantry or cavalry officers when in command of brigades, or of other large bodies of men. If we are rightly informed, the colonels of Artillery in command of districts, such as Plymouth, Portsmouth, Aldershot, Dover, &c., will soon be gazetted as Colonels on the staff of the army; which, although a step in advance, yet does not tally with the dignity and responsibility of the command with which they are entrusted. It is also probable that this step will eventuate another, in detaching the command of the districts altogether from that of the brigades, and making the former a permanent appointment for a period of five years; and not therefore necessitating the removal of the service officer, when the brigade which he nominally commands is ordered to another station—a plan fraught with obvious advantage to the public service; for the experience and knowledge of the resources and armaments of one of the important commands connected with the defences of our naval arsenals is not easily acquired, and should not be lightly abandoned. We further hear it rumoured that the officers in question are to be placed on the half-pay, of their regimental rank, and to draw the pay of the colonel of the staff. This arrangement will, it is hoped, if carried out, be accompanied by the rank of brigadier-general.—A party of the 3rd brigade of the Royal Artillery were a few days back at target practice at the Clarence battery, Guernsey, when from some at present unexplained cause, the gun, which was a new one, burst. Our informant states that not more than from 40 to 50 rounds had been fired from the gun since it was first bored. The muzzle was blown over the battery and fell on the works below; the after part of the breech was sent over the parapet in rear of the gun, and the under part of the breech was driven through the gun carriage, at the same time the carriage itself was thrown off the platform on to the lower part of the battery. The unfortunate gunner who pulled the lanyard was dangerously wounded, and the officer and other men had a very narrow escape.

We are informed that the conduct of the commanding officer of the Royal Artillery at Malta, in reference to the mess affair alluded to by us in our last week's impression, has met with the decided disapprobation of His Royal Highness Commanding-in-Chief, and, consequently, the bearing of the commanding officer of the Royal Engineers throughout the unpleasant business has been approved of.

CONTRACTS FOR SUGAR, TEA, SPLIT-PEAS, WHITE WHEAT, AND VINEGAR.

Department of the Comptroller for Victualling and Transport Services,

Somerset House, 24th October, 1860.

THE COMMISSIONERS for executing the Office of Lord High Admiral of the United Kingdom of Great Britain and Ireland, do hereby GIVE NOTICE, that on TUESDAY, the 6th NOVEMBER next, at half-past one o'clock, they will be ready to treat with such persons as may be willing to contract for supplying and delivering into Her Majesty's Victualling Stores at DEPTFORD, the undermentioned articles, viz.:—

		When to be delivered.
SUGAR	400 Tons.	Half of each in three weeks, and the remainder in three weeks afterwards, or earlier if preferred by the party tendering.
TEA ...	100,000 lbs.	
SPLIT PEAS ...	800 Qrtrs.	
WHITE WHEAT	2,000 ,,	
VINEGAR ...	20,000 Galls.	Half in one month, and the remainder in one month afterwards, or earlier if preferred by the party tendering.

Tenders may be made for the whole or any portion of the articles.

Their Lordships reserve to themselves the power, when the tenders are opened, of contracting either for the whole, or for such part thereof only as they may deem fit, or for a greater quantity, or of not contracting for any, and also an unlimited power of selection.

The Sugar and Tea to be exempted from the Customs' Duties, and parties tendering are to state where they are respectively lying.

Samples of the Split-Peas and White Wheat (not less than two quarts of each), and of the Tea (not less than two pounds from the bonded warehouse), must be produced by the parties tendering.

Samples of the Vinegar (not less than a quart) which the parties tendering may purpose to supply must accompany their tenders, as the delivery will be required to be made in accordance with the samples which may be accepted, and the Vinegar tendered to be No. 20, Trade denomination.

The Vinegar to be delivered in good, sound, strong, and substantial casks, which are to be retained as long as required by the said Commissioners or their Officers without payment thereof, but are to be taken back from the said Victualling Stores (when emptied), by and at the expense of the contractor.

Each tender for Sugar must specify the mark and landing number of each cask or package, the ship in which imported, and the country or place of its growth or produce, and an average sample (not less than two pounds for each import mark) must be produced by the parties tendering, and not an average of different marks or several imports, and any parcel that is found not to be of the same mark or average quality as the samples tendered and accepted, will be rejected by the Officers.

The samples produced by persons whose tenders are not accepted, are requested to be taken away by them immediately after the contracts have been decided.

No tender will be received unless made on the Printed Form provided for the purpose, and which may be obtained on application at the said Office, or to the Officer conducting the Packet Service at Liverpool, or to the Collector of Customs at Bristol.

Particular attention is called to the Conditions of the Contracts, which may be seen at the said Office, and at Liverpool and Bristol.

No tender will be received after half-past one o'clock on the day of treaty; and it will not be required that the party tendering, or an agent on his behalf, should attend at the Office on the day of contract, as the result of the offer received from each person will be communicated to him and his proposed sureties in writing.

Every tender must be addressed to the Secretary of the Admiralty, and bear in the left-hand corner the words, "Tender for ," and must also be delivered at Somerset House.

MAJOR-GENERAL HENRY FREDERICK LOCKYER, C.B., deceased.—Pursuant to an Act of Parliament, of the 22d & 23d years of the reign of her present Majesty Queen Victoria, cap. 35, intituled "An Act further to Amend the Law of Property and to Protect Trustees," all persons claiming to be CREDITORS of Major-General HENRY FREDERICK LOCKYER, formerly of Brompton, in the county of Kent, and late commanding Her Majesty's Forces in the Island of Ceylon (who died at sea on board the Peninsular and Oriental Steam Navigation Company's steamship Ripon, on the 30th day of August last, and to whose estate and effects letters of administration, with will annexed, were, on the 25th day of October inst., granted by the Principal Registry of Her Majesty's Court of Probate), are hereby required to send the particulars of their claims to the undersigned, Messrs. Hillyer & Fenwick, the solicitors of the administratrix, on or before the 31st day of December next, after which day the administratrix will distribute the assets of the deceased among the parties entitled thereto, having regard to the claims of which the administratrix shall then have had notice, and such administratrix will not be liable for the assets so distributed, or any part thereof, to any person or persons of whose claim she shall not then have had notice.—Dated this 28th day of October, 1860. HILLYER & FENWICK, 2 and 3, Philpot Lane, E.C., Solicitors to the Administratrix.

ROYAL ENGLISH OPERA, COVENT GARDEN,

Under the Management of Miss LOUISA PYNE and Mr. W. HARRISON, Sole Lessees.

Popular Operas every Evening, supported by the English Operatic *artistes* and the unrivalled Orchestra and powerful Chorus.

On MONDAY, November 5th, and THURSDAY, 8th, last times of LURLINE. Miss Louisa Pyne, Miss Leffler, and Miss Albertazzi; Messrs. W. Harrison, H. Wharton, H. Corri, and G. Kelly.

On TUESDAY, 6th, and FRIDAY, 9th, THE ROSE OF CASTILLE. Miss Louisa Pyne, Miss Thirlwall, and Miss Huddart; Messrs. W. Harrison, Durand, H. Corri, and A. St. Albyn.

On WEDNESDAY, 7th, CROWN DIAMONDS. Miss Louisa Pyne and Miss Thirlwall; Messrs. W. Harrison, G. Horncastle, H. Corri, Lyall, Wallworth, and A. St. Albyn.

On SATURDAY, 10th (first time here), Loder's Opera, THE NIGHT DANCERS. Madame Palmieri, Miss Leffler, Miss Thirlwall, Miss Huddart, Miss Morelle, and Miss Albertazzi; Messrs. Henry Haigh, H. Corri, Lyall, G. Kelly, and T. Distin.

OVERLAND ROUTE.

COMMUNICATION BY STEAM TO INDIA, AUSTRALIA, &c., VIA EGYPT.

THE PENINSULAR AND ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Mauritius, Reunion, King George's Sound, Melbourne and Sydney, by the steamers leaving Southampton on the 20th of every month.

For further particulars apply at the Company's Offices, 122, Leadenhall Street, London, E.C.; or Oriental Place, Southampton.

WITH DISPATCH.—For CALCUTTA, the splendid British built ship, HANOVER, A 1 13 years, 1045 tons register, H. R. RICH, Commander, lying in the London Docks. This ship has a full poop, with superior accommodation for passengers, and will carry a surgeon. For Freight or Passage, apply to the owner, GEORGE MARSHALL, Esq., 3, Cross Lane, E.C.; or to PHILLIPPS, SHAW, & LOWTHER, 2, Royal Exchange Buildings, E.C.

ARGUS LIFE ASSURANCE COMPANY, 39, THROGMORTON STREET, BANK, E.C.

Chairman—William Leaf, Esq.
Deputy-Chairman—John Humphery, Esq., Ald.

Richard E. Arden, Esq.	Saffery Wm. Johnson, Esq.
Edward Bates, Esq.	W. Ladler Leaf, Esq.
Professor Hall, M.A.	Jeremiah Pilcher, Esq.
Rupert Ingleby, Esq.	Lewis Pocock, Esq.

Physician—Dr. Jeaffreson, 2, Finsbury Square, E.C.
Surgeon—W. Coulson, Esq., 2, Frederick's Place, Old Jewry, E.C.
Actuary—George Clark, Esq.

ADVANTAGES OF ASSURING WITH THIS COMPANY.

The premiums are on the lowest scale consistent with security.

The Assured are protected by an ample subscribed capital—an assurance fund of 480,000*l.*, invested on mortgage, and in the Government Stocks—and an income of 85,000*l.* a year.

Premiums to Assure £100.				Whole Term.	
Age.	One Year.	Seven Years.	With Profits.	Without Profits.
20	£0 17 8	£0 19 9	£1 15 10	£1 11 10
30	1 1 3	1 2 7	2 5 5	2 0 7
40	1 5 0	1 6 9	3 0 7	2 14 10
50	1 14 1	1 19 10	4 6 8	4 0 11
60	3 2 4	3 17 0	6 12 9	6 0 10

MUTUAL BRANCH.

Assurers on the Bonus system are entitled, after five years, to participate in nine-tenths, or 90 per cent., of the profits.

The profit assigned to each policy can be added to the sum assured, applied in reduction of the annual premium, or be received in cash.

At the first division a return of 20 per cent. in cash on the premiums paid was declared; this will allow a reversionary increase, varying, according to age, from 66 to 28 per cent. on the premiums, or from 5 to 15 per cent. on the sum assured.

One-half of the "Whole Term" Premium may remain on credit for seven years, or one-third of the premium may remain for life as a debt upon the policy at 5 per cent., or may be paid off at any time without notice.

Claims paid in one month after proofs have been approved.

Loans upon approved security.

No charge for Policy Stamps.

Medical Attendants paid for their reports.

Persons may, in time of peace, proceed to or reside in any part of Europe or British North America without extra charge.

No extra charge for the Militia, Volunteer Rifles, or Artillery Corps on Home Service.

The Medical Officers attend every day, at a quarter before Two o'clock. E. BATES, Resident Director.

THE STANDARD LIFE ASSURANCE COMPANY.—FINAL NOTICE.

BONUS YEAR.—SIXTH DIVISION OF PROFITS.

All Policies effected before 15th November next will participate in the Division of Profits to be made as at that date, and secure a year's additional Bonus over later entrants at subsequent Divisions.

THE STANDARD WAS ESTABLISHED IN 1825.

The First Division of Profits took place in 1835; and subsequent Divisions have been made in 1840, 1845, 1850, and 1855.

The profits to be divided in 1860 will be those which have accumulated since 1855.

Accumulated Fund ...	... £1,084,598 2 10
Annual Revenue ...	... 289,231 13 5

The new Assurances effected during the last ten years alone amount to upwards of Five Millions sterling.

WILL. THOS. THOMSON, Manager.
H. JONES WILLIAMS, Resident Secretary.

The Company's Medical Officer attends at the London office daily at half-past One.

London	... 82, King William Street, E.C.
Edinburgh	... 3, George Street (Head Office).
Dublin	... 66, Upper Sackville Street.

OFFICERS PROCEEDING ABROAD can effect Assurances with THE COLONIAL LIFE ASSURANCE COMPANY on favourable terms.

LOANS GRANTED.

LONDON { 81, Lombard Street, E.C.; and at Messrs. PARIS & Co., 10, St. James' Street, S.W.

See Testimonials at the Manufactory, 483, Oxford Street, W., and at the Office of this Paper.

MILITARY BAND INSTRUMENTS.—JOHN KOHLER, Military Musical Instrument Manufacturer to Her Majesty's Army and Navy, and Her Majesty's Indian Army, the Royal Militia, and the Volunteer Forces of Great Britain, 35, Henrietta Street, Covent Garden, London, W.C. Price Lists, Drawings, and Estimates for Köhler's celebrated Band Instruments sent post free on application.

ANTOINE COURTOIS' NEW MODEL SILVER BUGLES, for Presentation to Rifle Corps.—A. CHAPPELL & HAMMOND (late Jullien & Co.) forward on application a List of Prices of the above Bugles, which have been adopted by the Victoria Rifles, and numerous other Corps.

A. CHAPPELL & HAMMOND (Sole Agents for Antoine Courtois), 214, Regent Street, London, W.

SPORTSMEN AND GENTLEMEN OF THE ARMY AND NAVY.—S. & B. SOLOMONS, Opticians, 39, Albemarle Street, Piccadilly, W., opposite the York Hotel. Portability combined with great power in FIELD, RACECOURSE, OPERA, and general out-door day and night powerful waistcoat-pocket PERSPECTIVE GLASSES, weighing only 4 ounces each, containing 12 and 18 lenses, constructed of German glass, will show distinctly persons to know them at two-and-a-half and three miles. They serve every purpose on the Racecourse and at the Opera House. Country scenery and ships are clearly seen at eight to ten miles. They are also invaluable for Shooting, Deerstalking, and Yachting. Her Majesty's Coast Guards are making use of them as day and night glasses. The terms for them are powerful and brilliant Telescopes for both eyes. The most powerful Telescopes, possessing such extraordinary power that some, three-and-a-half inches, with an extra astronomical eyepiece, will show distinctly Jupiter's moons, Saturn's ring, and the double stars; with the same telescope a person can be seen and known three-and-a-half miles distant, and an object from fourteen to sixteen miles. They are in endless variety, of larger and all sizes, with increasing powers, and are secured by Her Majesty's Royal Letters Patent.

FIELD GLASS.—The BEST is BURROW'S MALVERN LANDSCAPE GLASS, invaluable to Sportsmen, Military and Naval Officers, Travellers, &c. Compact, portable, and efficient, combining a wide field of observation with extraordinary defining power. In sling case, 3½ guineas. Sent free on receipt of post office order to W. & J. BURROW, Great Malvern, Worcestershire.

TEA.—STRACHAN & CO.'S Strong Rough "Domestic" Black at 3*s.* 4*d.* per lb.—26, Cornhill, London, E.C.

TEA.—STRACHAN & CO.'S Fine "Intermediate" Black at 3*s.* 8*d.* per lb.—26, Cornhill, London, E.C.

TEA.—STRACHAN & CO.'S Matchless "Drawing Room" Black at 4*s.* 2*d.* per lb.—26, Cornhill, London, E.C.

BEST AND CHEAPEST TEAS AND COFFEES IN ENGLAND

Are at all times to be obtained of
PHILLIPS AND COMPANY, TEA MERCHANTS, 8, King William Street, City, London, E.C.

Black or Green Tea, 2*s.* 8*d.*, 2*s.* 10*d.*, 3*s.*, 3*s.* 4*d.*, to 4*s.*

A General Price Current published every month, containing all the advantages of the LONDON MARKETS, and is sent free by post on application.

Sugars are supplied at Market Prices.

GLENFIELD PATENT STARCH, USED IN THE ROYAL LAUNDRY, AND PRONOUNCED BY HER MAJESTY'S LAUNDRESS TO BE THE FINEST STARCH SHE EVER USED.

Sold by all Chandlers, Grocers, &c., &c.

WOTHERSPOON & Co., Glasgow and London.

CANDLES, SOAPS, OILS, AND NIGHT-LIGHTS of all kinds.—Five pounds worth SENT FREE by railway.—WHITMORE & CRADDOCK, 16, Bishopsgate Street Within, London, E.C. Lists of prices on application.

SOYER'S SULTANA SAUCE, RELISH, SUCCULANTE, AROMATIC MUSTARD, &c.—These excellent Preparations, of which the *Lancet* in its sanitary analisation of Articles of Food reported so favourably of their Purity and Wholesomeness, are to be obtained of all Grocers and Italian Warehousemen in the United Kingdom. They are indispensable with Fish, Meat, Game, Poultry, Hashes, Stews, and all made dishes; impart also to Chops, Steaks, and Cutlets a most delicious flavour. Wholesale, CROSSE & BLACKWELL, Purveyors to the Queen, 21, Soho Square, London, W.

SAUCES.—Connoisseurs have pronounced LEA & PERRINS' "WORCESTERSHIRE SAUCE" one of the best additions to Soup, Fish, Joints, and Game. The large and increasing demand has caused unprincipled traders to manufacture a spurious article; but the "GENUINE" all bear Lea & Perrins' name on Bottle, Label, and Stopper.

Sold by CROSSE & BLACKWELL, London, and all respectable Oilmen and Grocers.

Sole Manufacturers—LEA & PERRINS, Worcester.

WANTED, LEFT-OFF CLOTHES FOR AUSTRALIA.—MR. and MRS. JOHN ISAACS, 319 and 320, Strand, W.C. (opposite Somerset House), continue to give the highest price in cash for Ladies', Gentlemen's, and Children's Clothes, Regimentals, Underclothing, Boots, Books, Jewellery, and all Miscellaneous Property. Letters attended to. Parcels sent from the country, either large or small, the utmost value returned by post office order the same day. Reference, London and Westminster Bank.

J. B. JOHNSTONE, MILITARY TAILOR & OUTFITTER,
34, SACKVILLE STREET, LONDON, W.
AND
50, DAWSON STREET, DUBLIN,

Respectfully informs his Patrons that he has transferred the management of the Dublin business to his Son, from whom the most careful attention to commands may be expected; and J. B. J. takes the present opportunity to return very earnest thanks for the favours he has hitherto received. Both measures, and patterns having been carefully retained, orders (by letter or otherwise) can be executed in London or Dublin; and all accounts due to the house are payable to J. B. JOHNSTONE, at either address:

34, SACKVILLE STREET, LONDON, W.
OR,
50, DAWSON STREET, DUBLIN.

SPECIAL ANNOUNCEMENT.

ON TUESDAY, the 6TH of NOVEMBER, the NEW BRANCH ESTABLISHMENT of E. MOSES & SON, at the CORNER of TOTTENHAM COURT ROAD and EUSTON ROAD, will be opened with an immense and unrivalled stock of READY-MADE CLOTHING, HATS, HOSIERY, BOOTS and SHOES, &c., for ADULTS and JUVENILES of all Classes.

E. MOSES & SON have endeavoured to render this Establishment worthy, in every respect, of the proud eminence they have attained among the Wholesale and Retail Houses of the Metropolis; and, while tendering their warmest thanks to the Public for the generous support and encouragement hitherto afforded them, they respectfully solicit a continuance of the same.

Every Department has been furnished with an entirely NEW STOCK of the most FASHIONABLE and SEASONABLE GOODS.

The BESPOKE TAILORING DEPARTMENT has been supplied with a splendid assortment of the latest home and foreign manufactures.

Cheapness combined with durability of material and workmanship will continue to be the prominent characteristic of the house.

The Establishment may be viewed at any time during business hours, without special invitation.

E. MOSES AND SON,

A costly Book of Engravings, with Prices attached, forwarded by post, free.

MANUFACTORY, QUEEN'S CUTLERY WORKS, SHEFFIELD.

DAVIESON'S EVERLASTING TEETH.

THE LATEST DISCOVERY.

MR. EDWARD DAVIESON, SURGEON-DENTIST, has introduced a material for the construction of ARTIFICIAL TEETH so extraordinary that nature appears to have made good the ravages of TIME, DISEASE, or ACCIDENT, and when fitted detection is impossible, even though the wearer's mouth be closely examined. The price is so moderate that it is within the reach of all, and it is fitted without springs or other unsightly fastenings. The removal of stumps is unnecessary, and thus all pain is avoided. MR. EDWARD DAVIESON invites one visit of inspection to his establishment, which will convince the most sceptical of the truth and straightforwardness of this statement. The LIQUID ENAMEL, for Stopping Decayed Teeth, is ENAMEL WHITE, keeps its colour, and lasts for ever. It is invaluable for Front Teeth. Attendance daily from Ten till Six. Consultations free. MR. EDWARD DAVIESON, Electric Telegraph Office, 418, West Strand, London, W.C. The Descriptive Pamphlets free for two stamps.

Now ready, price 3*s.* 6*d.*, by post 3*s.* 8*d.*, Uniform with Allen's Pocket Editions of the "Queen's Regulations," &c.

A MANUAL OF MILITARY LAW, for all Ranks of the Army, Militia, and Volunteer Services; comprising an Account of the Constitution, Composition, and Procedure of Courts-Martial; and a Detail of the Crimes that may be tried and the Sentences that may be awarded by each description of Court. Also, a Notice of the Practice and Procedure of Courts of Inquiry, and a Short Exposition of the Law of Evidence. To which is added, an Abstract of the Acts governing the Volunteer Force; an Account of the Law relating to Recruiting; and a Review of the Duties, Obligations, and Liabilities of Soldiers to Civilians and the Civil Power; of the Duties of Civilians towards the Military; and of the Legal Rights, Privileges, and Exemptions of Soldiers. By Colonel J. K. PIPON, Assistant Adjutant-General at Head Quarters, and J. F. COLLIER, Esq., of the Inner Temple, Barrister-at-Law.

"Horse Guards, 12th Oct., 1860.

"His Royal Highness the General Commanding-in-Chief has been pleased to sanction the publication of 'A Manual of Military Law,' by Colonel Pipon, Assistant Adjutant-General to the Forces, which he considers will be a most useful addition to the books required by Regulation to be in possession of the officers of the Army. It contains much instructive matter.

"Signed J. YORKE SCARLETT, Adjutant-General."

TO EMPLOYERS.—THE ARMY & NAVY PENSIONERS EMPLOYMENT SOCIETY, No. 22, Parliament Street, S.W., has on its registry men of unexceptionable character, who have served as non-commissioned officers and privates in different branches of Her Majesty's Army and Navy. They are still in the prime of life, and besides the advantage of their military training and discipline, possess the material guarantee afforded by a pension, and are satisfied with moderate wages. Among them will be found men of every qualification, and fitted for situations of trust and responsibility. They are peculiarly fitted for places of the following description:—Hall and door-keepers to public and private establishments, messengers to ditto, grooms, helpers, and occasionally in-door servants and gardeners, porters, watchmen, gate, office, and time-keepers, constables, storekeepers, and park-keepers. No fees or expenses to employers or employed. N.B. The men belonging to the London Division of the Corps of Commissionaires have been obtained at this office.

MESSMAN WANTED.—Apply to the Mess President, 2nd Battalion 25th Regiment, Aldershot.

WANTED, for the 41st Regiment, a MESSMAN. Apply to President Mess Committee 41st Regiment, Aldershot.

WANTED, an efficient DRILL SERGEANT, who is also thoroughly qualified to instruct in Rifle Practice, according to the School of Musketry practised at Hythe, for a corps recently established. Salary £1 per week. Apply to the Secretary, North Essex Borderers Rifle Corps, Saffron Walden.

NAVAL CADETS, MARINE CADETS, ETC.

EASTMAN'S ROYAL NAVAL ESTABLISHMENT,
EASTERN PARADE, SOUTHSEA.

357 Gentlemen have passed from this Establishment as Naval Cadets, and more than 200 as Marine Cadets, &c.

At the last Examination, FIRST, SECOND, THIRD, FOURTH, FIFTH, and SIXTH Places were taken by Pupils in different classes.

Pupils receive a Classical and sound General Education, and careful preparation for Naval Examinations.

Applications to be addressed to the Head Master, Mr. G. EASTCOTT SPICKERNELL. Prospectuses and other information may be had at Messrs. Booth's Library, 307, Regent Street, W.

A Seaman-Rigger is attached to the Establishment.

NAVAL CADETS.—Young Gentlemen are EDUCATED for the Navy by W. BELL, Chaplain; A. BURROW, Chaplain and Naval Instructor; W. JOHNSON, Naval Instructor. NORTH GROVE HOUSE, SOUTHSEA.

STAFF EXAMINATIONS. — Twenty-four Officers have already joined the Military College of Sunbury this year, to read either for the Staff College, or for direct appointment on the Staff. Apply to Captain LENDY, Sunbury, S.W.

HIGH MILITARY EDUCATION.

THE CEDARS MILITARY COLLEGE, PUTNEY, for Gentlemen preparing for the Line, Cavalry, Artillery, Engineers, Staff, and Addiscombe. *Director, Major* Corte, Major of the Staff of the Sardinian Army during the late War; Professors Oswald Hunter (Wrangler), Cantab., Dr. Hassell, and others. The number of Professors is arranged to afford to each Pupil the advantages of Private Tuition. Applications addressed to OSWALD HUNTER, Esq., The Cedars, Putney, S.W.

ARMY EXAMINATIONS.—Candidates for the Artillery, Line, and Cavalry, are rapidly and efficiently prepared at an establishment, the pupils of which have, within the last two years, come out eight times first, five times second, and three times third on the list. Apply to Captain LENDY, Sunbury, S.W.

ARTILLERY EXAMINATIONS. — Candidates for the Competitive Examinations are individually prepared at an establishment which receives six pupils only for that branch of the Service. Four resident professors. Apply to X., care of Messrs. PARKER, 445, Strand, W.C.

BECKENHAM, NEAR LONDON.—TEN BOYS carefully PREPARED for the PUBLIC SCHOOLS by the Rev. LLOYD PHILLIPS, B.A. (late Secretary to the Editorial Department of the British and Foreign Bible Society). Inclusive Terms: Eighty Guineas and a Hundred Guineas. References: the Rev. W. Marsh, D.D., Beddington Rectory, near Croydon; the Rev. F. Chalmers, B.D., Beckenham Rectory, near London, and the parents of pupils.

ORIENTAL LANGUAGES.—SANSKRIT, HINDUSTANI, BENGALI, PERSIAN, and HEBREW are TAUGHT by the Rev. G. SMALL, M.A., M.R.A.S., &c., at 17, Church Street, Cliftonville, Brighton, and at 22, New North Street, Red Lion Square, London, W.C. Mr. S. was ten years a Missionary in India, and has had long experience as a Teacher in England.

THE ARMY CHAIR is the most Comfortable, Economical, Portable, and Useful Chair yet invented, equally adapted for a Couch or Bed; simple in its action, and impossible to get out of order. For Officers in the Army or Navy, Travellers, or Invalids, it is invaluable, as it combines every comfort and convenience for rest by day and repose at night. Manufactured by the Patentees, HILL & MILLARD, Military Outfitters, 7, Duncannon Street, Trafalgar Square, W.C.

E.I.O. Royal Crimean Waterproof Company, 124, Aldersgate St., E.C. Knickerbockers, Capes, and Overalls.

WATERPROOF ENFIELD CARTRIDGES, impervious to wet or damp; COMPRESSED BULLETS, 563 or 577.—100 rounds of these Cartridges may be fired from an ordinary Enfield Rifle without fouling the barrel. Volunteer Corps ordering 10,000 and upwards, 60*s*. per 1000; blank, 33*s*. per 1000.

[COPY.]

"Ordnance Select Committee, Royal Arsenal, Woolwich, April 17th, 1860.

"Sir,—Since I last addressed you on the subject of your Waterproof Cartridges, I have to inform you that 60 of them have been exposed in an atmosphere saturated with moisture, at a temperature of 90 degrees, for a fortnight. The result has been favourable, as far as this test is concerned, to their Waterproof qualities.

"I have, therefore, to request you will be good enough to state, for the information of the Committee, the nature of the lubrication you employ; whether it is in any way connected with the Waterproof properties of the Cartridge, and whether, in the event of their being adopted, the Service lubrication, which is wax, might not be employed.

"I have the honour to be, Sir,
"Your obedient Servant,
"J. H. LEFROY, Colonel, R.A.

"Mr. Thos. H. Anthony,
"37, Broad Street, Birmingham."

VOLUNTEER CORPS.—Contracts entered into for the equipment of entire regiments. Single suits supplied.

PORTABLE FURNITURE.—An Illustrated Catalogue, with design, size, and price of every requisite for the barrack-room forwarded on application.

TO VOLUNTEER CORPS.—Complete suits or any portion of Volunteers' Accoutrements, Gaiters, &c., &c., Estimates and Patterns, can be had of the Manufacturer, at a saving of 25 per cent., on application to S. HODGES, Army, Navy, and Volunteer Accoutrement Manufacturer, 43, Rupert Street, Haymarket, S.W. Country orders, with full particulars, punctually attended to.

NEW REGULATIONS FOR NAVAL CADETS, for passing the College may be obtained on application to B. JOSEPH & Co., or sent free to all parts of the world, with full list of prices of Outfits for young gentlemen entering the Navy.

A large stock of fashionable clothing at moderate prices may be had either ready made or made to order in a few hours' notice at the Hall of Commerce, 93 & 94, Queen Street, Portsea. B. JOSEPH & Co., Proprietors.

CABIN FILTERS.—The Last Improvement. —Dr. Ward says "I would strongly recommend every family going a distant voyage to take one." LIPSCOMBE'S SELF CLEANSING CHARCOAL CABIN FILTERS; it will be found invaluable. These Patent Filters can only be obtained of Linseys & Co., Temple Bar, W.C.

Printed by JOSEPH SMITH, of No. 10, Malvern Cottages, Peckham Place North, Clapham Road, in the county of Surrey, at the office of Messrs. HEADBURT & EVANS, in the precinct of Whitefriars, in the city of London, and published by him at the office, No. 16, Wellington Street, Strand, in the county of Middlesex.—SATURDAY, November 3, 1860.

☞ *It is particularly requested that applications for copies of the* ARMY AND NAVY GAZETTE, &c., *and Advertisements, should* NOT *be sent to the Editor, but to the Publisher,* MR. ARCHIBALD GRAHAM, *to whom remittances are payable. The subscription to the paper is 7s. 7d. per quarter, or 30s. 4d. per annum, payable in advance, postage included.*

THERE is still some uneasiness felt in reference to the result of the Chinese expedition; but it is due to the soldiers and sailors of the allied forces to declare their share of the work has been so perfectly done in nearly every department, that our apprehensions are devoid of any military impediment; and that if we feel a little uncomfortable it is only in reference to the issue of the diplomatic struggle and to the actions of Lord Elgin and Baron Gros. The former has already received some hints from "an influential quarter" of what he may expect if he makes any serious mistake; but the mischief may be done ere they reach his eyes. But he is many miles away, and he may be considered after all as a tolerably shrewd, clear-visioned, and intelligent judge of all that concerns his reputation; and it is needless to say that Lord Elgin's fame and fortune depend on the conduct of these operations and their final result. So far as the Chinese, or rather the Tartars, are concerned, we must give them the credit due to brave men. Rude horsemen—armed mainly with bows and arrows, and for the rest provided with the most cumbrous form of firearms; who not only stood the pounding of shot and shell from Armstrong guns, and the fire of a musketry which must have been almost miraculous to them, but who manœuvred in face and on the flanks of those tremendous enemies, and actually charged down upon a battery of English artillery, and got within a hundred yards of the guns—they showed they could do their duty bravely as soldiers; and their countrymen in the forts—who for four hours maintained their ground and stood to their guns under the most murderous, bombardment and horizontal fire for four hours, and who held the walls of their rude entrenchments against the best troops in the world, after heavy explosions of magazines and great loss of life had taken place around them—displayed the highest qualities of which a defending force is capable. Two facts are tolerably clear from the admirable narrative of the able "Special Correspondent of the *Times*." The Armstrong guns have achieved a sound, practical, demonstrative success, absolutely and entirely, as shell guns and field artillery. There were no means at hand for instituting a comparison between the Armstrong and the *canon rayé*, except as regards portability in the field; and the Correspondent, who is an active, keen-eyed, observing man, gives his award against the gun-carriages of the Armstrong in favour of those of the French piece. But the carriages sent out to China were of a peculiar pattern, and of a very heavy construction; and, though we are glad to hear they have stood the work so well, no doubt they will be changed for a better form of carriage when an opportunity arrives. We may just remark, that to go into action with only thirty rounds a gun against a civilised artillery would be hazardous in the extreme, and would lead probably to worse results than were caused to us by our want of ammunition for the horse artillery, on the 25th October, at Balaklava. Once in action, it was not quite practicable to cross over from the French to the English, and back again, to compare the practice; but, admitting every word that has been written in favour of the Armstrong gun to be true, it would not seem that its performance was so egregiously and exceptionally wonderful, according to the results given, as to deserve the extravagant praise accorded to those results. The range and accuracy of flight at high elevations—above all, the precision of the bursting of the shell, and the regular flight forwards and divergingly of the fragments, which are always uniform in number, constitute the great excellence of the Armstrong; and as these points are of the highest importance in field artillery, we may safely congratulate ourselves on having a gun which, so far as we know, nothing can beat. But our information respecting the power of the French rifled gun, as shown at Magenta and Solferino, was couched in language very like that of the *Times* Special Correspondent, who goes, it will be observed, considerably beyond the Commander-in-Chief in his praise. One who is now serving with honour in Italy told us that, at Solferino, the French rifled guns, at 2500 metres, threw their shot and shell with as much precision as the 56 cwt. 32-pounders, and that the havoc caused by the shell, which burst to the greatest nicety, was appalling. Of course, if shells from field guns or howitzers burst in front of groups of men, whether they be Austrians or Chinese, their fragments will blow those men to pieces and mutilate them more or less terribly. Against the regularity of the bursting pieces of the Armstrong shell, is to be opposed the consideration of the want of momentum of each small fragment as compared with that of a larger mass. Each bit may indeed kill or maim any man it strikes, but it will scarcely do what one large piece of a 32-lb. howitzer shell did in the Crimea—kill three and wound five men. At the very short distances at which the artillery was eventually used in the attack on the Taku forts, the fire of ordinary 6-pounders and 9-pounders would have been very precise, and in one respect the breaching power and shattering force of the Armstrong gun seems to have been so far inferior to that of the old field battery armed with gun and howitzer, that the latter was called into play to produce an effect which the former seems scarcely to have accomplished. Without insisting on these points we may congratulate the country on the possession of a gun to which as yet we know no equal for throwing shot and shell in the field.

The next point worthy of remark in the immediate operation of the troops is the persistency with which hard fortune attends our engineers and their apparatus. The very name of "bridge" and "scaling ladder" stinks in the nostrils of the soldier. It is true that our engineers are a highly scientific, extremely accomplished, and devotedly gallant body of officers—that the sappers and miners under them are unusually intelligent and brave men; but it is equally true that somehow or other in field operations and in sieges these qualities fail in securing any appreciable advantages to the soldiers who have to assault. The history of our sieges and attacks are full of failures arising from engineer mischances. Perhaps it would only be fair to admit that the engineers have to deal with organic and inorganic matter over which they possess only limited control; but ever since our ancestors long ago derived exercise for their risible muscles, and took grim sport out of the sight of an engineer mounting into the air under the influence of his own petard, down to the other day at the Taku, when our men, crowding across the ditch, stood on the berm of the parapet, to be shot down helplessly by the Chinese, some mischance attends our operations, which leads to deplorable loss of life at the very moment when victory seems in our grasp at a moderate price. Scaling-ladders will be found too short—or their bearers will fall on the way—or the bridges will not be long enough—or they will not be light enough—or they will not float at all; and so the infantry are pasted like flies on paper, and much gallant blood is shed which ought to be spared, if it could be so. We are by no means ready to join in the ignorant shout so often raised by other branches of the Service against the engineers, but we must say that there may well be some explanation asked of the circumstances which led to such a loss of life below the wall of the Taku fort after crossing the ditch the other day—how it was our men had to use the French bridge—how it was that more than one-half our killed and wounded fell at the ditch? The assault was very gallantly given and bravely resisted, considering the circumstances. Whether Sir Hope Grant or General Montauban was right in the point of attack is not much matter now the forts have fallen, but it is very clear that the French general's plan would have inflicted a much more serious loss on the enemy, as their retreat would have been much more difficult: it is possible it would also have led to a much more obstinate resistance, and to greater loss among the allies. The fame of Sang-ko-lin-sin has melted away like a vapour; but really, if our plenipotentiaries will trust themselves with a cavalry escort on the road to Pekin, where there may be many thousands of savage Tartars, we doubt if their success may not be rendered equally evanescent. It gives us satisfaction to observe that Sir Hope Grant is not disposed to quarrel with General Montauban—better still, that he is prepared to hold his own, and to abide by his own judgment. A few years since Hope Grant was colonel of the 9th Lancers; an officer of long service, but of no reputation beyond that which is acquired by the most perfect and punctilious discharge of the duties of a regimental officer. The Indian mutiny tested him. Sir Colin Campbell early discovered his admirable qualities, and General Mansfield said of him, emphatically, that he was almost the only officer in India who could be relied on implicitly to do exactly what he was ordered to do—that only—all that, and no more. Now he has attained a high position in our armies, and has evinced that he can bear himself well in one of the most difficult commands that can be imagined. With something of the grim old covenanting spirit in him, a high religious sense of duty, and strong convictions, Sir Hope Grant is still a man who respects the feelings and convictions of others, and who is not indifferent to the charms of music and of literature. He is a capital Frenchman; he can ride like an Indian; *patiens inediæ algoris*, he is just the man to set his troops a good example; should there be privation or unusual demands for vigilance and activity; and if he has a chance of a good pursuit he is not the man to lose it. To such a chief, Sir Robert Napier is an invaluable assistant, for he possesses all the good qualities of Sir Hope Grant, and superadds to them extraordinary sagacity, and immense resources, and practical knowledge as an engineer. We would almost wish that Lord Elgin might be temporarily removed by some kind dispensation, so that the diplomatic, as well as the military affairs, could be managed by generals and admirals at Pekin. The French are determined to put us on our mettle; they have run us hard in the race for glory. Jean Fauchard and Ensign Chaplin may shake hands together; nor must we forget the coolies who braved death in the ditch. The details of the marches towards Pekin, and the operations of the capture of the Taku, will be intensely interesting, and we are delighted to feel that we shall have full information from an impartial witness. Meanwhile, we should like to hear what the French have got to say about our Armstrong guns.

When the first Napoleon expressed it curtly as his opinion that all military tactics and strategy resolved themselves into "the art of being strongest," he uttered one of those simple yet startling truths which to some appeared too obvious to be profound, but which, though not disputed, had nevertheless really been overlooked amid the traditions and technicalities of the then existing science of war. In a measure, men were prepared for the revolution in warfare that followed the bold adoption of such a simple principle.

Frederick the Great had previously cast aside many traditions, which had cramped the movements of generals in the field of battle, as if in fighting in reality they had been bound to observe a complication of artificial rules, like men at a game of chess. The System of Magazines had been got rid of, but the War of Posts was still practically in vogue, when Napoleon astonished his opponents by his rapid movements and the concentration of his forces upon important and vital points. At first, and indeed for long, this system was subjected to a kind of schoolboy criticism: Bonaparte was allowed to have won the battles that he gained, but it was stupidly added, "it was only because he happened to out-number his adversaries." It was overlooked that in frequent instances he only out-numbered his enemies at the particular point where he forced them to engage, while their aggregate forces in the field out-numbered his, but were scattered over too great an expanse of territory to be able to support one another. If he had only obligingly cut up his forces and sent them in small detachments against the several posts of the enemy, which were prepared for a gallant defence, no doubt the fighting would have lasted longer than it did. But he was fighting in earnest, and chose a more decisive system: he was content with taking the principal places, and all the minor ones became his without a blow. "The art of being strongest" does not mean that you must have altogether a larger army than your neighbours, or in naval warfare more men afloat and a larger fleet in commission, when every gun is numbered; but that you may be able to concentrate an overwhelming force on some central and important position, and be strongest there. In the words of General Jomini, "Le principe fondamental, par l'application duquel toutes les combinaisons sont bonnes, et sans lequel elles sont toutes vicieuses, consiste à opérer avec la plus grande masse de ses forces un effort combiné sur le point décisif."

There was a time, of course, when the slower and more cautious system was properly followed. There are regions where even now modern tactics do not apply. The march upon Moscow, through a half-cultivated and inhospitable territory, was a blunder; not at all like marching upon Vienna, or Madrid, or Paris. Let us add also, with reference to certain observations we have seen in print bearing upon the question of our own invasion, that by nothing we could do, could we ever imitate the Russian defence of their capital. An enemy's troops once landed on our shores, a march upon London would be the easiest thing they could then do; and we must defeat them by a stand-up fight, or yield. To talk of devastating our rich country so as to make it untenable by the enemy, is simply absurd—only less so than to speak of setting fire to London.

But if "the art of being strongest" is the grand thing for the triumph of armies upon land, where "the better part of valour" may to a considerable extent have the chance of displaying itself, and the fight be again renewed, how much more is a decisive blow all-important in naval warfare. Had Mr. Edwin James gone as an amateur to witness a naval triumph which unexpectedly turned into a fight, he could not have run away, and might not have escaped alive. That the present Emperor Napoleon has a due appreciation of his uncle's dictum we have plenty of evidence. But we, the while, are clinging fondly to our old traditions. We cannot give up our "Hearts of Oak." We cannot imagine armour-coated champions bearing down upon our three-deckers, bare and business-like, stripped of all superfluous upper gear, hard and cropped like prize-fighters, snorting and steaming straight upon a squadron of wooden ships, and throwing shells among them filled with molten iron, which, when thrown back can do them no harm, but burst outside, broken against their cuirasses. We say, Oh, they could never keep the sea as we can! They will roll and pitch dreadfully in rough weather! Let us only get safely within pistol-shot of them! Let us have them close to the high walls of a land battery, or under the sides of a line-of-battle ship! And then!—We are still dreaming of our Nelsons with a sailing fleet, waiting for the wind, or tacking about in the wide ocean in pursuit of a similar fleet, also dependent upon the elements for its movements. We forget the capacious basins near at hand, which on the stillest morning in June may be filled with a fleet that might sail out and move across a calm sea like glass, and in a very few hours reach our shores. Suppose the vanguard of such a flotilla to be ten iron-cased frigates like the La Gloire, and flanked with 150 iron-cased gun-boats, while behind and within these there are also three-deckers, and ordinary ships-of-war, with a fleet of transports in the centre. How should we go out to meet this enemy? Suppose we actually have the Warrior off the stocks in another year, with the Black Prince, the two smaller rams, and the three new frigates which we talk of having laid down. Shall we be strongest—strongest in the Channel? Or, is the Channel not a decisive point? If we rely on our line-of-battle ships, the enemy has these also. But the first onset will be between the iron-cased vessels. How are we to penetrate their advanced phalanx? And suppose they encounter our iron-cased vessels ship to ship, at a distance from the rest of their fleet, how are we to prevent those we cannot match (being outnumbered) from advancing towards our wooden vessels, and destroying them with shells before the favourite pistol-shot distance can be reached? A very obvious answer would probably be made by any daring sailor to this question. He would say, "I would dash through their line with our gun-boats, and shell their transports." But his iron-cased gun-boats, like little rams, might meet boat by boat at the closest quarters, and intercept them in performing this operation. Besides, we may imagine a similar attack, omitting the transports, which could remain under protection at Cherbourg till the end of the first act of the tragedy. But the fact is, if we are content to contemplate such a meeting, with such odds against us in the number of iron-cased vessels alone, we may go a step further, and say we do not require a single armour-coated ship to meet the enemy. If we require one, we require as many as our adversary. To give our fleet the strength it should have we in fact require more; but unless, at the very least, we have ship for ship, our enemy will have "the art of being strongest," and of being strongest upon a very decisive point. What might follow our defeat in the Channel, we need not say. The result of invasion by a surprise, while our fleet was away, might be serious, as London is so near the coast; but in that case the reprisals would be sudden and severe. But if the problem whether Iron or Wood is strongest, is first to be solved in the Channel—Heaven help us, if we do not help ourselves!

It is not improbable that the most valuable idea which has yet been struck out in connection with the Volunteer movement will be satisfactorily developed and carried into execution, and we believe that the scheme for organising "an Engineer Corps," in co-operation with, and in dependence on, the "Institution of Civil Engineers," has received the sanction of the proper authorities. The vast importance of the project will be seen at a glance. Suppose the country to be divided into districts, each of which shall have reference solely to a main line of communication with its branches, to be placed under a field-officer, who shall be the civil engineer of the main line of railway, with captains at first-class stations, subalterns at second-class stations, and so on, the whole system being under the surveillance of the Council in London, so as in case of necessity to be ready to concentrate troops at given points, or to destroy lines of communication; and see what an overwhelming power of attack and of defence is given to us in case of invasion! There are about 800 of the first engineers in the world, and of the greatest contractors, belonging to the Institution; and connected with them is the great army of "navvies" all over England, with their firemen, plate-layers, and skilled mechanics, who could construct platforms for men, horses, and guns, break up bridges and roads, or lay them down again. The whole country is covered with lines of rail, which, with such machinery, become so many strategical lines. It is not necessary here to point out the strategic curves which embrace the principal points of an enemy's attack, and the combinations of which they are susceptible by reason of the railway lines. It is scarcely possible to exaggerate the importance of the organisation indicated, if there be any real reason for the Volunteer movement; and we sincerely hope that no difficulties will be interposed or arise in the way of its completion and permanent existence.

We regret that our private letters confirm the reports which have appeared in reference to the disorganised state of the British Legion, and to the discreditable conduct of some of its members who, in the city, are disgracing their country in the eyes of the Neapolitans, whilst their comrades are winning credit for gallantry and devotion in the field. General Garibaldi consulted his partiality as a friend, rather than the efficiency of the corps, when he appointed one of his bravest and most devoted followers, but assuredly not one of his best officers, to the command of a body of Englishmen who require most judicious handling in the field and in quarters. Very recently the whole force was taken into a position where it might have been cut off with ease, for the courage of the men knows no bounds, and is as great as the rashness and impetuosity of their leader.

THE ARMY.

1st Dragooon Guards. Captain Mitchell is about to retire from the service.

7th Dragoon Guards. Lieutenant W. B. Armstrong has passed a qualifying examination in Hindostanee.

2nd Dragoons, Assistant-surgeon Rudd is on leave to December 14.

6th Dragoons. Captain Dawson is about to retire from the service. Lieut. the Hon. E. R. Bourke purchases the vacant troop. The regiment expects to move from Kirkee to Ahmednuggur to be quartered.

18th Hussars. Surgeon-Major Neale is on leave to the 5th of January.

Royal Artillery. Captain Luellyn is attached to Major Craufurd's battery at Poona. Lieutenant Oliver, R.H.A., has sick leave to England from Calcutta. Captain Mercer's battery, under orders for New Zealand, will sail from the Royal Arsenal pier, Woolwich, according to present arrangements on the 17th of the present month. The total number ordered for embarkation consists of Captain Mercer and four other officers, 214 men, 22 women, and their children. Lieutenant Straubenzee, R.H.A., is on leave from Dublin to January 14.

Royal Engineers. It is announced that Lieut.-Colonel E. Stanton, C.B., R.E., the Assistant-Adjutant-General, will proceed to Warsaw on a Government mission, relieving Colonel J. L. A. Simmons, C.B., R.E., who has received an appointment at Aldershot Camp. Lieut.-Colonel W. O. Lennox, V.C., will succeed Colonel Stanton as Assistant-Adjutant-General of the Royal Engineers.

Military Train, 5th battalion. Lieutenant Hardy is on leave to the 28th February, 1861.

1st Royals, 1st battalion. Private M'Sulley, at present with the depot of his regiment in Colchester Camp, has, it is said, recently come into possession of a considerable sum of money, estimated at some thousands of pounds, through the decease of a relative. He has served upwards of twenty years in the army, and is daily expecting his discharge.

4th Regiment, 1st battalion. Captain T. D. Sheppard has leave to England for 18 months.

5th Regiment, 1st battalion. Major O'Meara has leave of absence from the depot of his regiment at Colchester from the 13th inst. until 31st December next.

19th Regiment. Lieutenant W. Bennett, of 1st battalion, is appointed interpreter to the corps.

25th Regiment, 2nd battalion. Lieutenant Annesley is on leave to December 31.

26th Regiment. Captain Upton is on leave to the end of the year.

33rd Regiment. Captain W. A. Parry has been granted leave to England for 18 months.

34th Regiment. Lieutenant Malcolm and Ensign Walsh have been granted short leave of absence from the depot of their regiment at Colchester. Ensign John M. O'Leary is about to retire from the Service.

36th Regiment. The following officers are on leave to the middle of January: Major Butler, Lieutenant Newbolt, Ensigns Tyrwhitt and Atkinson. Ensign Pigott has leave (in extension) to the 14th inst.

37th Regiment. Captain Pelly, of the Colchester depot, has received extended leave of absence.

44th Regiment. The intelligence of the war in China, and the losses sustained by this regiment, created no small excitement amongst the men of the depot, most of the killed and wounded being old comrades of those now quartered in Colchester Camp, who left this country with the drafts despatched in the early part of the summer. The 44th was the regiment almost cut to pieces in the Afghan War.

49th Regiment. Ensign Stevenson is on leave to January 30.

Royal Marine Light Infantry. Rumours are circulated at head-quarters of the Royal Marines that the battalion now serving in China would shortly farrive home, intelligence having been received that they would embark at Hong Kong for England on the 1st of October.

52nd Light Infantry. Lieutenant C. O. L. Prendergast is attached to the Kurrachee depot to await detachments from England, which he will accompany to Lealhote.

54th Regiment. Assistant-sugeon A. Reid was granted leave to Nynee Tal, from August 20 to November 20, on medical certificate.

60th Rifles, 4th battalion. Assistant-Surgeon Oliver is on leave to December 11.

73rd Regiment. Lieutenant H. Fraser is on sick leave to England. The leave granted to Lieutenant Pigott is cancelled at his own request.

75th Regiment. Major D. F. Chambers, paymaster, has leave of absence to England.

80th Regiment. Captain G. Sullivan has leave to England.

81st Regiment. Captain G. Betts has sick leave to England to July 30, 1861. Lieutenant H. J. Fane has been granted leave to England, viâ the Cape, on medical certificate.

84th Regiment. On Tuesday, the 6th inst., by permission of Major Spier Hughes, commanding the 84th Regiment, the non-commissioned officers gave a ball, on an imposing scale, at the Salford Barracks. It was in commemoration of the presentation to the regiment, a few days ago, of the Indian medals, which they so bravely earned in the siege and defence of Lucknow, and on many other occasions. The company numbered about 150, among them were several of the officers and their wives, and the evening passed off most successfully.

88th Regiment. Brevet-Major Gore, of the Colchester depot, has leave of absence till the 17th inst.

89th Regiment. Captain W. C. G. Pery and Assistant-Surgeon T. Walsh have obtained sick leave to England under new rules.

90th Regiment. Captain L. H. L. Irby has sick leave to England.

98th Regiment. Assistant-Surgeon W. Collis has passed his examination in vernacular at Peshawur.

Digitized by Google

9th Depot Battalion. Staff Assistant-Surgeon Scott, having reported his arrival in Colchester Camp, has been attached to, and will do duty with this battalion. The detachment of this depot, stationed at Landguard Fort for garrison duty, will this day (Saturday) be relieved by a draft of 34 non-commissioned officers and men, and the detachment of the 10th battalion will be relieved by a draft of 68 non-commissioned officers and men; the total number of men returning to camp will be 123 rank and file and two officers.

Brigadier-General Brook Taylor is on leave from Aldershot to the 20th of December.

Major-General Lord William Paulet, C. B., commanding the south-west district, proceeds early next week on winter leave, and consequently the command devolves upon Colonel Paul Haines, of the King's Own, the next senior officer.

Brevet-Colonel George Bent, C. M., Royal Engineers, is to be Assistant Adjutant-General of Engineers in Ireland, vice Durnford, promoted to the rank of Colonel in the corps.

Colonel Blane, Assistant-Adjutant-General in Dublin, is on leave to the 15th of December. During his absence, his duties will be discharged by Major Daniell, Major of Brigade.

His Royal Highness has been pleased to approve Deputy-Assistant-Commissary-General Marsh being ordered from Colchester to the Curragh, vice Deputy-Assistant-Commissary-General West, removed to Aldershot.

Prince Gortschakoff, a lieutenant in the regiment of dragoons of the Russian body-guard, and Captain Schak, of the staff, have been degraded and reduced to the ranks by sentence of a court-martial—the former for having killed Lieutenant Baron Vittinghoff in a duel, and the latter for having acted as second in the affair.

His Royal Highness the Duke of Cambridge, as General Commanding-in-Chief, has been pleased to direct that, hereafter, all subaltern officers, previous to assuming any staff appointment, must pass the examination for the rank next above that which they hold.

The annexed Circular Memorandum, dated the 26th ult., has been addressed to the cavalry:—"Numnahs being now supplied to cavalry regiments by Government, and being no longer articles of necessaries kept up at the expense of the dragoon, the General Commanding-in-Chief has been pleased, in concurrence with the Secretary of State for War, to decide that for the future numnahs shall be issued in the proportion of one for each horse only; and officers commanding regiments of cavalry and cavalry depots are accordingly requested to transmit to the War Office returns showing the number of numnahs thus rendered surplus, and what portion thereof will be required to meet the annual demands for the coming year."

In consequence of the difficulty of communication which has occasionally been felt to occur between the head-quarters of the south-west district and the troops quartered in the west of the Isle of Wight, the Secretary of State for War, on the recommendation of the Major-General commanding, has sanctioned the use of a boat and boat's crew for service between Fort Victoria and Hurst Castle, from which latter station there is telegraphic communication with Portsmouth. The boat has been sent from the Dockyard, and will be manned by the men of the Royal Artillery belonging to the Fort, who will receive 6*d.* a day remuneration (by no means too high a rate of pay, considering the sea and tide which generally is running between the Needles and the mainland). The Royal Engineers, who are busily employed under Lieutenant-Colonel Boucher, C.B., in building the new forts which guard the passage, will now also be able to maintain a communication with their district officer, which during the coming winter will be much required.

In consequence of the gratifying news which arrived on Saturday last from the seat of war in China, His Royal Highness the Colonel Commanding-in-Chief directed salutes of honour to be fired from all forts authorised to celebrate the triumphal anniversaries of our annals. In order that they should be fired at the same moment throughout the United Kingdom, the electric telegraph was put into requisition from the War Office, and at 1 o'clock on the 5th inst., the boom of the cannon resounded joyously from the batteries of the following places: Alderney, Brighton, Chatham, Cork, Dover, Dumbarton Castle, Edinburgh, Fort George, N.B.; Fort Victoria, I.W.; Guernsey, Hull, St. James' Park, Elizabeth Castle, Jersey, Landguard Fort, Liverpool, Pembroke, Pendennis Castle, Pigeon House Fort, Dublin; Plymouth, Portsmouth, Sheerness, Stirling, Tilbury Fort, the Tower, and Woolwich. The guns of all the great naval stations assisted to swell the triumphal announcement of the success of our arms.

We have heard what we can scarcely believe, that an historian of long note, taking an interest in one of the candidates at a recent military examination, has been indiscreet enough to address a letter to each of the examiners, calling their attention to the claims for consideration which that candidate might be supposed to derive from the social position and wealth of his family. We are surprised, putting aside all other considerations as completely as this eminent historian appears to have done, that he should not have been aware that, as the condidates are only known by number and not by name to the examiners, his good offices thus exerted must necessarily prove fruitless.—*Times.*

One of the heavy Armstrong 100-pounder guns, being the first of that species yet completed, was on Wednesday proved at the Royal Arsenal butt, Woolwich. The gun was then fired ten rounds, loaded with the ordinary service charge of powder and shot, and, having been thoroughly searched and examined, was found to have withstood the test well. Sir William Armstrong, Colonel Tulloh, Inspector-General of Ordnance; Captain Lyons, Assistant-Inspector; and the members of the Ordnance Select Committee were in attendance. The gun was subjected to a second ordeal yesterday, and was again fired ten rounds, loaded with a double charge of powder and a 100-lb. shot, which it bore with a similar result. This species of gun has been manufactured according to the new principle, which has thus been pronounced an important improvement in the construction of heavy guns, as affording additional strength to the chamber. That section of the gun, by directon of Sir William Armstrong, is forged entire, instead of in coils, and, according to the judgment of the examining committee, will be found of infinite service.

THE COST OF THE ARMSTRONG GUN. — Now that the success of the Armstrong gun of small calibre has been placed beyond doubt by its destructive use against the Chinese forts, it may be well to estimate the cost of the new weapon. The present is an opportune moment for this purpose, inasmuch as it is only when its success is uppermost in our minds that the price we have paid for this gun will bear mentioning. It will be recollected that 2,000,000*l.* sterling have been voted by Parliament for the manufacture of Armstrong guns, and these 2,000,000*l.* will all be expended by the end of the current financial year. How many guns have we yet obtained for this immense sum of money? We are able to answer this question in detail from information, which is, we believe, perfectly reliable. There had been made at Woolwich and Elwick together, up to last week, the following Armstrong guns:—Of 100-pounders, 20 in number; of 40-pounders, (strengthened) 25 in number; 25-pounders, 36; 25-pounder "boat-guns," 16; 12-pounders, weighing 8 cwt., 330; 12-pounders, weighing 6 cwt., 16; and 6-pounders, 8—in all 451, of which it will be observed nearly the whole are small field-pieces, weighing only 8 cwt. each. Now, if of the 2,000,000*l.* granted by Parliament we assume that only 1,500,000*l.* are yet spent, and further assume that of this 500,000*l.* has been expended upon the plant at Woolwich and Elswick, thus leaving but 1,000,000*l.* to be accounted for as the cost of the guns already made, we then find that every Armstrong gun yet manufactured has cost the country no less than the amazing sum of 2000*l.* Unfortunately, too, the large guns have never yet stood the tests required by the Service successfully. Up to the present moment the naval authorities refuse to receive a single Armstrong gun above the 25-pounder for use in Her Majesty's ships. — *Mechanics' Magazine.*

CANTERBURY SOLDIERS' INSTITUTE.—The second annual meeting took place at Canterbury on Inkerman Day, Major Tomkinson in the chair, when it appeared that the success of the institution may now be considered as consolidated. For this the honorary secretary, the Rev. H. P. Wright, deserves a very great deal of credit, not merely for the zeal which he has devoted to it, but the good sense and sound discrimination he has brought to bear upon the institute. The Canterbury is the only undertaking of the kind that we believe has been successful, and the reason we will give in Mr. Wright's own words at the meeting on Monday:—"Why has this Canterbury Soldiers' Club been so successful, when, in so many other garrison towns, institutes for the benefit of the soldier have either utterly failed, or are now fast dwindling to decay? The reason I consider clear. Those who conducted them were men of heart, desirous of the soldiers' well-doing; but they were not men of sound common sense—they could not discriminate between a club and a church. Nothing is more important for the soldier than proper nourishment for his soul. That soul must be regularly fed with wholesome food, by means of classes for Bible instruction, and gatherings for prayer; but such spiritual sustenance must be supplied not in the Soldiers' Institute, but in the school-room and the house of God, or in some place secured especially for religious teaching. The committee of the Canterbury Soldiers' Institute has always kept it to its own work—that of providing the soldier tired of barrack duty with a retreat, in which he might find recreation for mind and body, and so be kept from those vices of the low public-house, which drag down and defile the soul. The committee knew full well that, were Bible teaching and prayer meetings permitted, an element of destruction would be introduced which would soon destroy the good a well-directed Home was so calculated to produce; and they, therefore, kept steadily to one line, and have gone on with marked success. I know full well, and those who hear me know, how all-important is religious training; but, to carry the matter home to all present, I will ask, what would be thought of the man who should propose for the "United Service Club," the "Athenæum," or any London Club whatever that it should have its Bible classes and prayer meetings weekly, for the benefit of the members? The universal answer of those members would be—the service of God is most necessary, but everything in its proper place; let it be done decently, and in order. I feel that this is not the view of the work of Soldiers' Institutes which earnest but mistaken enthusiasm would take; but I am convinced that it is the work for which alone they are calculated; and further, I feel sure that if the committee will go on steadily acting upon the principle that an institute is a club, and not a place for prayer meetings, the cause of true religion will be largely upheld, and the garrison of Canterbury will long possess a flourishing home for the amusement and recreation of the tired soldier.

The Army Gazette.

WAR OFFICE, PALL MALL, NOVEMBER 6.

7th Regiment of Dragoon Guards—Captain Jacob Carmac Murphy, from 3d Light Dragoons, to be Captain, vice James Vance Cleland, who exchanges; Lieutenant Robert Bury, from 9th Light Dragoons, to be Lieutenant, vice Robert Stewart Cleland, who exchanges.

3d Light Dragoons—Captain James Vance Cleland, from the 7th Dragoon Guards, to be Captain, vice Jacob Camac Murphy, who exchanges.

7th Light Dragoons—Cornet Arthur Jones, from 6th Dragoon Guards, to be Cornet, vice Farquharson, whose appointment has been cancelled.

9th Light Dragoons—Lieutenant Robert Stewart Cleland, from 7th Dragoon Guards, to be Lieutenant, vice Robert Bury, who exchanges.

12th Light Dragoons—Lieutenant Alexander Fletcher, to be Captain, by purchase, vice Henry Elmhirst Reader, who retires; Cornet Arthur L'Estrange Hamilton Holmes, to be Lieutenant, by purchase, vice Fletcher.

2d Regiment of Foot—Lieutenant John Croome, to be Captain, without purchase, vice William Webber Martin, deceased; Ensign Claude Scott Stewart Pinkerton, to be Lieutenant, without purchase, vice Croome.

8th Foot—Ensign Jeremy Peyton Jones, to be Lieutenant, by purchase, vice Robert Yallop Stokes, who retires.

11th Foot—Ensign Vyvyan Williams, to be Lieutenant, by purchase, vice Stuart James Shortt, who retires.

13th Foot—Ensign Richard Hare Home, to be Lieutenant, by purchase, vice Bond, promoted to an unattached Company, by purchase.

14th Foot—Ensign Henry Swanson, from 40th Foot, to be Ensign, vice Butler, promoted.

15th Foot—Lieutenant Richard Lewes Dashwood, to be Captain, by purchase, vice Augustus Frederick Warburton, who retires; Ensign George Onslow Churchill, to be Lieutenant, by purchase, vice Dashwood.

22d Foot—Captain Edward Simeon Webber Smith, to be Major, without purchase, vice Henry Draper Neville, deceased; Captain James John Dudgeon, from 80th foot, to be Captain, vice Charles Tucker, who exchanges; Lieutenant Robert Conway Dobbs Ellis, to be Captain, without purchase, vice Smith.

23d Foot—Captain Charles Hewett, from half-pay unattached to be Captain, vice Brevet Lieut.-Colonel Charles Spalding S. Evans Gordon, promoted, without purchase, to an unattached Majority.

25th Foot—Captain Thomas Edwin Blomfield, to be Major, by purchase, vice Mawdistly Gaussen Best, who retires; Lieutenant Horatio Bland, to be Captain, by purchase, vice Blomfield; Ensign Alexander Bain Chisholm, to be Lieutenant, by purchase, vice Bland.

31st Foot.—Lieutenant Frederick Young Cassidy, to be Captain, without purchase, vice Alexander Edgar McGregor, deceased; Ensign William Edward Tibbetts, to be Lieutenant, without purchase, vice Cassidy.

45th Foot—Lieutenant Edward Gambier Eliot Atherley, to be Captain, without purchase, vice Captain and Brevet Lieut.-Colonel Henry Downe Griffith, who retires upon full pay; Ensign James Hett Tennant, to be Lieutenant, without purchase, vice Atherley.

55th Foot—John Eastlake Lee, Gent., to be Ensign, by purchase, vice FitzGerald, promoted.

60th Foot—The second Christian name of Ensign Keith is Blaikie, not "Blakie," as stated in the *Gazette* of the 12th ult.

70th Foot—Ensign Charles Hamilton Prior, to be Lieutenant, without purchase, vice Charles William Quin, deceased.

76th Foot—George Douglas Cookson, Gent., to be Ensign, by purchase, vice Pusey, promoted.

80th Foot—Captain Charles Tucker, from 22d Foot, to be Captain, vice James John Dudgeon, who exchanges.

95th Foot—Ensign Robert Anderson, to be Lieutenant, by purchase, vice Knipe, whose promotion by purchase on the 22d of June has been cancelled.

2d West India Regiment—Ensign Sidney Watkin Williams, to be Lieutenant, without purchase, vice Charles Bury Cradock, deceased; George Hibbert Anchitel Kinloch, Gent., to be Ensign, without purchase, vice Williams.

STAFF.

Lieut.-Colonel and Brevet-Colonel the Honourable Percy Egerton Herbert, C.B., from the 82d Foot, to be Deputy-Quartermaster-General at head-quarters, vice Lieut.-Colonel and Brevet-Colonel the Honourable Alexander Gordon, C.B., half-pay unattached, whose period of service in that appointment has expired.

BREVET.

Major and Brevet-Colonel John Garvoch, half-pay unattached, to have the temporary rank of Brigadier-General, while in command of a brigade.

Lieutenant-Colonel George Erskine, half-pay unattached, Deputy Inspector of Volunteers, having, on the 8th of August, 1860, completed the qualifying service for the rank of Colonel, under the 8th and 10th clauses of the Royal Warrant of the 14th of October, 1858, to be Colonel in the army.

Captain and Brevet Lieut.-Colonel Henry Downe Griffith, retired full pay, 45th Foot, to have the honorary rank of Colonel in the army.

Captain and Brevet Lieut.-Colonel William Garstin, retired full pay, late Staff-Officer of Pensioners, to have the honorary rank of Colonel in the army.

Captain William Gray, 1st Bombay European Fusiliers, to be Major in the army.

A. S. Fraser, Esq., to have the local rank of Major in the army while employed in Syria.

Surgeon-Major Alexander Gibson, of the Bombay Medical Establishment, retired upon full pay, to have the honorary rank of Deputy-Inspector-General of Hospitals.

The following promotions to take place in Her Majesty's Indian Military Forces consequent on the death of General John Carfrae, Madras Infantry, on the 29th of August, 1860; and of Major-General Sir Henry Gee Roberts, K.C.B., Bombay Infantry, on the 6th of October, 1860:—

Lieut.-General George Benjamin Brooks, Bombay Infantry, to be General.

Major-General John Wheeler Cleveland, Madras Infantry, to be Lieut.-General.

Colonel James Fitzgerald, Madras Infantry, to be Major-General.

Colonel Clement Clemons, Madras Infantry, to be Major-General.

The undermentioned officers of Her Majesty's Indian Military Forces, retired upon full pay, to have a step of honorary rank as follows:—

Colonel John Skardon Ramsay, Bombay Infantry, to be Major-General.

Lieut.-Colonel Norman Chester Macleod, Bengal Engineers, to be Colonel.

Lieut.-Colonel Philip Lewis Hart, Bombay Engineers, to be Colonel.

Major Henry William Preedy, Bombay Infantry, to be Lieutenant-Colonel.

Major Charles Henry Winfield, Madras Infantry, to be Lieutenant-Colonel.

Captain James Edward Taylor, Bombay Infantry, to be Major.

Memorandum—The exchange between Captains Douglas Ernest Manners, 10th Foot, and William Cooke O'Shaughnessy, 2nd West India Regiment, which appeared in the *Gazette* of the 24th of August, 1860, has been cancelled.

WAR-OFFICE, Nov. 8, 1860.

The Queen has been graciously pleased to signify her intention to confer the decoration of the Victoria Cross on the under-mentioned Officers and Soldier of Her Majesty's Army, whose claims to the same have been submitted for Her Majesty's approval, on account of acts of bravery performed by them in India, as recorded against their names; viz.:—7th Hussars (now of the 11th Hussars),—Major Charles Cranfurd Fraser, for conspicuous and cool gallantry on the 31st December, 1858, in having volunteered, at great personal risk, and under a sharp fire of musketry, to swim to the rescue of Captain Stisted, and some men of the 7th Hussars, who were in imminent danger of being drowned in the river Raptee, while in pursuit of the rebels. Major Fraser succeeded in this gallant service, although at the time partially disabled, not having recovered from a severe wound received while leading a squadron in a charge against some fanatics, in the action of Nawabgunge, on the 13th June, 1858.

78th Regiment—Surgeon Joseph Jee, C.B., for most conspicuous gallantry and important services, on the entry of the late Major-General Havelock's relieving force into Lucknow, on the 25th September, 1857, in having during action (when the 78th Highlanders, then in possession of the Char Bagh, captured two 9-pounders at the point of the bayonet), by great exertion and devoted exposure, attended to the large number of men wounded in the charge, whom he succeeded in getting removed on cots and the backs of their comrades, until he had collected the Dooly bearers who had fled. Subsequently, on the same day, in endeavouring to reach the Residency with the wounded men, Surgeon Jee became besieged by an overwhelming force in the Mote-Mehal, where he remained during the whole night and following morning, voluntarily and repeatedly exposing himself to a heavy fire in proceeding to dress the wounded men who fell while serving a 24-pounder in a most exposed situation. He eventually succeeded in taking many of the wounded, through a cross fire of ordnance and musketry, safely into the Residency, by the river-bank, although repeatedly warned not to make the perilous attempt.

93rd Regiment (late).—Colour-Sergeant James Munro, for devoted gallantry, at Secunderabagh, on the 16th November, 1857, in having promptly rushed to the rescue of Captain E. Walsh, of the same corps, when wounded, and in danger of his life, whom he carried to a place of comparative safety, to which place the Sergeant was brought in, very shortly afterwards, badly wounded.

WAR OFFICE, Nov. 9, 1860.

The Queen has been graciously pleased to give orders for the appointment of Lieutenant-General Sir James Hope Grant, K.C.B., commanding Her Majesty's Military Forces in China, to be an Ordinary Member of the Military Division of the First Class, or Knights Grand Cross, of the Most Honourable Order of the Bath.

Her Majesty has also been graciously pleased to give orders for the appointment of Vice-Admiral James Hope, C.B., Commander-in-Chief of Her Majesty's Naval Forces in the East Indies and China, to be an Ordinary Member of the Military Division of the Second Class, or Knights Commanders, of the said Most Honourable Order.

[ADVERTISEMENT.]—BAND OF THE ROYAL HORSE GUARDS.—We understand that a vacancy for a good CLARINET PLAYER will shortly occur in the above distinguished regiment. Candidates are requested to apply personally at Messrs. BOOSEY & SONS, 24, Holles Street, London, W., from eleven to four.

[ADVERTISEMENT.]—THE NEW FRENCH TARIFF.—It has puzzled some people to find out how the French attained so good a knowledge of the names of the multitudinous articles specified at such length in their tariff. We, ourselves, believe that for this purpose they have for some time had agents inspecting the stocks of the leading manufacturers in this country. Where, for example, could better information have been obtained than from an examination of the varied and extensive assortment of cutlery and electro-silver plate, which is to be found at Messrs. Mappin Brothers' only London Establishment, King William Street, London Bridge, E.C. (Cutlers to the Emperor, &c.), where almost every article in cutlery and electro-plate may be met with, at prices so moderate that our continental neighbours must indeed have been astonished.

INTELLIGENCE FROM THE SEAT OF WAR IN ITALY.

[From our own Correspondent.]

Naples, 3rd November.—News reached this city last night of the surrender of Capua, and as it was known that a flag of truce had been hoisted on the forts after a bombardment, that lasted from 4 p.m. on the 1st until 6 a.m. on the 2nd inst., the intelligence of the fortress having capitulated had every probability in its favour, and as no contradiction of the first intelligence arrived, illuminations, fireworks, &c., were the order of the night. The particulars of the Capua news are not yet known with any certainty; and even were it not so, the "order of their going" requires a notice of other events that have occurred antecedent to it. Amongst these are the arrival of the King of Sardinia at Santa Maria; of his having encountered the enemy by the way, and been victorious; and of his having had a most satisfactory meeting with the Dictator; all of which intelligence reached this too late for my last letter. Under these circumstances your readers may be prepared for a letter rather longer than usual, without which it were impossible to even allude to the subjects of which I have taken notes during the week. And now to rush at once *in medias res*—Victor Emmanuel on the 26th ult., at the head of the 4th corpo d'armata, left Teano, and, on reaching San Giuliano, encountered the Neapolitans in position on the heights, and after sustaining a musketry fire of two hours' duration, forced them to retire on Garigliano, leaving many prisoners in the hands of the Sardinians. The loss of the latter was very slight. The meeting between the Re Galantuomo and the Dittatore is thus described in the Naples journals:—"The meeting between the King and the Dictator was such as a meeting should be between a Victor Emmanuel and a Garibaldi; these two miraculous Italians comprehended each other at a glance, and Garibaldi, uncovering his head, spoke first, saying, 'Salute al Re d'Italia;' and Victor Emmanuel, stretching forth his hand to the hero of Varese and Palermo, replied, 'Salute al migliore Dei, mei amici!'" Here then, assuredly, was plain speaking enough. When we have Garibaldi, notwithstanding all the croaking of some, and the hasty condemnation of others, exhibiting himself true in his loyalty, and sincere in his attachment to his royal master, whom he salutes as King of Italy, and is, in return, himself addressed by Victor Emmanuel as "the best of his friends," one would suppose that all talk of disloyalty on the part of Garibaldi, or the no less irritating insinuation that he had lost his judgment, or that too much popularity had turned his head, will henceforth be heard no more. And it would look better if those who have of late been "keening" over the death of Garibaldi's fame, would at once acknowledge their mistake, instead of tamely endeavouring to get out of the fix by saying, that "if his head was not turned, it was very nearly so;" or, that "although they never doubted Garibaldi's personal courage or loyalty, yet that they feared the simple-minded soldier would have become the dupe and tool of designing men;" and then summing up with a sorrowing shake of the head, regretted that he had not retired in the zenith of his glory. Well, the fact of the matter is, that the newspapers were wrong on this phase of the Italian question, and the sooner it is earnestly admitted the better. Garibaldi, meanwhile, has pursued the same simple, dignified course as before, satisfied of his own single-mindedness, sincerity of purpose, and unswerving rectitude. To fully appreciate, or even to understand the character of Garibaldi, one must have seen him under varied circumstances—bivouacking at the head of an irregular, and by no means imposing force, sharing their short commons and hardships, and all the while setting an example of endurance and fortitude to all. Again, in the field of battle almost ubiquitous: whilst in the front he is invaluable as a leader, yet, should any one point elsewhere become suddenly weaker than the others, Garibaldi might be seen to have discovered it in an instant, and, galloping thitherward on his splendid charger, his sword glancing as he waved it on high, a signal to the bravest spirits to follow, he soon became the guiding-star, and the nucleus of a reserve was thus suddenly formed and brought up, and the wavering point supported. A third scene will present the victorious general as Dictator, easy of access to all, deciding political questions of the utmost moment, holding interviews with foreign ministers and representatives, the glorious red shirt being his only robe of office. Garibaldi visiting the sick and wounded in hospital, reviewing troops, addressing a multitude from a balcony, as well as Garibaldi in private life, all, or at least nearly all, these must be seen before a just estimate of the man can be formed, and, once formed, it will remain despite of all the unfavourable criticism from time to time made upon his motives or conduct. It need be no matter of surprise that I write thus strongly on the subject of Garibaldi's marvellous combination of good qualities. To have watched him from the first—to have seen him at Palermo—to have observed him from his entry into Naples until now—render it impossible not to be enthusiastic in his praise. He possesses wondrous power of attaching old and young to him; and, what is stranger still, even his enemies cannot seize upon any weak point in his character as a "set-off" against his shining abilities. To resume, however, the order of events:—A large body of Garibaldians, including the British volunteers, and numbering 7000 men, crossed the river Volturno, and met the army of Cialdini, and have since returned. What the object of this movement was, I cannot say; but those interested in the national struggle will be sorry to learn that in crossing the river General Bixio had his leg broken. Cialdini meanwhile has not been idle, and in the course of his advance at the head of 8000 men, reached a village named Bellona, situated on the right bank of the Volturno, and the slope of Mont Pioppitella, north-east of Capua. Bellona had been for some days previously occupied by the Bourbon troops, and after suffering a series of atrocities at their hands, has at length been delivered. Cialdini encountered the Bourbon army, 23,000 strong, commanded by General Barbalunga, at a place between Cascano and Sessa, about 3 p.m. The troops immediately disposed themselves in order of battle, and a sharp contest ensued. The result, as usual, was against the Neapolitans, who were routed, put to flight, and dispersed in all directions, leaving prisoners, cannon, waggons, and munitions of war in the possession of their enemies. Of this victory news reached Naples long before any detailed account at all reliable was attainable. The Calabrese and some Piedmontese troops have now relieved the English at the advance posts, so that the volunteers have gone into barracks, of which more anon. As the outposts are so near to Capua, it is no cause of surprise that sorties are frequently made from that fortress upon them. One of these occurred on the morning of the 27th ult., at 2 a.m., which proved at first successful, and the Calabrese were dislodged after a brave resistance, giving way only through disparity of numbers; but at 7 a.m., however, from being attacked and defeated, became the assailants, and recovered the position they had forfeited, pursuing the Bourbon troops up to the entrance of their own trenches. The loss on Garibaldi's side was small; the Neapolitans left several of their number dead on the field. News from Porta di Capua makes known that Capua was summoned to surrender by the King elect, on the 28th ult., and returned an answer in the negative. Later on the same day the Bourbons showed a flag of truce, and a "parlamento" of half an hour's duration ensued, but its subject and result have not as yet been made public. The King of Sardinia has lately been in the neighbourhood of Caserta and Santa Maria, and was reported to have been seen at S. Angelo yesterday; it is said he will not enter Naples until after the declaration of the result of the public vote taken on the 21st, and of which the returns have not as yet been received from all parts of the kingdom. Meanwhile the preparations for the reception of Victor Emmanuel are progressing rapidly, and a state carriage is already prepared. Triumphal arches are springing up along the whole line of the way by which the royal cortège is to proceed, and a regular programme is already published of its destined course. The carpenters, scene-painters, and decorators of Naples are all busily employed in removing the coats of arms of the Bourbons, and replacing them by the less elaborate crosses of Savoy. There is no doubt, owing to the long preparation, as well as national taste for processions and festas, the illumination awaiting the King will be a very magnificent one.

The 6th inst., the day named for the public declaration of the result of the popular vote, having been changed to the 3rd, this day, the King's arrival will in all probability be earlier than was expected. The National Guards are now mustering in great force in the Largo di Francesco di Paolo,—which English people would call the Palace Square—and as a large platform ornamented with tricolor drapery, flags, &c., has been erected, the result of the popular voice will in all probability be declared before post-time, and should such be the case I shall send it herewith. Meanwhile, as Victor Emmanuel may arrive at any moment, the ladies of Naples have been preparing a grand gift of some sort for the King elect. The élite of Naples have been busily collecting money for this purpose, and of 39 of their number named as collectors there are no less than 4 princesses, 4 duchesses, 3 marchionesses, 2 baronesses, 1 countess, &c., so there is every probability of the gift being one worthy of the fair donors as well as of the Royal recipient. A most imposing and interesting ceremony—the presentation of colours to the newly raised Hungarian Legion—took place, as was publicly advertised, in the Palace Square, on Wednesday last. The National Guards were present and drawn up in line. The Giribaldians were on the right, and the Hungarians, cavalay and infantry, on the left. In the centre of the square a large altar had been previously erected, on which Padre Pantales (Garibaldi's Chaplain and attached follower) celebrated mass, blessed the colours, and delivered them to the Dictator, who then presented them, amidst loud and prolonged applause, to the two corps of volunteers. This done, Garibaldi entered the Palazo della Foresteria, and appearing immediately afterwards upon one of the balconies, delivered to the assembled multitude an address, of which the following is the substance:

"Neapolitan people, this is one of the most glorious days that the most charming and generous metropolis of Italy will have to remember; because, to day the alliance of two nations sanctifies itself. And as the Hungarians have aided the Italians, the Italians must by federal compact bind themselves to aid the Hungarians. Many things have been done, but great things still remain to be accomplished. And serious obstacles remain as yet to be overcome. Our adverse principle is egoism, which masks itself under a thousand different forms. And to indicate our greatest enemy we must agree that the Pope of to-day (as he is now) is that very one. I speak to a people rich in lofty intelligences, and that can conscientiously diffuse a necessary instruction amongst the masses, in order that they may understand the distinction between the spiritual and the temporal. Every one knows that Jesus Christ came on earth to redeem the world from the slavery of the devil, and from every slavery; so that Christianity represents the principles of the regeneration of the people, and whoever labours for this purpose is the true follower of Christ. Then wo are true Christians; and the Pope, who promotes slavery and forms coalition with the most cruel despots, puts himself in contrast with Christ. The principle of good is represented by us. We are true Christians, true followers of the religion of love and liberty. We shall persevere in the holy work, and shall always say 'Viva l'Italia, viva il Re Vittorio Emmanuele, Viva Gesu Cristo, Viva la Redenzione Cristiana.'" The above is as near as translation can go to give the spirit and purport of a speech, which was frequently interrupted by the cheering of the masses assembled, and at its close the cheering was loud and continued. Now, touching the British volunteers, as I suppose many of your readers are directly or indirectly interested in their welfare, I shall give them a place in this. And first of all concerning Captain Styles; if ever there was a case in which *audi alteram partem* might with the greatest aptness be applied, it seems it is that of the gallant captain, who has been exonerated by the decision of a court of inquiry from all blame or even imputation, and been replaced in his former position in the corps, that of captain, the title of Major being nominal. It is only justice to a man whose name has been so much before the public to say that he is very popular both with officers and men; and some of the former have assured me that, although prepossessed against him at the first, they have since altered that opinion for one of the most favourable nature. Having thus done justice to one who it seems was blamed for the faults and dishonesty of others, I must next contradict the report of Captain Dixon's death; and how it came to be reported remains a riddle. My authority for mentioning it as a report was that I was told it was true by at least three English officers, not of the volunteers, and afterwards heard it from an Englishman resident in Naples; and to banish all doubt, the Neapolitan newspapers all published the name of Captain Dixon in full, as being the other officer who with Mr. Tucker was killed on the day in question. How to account for all this otherwise than by supposing it true, would not occur to anyone; and yet the possibility of its being a mistake caused me to mention it as reported, rather than positively true. The result shows I was right, as the gallant captain is alive and well, and can no more account for the universality of the report of his death than I can. As for poor Tucker, there is no doubt about his fate; his grave may be seen in the garden of the farm-house which the British occupied as outpost. The splendid palace at Caserta is now used as a barracks for the volunteers as well as for the Sardinian troops, and they have all room enough. It would not be reporting the real state of the case were I to represent the British volunteers as contented and happy; such is far from the fact. Much discontent, grumbling, and even desertion—or at least joining other corps without consent—have taken place; and in order to understand the whole question, the reader must carefully consider the following account of the original formation of the corps, and a description of its component elements may throw some light, not only upon the cause of its present condition, but of its probable future, and I do not write unadvisedly. The British Volunteers were composed of many noble and chivalrous spirits, as well amongst the men as the officers. But amongst the men there were, and unfortunately still are, many who were glad to leave London at any price, and having never served as soldiers before, are not inclined to do so now, nor—if they can prevent it—to allow others to do so. The characters to which I allude are men who make a hardship of everything, and grumble and express discontent not only where cause exists, but where cause there is none. The hardships of the Volunteers have, I admit, been great, but certainly not so great as those endured by the Garibaldians in Calabria. On the march in Calabria the usual fare was cheese and vinegar, not always accompanied with bread; meat at the first was out of the question, inasmuch as the peasants were afraid of the Bourbon wrath, if they sold cattle to his enemies. In progress of events the fare was better, but even under the most favourable circumstances it was of the very roughest, until the arrival of the Garibaldians in Naples, when, through the hospitality of the inhabitants, they had food and beds provided for them. The British volunteers have been since they landed, one whole day and a half, not without food, but without meat! and during that time they had biscuit enough. Now, if they are not able to sustain a hardship like this occasionally, for what purpose or with what expectations did they come out here? An officer of the corps told me that a man to whom he gave half-a-crown in pity, caused by the melancholy story of privation he told him, he has since remarked as the most discontented should a delay of half-an-hour—sometimes, in a war like the Italian one, unavoidable—occur. Five men of the British volunteers have been sentenced to three years' imprisonment by a military tribunal for theft; and if they had been Italians, they would to a certainty have been shot instead. One officer who left the corps has since been sentenced to two months' military arrest for attempting to induce men to desert or go over to other corps. It may occur to those who read this that there can be very little inducement to the men, if discontented with the corps they are in, to go to another; but the difficulty is of very easy solution, as will appear when they learn that there are Englishmen here desirous of obtaining a command, which they would obtain if they could get a certain number of men to obey them. Englishmen they must be of necessity, inasmuch as the would-be officers, through ignorance of the Italian language, could not command Italians; and hence an Englishman commands his price in the market, which is about 4*l.* bounty, and the promise of 16 dollars, 3*l.* 4*s.* a month; the consequence is, many have left the corps they belong to, and some of them were no great loss. Thus far I have given you, as far as I can learn from good authority, the real state of affairs, and now I shall urge all I can in defence of what has occurred. And first of all, there is nothing like discipline! They are all volunteers, and Jack is as good as his master. The only control that an officer can exercise over his men is *moral* control. There is no internal tribunal, no internal power of enforcing obedience or punishment, and in case of grave offences, the offenders are handed over to the Sardinian authorities and not tried by their own officers. How it will end I cannot take upon myself to say, but, however it terminates, I must in justice say that the men are not altogether to blame, as there are amongst them as brave fellows as ever trod a foreign soil, and many of them till lately had to tread it almost with naked feet. The officers, as far as I can observe, are fine hearted, dashing fellows, and since the appointment of Major Smelt, late 20th regiment, something like military order has begun to appear; were there a few more like him the corps would be saved from falling to pieces, or being sent home, either of which results might be its final fate. Now from all this it will be evident not only to your experience, but to that of many a military reader, that there must be some radical wrong at the bottom, the cause of all I have described, which being a *cause* and not an *effect* I do not consider it my province to determine. Whilst I write this the guns are booming away from all the forts of Naples announcing that the vote will soon be declared; and meanwhile I shall add a word or two on the subject of Capua, gathered from the flying leaves sold in the streets. The first contains a telegraphic message from Major-General Milvitz to General Türr in Naples, dated 2nd Nov. 4·30 p.m., Santa Maria. "I at this moment put in order the troops which are to occupy Capua, which has capitulated." The troops agreed to a surrender without honours of war, officers and men to go out en masse, depositing their arms within the gates. The vote has not yet, 12.30 been declared, and as there is but another hour till the mail closes, I shall, if possible, enclose the vote herewith, but cannot promise certainly.

The result of the national vote has just been declared by the Signor Niuta, first judge of the Supreme Court of Justice; after a speech of half-an-hour's length, during which I suppose he declared the relative proportion of 'Si's' and 'No's,' but which I was not near enough to hear; he con-

Digitized by Google

cluded by declaring that the nation willed Italy to be one and indivisible under the constitutional sceptre of Victor Emmanuel and his legitimate descendants. During this declaration all the members of the Supreme Court of Justice who were present stood up and uncovered their heads, whilst the vast multitudes thronging the Palace Square rent the air with loud vivas for Italy, for Victor Emmanuel, and for Garibaldi.

QUARTERMASTERS OF THE ARMY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In forwarding for your consideration the following remarks, I venture to hope that you will give them the powerful aid of your editorial influence, with a view to some improvement being made in both the pay and position of the quartermasters of the Army; as no one who is at all acquainted with their varied and responsible duties cannot but confess that they are, without exception, the most hardly used and neglected officers in the Army.

The medical officers, veterinary surgeons, paymasters, chaplains, and commissariat officers, have all received substantial additions and improvements to their pay and position; but the quartermasters have not even been mentioned.

On first appointment the quartermasters have the relative rank of subalterns, and by the existing regulations they must remain during their whole period of service as quartermasters in the enjoyment of the same rank; after a total period of thirty years' service they may retire with a half pay of 10*s.* per diem, and the honorary rank of captain. I forgot to mention that they must be ten years quartermaster before they can claim retirement.

If the quartermasters were allowed progressive rank, similar to that of the adjutant, and with the same amount of additional pay for performing the duties of quartermaster, it would be considered a great boon and a just appreciation of their services and position. I am quite confident that the bulk of the officers of the Army would be highly pleased with the arrangement, as it would not interfere to any great extent with their promotion; as the quartermaster, whatever rank he held, be it that of ensign or major, would be supernumerary of his rank, and always performing the duties of quartermaster.

As things are at present the quartermaster is shut out from all promotion—nothing but a dreary, monotonous prospect before him. A quartermaster once, a quartermaster always, with a slight addition to his miserable pay after five and ten years' service, and no additional rank. If a man is found useful as a quartermaster, why deny him encouragement of some description or another?

The only grade open for their promotion is that of paymaster, but fortunate is the man who succeeds in obtaining this much coveted berth, now that political interest and War Office favouritism succeeds in obtaining the appointment for either a civilian paymaster from the militia, or a clerk from the War Department, or some army agent's office, to the detriment of many clever and deserving quartermasters, who have to suffer the additional hardship and humiliation of seeing these gents join their regiment, taking a prior choice of quarters, and enjoying a superior rank, without having any claim to, or services for them, except the fact of their good fortune in having the influence to obtain it. These appointments cause great dissatisfaction to the quartermasters of the Army generally, more especially to those who have served many years, and naturally expect some time or another to obtain promotion.

Most quartermasters are perfectly qualified to perform the duties of paymaster even as it is; if the clothing, necessaries, arms, accoutrements, ammunition, and great-coats, for which he is responsible, were converted into money value, they would be responsible for a much greater amount than any paymaster. Their accounts and books are also numerous and intricate, and are becoming more so daily under the new organisation of departments at War Office; and if the authorities are determined to carry out their present unfair system of filling vacancies for paymasterships, it would be well that they would publish it as a general rule, besides saving them the worry and annoyance of the numerous applications made by quartermasters for the appointment, and settle the matter finally by putting quartermasters and paymasters on the same footing in every respect.

If the propositions of giving progressive rank, or putting them in the same position as paymasters, are considered out of place, the following improved scale of pay and relative rank might be adopted: by the first scheme the quartermaster would participate in whatever promotion took place in his own regiment; by the second, and following, the quartermaster would reap the advantage of his length of service, viz.:—On appointment to rank as subaltern, with a pay of 8*s.* 6*d.* per diem; after five years' service to rank as captain, and 10*s.* 6*d.* per diem.; after ten years' service, 12*s.* 6*d.* per diem.; after fifteen years' service, 15*s.* per diem., and rank of major; after twenty years' service, 17*s.* 6*d.* per diem. To retire, after a total service of thirty years in all ranks, at a half-pay of 15*s.* per diem. This scheme would give a sufficient amount of pay, and a respectable position while serving.

I must now bring my lengthy epistle to a conclusion, with a hope that my arguments and statements may be perfectly understood as a fair explanation of the claims of the quartermasters to some improvement to their pay and position. I need not descant on their labour, zeal, and utility to the well-being of a regiment; they are well known to all military men.—I am, &c. LITTLE ENGLAND.

PENSIONS TO WOUNDED OFFICERS.

The following is a copy of the Royal Warrant on the subject of pensions and allowances to officers:—

VICTORIA R.—Whereas it has been found expedient to revise the regulations under which pensions and allowances are granted to officers of our land forces on account of wounds received in action; and whereas we were pleased to issue a Warrant under our royal sign manual, dated the 13th of June, 1857; our will and pleasure now is that our said Royal Warrant of the 13th June, 1857, shall from henceforth be cancelled; and that this, our Royal Warrant, to be administered and interpreted by our Secretary of State for War, be the sole and standing authority upon the matters herein contained.

Given at our Court of St. James this 27th day of October 1860, in the 24th year of our reign.—By Her Majesty's command. S. HERBERT.

"PENSIONS AND GRATUITIES TO OFFICERS OF THE LAND FORCES, LIMITED TO WOUNDS AND INJURIES RECEIVED IN ACTION.

"1. If an officer shall receive a wound in action which shall occasion the loss of an eye or a limb; or shall lose thereby the total use of a limb; or shall receive bodily injury equal or nearly equal in its consequences to the loss of a limb, he may receive a gratuity in money of one year's full pay of the regimental rank or staff appointment held by him at the time he was wounded, for the loss of such eye, or limb, or for such injury.

"2. If an officer shall be wounded in action, and it shall be reported by a board of army medical officers assembled by order of the Secretary of State for War for the personal examination of such officer, that he has, in consequence of his wound, lost a limb, or an eye, he may be recommended to Her Majesty for a pension, at the rate fixed in the annexed scale for the rank held by him when he was wounded, and commencing one year after the wound was received.

"3. If the officer shall have lost more than one limb or eye, he may be recommended for a pension for each limb or for each eye so lost in action.

"4. If the wound received by an officer in action shall be so severe in its permanent effects as to be fully equal, or nearly equal to the loss of a limb, and the injury shall be so reported by the military medical board, he may be recommended to Her Majesty for a temporary pension, the continuance of which shall depend upon subsequent examinations before a military medical board.

"5. If any wound received in action shall be certified to be severe and dangerous, but in its permanent effects not nearly equal to the loss of a limb, the officer receiving such wound may receive a gratuity, varying according to the nature of the case, from three to twelve months' full pay of the regimental rank or staff appointment held by him at the time he was wounded.

"6. If an officer shall have held a pension for a wound received in action for a term of five years, and shall have been examined twice at the least before a board of Army medical officers, he may be recommended for the permanent continuance of such pension; but if the officer, before the expiration of the term of five years, shall have so far recovered that his wound or injury is not equal, nor nearly equal, to the loss of a limb, then he shall cease to receive such pension.

"7. If within the period of five years after a wound has been received an officer shall not apply for the pension, or on his so applying for it, the wound shall not have been proved to be permanently equal, or nearly equal to the loss of a limb, such officer's claim to a pension for such wound shall not at any subsequent period be entertained.

"8. No gratuity for any wound shall be granted after the lapse of five years from the time the wound was received.

"9. No pension for the loss of an eye from a wound received in action shall be granted unless the actual loss of vision shall have occurred within five years after the wound was received, and be solely attributable to such wound.

"10. As a general rule, the pension or gratuity shall be granted according to regimental rank; but in cases in which officers, with or without brevet rank, shall have been employed at the time they were wounded, in discharge of duties superior to those attached to their regimental commissions, the gratuities and pensions may be given in accordance with such duties.

"11. These pensions may be held together with any other pay and allowance to which an officer may be entitled, without any deduction on account thereof, and may continue to be held, should the officer leave the Service.

"12. Officers who are still suffering from wounds received since the 28th March, 1854, the date of the declaration of war with Russia, should such wounds be certified by a military medical board to be now equal or nearly equal to the loss of a limb, may receive pensions from the present time according to the provisions of this Warrant.

"RANKS.

"Field-Marshal, General, or Lieutenant-General commanding-in-chief at the time, to be specially considered.

"Lieutenant-General, 400*l.*

"Major-General, and officers holding equivalent relative rank, 350*l.*

"Colonel, and officers holding equivalent relative rank, 300*l.*

"Major commanding, 250*l.*

"Major, and officers holding equivalent relative rank, 200*l.*

"Captain, and officers holding equivalent relative rank, 100*l.*

"Lieutenant, and officers holding equivalent relative rank, 70*l.*

"Cornet, and officers holding equivalent relative rank, 50*l.*"

Something like a correct account of the interference of the French admiral with the Piedmontese squadron near Gaeta is given by the *Toulonnais*. On the 27th ult., that journal informs us, a small Piedmontese squadron of six sail attempted to effect a landing, but were compelled to sheer off by the command of Admiral Tinan. On the 30th Admiral Persano himself arrived off the same spot with ten men-of-war, and although a French squadron was sent to order him off he refused, and informed the French admiral that he was ordered to land troops at the mouth of the Garigliano, and would do so at all cost. On this the French admiral sent home for further instructions, and Admiral Persano, we presume, landed those troops who so successfully attacked the Bourbon flank in the late action on the Garigliano.

On Thursday the Royal Commissioners of Fortifications arrived at Chatham by the first train from London, and embarked at the Strood pier on board the paddle-wheel steamer Fearless, tender to the Cumberland, 70, which had been especially placed at the service of the Commissioners by Admiral Hope Johnstone, Commander-in-Chief at the Nore. The Fearless proceeded at once down the river to Shoeburyness, where the Commissioners landed, and were engaged for some time in the inspection of the works of defence recently erected in that locality, and after transacting some other business returned to Chatham in the afternoon.

THE NAVY.

ADMIRALTY, NOVEMBER 7.

APPOINTMENTS.

Captain—G. Keane to the Charybdis, vice Parker, whose appointment is cancelled.

Lieutenants—H. C. Burleigh to the Charybdis; James Grant to the Desperate; H. J. F. Campbell (additional) to the Marlborough.

Masters—Henry W. Inglis to the Icarus; Thomas H. Fraser to the Mersey.

Surgeon—David Ramsay, M.D., to the Gorgon.

Paymaster—G. F. Norman to the Dasher.

Assistant-Surgeon—Henry Rickard (acting) to the Charybdis.

Cadet—Mr. Francis W. Sanders is nominated to a nval cadetship.

Assistant-Paymaster—John Hasler to the Royal Adelaide.

Clerks—A. G. Young and William Thorne to the Charybdis.

Assistant-Clerk—Robert Dinwiddie to the Emerald.

Second-Class Assistant-Engineers—William H. Green to the Indus as supernumerary; John C. Weeks to Cornwallis for service in Fly; John M'Cool (acting) to Cumberland, as supernumerary, for hospital treatment.

Third-Class Assistant-Engineers—Edward Oliver to the Cumberland, as supernumerary; Andrew Cornish to the Miranda; William Childs Archbold (acting), John Bolas (acting), and Francis H. Doninnson (acting), to the Indus as supernumeraries.

COAST-GUARD OFFICE, NOVEMBER 8.

REMOVALS.

Chief Officers—Lieutenant Frederick Williams, from the Eagle tender, to command Ilfracombe Station, vice Jones, promoted to Retired List; Lieut. G. W. Whiting, R.M., from Coal House Point to Herne Bay; Messrs. John Symons, from Portlooe to Looe; Hugh John Sclater, from Westgate to Newgate; John Douglas, from Mundsley to Bridport.

Acorn, 12, sailing-sloop, Commander Richard B. Pearse, was at Amoy by the last accounts.

Actæon, 26, sailing-frigate, Commander John Ward, was at the Peiho on the 26th of August. Commander Ward's services have been prominently noticed in reference to the manner in which he has discharged his surveying duties.

Adventure, 2, screw troop-ship, Commander Edward Lacy, was in the Gulf of Pecheli on the 26th of August.

Algerine, 1, screw gun-boat, Lieutenant-Commander William Arthur, was at Ningpo on the 26th of August.

Assurance, 4, screw steam-sloop, Commander Charles M. Aynsley, left Malta on the 31st ultimo, with the English mails for the fleet at Corfu.

Avon, 3, paddlewheel steam-vessel, has proceeded from Hamoaze to Plymouth Sound, where she will continue until the arrival of the Hero.

Banshee, 2, paddlewheel steam-vessel, Commander Colin A. Campbell, left Malta for Constantinople on the 20th ult.

Banterer, 1, screw gun-boat, Lieutenant-Commander Herbert P. Kuevitt, was in the Gulf of Pecheli on the 26th of August.

Beagle, 4, steam gun-vessel, Commander Edward Hay, was in the Gulf of Pecheli on the 26th of August.

Bouncer, 2, screw gun-boat, Lieutenant-Commander, Arthur R. Owen, was in the Gulf of Pecheli on the 26th of August.

Boxer, screw steam gun-boat, Lieutenant James S. Graham, tender to the Marlborough, was refitting at Malta on the 2nd inst., and was shortly to go outside to try her engines. After landing some officers at Tripoli (Barbary), who are to proceed on an antiquarian expedition to Cyrene, she is to be stationed at Marsala for the protection of the little English colony there, for which service her small draught of water renders her particularly well adapted.

Bustard, 2, screw gun-boat, Lieutenant-Commander Frederick W. Hallowes, was in the Gulf of Pecheli on the 26th of August.

Buzzard, 6, paddle steam-sloop, Commander John Trevenen (acting), was at Monte Video on the 1st of October.

Cambrian, 40, sailing-frigate, Captain J. J. M'Cleverty, C.B., was at the entrance of the Peiho on the 26th of August.

Camilla, 16, sailing-sloop, Commander George T. Colville, was at Japan by the last advices.

Cæsar, 90, screw liner, Captain Thomas H. Mason, arrived at Malta on the 31st of October, in 20 days from Beyrout. She was under orders to refit and to ship stores prior to her proceeding to join the Admiral at Corfu.

Centaur, 6, paddlewheel steam sloop, Commander E. D. D. Aplin, was at Shanghai by the last accounts.

Chesapeake, 51, screw frigate, flag-ship of Vice-Admiral Hope, Captain George O. Willes, was off the Peiho by the last accounts. At the attack on the 21st of August Captain Willes and Commander Robert Gibson, with a boat's crew of the Chesapeake, crossed the river in gallant style, under a heavy fire, spiked six or seven guns, and fired several junks. This was during the attack on Takonaw, for there was rather a galling fire from the other side.

Clown, 1, screw gun-boat, Lieut.-Commander William F. Lee, was one of the gun-boats ordered by Vice-Admiral Hope to attack the North forts at the Peiho on the 21st of August. Lord John Hay, C.B., Captain of the Odin, was on board the Clown. A shell from this gun-boat fell into the north-east angle of the outer fort, and immediately there was an awful explosion—it was one of the principal magazines.

Cockchafer, 1, screw gun-boat, Lieutenant-Commander Henry L. Holder, was in the Canton river on the 12th of September.

Coromandel, 5, steam-vessel, tender to Chesapeake. Vice-Admiral Hope, Commander-in-Chief, had his flag on board this vessel on the occasion of the attack on the Peiho forts.

Cressy, 80, screw liner. This ship was at Naples by the last accounts, and was still under the command of the Hon. G. J. B. Elliot. C.B. Captain Thomas Harvey, who had been appointed to the Cressy in the event of Captain Elliot electing to take the St. Jean d'Acre, had arrived at Malta on the 2nd inst., and was waiting for the decision of the last-named officer.

Digitized by Google

Cruizer, 17, screw steam-sloop, Commander John Bythesea, V. C., was in the Gulf of Pecheli on the 26th of August.

Curaçoa, 31, screw steam-frigate, Captain Augustus Phillimore, was at Rio de Janeiro on the 9th of October.

Curlew, 9, screw steam-sloop, Commander Edward W. Shaw, was in the Tagus on the 29th of October.

Drake, 1, screw gun-boat, Lieutenant-Commander Arthur R. Blane, was in the Gulf of Pecheli on the 26th of August.

Encounter, 14, screw steam-ship, Captain Roderick Dow, was in the Gulf of Pecheli on the 26th of August.

Esk, 20, screw steam-corvette, Captain Sir R. J. Le M. M'Clure, was at Hong Kong on the 12th of September.

Exmouth, 90, screw steam-liner, Captain James A. Paynter, was at Corfu with the Admiral by the last accounts. As this ship lay off Canea, Crete, on the 24th of September, a sailor, who had been up the rigging, lost his hold and fell into the sea, a depth of 30 feet; one or two sailors jumped in after him, but their efforts were without effect; he sank to the bottom. At this moment Lieutenant G. L. Sulivan came up and jumped overboard, and it was thought that he, too, had sunk to rise no more; but after two minutes of breathless suspense he reappeared, much exhausted, but with the man he had so bravely risked his life to save, and it is satisfactory to know that both have now recovered from the effects of their long immersion. Lieutenant Sulivan was complimented and congratulated by Captain Paynter for his gallant deed, while the ship's company came forward with the noble-heartedness of true British tars grateful for the safety of their comrade, and expressed their desire to offer Lieutenant Sulivan a lasting testimonial of their esteem, and the sum of from 80*l.* to 90*l.* was at once handsomely subscribed by them, but their kindness was respectfully declined by Lieutenant Sulivan, who expressed himself sufficiently rewarded by saving life. In 1852 the same officer received the Humane Society's silver medal for rescuing a man from drowning who had fallen off Her Majesty's ship Megæra, when the ship was going at a speed of more than six knots an hour.

Firm, 1, screw gun-boat, Lieutenant-Commander William R. Boulton, was in the Gulf of Pecheli on the 26th of August.

Flamer, 2, screw gun-boat, Lieutenant-Commander Henry M. Bingham, was in the Gulf of Pecheli on the 26th of August.

Forester, 2, screw gun-boat, Lieutenant-Commander Arthur J. Innes, was in the Gulf of Pecheli on the 26th of August.

Furious, 16, paddlewheel steam-frigate, Captain Oliver John Jones, was in the Gulf of Pecheli on the 26th of August.

Fury, 6, paddle steam-sloop, Commander J. C. Wilson (acting), was in the Gulf of Pecheli on the 26th of August.

Gorgon, 6, paddlewheel steam-sloop, Commander Bedford C. T. Pim, will, as soon as she can be got ready for sea, proceed to the Cape of Good Hope. The Gorgon will convoy the Swift, brigantine, lately fitted at Devonport as a mooring vessel at the Cape. The crew of the Swift will temporarily be borne on the books of the Gorgon.

Grasshopper, 2, screw gun-boat, Lieutenant-Commander John C. Tucker, was at Hong Kong on the 12th of September.

Hardy, 2, screw gun-boat, Lieutenant-Commander Archibald G. Bogle, was at Hong Kong on the 12th of September.

Haughty, 2, screw gun-boat, Lieutenant-Commander George D. Broad, was at Hong-Kong on the 12th of September.

Hesper, 2, screw store-ship, Master-Commander W. H. Harris, was at Shanghai by the last advices.

Hibernia, 104, sailing three-decker, flag-ship of Rear-Admiral Henry J. Codrington, C.B., Commander the Hon. Augustus C. Hobart, was in Malta harbour on the 2nd instant.

Highflyer, 21, screw steam-corvette, Captain W. A. J. Heath (acting), was in the Gulf of Pecheli on the 26th of August.

Impérieuse, 51, screw steam-frigate, flag-ship of Rear-Admiral Lewis T. Jones, C.B., second in command, Captain Rochefort Maguire, was at the entrance of the Peiho on the 26th of August.

Inflexible, 6, paddle steam-sloop, Commander G. A. C. Brooker, was in the Gulf of Pecheli on the 26th of August.

Insolent, 2, screw gun-boat, Lieutenant-Commander E. H. Seymour was in the Gulf of Pecheli on the 26th of August.

James Watt, 91, screw liner, Captain Edward Codd, was at Corfu with the Admiral, by the last accounts.

Janus, 1, screw gun-boat, Lieut.-Commander D. G. Davidson, with Rear-Admiral Lewis T. Jones, C.B., on board, led in the gun-boats to the attack on the Peiho forts on the 21st of August.

Kestrel, screw gun-boat, Lieutenant-Commander C. D. Robinson, was in the Gulf of Pecheli on the 26th of August.

Leopard, 18, paddle steam-frigate, Captain J. F. B. Wainwright, carrying the flag of Rear-Admiral Sir Stephen Lushington, K.C.B., was at Monte Video on the 1st of October.

Leven, 1, screw gun-boat, Lieutenant Commander Joseph S. Hudson, was in the Gulf of Pecheli on the 26th of Aug.

London, 90, screw liner, Captain Henry Chads, arrived at Malta on the 1st inst. in five days from Naples. This ship would proceed to join the Admiral at Corfu, as soon as she had undergone some slight repairs and had taken in the necessary stores.

Madagascar, store-ship, Captain Richard D. White, was in the harbour of Rio de Janeiro on the 9th of October.

Magicienne, 16, paddlewheel steam-frigate, Captain John E. Commerell, V.C., was in the Gulf of Pecheli on the 26th of August.

Marlborough, 131, screw three-decker, Captain William A. Stewart, C.B., carrying the flag of Vice-Admiral William Fanshawe Martin, was at Corfu, according to the last accounts which came down to the end of October.

Melpomene, 51, screw steam-frigate, Captain Charles J. F. Ewart, was at Malta on the 2nd inst., but it was expected would proceed to rejoin the Admiral at Corfu after the arrival of the next mail from England, and would take up with her the Admiral's wife and two daughters, lately arrived here from England. This fact does not bear out the report lately circulated, that it was the intention of the Admiral to throw up his command.

Neptune, 90, screw liner, Captain Frederick A. Campbell, was at Corfu with the Admiral, according to the latest accounts.

Nimrod, 6, screw steam-sloop, Commander R. J. Wynniatt, was at Shanghai by the last accounts. At the attack which the rebels made in August on the town of Shanghai, the Nimrod did great execution among them. The Nimrod has been ordered home for some time past, and as she can be well spared from the station after the signal success which has attended the allied arms, there will be no reason for detaining her any longer on the coast of China.

Oberon, 3, paddle steamvessel, Lieutenant-Com. Frederick G. C. Paget, was at Buenos Ayres on the 28th of September.

Odin, 16, paddle steam-frigate, Captain Lord John Hay, C.B., was at the entrance of the Peiho on the 26th of August. Lord John Hay was on board one of the gun-boats during the action of the 21st of August, as the Odin was not engaged.

Opossum, 2, screw gun-boat, Lieutenant-Commander George D. Bevan, was in the Gulf of Pecheli on the 26th of August.

Orion, 91, screw steam-liner, Captain J. B. E. Frere, was at Corfu with the Admiral, according to the latest accounts.

Orpheus, 21, new steam corvette, fitting at Chatham dockyard for the steam reserve, is expected to be completed this day, when she will vacate No. 2 dock, where she is at present being coppered, and proceed to join the second-class steam reserve. The large dock in which the Orpheus is now lying will, on the removal of that vessel, have the necessary alterations commenced to adapt it to receive the large mail-clad iron vessel-of-war ordered to be constructed in it, if the Admiralty persist in their original intention of building another monster Warrior, of which, at present, as will be seen by a paragraph in another part of our journal, there is some doubt.

Pearl, 21, screw steam-corvette, Captain John Borlase, C.B., was in the Gulf of Pecheli on the 26th of August.

Pioneer, 6, screw steam-sloop, Commander Hugh A. Reilly, was in the Gulf of Pecheli on the 26th of August.

Renard, 4, screw steam-sloop, Commander J. G. Goodenough, was in the Gulf of Pecheli on the 26th of August.

Ringdove, 4, screw steam-sloop, Commander Robert G. Craigie, was in the Gulf of Pecheli on the 26th of August.

Roebuck, 6, screw steam-sloop, Commander Francis Marten, was in the Gulf of Pecheli on the 26th of August.

St. Jean d'Acre, 101, screw-liner, acting Captain John D. M'Crea, was in Malta harbour on the 2nd inst. The Cressy was expected up from Naples with Captain the Hon. G. J. B. Elliot, C.B., on board; but should this officer decline to leave his old ship, Captain Thomas Harvey will take command of the St. Jean d'Acre.

Sampson, 6, paddlewheel steam-sloop, Captain George S. Hand, C.B., was in the Gulf of Pecheli on the 26th of Aug.

Scout, 21, screw steam-corvette, Captain John Corbett, was at the entrance of the Peiho on the 26th of August.

Simoom, 8, iron screw troop-ship, Commander John M. Cooke, was in the Gulf of Pecheli on the 26th of August.

Slaney, 1, screw gun-boat, Lieutenant Commander G. D. Bevan, was in the Gulf of Pecheli on the 26th of August.

Snake, 4, steam gun-vessel, Commander Henry Harvey, was at Shanghai by the latest accounts.

Snap, 2, screw gun-boat, Lieutenant Commander William O. Butler, was in the Gulf of Pecheli on the 26th of August.

Sparrowhawk, 4, screw steam-sloop, Commander John C. Byng, was in the Gulf of Pecheli on the 26th of August.

Sphinx, 6, paddlewheel steam-sloop, Commander George F. Day, V.C., led a division of rocket-boats at the attack on the Peiho forts on the 21st of August. We are informed that four French gun-boats, of the Emperor's invention, very good for firing from, but never intended to be hit, kept up a very smart cannonade on the left of ours. Unfortunately in their shell practice, through some unaccountable error, the shell burst nearly over Captain Day's boats, and the pieces flew about so sharply that by a miracle only no lives were lost.

Spiteful, 6, paddlewheel steam sloop, Commander F. C. Wilson, arrived at Plymouth from Portsmouth last week. She has since coaled and provisioned and proceeded to the chops of the Channel for the purpose of relieving the homeward, who, from being detained by the prevalence of easterly winds, may require assistance. The Spiteful will also keep a bright look out for the Hero.

Starling, 2, screw gun-boat, Lieutenent-Commander James H. Whitshed, was at Hong Kong on the 12th of September.

Staunch, 2, screw gun-boat, Lieutenant Commander Edwin J. Pollard, was in the Canton river on the 12th of September.

Supply, 2, iron screw steam store-ship, Master-Commander William H. Balliston, was expected to leave Malta for England on the 3rd inst.

Victor Emmanuel, 91, screw liner, Captain William J. C. Clifford, C.B., was by the last accounts at Corfu with the Admiral, but a letter from Malta, dated the 2nd inst., states that she was expected there to take in supplies for the fleet.

Warrior, iron-plated screw steam-frigate, is slowly, but we hope surely, progressing towards completion at Blackwall. This ship has been pronounced to be, by naval officers highly competent to pass an opinion, a beautiful model of naval architecture, but an utter failure as a powerful battery. With all her faults it will be very desirable to have her afloat, and we shall then be better able to judge of her qualifications than we are while she is on the stocks.

Watchful, 1, screw gun-boat, Lieut.-Commander Frederick W. Inglefield, was one of the gunboats ordered by Vice-Admiral Hope to attack the North forts at the Peiho on the 21st of August.

Weazel, 1, screw gun-boat, Lieutenant-Commander William Howorth, was at Hong Kong on the 12th of September.

Woodcock, 1, screw gun-boat, Lieut.-Commander George S. Bosanquet, was one of the gun-boats ordered by Vice-Admiral Hope to attack the North forts at the Peiho on the 21st of August.

ROYAL NAVAL SCHOOL, NEW CROSS.—The Earl of Glasgow has kindly subscribed 10*l.*, in aid of the fund for covering in the swimming bath, to enable it to be used throughout the year, instead of only during the summer months; for which object about 300*l.* are required. Her Majesty and His Royal Highness the Prince Consort headed the list in January last with liberal contributions.

As stated by us last week, Rear-Admiral Sir Baldwin Walker, Bart., the Comptroller of the Navy, proceeded to Chatham on the 2nd instant, and on the following morning he met Mr. S. Whitbread, M. P., and they proceeded together to the Dockyard, where they were received by Captain G. Goldsmith, C.B., Superintendent, and the other officers and heads of departments of the establisment, who conducted the members of the Board through the yard to the several places which they were desirous of visiting. The chief object was to inspect the stone dock, in which the large new iron-plated iron frigate is to be constructed, in order to ascertain whether the basin presented adequate accommodation for building so large a ship, which is to be constructed on a scale never yet attempted in any of the Royal dockyards, her size being twice the length of many of our line-of-battle ships. The second dock, in which she is to be built, is larger than any of the docks at either of the naval establishments, being nearly 400 feet in length. The new mail-clad vessel of war, however, is to be 420 feet in length, but it was ascertained by the members of the Board on Saturday that a considerable addition could be made in the length of the dock by making some alterations to the entrance, whereby the required length would be obtained. The new vessel is to be 58 feet in breadth of beam, and upwards of 6000 tons burthen. Her armament will be the most powerful ever placed on board a vessel of war, and will consist exclusively of the long-range Armstrong guns. This is presuming that the decision originally arrived at by the Admiralty to build the vessel on the model of the Warrior is still maintained, but pending the state of uncertainty now reigning at Whitehall in reference to the plans which should be adopted, we presume the extensive alterations, which will involve a large outlay of public money, will not be commenced.

Some very fine specimens of the Pinus Kauri, or New Zealand pine, are now being worked into topmasts and other spars in Portsmouth dockyard. The trees from which these sticks are taken are magnificent vegetable productions, often reaching 90 feet without a branch, consequently there are no knots to weaken the spars. The wood is very light in its colour, and though hard, planes very smooth and works well. Its grain is remarkably close, and exhibits a small bird's eye appearance when polished off. The wood is well adapted for every purpose of house building, but for topmasts for our largest men-of-war, as well as for bowsprits, lower masts, and yards it has not its equal in the world. The stem of the tree is as straight as a carpenter's rule, and is of enormous girth, specimens of 12 feet diameter being by no means rare. Under the same mast-house in which the spars from the Kauri are to be seen, is the mainmast of the Tribune, 30, screw, recently returned from the Pacific ocean, under the command of Captain G. T. P. Hornby. This mast is another instance of the magnificent timber to be found in our own colonies. It was made out of a single tree felled in Vancouver's Island in 1859, and worked into its present form on the spot. The tree when cut down measured 167 feet in length, and was of 28 feet circumference for nearly 90 feet from the root. As the mast now lies in the store it is 100 feet 10 in. long, having a diameter of 2 feet 8½ in. from end to end, and is without doubt the finest lower-mast made from a single stick that ever has been seen in this country. It would, of course, have been possible to have made the mast of much larger proportions out of such a vast tree, as the surplus wood chopped away more than equalled what was left behind. A great many nautical and other visitors have been to see this very fine specimen of navy timber furnished by our own colonies. New Zealand and Vancouver's Island spars are now slowly finding their way into our home dockyards, where they are much wanted. We wish we could see some specimens of the Puriri or New Zealand oak introduced into this country, for it is, perhaps, the most valuable timber produced in the forests of that colony. The wood is wonderfully durable, works like oak, and appears to be invulnerable to the attacks of the weather. For shipbuilding purposes it is invaluable, and would be a great acquisition to our navy yards. It is a gnarled and knotted tree, and works well into timbers, knees, &c. It grows from 20 to 40 feet high without a beanch, when it spreads out with a fine head, the bole being often from 12 to 20 feet in circumference. The forest treasures of these fine islands have not received a full consideration, and it would be desirable if the timber brought from them was liberated from the many treasury orders relating to their measurement. This would be the means of introducing upon a large scale some of the finest wood for shipbuilding in the world, and would be a boon at the present moment, when we are experimenting with Green Heart, Teak, American white oak, and green oak from our own forests, to the detriment of the well-being of our material navy.

The Navy Gazette.

ADMIRALTY, Nov. 8, 1860.

The following promotions, dated the 1st instant, have this day taken place, consequent on the death, on the 31st ultimo, of Admiral of the Red the Right Honourable Thomas, Earl of Dundonald, G.C.B.:—

Admiral of the White Sir Lucius Curtis, Bart., C.B., to be Admiral of the Red.

Admiral of the Blue William Bowles, C.B., to be Admiral of the White.

Vice-Admirals—Manley Hall Dixon and the Honourable Alexander Jones, on the Reserved List, to be Admirals on the same list.

Vice-Admiral of the Red Sir Barrington Reynolds, K.C.B., to be Admiral of the Blue.

Vice-Admiral of the White Sir Arthur Fanshawe, K.C.B., to be Vice-Admiral of the Red.

Vice-Admiral of the Blue William Fanshawe Martin to be Vice-Admiral of the White.

Rear-Admiral of the Red Sir Michael Seymour, G.C.B., to be Vice-Admiral of the Blue.

Rear-Admiral of the White Christopher Wyvill to be Rear-Admiral of the Red.

Rear-Admiral of the Blue Frederick Bullock to be Rear-Admiral of the White.

Captain Thomas Matthew Charles Symonds, C.B., to be Rear-Admiral of the Blue.

Retired Vice-Admirals—George Henderson and Robert Worgan George Festing, C.B., are entitled to the rank and title of Retired Admiral, in pursuance of Her Majesty's Order in Council of the 7th May, 1853.

NOTICE TO MARINERS.

(No. 36).—MEDITERRANEAN.—WEST COAST OF ITALY.—*Revolving Light at Civita Vecchia.*—In reference to Notice to Mariners, No. 31, dated 28th September, 1860, information has been received at the Admiralty that the light exhibited at Civita Vecchia, West Coast of Italy, is an improved light, and not a new light, as stated in the official notice from the Minister of Commerce at Rome. The light is a *revolving white* light, which shows for *ten seconds*, and is eclipsed for

Digitized by Google

thirty seconds. It is elevated 120 feet above the sea level, and is visible seaward between the bearings of N. by W. ¾ W. and S. by E. ¾ E. at a distance of about 16 miles. The eclipses are total beyond the distance of 10 miles, but within that range a faint light will always be seen. The illuminating apparatus is of the second order of Fresnel. The light-tower is of cylindrical form, and its colour is grayish white. Is stands on the south end of the breakwater, and its position is given at lat. 42° 5′ 25″ N. and long. 11° 47′ 6″ East of Greenwich, or 3 miles eastward of its position on the Admiralty Charts. *Note.*—The Ancona light, alluded to in Notice to Mariners, No. 21, dated 3rd August, 1860, is in all respects similar to the Civita Vecchia light, and not a flashing light as therein stated. ADRIATIC—COAST OF VENICE.—*Re-establishment of Lights.*—The Maritime Inspector of Venice has given notice, that on the 17th October, 1860, the illumination of all the light-houses on the Venetian Coast would be re-established. [The bearings are Magnetic. Variation 14½° West in 1860.] By command of their Lordships, *John Washington*, Hydrographer, Hydrographic Office, Admiralty, London, 26th October, 1860. This Notice affects the following Admiralty Charts:—Plan of Civita Vecchia, No. 1882; Italy, Sheets 2 and 3 West Coast, Nos. 1400, 158; and Mediterranean General, No. 2158. Also, Mediterranean Lights List, No. 133.

(No. 37.) SCOTLAND—WEST COAST.—*Fixed Light on Corran Point, Loch Eil.*—The Commissioners of Northern Lighthouses have given notice, that on and after the 20th day of November, 1860, a light will be exhibited from the lighthouse recently erected on Corran Point, the western point of entrance to Loch Eil, Argyleshire, west coast of Scotland. The light will be a *fixed* light, and it will show *red* towards the eastward and southward, between the bearings of about N.E. by E. and S.W. by W. ¾ W., and *white* in every other direction where it can be seen from Loch Eil and Loch Linnhe. The light will be elevated 36 feet above the level of high-water springs, and visible in clear weather from a distance of 10 miles. The light-tower is of stone and painted white, and its height from base to vane is 42 feet. *Fixed Light on Phladda Islet*—Also, that on and after the above date, a light will be exhibited from the lighthouse erected on Phladda Islet, about a mile from the west side of Luing Island, and 2½ miles S.W. from Easdale Island, Argyleshire, west coast of Scotland. The light will be a *fixed* light, and it will show *red* when seen from the northward, or in the direction of Bogha Nuadh rock, when bearing between S. by W. ¼ W. and S.S.W. ¾ W.; it will show *white* landward when bearing between S.S.W. ¾ W. and N.N.E. ¼ E.; and it will be *masked* seaward between the bearings of N.N.E. ¼ E. and S. by W. ¼ W. The mariner, however, must bear in mind that in approaching it from the southward, a faint light will be seen, varying with the state of the atmosphere, for some distance easterly of N.N.E. ¼ E. The elevation of the light will be 42 feet above high-water springs, and in clear weather it should be seen from a distance of 11 miles. The light-tower, of stone and painted white, is 42 feet in height from base to vane. [The bearings are Magnetic. Variation 26° 10′ West in 1860.] By command of their Lordships, *John Washington*, Hydrographer, Hydrographic Office, Admiralty, London, 30th October, 1860. This notice will affect the following Admiralty Charts:—Plan of Loch Eil, No. 1426; Scotland, West Coast, Nos. 2635, 2476; and Scotland, West Coast, sheet 3, No. 2159. Also, British Islands Lights List, Nos. 211, 213.

(No. 38.) NORTH ATLANTIC—WEST COAST OF FRANCE—*Fixed White Light at Entrance of River Adour.*—The Imperial Ministry for Public Works in France has given Notice, that on and after the 15th day of November, 1860, a light will be exhibited at the entrance of the River Adour, which falls into the south-eastern part of the Bay of Biscay, 3 miles below Bayonne. The light will be a *fixed white* light, and it will be shown from the platform of the finished portion of the south jetty, which is still in progress, the works at present extending about 220 yards farther seaward. The light will be elevated 38 feet above the level of high water, and should be visible in clear weather from a distance of 6 miles. Its position is given as lat. 43° 31′ 46″ N., long. 1° 31′ 28″ West of Greenwich. By command of their Lordships, *John Washington*, Hydrographer, Hydrographic Office, Admiralty, London, 2nd November, 1860. This Notice will affect the following Admiralty Charts:—France, West Coast, sheet 1, No. 2665; and Plan of Bayonne, No. 1343.

THE TRANSPORT SERVICE.

[We regret that the letter we have received from Mr. Richardson, with reference to the notice, in this journal of the 27th ult., of the paper he laid before the Transport Committee is very much too long for insertion in our columns. This is, however, the less to be regretted, as he mentions that his views have been advocated elsewhere, besides appearing in the Blue Book alongside of Mr. Willis's paper, which he chiefly criticises. We insert the following extracts; though we still agree with the great majority of the witnesses, including the First Lord of the Admiralty, that it is highly desirable to have eight or ten additional Himalayas, and that our possession of these can alone enable us to meet quietly but with proper dispatch any "emergency" requiring the hasty movement of troops.]

"* * * My proposal relates only to the transmission of the ordinary reliefs, as I take it for granted that in cases of emergency the Government would have recourse to the overland route, or to the large fleet of first-class steamers belonging to the mercantile marine. * * * I certainly never intended to employ any frigates which are worn-out, neither would I use any that would sail very slowly. On the contrary, I would select fifteen or sixteen which are in excellent condition, and which are well known, and have proved, to be good sailors. * * * Not any of the influential witnesses examined before the committee appear to have alluded to the necessity of providing for India, during peace, a fleet of Government steamers to meet any urgent cases which may arise at some future time; but if for Imperial purposes it should be deemed desirable, irrespective of cost, to employ steamers instead of sailing-vessels in conveying troops to the East, why not adopt the suggestion made by Captain Ford, in August, 1857, and have a line of first-class screw "steam-ships of 5000 tons each, and fitted with engines of 1000 horse-power, which would perform the voyage to and from India with certainty in forty-one days"? Until I learn that such ships are actually on the way to India, I shall endeavour to get some of the fine frigates now lying idle employed on this service."

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Although I quite agree with you that there is an impression abroad very unfavourable to the public departments, because, as is alleged, "they never do anything like other people," still I am not one of those who disbelieve in any good thing coming out of Nazareth. But the evidence of Captain Eden before the Transport Committee was such a palpable challenge to the merchant shipowners of England, that it was not likely to be overlooked. The gallant officer is lucky in having so good an advocate as you are, but "facts are chiels that wunna ding," and I must again bring you to book on the relative cost of the Himalaya, Perseverance, and Indiana. In the ARMY AND NAVY GAZETTE of the 20th ult., you say, referring to the capacities of the two first ships above named, that I assumed that because they only took 1400 men, instead of 1669, the number for which they measure, although they have carried many more, "that the two troop ships had no other freight than the troops conveyed." Now, if they had, it was Captain Eden's duty in the comparative statement which he volunteered to have given all the particulars of, their dead as well as living freight. But, admitting that cargo filled the space which would otherwise have accommodated about 300 men, where lay the necessity for taking up a steamer like the Indiana, when one of half the size would have sufficed? Perhaps she had freight also. Let us have all the facts, and then we can come to a proper decision; but in the meantime I don't see that Captain Eden's case is bettered, nay, the contrary; for unless in cases of great emergency, ordnance stores or munitions of war are not usually conveyed by such a costly transit as a steamer. It is important that the public should know if no tenders were asked for at a price per head for the service performed by the Indiana. I rather think there were; and it would be interesting to know the circumstances which led to the alteration in her charter.

With your permission, I shall take the liberty of addressing you next week on the subject you have broached, of substituting the Steam Transport Service for the Naval Volunteer and Reserve forces. It is one in which I take a deep interest, and however we may differ as to the means, our aim is alike.

The Conway inquiry finished on Saturday, and you wil soon learn how far you were justified in pre-judging the verdict.—I am, &c., J. M. MACKAY.

[Mr. Mackay should, as a critic, be a little more precise. He only assumes that the Himalaya and Perseverance were not full-freighted. If he proves this, no doubt the Indiana was taken up unnecessarily; but that is not the point. Again, no proposal to "substitute" the Steam Transport Service for the Naval Volunteer Force has been made in this journal. True, facts "wunna ding;" and what is the use hitting at shadows?—ED.]

THE NAVAL BRIGADE IN INDIA.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Although almost every regiment engaged in the late war in India have received their medals and clasps to which they are entitled for their services, not one officer or man of either the Royal Naval Brigades then serving in India have received theirs. As there were only two Royal Naval Brigades landed, one from the Shannon, the other from the Pearl, I think you will agree that the delay in serving out these slight acknowledgments of our services is most unnecessary and unaccountable.—I am, &c.,

ONE WHO HAS SERVED IN THE NAVAL BRIGADE IN INDIA.

THE MILITIA.

Renfrew Militia. The permanent staff of the regiment assembled on Wednesday to witness the presentation of a good conduct medal to one of their comrades. Quartermaster L. B. Barr, who is at present in command, after his inspection of the staff, presented a silver medal to Sergeant Robert Allan of the Royal Renfrew Militia, for long service and good conduct. Sergeant Robert Allan served 26 years in the regular Army, and was discharged from the 72nd Highlanders on a pension of 2s. per diem. He has two sons at present serving in the 72nd Higlanders now in India, one a pay sergeant, and the other a corporal. Sergeant Allan has been nearly six years in the Royal Renfrew Militia, and to all appearance is likely to serve many more. This is the second medal that has been presented to the permanent staff of the Renfrew Militia within this last fortnight, the former being a war medal and clasp, presented to Sergeant-Major George Young, for services in the Indian campaign—the clasp for the storming and capture of Delhi. Sergeant-Major George Young served in the 1st battalion 60th (King's) Royal Rifles, and was discharged on a pension of 2s. per diem, for services and wounds received in action.

The Militia Gazette.

WAR OFFICE, PALL MALL, NOVEMBER 6.

Royal Flintshire Militia—Captain Robert Wills, to be Major, vice Jones resigned.

Northamptonshire Regiment of Militia—Francis William Eveleigh Savage, Esq., late of the 13th Light Dragoons, to be Captain.

Memorandum—Her Majesty has been graciously pleased to accept the resignation of the Commission held by Ensign Richard Hanbury Miers in the Royal Carmarthenshire Regiment of Militia.

WAR OFFICE, PALL MALL, NOVEMBER 9.

Northumberland Artillery Regiment of Militia—Robert Townley Woodman, Esq., late of the 14th Light Dragoons, to be Captain, vice H. Weston, resigned.

Bedfordshire Regiment of Militia—Lieutenant Richard Sambrook Crawley to be Captain, vice Judd, promoted; Ensign Thomas Joseph Sunderland to be Lieutenant, vice Crawley, promoted; Ensign Frederick Luck to be Lieutenant, vice Ellis, resigned.

Memorandum—The Queen has been pleased through the War-Department, by a communication dated the 31st October, to signify her pleasure that Lieutenants Henry Lahee Bayne and George Clapperton Bayne, who absented themselves without leave from the training of the First Royal Surrey Militia in May last, should be removed from the strength of that Regiment.

7th Regiment of Lancashire Militia—Her Majesty has been graciously pleased to accept the resignation of the Commission held by Ensign John Rule Daniell. Captain Simeon Henry Stuart having absented himself without leave from the recent training, to be removed from the strength of the Regiment.

DEPARTURE OF THE FIRST DIVISION OF THE CHANNEL FLEET FROM PLYMOUTH.—The ships composing the Plymouth Division of the Channel Fleet got under weigh on Tuesday afternoon. The Conqueror, 101, screw, Captain Sotheby, was the first to weigh anchor under canvas, three topsails and standing jib; next was the Centurion, 80, screw, Captain Rogers, followed by the Donegal, 101, screw, Captain Broadhead, both under canvas; the Aboukir, 90, screw, Captain D. Curry, and the Royal Albert, 121, screw, Captain Lacon, flag of Rear-Admiral Stopford, under steam till clear of Breakwater, when these all hoisted sail, and the whole then proceeded under canvas to the westward.

A BOON TO THE UNITED SERVICES IN CHINA.—A correspondent suggests that some relaxation in the post-office regulation which exacts twopence on every newspaper forwarded to China, *vid* Southampton, might be made in favour of the expeditionary force. In addition to our being personally interested in the matter, it would afford us great pleasure to hear that the Postmaster-General could consistently make some change, which would meet the case.

THE AMERICAN NAVY.

The Americans are following the example set them in Europe. They are turning their attention to the "reconstruction" of their Navy. The following statement is curious and interesting, and goes far to prove that the great improvements which have been made in naval architecture on the other side of the Atlantic can be traced more to private enterprise than to any steps taken by Congress. Annexed is a list of all the vessels to be examined by the United States' Naval Board of Inquiry:—

SAILING SHIPS TO BE EXAMINED AT PORTSMOUTH.

The line-of-battle ship, Alabama, put upon the stocks 42 years ago, and never launched. She was intended to be 2633 tons register, and to carry 84 guns. Her timbers are described as being in tolerable order, so that it is not unlikely she may pass muster.

The Franklin. This is the first American sailing man-of-war on which the novel process of "conversion" was tried. Some years ago a survey demonstrated the advisability of propelling her by steam, when the Navy Department ordered the change. For some unexplained reason, however, the operations flagged, and she has remained ever since in *statu quo*. It is believed that the Franklin will be at once taken in hand and altered.

The Cumberland. This is a first-class corvette with two decks, having been cut down from a frigate a few years ago. She is 1726 tons burden, carries 22 guns, and was constructed at Boston in 1842. She was a flagship of the African squadron, and has been ordered for a similar position on the home station. As it is at this port that her battery will be shipped, there is a probability that she will be surveyed here also. The Cumberland is in good order.

The Dale. This little sloop is 566 tons burden, carries 16 guns, and was built at Philadelphia in 1839. It is not likely that she will be deemed worth altering.

The Macedonian. The Macedonian returned a few weeks since from the Mediterranean squadron. She made a serviceable cruise of over two years, visiting all the harbours of Southern Europe. She is efficient, carries 22 guns, is 1341 tons burden, and was built at Gosport in 1836.

The Santee. This vessel is certain to be converted. She was on the stocks for several years, and was launched some time ago, but has never done any ocean duty. She is 1726 tons burden, is rated at 50 guns, and was built at Portsmouth.

VESSELS AT NORFOLK.

The United States. The conversion to a steamer of this vessel, known in the Navy as the "Old Wigwam," will perpetuate the existence of the first-born of the American Navy. The United States was built at Philadelphia in 1797, and was considered at the time she was launched as rivalling in elegance and perfection of naval architecture any ship of her size that had ever been built. She was launched amid the greatest rejoicings—40,000 spectators having been attracted to the scene. One hundred vessels were drawn out and anchored in the Delaware, the decks being covered with companies invited by their owners, and 500 boats and barges were filled with men, women, and children to witness the event. She is described as being partially rotten, but no thorough investigation having been made in regard to her, it is possible that a sufficient portion of her hull may be sound to justify the expense incident to the proposed alteration.

Old Ironsides. It is to be hoped that this splendid old ship will pass inspection. She was recently ordered from Portsmouth to Annapolis, to act as schoolship. She is now in the roads of the latter harbour. The Constitution, built at Boston in 1797, was also launched amid similar demonstrations of joy and in the presence of thousands of spectators. She was pronounced a superb specimen of naval architecture, combining the unity of wisdom, strength, and beauty. The useful service and brilliant career of this noble ship have verified the good opinion and confident predictions pronounced at her birth. It is a remarkable and interesting fact that these two ships—the United States and the Constitution, the first two built for our navy—after 62 years of unremitted, faithful, exposed, and successful service, are still existing, and in active and efficient employment. The first days of the Constitution were not her best days. Her glory was acquired, as all true glory is, by gradual and solid steps. She was at first, with the opponents of the Navy, a subject of reproach and slander, because she returned from a long cruise without having made any captures. The French ships of war were at this time depredating on American commerce, and the decrees of the French Directory subjected all American vessels to seizure which had on board British goods or products, or which had sailed from British ports. The good ship was judged unfairly, however, and her gallant commander (Nicholson) unduly reproached. She had been compelled to operate within prescribed limits, and really had no opportunity to distinguish herself.

The Pennsylvania. At the time the Pennsylvania was launched she was the largest naval vessel in the world. Being over 3240 tons burden, and destined to carry 120 guns, it is little wonder that the advent of her huge hull into the watery element, which took place at Philadelphia in 1837, drew thousands of spectators from all sections of the Union to the Quaker city. A brilliant future was anticipated for her, but was not realised. She never passed a harbour-light but once, and never was out of sight of land at all. Her total service consists in having sailed from Philadelphia for Norfolk, where she has been anchored as a receiving-ship since her arrival. She came near being lost on her short voyage, a fact that probably made the authorities nervous about sending her to sea again. She is said to be almost rotten, but a proper survey alone can determine whether she is really so or not.

The Columbus (liner). The Columbus is a 2400 ton line-of-battle ship, and has done some squadron duty in her day. She was the first large man-of-war ever constructed at Washington, and the last. Her launch took place over 40 years ago; yet it is supposed that the materials for a good steamer may be got out of her.

The Delaware. Like the Columbus, this is a ship of the line, 2633 tons burden, and was originally intended to carry 80 guns. We have not been able to learn the accurate con-

Digitized by Google

dition of her hull, but fear that she will be condemned and broken up.

The New York. The New York is another of the unfinished liners. For nearly half a century she has occupied a huge ship-house in the Gosport navy-yard, no Administration ever deeming it advisable either to complete or break her up. She was to carry 80 guns, having been ordered at a time when there was a mania for 74's, as all big war-ships were called; but the enthusiasm of the Congress cooled down before her work had been three months going on, and no appropriations to finish her have since been made. A steamer can probably be constructed from the materials in her hull.

The frigate Columbia. The frigate Columbia is 1726 tons burden, was built at Norfolk in 1836, and carries 50 guns. She has been a most useful vessel, having cruised in every squadron. She was attached to the home station during her last service. It is thought that the Columbia is in good order, but the practicability of making a steamer of her is questioned by constructors.

The Raritan. This is another serviceable ship, and has done a great deal of active duty in the Pacific, Mediterranean, and Gulf Squadrons. She is 1726 tons burden, carrying 50 guns, and is said to be sound. The Raritan was built at Norfolk, in 1843.

The corvette Germantown. The sloop of war Germantown was built at Philadelphia, 14 years ago, is 939 tons burden, and has an armanent of 22 guns. She was recently ordered to be prepared for active squadron service; but whether the new edict will cause operations to be suspended has not transpired. The Germantown is in fair condition. She made a useful cruise on the Brazil station, in command of Captain Lynch, of exploration notoriety, and subsequently cruised in the Chinese seas.

NEW YORK YARD.

The North Carolina. This line-of-battle ship is probably unfit for conversion. She is said to be rotten. Her rate is that of a ship of the line, 2633 tons burden, and carrying 84 guns, of which only a few are on board.

The Potomac. The Potomac was built at Washington in 1821, carries 50 guns, and is 1726 tons burden. She has been in ordinary for a long time, and several officers have pronounced her worthless. A survey, however, may reveal a different result.

The corvette Vandilia. This is a sloop of war of the second class, 783 tons burden, and carrying 20 guns. She had served actively for several years, notwithstanding which she was recently found to be in fine condition. She is hardly worth conversion, however.

The Brandywine. This is another historic ship. Launched at Washington in 1826, her name is intimately associated with the earliest events of our naval history. In the *New York National Palladium* of August, 1827, we read of a famous race between the old United States and the Brandywine, on the Pacific station, in which the United States was the victor.

AT PHILADELPHIA.

The Jamestown and Saratoga. These are two sloops of war in tolerably efficient order, and both undergoing repairs for sea. Neither of them would be worth converting, in our opinion.

The St. Lawrence. The St. Lawrence is a first-class frigate, 1726 tons burden, and carries 50 guns; she was built at Norfolk in 1847, and has been actively employed most of the time since. She relieved the Savannah on the coast of Brazil in 1856, and was replaced there by the Congress in 1859. She is in good order, and may be converted.

AT CHARLESTOWN, MASSACHUSETTS.

The Vermont (liner). The Vermont is a line-of-battle ship, 2633 tons burden, carrying 84 guns, Her condition has not been reported for years, so that it is impossible to predict what may be the decision of the Board with regard to her.

The Ohio. The Ohio is another 84, and has been a receiving ship at Boston for some years. As her timbers are supposed to be worn out it is not probable that she will be recommended for alteration.

The Virginia. This is a ship of the line, 2638 tons burden, which was put upon the stocks at Charlestown in 1818, where she has remained, like the New York, Alabama, and New Orleans, without having ever left the shiphouse. A steamer bearing her name will, possibly, be made from her materials.

The Vincennes. A second-class sloop of war, 700 tons burden, carrying 20 guns. She recently returned from the coast of Africa, in charge of a naval surgeon, all the other officers entitled to command having been unavailable. She was constructed in Brooklyn in 1826, and can hardly be in a state to pass inspection.

SACKETT'S HARBOUR.

The New Orleans. The New Orleans was never launched, having been on the stocks since 1815. She was the first line-of-battle ship contemplated for the Navy. As she occupies a ship-house, her timbers may possibly be used in the construction of a new steamer. The tonnage of the New Orleans was to have been 2805, and her armament 84 guns.

The above are all the vessels at the navy yards that will be brought immediately under the notice of the Examining Board. There are now in squadrons the corvette Savannah, frigate Sabine, sloop St. Louis, sloop Preble, sloop Cayane, sloop St. Mary's, sloop Levant, frigate Congress, sloop Constellation, sloop Portsmouth, sloop Marion, sloop John Adams, and the Independence, Warren, and Fredonia at San Francisco, of which about half-a-dozen will be considered worth converting. We have purposely omitted all mention of brigs and steamships as not coming under the head of the sailing ships to be overhauled.

If the Board should decide in favour of remodelling any considerable number of the vessels named, Congress must make extra appropriations for the purpose, as it would be impossible to liquidate the incidental expenses from the money at present at the disposal of the Navy Department. Work at the several navy yards promises to be brisk for years to come if the proposed changes are carried out.

VOLUNTEERS.

METROPOLITAN.

LONDON RIFLE BRIGADE.—The sale of tickets for the ball at the Guildhall, on the 13th inst., is going on very satisfactorily, and it has been decided that, as soon as 2500 tickets have been disposed of, no more will be issued. Large numbers of the members of the metropolitan rifle corps, and many of the officers in the army, have been supplied with invitations, and it is expected that the ball will be one of the most brilliant description.

22ND (QUEEN'S WESTMINSTER) MIDDLESEX RIFLES.—On Wednesday evening last the weekly battalion drill of the Queen's Westminster Rifle Volunteers took place at Westminster Hall, and was largely attended. At the termination of the evolutions the corps was formed into square by the commanding officer, when one of the captains took the opportunity in a short speech to express a "hope that no gentleman wearing the uniform of the Queen's Westminster Volunteers would make such a fool of himself as to go to Paris." This short and pithy address was received with loud and long-continued cheering and demonstrations of approval.

28TH (LONDON IRISH) MIDDLESEX RIFLES.—A handsome piece of plate has been presented to Captain Mahony, as a mark of respect and a recognition of his very zealous services and great efforts on behalf of the corps.

29TH (NORTH) MIDDLESEX RIFLES.—A general muster of the members of the 29th Middlesex Rifle Corps took place on Wednesday, in the Riding-school of the Regent's Park Barracks, for the introduction of Lord Enfield as Lieutenant-Colonel of the corps.

19TH (LAMBETH) SURREY RIFLES. — On Saturday last this regiment paraded at head-quarters under the command of the Major-Commandant, W. Roupell, Esq., M.P., who, in introducing Captain Graves, the Adjutant appointed by the War Office, made the following remarks:—"Volunteers of the 19th Surrey Rifles, I have the honour to acquaint you that Captain Graves has been appointed by the Government as Adjutant to this regiment. He is an officer who has seen service in India, and is, I am assured by the Lord-Lieutenant, in every way fitted for the post to which he has been appointed. I rely upon your strict attention to the instruction he is appointed to give in all matters of drill and discipline. He will now enter upon his duties; and whilst introducing him to you as our future Adjutant, I feel it due to Captain Truman, who has with so much zeal and intelligence filled that position since the formation of the corps, and also to you who have so fully availed yourselves of the means of instruction provided in a great measure by him, to congratulate the regiment at having arrived at a very creditable degree of efficiency—an earnest, I believe, of the perfection at which the 19th Surrey Rifles are bent upon attaining." Persons desirous of joining this regiment may obtain every information by applying to Captain J. W. Truman, Honorary and Regimental Secretary, 51, Newington Place, Kennington Park, S.

BEDFORDSHIRE.

6TH BEDFORDSHIRE RIFLES.—This corps, under the command of Captain Crawley, was inspected at Luton, on Wednesday last, by Lieut.-Colonel Ibbetson. Colonel Hastings Russell, Colonel Gilpin, M.P., Major Cooper, and other officers were present. The marching and various evolutions were performed very satisfactorily, considering the short period since the formation of the company; the entire inspection and manœuvres occupying about an hour and a half. At the conclusion the men were addressed by Colonel Ibbetson, who complimented them on the progress made by them in their drill, and observed that, though there was still much to learn, every difficulty would be overcome by perseverance.

BERKSHIRE.

READING RIFLES.—A meeting of this corps was held in the Corn-Exchange on Monday evening for the distribution of prizes which were offered for competition among those who had not taken part in any of the former contests. There was a good muster of Volunteers, and many of the inhabitants interested in the movement were also present. In the absence of Captain-Commandant Sir Paul Hunter the ceremony of distribution was performed by Lieutenant Blandy. The prizes were as follows:—1, a long Enfield rifle, to Private Stanfield; 2, a silver inkstand to Private Charles Clark; 3, a timepiece, to Private Ruddock, sen.; and 4, a silver cream jug, to Private Morris. Each gift was prefaced by some excellent remarks from Lieutenant Blandy, and altogether the meeting was of a satisfactory character.

HAMPSHIRE.

3RD (PORTSMOUTH CIVIL SERVICE) HANTS ARTILLERY.—The members of this fine corps having considerably augmented their numbers, the Major-Commandant (Sturdee) has offered two additional companies to the Marquis of Winchester, the Lord-Lieutenant of the county, which offer has been accepted. By this addition the strength of the corps will be raised to six companies. The drill will be continued during the winter months on the same evenings as heretofore. A vote of thanks from this corps has been forwarded to Major Maguire of the 60th Rifles, who commanded the Volunteer Artillery battalion at the Great County Review at Winchester on the 24th of last month, for the very efficient manner in which he performed his duty on that memorable occasion, and which the gallant major has acknowledged in a very handsome manner, and highly complimentary to the 3rd Hants.

WORKMEN'S BRIGADE.—Although the services of this corps will not be accepted as a class regiment, it will be approved by the authorities as one of the London regiments. The corps now numbers over 1300, and one of the advantages of securing for its chief an officer of experience, has already been manifested in the excellent arrangements for clothing the corps. The uniform—red—will be exceedingly neat, substantial, and economical.

VOLUNTEERS AND THEIR RIFLES.—A communication has been sent round by the Earl de Grey and Ripon from the War Office to the commanding officers of the various corps with reference to the rifles given out to the Volunteers in their respective regiments. It alludes to two points: the first of which is the rifle to be used by those members nominated to be sent to the Musketry School at Hythe; and in this case the rifle used by the Volunteer on drill and firing with his corps is recommended, as the Volunteer is likely to have become accustomed to the sights, &c. The second part of the letter refers to the fact that it had come to the knowledge of the War-Office authorities that Volunteers had altered the locks of their rifles in order to reduce or increase the amount of the "pull." This practice was considered to have a very dangerous tendency, and in all cases where such alterations had been found to be made the officers in command were to request that such rifle should be returned to the armoury, and repaired at the cost of the man by whom the lock had been tampered with.

MR. SIDNEY HERBERT AND THE VOLUNTEER MOVEMENT.—At a meeting of the Court of Lieutenancy of the City of London this week, a report from the deputation appointed to wait upon Mr. Sidney Herbert, the Secretary of State for War, to ascertain the views of Her Majesty's Government with respect to the formation of several additional Volunteer rifle corps, was read. It commenced by stating that, having waited upon Mr. Sidney Herbert, the Secretary of State for War, and having informed him of the several applications which the court had received for the formation of additional corps of Rifle Volunteers, Mr. Sidney Herbert informed the deputation, first, that he saw no objection to a second company being added to the No. 2 City of London (Spottiswoode's) Volunteer Rifle Corps, which, if sanctioned by the court, would no doubt receive the approval of Her Majesty; second, that the Government considered it objectionable to sanction the formation of Volunteer corps exclusively confined to any one class, whether of workmen or artisans, or even of peers' sons, or any other separate class; third, with respect to the Royal National Rifle Association, Mr. Herbert stated that the style of "Royal" could not be assumed without the sanction of the Queen, which it was not probable would be granted, as Her Majesty reserved that distinction for regiments of the Line as a reward for eminent services; that, moreover, any brigade or battalion of Volunteers must be formed under the authority of some one lord-lieutenant, and that it was objectionable and contrary to the spirit of the Volunteer Act, 44 Geo. III., cap. 58, to form separate regiments or battalions of the same brigade under different lords-lieutenant, as proposed by the prospectus of "the Royal National Rifles;" fourth, Mr. Sidney Herbert further stated that he thought there could be no objection to the formation of other distinct Volunteer corps within the City of London, besides the existing London Rifle Volunteer Brigade, which could claim no exclusive right by their earlier formation to enrol Volunteers in their brigade only, so that every class of persons desirous of joining in the Volunteer movement might not be deterred from doing so by the inconvenient expense of any particular corps; and he added a suggestion with a view to its permanence, that the London Rifle Brigade should adopt what modifications might be practicable in its present scale of expenses.

GREAT RIFLE SHOOTING-MATCH.—On Monday and Tuesday a spirited competition took place on Mousehold Heath, near Norwich, between the crack shots of the Norwich battalion—now 500 strong—for a series of prizes offered by the Rev. J. H. Steward, Mr. Charles Morse, and the local Choral Society. The prizes were—two breech-loading Westley Richards rifles, of the value of 13 guineas each, and money premiums of 10*l*., 5*l*. 10*s*., and 5*l*. each. The competition extended, as before stated, over two days, the first class men of the first, third, and fifth companies having their innings on Monday, and those of the second, fourth, and sixth companies on Tuesday. The competitors, who were no fewer than sixty-two, were divided in both days into four sections, and fired two sections at a time at two targets. Captain L'Estrange, of the West Norfolk Militia, acted as umpire. The ranges were 300, 400, 500, and 600 yards, and the highest scores on the first day were obtained by Corporal Pigott, 12 points; Private R. Breeze, 14 points; Private Filby, 12 points; Private Anderson, 12 points; Private Lloyd, 11 points; Corporal Bridgeman, 12 points; Private Todd, 12 points; Private Pyman, 11 points; Private Read, 11 points; and Private Sendall, 12 points. On Tuesday Private Kemp made 12 points; Private W. King, 11 points; Private Love, 12 points; Sergeant Sparke, 12 points; Private Fiske, 14 points; Private Browne, 11 points; Ensign Jolly, 11 points; Sergeant Ray, 11 points; and Private Geldart, 12 points. All others made only 10 points and under. The ties having been shot off, Private Breeze was awarded the first prize (Westley Richards rifle); Private Fiske, the second (Westley Richards rifle); Private Filby, the third (10*l*.); Private W. King, the fourth (5*l*. 10*s*.); and Private Grant, the fifth (5*l*.).

LONDON WELSH RIFLES.—The proposal to form a London Welsh corps has received great support from many of the leading families of the Principality. Sir W. W. Wynn, M.P., will preside at a public meeting which is to be held on Wednesday next to take the necessary measures for commencing operations.

WOOLWICH ARSENAL.—On Saturday afternoon last a rifle match took place at the long range Government practice ground, Plumstead Marshes, between the 3rd and 8th companies of Royal Arsenal Volunteer Rifles, the former being victorious by four points. Two of the artillery companies proceeded on the same afternoon to Park-hall Farm, Eltham, for ball practice. A large number of the short bayonet carbines, of the Royal Artillery regulation pattern, were served out on Saturday to various companies of the Royal Arsenal Volunteers, and the entire force is to be furnished with these weapons. In accordance with an order issued a few days since, the force will for the future be drilled in companies and detachments.

MOUNTED RIFLES.—On Thursday an influential meeting of gentlemen was held at Willis's Rooms, for the purpose of taking steps to organise a troop of Mounted Riflemen for the Metropolis; Lord Keane in the chair. Among those present were Lord Truro, Sir J. V. Shelley, M.P., Mr. W. F. Byng, Mr. Bowen May, Lieutenant Camplin, Major Richardson, and others. The chairman briefly opened the proceedings by stating that the meeting had been called for the purpose of taking measures to form regiments of Volunteer cavalry in the Metropolis. Lord Truro then said it had

Digitized by Google

appeared to him for a considerable time that the requirements of the country were not met by the regiments of Volunteer infantry and artillery already enrolled. He had waited for some time in hopes that cavalry corps would be established and organised. In order to establish these troops he had gone over the map, and proposed that the Metropolis should be divided into six districts, a troop to be raised in each district. He was confident that a fine regiment might be established. With respect to the equipment, most of our regular cavalry were armed in such a manner as to be utterly useless. They did not want to go to the extreme either by adopting some novel plan of equipment or by adopting the old, antiquated system. That and other minor questions, he thought, ought to be left to the management of the committee. The whole expenses for each troop would be about 300*l.* a year, and if the troops were established in all the districts it would be expedient to reduce the amount of the subscription from 5*l.* to 3*l.* After some further remarks, he concluded by expressing a hope that the meeting would support the formation of the corps. Major Richardson advocated the formation of a body of irregular cavalry. He said it took from six to nine months for a dragoon to ride properly. Gentlemen could not find the time, even if they had the inclination to undergo that. They had better use the ordinary hunting-saddle. Resolutions were passed, several names enrolled (including the chairman), and the meeting separated.

TEMPTATION OF VOLUNTEERING.—The movement has already conferred substantial benefits, and it will prove of still greater value in this respect if those who hold positions of influence in the respective corps will take to heart the responsibilities of office, and determine to remove, as far as possible, every evil incidental to the gathering together of large numbers of the most active and jovial spirits, most of whom are in the very heyday of life. In plain truth, there is a good deal of beer drinking and dangling about the bars of taverns in the vicinity of every drill-ground, and evil must, more or less, be the result. That a Volunteer should enjoy a cool draught after having been twisted into all sorts of shapes, and made to bend his hitherto rigid vertebral column into a letter S, is but reasonable; but a habit of dallying among spirit-glasses and pewter-pots is downright mischievous, and to it must be attributed, in some measure, the growth of another evil for which, no doubt, somebody will ere long coin a name. Lowd women congregate in ominous force about the places of meeting, and we have, as an external wen of the Volunteer movement, the two old vices of drinking and prostitution; two out of the three furies that do more to decimate the ranks of Mars than their counterparts, steel and gunpowder. It is said that habits of gambling have taken root among the members of rifle corps; if so, the number of the furies is complete, and there is a power for evil to balance accounts with the power for good. We do not believe this, for, although in such mixed assemblies there may be many amateurs of whist and cribbage, we should not anticipate the growth of even the most innocent of sedentary recreations as a distinct feature of Volunteering, because service at parade and drill is eminently fatiguing, and there can be little table-play among men who are tired out.—*City Press.*

GARIBALDI'S ENGLISH VOLUNTEERS.—A concert was held on Monday last, on behalf of the English volunteers who have been wounded or disabled in serving the cause of Italian independence. This concert was not as successful as it was hoped it might be, but Signor Cosantini, who was the chief promoter of it, is determined to make another attempt. It is proposed that a new entertainment should be given, under the patronage of the Rifle Volunteers. We feel sure that such a proposition will be readily welcomed by the Volunteer corps. It is the best thing that can be asked at their hands, to do what in them lies towards alleviating the sufferings of that band of gallant Englishmen who have been ready to give up their lives in a cause which, if not their own, is dear to us all.

LANCASHIRE.—The county rifle meeting was brought to a conclusion on Thursday. The weather was fine, but the wind was high. The first prize was a purse of 50*l.*, presented by the Liverpool cotton-brokers; the second prize a rifle, value 25 guineas. Distances 1000 and 1100 yards, open to all comers. Lieutenant Ich was the most successful, making five points at 1000 and four points at 1100 yards. There were three ties of seven points for the second prize; namely, Mr. James Colquhoun, Musketry Instructor at Hythe; Mr. G. R. Dunbar, son of the baronet of that name, of Edinburgh; and Lord Fielding, of the 4th Denbighshire. The ties being shot off, resulted in Mr. Dunbar being declared the winner of the second prize. The Whitworth rifle again proved itself the most efficient weapon. The general score exhibited the following results:—Three sixes, two fives, two fours, two threes, six twos, five ones, and ten cyphers. There was some artillery practice during the day with a Blakeley gun, at a range of a mile, during which a bull's eye was made by Captain Blakeley. It is supposed that the difficulty experienced by the detachment of No. 4 gun in obtaining the correct elevation of the Blakeley gun on Saturday was owing to a defect in the cartridges. It is very creditable to all concerned that the Lancashire county meeting has gone off without an accident, excepting that to Colonel Gladstone. It is the more satisfactory when we consider that during the week some thousands of armed men have visited the ground.

The agitation for the establishment of Volunteer corps in Ireland has not subsided, and it will probably be increased by a remarkable letter from Mr. Sharman Crawford, who has addressed the Royal Irish Rifle Volunteer Association in a sort of historial argument for the right and expediency of permitting Volunteer corps to be formed in Ireland. We doubt whether the list of Acts of Parliament repealed or introduced by the English Parliament, in consequence of the pressure from the Volunteers, will not be regarded as a significant argument against his thesis, and whether it will not outweigh the force of the facts on which he relies to show that there would be no danger in giving to Ireland a power which she used loyally and patriotically in former days.

A public meeting was held at Selby, on Monday last, for the purpose of forming a Volunteer Rifle corps. Mr. J. Andus, one of the West Yorkshire magistrates, was called to the chair, and among those who took part in the proceedings were Sir J. W. Ramsden, M.P., Major Ward, Colonel Briggs, and the leading gentry of the town and neighbourhood. Resolutions to carry out the objects of the meeting were passed unanimously, upwards of 200*l.* was subscribed, and several Volunteers were enrolled.

On Wednesday evening a meeting took place in the Saleroom of the Devonport dockyard, for the purpose of maturing the plan for establishing an Artillery corps in connection with the Arsenal, Mr. J. S. Peake, master-shipwright, in the chair, when the following officers were elected and appointed:—First Company, Captain J. S. Peake, Lieutenants Simpson and Flexman; Second Company, Captain Brady, Lieutenants Morgan and Crealock; Third Company, Captain Beer, Lieutenants Morris and Oliver. Chaplain, the Rev. Joseph Briggs; Surgeon, Mr. John Reed. The number of men who have joined is about 150. The cost of the proposed uniforms is—captains, 24*l.* 12*s.*; lieutenants, 24*l.* 2*s.*; serjeant-major, 14*l.* 12*s.*; sergeants, 5*l.* 14*s.*; corporals, 4*l.* 12*s.*; bombardiers, 4*l.* 9*s.*; trumpeters, 5*l.* 6*s.*; privates, 4*l.* 12*s.* 6*d.* At Keyham Steamyard above 80 men have entered. Mr. Corry, cashier, is doing duty there as secretary.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, NOVEMBER 6.

3rd Devon Mounted Rifles—Francis Frederick Taylor to be Lieutenant.

5th Devon Mounted Rifles—John Hayman Whiteway to be Ensign.

3rd Devon Artillery Volunteers—Edward Augustus English to be Captain, vice Sir W. H. Tonkin, promoted.

4th Devon Artillery Volunteers—Briscoe Hooper to be Captain, vice Vivian, resigned; John Alexander Hay to be First Lieutenant, vice Hooper, promoted; Slingsby Bethell to be First Lieutenant; Richard Henry Dansey Vivian to be Second Lieutenant.

1st Devon Rifle Volunteers—Courtenay Henry Clarke to be Captain (erroneously gazetted to an administrative battalion).

Exeter and South Devon Rifle Volunteers—William Henry Kitson to be Captain; John Thornhill Fisher to be Lieutenant; William Walkingham Macreight to be Ensign.

8th Devon Rifle Volunteers—George Newman to be Lieutenant, vice Lindsay, resigned; David Connor to be Ensign, vice Newman, promoted.

18th Devon Rifle Volunteers—Arscott Bickford Courtenay Coham to be Ensign, vice Hodges, promoted.

1st City of Edinburgh Artillery Volunteer Corps—Thomas Alexander Hog, Esq., to be Major; James Paton, Gent., to be Second Lieutenant.

1st Battalion of the Isle of Wight Rifle Volunteers (7th Company)—Ensign John Randall Mann to be Lieutenant, vice M. H. Geneste, resigned; James Binfield Bird, Gent., to be Ensign, vice Mann, promoted.

Worcestershire Rifle Volunteers—1st Battalion—William Cowan, Esq., to be Surgeon. 11th Company—James Loftus Marsden, Esq., to be Captain. 12th Company—Henry William Preedy, Esq., to be Captain, vice Workman, resigned. 19th Company—George Tennant, Esq., to be Captain; John William Empson, Esq., to be Lieutenant: Charles Braddon, Esq., to be Hon. Assistant-Surgeon.

Memorandum—Worcestershire Rifle Volunteers, 12th Company—Her Majesty has been graciously pleased to accept the resignation of the commission held by Captain Workman in the above Company.

37th Middlesex Rifle Volunteer Corps—Ensign Samuel Smith Crosland Richards to be Lieutenant, vice Warren, resigned.

40th Middlesex Rifle Volunteer Corps—The Rev. Henry George Blunt, M.A., to be Hon. Chaplain.

South Banffshire Rifle Volunteer Corps (Keith)—Robert Gordon, Esq., to be Captain Commandant; William Thinbam, Esq., to be Captain; James Gordon, Esq., to be Lieutenant; James Richardson, Esq., to be Lieutenant; George Kynoch, jun., Esq., to be Ensign; Alexander Smith, Esq., to be Ensign.

Memorandum—3rd Company of Banffshire Rifle Volunteers (Aberdour)—The commission to the Captain of this Company, dated the 29th of September, 1860, was in favour of Robert "Innes," and not Robert "Jones," as intimated in the *Gazette* of the 16th of October last.

22nd Lancashire Artillery Volunteer Corps—William Pickup Pickup, Esq., to be Captain; John Stetfox, Gent., to be First Lieutenant; Jonathan Westall, Gent., to be Second Lieutenant.

Memorandum—Her Majesty has been graciously pleased to accept the resignations of the commissions held by First Lieutenant Joseph Bond Morgan, in the 12th Lancashire Artillery Volunteer Corps; Captain John Dugdale and Lieutenant Peter Hopwood Moore, in the 1st Manchester or 6th Lancashire Rifle Volunteer Corps; and Ensign Samuel Pope Callender, in the 1st Lancashire Mounted Rifle Volunteer Corps.

18th Company of Cheshire Rifle Volunteers—William Henry Medd, Gent., to be Honorary Assistant-Surgeon.

31st Company of Cheshire Rifle Volunteers—Thomas Cooper Leah, Gent., to be Honorary Assistant-Surgeon.

Memorandum—9th Company of Cheshire Rifle Volunteers—Her Majesty has been graciously pleased to accept the resignation of the commission of Lieutenant William Bayley.

2nd Administrative Battalion of Surrey Rifle Volunteers—Captain Sir Henry Fletcher, Bart., to be Major.

10th Surrey Rifle Volunteers—Captain Benjamin Glover, to be Captain Commandant; Lieutenant John Gooch, Hepburn, to be Captain, vice Sharpe, resigned; Ensign William Darnell, to be Lieutenant, vice Hersee resigned; Ensign Robert Knowstub Richmond, to be Lieutenant, vice Hepburn promoted.

9th (Wantage) Berks Rifle Volunteers—Edwin Martin Atkins, of Kingston Lisle, Esq., to be Captain; Edward John Hayward, Gent., to be Lieutenant; Percevall Parr, Gent., to be Ensign.

3rd Gloucester Artillery Volunteer Corps—John Heyworth, Esq., late of the 2nd Gloucestershire Rifle Volunteer Corps, to be Captain.

7th Gloucestershire Rifle Volunteer Corps—Walter Jessop, Gent., to be Surgeon.

11th Derbyshire Rifle Volunteers—The Rev. Charles Holcombe Leacroft to be Honorary Chaplain.

1st Fifeshire Mounted Rifle Volunteer Corps—Robert Balfour Stewart to be Ensign.

2nd Fifeshire Artillery Volunteer Corps—William Moir, Gent., to be First Lieutenant, vice David Russell, resigned; James Walker, Gent., to be Second Lieutenant.

6th Fifeshire Rifle Volunteer Corps—John Balfour, Esq., to be Captain.

8th Fifeshire Rifle Volunteer Corps—The Rev. Andrew Wilson to be Honorary Chaplain.

2nd Battalion Warwickshire Rifle Volunteers—2nd Corps—Ensign John Cleophas Ratliff to be Lieutenant, vice Caldicott, resigned; Henry Richmond Phillips, Gent., to be Ensign, vice Ratliff, promoted. 9th Corps—Richard Caldicott, late Lieutenant, to be Captain; Thomas Darlington, Gent., to be Lieutenant; David Hitchin, Gent., to be Ensign.

WAR OFFICE, PALL MALL, NOVEMBER 8, 1860.

Civil Service Corps of Rifle Volunteers—William Emms, late Captain in this Corps, to be Adjutant from 27th August, 1860.

Kent Artillery Volunteers, 14th Corps—Henry David James Macleod to be Adjutant from the 31st August, 1860.

1st Brigade of Aberdeenshire Artillery Volunteers—James Kinnear, late 1st Class Master Gunner Royal Artillery, to be Adjutant.

Memorandum—The Secretary of State for War has authorized the formation of the 1st, 3rd, 4th, 5th, and 6th Aberdeenshire Artillery Volunteer Corps, into a Brigade for administrative purposes, with a staff consisting of one Lieutenant-Colonel and one Adjutant. The Brigade has been numbered as the 1st Administrative Brigade in the county of Aberdeen.

West Middlesex Rifle Volunteer Corps—Henry Sam Syers to be Ensign, vice Barber, promoted.

35th Middlesex Rifle Volunteer Corps—Samuel Smith Millar to be Honorary Assistant-Surgeon.

The following appointment is substituted for that which appeared in the *Gazette* of the 2nd of November instant.

39th Middlesex Rifle Volunteer Corps—Joseph Berdoe to be Captain.

14th Kent Rifle Volunteer Corps—Henry David James Macleod, Adjutant of the 14th Corps, to serve with the rank of Captain.

1st West Riding of Yorkshire Artillery Volunteers (Leeds)—The Reverend Alfred Barry, B.D., to be Chaplain; Henry William Price, Gent., to be Assistant-Surgeon.

4th West Riding of Yorkshire Rifle Volunteers (Halifax)—Ensign Francis Robert Sowerby to be Lieutenant (Supernumerary), vice Haigh, who retires.

7th West Riding of Yorkshire Rifle Volunteers (Leeds)—William Thomas Markham, Esq., late Captain Coldstream Guards, to be Lieutenant-Colonel.

35th West Riding of Yorkshire Rifle Volunteers (Keighley)—William Ferrand, Esq., to be Captain; William Lister Marriner, Gent., to be Lieutenant; Joseph Craven, Gent., to be Ensign.

Memorandum—2nd West Riding of Yorkshire (Hallamshire) Rifle Volunteers—Her Majesty has been graciously pleased to accept the resignations of the Commissions held by the following officers, viz.; Captain James George Antrobus Creswick, Captain Nathaniel Creswick, Lieutenant Henry Webster, Ensign Charles Smith, and Ensign Thomas Marshall.

16th North Riding of Yorkshire Rifle Volunteer Corps—Ensign John Hill to be Lieutenant, vice Legard, resigned; Samuel Harding Loy, Gent, to be Lieutenant, vice Hill, promoted; John Harrison Walker, Surgeon, to be Honorary Assistant-Surgeon.

4th Aberdeenshire Artillery Volunteer Corps—The Reverend James Fraser to be Honorary Chaplain.

7th Aberdeenshire Rifle Volunteer Corps—James Russell, Esq., to be Captain-Commandant; John Ferguson, Esq., to be Captain; David Cruden to be Lieutenant; John Mackie, to be Lieutenant; James Hall to be Ensign; James Milne to be Ensign.

14th Aberdeenshire Rifle Volunteer Corps—Andrew Robertson to be Lieutenant; John Grant to be Ensign.

14th Durham Rifle Volunteers—William Watson Pattinson, Esq., to be Captain-Commandant; John Foster, Gent., to be Lieutenant; John Marriner Redmayne, Gent., to be Ensign; Richard Counsellor, M.D., to be Honorary Assistant-Surgeon.

8th Cambridgeshire Rifle Volunteers—George Leapingwell, Esq., LL.D., to be Captain; Charles John Clay, Esq., to be Lieutenant; Mr. Josiah Chater, Esq., to be Ensign; James Carter Esq., to be Honorary Surgeon; The Reverend Augustus Vaughton Hadley, M.A., to be Honorary Chaplain.

1st Roxburgh Rifle Volunteer Corps—Reverend George Ritchie, M.A., to be Honorary Chaplain.

London Rifle Volunteer Brigade—Lieutenant Thomas Davies Sewell to be Captain; Lieutenant George Simms to be Captain; Lieutenan Frederick George Finch to be Captain; Lieutenant George Dolland to be Captain; Lieutenant William Hopkinson to be Captain; Lieutenant William Maclachlan to be Captain; Lieutenant Walter William Bainbridge to be Captain; Lieutenant William Haywood to be Captain; Walter Lord, Esq., late Captain Indian Army, to be Captain; Ensign Reginald Hanson to be Lieutenant; Ensign Robert Pinkney to be Lieutenant; Ensign Christopher Hopkinson to be Lieutenant; Ensign Frederick Wellington Stretton to be Lieutenant; Ensign William Wrench Towse to be Lieutenant; Ensign James Alexander Carson to be Lieutenant; Ensign Henry Fletcher Vallance to be Lieutenant; Ensign Charles Mill Frodsham to be Lieutenant; Sergeant Thomas Dibdin Dighton to be Ensign; Sergeant Arthur Dodd to be Ensign; Sergeant John Gilbert Gilbert to be Ensign; Sergeant Samuel McCaul to be Ensign; Sergeant Albert Jourdain to be Ensign; Sergeant Edmund Penning Rowsell to be Ensign; Sergeant Samuel Goodman to be Ensign; Sergeant Edward Thomas Hammond to be Ensign; Sergeant Thomas Blanford to be Ensign; Corporal John William Barton to be Ensign; Private George Webb to be Ensign; Private William Clode to be Ensign; Private James Robert Christie to be Ensign; Private Charles Allen to be Ensign; Private Charles Octavius Humphreys to be Ensign.

2nd Hampshire Rifle Volunteer Corps—William Tiping Woods to be Ensign.

25th Company of Cheshire Rifle Volunteers (2nd Company)—William Marshall, Esq., to be Captain; Thomas Marshall, Gent., to be Lieutenant; William Smith, Gent., to be Lieutenant.

West Somerset Regiment of Yeomanry Cavalry—Lieutenant Theobald Walsh to be Captain, vice Clark, resigned.

2nd Company of Dorsetshire Artillery Volunteers—Second Lieutenant William Powell to be First Lieutenant, vice Beaufort, resigned; John Gomersall Brown., Gent., to be Second Lieutenant, vice Powell, promoted.

2nd Monmouthshire Rifle Volunteer Corps—James Essex, Gent., to be Assistant-Surgeon.

4th Kincardineshire Artillery Volunteers (Bervie)—James Gilchrist Gibb to be First Lieutenant.

7th Forfarshire Artillery Volunteer Corps—Alexander Rae, Esq., to be First Lieutenant; James Kirkland, Esq., to be Second Lieutenant; Matthew Nimmo, Esq., to be Honorary Assistant-Surgeon.

Memoranda—Lancashire Rifle Volunteers—The 63rd and 64th Corps have been united to the 4th Administrative Battalion which previously consisted of the 46th, 67th, and 76th Corps only. Her Majesty has been graciously pleased to accept the resignations of the Commissions held by Captain James Burnside Taylor, in the 1st, and Lieutenant John Slagg, in the 43rd Corps.

Memorandum—Worcestershire Rifle Volunteer Corps—Her Majesty has been graciously pleased to accept the resignation of the Commission held by Lieutenant Dixon in the 3rd Company of the above Corps.

ARMY RANK UNDER GARIBALDI.—"It was a strange assemblage, as various in language as in rank and costume—French, English, Germans, Swedes, and Scotchmen—a cook, a general, a doctor, a runaway apprentice, and an Indian veteran. Grades and business are very indefinite in Garibaldi's army. "What is your position here, sir, may I be permitted to ask?" inquired a little man, who was poking about in the crowd, of my colonel. His face bore such a look of innocent inquiry, that my colonel could not resent the impertinence. "I give you my honour I don't know," said he. "When there's fighting, I fight. When I receive orders, I execute them. I'm on the staff, I take it. At least the general thinks so, I have some indistinct impression that my rank is colonel. I get my two francs a day, like everybody else, and it pays for my tobacco." "What is your position colonel, may I be allowed to inquire?" asked the little man, presently sidling up to Colonel Dowling. "Now, if you'll believe me, I haven't the remotest conception," replied that officer, who was hacking away at a lump of hard beef, placed upon a harder loaf, by way of platter. "Somebody mentioned that I was inspector-general of artillery. I haven't heard of anybody above me in that department, and I haven't had time to look out for those below. Major G—— constructs the batteries, and I find the guns." "And the men?" "I don't know precisely how I get the men. I always find a lot of chaps about me, and soon know whom to select. I lost my best man to-day, poor fellow. But here's a lad worth any two that are left." He pointed to an individual in a yellow stable-jacket and overalls. He was a livery stable keeper in Naples. He had never seen a shot fired until the battle of the 1st of Oct., when, being accidentally present, he took such a fancy to the "sport of princes" that he could not find it in his heart to quit the playground again. His great delight was a battery. He liked plenty of noise, and attached himself especially to Colonel Dowling's big thirty-twos; proving himself not only perfectly cool and self-possessed, but a very skilful and efficient gunner. There was a sad paucity of artillerymen, and such a hand was highly appreciated. A day or two before, the officer commanding a battery on the left which had lost several men, had applied to Dowling for assistance, adding, "And, for God's sake, send one Englishman."—*All the Year Round.*

Lieutenant Smith, Royal Engineers, and Lieutenant Porcher, R.N., are under orders to leave Malta in the gunboat Boxer, to proceed to Tripoli, there to pursue some researches of an antiquarian character.

THE ARMY AND NAVY GAZETTE
AND
JOURNAL OF THE MILITIA AND VOLUNTEER FORCES.
EDITED BY W. H. RUSSELL, ESQ., LL.D.,
(Late Special Correspondent of *The Times*.)

The subscription is 7*s.* 7*d.* per quarter, or 30*s.* 4*d.* per annum, payable in advance, postage included (excepting abroad, which varies according to the route and destination). All Editorial Communications should be addressed to W. H. RUSSELL, Esq., and business letters and advertisements to MR. ARCHIBALD GRAHAM, to whom post-office orders, &c., are payable. Advertisements received up to Thursday evening. The Paper is published every Saturday in time for the Morning Mails.

Office, 16, Wellington Street, Strand, London, W.C.

STAFF EXAMINATIONS.—ALL BOOKS REQUIRED for Staff and other Examinations may be had at MITCHELL'S MILITARY LIBRARY, 39, CHARING CROSS, S.W.

Just published, with Maps and Index,
THE ANNALS of the WARS of the XVIIIth CENTURY.
By Lieutenant-General the Hon. Sir E. CUST.

Volume I. 1700—1739. | Volume III. 1760—1783.
Volume II. 1739—1759. | Volume IV. 1784—1795.
Volume V. 1796—1799.

Each Volume is complete in itself, and may be had separate, price 5*s.* each.

"A military text-book."—*Athenæum.*
"The 'Annals' are invaluable to the soldier who desires to know the history of his profession."—*Times.*
"These volumes supply a store of profitable reading to the soldier or sailor."—*Saturday Review.*
"A lucid summary of all the most important operations (naval as well as military) of the eighteenth century."—*Army and Navy Gazette.*

W. MITCHELL, Military Bookseller, 39, Charing Cross, London, S.W.

BOX OF MILITARY BLOCKS, illustrative of the Field Exercise and Evolutions of the Army, 10*s.* 6*d.*
A CATALOGUE OF MILITARY BOOKS SENT ON APPLICATION.
W. MITCHELL, Bookseller and Publisher, 39, Charing Cross, S.W.

RIFLE VOLUNTEER BANDS.—Officers in command are invited to apply to BOOSEY & SONS for a LIST OF THEIR MILITARY MUSICAL INSTRUMENTS, forwarded free.—BOOSEY & SONS, 24, Holles Street, W.

BUGLES FOR VOLUNTEER CORPS, Government pattern, corresponding to those used in the Line, very best make, price, in copper, 42*s.*, or strongly electro-plated, 63*s.*; green cord and tassels, 3*s.* 6*d.*; silk ditto, 8*s.*; enamelled leather case, with strap and buckle, 12*s.* Sent carriage free on receipt of a remittance.—BOOSEY & SONS, Military Musical Instrument Manufacturers, Holles Street, London, W. Volunteer Bands furnished with instruments and music of every description.

THE LONDON RIFLE BRIGADE BAND of 21 performers, is provided entirely by H. DISTIN with his newly-invented VENTIL-HORNS. Distin's new RIFLE BUGLE, adopted and sealed as the Government pattern for the Army, can now be had, complete, price 2*l.* 2*s.*, from the Contractor, at his Manufactory, 9, Great Newport Street, St. Martin's Lane, W.C. Estimates for Bands post free. Retail Depot, 21, Tichborne Street, Regent Street, W.

BENSON'S WATCHES.
"Perfection of mechanism."—*Morning Post.*
Gold Watches, 5 to 100 guineas; Silver, 2 to 50 guineas. Send two stamps for Benson's Illustrated Pamphlet, descriptive of every construction of watch now made. Watches sent to all parts of the world.—33 and 34, Ludgate Hill, E.C. Established 1749.

ARMY, NAVY, AND COLONIAL AGENCY.—On and after 1st January, 1861, Messrs. W. R. LOOKER & Co. offer the services of their AGENCY to Officers and Members of the above Services at a fixed charge of ONE GUINEA PER ANNUM. A detailed prospectus forwarded on application.—12, Pall Mall East, London, S.W.

MONEY ADVANCED on BILLS, PROMISSORY NOTES, POST-OBIT BONDS, or other securities, and at 5 per cent., on property derived under wills or settlements, without publicity or delay. Confidential applications may be addressed to Mr. MORRIS, Solicitor, 11, Beaufort Buildings, Strand, opposite Exeter Hall, W.C.

Le Phare de la Manche has a lengthened notice of the new victualling store-houses, now in course of erection at Cherbourg, and which it is expected will be completed at the end of next year, or at the commencement of 1862. These buildings are situated in the south-eastern part of the Arsenal, and stand out conspicuously from all the other edifices, from the close resemblance which they bear to the warehouses in the London docks; the cost will exceed four millions of francs. The ground upon which they are built presented great engineering difficulties, and it was found necessary to make use of piles, of which about 6000 have been sunk. They are four stories high, and will be provided with flour mills, ovens, stores for wines, and for all other descriptions of provisions.

We learn from Cherbourg that the ship of the line La Ville de Nantes, which was launched on the 7th of August, 1858, at the time when their Imperial Majesties were present to inaugurate the basin Napoleon III., is about to be fitted out. This ship is provided with a screw steam-power of 900 horses. Her engines were manufactured at Cherbourg and have been most successfully tested. She will be ready for sea in the spring.

L'Abeille de l'Orient informs all concerned that the prize money for the capture of Kertch in 1855, and for that of Canton in 1857, will be ready for distribution to those persons who can substantiate their claims.

By an imperial decree we find that the French Minister of Marine has been authorised to take an extraordinary credit of 33,354,500 francs (about 1,334,200*l.*) to meet the demands for conveying and provisioning troops intended for service in China and in Syria.

H.M.S. Hero and the Royal Squadron are making a long passage of it from Portland. They started on the 20th ultimo, and to-day at 4 p.m. they were twenty clear days at sea. The prevalence of easterly winds has been doutless the sole cause of the delay which has taken place in the arrival at home of His Royal Highness the Prince of Wales, as it was fully calculated when the ships left the shores of America he would have been in England on the anniversary of his natal day. Yesterday evening there was a dispatch in London from Portsmouth announcing the appearance off the Nab of a large ship, which it was expected would turn out to be the Hero, and in that case the Prince would reach Windsor Castle in the course of the evening.

NOTICES TO CORRESPONDENTS.

We have received a letter from "a ward-room officer," defending Captain Seccombe of the Himalaya from an attack which did not appear in this journal. Those who are acquainted with Captain Seccombe will not require him or any of his friends to make a laboured defence against charges of cowardly and unofficerlike conduct; and the ground on which "a ward-room officer" rests his argument is not exactly of the nature which we should like to select on which to maintain a friend's quarrel. Strict compliance with the letter of the Queen's Regulations, whether "cap. 10, art. 20, p. 1120," or not, may still cover an offence against the spirit in which all the Regulations are conceived for the advantage of the Service. It would be an unworthy act, of which we do not think Captain Seccombe capable, to avail himself of the protection of the Regulations and of his own position on board his own ship to insult a number of officers of lower standing, who were taking their passage in the Himalaya.

Surely "Anti-Puritan" would not seriously ask us to print his letter? If he knows on good authority that "many" of the officers in question "are a set of lying, sneaking, hypocritical scamps," he should communicate his information to the proper quarter. If women go on board to hold prayer meetings it may be doubted whether the result is worse than if they went for other purposes, even though the chaplain objects to it. We are as much opposed as our correspondent to what he calls, rather pleonastically, "a spurious, unhealthy counterfeit of religion," but we do not attribute the mischief alluded to in his letter to the causes he assigns.

We have received a copy of a very long letter from Mr. R. Rayneford Jackson, Major-Commanding 3rd Brigade, London Artillery Volunteers, impugning the grounds on which Colonel Woodhouse based his decisions respecting the relative merits of the artillery practice at the Hightown competition; but as we do not see what good would be gained by its insertion, we must spare our columns for more useful matter. Without any offence, we think we may add that our knowledge of Colonel Woodhouse leads us to regard him as a safer guide in matters relating to artillery practice than Major Jackson.

H. R.—Our correspondent, who advocates the establishment of Volunteer gun-boats, is informed that the idea is not new, but that there is no prospect of its being carried into effect.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the EDITOR cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

It is particularly requested that applications for copies of the ARMY AND NAVY GAZETTE, &c., and advertisements be sent to the Publisher, MR. ARCHIBALD GRAHAM, and not to the EDITOR.

Army & Navy Gazette.

LONDON, SATURDAY, NOVEMBER 10, 1860.

Two hundred years ago a common seaman could rise to be an Admiral in the British Navy. What blue-jacket has not read of Sir Cloudesley Shovel, the Whittington of the sea, who, born in a hut in Norfolk, now rests in Westminster Abbey? Such things do not happen in our day. Are they now possible? Are they desirable? Are such prospects useful for drawing men into the Service? Can they have the least influence, when men wake up to the thought that, after all, such a case has not occurred for centuries?

These remarks have been suggested by the consideration of the petition of the Warrant-Officers of the Navy to the Board of Admiralty, which appeared in the GAZETTE of the 20th ultimo. There, the warrant-officers distinctly say they would rather have in view some certain attainable good and present advantages, than the distant hope of a possible commission. They refer to their Lordships' Circular, No. 121, of 14th June, 1853, which followed upon the report of the Manning Committee of 1852, signifying "that warrant-officers of exemplary conduct, who have *distinguished themselves by acts of gallantry and daring in the Service*, shall be considered eligible to hold commissions;" but they evidently regard this as of a somewhat pie-crusty character, though they express themselves with due regard to the *suaviter in modo*. They say, "With regard to the commission and consequent 100*l.* for an outfit—*vide* Admiralty Circular, June 14th, 1853—as no warrant-officer has yet been deemed eligible for this distinction (although five have been decorated with the Victoria Cross for 'distinguished acts of gallantry and daring in the Service'), we would cheerfully waive all claim to such promotion, and consider the rank of warrant-officer—as in reality it is—the highest attainable to seamen in the Service; but at the same time render it more worthy of aspiring to." There is a great deal of good sense in this; and we certainly think that to double the present allowance of 15*l.*, granted when the warrant is attained (but which is quite inadequate for rigging out the officer with a proper outfit, as is intended), would be a much more substantial benefit to a most deserving class of naval officers than this hung-up 100*l.*, so very far above their reach. A sail in the mirage does not frighten "Jack" in these days of increased knowledge; and it was not likely he would feel greatly flattered or very long pleased at being expected to keep up a hearty chase after a pecuniary prize, with so much of the Flying Dutchman about it!

There are several other matters in the petition of the gunners, boatswains, and carpenters of the Royal Navy, well worthy of the most earnest consideration of their Lordships. Some points we have our doubts about, chiefly because we so highly approve of others, with which they do not seem to be quite congruous: that, for instance, as to the rank of the proposed three classes, with masters, mates, and second masters. This to us does not appear to accord in spirit with what we have already specifically commended—the giving up all claim to commissions for acts of daring, which are, in fact, almost common in the Navy. Then, again, we do not know why they speak of "three years only counting as one," while they are on reduced pay, since the Circular already mentioned says, "In the cases of officers of exemplary character and conduct, two years' harbour service are to be considered as equal to one year's sea service."

Their request to be considered eligible for the position of chief officers in the Coast-Guard (where there are now several vacancies); to have presentations for their sons to the Upper School at Greenwich; and themselves to be eligible for admission to the benefits of Greenwich Hospital, both as resident officers and out-pensioners—we think all deserve the most prompt attention. As regards others, there may be greater difficulty; and, if so, we trust this will not be made an excuse for not granting quickly those respecting which there can scarcely be two opinions.

We cannot close this article without observing that we recognise the many difficulties which exist to dealing with what are called "naval grievances" affecting the *personnel* of the fleet. Each rank has its own traditions; and, besides the general *esprit de corps* of the Navy—which, notwithstanding what alarmists may say, we venture to declare is as true-blue as ever—there are numerous little troublesome spirits on board—only, however, after all, analogous to what induces John Bull's proverbial "grumbling" on shore—now in the ward-room, now in the gun-room, and now in the cock-pit and forecastle, which keep rapping incessantly at the Board of Admiralty, and send their Lordships and the clerks all running about their rooms, till the poor officials are at their wits' end. We would pray our naval heroes to sail easy, and, at all events, not to cross their fire in such damaging sort, though it may be capital fun to point broadsides at Whitehall and Somerset House. In the paragraph, "A Glance at the Navy," in the GAZETTE of 27th October, will be found a plea for the warrant-officers, put forward the week after they spoke for themselves, which is a specimen of this cross fire. Our correspondent complains on their behalf that there is "no Admiral's flag in the distance!" But the warrant-officers (and we agree with them) think it so completely "in the distance," that they would rather not have it counted as one of their prizes. Our correspondent also pictures, with a vivid imagination, a deficiency of seamen, "because we do not train a sufficient number of boys; *while those we do train we let slip through our fingers out of the Service after their first period of service has expired!*" This we call very fast sailing. He is aware the continuous service engagements are for ten years from the age of eighteen, but he has forgotten that this system only commenced in 1853; so that even if every boy entered had been full eighteen years old on entering, not a single "period of service" could possibly yet have expired! This "yarn" should not have been spun for three or four years yet to come!

We will only add that we do not wish it to be enacted that in no case can a seaman rise to a commission, however he may distinguish himself. If this could happen in the days of Elizabeth, we think it might even now; but when the occasion occurs, the hero so promoted may depend upon something better, from a grateful country, than merely the 100*l.* which he can claim by Admiralty Circular.

Our readers are aware that among the means recently adopted for the instruction and amusement of the soldier, the authorities have very much encouraged occasional lectures, and had contributed diagrams, magic-lanterns, &c., to assist the effect of these, to say the least of it, harmless *séances*. Some time since a letter from the Council of Military Education was issued, asking officers to come forward and deliver lectures upon subjects upon which they might possess information, and which might be suitable for the purpose. In the Dublin district this was made public by General Gascoigne, who added strong expressions of approbation, and we believe even ventured to say that it might be wholesome and useful to the lecturers themselves. In consequence, we presume, of this, an officer quartered in Dublin lately offered to deliver

Digitized by Google

a lecture to the men of the garrison. But on his offer being submitted to the Commander of the Forces, Sir George Brown, it was met by the snub direct. The officer was told that it was his business to attend to the affairs of his company, not to take upon himself the duties of a lecturer or schoolmaster, and the permission solicited was peremptorily declined. We are sorry to find an officer so distinguished as Sir George Brown indulging in what we cannot help thinking a most reprehensible and unfortunate proceeding. If the officer in question neglected his first duty, namely, the charge of his company, it is of course quite right that he should be reprimanded. But if he chooses to devote a portion of his leisure to the recreation and instruction of his men, he ought at least to be protected from a rude assault of this description. So far we speak of the taste and policy of the Commander-in-Chief in Ireland in the matter. As a question of discipline, however, it must be considered as especially unfortunate that that which the Secretary of State for War and the Commander-in-Chief of the Army have been encouraging in a most marked manner, should be reprobated, as it were, by an officer in very high, but still subordinate command. It cannot have a good effect upon the mind of either officer or soldier, to find that what is warmly approved at Aldershot is denounced at the Curragh, or in Dublin; nor is it calculated to inspire either with much respect for the heads of the profession, that the acceptance of the invitation of one general officer should be insultingly censured by another. The other day somebody in the name of Sir Hugh Rose issued a most vexatious order respecting soldiers' pets in India, which Sir Hugh disavowed, condemned, and revoked, on hearing of it. Discipline does not consist in a sulky obedience to the letter of an order with a violation of its spirit, and it is highly desirable that it should be distinctly known whether Her Majesty, through her Secretary of State and her Commander-in-Chief, or Sir George Brown, is to have the regulation of these matters. Clearly, unless the matter is defined, there must be a very unseemly and mischievous conflict of authority.

The following officers and men had the Victoria Cross conferred upon them yesterday at Windsor by Her Majesty. The acts of gallantry which earned for them the distinction were all performed during the Indian Mutiny, and have been already duly recorded: Mr. William Fraser M'Donnell, of the Bengal Civil Service; Major Fraser, of the 11th (late of the 7th) Hussars; Major Renny, Bengal Horse Artillery; Captain A. S. Cameron, of the 25th Regiment, late of the 72nd Highlanders; Lieutenant J. G. Malcolmson, 3rd Bombay Light Cavalry; Surgeon Gee, C.B., 78th Highlanders; Colour-Sergeant G. Waller, 1st Battalion 60th Rifles; Colour-Sergeant S. Garvin, 1st Battalion 60th Rifles; Colour-Sergeant J. Munro, late 93rd Highlanders; Farrier George Hollis, late 8th Hussars; Bugler W. Sutton, 1st Battalion 60th Rifles; Private Morley, 2nd Battalion Military Train; Privates J. Kirk and D. Dempsey, 1st Battalion 10th Regiment; Private H. Addison, late 43rd Regiment; and Privates J. Thompson and J. Divane, 1st Battalion 60th Rifles.

A General Order has been issued by the General commanding the forces in Ireland, directing that "the infantry are at all seasons to attend morning parade in their tunics and chakos, and to appear in that dress when out of barracks until dinner hour, after which time shell jackets and forage caps are to be worn from the 1st of April to the 31st of October. During the period from the 1st of November to the 31st of March the use of shell jackets is altogether to be discontinued, excepting on duties of fatigue, unless when worn under the great coat. During the winter season, and in cold weather, the men are to be allowed to wear their great coats over their shell jackets or other clothing, whether on or off duty." We confess this order appears open to serious objection. Soldiers receive but one tunic in the year, and a chako every two years; and with the increased wear of these articles it will be almost impossible to keep the men decently clad. The order will prove vexatious and expensive to the soldier; and we are altogether at a loss to understand what compensating advantage can be gained to the efficiency of the Service or the interests of the public.

Lieut.-Colonel A. J. Fremantle, of the Coldstream Guards, has been appointed Assistant Military Secretary to Sir William Codrington, Governor of Gibraltar, in the room of Captain Earle, Grenadier Guards, who has been apointed adjutant of his battalion.

Captain R. K. Freeth, R.A., has been appointed for temporary duty in the Inspector of Artillery's department, to assist in the inspection of guns in store at the different stations in the country.

In consequence of the aproaching transfer of the Indian Army to the Horse Guards, Colonel Norman has been appointed Assistant Military Secretary to His Royal Highness the General Commanding-in-Chief.

We believe that the earliest opportunity will be taken of advancing Lieutenant Rogers, 44th Regiment, and Lieutenant Burslem, 67th Regiment, to the rank of Captain, and Ensign Chaplin to that of Lieutenant, for the gallant conduct exhibited by these officers in the attack on the Taku forts. Although they have been recommended for the Victoria Cross, we understand that the formal recommendation which must precede its bestowal has not yet been received in England.

The Secretary of State for War, having had under his consideration the advantage which would accrue to the Service, by furnishing the cabins of officers ordered on foreign duty in Her Majesty's transports (especially when such orders are transmitted too suddenly to permit officers to outfit themselves), has directed Commander Seccombe, R.N., of the troopship Himalaya, to report upon such articles of furniture as, after an inquiry, appear to him to be best suited to the purpose required. The great experience which the gallant officer has had in this sort of duty, peculiarly fits him to give advice on this matter.

The Army and Navy will learn with pleasure that Sir Hope Grant has been made a Grand Cross, and Admiral Hope a Knight Commander of the Bath. Although we are not yet as prompt as our allies in the distribution of honours—General Montauban was made a Senator some days ago—we must yet approve the acceleration of the official machine in this instance. Other rewards for service in China await the more detailed recommendations of the commander of the expeditionary force.

We believe that the results of the experiments at Hythe and Woolwich in 1857 were not sufficient to prove, or even to indicate, any superiority in the Whitworth over the Enfield rifle, in respect of its use as a military arm; and though the trials made by the Committee in 1859 gave much useful information upon the subject, the impossibility of testing the arm in respect to a most important particular, viz., as to the fouling of the barrel from repeated firing, under various circumstances, prevented the Committee from making any recommendation as regards a change in the system at present adopted. This arose from Mr. Whitworth's delay in supplying ammunition, and we believe that many other obstacles, which from time to time were occasioned to the investigations of the Committee, were owing to the same or similar causes. In regard to Mr. Whitworth's rifled cannon, we understand that in August last he was requested to send his 80-pounder and 12-pounder guns (which he had agreed to sell to the Government) to Woolwich, and that those guns have only been dispatched from Mr. Whitworth's works within the last few days.

With reference to the recent Circular respecting the examination of Militia officers for commissions in the Line, it may be well for us to say that no exception as regards age will be made in the case of officers who have served in the Militia. They must be within the age prescribed for civilians, and none are eligible for commissions who cannot comply with the regulations in this respect.

We lately announced that it was the intention of the Lords of the Admiralty to build three additional iron-plated steam war-ships, and that two of these ships were to be constructed by private contract. In accordance with this decision circulars were addressed to six extensive iron ship-building firms, calling upon them to send in to Whitehall tenders for the required work not later than the 5th inst. This was strictly complied with, as at 12 o'clock on the day named, each firm had lodged at the proper office every necessary document; and, as might have been expected, when the gigantic and expensive nature of the undertaking called upon to be executed is taken into consideration, much anxiety was displayed on the following day by the parties chiefly interested to ascertain the names of the fortunate and successful competitors; but great was the surprise of all to find that a change had come over the views of their Lordships, and to learn that at the twelfth hour the Warrior model with its upright sides had been rejected, in order that an opportunity might be afforded to investigate the plans which for some weeks past have been brought under the notice of the authorities by the press, as possessing greater powers of resistance to shot and shell than those hitherto approved of by the Admiralty. This decision will equally affect the vessel ordered to be built at Chatham Dockyard, so that, as the matter now stands, we are precisely in the same position as we were prior to the issue of the above-named circulars.

By the death of Admiral of the Blue Sir Charles Napier, K.C.B., the following changes will take place. Vice-Admiral of the Red Sir Augustus William James Clifford, Bart., C.B. is advanced to the Admiral's list. Vice-Admiral Sir Houston Stewart, K.C.B., Commander-in-Chief at Devonport, changes his flag from White at the fore to Red at the fore. Vice-Admiral of the Blue the Hon. Sir Richard Saunders Dundas, K.C.B., First Sea Lord of the Admiralty, becomes Vice-Admiral of the White. Rear-Admiral of the Red Sir Henry Byam Martin, K.C.B., is moved on to the list of Vice-Admirals of the Blue. Rear-Admiral of the White Henry Francis Greville, C.B., is promoted to the Red squadron. Rear-Admiral of the Blue John Elphinstone Erskine, now in command of one of the Divisions of the Channel Fleet, will change his flag from Blue at the mizen to White at the mizen, and Captain Thomas Leeke Massie is promoted to the rank of Rear-Admiral of the Blue, leaving Captain Sir Edward Belcher, C.B., the senior captain for advancement to the flag list. Captain James Robert Drummond, C.B., Commodore at Woolwich, will be entitled to half pay of 14*s.* 6*d.* per diem, and Captain Geoffrey Thomas Phipps Hornby to that of 12*s.* 6*d.* In addition to all these movements on the list, His Grace the Duke of Somerset will have at his disposal an Admiral's good-service pension, and a Captain's ditto.

The Admiral's good service pension, rendered vacant by the demise of Admiral the Earl of Dundonald, and which is in the gift of the First Lord of the Admiralty, has been bestowed upon Admiral of the Red Sir Edward Durnford King, Kt., K.C.H., who entered the navy in 1786, and served as midshipman in the Barfleur in Lord Howe's action. He was senior lieutenant of the Dryad at the capture of the French frigate Proserpine, in 1796, and for his services was gazetted. He was captain of the Leviathan at the capture of the Danish and Swedish West India islands in 1801, and was again gazetted; captain of the Endymion during the blockade of Cadiz, and employed watching the enemy's fleet prior to the battle of Trafalgar; and in the same ship assisted at the defence of Gaeta in 1806, and captain of the Monmouth at the capture of Tranquebar.

The good service pension vacant by the death of Sir Charles Napier will be awarded to an Admiral as soon as the First Lord of the Admiralty can decide upon whom to bestow it.

The Captain's good service pension, rendered vacant by the promotion of Captain Thomas Matthew C. Symonds, C.B., to flag rank, has been given to Captain Henry Mangles Denham, who has been employed in the Herald, surveying vessel, since February, 1852. Captain Denham was born in 1800, and entered the Navy in 1809 as a Volunteer on board the Daphne, 20; and, previous to his appointment to the Herald, assisted in the survey of the Channel Islands and the English and St. George's Channels, and also many of the harbours along the English and Irish coasts. He conducted the survey of the Bristol Channel throughout; was commander of the Avon, and conducted the survey of the West Coast of Africa from Cape St. Paul to the Niger.

Commander Henry Christian (1858) has been nominated to succeed His Serene Highness the Prince of Leiningen in the Royal Yacht. Commander Christian is now serving in the Euryalus; but, as His Royal Highness the Prince Alfred will now leave this vessel, she will no longer carry a commander. It is reported that the other officers and crew of the Euryalus will be turned over to the Immortalité.

Captain James J. M'Cleverty, C.B. (1848), now in command of the Cambrian frigate on the China station, has been appointed to receive the Captain's Good Service Pension, vacant by the promotion of Captain Massie.

His Royal Highness the Prince Alfred arrived yesterday morning in Plymouth Sound on board the Euryalus, Captain John W. Tarleton, C.B. The Prince landed without delay, and immediately proceeded by express train to Windsor Castle. The Euryalus is ordered round to Portsmouth.

AUSTRIA.

The new Austrian Minister of War, Lieutenant-Field-Marshal Count Augustus Francis John Christopher Degenfeld-Schönburg, Knight of the Order of Maria Theresa, of the Iron Crown, &c., &c., was born on the 10th December, 1798. He was actively engaged in the Italian campaign of 1848. At the battle of Novara, 1849, he greatly distinguished himself.

General Benedek has been appointed to the supreme command in the kingdom of Lombardo-Venetia, Carnsola, Carinthia, Tyrol, and the coast lands.

Archduke William of Austria goes to Italy as Commander-in-Chief of the Artillery, under Benedek; Archduke Albrecht as commander of the 8th *corps d'armée.*

The *Militär Zeitung,* of the 31st ult., published a martial ode in honour of Benedek and the Archduke Albrecht, pointing out the new laurels that await them on the Mincio.

The *Augsburg Gazette* learns from Verona that the garrison of Mantua consists of two battalions of the Regiment Don Miguel, two battalions of Hess, two battalions of Prohaska, one battalion of Baden, one battalion of Jagers, and two troops of Haller Hussars. As 12,000 loaves are distributed daily, it is to be supposed that the garrison of the fortress consists of about as many thousand men. On the right bank of the Po—at Suzzara, Gonzaga, Bondeno, Maglia, Polesina, and Poggio—are 6000 men. Marmirolo and Villafranca, on the line of the Mincio, have powerful garrisons. Immense quantities of ammunition, &c., are now sent from the terminus at Verona to Mantua. At Sebastiani, on the Po, there are the materials for two pontoon bridges, two large iron steamers, and one small tug steamer. The army in Venetia is now composed of 35 regiments of 3000 men, 19 battalions of Jagers of 900 men, and 30 batteries. Six of the batteries have rifled guns. The strength of the cavalry is not exactly known, but doubtless it is in proportion to the infantry and artillery. The 5th *corps d'armée* is about to enter Venetia. The strongest garrisons are in Verona and Venice.

ENGLISH SOLDIERS THROUGH FRENCH GLASSES.

A few weeks back* we called the attention of our readers to the first of a series of articles in the *Revue des Deux Mondes* on the English Army: since our remarks were penned, the second article of this series has made its appearance,† and as it is characterised by the same fair and impartial spirit, and by the same intimate acquaintance with the subject, for which its predecessor was so remarkable, we wish to introduce it to the notice of our readers, with a few remarks which may not be out of place.

In his first article M. Esquiros examined the condition of our military colleges and arsenals; the present article he devotes to a consideration of our system of regimental interior economy, the life and habits, and, generally, the social conditions of our soldiers. This difficult task he accomplishes with singular success. His insight into our military system and institutions is, indeed, very complete, and he touches upon the different points most worthy of note, with a judgment which is seldom at fault. He spares no pains to make himself acquainted with his subject; he travels down to Aldershot, and gives us a vivid and truthful account of it; he is struck with the excellent care taken of our soldiers, with the high rate of pay which they receive as compared with those of foreign armies, and with the attention paid to their physical and moral welfare; but he is not content with a mere superficial acquaintance with these facts. He wants to know the reason of all this; he searches about, and makes his observations and inquiries, and at last discovers it. "Il y a une principe tout Anglais," he tells his readers, "admis par la plupart des entreprises industrielles, c'est qu'un homme bien payé, bien nourri, bien entrétenu, en vaut deux;" he spies out the weak points in our system of pay, and very properly condemns our plan of stoppages and deductions, summing up the well-known arguments against it with considerable ability. He is opposed to flogging, but he states his objections with a moderation which some amongst us might do well to imitate; and he constantly bears in mind the fact, that some of the highest military authorities have held different opinions to himself upon the subject, and that those opinions deserve more respect than persons with a very superficial knowledge of military matters are in the habit of vouchsafing to them. M. Esquiros, knowing a good deal about military matters, admits the possibility of there being two sides to the question, and does not allow himself to be blinded with prejudice, or carried away helplessly by the flood of his own eloquence. The conclusion of his remarks upon this subject may be perused with advantage by his own countrymen, especially by those in authority; and the readiness with which he avails himself of the opportunity of breaking a lance for the freedom of the press, is only natural on the part of a Frenchman who has dwelt long enough in England to be alive to the advantages which we enjoy in this respect. "Une autre considération," he remarks, "et selon moi plus vraie, est que dans la Grande Brétagne la liberté de la presse et de la parole exerce une active surveillance sur le système, quel qu'il soit, de punitions militaires."

The number of married soldiers in the English Army attracts our author's attention, and his remarks upon the subject will be perused with interest. The opportunity for relating an anecdote, flavoured with romance, and pointed with conjugal infidelity, is too tempting for a Frenchman to let slip, and accordingly we have the story of "la frêle et inconstante" Margaret Burns, who, from being the most devoted of wives, seems to have become a very naughty young lady indeed.

Sometimes, it is true, M. Esquiros sees the advantages of a particular system without its defects, and *vice versâ*. When speaking of the bounty system, for example, he does not allude to its abuses, or to the evil results which those better informed are able to trace to this cause; on the contrary, having concluded, and not without justice, that to this system may be attributed, in a great measure, the rapidity and certainty with which we are able to recruit an army composed entirely of volunteers, and after admiring the simple machinery of raising the bounty and lowering the standard of height, or the reverse, which we bring into play, according as we desire to attract or repel recruits, he observes of the system, "Il n'y a donc point de raisons pour le changer." Unfortunately we cannot agree with our author on this subject.

We wish, too, that the malpractices of the recruiting sergeants were always as venial as those which M. Esquiros describes in a humorous sketch; we fear that they not unfrequently have a better reason for looking "un peu confus," as our author has seen them, when conducting a batch of recruits, than the reflection that many of these lads have been inveigled away from their homes by such over-coloured descriptions of the pleasures of soldiering in general, and of foreign services in particular, as we should imagine could only have been painted by Irishmen, if M. Esquiros did not, either innocently or designedly, indicate the contrary, by making them talk of "ale and *wisky*."

We are afraid, on the whole, M. Esquiros will hardly find favour with his Irish readers. Not content with omitting the all-important aspirate, he, further on, speaks of their country as "la terre classique de la misère," an expression which smacks so strongly of some used by Irish patriots in that celebrated speech to a French marshal, that we are half inclined to think that M. Esquiros must have picked it up on that occasion, and now applies it either from an innocent, though honest, conviction that he is making his statements on the best authority, or in a fine vein of sarcasm.

Nothing, on the whole, could be fairer, or more accurate than M. Esquiros' account of the life of the English soldier: he sees not merely the life as it appears to casual observers, but he places his hand on the very pulses in which it throbs, and over the heart in which it beats, and he shows such a thorough appreciation of our national habits and characteristics as could only be acquired by a lengthened residence in this country, and without which he would have been quite unable to produce the elaborate and faithful article which is now before us; we might instance especially his remarks upon the relative social position of the men and officers of the British Army, and his views upon the vexed question of rising from the ranks. With the latter subject, indeed, he proves himself so intimate, that those who are desirous of becoming acquainted with its pros and cons cannot do better than peruse M. Esquiros' remark; his concluding paragraph on the subject, and the simile which it contains, appear to us so apt and to the point that we will yield to the temptation of quoting it:—

"J'ai lu dans un récit Anglais que, lorsqu'un roi de l'Inde en voulait à un grand seigneur, il lui faisait cadeau d'un éléphant blanc. La distinction attachée à cette faveur royale exige en effet que l'animal se nourrise de l'orge la plus fine et des meilleurs fruits, de telle sorte qu' après un certain temps le grand seigneur ruiné se voit réduit à la nécessité de vendre ses domaines. Les intentions du gouvernement Anglais sont à coup sûr bien différentes des vues du monarque barbare: le sous-officier n'en a pas moins de très bonnes raisons pour envisager la commission qui lui est offerte comme un honneur calamiteux et, pour tout dire, comme un éléphant blanc qui dévorerait la substance du maître. Il est permis de regretter sous certain rapports cette forte division de l'armée Anglaise; mais au point de vue stratégique elle ajoute plus qu'on ne croit à la valeur des troupes. Habitué à regarder les officiers comme des êtres supérieurs, le soldat les suit avec une sorte de vénération enthousiaste et rougirait de ne point s'exposer lui-même toutes les fois qu'ils s'exposent au danger."

Our remarks upon M. Esquiros' admirable article have extended to a greater length than we had anticipated, and we must bring them to a conclusion; but before doing so we must make one more quotation, which will suffice to show, if we have not succeeded in doing so already, that M. Esquiros is master of the subject on which he writes, and that we may fairly commit the more delicate subject of the Volunteers (which he promises to discuss in his next article) to his hands:

"Le soldat Anglais est brave, mais il y a plus d'un genre de courage. Les Anglais ont un mot à eux qui n'est guère usité que dans le langage familier et qui pourtant exprime bien la nuance d'intrépidité qui distingue la race. Ce mot, derivé de l'ancien Saxon, c'est le mot *pluck;* il indique l'idée d'un effort énergique, et s'entend aussi bien de l'homme qui déracine un arbre que de celui qui arrache un obstacle dans l'ordre moral. On l'emploie pour signifier le courage, mais le courage uni à la fermeté, à l'obstination, au sang-froid, à une résolution croissante, et qui ne cède jamais. Les soldats Anglais ont d'autres ennemis à combattre que les armées étrangères; ils ont les tempêtes, les naufrages, les climats, les déserts; il leur faut être à la fois braves contre les hommes et contre les choses. Tout cela c'est le *pluck*. Le rude mot Saxon indique en outre un genre de valeur soumis à la réflexion et au contrôle du devoir."

It is very refreshing to find a Frenchman giving such a good account of us to his countrymen; and it is still more satisfactory to reflect that the pleasure which we derive from a perusal of this account is not produced by any neat, tickling flattery, or honeyed misrepresentation on the part of the author, but by his straightforward honesty and accuracy. For our own parts, from a comparison of the condition of our own with that of foreign armies, we are convinced that the military system of no other country would bear the scrutiny to which M. Esquiros has subjected ours, and come out of it with such flying colours. There are some persons, however, who are in the habit, if not of abusing, at least of disparaging wholesale our institutions. They may perhaps be tempted to think a little better of them after a perusal of M. Esquiros' remarks.

DEATH OF ADMIRAL SIR CHARLES NAPIER, K.C.B.

From the nature of the paragraph we penned last week our readers will not be surprised to find that Admiral Sir Charles Napier is no more. He expired on Tuesday morning at 5·40 a.m. at Merchistoun House, the gallant admiral's seat at Horndean, Hants. The late admiral was suddenly seized with his fatal illness about a fortnight since, and was thought to be going on favourably until the end of last week, when he had a relapse, which we regret to say terminated fatally.

The late Admiral Sir Charles Napier was the eldest son of the Hon. Charles Napier, second son of the sixth Lord Napier, and was born March 6, 1786, so that he was in his 75th year. The subjoined brief summary of his naval services is abridged from "The Men of the Time":—

"He entered the Royal Navy in 1799, as a first-class volunteer on board the Martin sloop of war, Captain the Hon. Matthew St. Clair, employed in the North Sea. Removed in the early part of the ensuing year to the Renown, 74, the flag-ship of Sir John Borlase Warren, he accompanied an expedition to Ferrol, and afterwards to the Mediterranean; where, in November, 1802, he became midshipman of the Greyhound, 32, Captain William Hoste. On his return from a visit to St. Helena in the Egyptienne, he joined successively in 1804-5 the Mediator and Renommée frigates. In 1805 he was appointed lieutenant of the Courageux, 74, which formed part of the squadron under Sir J. B. Warren at the capture, in 1806, of the Marengo, 80, the flag-ship of Admiral Linois, and the Belle Poule frigate, 40; and in March, 1807, being then in the West Indies, in the Prince George, 98, was nominated acting-commander of the Pultusk brig, to which vessel he was confirmed on the 30th of November following. On the 17th of July, 1808, having been present at the reduction of the Danish islands, St. Thomas and St. Croix, he assisted, in the boats of the Fawn sloop, at the cutting out of a Spanish merchantman, lying at Puerto Rico under the protection of two batteries, the guns of one of which he spiked. In August of the same year he commanded the Recruit brig, of 18 guns, in which he fought a smart action with the Diligente, a French corvette, of 22 guns; which, after he had had his mainmast shot away, many of his carronades dismounted, some of his men killed, and himself wounded, he succeeded in putting to flight. On this occasion, although his thigh was broken by a shot, he refused to leave the deck until the enemy was out of sight. In February, 1809, he assisted at the reduction of Martinique, where he gained considerable distinction, and shortened the duration of the siege by the manner in which, with only five men, he scaled the walls and in open day planted the Union Jack upon the ramparts of Fort Edward. In the ensuing April he assisted Sir Alexander Cochrane in a chase of three ships of the line, which lasted upwards of two days, and which terminated in the capture of the Haupolt, 74. He was made a post captain on the 22nd of May, 1809, but did not go afloat again till 1811. After performing many brilliant services his ship, the Euryalus, was paid off in June, 1815, and on the 4th of that month her gallant commander was nominated a C.B. He was not called into action again till the 8th of January, 1829, when he was employed on particular service on the coast of Portugal, in the Galatea, 42. On the retirement, or rather dismissal, of Sartorius from the command of the Portuguese fleet, it was offered to and accepted by Napier; and, in spite of the great difficulties by which he was surrounded, he soon managed to give a good account of the enemy.

"On the 1st of January, 1839, Captain Napier was appointed to the command of Her Majesty's ship Powerful, 84, fitting for the Mediterranean, in which ship he hoisted, in 1840, his broad pennant as commodore, and became second in command under Sir R. Stopford, of the fleet employed on the coast of Syria. On the 10th of September of that year he effected a landing at D'Journie at the head of 1500 Turks and British marines, and in this, his first operation on the Syrian coast, he displayed such indefatigable zeal as to elicit the warmest consideration from his admiral. On the 2nd of November, 1840, the commodore assisted at the siege of Acre, under the command of Sir Robert Stopford. With some few drawbacks, fully redeemed by his subsequent performances, Commodore Napier's services in Syria were of the most dashing and distinguished character, and were attended with great benefit to the civilised world. Both in land as well as sea operations he proved himself thoroughly up to his work. After the reduction of Acre, the commodore proceeded to take charge of the squadron off Alexandria, where he concluded an advantageous convention with Mehemet Ali. In acknowledgment of these really important services he was created a Knight Commander of the Bath on the 4th December, 1840. He was also included in the thanks of Parliament to the Commander-in-Chief and his subordinates; and was presented by the Emperors of Austria and Russia and the King of Prussia with the Cross of Maria Theresa of Austria, the Cross of St. George of Russia, and the insignia of the second class of the Order of the Red Eagle of Prussia. In the spring of 1841 he returned to England, and on the 30th of November of that year was appointed one of the naval aides-de-camp to Her Majesty. He had already been awarded (January, 1837) the captain's good-service pension. He also held for two years the command of the Channel fleet, with his flag on board the St. Vincent, 120. After a prolonged interval of life at home Sir C. Napier received the command of the Baltic fleet at the outbreak of the Russian war. The services of this fleet were not brilliant, but the admiral brought home his fleet in safety and good order."

The eccentric admiral, shortly after the passing of the Reform Bill, commenced his political career as a Radical of extreme views. He was a candidate at the general election of 1832 for Portsmouth, but was unsuccessful. In 1837 he made an equally unsuccessful attempt to represent the borough of Greenwich, where he was defeated by Mr. Attwood and Mr. Barnard. It was in 1841 he first entered the House of Commons, being returned for Marylebone in conjunction with Sir Benjamin Hall (now Lord Llanover), which borough he sat for up to 1847. In November, 1855, he was elected for Southwark, on the death of Sir William Molesworth, and was again returned at the last general election. A vacancy consequently occurs in the representation of that borough by his lamented demise.

The late Sir Charles's commissions bear date as follows: Lieutenant, May 3, 1804; commander, Jan. 22, 1806; captain, May 24, 1808; rear-admiral, Nov. 9, 1846; vice-admiral, May 28, 1853; and admiral, April 6, 1858. He was made a Knight Commander of the Bath in December, 1840 (as stated above); was in the receipt of an admiral's good-service pension, and had received the naval medal and four clasps for his services afloat. In recognition of his eminent services to the Crown of Portugal, the late Queen Donna Maria, Sir Charles was made a Count of Cape St. Vincent, and was a Grand Cross of the Tower and Sword of Portugal.

Sir Charles Napier married Eliza, daughter of Mr. Young, husband, and widow of Lieutenant Edward Elers, R.N., by whom he leaves an only child, a daughter, who married, in October, 1843, the Rev. Henry Jodrell.

THE CHINA EXPEDITION.

The full details of the military operations terminating in the gallant capture of the Taku forts arrived in London last Saturday. The letter of the *Times'* correspondent is especially comprehensive and interesting. From it and from other sources we append the principal points of interest of this creditable exploit of the English and French forces :—

The allied forces left Peh-tang on the 12th, and took the road through the village of Sin-ho. There was a little preliminary skirmish with the Tartar cavalry. "At half-past nine the Tartar cavalry advanced upon our right wing to the number of three or four thousand. The Armstrong guns opened fire upon them, but had little or no effect in checking the Tartars, owing to the distance between these horsemen. On they came to the charge, but their ardour was rather checked by the rifle fire opened upon them by the infantry of the right wing. It is said, however, that they very nearly succeeded in taking one of the Armstrong guns, and sustained the charge of Fane's horse, with great courage, though quite unable to cope with their opponents from the small size of their ponies and the imperfection of their arms."

Meanwhile our left wing advanced and took two entrenched camps, the enemy retiring. On the next day (the 14th) the earthworks between Sin-ho and the Taku Forts were taken, also the village of Tang-ku on the river Peiho. On the 21st the great attack took place. It had been determined to attack the landmost of the two forts on the north side of the river, as that, in the opinion of the engineers, would command the forts on the south side.

THE ATTACK.

The Marines, with the 44th and 67th Regiments, and a proportion of French, were ready for the attack an hour before daylight, and advanced towards the forts under cover of a heavy fire from our Armstrong guns, 32-pounders, and 8-inch mortars, while the gunboats, shelling from the other side at the distance of 1800 yards from the forts, distracted the attention of the enemy. The ground up to the forts was perfectly bare and flat, offering not the slightest cover, but the fire of the artillery and of the rifles of the infantry was so heavy and well-directed as to afford good protection to the advancing force. Before the fort there was a ditch, which was crossed on pontoons, and both sides of it were thickly planted with sharp stakes about two feet long, which had to be torn up or knocked over before the fort could be reached, and the mud walls were about twenty feet high. About half-past nine or ten the walls were escaladed, a desperate resistance being made by the troops inside, who were Mantchus and Chinese. The French (so far as can be determined, for in such an affair it is not easy for any man to know more than what he is doing himself) were the first in the fort, pushing on with that frantic valour and recklessness of life which is their characteristic. One of their braves who was the first to mount was a mark for hundreds of spears and gingalls, while he fired down muskets that were handed up to him, and after miraculously sitting there untouched, he shouted "*Vive l'Empereur!*" and leaped down among the enemy and into death. Captain Prynne, of the Marines, was also one of the very first to mount; and, after shooting the mandarin commander of the fort, sat stride-legs on the wall and assisted his men to mount, escaping himself untouched, notwithstanding the extreme peril to which he was exposed. Lieutenant Chaplin, of the 67th, also distinguished himself by leaping into the fort, and planting the first colours upon the cavalier or most elevated part of the fort. Both Lord Elgin and Sir Hope Grant have promised to recommend him for the Victoria Cross. The first ladder planted against the wall was pulled up and taken in by the Chinese, who fought with desperation, but few attempting to escape to the fort beyond. There was no mercy for any of them who were unwounded, and even some of the wounded scorned the good offices rendered them. One wounded mandarin kicked an officer who tendered him some water, and was immediately run through. Many of the fugitives were also shot; and it is supposed that of the 1200 imperial troops (or thereabouts) who were in the forts, scarcely ten escaped alive and unhurt. Every one is loud in praise of our Chinese coolies, who were fearless and active, helping to cross the ditch, holding up the ladders, which were rather short, and carrying off the wounded. Of the English force 201 were killed and wounded.

The fighting ended with the taking of this fort. Prince Senn-ko-lin-sin was himself, the Chinese say, present in the Southern forts, and probably saw the futility of resisting our arms any further at present. Almost impregnable to the seaward, the forts were weak on the land side, and wholly unable to resist such a force as that by which they were attacked. The diplomatic arrangements are kept pretty quiet, but there can be little doubt that the Chinese have given in for the present to an extent that was hardly anticipated. The troops are now moving up to Tien-tsin, but the occupation is with the permission of the Chinese. It is also said, but this is rumour, that the imperial authorities have agreed to allow Lord Elgin to proceed to Pekin, for the purpose of ratifying the treaty, with a force of 2000 men.

THE ARMSTRONG GUNS.

These guns are declared to be a great success, both as regards their endurance of rough usage and their accuracy of fire. In one case we read :—

"The guns kept advancing through ground such as has seldom been traversed by artillery. Over and over again the horses' legs disappeared in the mud, and the carriage sank above the axle. Quick as thought, the horses were unharnessed, the guns unlimbered, ropes applied to the wheels, and, with a strong pull and a pull together, the men had the guns out of the hole. Then came large ruts, or rather small trenches, over which they had to be rattled at a gallop, and then mud, marsh, and slush again. For fully five miles were the guns knocked about before reaching hard ground. Arrived on the plain, General Napier halted the division, and ordered the cavalry to advance from the town. Captain Milward then made a careful examination of the Armstrongs—'those delicate weapons which would never bear the rough work of war.' Not one gun was a pin the worse, none of the 'gingerbread' was damaged; the sights were uninjured, the screws in good order, the carriages perfect."

THE ARMSTRONG GUNS IN ACTION.

"And now the Armstrongs in the centre were ordered to open fire on the Tartar cavalry. I stood by Captains Milward and Harrison as the first gun was fired, at 20 minutes to 11 a.m., at a range of about 1200 yards. The first shot was bad, the elevation was too great, and the shell passed harmlessly over the enemy. It was the only failure. The second shell burst right in the midst of the largest group, and half-a-dozen saddles were instantly empty. 'Three degrees,' shouted Captain Milward, and the range was got by every gun. For upwards of ten minutes the battery made magnificent practice. Not a shot failed, not a shell that did not burst in the exact spot to which it was directed. Right and left, at the cavalry in front, into the intrenchments on the flank, at 1200 yards, at 1600, at 2200, were the shells pitched with unerring accuracy. A good breeze and no file firing enabled the whole division to witness the effect of the Armstrong gun, now first tested in action, and there was but one opinion as to its absolute and unqualified success."

THE SIKHS AGAINST THE TARTARS.

"I galloped across to Stirling's battery, and was admiring his practice, when, to the surprise of every one, a body of 80 or 90 Tarters rushed from their front to take his guns in flank. On they came with the most wild and unearthly cries. So unexpected was this attack that Captain Stirling had barely time to fire two rounds of case, when they were within 100 yeards of the guns. There was no infantry near, but a guard of 25 of Fane's Horse, under the command of Lieutenant M'Gregor, was attached to the battery. Now was the time, now the chance to test the Sikhs against the Tartars. Without a moment's hesitation, and regardless of numbers, Lieutenant M'Gregor gave the word to charge, and away went the Sikhs in most gallant style. No flinching, no craning; every spur was well in the horse's side, when one-half of the Tartars met them in full shock. The effect was instantaneous. One of the leading Sikhs ran his spear right through the body of a Mongol horseman, the head entering at his chest and going out at his back. The spear broke in the middle, the Mongol fell to the ground, spitted, and never moved a limb. Lieutenant M'Gregor singled out his man, and was in the act of spearing him, when another Tartar fired his matchlock within ten yards point blank. The slugs hit the Lieutenant in five places, three lodging in the chest, two in the forehead. For a moment he was blinded by the fire, which burnt his face, but the work was done. The Tartars dispersed in every direction, the whole affair lasting little more than a minute. I am happy to say that Lieutenant M'Gregor is fast recovering from his wounds, which, though severe, are not in the least dangerous. Nothing could be more gallant than his conduct, for he had no supports, and but a handful of men. The Sikhs were delighted with the result, which naturally inspired them with the greatest confidence, and proved their unquestionable superiority over the Tartar cavalry."

Some amusing papers were found at Sin-ho. Extracts from the newspapers, and translation of the debates in the House of Commons were sent to Pekin, and also to Sang-ko-lin-sin, the Tartar General. Doubts are expressed as to whether the reported preparations of the allies are true, but, continues the report :—

"Notwithstanding that full confidence is not to be given to all this, still considering that Bruce and Bourbillon are inseparables in dishonesty, by nature sanguinary and treacherous, and seeing the ferocity and trickiness of their dispositions, when mention is made of their forces being increased with a view of taking the forts, it would not be right not to stand on our guard. Let Sang-ko-lin-sin therefore look to it, and let the extracts from the newspapers be given him to read."

The correspondence between the Tartar General and the Viceroy of the province since the landing of the allies at Pehtang was also found. The Governor-General also encloses a copy of Lord Elgin's letter, and offers a reward of 1000 taels (333*l.*) for the barbarian chiefs, dead or alive, 100 taels for each of the inferior leaders, and five for those of the common fellows. The chief rebel (Lord Elgin) was specially recommended for capture, as the war would be ended if he were taken.

THE ATTACK ON TANG-KOW.

The entrenched camp at Tang-kow was attacked on the 14th, under cover of artillery :—

The practice was magnificent both on the French side and our own, but the superiority of the Armstrong gun over the French rifled cannon soon became evident. The Chinese guns near Barry's battery were first silenced, the others soon followed suit, and such a fire was kept up through the embrasures that no man could work a gun. The infantry were then ordered to advance, the Rifles leading, with the Royals and the 31st close on their heels. Arrived at the ditch a dam was discovered, which prevented the water from escaping into the river. Here they crossed, Lieutenant Shaw, of the 60th Rifles, *celer et audax*, being the first man in the fort. Two guns from an angle of the entrenchment on the French attack still kept up a fire against our allies, who were obliged to construct a bridge in order to cross the ditch. This they did speedily and well, Lieut.-Colonel Schmidtz, Chef d'Etat Major, being the first Frenchman in the place. General Montauban promoted him next day, and thus gave a step to the whole of the French Staff. Colonel Schmidtz is one of the most rising men in the French army, and highly distinguished himself at Magenta. He would be the last to claim a merit due to another. The first man in the fort was Lieutenant Shaw, the first Frenchman was Colonel Schmidtz. The nature of the ground made the task of the Rifles much easier, and the angle may have prevented the French from observing the English entry. I saw the Rifles when they first waved their hats on the top of the parapet. For nearly ten minutes after that did the Tartars fire on the French, at the end of which time, their bridge being finished, the French entered. As they went through the gate the Rifles had come round the interior of the fort, and were being formed by Major Rigaud. The First Division and the French returned to the camp at Sin-ho, and the Second Division, under command of Major-General Napier, took possession of Tang-kow.

THE ATTACK ON TAKU.

From the further gate of Tang-kow our troops looked across the river to Taku and the Tua Yamun pagoda on the south side, where Sang-ko-lin-sin was supposed to have his head-quarters. Sir Hope Grant determined to get up the heavy guns at once, to throw a bridge over the Peiho, nearly opposite Sinho; and, after crossing with a portion of the force, to engage the north forts in the rear, while the navy attacked them in front. Some incidents of this attack are given.

Here Lieutenant Gye, of Milward's battery, a most promising young officer, son of the director of the Royal Italian Opera, was shot through the thigh. A gunner was wounded almost at the same moment. A lad of 15, on the Indian medical establishment, a soldier's son, and Fitzgibbon by name, was on the field as hospital apprentice, attached to the 67th. Without a moment's hesitation he rushed to the artilleryman and dressed his wounds under a tremendous fire. In so doing he was shot in the arm, but the bullet has been extracted, and the wound is healing. A more gallant lad never lived. His character is excellent, and he well deserves some promotion.

THE ENTRY INTO THE TAKU FORTS.

Two companies of the 44th, one commanded by Captain Gregory, the other by Lieutenant Rogers, had rushed to the ditch to keep down the enemy's galling fire of gingals and matchlocks. There was no cover against the bullets, spears, and arrows flying about in every direction, so Captain Gregory placed his men up to their middle in water, and commenced a fusillade against the Chinese on the parapets, himself seizing a rifle from a wounded soldier, and using it with excellent effect for thirty rounds. Man after man of the 44th continued to drop, and still there was no bridge. Lieutenant Rogers rushed through the ditch, pulled out the spikes, and succeeded in reaching the berm under the parapet wall. About the same time the storming companies of the 67th went at the ditches with a will. Some swam, some struggled through, and a few succeeded in reaching the berm. There they found the French, who had already crossed over light bamboo ladders carried by their coolies. These ladders bent when placed across the ditch. In jumped six coolies up to their necks. The ladders were supported across their shoulders, and the French quickly crossed over. "These men should have a riband," said Colonel Dupin, himself conspicuous in the front, "their gallantry is marvellous." A plank was now placed across the ditch in front of the main gate, over which very ricketty bridge many soldiers passed one by one. The English ladder party was also sent to the salient angle of the fort, near the spot where the French had crossed. Here their ladders were laid, and the troops got over.

All this time the fire of the enemy continued incessant. Cold shot, hand grenades, stinkpots, and vases of lime were showered on the crowd of besiegers who stood upon the berm. The ladders placed against the wall were pulled into the fort, or thrown over, and in vain did man after man attempt to swarm through the embrasures. If the defence was desperate, nothing could exceed the gallantry of the assailants. Between English and French there was nothing to choose. A Frenchman climbed to the top of the parapet, where for some time he stood alone. One rifle after another was handed to him, which he fired against the enemy. But his courage was unavailing, and he fell back, speared through the eye. Another, pickaxe in hand, attempted to cut away the top of the wall. He was shot, and Lieutenant Burslem, of the 67th, caught hold of his pick and continued the work. Lieutenant Rogers attempted to force his way through an embrasure, but was driven back. He ran to another, but it was too high for him. Lieutenant Lenon, 67th, came to his assistance, forced the point of his sword into the wall, and, placing one foot on the sword, Lieutenant Rogers leaped through the embrasure just after Jean Fauchard, drummer of the French 102nd, had got over at the right angle. Lieutenant Rogers acted with conspicuous gallantry. He was the first Englishman in the place, and was afterwards of the greatest service in assisting others through the embrasures. He was wounded in the side by a matchlock ball, but is doing well. Jean Fauchard was followed by many of his own countrymen, and by Lieutenant Pritchard, R.E., Lieutenants Lenon and Burslem, 67th, who assisted their own men across the ditch, and were both wounded; Captain Prynne, R.M., and Lieutenant Hume, R.E. In addition to them, among the first in the fort were Colonel Knox and Ensign Chaplin, 67th; Captain Gregory, 44th; Brigadier Reeves (wounded in three places), Lieutenant Kempson, 99th; Colonel Mann, R.E., and Major Anson, Aide-de-Camp. Colonel Mann and Major Anson cut the ropes, and lowered the drawbridge, over which the mass of the English crossed; and now after half-an-hour's tremendous fighting under the parapet wall, the allies were in the fort. Still the Chinese made a desperate resistance under cover of their casemates. Ensign Chaplin ascended the ramp almost alone, racing against a French soldier. Halfway up he was knocked over by a bullet, but, quickly recovering himself, he was up again and won by a head. A second shot struck him through the leg as he planted the Queen's colours of the 67th at the top of the cavalier, and private Thomas Lane, 67th, took his place by the flag. Lieutenant Kempson, who had a tourniquet in his pocket, bound up Mr. Chaplin's leg. Lieutenants Rogers and Burslem and Ensign Chaplin have been recommended for the Victoria Cross, which they right well deserve.

The correspondent of the *Times* adds :—"And now the fort was taken. It contained forty-two guns, many of them large, and was the key of the position. The lower northern fort, with its cavalier open in rear, lay at our mercy, and the whole of the southern forts were enfiladed by that just captured. The judgment of Sir Hope Grant was completely justified. Against the opinion of the French commander and engineers, who maintained that the attack should be made on the south, he resolutely and consistently maintained that the upper northern fort was the key to the whole, and so it turned out."

After some delay and negotiation, "Mr. Parkes dictated an absolute unconditional surrender of all the forts, guns, and *matériel*, and himself inserted a provision that no soldiers should be allowed to leave the town without a pass. The Viceroy signed, observing, 'My predecessor was degraded in '58, and so shall I be now.' It was night when

Digitized by Google

Mr. Parkes returned from his important mission, by which time the whole of the southern forts were already in possession of the allies. Three hundred men, half English, half French, had been sent across the river to garrison them. The enemy was departing, and they entered the great fort of the Peiho without striking a blow. Thus, in a ten days' campaign, were the Peiho forts taken, the disaster of last year avenged, the Chinese war of 1860 brought almost to a close. The bridges, roads, batteries, earthworks—in short, all the preparations for attack, were made exclusively by the Second Division of the British Army, our Allies only arriving on the ground at the hour appointed for opening fire."

THE CASUALTIES AT TAKU.

The Chinese loss in killed and wounded cannot have been less than 1500 men. The English had 200 casualties—17 men killed, 22 officers and 161 men wounded. The 44th and 67th, having provided the storming parties, were naturally the greatest sufferers. The former had 10 men killed, 2 officers and 50 men wounded; the 67th had 6 men killed, 8 officers and 62 men wounded. Most of the wounded are doing well. The French list of casualties was a little over 100.

Lord Elgin and Baron Gros were at Tien-tsin, and were shortly to start for Pekin, where the Chinese government has promised to receive them honourably. Lord Elgin will be escorted, it is believed, by the Cavalry Brigade, consisting of 300 men of the King's Dragoon Guards, Stirling's Artillery, and Fane and Probyn's Horse.

THE CHINESE INSURGENTS.

From Shanghai we receive the following account of the approach and the repulse of the Tae-ping insurgents:—

On Monday morning, the 20th of August, the enemy had advanced in greater strength than ever. It was really a curious sight to see them moving along every one of the little paths which run parallel to the city walls, each man carrying a flag, and all moving in Indian file, but in excellent order, and quite calm and steady. On they came without hesitation, perfectly within range, and seemed to direct their attention principally to the west gate. Lieutenant O'Grady had been sent there with some marines, to assist Captain Cavanagh, and the Madras artillerymen having rigged up a Chinese gun, a heavy fire was kept up, and the insurgents have to thank the nature of the ground that their loss was not very large. Strange to say, scarcely a shot was returned, and the Imperialist soldiers, after firing a couple of times, got up on the battlements of the wall, hung their legs over, and smoked away without any apparent fear, although the foe was lurking among the graves and rushes below. The cracking of the rifles seemed to have had no effect in changing the line of march of the insurgents, who now seemed to threaten the English settlement in great numbers. They actually planted some flags within a couple of hundred yards of the race-course stand, but were met with a shell or two from a gun commanded by Lieutenant Williams. Lieutenant Crease fired a couple of rockets at them, too, so that they gradually retired. During the night the dispatch boat Pioneer had proceeded up the river, and began dropping 13-inch shells in among the rebel flags. One of these exploded right in the centre of about 100 red banners, which immediately afterwards disappeared. About one o'clock the dispatch boat Nimrod threw a shell clean over the settlement away out into the fields an astonishing distance. This practice was kept up slowly for about two hours when the insurgents retreated out of range. The Pioneer continued firing until the evening had far advanced, but the enemy had had enough of it, and retreated so far out towards Zee-ka-wei that they were out of all possible danger.

On Tuesday but very little work took place, as the rebels had retreated quite out of range, and with the exception of one or two small bodies, none were seen near enough to fire at.

OFFICIAL DISPATCHES.

The following additional dispatches and list of casualties are given in a *London Gazette Extraordinary*:—

War Office, November 4.

Mr. Secretary Herbert has received two dispatches with inclosures, of which the following are copies, addressed to him by Lieut.-General Sir J. Hope Grant, K.C.B., commanding the forces in China:—

No. 37.

Head-Quarters, Tangku, August 24.

Sir,—I have the honour to report that the allied forces were unable to leave Pehtang until the 12th of August, on account of the very heavy rain, which had made the country almost impassable.

On that morning, however, the troops marched according to the following dispositions, viz., the 2nd divison of infantry, an Armstrong battery, a rocket battery, Madras sappers, and the cavalry brigade, with three six pounders. The whole under Major-General Sir Robert Napier struck off to the right of the road leading from Pehtang to Sinho for the purpose of turning the left of the Tartar position. This column experienced the greatest difficulty in getting through the deep heavy ground, which extended for more than two miles out of Pehtang, and considerably delayed the departure of the main column, under Sir John Michel, which moved along the causeway leading directly from Pehtang to Sinho, and which was composed as follows, viz., the 1st infantry brigade, a company of Royal Engineers, an Armstrong battery, 1000 French infantry, and a French battery, all under Brigadier Staveley. This was followed by the 2nd infantry brigade, two 9-pounder batteries, and a rocket battery, succeeded by the main column of the French.

On approaching the entrenched camp the Tartar cavalry moved rapidly down to attack Sir Robert Napier, who was moved rapidly down to attack Sir Robert Napier, who was at this time about two and a half miles off, on my right flank. His report of that part of the engagement I beg to enclose.

Sir John Michel's division deployed at the same time in front of the enemy's works, and opened fire with Lieutenant-Colonel Barry's Armstrong battery and Captain Desborough's nine-pounders, a French battery being on the left, together with a French and an English rocket battery. These guns kept up such a heavy fire that the Tartars were unable to resist long, and they abandoned their works, being closely followed into their second entrenched line at Sinho, which they were unable to defend, and fled to Tangku.

I enclose Sir J. Michel's report of this affair.

The enemy's force was composed principally of cavalry, and numbered about 4000 men. At Sinho I was joined by Sir R. Napier's division, and the cavalry, who had cut up a good number of the Tartar horsemen.

The loss of the Chinese was about 100 men.

On the 13th I reconnoitered the ground along the banks of the Peiho leading to Tangku, and found it tolerably firm, though intersected with creeks and ditches. I ordered these to be bridged during the night, and on the morning of the 14th an allied force moved from Sinho towards Tangku, keeping their right flank on the bank of the river. The English part of the force consisted of the 1st Infantry division under Sir John Michel, and the artillery as per margin,* which formed one grand battery under Brigadier-General Crofton, R.A.

On arriving within a mile of Tangku, a battery and some junks on the right bank were silenced by two Armstrong and two 9-pounder guns; and a party of sailors who had been brought up for the purpose crossed the river and burned the junks.

The whole of the artillery was then advanced to within 600 yards of the entrenchments, and opened a heavy fire on the walls; two French batteries deployed on our left; the enemy replying with ten or twelve guns, and a brisk fire of gingalls and matchlocks. The artillery gradually advanced to within 350 yards, and the enemy's guns being silenced a breach was commenced, when a passage across the double wet ditch was discovered at the river's edge by the 60th Rifles, and an entrance was effected, the Chinese retiring with great precipitancy. At the same time the French advanced with great gallantry and entered by the main gate, which had been partially broken in by the artillery fire. The garrison of Tangku retreated, some into the north ports, and some across the river to Tangku.

I am happy to say that our losses in these two engagements were very slight, owing to the enemy being completely paralysed by the superior fire of our artillery.

Forty-five guns were captured in Tangku. My thanks are due to Major-Generals Sir John Michel, and Sir R. Napier, commanding divisions (the former had a horse killed under him on the 14th), also to Brigadier-General Crofton, commanding Royal Artillery, and Brigadier Pattle, commanding the cavalry, for the able way in which they exercised their respective commands; and the whole of the officers and soldiers acquitted themselves to my satisfaction.

I beg to enclose a list of casualties.—I have, &c.,

(Signed) J. Hope Grant,
Lieut.-General Commanding Her Majesty's Forces in China.

The Right Honourable the Secretary of State for War.

No. 38. Head-Quarters, Tangku, August 24, 1860.

Sir—I have the honour to report that, after the capture of Tangku on the 14th inst., I commenced bringing up siege guns and ammunition from Pehtang with a view to the reduction of the uppermost fort on the left bank of the Peiho, distant about two miles from Tangku.

The ground upon which it was necessary to advance was mostly of a very difficult nature, and intersected with broad and deep canals used in the manufacture of salt.

I placed Major-General Sir R. Napier in charge of the advance, his division being quartered in Tangku. Under his superintendence bridges were thrown over these ditches and canals by Lieut.-Colonel Mann, commanding Royal Engineers; and heavy guns as per margin, with a good supply of ammunition having been brought into Tangku, the 67th Regiment and an Armstrong battery were pushed forward on the evening of the 19th, to within 2000 yards, to cover the working parties making roads, bridges, &c. On the 20th, the road was made practicable to within 800 yards of the fort, batteries were traced, and the heavy guns were brought out ready to place in position by daybreak of the following day. The Chinese opened fire during the day, and were replied to by Captain Milward's Armstrong guns at 2000 yards' range with good effect, and the firing gradually ceased.

During the night batteries were constructed for the heavy guns and mortars, and for one field-battery, also for two 8-inch guns, which were brought up by the great exertions from Pehtang during the night; and the whole were placed in position by daybreak of the 21st August.

It had been arranged with the admirals that the gunboats should cross the bar that morning, and should engage the outer North Fort, and the flank of the outer South Fort, at the same time that the attack on the inner North Fort was commenced by the land forces.

At 5 a.m., however, the Chinese opened fire upon the troops from all their forts within range, and we were thus forced to reply an hour earlier than had been intended.

The artillery was disposed as follows:—A French 24-pounder battery of 6 pieces, one English 8-inch gun, and 2 Armstrongs, played on the inner South Fort to keep down the fire they might otherwise have poured on our right flank. Two Armstrong guns and two 9-pounders fired from Tangku across the river at an entrenchment which flanked the French right; three 8-inch mortars were in the centre at 600 yards range, and to their left rear an Armstrong battery, two 32-pounder guns, and two 8-inch howitzers, all of which played on the fort we were attacking. In addition to this, two 9-pounder guns, four 24-pounder howitzers, the remaining two Armstrong guns, and a rock battery were placed in the open ground about 800 yards in front of the fort.

The storming party of infantry consisted of a wing of the 44th, under Lieutenant-Colonel MacMahon, and a wing of the 67th, under Lieutenant-Colonel Thomas, supported by the other wings of these two regiments, and the Royal Marines, under Lieutenant-Colonel Gascoigne. A detachment of Royal Marines, under Lieutenant-Colonel Travers, carried a pontoon bridge for crossing the wet ditches, and Major Graham, R.E., conducted the assault. The whole were commanded by Brigadier Reeves.

The fire of the artillery was most effective, the guns of the fort (of which many were of very large calibre), were speedily silenced, and at about 7 a.m. the magazine blew up with a terrific explosion. A few minutes later the magazine in the outer North Fort was also exploded by a shell from the gunboats.

The field guns were all advanced to within 500 yards of the fort, and redoubled their efforts.

The fire of the forts having almost entirely ceased, a breach was commenced near the gate, and a portion of the storming party was advanced to within thirty yards to open a musketry fire, the French infantry being on the right, the English on the left.

The fire of our artillery being thus partially compelled to slacken, the enemy emerged from their cover, and opened a heavy fire of musketry on our troops.

The French, under General Collineau, immediately pushed on to the salient next the river, crossed the wet ditches in the most gallant manner, and established themselves on the berm, from whence they endeavoured to escalade the walls. This, however, they were unable to effect from the vigorous resistance of the Chinese.

The efforts of the Sappers to lay down the pontoon bridge were unavailing; no less than fifteen of the men carrying it being knocked over in one instant, and one of the pontoons destroyed.

At this juncture Sir R. Napier caused the two howitzers of Captain Govan's battery to be brought up to within 50 yards of the gate, in order more speedily to create a breach, and a space sufficient to admit one man had just been made when our storming party (now joined by the head-quarters' wing of 67th, under Colonel Knox), who had partly crossed by the French bridge and partly swam over, forced their way in by single file in the most gallant manner, Lieutenant Rogers, 44th Regiment, and Lieutenant Burslem, 67th Regiment, being the first to enter, when they assisted in the regimental colours of the 67th, carried by Ensign Chaplin, who first planted them on the breach (assisted by Private Lane, 67th Regiment), and subsequently on the cavalier, which he was the first to mount. At the same moment the French effected their entrance, and the garrison was driven back step by step, and hurled pellmell through the embrasures on the opposite side.

Here the same obstacles which had impeded our advance obstructed their retreat; in addition to two wet ditches and two belts of pointed bamboo stakes, there was swampy ground, and a third ditch and bank.

The storming parties opened a destructive fire on them from the cavalier, and this was enhanced by the canister fire of Captain Govan's guns, which had been moved to the left of the fort for this purpose.

The ground outside the fort was literally strewed with the enemy's dead and wounded; three of the Chinese were impaled on the stakes. A few fugitives reached the outer North Fort, which opened fire to cover their retreat, and was answered by the Armstrong guns with good effect.

About an hour after this the whole of the forts on both sides of the river hauled down their war banners and hoisted flags of truce. General Montauban and I sent each an officer to ask their meaning and summon them to reply, and were defied to come on to the attack.

Accordingly two fresh regiments, the 3rd Buffs and the 8th Punjab Infantry, having been brought up, I advanced to attack the outer North Fort. Two 8-inch guns were placed in position against it; the other siege guns could not be brought up. The field batteries were placed at 800 yards' range on an arc encircling the left and front, the French guns on our right. Not a shot was fired by the enemy, and the allied infantry pushed on, crossed the ditches, and scaled the walls, without meeting any opposition; the garrison of 2000 men being made prisoners.

This fort was stronger than the first. They are all constructed on the same plan, being redoubts with a thick rampart heavily armed with guns and wall-pieces, and having a high cavalier facing seawards, the guns of which were all turned in towards us. They have two unfordable wet ditches, between which and the parapet sharp bamboo stakes were thickly planted, forming two belts, each about 15 feet wide, round the fort, an abattis encircling the whole, and further covered by pieces of water, which form an advance to be made only on a narrow front.

Towards evening the garrisons of the South Forts were observed to be evacuating them, and detachments of English and French were passed over in ships' boats, and occupied them. There is not now the trace of an enemy near us, and the whole of the forts and entrenched camps are in our hands, containing about 400 guns, many of which are of very large calibre.

It was difficult to account for the confusion and uncertainty which seemed to pervade the enemy when the first fort fell; but it now appears that the general in command was killed, and second in command either killed or missing; and this confusion caused by this, together with the severe lesson received in the first fort, rendered them incapable or unwilling of further resistance.

I cannot conclude this dispatch without expressing my sense of the very valuable services of Major-General Sir Robert Napier, who conducted the attack, and whose assistance has been most useful.

The service of the artillery under Brigadier-General Crofton was most excellent; its effects I have already described.

The engineering operations were conducted by Lieut.-Colonel Mann; and lastly, I must bring to notice the gallan

* 2 Armstrong batteries, 2 9-pounder batteries, 2 rocket-batteries.

Digitized by Google

conduct of the storming party, which was commanded by Brigadier Reeves, who, himself severely wounded in three places, did not quit the field until he had conducted his men into the fort.

The wounded were removed as soon as possible into Tangku, where every arrangement for their temporary reception was made by Dr. Muir, the principal medical officer.

Many others, both officers and soldiers, behaved in a manner deserving of being mentioned; but want of time does not permit me to treat of it in this dispatch, and on a future occasion I shall do myself the honour of bringing their names to your notice.

I would also wish to inform Her Majesty's Government how cordially and sincerely our French allies have co-operated with us, as well as the admiration I feel for their gallant conduct in the field.

General de Montauban has always shown every disposition to act thoroughly in concert with me, and to co-operate in every manner in his power.

The services of the gun-boats will doubtless be brought to notice by the naval Commander-in-Chief, and I beg here to record what a valuable and efficient colleague I have found in Admiral Hope, whose unwearying exertions throughout the whole campaign and in discharging the onerous duties of transporting this large force to the seat of war have contributed greatly to the success of the operations.—I have, &c.,

(Signed) J. HOPE GRANT,
Lieut.-General, Commanding her Majesty's Forces in China.

The Right Honourable the Secretary of State for War, &c.

LIST OF KILLED AND WOUNDED.

NOMINAL LIST OF OFFICERS AND MEN KILLED AND WOUNDED ON THE 3RD, 12TH, AND 14TH OF AUGUST.

KILLED.

1st Sikh Cavalry—Sowar Muttah Sing.

Fane's Horse—Sowar Nuzzeer Khan.

WOUNDED.

Staff—Captain Greathead, contusion of knee.

1st Sikh Cavalry—Ensign M'Cauley, slightly; Lieutenant Stuart, slightly; Duffadar Bergau Sing, slightly; Sowar Hero Sing, severely; Jemadar Kurrack Sing, slightly.

Fane's Horse—Lieutenant M'Gregor, severely; Jamadar Nidhom Sing, severely; Sowar Alloodeen Khan, severely; Sowar Buckhoda, slightly; Sowar Sacomda Shah, slightly; Sowar Mahomed Shah, slightly.

King's Dragoon Guards—Trumpeter Laylor, slightly.

Royal Artillery—Gunner M'Dowell, slightly; Gunner Mutton, severely; Gunner Travers, dangerously; Gunner William Jolliffe, severely (since dead); Gunner John George Hare, severely; Driver John Thomas, slightly.

Madras Sappers—Veneatachillum, missing; captured by cavalry, and supposed to be since dead.

1st battalion Queen's—Owen Cummins, slightly; gingall wound of fore arm—Thomas Reid, contusion of left arm.

3rd Foot—Private Patrick Shea, slightly.

44th Foot—Private Charles Sinclair, severely; Private John Berry, slightly; Private Robert Molloy, slightly.

2nd battalion 60th Rifles—John Wright, contusion of chest.

NOMINAL ROLL OF OFFICERS AND MEN KILLED AND WOUNDED IN ACTION AT THE PEIHO FORTS ON THE 21ST OF AUGUST.

Staff.—Captain Brooke, 48th Regiment, Aide-de-Camp to Sir R. Napier, wounded severely; gunshot wound of thigh—Brigadier Reeves, 99th Regiment, severely; gunshot wound of foot, fore-arm, and shoulder—Lieutenant Kempson, slightly; contused wound of face.

Royal Artillery.—Milward's Battery.—Lieutenant Gye, severely; gunshot wound in thigh—Assistant-Surgeon Prescott, slightly; gunshot wound in neck—Driver Francis Wills, severely; gunshot wounds in arm and thigh.

Govan's Battery.—Gunner Edward Carey, dangerously; gunshot wound in arm (amputated)—Gunner John Welch, severely; gunshot wound in head—Gunner Edward Moran, severely; gunshot wound in chest—Gunner Michael M'Nalley, severely; gunshot wound in right arm—Gunner William Lawless, slightly; gunshot wound in left foot—Gunner Robert Harwell, slightly; gunshot wound in leg.

Pennycuick's Battery—Gunner John Troll, severely; gunshot wound in left shoulder-blade.

Barry's Battery.—Driver Charles Baxter, slightly; gunshot wound in right shin.

Rolton's Battery.—Driver G. Roberts, slightly; gunshot wound in right foot—Driver R. Coulter, slightly; contusion of right cheek.

Desborough's Battery.—Bombardier Henry Elliston, slightly; gingall ball in right shoulder.

Royal Engineers.—23rd company.—Brevet-Major Graham, severely; gunshot wound of thigh—Sapper James Chapman, dangerously; gunshot wound, abdomen (penetrated).

8th company—Corporal W. Willcox, dangerously; gunshot wound, shoulder and chest—Sapper William Edey, mortally; gunshot wound, abdomen (since dead).

3rd Foot—1st battalion—Lance Corporal Michael Forde, slightly; contusion over right hip—Private Edward Timbs, severely; gunshot wound, left knee.

44th Regiment.—Captain George Ingham, severely; contusion of back of right thigh—Lieutenant Robert Rogers, severely; gunshot wound in right side—Private John Biddle, killed—Private John Smith, killed—Private William Jolliffe, severely; gunshot wound, left shoulder—Private James Greyson, severely; gunshot wound, left leg—Private James Rodgers, severely; gunshot wound, head—Private Anthony Golan, slightly; contusion of right forearm—Private James Matthew, severely; gunshot wound of head—Private Henry Bridehope, severely; gunshot wound, left thigh—Private John Gaugh, severely; gunshot wound, left thigh—Private Robert Fitzgerald, dangerously; compound fracture, left arm—Private Alexander M'Carthy, severely; gunshot wound, right arm—Private George Shorton, severely; gunshot wound, left arm—Private Charles Taggart, slightly; contusion of right temple—Private Michael Mealy, killed—Private Joseph Claydon, dangerously; gunshot wound, left arm—Private Thomas Dyer, dangerously; gunshot wound, right side—Private John M'Clavarty, slightly; gunshot wound, right leg—Private Henry Boyle, slightly; contusion of right ankle-joint—Private Patrick Murray, slightly; contusion of left shoulder—Private William Moody, slightly; contusion back of neck—Lance Sergeant John Hassett, killed—Drummer James Bolwell, severely; arrow wound, right leg—Private Patrick Dynam, dangerously; musket wound, left leg—Private Jonathan Beavis, killed—Private Charles Cash, killed—Private Samuel Clarke, killed—Private Edwin Lenney, killed—Private Hamilton Mashall, killed—Private James Steward, killed—Corporal Armille Cottrill, mortally; gunshot wound in head (since dead)—Corporal John Murphy, dangerously; gunshot wound of chest—Private Robert Alcock, severely; gunshot wound, right shoulder and wrist—Private William Barret, severely: gunshot wound, back and shoulder—Private John Bamford, severely; gunshot wound, right wrist—Private Daniel Callaghan, severely; gunshot wound, chest—Private Emanuel Carlick, severely; gunshot wound, right shoulder—Private Thomas Carrigan, severely; gunshot wound, right temple—Private John Coffey, dangerously; gunshot wound, head—Private Charles Chapman, severely; gunshot wound, right shoulder—Private James Chilvers, mortally; shell wound of head (since dead)—Private William Cox, severely; gunshot wound, right arm—Private John Davis, severely; gunshot wound, hand—Private James Donnelly, severely; gunshot wound, left arm—Private Robert Durrant, dangerously; gunshot wound, head—Private Jeremiah Easton, mortally; gunshot wound, abdomen (since dead)—Private William Easton, severely; gunshot wound, left arm—Private Joseph Felton, dangerously; gunshot wound, head—Private Henry Forde, severely; gunshot wound, both legs—Private Francis Kelly, dangerously; shell wound, right knee—Private Wm. Lloyd, dangerously; gunshot wound, chest and arm—Private Wm. M'Cabe, severely; gunshot wound, hip—Private T. Murphy, mortally; gunshot wound, chest (since dead)—Private J. Pardoe, slightly; gunshot wound, left leg—Private J. Patterson, severely; gunshot wound, temple—Private Michael Power, severely; gunshot wound, side—Private Hugh Robinson, severely; gunshot wound, neck—Private John Harridine, severely; gunshot wound, right groin—Private Daniel Sanderson, severely; gunshot wound, right wrist—Corporal Thomas Straight, slightly; gunshot wound, left ear—Corporal James Clinton, severely; gunshot wound, thigh.

Royal Marines.—Private Hugh Swenney, killed—Lieut.-Colonel J. O. Travers, slightly; contused wound, right leg—Captain Carrington, slightly; gingall ball through lower hip—Lieutenant G. Mairis, severely; gingall ball, left shoulder—Lieutenant G. Barker, slightly; lacerated wound, right foot—Lieutenant Straghan, slightly; lacerated wound, right foot—Private Phillip Powell, severely; gingall ball, right hand—Private James Andrews, severely; gingall ball, left wrist—Private William Wintrip, slightly; contused wound of abdomen—Private John Malone, severely; gingall ball, right thigh—Private Charles Bishop, severely; gingall ball, left shoulder—Private Lawrence Crine, slightly; contused wound—Private Frederick Burke, severely; gingall ball, right ankle—Private Thomas Power, severely; gingall ball, shoulder—Private Wm. Maizin, severely; gingall ball, left thigh—Private Patrick O'Phelan, severely; gingall ball, shoulder and breast—Private Thomas Fitzwilliam, severely; gingall ball thigh—Private Dominick Gavin, severely; gingall ball, thigh—Private James Williams, severely; gingall ball, thigh and testicle—Private Richard Dear, dangerously; gingall ball, shoulder—Serjeant Henry Treat, severely; gingall ball thigh—Private George Edwards, severely; gingall ball, great toe—Private William Spencer, severely; gingall ball, right hand and leg—Lance Sergeant William Erle, slightly; gingall ball, right hand and leg—Private Richard Baker, severely; gingall ball, right shoulder—Lance-Corporal Thomas Smith, slightly; gingall ball—Private Philip Parnell, slightly; gingall ball—Private James Norman, slightly; punctured wound—Lance Sergeant John Thomson, slightly; gingal ball, right thigh—Private William Giles, slightly; contused wound by round shot.

67th Regiment—Lieut.-Colonel Thomas, severely; gunshot wound of face—Captain Miller, dangerously; gunshot wound, breast—Lieut. Kingsley, dangerously; gunshot wound, knee—Lieut. Burslem, severely; gunshot wound, shoulder—Lieut. Lennon, slightly; contused by shell arm—Ensign Turner, severely; contused by shell, arm and thigh—Ensign Chaplin, severely; contused by shell, arm and thigh—Ensign Fraser, severely; contused by shell, thigh—Hospital Apprentice Fitzgibbon, severely; gunshot wound of arm—Lance-Sergeant Richard Stokes, severely; gunshot wound of right leg—Private James Ford, dangerously; gunshot wound chest—Private Thomas M'Cormack, severely; gun-shot wound, both legs—Private James M'Coy, slightly; stake in foot—Private John Murphy, slightly; gunshot wound in shoulder—Private Patrick Power, slightly; shell wound, right leg—Private Owen Dolan, severely; shell wound, axilla—Sergeant Thomas Pritchard, slightly; gunshot wound, left shoulder—Private Wm. Barker, severely; gunshot wound, right thigh—Private Benjamin Brierley, severely; lance wound, left arm and neck—Private Charles Buckley, slightly; gunshot wound, right ear—Private Arthur Crooks, killed—Private John Carr, slightly; gunshot wound, left arm—Private Thomas Dignum, slightly; gunshot wound, left side—Private William Fuller, slightly; gunshot wound, left leg—Private John Gardiner, dangerously; gunshot wound, chest—Private Thomas Hall, severely; gunshot wound, left side of nose—Private John Sally, killed—Private James Rafferty, severely; gunshot wound, left leg—Private Matthew Ratcliff, severely, gunshot wound, right thigh—Private Michael Ryan, severely; gunshot wound, left breast—Private John Skeen, severely; gunshot wound, left leg—Private Henry Wade, slightly; gunshot wound, right armpit—Private Jeffrey Burke, dangerously; gunshot wound, right leg and knee—Private Lawrence Healey, severely; shell wound, right leg and knee—Private Wm. Johns, severely; gunshot wound, right leg—Private John M'Loughlin, severely; gunshot wound, right leg—Private John White, dangerously; gunshot wound, left knee—Private John Griffin, dangerously; gunshot wound, left shoulder—Corporal John Flynn, dangerously; gunshot wound, left arm—Private William Newbold, severely; gunshot wound, left side of head—Private Henry Spencer, severely; gunshot wound, right thigh—Private William Watson, dangerously; spear wound, right shoulder and forehead—Private Charles Webster, severely; gunshot wound, left side of head—Private William Graham, killed—Private James Beatty, slightly; gunshot wound, chest—Private Patrick M'Sally, dangerously; gunshot wound, chest—Corporal Timothy O'Connell, severely; gunshot wound, left knee—Private Thomas Beak, slightly; shell wound, right ear—Private John Brennan, slightly; gunshot wound, right temple—Private Owen Carron, slightly; gunshot wound, right shoulder—Private Stephen Corbett, dangerously; shell wound, right thigh and left foot—Private William Fallen, severely; round shot, right shoulder—Private William Fawn, dangerously; splinter, right knee—Private Owen Flynn, slightly; contusion of right shoulder—Private James Hetherington, severely; contusion of right eye—Private Thomas Mills, killed by round shot—Private Michael Brown, slightly; arrow wound—left side—Private John Beregan, slightly; arrow wound, left knee—Private Patrick M'Donald, slightly; arrow wound, left arm,—Private Andrew Connor, severely; arrow wound, right arm—Private Alfred Thompson, severely; shell wound of head—Private John Gleeson, severely; gunshot wound, right leg—Sergeant Patrick M'Grady, killed—Private John Delaney, killed—Private Thomas Burns, severely; gunshot wound, left arm—Private William Creeny, severely; arrow wound, right leg—Private Charles M'Gregor, slightly; gunshot wound, left leg—Private Robert Wakeham, severely; gunshot wound, left leg—Private John Scott, severely; gunshot wound, right hand—Private Daniel Cunningham, severely; gunshot wound, right hand—Private Thomas Lane, slightly; gunshot wound, left side of face—Private John Keeffe, severely; gunshot wound, left leg—Private Daniel Murphy, severely; gunshot wound, right cheek—Private William Campbell, slightly; gunshot wound, upper lip—Lance-Sergeant Alfred Elliott, severely; gunshot wound, right hand—Private Patrick Furry, slightly; gunshot wound, left side—Private James Hunt, slightly; gunshot wound, right thigh.

Madras Mountain Artillery—Private Arroomoogan, severely; gunshot wound, left arm and body—Private Norman Swanny, severely; gunshot wound—Private Velley Dunn, severely; gunshot wound.

Chinese Coolie Corps—Two severely and four slightly; gunshot wounds.

JOHN MUIR, M. D., Deputy Inspector-General,
Principal Medical Officer.

(True copy.) R. BIDDULPH, Military Secretary.

PARIS.

A French writer has remarked that reports are like mushrooms, which spring up during the night one hardly knows how. There is one of these vague reports abroad just now, but where or how it has originated I have been unable to discover. People do say that another *coup de état* is on the *tapis*, and that the same hand which has curbed in the church and state is about to try and lessen the power of his marshals, and so increase his own. We know that the uncle allowed no rivals, that he never forgave Kellermann his charge at Marengo, and hardly loved the brilliant Moreau; we know also that in diplomacy Napolean III. brooks no deviation from his own will and pleasure; so it is not impossible that having taken the chief military command, he may wish to exercise the same absolute power over his lieutenants as he wields over the other branches of the government.

The deliberations of the meeting of the marshals the other day have not been made public, but it has been resolved to add a fourth battalion to each regiment, as was the case before the breaking out of the last war. The Duke of Magenta proposed that an active division should be attached to each *corps d'armée*, and further, that the depots should be strengthened by a reserve. These propositions were not, I believe, immediately accepted, but the Marshal was asked by the Emperor to draw up a report on the subject, which he will take into consideration.

The principal object of the meeting was to discuss the formation of an army of reserve, a problem which has often been proposed and argued, but which has not yet been resolved. Neither the First Empire, the Restoration, nor the Government of July had a regular reserve—they all turned away from a system which presented so many difficulties. The *Union* is bold enough to demand why the present government wishes to adopt a measure which does not appear to be called for by any particular emergency. It remarks that the soldiers of Fontenoy and Marengo were brilliantly reproduced in those of Rome and Sebastopol, as well as *noblesse la bravoure oblige*. What do we want more?

There is a sort of idea here that some day England will be destroyed by one of her own inventions—that steam is to bring about our ruin whilst increasing the prosperity of every other country. I have just seen a brochure—"*Gare à nos vaisseaux.*" I was tempted to examine it, on account of its title, hoping to glean some information on nautical matters. Alas! it is only one long cry of agony against English perfidy, who, by constantly managing to destroy the fleets of other nations, lords it so haughtily on the ocean. She is again getting jealous of the French marine, and her far-seeing eyes are turned towards Algeria, which she has so long and so ardently coveted. I would give you some extracts were the pamphlet worthy of it; but when the author states that the Prince of Wales was sent to the United States to captivate "*leurs charmantes* ladies," and so insure the neutrality of America in case of our attacking France, one has had quite enough of M. Bobœuf and his political ideas. He, too, is amongst those who hope much from the aid of steam, which it delights him to call by such fine names as the "great apostle of the future," "intelligence substituted for matter," &c. &c.

The cannon of the Invalides have again been fired in commemoration of a victory gained by the Western Alliance. The French papers have all lauded the ability with which the campaign in China has been conducted, predicting that its effect will be the redemption of so much human matter, and another step taken in the path leading to civilisation. Of course so fine an opportunity to say something about the opium trade could not be allowed to pass. It is one of the sore spots upon which the Gallic journalist delights to place his finger and watch the British lion wince. The *Monitcur*, in its remarks upon the taking of the Chinese forts, says that "in the account given by General Montauban he dwells naturally upon the operations of the French troops under his command; the English government will give, without doubt, the same publicity to the reports of its generals; and thus will be completed the recital of an expedition in which the chiefs and the soldiers of the two nations have rivalled each other in courage and devotion."

Digitized by Google

The following is the substance of the reports made by General Montauban. The first is dated from Sin-ho, Aug. 18.

"The allied army, marching from Peh-tang on the 12th, after having repulsed the enemy's cavalry and driven the infantry from its intrenched positions round Sin-ho, took up its position on the left bank of the Peiho.

"After much difficulty, owing to the manner in which the ground was traversed by canals, a position was reached from which it became possible to open an effective fire upon the forts before directing upon them our columns of attack.

"On the 14th the two armies moved forward in the following order:

"The English advanced in a parallel line with the river, whilst the brigades Jamin and Collineau were on their left, the whole line being preceded by artillery, who were the first to be engaged.

"The ground over which we had to pass was less firm than that assigned to our allies. Our march, however, was in no way retarded by this circumstance. Towards 8 o'clock two batteries of four deployed to the left of the English and opened fire at the same time as them, at a distance of about 1500 metres. Their fire was splendidly directed, notwithstanding the vigorous but ill-directed manner in which the enemy replied. A battery of mountain mortars, which entered in line as soon as Colonel de Bentzman, by a movement in advance, had diminished the distance, opened a very successful fire.

"During this time our infantry, which had been kept in the distance, executed a diversion on the extreme left, and accompanied by two pieces of cannon, destroyed the defences at the extremity of the road by which it was proposed to direct the column of assault.

"The artillery approached within 400 metres from the fort under a fire which diminished by degrees.

"Towards nine o'clock the fire of the Chinese had almost ceased. Only a few guns on their extreme right still continued to fire. The moment was come. After having entered into an understanding with General Grant, approaching all my infantry by a movement in advance, I gave the order to Lieut-Col. Schmidtz to form the troops of the advanced guard in columns of assault, and to storm the enemy's entrenchments.

"Followed by several other officers, Lieut-Col. Schmidtz plunged into the ditch filled with water, and arriving the first at the top of the parapet, planted on its summit the national colours.

"At the same moment an English column had penetrated into the place at another point, and we were masters of the entrenched camp. A bridge thrown over the ditch soon permitted the rest of our troops to finish the occupation."

The next dispatch is dated Sin-ho, 24th Aug., 1860, and after detailing the preparations made for the attack on the Tang-ku forts, thus proceeds:—

"General Collineau bivouacked at the camp of Tang-ku on the evening of the 20th, with a company of engineers, the 1st battalion of the 102nd, two battalions of marines, one battery of 12 "canons rayés," and a detachment of pontonniers.

"It was decided to attack on the following morning; the French being on the right, the English on the left.

"At break of day the enemy opened fire on the English artillery. To this cannonade our allies soon replied. At about seven o'clock a formidable explosion took place in the fort which we were attacking. General Collineau immediately ordered forward three companies of the 102nd, who took up position behind an *épaulement* at about 300 metres from the counterscarp.

"At half-past seven another explosion, more terrible than the first, blew up the 2nd fort on the left bank. The forts on the right still continued to gall us greatly. Two pieces of 12 and 2 mortars (English) were pushed forward in a line with the troops most advanced, and directed against them.

"The decisive moment was approaching. An aide-de-camp sent forward to reconnoitre, reported the obstacles as three ditches full of water traversing some muddy ground. The interval between the two last ditches and the foot of the ramparts, where the *fire of our artillery had not succeeded in making a breach*, was covered with accessory defences of every sort.

"Generals Napier and Collineau decided on an assault.

"The Voltigeur company of the 102nd was thrown forward, whilst the Coolies carrying the ladders advanced towards the counterscarp.

"This column, commanded by Colonel O'Malley, experienced considerable loss. The Coolies, several of them being struck down, hesitated, and a section of engineers had to carry forward the abandoned ladders. A struggle now ensued which it would be difficult to describe. The tambour Fauchard planted the French flag upon the crest. The soldiers were led by Colonel O'Malley, &c. &c.

"The fort was at last captured, the English on their side having equally penetrated it."

In this dispatch, besides the modesty with which the general speaks of his own services, there are some points worthy of remark. The Armstrong gun, whose extraordinary performance excited so much admiration amongst the English correspondents, is in no way alluded to. It is also stated that the Coolies were discomfited, and threw down the ladders. The *Moniteur* of to-day gives a letter from its correspondent, who also refrains from saying more than "the fire of the allied troops was splendid." The silence thus observed with regard to the Armstrong may be caused by not wishing to hurt the feelings of the inventor of the *rayé*. With this exception, both dispatches and letter are most impartial.

SOLDIERS' AND SAILORS' ALMANAC, 1861.—Never will either soldier or sailor lay out 2*d.* better than in purchasing this very excellent little book, which he can stow away in any place, and which will be a rich store of instruction for him. We do not pretend to deal with the religious portions of the almanac, or with the gems from Thomas à Kempis, but we can assure our readers that in secular matters—in information of great interest to the soldier—the almanac published by the United British Army Scripture Readers' and Soldiers' Friend Society is exceedingly rich, and that the money's worth is more than had by those who purchase it merely as an almanac.

ITALY*

"Bis dat qui cito dat" might fairly be adopted for the motto of any work upon Italy which makes its appearance in this eventful 1860; and a far less able and elaborate history of that country than the one of which the first two volumes now lie before us might, if published under such circumstances, be expected to attract a large share of attention, and to find a large number of readers. However, Mr. Butt's is no ephemeral production, brought out to satisfy the craving of the moment—a rude dinner, set before the hungry public, from which at other times they would turn away with contempt. It bears the stamp of too much honest labour and careful research to be doomed to such a butterfly existence; and it is but a fair reward for the author's industry that his work should have appeared when we are happily in the best mood for appreciating it, and that the dish which he serves up to us should be thus not only palateable, but seasonable.

To attempt with our limited space anything like a review of this first instalment of so extensive a work would be impossible; to endeavour to give a brief analysis of its contents would be unprofitable; and our remarks must therefore necessarily be shorter than the subject of them deserves, and will be confined to such points as seem to us more especially deserving of attention.

Pregnant with interest as is the earlier history of Italy, fraught with glorious, and at the same time melancholy associations, as are the accounts of the once powerful republics of Venice and Genoa, of which Mr. Butt truly observes that "it requires all the strong confirmation of the indisputable testimony by which they are supported, to obtain implicit assent to the accounts which have come down to us, of their power, their liberty, and the spirit of their people;" impressive as is the tale of the greatest of the mighty German line of emperors—Frederick Barbarossa—of his struggles with the Papal power, of his triumphs, his defeats, and his humiliation; absorbing though we may find the story of the deeds and glories of the great House of Hohenstauffen, down to the cruel death of the last of the powerful race, the youthful Conradin; and much as we may feel inclined to linger over the graphic account which, in a few masterly chapters, Mr. Butt gives us, by way of introduction, of these romantic times—we feel that this is not the part of Italian history from which we have most to learn, or which has the most intimate connection with that of our own times.

The portions of these volumes, then, which will have the most immediate interest for readers of the present day are those in which the author follows the course of modern events, the rise and progress to power of the House of Savoy, and the vicissitudes to which the kings and kingdom of Naples seem ever to have been exposed; these Mr. Butt traces in clear, bold characters, conveying to the minds of his readers a vivid conception of the different steps by which Italy was brought to the condition in which it was found on the assembling of the Congress of Vienna, and of the important political changes which that Congress effected.

The progress of the House of Savoy receives particular attention at Mr. Butt's hands; and a remark which he makes at p. 250, appears to us to indicate so faithfully the causes which have mainly contributed to raise the princes of that house to the position which they now occupy in Italy, that we will yield to the temptation of quoting it: "Those who accept the lesson which all history teaches, and are accustomed to trace in the early events of nations and dynasties the evidences of a design that fits them for the part they are afterwards to perform, may, perhaps, in the incidents that have marked the origin and progress of the power of the House of Savoy—in their gradual acquisition of Italian territory—in their preservation of the spirit of loyalty and military chivalry—in their very isolation from the early struggles of Italian freedom—in their consequent exemption from Italian crimes—discern a long course of preparation which has qualified their dynasty for the position of defender of Italian independence which it has assumed." Further on again, after tracing accurately the process of annexation by which the territories of the House of Savoy had been gradually enlarged and had expanded "from the valleys of Susa and Aosta, until they included all the plains of Piedmont," our author sums up the result of his observations in the following sentence, which, when considered in conjunction with recent events, will be found to repay a careful perusal:—"Whatever is to be the future destiny of a kingdom whose origin and progress have been marked by so many strange adventures, we cannot but see in the long continuance of this dynasty another instance of that which seems the universal law of human affairs—a law that regulates small principalities as well as great. Power, to be permanent, must be slow in its growth. Empires that are rapidly constructed are almost as rapidly broken up. It is in slow and gradual acquisition that the foundations of permanence are laid. Rome had not conquered Italy at the end of 500 years. Russia has extended her frontier with slow, but sure, advance. The progress both of Savoy and Hapsburgh illustrates in modern times how power by degrees is surely consolidated and built up. On the other hand, the empire of the great Alexander can hardly be said to have survived himself. That of Charlemagne scarcely outlasted two generations of his descendants, and Napoleon lived to see all his mighty conquests scattered to the winds.

"In the period that has elapsed since the Congress of Vienna, the princes of Savoy have alone among Italian sovereigns maintained the Italian interest. All others represented not Italy, but one or other of the European powers. One Spanish Bourbon had been placed on the throne of the Sicilies. Lucca was assigned as the temporary possession of another. At Parma an Austrian archduchess occupied the seat of the Farnese. Tuscany had been handed over to the younger branches of the imperial line of Lorraine. In the archduke who ruled at Modena, no one thought of recognising a representative of the House of Este. From the roll of Italian sovereigns the old names of the country had disappeared. The princes of Savoy alone, among them all, could trace a possession in Italy for even one hundred years." (I. pp. 293, 294.)

"No portion of the recent history of Italy," as Mr. Butt justly observes, "presents to us incidents of deeper interest than those which are recorded in the modern annals of the kingdoms of Sicily and Naples," and, accordingly, we find the history of these unfortunate countries, since the commencement of the French Revolution, occupying a considerable space in these volumes. As we peruse it we are again and again struck with the similarity between certain events here recorded, and those which the present time is working out. There are passages in these volumes which we seem to have read in the *Times* of yesterday, or which we may expect to read in its columns to-morrow: the injustice, the cruelties, the dungeons where "no rays of the sun ever penetrate, and a gloomy twilight only makes visible the damp vapours that float, and the noxious animals that crawl, in its gloomy recesses;" the revolutions, the flight of a king, the promises made only to be broken, the successive proclamations rising each above the other in expressions of liberality and good-will—faugh! let us hope the Hercules in the red shirt will be able to cleanse these Augean stables thoroughly at last; the filth which has accumulated there is of long standing.

The story of poor Murat is told in these volumes at considerable length—his fortunes are followed through all the changing events of his memorable life, which, as Mr. Butt observes, "might be described as a series of hair-breadth escapes from safety," from his earliest, happiest days in the little village hostelry at the foot of the Pyrenees, down to the moment when having "touched the highest point of all his greatness," he fell before the flashing muskets in the narrow ditch of the Castle of Pizzo.

The remainder of the second volume is devoted to an account of the acquisition of the Papal States—the rise and progress of the Papal power in Italy—the proceedings of the Congress of Vienna, and to a consideration of the results towards which the settlement of Italian affairs which was then effected seemed to point. "With the arrangements of the treaty of Vienna," says Mr. Butt, "it seemed indeed that the independence of Italy was extinguished for ever. Of the old lines of Italian princes no sovereign occupied an Italian throne! In the extinction of her lost republics the last traces of Italian nationality were blotted out. Over all her sovereigns, with the one exception of the King of Sardinia, Austrian influence was supreme. A vast military power was entrenched in the very heart of the country. To the eyes of statesmen the tranquillity of Italy was secure. Italian patriotism could only be displayed in a prudent acquiescence in that subjection which it was no longer possible to resist. But there are elements in the life of nations that are indestructible as that life itself; there are passions and feelings which the lapse of centuries cannot suppress, and which they scarcely change. The Italian was not yet reconciled to the ascendancy of the German. The contest that had marshalled the bands of patriotism on the field of Legnano was bequeathed to a remote generation. In the new subjugation which the Treaty of Vienna imposed on Italy, another page of her history is opened; but a page still to be written over with the records of the undying struggle against the dominion of the stranger." (II., pp. 534, 535.)

It remains then for Mr. Butt to trace in his succeeding volumes the course of these later, and not less interesting events—to bring the story of Italy down to the point at which the newspapers and telegrams take it up—to travel with the ill-fated people through the long, dark night of their sufferings and their wrongs, only leaving them when the clouds begin to roll off the horizon, and the light of a clearer, brighter day is beginning to dawn.

The task will be a difficult and onerous one, but after the specimen which Mr. Butt has given us in the present volumes of his powers and his perseverance, we may safely leave it in his hands with confident and pleasurable anticipations as to the result.

---

* *The History of Italy from the Abdication of Napoleon I., with Introductory References to that of Earlier Times.* By Isaac Butt, formerly Professor of Political Economy in the University of Dublin. Vols. I. and II. (London, Chapman & Hall, 1860.)

Most of the stragglers from the port division of the Channel Squadron have gone on board the screw steam-frigate Emerald, 51, Capt. Arthur Cumming, in Plymouth Sound, preparing to follow Admiral Stopford to Lisbon.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

HESTER—August 17, at Kussowie, the wife of Charles R. W. Chester, of the Extra Goorkha Regiment, of a son.

OUGLAS—November 4, at the residence of her father, Weymouth, the wife of Philip Heatly Douglas, Esq., Captain 1st Devon Militia, of a daughter.

OSSELIN—September 29, at Bermuda, the wife of T. R. Gosselin, Esq., 39th Regiment, of a daughter.

ALL—November 3, at 5, Victoria Place, Bath, the wife of Captain R. M. Hall, 13th Light Infantry, of a daughter.

ARES—November 2, at Beechwood, Helensburgh, Dumbartonshire, the wife of Lieut.-Colonel Meares, of a daughter.

NDOLPH—November 1, at Sutton, near Hull, the wife of Captain Randolph, of H.M.S. Cornwallis, of a daughter.

MMERS—October 13, at Brompton, the wife of Surgeon-Major J. Summers, M.D., of a daughter.

URBURN—November 1, at Dover, the wife of Commander J. P. Thurburn, Inspecting Commander of the Coastguard at Kinsale, of a daughter.

OD—November 4, at 49, St. George's Road, Eccleston Square, the wife of Captain Joseph Wood, of a daughter.

MARRIAGES.

FLECK—LANGRIDGE—September 29, at St. James's, Piccadilly, Gilbert Affleck, B.A., of No. 14, Duncan Terrace, Islington, only son of the late Colonel Gilbert Affleck, to Charlotte Ann Elizabeth, daughter of the late Mr. Robert Langridge, of Brighton.

MSTRONG—GRAVES—October 31, at St. Ann's Church, by the Rev. Dr. McDonnell, Provost of Trinity College, Dublin, Thos. Priaulx St. George Armstrong, Captain 49th Regiment, and Knight of the Legion of Honour, eldest son of John Priaulx Armstrong, Esq., of Claremont, King's County, to Elizabeth Mary, second daughter of the late Robert Graves, Esq., M.D., of Cloghan Castle, King's County.

SHMAN—BROOKS—September 15, at Serampore, near Calcutta, by special licence, by the Rev. T. M. Ridsdale, John George Bushman, Esq., of H.M.'s 3rd European Light Cavalry, to Clara, second daughter of James Brooks, Esq., of Camden Town, London.

EW—HOTHAM—November 6, at Crowcombe, Somerset, by the Rev. Edwin Hotham, assisted by the Rev. Gerald Carew, Coventry Warrington Carew, Esq., of the Cottage, Crowcombe, second son of the late Thomas G. W. Carew, Esq., of Crowcombe Court, to Rosetta Anne, eldest daughter of William Hotham, Esq., of Upton, Bucks, and granddaughter of the late Admiral Sir William Hotham, G.C.B.

NT—BLAIR—November 1, at St. George's, Hanover Square, by the Rev. R. Michell, B.D., Public Orator of the University of Oxford, Colonel J. Thornton Grant, C.B., of H.M.'s 18th (Royal Irish) Regiment, to Mary Rosanna, eldest daughter of T. Blair, Esq., of Queen's Gardens, Hyde Park, and granddaughter of the late General Sir Robert Blair, K.C.B.

VE—ERSKINE—October 30, at Cardross, Perthshire, by the Rev. Hay M. Erskine, uncle of the bride, Captain Joseph Charles Ross Grove, 42nd Royal Highlanders, only son of Captain Grove, Inverarron, Ross-shire, to Emily Henrietta Hay, younger daughter of the late William David Erskine, Esq., of the Madras Army, and granddaughter of the late David Erskine, Esq., of Cardross.

LISH—THIRTLE—November 1, at St. Mary's Church, Islington, by the Rev. C. Strachn, John, youngest son of Lieutenant Mellish, of Winkfield, Berks, late attached to the Quartermaster-General's Department, to Jane, youngest daughter of William Thirtle, Esq.

TE—ANDERSON—November 1, at St. Mark's Presbyterian Church, Greenwich, by the Rev. G. J. C. Duncan, John Whyte, Esq., M.R.C.S., East Grinstead, Hon. Surgeon, 5th Sussex R.V.C., to Agnes Millie, youngest daughter of the late William Anderson, Esq., merchant, Dundee.

DEATHS.

ARDS—November 4, at 28, Princes Square, Kensington, Ann, wife of Mr. William Edwards, Inspector-General Post-Office, formerly of the 2nd Lagoon Guards, aged 46.

TCE—November 1, at 7, Campden Grove, Kensington, Captain Richard France, late 1st Battalion Grenadier Guards, aged 68.

.KE—October 27, at Dawlish, Captain Rose Henry Miller, R.N., aged 71.

S—October 1, of yellow fever, on board H.M.S. Arrogant, Herbert William Hore, R.N., second son of Herbert Francis Hore, of Pole Hore, in the county of Oxford, Esq., aged 17.

REGOR—August 11, at Hong Kong, Captain Alexander E. McGregor, 31st Regiment.

ALFE—August 27, on board H.M.'s ship Arrogant, at St. Paul de Loanda, west coast of Africa, of Dysentery, Lieutenant Sydney Metcalfe, R.N., son of Charles Metcalfe, Esq., of Inglethorpe Hall, Emsh, Norfolk, aged 25.

TS—November 4, at Richmond, Surrey, of consumption, Emily Everette, youngest child of the late Lieutenant John Wells, R.N., aged 23.

DEY—October 31, at 1, Marine Terrace, Southsea, William Wallace Wildey, M.D., R.N., of Cosham, aged 38.

ALDERSHOT.

By a Divisional Order of the 5th of November, the whole of the *tentes d'abri* in possession of regiments and corps are directed to be returned to the military stores as soon as possible.

Assign Stevenson, 49th Regiment, is granted leave of absence on private affairs, from the 7th of November, 1860, to 31st of January, 1861.

By a Divisional Order of the 7th of November, Lieut.-General Commanding considerately authorises the Barrack-Master to issue to the troops occupying the hut barracks an extra allowance of fuel, to the extent of one-third, in accordance with the discretionary instructions contained in the War Office letter dated 25th January, 1856, and which the present bitter weather amply warrants his bringing into operation. He also gives notice that the heavy great watch-coats for the sentries will be ready for issue at the barrack office on Friday morning, the 16th inst., and takes the opportunity of directing the attention of Majors-General commanding brigades, and officers commanding distinct corps, to his orders of the 24th November, 1858, relative to the use of these comforts. In consequence of the early advent of winter, he has directed, in accordance with the expectations we expressed in our issue of the 27th ult., that all field days should be stopped until further orders, and that route marching into the country shall be instituted. The first march will commence on the 15th inst.

Advertisements.

SALE OF OLD STORES AT WOOLWICH.—Admiralty, Somerset Place, 6th Nov., 1860.—The Commissioners for executing the Office of Lord High Admiral of the United Kingdom of Great Britain and Ireland, do hereby give Notice, that on WEDNESDAY, the 14th INSTANT, at 12 o'clock at noon, the Commodore-Superintendent will put up to SALE, in Her Majesty's Dockyard at Woolwich, several lots of OLD STORES, consisting of Old Buntin, Leather Cordage, Hawser-laid and Cable-laid Canvas, and Hammocks in rags, &c., &c., &c., all lying in the said yard. Persons wishing to view the Lots must apply to the Superintendent for Notes of Admission for that purpose. Catalogues and Conditions of Sale may be had here and at the yard.

ALDERSHOT DISPENSARY.—A few Gentlemen have formed a Committee for establishing a Dispensary in the town. Advice and Medicine will be given gratuitously to the poor. The necessity of such an institution is keenly felt, especially as some have perished for lack of medical aid. A subscription has been commenced, but much more is needed before the Dispensary can be opened. Subscriptions of any amount will be thankfully received by the Rev. JAMES DENNETT, Incumbent of Aldershot; or by Messrs. MANGLES, West Surrey Bank, Aldershot.

SUBSCRIPTIONS.

Lieut.-General Sir J. Pennefather, K.C.B. ...	£5	0	0
B. Nichols, Esq.	5	0	0
Captain J. M'Crew...	1	0	0
Surgeon Barry	1	1	0

J. B. JOHNSTONE,
MILITARY TAILOR & OUTFITTER,
34, SACKVILLE STREET, LONDON, W.
AND
50, DAWSON STREET, DUBLIN,

Respectfully informs his Patrons that he has transferred the management of the Dublin business to his Son, from whom the most careful attention to commands may be expected; and J. B. J. takes the present opportunity to return very earnest thanks for the favours he has hitherto received. Books, measures, and patterns having been carefully retained, orders (by letter or otherwise) can be executed in London or Dublin; and all accounts due to the house are payable to J. B. JOHNSTONE, at either address:

34, SACKVILLE STREET, LONDON, W.
OR,
50, DAWSON STREET, DUBLIN.

SPECIAL ANNOUNCEMENT.

THE NEW BRANCH ESTABLISHMENT of E. MOSES & SON, at the CORNER of TOTTENHAM COURT ROAD and EUSTON ROAD, was opened on Tuesday last, November 6th, with an immense and unrivalled stock of READY-MADE CLOTHING, HATS, HOSIERY, BOOTS and SHOES, &c., for ADULTS and JUVENILES of all Classes.

E. MOSES & SON have endeavoured to render this Establishment worthy, in every respect, of the proud eminence they have attained among the Wholesale and Retail Houses of the Metropolis; and, while tendering their warmest thanks to the Public for the generous support and encouragement hitherto afforded them, they respectfully solicit a continuance of the same.

Every Department has been furnished with an entirely NEW STOCK of the most FASHIONABLE and SEASONABLE GOODS.

The BESPOKE TAILORING DEPARTMENT has been supplied with a splendid assortment of the latest home and foreign manufactures.

Cheapness combined with durability of material and workmanship will continue to be the prominent characteristic of the house.

The Establishment may be viewed at any time during business hours, without special invitation.

E. MOSES AND SON,
MERCHANT TAILORS, WOOLLEN DRAPERS, HATTERS, HOSIERS, BOOT AND SHOE MAKERS, AND GENERAL OUTFITTERS.

Illustrated catalogues on application. Manufacturers and Patentees of the Army Chair, Square-mouth Travelling Bag, Despatch Box, & Writing Dressing Case, &c., &c.

DINNEFORD'S PURE FLUID MAGNESIA

Has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for ACIDITIES, HEARTBURN, HEADACHE, GOUT, AND INDIGESTION.

As a MILD APERIENT, it is admirably adapted for DELICATE FEMALES, *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the ACIDULATED LEMON SYRUP, it forms an *Effervescing Aperient Draught*, which highly agreeable and efficacious.

PREPARED BY DINNEFORD & CO., DISPENSING CHEMISTS, (and General Agents for the *Improved Horse Hair Gloves and Belts*), 172, NEW BOND STREET, LONDON, W., And Sold by all respectable Chemists throughout the Empire.

DR. BUCHAN'S PATENT SUGAR-COATED VEGETABLE PILLS, VEGETABLE SKIN OINTMENT, and CONCENTRATED VEGETABLE ESSENCE, for Purifying the Blood, Regulating the Bowels, and Removing Vitiated Humours, Bilious and Liver Complaints, Rheumatism, Gout, Scorbutic Affections, Costiveness, Skin Eruptions, deep-seated Ulcers, and all Diseases of the Nervous System, from whatever cause, &c., affording at once a new lease of life to the sickly and aged of both sexes, also giving a beautiful and clear complexion. Proved by the sworn testimonies made before the Lord Mayor of London and sitting Magistrates. Sold by Buchan & Co., Patentees, 22, Newman St., Oxford St., London, W., and all chemists in town and country. Prices:—Pills, per box, 1*s.* 1½*d.*, 2*s.* 9*d.*, and 11*s.*; Ointment, per pot, 1*s.* 1½*d.*, and 2*s.* 9*d.*; Essence, per bottle, 4*s.* 6*d.*, 11*s.*, or bottle containing four times that quantity, 33*s.* Agents:—Barclay, 75, Farringdon Street, E.C.; J. Sanger, 150, Oxford Street, W.; Hannay, 63, Oxford Street, W.; Butler, 4, Cheapside, E.C.; Hooper, 43, King William Street, London Bridge, E.C.; R. Howden, 78, Gracechurch Street, E.C.; Prout, 229, Strand, W.C.; &c. &c.

Gratis, or post free for one stamp, of all Agents, and 22, Newman Street, W., Dr. Buchan's Work, entitled, BUCHAN'S DOMESTIC MEDICINES, containing instructions for the cure of every ailment incidental to man, woman, or child.

A Physician and Member of the Royal College of Surgeons, England (Registered under the New Medical Act), attends daily to give advice, without fee, to those purchasing Buchan's Medicines.

SAVARESSE'S PATENT FLEXIBLE CAPSULES, by which all nauseous Balsamic Medicines may be taken without inconvenience. These Capsules are made of animal membrane of slow solubility, thus obviating the usual nausea and unpleasant eructations which follow the use of those made with Gelatine. From numerous medical testimonials, EVANS & LESCHER, the Patentees, need only select the following by William Acton, Esq., see page 96 of his celebrated Treatise:—"In many instances I have known the gelatine capsule burst in the effort of swallowing, or dissolve as soon as it is in the stomach; an improvement has latterly been introduced by Messrs. Evans & Lescher, by enclosing the medicine in membrane, thus obviating the objection to all gelatine capsules." The Membranous Capsules may be obtained of all chemists, &c., in town and country.

RUPTURES. — HUXLEY'S IMPROVED PATENT MOC-MAIN TRUSS dispenses entirely with the lever spring. A flexible band, perfectly imperceptible, encircles the body (in lieu of the old steel spring), and an elastic pad secures the hernia. Measure required—circumference two inches below the hips. Price single, 12*s.*; double, 18*s.*; postage 10*d.* and 16*d.* Illustrated circulars on application to Mr. E. HUXLEY, 12, Old Cavendish Street, Oxford Street, W.

A BOON TO NERVOUS SUFFERERS.

HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., will send, post free, on receipt of a stamped directed envelope, THE WARNING VOICE, a new medical work on the most effectual cure of Nervous Debility, Loss of Memory, Indigestion, &c., which, if neglected, result in consumption and premature decay; with plain directions for perfect restoration to health and vigour. The true guide to those who desire a speedy cure. Every young man should peruse this excellent little work, if he values his health, happiness, and peace of mind. Sent direct from the Author's residence, 8, Burton Crescent, Tavistock Square, London, W.C.

Post free for two stamps.

EXTRAORDINARY DISCOVERY OF AN entirely NEW THEORY of CURING DISEASE, being the recorded experience of 30 years' special practice in Great Britain, France, and America—with evidence of the actual effects of the latest Scientific Discoveries, denominated NEW LOCAL REMEDIES, with the adjuncts of Constitutional Treatment not yet generally known, even by the medical faculty of the British Empire, but which have been recently introduced into England. Sent free on receipt of two stamps to defray postage, &c., by W. HILL, Esq., M.A., No. 27, Alfred Place, Bedford Square, London, W.C.—Daily consultations from 11 till 2, and 6 till 8 Evening.

"The illustrations are such as we have rarely met with."—*Literary Churchman.*

"Wood-engraving in this book has been carried to a pitch of excellence unparalleled."—*Press.*

"The book is most beautiful."—*Examiner.*

"A most superb edition, the engravings being not only exquisite in themselves, but being apt and fitting companions to the thoughts of the poet."—*Literary Gazette.*

JOHN MURRAY, Albemarle Street, W.

MAPPINS' TABLE CUTLERY.—SEASON 1860.

CAUTION.—MAPPIN BROTHERS beg to advise their customers and correspondents that they have only one establishment in London, viz., at London Bridge, and they hope that their friends will be careful to address them in full, either Mappin Brothers, London Bridge, London, E.C.; or Mappin Brothers, Queen's Cutlery Works, Sheffield. Established in Sheffield, A.D. 1810. None are genuine without their corporate mark, the "Sun," granted to their father by the Cutlers' Company of Sheffield, June 26, 1835.

Messrs. MAPPINS' Table Knives still maintain their unrivalled superiority; all their Blades being their own Sheffield Manufacture, are of the very first quality, with secure Ivory Handles, which do not come Loose in Hot Water; and the difference in price is occasioned solely by the superior quality and thickness of the Ivory Handles.	Ordinary Quality.	Medium Quality.	Best Quality.
	£ s. d.	£ s. d.	£ s. d.
Two Dozen full-size Table Knives, Ivory Handles	2 4 0	3 6 0	4 12 0

Complete Service	£4 14 6	£6 18 6	£9 16 6

MANUFACTORY, QUEEN'S CUTLERY WORKS, SHEFFIELD.

DAVIESON'S EVERLASTING TEETH.

THE LATEST DISCOVERY.

MR. EDWARD DAVIESON, SURGEON-DENTIST, has introduced a material for the construction of ARTIFICIAL TEETH so extraordinary that nature appears to have made good the ravages of TIME, DISEASE, or ACCIDENT, and when fitted detection is impossible, even though the wearer's mouth be closely examined. The price is so moderate that it is within the reach of all, and it is fitted without springs or other unsightly fastenings. The removal of stumps is unnecessary, and thus all pain is avoided. MR. EDWARD DAVIESON invites one visit of inspection to his establishment, which will convince the most sceptical of the truth and straightforwardness of this statement. The LIQUID ENAMEL, for Stopping Decayed Teeth, is ENAMEL WHITE, keeps its colour, and lasts for ever. It is invaluable for Front Teeth. Attendance daily from Ten till Six. Consultations free. MR. EDWARD DAVIESON, Electric Telegraph Office, 448, West Strand, London, W.C. The Descriptive Pamphlets free for two stamps.

To be obtained of all respectable Oilmen, Grocers, &c., and wholesale of CROSSE & BLACKWELL, 21, Soho Square, London, W.

SPORTSMEN AND GENTLEMEN OF THE ARMY AND NAVY.—S. & B. SOLOMONS, Opticians, 39, Albemarle Street, Piccadilly, W., opposite the York Hotel. Portability combined with great power in FIELD, RACECOURSE, OPERA, and general out-door day and night powerful waistcoat-pocket PERSPECTIVE GLASSES, weighing only 4 ounces each, containing 12 and 18 lenses, constructed of German glass, will show distinctly persons to know them at two-and-a-half and three miles. They serve every purpose on the Racecourse and at the Opera House. Country scenery and ships are clearly seen at eight to ten miles. They are also invaluable for Shooting, Deerstalking, and Yachting. Her Majesty's Coast Guards are making use of them as day and night glasses. The terms for them are powerful and brilliant Telescopes for both eyes. The most powerful Telescopes, possessing such extraordinary power that some, three-and-a-half inches, with an extra astronomical eyepiece, will show distinctly Jupiter's moons, Saturn's ring, and the double stars; with the same telescope a person can be seen and known three-and-a-half miles distant, and an object from fourteen to sixteen miles. They are in endless variety, of larger and all sizes, with increasing powers, and are secured by Her Majesty's Royal Letters Patent.

FIELD GLASS.—The BEST is BURROW'S MALVERN LANDSCAPE GLASS, invaluable to Sportsmen, Military and Naval Officers, Travellers, &c. Compact, portable, and efficient, combining a wide field of observation with extraordinary defining power. In sling case, 3½ guineas. Sent free on receipt of post office order to W. & J. BURROW, Great Malvern, Worcestershire.

BLACKSTONE'S COMMENTARIES adapted to the Present State of the Law. New Edition, enlarged and corrected to 1860. By MALCOLM KERR, LL.D. 4 vols. 8vo.

JOHN MURRAY, Albemarle Street, W.

ILLUSTRATED EDITION OF TENNYSON'S "PRINCESS," WITH MACLISE'S ILLUSTRATIONS.

(SATURDAY REVIEW, *December* 17, 1859.)

"Tennyson's 'Princess,' illustrated by Maclise. We mark is as one of the most successful of the whole series of ristmas Books which have come before us. The poet and e illustrator here admirably suit each other. This volume oids what strikes us as being the fault of its compeers. It s a unity in illustration as well as in form; and a single poem, ustrated by a single artist, is worth a table full of miscella- ous incongruities of all sorts of artists, in all sorts of styles, aking drawings for all sorts of subjects, without any certed artistic purpose."

(DAILY NEWS, *December* 22, 1859.)

"This 'Medley,' besides being the most perfect poem that ever bore that designation, contains a richer variety of matter for pictorial accompaniment than any other of Mr. Tennyson's productions. The romantic pencil of Mr. Maclise, long accustomed to the realization of gorgeous dreams and fancies pertaining to the days of knighthood, has been well employed in tracing the outlines of this poetical sheaf, which binds together 'the scattered scheme of seven.' The drawings have been transferred by other hands to the engraver's wood-block; and the minute touches characteristic of the master have been carefully preserved by Messrs. Dalziel, Green, Thomas, and E. Williams."

(MORNING POST, *December* 11, 1859.)

"The pen of the poet has inspired the pencil of the artist, until each has drawn from the other the highest degree of grace and dignity. Here we find the Laureate's 'Princess' appropriately decked with gem-like illustrations from Mr. Maclise' drawings. None of Mr. Tennyson's poems afford such subjects to kindred genius, except, indeed, it is his wonderful 'Idylls.'"

Beautifully Printed in royal 8vo. price 16*s.* cloth; 21*s.* morocco; 31*s.* 6*d.* morocco (HAYDAY),

THE PRINCESS: A MEDLEY.

BY ALFRED TENNYSON, ESQ., D.C.L., POET-LAUREATE.

WITH TWENTY-SIX ILLUSTRATIONS ON WOOD BY THOMAS, DALZIEL, WILLIAMS, AND GREEN.

FROM DESIGNS BY D. MACLISE, R.A.

(MORNING HERALD, *December* 20, 1859.)

"'The Princess' is too well known to require the slightest ical notice at our hands. The present edition is one of the st sumptuous books with which we have ever met. The m is printed on exquisitely tinted paper, and abounds with most beautiful engravings from the pencil of Daniel Maclise, . We unhesitatingly pronounce the engravings of 'The ncess' to be the perfection of the art."

(MORNING STAR, *December* 19, 1859.)

"Of 'The Princess' as a poem it is of course unnecessary to say a syllable in this place. Worthy as it is of gorgeous setting, it has never appeared in a form more worthy of it than in the volume before us. Here we have twenty-six wood engravings after designs of most wondrous beauty by Maclise. They are to humanity what Turner's designs for the works of Milton and Rogers were to landscape. Whoever possesses this volume has, indeed, in his possession a thing of beauty, which will be to him a joy for ever."

(ATHENÆUM, *December* 17, 1859.)

"An exquisite Medley of imagination, lovingly and thoughtfully illustrated by a poet of form. This will evidently be the Christmas favourite."

WEST MIDDLESEX RIFLES.
Lieut.-Colonel Lord Radstock, Commanding.

PRIZES.

The following Prizes will be competed for at the First Prize Meeting of the Corps, NOVEMBER 20th, 1860.

EIGHT COMPANY PRIZES of 5*l.* each, open to the Members of each Company who have obtained Fifteen Points in the first period. Range, 200 and 300 yards. Five shots each range.

THREE BATTALION PRIZES, consisting of 20*l.* and the SILVER MEDAL; 10*l.* and the BRONZE MEDAL; 10*l.* given by T. Hughes, Esq.; for the first, second, and third shots of the Battalion. These Prizes to be competed for by the Thirty men who obtain the greatest score in firing for the Company Prizes. Range, 400, 500, and 600 yards. Five shots each range. The Silver and Bronze Medals have been presented by the Chaplain, the Rev. J. E. Cox.

THE CHALLENGE CUP, presented by F. H. Bridgman, Esq., Captain Bridgman, and Ensign Phillips, to be shot for by the Twelve men who make the highest score in firing for the Battalion Prizes. Ten rounds at 700 yards range, at a target 6 feet square, with a 2 feet centre. The Cup to become the absolute property of any Member who wins it three years in succession.

A WESTLEY RICHARDS' BREECH-LOADING RIFLE, presented by Lieut.-Colonel Lord Radstock. Each Company to send in their Ten best Runners, to go through Judging-distance drill. Five distances. The Twenty-four men who make the highest score are to fire five rounds at 300 and 400 yards range.

A LADIES' PRIZE.—Subscriptions are now being raised for a Ladies' Prize, the regulations for which will be announced previous to the meeting.

All Shooting for the above Prizes must be made with the Long Enfield Rifle with the Government Ammunition, and in Hythe Position.

Entrance Fee for each Prize, One Shilling.

Honorary Members or Ladies who are desirous of adding to the foregoing List of Prizes are requested to signify the same to the Secretary, Lieutenant G. MARRINER, Orderly Room, 70, Seymour Place, N.W.

By order, G. PENNYMORE, Adjutant.

MILITIA.—A LIEUTENANT would be glad to meet with a QUARTERMASTER willing to RESIGN his COMMISSION in his favour, on reasonable terms, either in Great Britain or Ireland.—Address Quartermaster, care of J. White, Esq., 28, College Green, Dublin.

NAVAL CADETS, &c.—ALL the PUPILS prepared at the Royal Naval Academy, conducted by MR. CHARLES F. COOPER, R.N., have PASSED, and eight have taken 1st, 2nd, and 3rd places at the Royal Naval College. Terms moderate.—Address, Beresford Place, Southsea.

ARCHIBALD GRAHAM, *to whom remittances are payable. The subscription to the paper is 7s. 7d. per quarter, or 30s. 4d. per annum, payable in advance, postage included.*

A YEAR has now passed since Her Majesty "deemed it expedient that a Commission should forthwith issue for inquiry into the management of Greenwich Hospital." Exactly this day twelvemonths the Commissioners began to take evidence. They examined eighteen witnesses during as many days, between the 17th of November, 1859, and the 7th of February, 1860; the last examined being the late Admiral Sir Charles Napier, whose frequent representations in Parliament of the shortcomings of the institution mainly led to the Commission being appointed, but whose voice can never again be heard, either pleading on behalf of the seamen of the fleet, or rousing apathetic Boards of Admiralty from that dull sleep which appears to overcome wide-awake and out-spoken officers whenever they quit the Opposition benches and step into office. The Commissioners were directed to lose no time in the inquiry. It was to be completed at farthest in a year, but "sooner" if possible. And they duly obeyed the Royal command. They took two months only to digest the evidence they had collected in four; and their Report, which was completed on the 4th of May last, was immediately printed and laid before Parliament. Since then, however, nothing has been done. The Report is now in the Admiralty limbo. Not even the most obvious reforms have been attempted. The squabbling between the Governor and the Commissioners still goes on. The Secretary of the Admiralty, who began his career as a naval reformer with questions as to wasting millions of money, is now the contented instrument of a Board that wastes its time deciding whether the word "prime" may be inserted in the contracts for supplying butcher's meat to the pensioners at Greenwich, since the Commissioners will not agree with the Governor, that the suggestion of the Superintendent of Halls to have the best meat for the Hospital is desirable! His Grace the First Lord of the Admiralty, assisted by the other five commissioners for executing the office of Lord High Admiral of the United Kingdom, still chooses to go into questions whether, since beef will not always keep sweet for two days in summer, mutton may not be allowed on Sundays to the Greenwich pensioners, as Admiral Gordon, the Governor, desires, but as he cannot order, because it would be contrary to the "dietary approved and fixed by their Lordships," and the somewhat stiffly fixed opinions of Commissioners Tierney and Richards! Well might Sir James Gordon say, on submitting this grave matter to the Lords Commissioners of the Admiralty on 17th March last, "It is with much regret I am compelled to trouble their Lordships with such trifles." But what can the public think of their Lordships themselves, thus allowing their time to be trifled with, when the remedy is in their own hands, and when they appear to have more than they can manage in somewhat more important matters connected with the strength of the Navy and the safety of England?

The Royal Commissioners began their Report with an eloquent passage from Macaulay as to the foundation of the Hospital, in accordance with the design of Queen Mary, and in commemoration of the victory of La Hogue, in 1692:—"The gentle Queen sleeps among her illustrious kindred in the southern aisle of the chapel of Henry VII The affection with which her husband cherished her memory was soon attested by a monument, the most superb that was ever erected to any sovereign." The historian afterwards designates it "the noblest of European hospitals." But what does the Blue Book of the Royal Commissioners reveal? An institution so shockingly mismanaged that, on 1st February last, there were 1124 vacancies not filled up, from an "unwillingness on the part of many seamen of the most valuable class to enter it under existing arrangements!" Instead of containing "between 2000 and 3000 meritorious seafaring men, expressly selected, to be lodged, clothed, fed, and cared for, so as to mark the gratitude of a great nation for their services;" we have little more than half the number of men—good, bad, and indifferent, mixed indiscriminately together,—"men who have been petty and even warrant-officers, with ordinary seamen and the refuse of the naval service. Distinguished seamen of many years' standing, who have been maimed or wounded in action, or otherwise disabled on duty, confounded with others who have never known service at all." Hence, "the disesteem into which the asylum has fallen!" Indeed one witness (the present chief clerk of the Admiralty) goes so far as to say that "the popular notion of Greenwich Hospital being an institution of great value to the country, and one which reflects much honour on its wisdom and munificence, is a delusion!" And he logically concludes that he would "abolish Greenwich Hospital altogether." So much for Lord Macaulay's noblest of European hospitals!

Unquestionably, since Greenwich Hospital has thus become a sham and a popular delusion, if its management cannot be remedied, it ought to be abolished. But the "if" is important. It is important also to discriminate whether the institution in its origin and design was or was not of great value, and one which reflected much honour on the wisdom and munificence of the country, and whether its bad character is not solely attributable to gross mismanagement in modern times. Knowing as we do how far at the present day the management of such institutions generally, and especially in England, excels all that was even possible one or two hundred years ago, we of course regard it as an astounding proposition, to say that Greenwich Hospital must in these days be abolished as an impossible institution. But even that would be better than to let it go on becoming more and more demoralised; and, instead of being an honour to the nation, allowing it literally to stink in the nostrils of the Navy. We are not complaining that the Board of Admiralty are not at once proposing or prepared to carry out every recommendation of the Commissioners. They will require the aid of Parliament in some things; but we do say, that many of the most offensive and objectionable things urged against the management at Greenwich were susceptible of immediate remedy, and these remedies ought not to have been left so long unapplied. Why has not the Governor been authorised to settle the dietary and such things without bothering the Board? Why is the offensive yellow-sleeve punishment yet retained? Why is some increase not made to the poor pensioners' pocket-money? Why is some classification with respect to character and rating not ordered to be made by the Governor, and "the refuse of the Navy" cleared away? Why are the boys of warrant-officers not at once allowed the privilege of admission to the Upper School? Why, in short, before all that should be done can be done, is not as much done as could be accomplished under the present management? "I believe," says Mr. Pennell, "the officers of the establishment do all they can at present to render it as comfortable as it can be made under the existing system; but their hands are tied in various ways." We wish to see their hands untied. Red-tape is the curse of the institution. The squabbles between the Governor and Commissioners are a disgrace to the Admiralty, who render them necessary by not delegating the proper authority to decide to the one or the other.

Greenwich Hospital has but one clear redeeming point in all its management. That one bright spot is the infirmary. "The present system of regulations in force there was organised and introduced by Sir John Liddell. It is a system which becomes the character of a great national institution. On all sides there are marks of his thoughtful, judicious superintendence."

And so it might have been in the Hospital itself, but for the mischievous tying of the Governor's hands. As Sir James Graham said, the Governors have always been officers of the greatest distinction:—Sir Richard Keates, Sir T. Hardy, Sir C. Adam, Admiral Fleming. But what can the ablest and most anxious Governor do, if not allowed to act? For twelve years the Governor contended with the Commissioners as to paying wages weekly, during which time the Board of Admiralty simply acted as potterers—"delaying," "referring," "declining to press the Commissioners," till at last they "authorised" what the Governor, Sir Charles Adam, had contended for so long and wearily. The correspondence is too much for our columns, but not too tedious for the successive Boards of Admiralty, before which the subject was brought again and again between 1846 and 1858. Their Lordships are not content with affecting to be the best judges of shipbuilding, of accounts, of timber and stores, and of medicine and sanitary regulations for the Navy; they must needs also know more at Whitehall about the beef and mutton at Greenwich than those who "nose it" on the spot! Really if they will claim such a power in their nostrils, need it be wondered if people consider they must have also uncommon long ears! We should have imagined that Sir James Gordon might have been safely intrusted to settle the *cuisine* of the establishment, and that he would be as fair a judge of beef as any of the Lords at Whitehall! Sir Charles Adam, when at the Admiralty, could have decided at once what he was not allowed to do when afterwards he was promoted to Greenwich, and sent down to "govern" the Hospital! The constitution of the management may be altered in any way whatever, but no good will result if the managers' hands are still to be tied with red tape. Considering the kind of things the Board of Admiralty require to be referred to them, we really know not whether they or the country are most to be pitied. The Blue Book on Greenwich Hospital tells less against that institution than it does against the High Commissioners overruling it at Whitehall.

It is with very great pleasure we are able to announce to our readers that His Grace the Duke of Somerset has recommended to Her Majesty the name of Admiral Sir Graham Eden Hamond, G.C.B., Bart., for the vacant post of "Rear-Admiral of the United Kingdom." We much regret that our limited space prevents us from sketching the stirring events of the life of this distinguished man, himself the son of an eminent naval officer, further than to say that he entered the naval service in 1785 as a naval cadet in the Irresistible, 74, and after various skirmishes with the enemy in many parts of the world, was present with Lord Howe in the Queen Charlotte in the glorious victory of the 1st June, 1794. During the next seven years he was to be found in many places where actions with privateers, cutting out with boats, and such smart work, were common events; and we find him in 1801 commanding the Blanche frigate, 36, and leading her with Lord Nelson under the crown batteries at Copenhagen on the 2nd of April of that year. The Sunday following that memorable action, Captain Hamond had the satisfaction of holding the prayer-book of his immortal chief when returning public thanks to the Almighty for the extraordinary success with which He had been pleased to bless the British arms. From this date Captain Hamond was continually under fire in various sea-fights, and we still remember how, when captain of the Lively, frigate, 38, he was the terror of the Spaniards off Cape St. Vincent, and sacked their

Digitized by Google

privateers of immense amounts of treasure, which, by legal quibbles, we believe, eventually proved little remunerative to his pocket or to those of his gallant crews. On the 29th May, 1805, he sustained a brilliant night action with the Spanish line-of-battle ship, Glorioso, 74, which he severely crippled, and would probably have captured on the following day, had the zeal of his officer of the watch in following the enemy during the night been equal to the occasion. Captain Hamond served in the reduction of Flushing, and held the command-in-chief as rear-admiral on the South American station from 1834 to 1838. This was his last command; but it is well known throughout the Service, that had it not been for the partial loss of his hearing (which faculty he never quite recovered after the fearful bombardment of Copenhagen) Sir Graham would have hoisted his flag long ago at one of our great naval stations. There are but very few men still living who fought the brave Danes under Nelson; and we observed that during his progress through the United States, the Prince of Wales particularly noticed two old English tars who still survived. Lord Nelson and his brave captains were refused the gold medal for that great event, although Lord St. Vincent, the First Lord, had promised repeatedly that it should be granted. Had Nelson lived to come home after Trafalgar, he would of course have insisted on it, otherwise he never would have accepted a Trafalgar medal, assuring his captains that he never would put on his medals for the St. Vincent and the Nile again, or for any other victory he might have the future good fortune to gain, until the gold medal was granted for the Copenhagen fight—and he never did wear them from that time. Nelson fell; and although the captains memorialised over and over again for their rights, they never obtained them, though it was no fault of King William that they were not successful. We are glad to add that the gallant subject of this brief but imperfect notice is still in the enjoyment of excellent health; and from his marine residence near the Needles, his ensign may often be seen flying as men-of-war pass from Spithead down the western passage of the Wight, and few there are but dip their flags in compliment to the brave old sea-king who, in the great days of the old war, so often led their fathers to victory and glory. We congratulate the gallant admiral on the compliment he has received from the hands of his Sovereign, and trust he may long live in the enjoyment of it.

The account in the *Times* of yesterday of the relative behaviour of Her Majesty's ships Hero and Ariadne on their voyage home from America, is suggestive of several important considerations bearing upon naval tactics with steamers. Suppose the Ariadne to be an enemy's frigate, name unknown, and being sighted by the Hero, and a chase commenced, the former running at quarter or two-thirds speed against the wind, thus forcing the Hero to follow at her full speed, also under steam, just keeping out of her reach till her small stock of coal is all exhausted. The Ariadne then turns upon her with her whole steam-power, out-manœuvring her, and raking her as she likes. Would not the Hero be, practically, a sailing vessel against a steamer in such a case? And of what real service can the "auxiliary screw" be to a vessel like the Hero, which steams very slowly at best, and can only carry a week's coal? Will not frigates like the Ariadne be really more formidable than line-of-battle ships that can neither sail nor steam better than the Hero? Also, how would the Hero be able to cope with a vessel like the La Gloire?

Orders have been transmitted to general officers commanding districts at home and abroad from the War Office, directing them to take measures with officers in command of the Royal Artillery for searching all ordnance, mounted or dismounted, in their charge. This order has been issued in consequence of the bursting of the gun at Dover, attended with such fearful havoc to the Volunteers who were then working it; and also in consequence of the still more unaccountable accident which occurred at Guernsey by the explosion of a new 68-pounder, 112 cwt., to which we lately alluded. We consider this measure prudent and precautionary; but although the thorough searching of ordnance, especially after rapid firing, may often detect flaws, and prevent disastrous consequences, yet, for all that, guns will burst occasionally from causes which cannot be ascertained, but which may mainly be attributed to the unequal cooling of the metal when subsiding from a state of fusion. The Americans have been of late years conducting important experiments in gun-founding in order to ascertain the surest mode of securing an even contraction of fused metal; and by means of a core of cold water, running through the centre of the bore, have obtained some very remarkable results, which we shall at an early date hope to lay before our readers. The searchers of the War Departments will be employed in this new service; and the artificers of the Royal Artillery, when qualified, will also be available at many stations.

The Comptroller of the Navy, Sir Baldwin W. Walker, Bart., has been on leave of absence from Whitehall during the week. It is expected that he will resume his official duties on Monday next.

THE ARMY.

5th Lancers. Lieut. Brown and Cornet Blake were yesterday examined before a board at Aldershot, as to their fitness for promotion.

7th Hussars. Lieut.-Colonel Sir William Russell has been granted leave in extension to the 31st of March, 1861.

17th Lancers. Assistant-Surgeon Johnson has been granted sick leave to England from Madras; Paymaster Belcher has sick leave to Bombay for two months.

18th Hussars. Cornet Wright is on leave to December 26th.

Royal Artillery. Lieut.-Colonel the Hon. D. M. Fraser has sick leave in extension to January 31, and Lieutenant Tracy to November 1, 1861. On Monday morning, at 8 o'clock, the available men of the depot brigade Royal Artillery assembled at the Riding-house establishment at Woolwich, to witness the infliction of fifty lashes upon Private John Wetherall, a gunner of the fourth brigade, who had been tried by court-martial and found guilty of various acts of insubordination, and also desertion. The prisoner's sentence having been read over, he was stripped and secured in the usual manner, when the punishment was fully administered in the presence of a surgeon from the Ordnance Hospital. The prisoner was then removed to the hospital, and when in a convalescent state will, in accordance with his sentence, undergo a term of imprisonment. It appears that the prisoner is a most incorrigible offender, and has previously undergone a similar punishment. The China mail brings news of the death of Veterinary Surgeon Cleaveland from the effects of the climate.

Royal Engineers. Lieut. Boyd has left Chatham for Plymouth to be stationed.

Military Train. We read the following in the last letter of the special correspondent of the *Times* in China, respecting the 2nd battalion of the corps:—"The Military Train fairly broke down for a time. Three years ago a detachment of the Military Train was sent to China, whence they were at once forwarded to India, in consequence of the demand for troops during the mutiny. There they acted as cavalry, and did excellent service. The present detachment joined this expedition with the full expectation of seeing similar service, and were much disgusted at being placed under the orders of the Commissariat to perform the duties for which they were created. In fact they were above their work. With all the trappings and accoutrements of Dragoons they did not relish the necessary, but by no means exciting, work of bringing up supplies from Pehtang, and guarding sheep and bullocks along the causeway. At length the matter reached a climax. Mr. Turner, the head of the Commissariat, had frequently complained of Major Cooper acting independently of his orders. He now officially reported that the baggage animals were not properly looked after, that sufficient exertion was not made in keeping them together on the road, or in giving assistance to the weak and disabled, that an opinion prevailed among the Military Train that they were employed on a duty derogatory to them, and that this was in a great respect due to the example of Major Cooper. The Commander-in-Chief at once relieved Major Cooper of his command, and he returned to England by the last mail. The Military Train is now commanded by Captain Gray, and works much better, as it acts in unison with Mr. Turner instead of against him."

1st Regiment, 1st battalion. His Royal Highness the Commander-in-Chief has approved of the removal of Ensign Norman from the 1st to the second battalion of this corps, and that officer will hold himself in readiness to proceed to China as soon as a passage has been provided for him. The 2nd battalion, may be expected home immediately upon the conclusion of the hostilities in China. We regret to hear of the death of Lieutenant Palliser in China. He entered the army in March 1856.

2nd Queen's Royal, 1st battalion, may be expected home immediately upon the conclusion of the hostilities in China.

3rd Buffs, 1st battalion, may be expected home immediately upon the conclusion of the hostilities in China. 2nd battalion. Major Burke has rejoined at Malta from leave of absence. We regret to hear of the death of Lieutenant Breedon in China. He was the senior of his rank; had entered the service in July, 1854, and he served in the Crimea, where he was wounded.

5th Fusiliers. Colonel Guy it is said is to be appointed Brigadier at Sealkote.

6th Regiment. The 1st battalion is to go to Hazareebagh, and Colonel Robertson is to command the camp of exercise.

7th Fusiliers. Lieutenant W. P. Brown, 1st battalion, doing duty with the 11th Punjab Infantry in China, has sick leave to England.

11th Regiment. After a very long delay, the result of the General Court Martial which, under the presidency of Colonel Dunlop, C. B., Royal Artillery, sat on Quarter-Master Napier, of the 2nd batallion of Her Majesty's 11th Regiment, has been promulgated in the regiment. The prisoner has been sentenced to be dismissed from Her Majesty's Service.

13th Light Infantry. Surgeon Jackson has obtained sick leave, to England, under new rules.

17th Regiment. The depot of the 2nd battalion, 17th Regiment, from Shorncliff, under the command of Captain Boyd, will arrive at Limerick, there to be stationed, on the 21st inst.

19th Regiment. Captain R. Martin has sick leave to England.

20th Regiment, 1st battalion. Lieutenant G. R. Gibbs is to remain for another season at Thomason College.

23rd Fusiliers, 2nd battalion. Major Vane has rejoined at Malta from leave.

24th Regiment. Lieutenant Birch, one of the Senior Lieutenants of the 1st battalion, is about to exchange into the 79th Highlanders.

27th Regiment. The following officers appear in Sirhind division orders to sit at Umballah on a day which will be hereafter named, for the trial of Captain Urquhart, Paymaster of this regiment, by court-martial: President: Colonel Reid, Bengal Horse Artillery. Members: Lieut.-Colonels—Fyers, C.B., Rifle Brigade; Ewart, 30th N.I.; Blunt, C.B., Bengal Horse Artillery; Dodgson, Assistant-Adjutant-General; Innes, Loyal Poorbeah Regiment. Majors—Bagot, Nusseree Battalion; Dallas, aide-de-camp; Haines, 92nd Highlanders; Freer, 27th Inniskillings; Bishop, Horse Artillery; Stevens, Khelsti-Ghilzee Regiment; Trevelyan, 7th Hussars; Stisted, 7th Hussars; and Fenwick, 30th N.I. Major Maisey will be prosecutor, and Major Hatch judge-advocate, by orders from army head-quarters.

30th Regiment. The anniversary of the glorious Battle of Inkerman was celebrated on Monday last at Fort Regent, Jersey, by the Colonel (Mauleverer) and officers of the 30th Regiment, which gallant regiment highly distinguished itself in the Crimean War. A grand banquet was given by the officers to a number of gentlemen residing in the island.

32nd Light Infantry. A large and elaborate marble monument to those who perished of the 32nd Regiment at Lucknow and Cawnpore (including 15 officers, 448 non-commissioned officers and privates, 4 ladies, and 96 soldiers' wives and children), is about to be placed in Exeter Cathedral. It has been designed and executed by Mr. Edward Richardson, of Melbury-terrace, Harewood-square, sculptor, the subject selected being a wounded lion crushing a viper. The regimental colours and badges form an appropriate background; the whole being of the finest Italian marble.

33rd Regiment. Brevet-Major F. S. Vacher has sick leave from India.

34th Regiment. Captain Stewart, of this regiment, has leave of absence from the depot at Colchester till the 26th inst. Some months since Private Josiah Ashton, of this regiment, was promoted to an office in the Army Hospital corps, but in consequence of gross misconduct he has been ordered again to join the regiment, and will be accordingly attached to it from the 30th inst.

37th Regiment. Ensign Hodgkins, who for some time has been absent from his depot, has received from the colonel-commandant an extension of leave, upon a medical certificate, until the 18th February, 1861.

38th Regiment. Lieutenant W. Hume has leave to England, under new rules, for 18 months, from the date of quitting the regiment. Lieutenant A. M. Grote has obtained sick leave to England under new rule; Surgeon D. W. Lawlor has sick leave to England.

45th Regiment. Lieuts. Beamish and Cosens were yesterday examined at Aldershot as to their qualifications for promotion to the rank of Captain.

46th Regiment. Lieutenant C. J. Burgess has sick leave from India.

48th Regiment. Lieutenant G. N. R. Goddard has sick leave to Nynee Tal, from September 3, 1860, to January 12, 1861.

Royal Marines. In the affair with the rebels at Shanghai, Captain Budd, the senior officer within the city, speaks highly of the steadiness of the Royal Marines and Madras Artillery, under Captain M'Intyre of the latter corps, and that of the company of Royal Marines, under Lieutenant O'Grady. The accuracy of the fire kept up at the various posts is proved by the loss which the rebels, it is ascertained, suffered.

52nd Light Infantry. Captain T. A. Champion is acting as Brigade-Major at Sealkote.

54th Regiment. Brevet-Major P. W. Gillum has leave, in extension, from 6th October to 6th February, 1861, to remain in England.

56th Regiment. Lieutenant J. W. Huskisson has been provisionally appointed Adjutant, vice Williams, promoted. Ensign Burnell has brief leave of absence from his depot at Colchester.

60th Rifles, 2nd battalion, may be expected home immediately upon the conclusion of the hostilities in China.

64th Regiment. Assistant-Surgeon C. E. Le Febure, has obtained sick leave to England, under new rules.

66th Regiment. Captain W. G. Margesson has sick leave from India.

79th Highlanders. Captain W. H. Mackesey is to remain another season at Thomason College. Lieutenant Lord Louth is about to exchange to the 1st battalion of the 24th Regiment, which is about to return to England from Indian service.

81st Regiment. Captain Chichester is appointed to act as interpreter to the corps.

87th Royal Irish Fusiliers may be expected home immediately upon the conclusion of the hostilities in China.

88th Regiment. In compliance with instructions received from the Quarter-Master General, Sir Richard Airey, Captain Baynes of this regiment, Instructor of Musketry to the 9th Depot Batallion, is about to proceed to Thetford, in Norfolk, and place himself in communication with Mr. R. E. Clarke, of Thetford, for the purpose of deciding upon a proposed rifle range for a company of Volunteers about to be formed at that station, of which he will report to the colonel commanding Colchester Camp.

91st Regiment. Captain W. R. D'Eyre has leave to England for 18 months from date of embarkation under new rules.

92nd Regiment. Lieutenant W. Kilvert and Ensign W. G. Hicks are on sick leave to Calcutta.

93rd Regiment. Major Cornwall is about to retire from the Service, by which Brevet Major W. G. A. Middleton, Lieutenant A. C. Nightingale, Ensign C. D. Potts, severally obtain a step of rank.

98th Regiment. Captain Batt has taken the duty of interpreter to the corps on the departure of Captain Stroud.

Rifle Brigade. Lieutenant G. L. Austin has leave to England, under new rules, from October 1 to March 31, 1862.

Woolwich.—Without pledging ourselves to the truth of the reports, we may mention that the on dits of the day continue to expect a large increase to the Artillery in the spring. It is reported that the 15th brigade, now at Gosport, will be turned into a field brigade, and that the 10th brigade will remove from Portsmouth to Woolwich at an early date to make room for the 16th brigade, to be formed and organised at the former place. If there be one place more than another which ought not to be selected for a young regiment it is Portsmouth, where in many streets the houses are either brothels or low publics, and where young soldiers, except by a miracle, always become corrupted. Col. Franklin, C.B.,

Digitized by Google

has resumed the command of the 15th brigade after his continental travels; Col. P. Mundy proceeds on winter leave to his hunting seat in the western country. Considerable speculation is afloat as to the successor of Col. Romer at Priddy's Head, Portsmouth, and a gallant officer serving at Aden is the favourite. The 1st brigade will proceed to Gibraltar in the spring of the year. Other general changes are expected to take place right through the regiment, and which will be a very heavy drain on Mr. John Bull's purse.

A correspondent of the *Times* calls attention to the tablet recently placed in Waterloo Church, in honour of all ranks who fell gloriously in June, 1815. The monument, the existence of which is probably little known, is of white Carrara marble, and of extreme simplicity. Its adornments consist merely of a wreath of laurels, encircling the three national emblems, flanked and supported by military trophies in bas-relief. The following inscription is engraved beneath:—

"In Honoured Memory of
All British Officers,
Non-commissioned Officers and Soldiers,
Who fell in Battle
Upon the 16th, 17th, and 18th of June, 1815,
This Tablet was erected
By a few Brother Officers and Countrymen,
A.D. MDCCCLIX.
'Glory encircles with the same noble diadem the humble as the exalted.'"

Dispatches have been received from Sir J. Hope Grant and Lieutenant Colonel March, commanding at Shanghai, describing the attack of the rebels on that city, and their repulse by the Royal Marines. Among the papers is the rebels' reply to the proclamation addressed to their commander by Colonel March, which is remarkable for its bombastic style. Their boasting notwithstanding, the rebels would clearly rather be friendly with us than hostile, and express a desire for an agreement, with the view to commercial transactions.

KERRY WAR TESTIMONIAL.—Extract of the proceedings of a meeting of the subscribers of the Kerry War Testimonial, held in the Court-house, Tralee, on the 20th Oct. 1860, William Talbot Crosbie, Esq., D.L., in the chair: Resolution No. IV.—"That this meeting would be obliged to the commanding officers of the regiments engaged in the late wars in the Crimea, India and China, and in the present war in China, if they would send in to their honorary secretary, Major-General Stokes, Lassinagh, Tralee, returns of the names of the officers, non-commissioned officers, and privates, natives of Kerry, who fell in those wars, as suggested in a communication from the Horse Guards on the subject."—W. T. Crosbie, chairman.

The Emperor of the French is ceaseless in his endeavours to increase the strength of his forces. At a Cabinet Council held on Wednesday the plan for an army reserve was definitively settled, by which the present system of renewable furlough is abolished, and a reserve established, combining the system of the Prussian landwehr and the English militia. The result will be that, in addition to 500,000 men constantly under arms, there will always be in reserve 300,000 men ready for any emergency. This has very much the appearance of a counterpoise to our Volunteer movement. The Empress left St. Cloud on Wednesday for one of the country seats of the Duchess of Hamilton in Scotland, where she will remain for several weeks. Great secrecy was observed as to Her Majesty's departure, and she started on her journey before daybreak to avoid any demonstration.

The Secretary of State for War, having had under consideration the subject of the supply of coal to the various troops in the several barracks, whereby a considerable saving in that article is likely to be effected, has determined on adopting a new system, and accordingly a Circular on the subject has been forwarded to the generals in command at Chatham, Portsmouth, and Aldershot, where the proposed system is to be first tried before it is introduced into the army generally. During the past summer the whole of the barrack-rooms at Chatham have been furnished with new grates which possess a considerable advantage over those hitherto in use, each of the grates being much smaller than the old pattern, but supplied with a hot air shaft, whereby each room is better heated, at a less consumption of coals. The new cooking apparatus, fitted up in the garrison by Grant and Bentham, has also been found to answer admirably, and a considerable saving of coal effected by its use. The Circular issued by the Secretary of State for War will abolish the present system of issuing coals to each room, according to the number of men occupying it, a certain quantity being supplied in lieu thereof, whilst to each cooking apparatus there will be issued a quantity proportioned to the number of men. As soon as the system has been tried at Chatham, Portsmouth, and Aldershot, reports are to be made to the Secretary of State for War, after which the system will be adopted throughout the Army.

ROYAL ARTILLERY.—We regret to hear that recruiting for the Royal Artillery in the Dublin and Suffolk regiments of Militia Artillery, about to be disembodied, has not been very successful, though the Hussars have succeeded in attracting a few to their standards. The truth is that the men know they can go home for nothing, and have a little money to spend with their sweethearts into the bargain. That will soon vanish; and so, if the recruiting-sergeants are on the look-out in Ipswich in about two months, we make no doubt they will pick up scores of men well drilled and trained, and admirably fitted to serve their Queen and country in any capacity where stout hearts and willing hands are wanted and appreciated.

COLCHESTER CAMP.—Mr. R. M. Lonsdale having arrived in this camp, has assumed the duties incidental to his appointment as head of the purveying department, vice Mr. White, who has proceeded to Dublin, and will at once proceed to make his periodical inspection of the barracks' hospital, accompanied by several commissioned officers. On Wednesday the 9th Depot Battalion assembled in heavy marching order upon the principal parade ground, and were for the first time inspected by the new commandant of the camp, the Hon. Alexander Gordon, C.B. The usual complement of men have left their several depots on furlough, but the strength of the camp has been but little diminished, for recruits are now beginning to arrive from various parts of England. The general state of the camp is satisfactory, and the physical condition of the men healthy and good.

Major-General Lord W. Paulet, C.B., Commanding the South-West district, has postponed proceeding on leave, from pressure of public business, at present. His lordship entertained a large and distinguished party of the neighbouring gentry and principal officers of the garrison at dinner on the 16th inst. He has shown himself during the whole of the past season a warm supporter of the Volunteer movement, and has on several occasions made his own convenience subservient to the necessities and wishes of this new yet important branch of the public Service, with whom he is highly and justly popular.

SHORNCLIFF.

An order has been received at the Camp to the effect that the head quarters of the 2nd battalion of the 21st Regiment will arrive on Camp from Aldershot, on Tuesday next, the 20th instant.

2nd battalion, 17th Regiment. A party of this regiment march on Monday next for Limerick, for the purpose of forming a depot in that garrison; this is almost indicative of a change of quarters for this regiment.

Captain Robertson of the Victoria Rifles is now, and has been for some time past, drilling with this regiment, and has gained experience in both company and battalion drill.

4th battalion, Military Train. Private John Mayhew of this corps, who was tried by a general court-martial some time back for attempting to fire a carbine at his comrades whilst in the guard-room, was brought before a general parade of the whole camp on Tuesday last, when his sentence was read by Brigade-Major Carlton. The prisoner was sentenced to four years' penal servitude. This prisoner has been waiting his sentence considerably over three months, having been tried exactly 109 days before his sentence was read, and being all that period confined in the guard-room. Privates Gillingham and Wilson, of the 1st battalion of the 16th Regiment, and Private Moune, of the 2nd battalion of the 18th Regiment, also had their sentences read at the same time (the offence being striking their superior officers). In each case, two years' imprisonment with hard labour was inflicted.

2nd battalion, 18th Regiment. The usual winter dancing parties of the non-commissioned officers of this corps commenced on Wednesday evening last at the sergeants' mess-room, when a large party assembled, consisting of visitors from the other regiments and civilian friends.

1st battalion 16th Regiment. Herr Carl H. D. Eckner has been appointed band-master to this regiment in the room of Sergeant George Carr, who has quitted the service. Mr. Eckner has been band-master for some years to the 9th Lancers, and to the 23rd Royal Welsh Fusiliers.

Thursday last was appointed for the troops marching out in heavy marching order, but the weather being very wet the order was countermanded.

The Army Gazette.

WAR OFFICE, PALL MALL, NOVEMBER 13.

7th Regiment of Dragoon Guards—Samuel James Dakin, Gent., to be Cornet, by purchase, vice Wright, promoted in the 2d Dragoon Guards.

63rd Foot—Major William Frederick Carter to be Lieutenant-Colonel, by purchase, vice Thomas Harries, who retires; Captain and Brevet-Major Charles Le Mesurier Carey to be Major, by purchase, vice Carter; Lieutenant Stephen Moore to be Captain, by purchase, vice Brevet-Major Carey; Ensign James Stewart Smyth to be Lieutenant, by purchase, vice Moore.

64th Foot—Ensign Frederick Edward Wilson to be Lieutenant, by purchase, vice Henry Davies, who retires.

82nd Foot—Major and Brevet Lieutenant-Colonel David Watson, to be Lieutenant-Colonel, by purchase, vice Brevet-Colonel the Honourable Percy Egerton Herbert, C.B, who retires upon half-pay; Captain and Brevet-Major Henry Christopher Marriott to be Major, by purchase, vice Brevet Lieutenant-Colonel Watson; Lieutenant John Sidney Hand to be Captain, by purchase, vice Brevet-Major Marriott; Ensign James Johnston to be Lieutenant, by purchase, vice Hand.

92nd Foot—Lieutenant James Malley, from the Military Train, to be Lieutenant, vice Francis Roberts, who exchanges.

97th Foot—Major Frederick Arthur Walter, from the 53rd Foot, to be Major, vice Archibald Richard Harenc, who exchanges.

100th Foot—Staff-Surgeon John Smith Chartres to be Surgeon, vice Barrett, placed upon half-pay.

2nd West India Regiment—Major Thomas Hardwick Smith to be Lieutenant-Colonel, by purchase, vice Thomas Gibbings, who retires; Major Peter John Macdonald, from half-pay Unattached, to be Major, vice James Owen Bovill, who exchanges; Captain William Hill to be Major, by purchase, vice Smith; Lieutenant Horatio James Wise to be Captain, without purchase, vice James Lambert Byrne, deceased; Lieutenant Arthur Trefusis Jones, from the 1st Foot, to be Captain, by purchase, vice Hill; Ensign Frederick Ludwig Mathews, to be Lieutenant, without purchase, vice Wise; Ensign Henry Lowry to be Lieutenant, without purchase, vice Michael John Macnamara, deceased; Archibald Roger, Gent., to be Ensign, without purchase, vice Mathews; Frederick Augustus Browne, Gent., to be Ensign, without purchase, vice Lowry.

3rd West India Regiment—Captain Frederick George Nuttall Clarke to be Major, by purchase, vice William Beverley Robinson, who retires; Lieutenant H. C. De la Poer Beresford to be Captain, by purchase, vice Clarke.

MEDICAL DEPARTMENT.

Staff-Assistant-Surgeon John James Scott to be Staff-Surgeon, vice Knox, placed upon half pay.

Assistant-Surgeon John Richard Tobin, from the 36th Foot, to be Staff-Assistant-Surgeon, vice Killery, who exchanges.

BREVET.

Major and Brevet Lieutenant-Colonel Edmund Gilling Hallewell, halfpay Unattached, Deputy Quartermaster-General at Malta, having completed five years' qualifying service in the rank of Lieutenant-Colonel, to be Colonel in the Army.

Brevet Lieutenant-Colonel Archibald Campbell, retired full pay 20th Foot, to have the Honorary rank of Colonel in the Army.

The undermentioned officers having completed five years' service in the rank of Lieutenant-Colonel, to be Colonels in the Army, under the Royal Warrant of 14th October, 1858, viz.:

Lieutenant-Colonel Arthur George Burrows, of the Royal Artillery.

Lieutenant-Colonel Roger Stewart Beatson, of the Royal Engineers.

The undermentioned officers, upon retired full pay of the Royal Engineers, to have the honorary rank of Major-General under the Royal Warrant of 3rd November, 1854:

Brevet-Colonel Edward Vicars.

Brevet-Colonel John Hawkshaw.

Digitized by Google

THE NAVY.

ADMIRALTY, NOVEMBER 15.

APPOINTMENTS.

Captains—George Hancock (1855) to the Immortalité; E. P. B. Von Donnop (1855) to the Jason.

Commander—N. B. Bedingfield to the Prometheus, vice Skipwith, invalided.

Lieutenants—A. T. Denham to the Jason; A. C. Dupuis, Richard Wells, Horatio Austin, and E. Poulden, to the Immortalité; H. T. Boyer to the Algiers; R. S. Hunt, additional, for disposal, and J. T. Swann to the Harrier; S. R. Huntley to the Arrogant. additional, for disposal; Edward L. Green and H. Eden to the Bacchante, additional, for disposal; Richard Onslow and A. B. Wodehouse to the Marlborough, additional, for disposal; George B. Evans to the Nile, additional, for disposal; John G. F. Leacock to the Chesapeake, additional, for disposal; R. Hoops to the Illustrious, for service of the ordinary.

Masters.—Charles G. Johnston to the Immortalité; John Waye to the Jason.

Paymasters.—H. Gray (A), additional, and H. G. Barlow, additional, to the Formidable; George Jeffery, additional, to the Indus; G. W. Anderson, to Immortalité; R. W. Warwick to the Jason.

Mates.—William Kellett to the Spiteful; J. S. Eaton to the Harrier.

Assistant-Surgeons.—A. H. Kelly to the Hibernia, as hospital ship at Malta; F. F. Flynn (acting) to the Argus; T. W. Orwin (acting) to the Doris; H. H. J. Sterling (acting) to the Hibernia; C. C. Mitchinsom (acting, additional) to the Victory; R. E. Fisher (acting, additional) to the Impregnable; J. Rogers (acting, additional) to the Nile.

Midshipmen.—C. J. Doxat and C. R. Smith to the Immortalité; Peregrine F. Bertie to the Charybdis; James V. Baker to the Desperate.

Naval Cadet.—J. H. Pauline is nominated to a naval cadetship.

Master's Assistants.—John E. Petley to the Immortalité; Allen C. Dennys to the Jason.

Assistant-Paymaster.—T. O. Joynson, in charge, to the Caradoc.

Clerks.—W. A. Westaway to the Russell; David Acheson to the Himalaya; Henry A. Scrivener to the Harrier.

Chief Engineer.—E. J. B. Bird confirmed in the Cadmus.

Acting First-Class Engineers.—R. Jago, to the Indus, as supernumerary; T. West and S. Broad, to the Cumberland, as supernumeraries.

Acting Third-Class Engineer.—W. Vincent to the Cumberland as supernumerary.

COAST-GUARD OFFICE, NOVEMBER 15.

The following removals have taken place:—

Chief Officers—Messrs. James E. Hamilton (of 2nd class), from Greencastle to Killough; Henry Bray (of 2nd class), from Tribane to Greencastle; Henry Baldwin, from Balbriggan to Tribane; George C. Jones, from Skerries to Ballygally; George Hamilton (of 2nd class) from Buncrana to Skerries; R. H. Warren, from Prussia Cove to St. Ives, vice John C. Harry (of 2nd class), who exchanges.

Agamemnon, 91, screw, Captain T. Hope, left Naples on the 2nd inst., for Palermo, where it is expected she will relieve the Amphion, Captain T. Cochrane.

Alecto, 5, paddlewheel steam-sloop, Cpmmander Henry J. Raby, V.C., was at Lagos on the 10th of October, all well.

Alert, 17, screw steam-sloop, Commander W. A. R. Pearse, has been ordered home from the Pacific station. The Alert was commissioned in November, 1857, but did not leave England till the month of February, 1858. The Alert, from some cause which requires yet to be explained, has not for some time been in that state of discipline which is so essentially necessary on board a British man-of-war.

Amphion, 36, screw, Captain T. Cochran, was at Palermo on the 2nd inst.

Ariadne, 26, screw-frigate, Captain E. W. Vansittart, arrived at Plymouth, on Thursday, in company with the Hero.

Ariel, 9, screw steam-sloop, Commander Alexander, left Spithead under sail on Monday at 10 a.m., by the Western Channel for Plymouth sound; and letters from Devonport have anounced her safe arrival, but in such a state that she has been compelled to go into harbour to be thoroughly overhauled.

Barracouta, 6, paddle steam-sloop, Commander William Wood, sailed from Jamaica on the 24th of October, for Barbadoes, with invalids from the Imaum and Icarus, in the hope that change would benefit them. The Barracouta had taken two Spanish brigs, slave prizes, off Cuba.

Brisk, 16, screw corvette, Captain Algernon F. de Horsey, was in the Mozambique Channel on the 1st of August last. By a letter received from an officer of this ship, it is stated that Admiral Sir H. Keppel was on board at that date, and that he was running round the eastern portion of his station while the Forte was being refitted at the Cape.

Britannia, training-ship, at Portsmouth. We regret to hear that one of the young gentlemen of this ship, on recovering from the measles, was seized with cold from imprudent exposure, and died of low fever at Haslar Hospital, to the sorrow of his comrades. The health of the ship continues steadily to improve.

Brune, paddlewheel steam-vessel, tender to Arrogant, was at Badagoy in the early part of October. She had been up the river with the British Acting Consul on board, for the purpose of endeavouring to prevent the outbreak of a native war by means of a "palaver," but without effect.

Bulldog, 6, paddlewheel steam-sloop, Captain Sir F. L. M'Clintock. According to *Saunders's News Letter* we find that—"Her Majesty's ship Bulldog arrived unexpectedly in Killybegs harbour on Sunday afternoon, under the command of Captain Sir Leopold M'Clintock, having encountered very severe weather on her return from the Arctic regions and North America. We understand that the important work intrusted by the Government to the charge of our distinguished fellow-countryman has been carried out to his entire satisfaction; and we may therefore hope that when his report of the several soundings between this country and America, *vid* the Arctic coast, has been laid before Parliament, the long looked-for telegraph by means of which the Old and the New World will be united, will be a work of a mere mechanical nature. Sir Leopold M'Clintock will probably pass through Dublin on his way to London."

Buzzard, 6, paddlewheel steam-sloop, Commander J. Trevenen (acting), has been ordered home from the south-east coast of America. The Buzzard has been upwards of three years in commission. She hoisted the pendant in July, 1857, and sailed from England in the month of September of the same year.

Cæsar, 90, screw liner, Captain J. Thomas H. Mason, was by the last advices in Malta harbour, undergoing a thorough refit.

Clio, 22, screw corvette, Captain Thomas Miller, was expected to leave Panama for the coast of Mexico on the 24th of October. In reference to this ship the *Panama Star* or *Herald* of the 23rd ult. has the following:—"An official question has arisen between the United States and British naval forces in this bay, which is of considerable interest. It has been occasioned by the order given to the guards from Her Britannic Majesty's ship Clio, stationed at the British and French consulates since the late riot, to hail all persons passing those houses. Several foreigners have been stopped by the sentry, and on Saturday an American officer, and subsequently an American citizen, have been arrested for refusing to respond to the sentry while passing through the public street. The matter was brought before Flag-officer Montgomery, in command of the United States' naval forces, who at once addressed a communication to Captain Miller, of Her Britannic Majesty's ship Clio, on the subject, the result of which was that the guards were at once withdrawn from both consulates, and ordered on board. We have not yet heard the final termination of the matter, and until we do we shall refrain from making any comments upon the proceeding."

Cossack, 20, screw corvette, Captain Richard Moorman, has been ordered home from the North America and West Indies station. The Cossack was only commissioned in June, 1859, and sailed from England in the month of August following. This is a very short period of service, and doubtless the Admiralty will take care that a full inquiry is instituted into the cause of so sudden a termination of this vessel's cruize. We hear that dissensions have arisen amongst the officers detrimental to the public service. If this is confirmed, we can only say that the official at Whitehall responsible for the appointment of the individual chiefly concerned in producing such a state of matters, should be more particular in future in his selection; this, perhaps, is the only reparation he can make for the blunder he fell into in this case.

Cressy, 80, screw, Captain T. Harvey, was at Naples on the 3rd inst.

Dee, 4, paddlewheel steam-sloop, Master-Commander Thomas C. Pullen, left Woolwich on Wednesday with steam gear for ships fitting at the western ports.

Desperate, 8, screw steam-ship, Commander J. F. Ross, was inspected last Saturday at Devonport by Captain Lord Frederick Kerr, of the flag-ship Impregnable. The crew were subsequently paid down.

Diadem, 32, screw frigate, Captain Cockburn, has been warped out of the steam-basin at Portsmouth, on the completion of her repairs, and berthed alongside her hulk in the harbour.

Drake, 1, screw gun-boat, Lieut.-Commander Arthur R. Blane, was, by the last accounts from China, up the Peiho. The Drake was one of the four gun-boats engaged at the reduction of the forts at the mouth of the river, and was complimented by the Admiral on the great precision of her fire.

Eagle, training frigate, Commander Strode, has proceeded from Portsmouth to her moorings in Southampton Water.

Emerald, 51, screw steam-frigate, Captain Arthur Cumming, having embarked men left behind from the squadron, sailed from Plymouth Sound on Friday afternoon, the 9th inst., under canvas for the Tagus.

Euryalus, 51, screw frigate, Captain Tarleton, C.B., arrived at Spithead at 7, p.m., on Tuesday. On Wednesday she was officially inspected at Spithead by Vice-Admiral H. W. Bruce, the naval commander-in-chief at the port. She has gone into Portsmouth harbour, and will pay off her crew, instead of turning them over to the Immortalité as first intended. Prior to paying off, her guns, coals, provisions, and other heavy stores will be discharged, but her rigging and fittings will remain undisturbed, it being in contemplation to recommission her shortly. She will join the first-class steam reserve.

Firebrand, 6, Commander Bruce, will undergo a thorough overhaul and repair in Portsmouth, and then proceed to the West Indies to reinforce the North American squadron. It is not expected that she will sail before Christmas.

Firefly, 4, paddlewheel, steam surveying vessel, Commander Arthur L. Mansell, arrived at Alexandria from the coast of Syria on the 2nd inst. It was expected that the Firefly would remain at Alexandria for about two months, as Commander Mansell had been ordered to proceed to the Red Sea in connection with some new lighthouses.

Flying Fish, 6, screw steam-sloop, Commander Charles W. Hope, parted company from the Hero and Ariadne shortly after leaving Portland, and did not rejoin during the passage home.

Hannibal, 91, screw, Captain A. Farquhar, flag of Rear-Admiral Mundy, C.B., was at Naples on the 3rd inst.

Hero, 91, screw-liner, Captain George H. Seymour, C.B., arrived at Plymouth on Thursday with His Royal Highness the Prince of Wales on board, all well.

Himalaya, 6, iron screw steam-ship, Captain John Seccombe. On Monday a telegraphic message was sent from Whitehall to Vice-Admiral Bruce, Commander-in-Chief at Portsmouth, by which he was ordered to inform the Lords of the Admiralty of the state of the screw steam transport Himalaya, and the possibility of her being dispatched immediately to cruise in the hope of falling in with the Royal squadron. Captain Seccombe, on being communicated with, asked for 24 hours. This was granted, but that very efficient officer, at the expiration of 18 hours, reported his vessel ready for sea, and by that time the Himalaya was sailing and steaming down Channel with a favourable wind. The Himalaya was fortunate enough to fall in with the Royal squadron on Thursday morning at 2 o'clock, a short distance to the westward of Scilly. The ships, however, having a strong favourable wind, did not require that help which, in case of need, the Himalaya was prepared to give.

Hydra, 6, paddlewheel steam-sloop, Commander Richard V. Hamilton, was, by the last accounts from the West Indies, ordered to relieve the Racer, at Greytown.

Icarus, 11, screw steam-sloop, Commander Nowell Salmon, V.C., was at Port Royal, Jamaica, on the 25th of October. She had been very sickly, and had lost, from yellow fever, upwards of thirty men. Her second lieutenant, master, a warrant officer, a clerk, and two engineers were among those whose deaths have been reported.

Imaum, 10, receiving ship, Jamaica, Commodore Hugh Dunlop, Captain Samuel Morrish, was lying in Port Royal harbour on the 25th of October. The yellow fever had broken out on board, and the deaths of two officers, three men, and several boys, had been reported. Invalids from this ship had been sent to Barbadoes for change.

Immortalité 51. New screw frigate at Portsmouth, has been commissioned for the pendant of Captain George Hancock, 1855.

Industry, 2, iron screw steam store-ship, Master-Commander George J. Hodges, was at Madeira on the 2nd inst. on her way to Ascension.

Jason 21. New screw steam corvette at Devonport, has been commissioned for the pendant of Captain Edward P. B. Von Donnop, 1855.

Jasper, screw gun-boat, Lieut.-Commander W. H. Pym, has been ordered home from the North America and West Indies Station. The Jasper was commissioned at Portsmouth in the month of July, 1857, and left for her destination in the September following. She has, therefore, more than completed her term of three years' commission.

London, 90, screw liner, Captain Henry Chads, was by the last accounts in Malta harbour, undergoing a complete refit.

Mars, 80, screw liner, Captain J. N. Strange, arrived at Malta on the 4th inst. from England, last from Gibraltar.

Meteor, 16, floating battery, has been placed in No. 1 dock, in Portsmouth yard, for overhaul and repair. A number of her timbers have been found very defective and will have to be removed. To enable the workmen to remove the timbers the iron bolts are being knocked out of her two upper rows of plates.

Mutine, 17, screw steam-sloop, Commander William Graham, was at Panama on the 23rd of October. She had arrived there on the 19th from Valparaiso and the intermediate ports.

Osborne, 2, yacht, Master-Commander George H. K. Bower, left Portsmouth on Wednesday morning for Antwerp, where she is to embark the Empress of Austria and suite, and convey them to Madeira. The Osborne will call at one of the Western Channel ports to fill up her coals prior to making a final start for the island.

Fairy, royal screw yacht, having completed her repairs at Portsmouth, has been undocked and removed to her moorings.

Orlando, 50, screw steam-frigate. Owing to the lengthened passage made by the Hero from the United States, orders were transmitted to Devonport from the Admiralty on Monday, to prepare the Orlando immediately for sea, and although, under ordinary circumstances, five days would have been consumed in fitting her out in the advanced state in which she was, yet with extra hands she was got away in less than 48 hours. Captain Astley Cooper Key, C.B., of the steam ordinary ship Indus, has taken temporary command of the Orlando, and she has been officered and manned from the various ships in port. The Orlando had orders to run 150 miles to the westward of Scilly, and endeavour to fall in with the Hero, supposing that ship was contending so near home with the easterly winds which have so strongly prevailed of late.

Perseverance, 2, iron screw steam troop-ship, Commander Edward K. Power. The following telegram from Lisbon has been received by the Secretary of the Admiralty from Lieutenant H. Waller, of Her Majesty's steam troop-ship Perseverance:—"Her Majesty's ship Perseverance totally wrecked on the 21st of October, off N.W. end of Mayo, Cape Verdes. All hands saved. Five hundred troops sent to Gambia by hired bark. One hundred men and officers of the Perseverance arrived in Portuguese steamer Africa under my charge; remainder of troops and crew left at Mayo in charge of Major and Senior Naval Lieutenant. Captain is expected here by mail on the 14th from St. Vincent."

Petrel, 11, screw steam-sloop, was launched from Devonport Dockyard last Saturday. The ceremony of christening was performed by Miss Brown, daughter of the master-attendant of the yard. The dimensions of the Petrel are—length between the perpendiculars, 160 feet; length of keel for tonnage, 139 feet 10 inches; breadth extreme, 30 feet 3¼ inches; breadth for tonnage, 29 feet 11¼ inches; breadth moulded, 29 feet 5½ inches; depth in hold, 15 feet 11 inches; burden in tons, 669 38-94; horse-power, 150. The Petrel was constructed under the directions of Mr. Peake, master builder, by Mr. Carter, foreman of the yard. She is sister ship to the Pantaloon, recently launched at Devonport.

Pylades, 21, screw corvette, Captain Michael De Courcy, has been ordered home from the Pacific station. The Pylades was commissioned in July, 1857, and sailed from England in the month of August following.

Queen, 86, screw, Captain S. F. Hillyar, was at Naples on the 3rd inst.

Racer, 11, screw steam sloop, Commander Algernon M'L. Lyons, was, by the last accounts from the West Indies, daily expected at Jamaica, having been relieved at Greytown by the Hydra.

Ranger, 5, screw steam gun-vessel, Commander Henry R. Wratislaw, had sailed from Fernando Po on the 28th of September, for Lagos.

Renown, 91, screw, Captain A. Forbes, was at Naples on the 3rd inst.

Rhadamanthus, 4, paddlewheel steam-sloop, Master-Commander Frederick R. Sturdee, left Woolwich on Wednesday, with steam-gear for the Western ports. She had on board 150 first and second-class lads for distribution.

St. Jean D'Acre, Captain the Hon. C. G. J. B. Elliot, C.B. On Friday, the 2nd instant, the crew of this ship rejoined her from the Hibernia; her sick list was then reduced to about 60, and improving. On Monday, the 5th, the sick list was increased to 90, so that in about two days

Digitized by Google

after the crew had rejoined the ship the sick list was increased fifty per cent., and the sick were not improving. She was to leave immediately for Gibraltar.

Scourge, 6, paddle-wheel steam sloop, Commander William G. Jones, was, by the last accounts from Malta, under orders to leave for the Island of Candia.

Undaunted, 51, one of the two improved screw frigates now being built at Chatham, is ordered to be launched on the 1st of January next, and every effort is being made to have her completed by that date. Her engines and machinery are intended to be of 600 horse-power (nominal), and her armament is intended to consist exclusively of Armstrong guns.

Victor Emmanuel, 91, screw liner, Captain W. J. C. Clifford, C.B., arrived at Malta from Corfu on the 6th inst.

Volcano, 6, floating factory, has been removed from the ship basin to the steam-basin in Portsmouth yard, where she will receive her machinery, &c.

Victory, flag-ship, Portsmouth, with the flag of Vice-Admiral Bruce, white at the fore, has lowered her topmasts, hoisted stump topgallant masts; and made all snug for the approaching winter season.

Warrior. There can be little doubt that this enormous steam battery will be launched on the 29th of December. She is about three times the size of the *fregate blindée* La Normandie. She will only carry the lower ranges of iron plates when she takes the water. The upper bulwarks will not be plated, but will be made musket proof. Relays of men are working on her night and day.

Zebra, 17, new screw steam-sloop, was launched on Tuesday from Deptford dockyard. The ceremony of christening the vessel was performed by Miss Emily Schmidt, and her principal dimensions are as follows:—Length over all 212 ft. 8 in.; ditto between perpendiculars, 185 ft. 4 in.; breadth, extreme, 33 ft. 2 in.; depth in hold, 17 ft. 5 in.; burthen in tons, 980 8-94. Her armament will consist of 17 guns—namely, 16 32-pounders, 32 cwt., 6 ft. 6 in. long, and one 32-pounder, 58 cwt., 9 ft. 6 in. long. Her engines will be nominally of 200 horse power.

Lifeboat Services.—At daybreak on the 10th of November the brig Flying Fish, of Whitby, from South Shields to Greenwich, laden with patent fuel, ran on shore at low water on Filey beach, in a sinking state, during a strong gale of wind from E.S.E., with a heavy sea. The lifeboat belonging to the National Lifeboat Institution was immediately got out and launched as soon as possible; some delay having taken place owing to a mishap occurring to her transporting carriage, which is a very old one. The lifeboat soon afterwards reached the wreck and took from it the whole of the crew, consisting of five persons, and safely brought them on shore. This valuable lifeboat has been instrumental during the past twelve months in rescuing three men from the sloop George and Mary, of Hull, and seven men from the schooner Olive Branch, of Colchester. She also succeeded in bringing to shore in safety the yawl Charles Wesley, during the terrific and destructive gale of the 28th of May last. About noon the same day three fishing-smacks from Topsham were seen crossing Teignmouth bar in a very heavy sea. The first boat took the bar, and passed in all safe. The second boat, running on the top of a very heavy sea, sheered to, filled, and the next sea completely turned her over. The life-boat of the National Lifeboat Institution was immediately manned and launched, and proceeded to the rescue of those in the water; but in the meantime the first boat, seeing the extremely perilous position of its companion, took on board from a near point S. Clarke a very active and daring pilot, and other men. She fortunately succeeded in reaching the drowning men without loss of time, and in picking them all up, but in a very exhausted state. Indeed, one of the poor fellows was so far gone, that some length of time elapsed before he could be brought round. The lifeboat, seeing the men had been saved, proceeded to the bar, and remained there, until the third fishing boat had safely crossed it. S. Clarke, the pilot, is a very brave man. He has always been afloat in the lifeboat on every occasion she has been off to save life from wrecks.

It is stated that a number of additional blacksmiths have been entered at Chatham for the purpose of being employed in the construction of the large mail-clad steel-plated iron steam-frigate ordered to be constructed at the dockyard in No. 2 basin. As soon as the necessary preparations have been completed for the vessel to be proceeded with, an entry of several hundred additional smiths will be required.

Commander Reid, promoted from Her Majesty's ship Cæsar, has arrived in England from Malta.

The Commander-in-Chief at Sheerness, Vice-Admiral W. J. Hope Johnstone, has received instructions from the Admiralty for the entry of fifty novices and boys of the first-class for training on board Her Majesty's ship Formidable, 84 guns, flag-ship at Sheerness, and also for the entry of as many as fifteen second-class boys from ashore for the same purpose.

Mr. W. Cole has been appointed one of the inspectors of shipwrights at Chatham dockyard.

The members of the Royal Commission of Inquiry now sitting in the Devonport dockyard are—Lord Gifford, Mr. Dalgleish, M.P., Admiral Robinson, and Sir H. Willoughby. Mr. A. Price is secretary.

The universal anxiety expressed regarding the delay in the arrival of the Prince of Wales—although not amounting to apprehension—was happily allayed on Thursday morning by a telegram which announced that the Hero and the Ariadne had come to anchor in Plymouth Sound at half-past nine o'clock.

We are informed that the crews of Her Majesty's ships on the home station have started a subscription, which is to extend throughout the Navy, for the purpose of erecting a monument to the memory of the late Admiral Sir Charles Napier. The movement originated on board the Excellent and the Cambridge, the gunnery ships at Portsmouth and Devonport, on the receipt of the news of Sir Charles's decease, and has since been warmly taken up by the other vessels in port, under the sanction of the respective commanding officers. It is, however, quite a spontaneous offering on the part of the men, and was simultaneously agreed to on board the Excellent and Cambridge, without any previous consultation or understanding. A committee has been formed temporarily on board the Excellent, composed of the petty officers and non-commissioned officers of the Royal Marine Artillery and Marines, who will forward subscription lists to every ship in commission, whether at home or abroad. In their circular accompanying the lists they state that—"The seamen, Marine Artillery, and Marines of Her Majesty's navy, having heard with deep regret of the decease of Admiral Sir Charles Napier, and bearing in mind his untiring energy in promoting their welfare, both on shore and afloat, are therefore desirous of raising a subscription to enable them to erect a public monument at Portsmouth in testimony of their gratitude for the many benefits his able advocacy has been the means of obtaining for them." The paymasters of the different ships are respectfully requested to forward the amount of the sums subscribed to Messrs. Grants & Co., bankers, High Street, Portsmouth, who have kindly consented to act as treasurers to the "Napier Testimonial Fund."

Novel Mode of Launching a Ship.—On Monday last the mooring lighter Nelly was safely deposited in the water at Devonport in the following manner:—Her slips run into the mast pond, which is too limited in size to admit of her being launched in the ordinary way. Round the Nelly slings of 15-inch rope were fastened, having inside them, on the most prominent parts, fenders to protect the sides from injury. To these slings were fitted, one on each bow, two treble-block teakles fastened in the mast-house to bollards, which were strengthened for the occasion; 9-inch ropes were run through the blocks, and by them the lighter, which burdens about 160 tons, was gently lowered into the pond. Miss Nelly Brown, daughter of the master-attendant, christened her namesake.

The following Circular has been issued by the Admiralty:—Admiralty, 30th October, 1860. ("Record of Conduct" Book.) With reference to Circular No. 428, of the 15th June, 1860, relative to the "Record of Conduct" Book, my Lords Commissioners of the Admiralty have subsequently issued a supply of such books, the form of which is to be adopted in lieu of that prescribed in the Watch, Station, and Quarter Bill Book. In the "Record of Conduct" Book thus established, the entry of a summary of grave offences, and their punishments, will be sufficient under these two heads, as details are given in the "Defaulter's Book," but should a man be guilty of repeated minor offences, it is to be briefly noted in the column for "General Remarks." The columns headed "Dates of Leave Granted," and "No. of Hours Over Leave," are to be altered to—

"Six-Monthly Record of"	
"Leave Granted"	"Total Time Over Leave,"

one notation being sufficient in each six months, as the "Liberty Book" furnishes all details with regard to leave of absence. One-third of a folio of a book is allotted to each man's name, but if in any case that should not be sufficient, the same man's name can be subsequently entered a second or even a third time in the book, the index of which will afford easy reference to each folio. It has not been thought necessary to devote a column in the book to a man's "former services," as such information is fully given in the "Description Book."—By Command of their Lordships, W. G. Romaine.

The following is a condensed account of the services of Vice-Admiral Sir James Hope, K.C.B., who for his services in China has lately received a distinguished mark of honour. He entered the Royal Naval College in 1820, joined his first ship in 1822, and having served on the West Indian and Mediterranean stations, was promoted to lieutenant in 1827. He escorted Lord William Bentinck to India in 1828, became flag-lieutenant to the late Admiral Lord Northesk in the following year, and subsequently was employed on the West Indian and North American stations in command of the Racer (16). He obtained the rank of captain in 1838, and in November, 1845, while in command of the Firebrand steam-frigate, he enacted a conspicuous part in the battle of Parana, where a hard day's fighting resulted in the destruction by the combined squadrons of England and France of four heavy batteries belonging to General Rosas at Punta Obligado, as also of a schooner carrying 6 guns, and of 24 vessels chained across the river. "On that occasion having volunteered," says O'Byrne in his "Naval Biography," "Captain Hope gallantly pulled up in his boat and cut the chain which impeded the upward progress of the allies. At the close of the action he landed as aide-de-camp to the late Captain Sir Charles Hotham, the senior British officer, and assisted in giving the *coup de grace* to the defeat of the enemy, whose numbers originally consisted of 3500 men, in cavalry, infantry, and artillery, and whose batteries had mounted 22 pieces of ordnance." As a reward for his bravery on this occasion he was nominated a Companion of the Bath in April, 1846.

The Spanish Navy.—The *Correspondencia* of Madrid gives the following as the naval force of Spain, as fixed for the coming year:—A sailing ship of 84 guns, a frigate of 42, two corvettes carrying together 60 guns, two brigs with 32 guns between them, and two transports of 2748 tons. Screw steamers.—Three frigates, mounting in all 115 guns, and with machinery of the force of 1460 horse-power; four schooners, with 10 guns and 340 horse-power; and six transports of 7300 tons and 1310 horse-power. Six paddle-steamers, carrying together 40 guns, and moved by machinery of 1930 horse-power. In addition, the Coastguard service of the Peninsula includes two screw steamers with 4 guns, and of 764 horse-power; two dispatch boats, with 4 guns; two luggers, with a gun each; 25 feluccas and 73 other craft. The total force of Spain, then, colonies not included, may be taken at 25 armed vessels, carrying 393 guns, 10 transports, together of 10,000 tons burden, and 97 auxiliaries. The number of men to be provided for the navy and naval stations is given as follows:—4919 marines, 571 guards for the arsenals, and 7176 sailors—in all 12,661.

Funeral of the late Admiral Sir Charles Napier, K.C.B.—The funeral of Admiral Sir Charles Napier took place on Monday, at Catherington, near Merchistoun-hall, Hants. Beyond the fact of the deceased being borne to the grave by eight seamen who had served under his command during the greater part of his professional career, the whole proceedings were of a very private and unostentatious character. The mourners present comprised the Rev. J. Jodrell, General E. Napier, the Hon. William Napier, Colonel William Napier, Colonel M'Murdo, Vice-Admiral Sir Michael Seymour, G.C.B., Rear-Admiral Erskine, Captain G. T. Gordon, and Mr. William Grant. Messrs George and H. Turner, of Portsea, had charge of the arrangements for the funeral.

The New Foundry in Portsmouth Dockyard.—Our chief Naval Arsenal is on such a scale of magnitude that any increase of its working area would at first seem not requisite. The dimensions of this great national ship-building establishment covers 118 a. 5 r. 9 p., having, at various times, been enlarged, as the extent of public works and the exigencies of the naval service required. This space is now compactly covered with vast ranges of buildings, storehouses, mast-houses, sheds, steam-factories, public buildings, &c. And the time seems to be fast approaching when the working area of this vast establishment must be further extended. The increased dimensions of our ships of war, and the new motive power recently put into them, has rendered it necessary to enlarge our docks and building-slips, and to erect new factories and basins. That portion of the yard set apart for the steam service has, within the last dozen years, been totally altered. A steam basin, 900 feet long and 400 feet broad, as well as a steam factory, 687 feet long by 47 feet broad, having been constructed within that time. And now a new foundry of imposing dimensions has absorbed the last available bit of ground within the dockyard walls. This useful building is now all but finished and ready for use. It is unequalled in some respects in any dockyard in the kingdom. It has a frontage of 290 feet and a depth of 210 feet. There are three stories of splendid workshops, one over the other, at the western wing of the building, each of these flats or working departments being 203½ feet long by 41 feet wide, the whole being lit by ranges of windows, and ventilated in the best manner. Beneath these is a basement of corresponding dimensions applicable to the uses of a foundry, while upon the summit there is a tank containing 200,000 gallons of water available at all times in case of fire, and which, from its great elevation, may be forced upon the roofs of the loftiest buildings in the locality. In addition to the above suite of workshops there are two others at the eastern extremity of the building, each 116 feet in length, and about 44 feet broad. There is also under the same capacious roof a vast casting shop or foundry, 200 feet long by 47 broad, fitted up with moveable cranes, blast furnaces, and other necessary appendages, such as departments for boilers, engine-rooms, and coke stores, forming a vast collection of working buildings, which have been much wanted in this dockyard for some time past. A still further necessity, however, exists for other workshops, if we intend to keep pace with the increasing demands for the Navy, in fitting, building, and repairing our steam ships of war. The octagonal chimney shaft intended to carry away all smoky and sooty influences belonging to a large foundry, and which rises to 150 feet in height from the ground level, is a very handsome object, and commands general admiration.

The Duke of Somerset on the Navy.—At the dinner given to Her Majesty's Ministers at Salter's Hall on Wednesday, the Duke of Somerset returned thanks for the toast of the Navy in the following words:—"My lords and gentlemen, I rise to thank you on behalf of the Navy. The British Navy has at all times commanded the respect and attachment of Englishmen; but of late years more than usual attention has been directed to the progress of that service. I believe I may say that the Navy has advanced, and has answered the expectations of the country. I am not one of those who feel there is any danger that peace will be violated, but at the same time I think it is right that our Navy should be maintained in a position in which it may be able to uphold our interests and vindicate our honour. That, I believe, is the opinion of every man, of every profession and every party. In endeavouring, therefore, to keep up the efficiency of the Navy we are only doing that which every Englishman regards as a common duty, and to the discharge of that duty the Admiralty will of course earnestly devote themselves. I, gentlemen, may say this for the Navy, that if ever they should be called upon to defend their country in the serious battles that might have to be fought if a naval war were again to arise in Europe, whether those battles took place between ships of one kind or another, I believe you would find the English sailor to be of the same stuff as in former days; that he would be able and ready to face every danger, and far more eager to approach near to his enemy than to fight him at those long distances of which you hear so much in connection with some descriptions of naval artillery. I think the English sailor would like immediately to close with his enemy, and would be likely to make that enemy regret that he had ever encountered him. But whatever may be the future course of events, we ought to be prepared to meet it; and, therefore, although such preparations are attended with considerable expense, I am sure no Englishman will grudge the outlay when he knows that it is necessary for his country's safety and his country's honour."

Chatham Dockyard.—The following persons have been superannuated from this dockyard by order of the Admiralty:—Assistant-Surgeon H. Peacock, M.D., 146*l.* per annum, independent of his retirement of 6*s.* per day as a naval assistant-surgeon; J. Dyer, wood turner, 41*l.* 14*s.* 8*d.* per annum; and T. Woolley, joiner, 19*l.* 19*s.* 11*d.* per annum.

The Navy Gazette.

ADMIRALTY, November 13.

The following promotions, dated the 7th inst., have this day taken place, consequent on the death, on the 6th inst., of Admiral of the Blue Sir C. Napier, K.C.B.:—

Vice-Admiral of the Red Sir Augustus William James Clifford, Bart., C.B., to be Admiral of the Blue.

Vice-Admiral of the White Sir Houston Stewart, K.C.B., to be Vice-Admiral of the Red.

Vice-Admiral of the Blue the Hon. Sir Richard Saunders Dundas, K.C.B., to be Vice-Admiral of the White.

Rear-Admirals Richard Augustus Yates, Charles Grenville Randolph, and Edward Richard Williams, on the Reserved List, to be Vice-Admirals on the same List.

Rear-Admiral of the Red Sir Henry Byam Martin, K.C.B., to be Vice-Admiral of the Blue.

Rear-Admiral of the White Henry Francis Greville, C.B., to be Rear-Admiral of the Red.

Rear-Admiral of the Blue John Elphinstone Erskine, to be Rear-Admiral of the White.

Captain Thomas Locke Massie to be Rear-Admiral of the Blue.

Retired Vice-Admirals James Pattison Stewart, C.B., and the Honourable Edmund Sexten Pery Knox are entitled to the rank and title of Retired Admiral, and Retired Rear-Admirals John Pakenham, Henry Litchfield, and William Webb to the rank and title of Retired Vice-Admiral, in pursuance of Her Majesty's order in Council of the 7th of May, 1858.

Digitized by Google

ADMIRALTY, 15TH NOVEMBER, 1860.

Naval Knights of Windsor—The Lords Commissioners of the Admiralty hereby renew their notification to such Lieutenants in Her Majesty's Navy, as are desirous of being recommended for the appointment of Naval Knight of Windsor, under the will of the late Samuel Travers, Esq., that they must apply at this office on or before the 27th day of December next, when they will be informed of the nature of the certificates and testimonials which are required to show that they come within the meaning of the said will, which expresses that they "are to be superannuated or disabled Lieutenants of English men of war," and shall be single men, without children, inclined to lead a virtuous, studious, and devout life, to be removed if they give occasion for scandal.

[The following Appointment is substituted for that which appeared in the *Gazette* of the 9th November instant.]

Civil Service Corps of Rifle Volunteers—William Ennis, late Captain in this Corps, to be Adjutant from the 27th August, 1860.

23rd Essex Rifle Volunteers—James Alexander Hamilton, Esq., late Captain 41st (the Welch) Regiment, to be Captain; Edward Hammond Bentall, Esq., to be Lieutenant; Sampson Hanbury, Esq., to be Ensign.

Worcestershire Regiment of Militia—Charles Edward Davis, Gent., to be Lieutenant.

Worcestershire Rifle Volunteer Corps—6th Company—The Venerable Richard Brindley Hone to be Honorary Chaplain.

11th Company—The Reverend George Fisk to be Honorary Chaplain.

20th Company—John Dixon to be Lieutenant; Charles Dixon to be Ensign.

3rd Regiment (Light Infantry) of West York Militia—Ensign George Campbell to be Lieutenant, vice Walker, resigned; Ensign Edward Henry Saunders to be Lieutenant, vice Bolger, resigned; Ensign William Parkin Brown to be Lieutenant, vice Douglas, resigned.

37th West Riding of Yorkshire Rifle Volunteers (Barnsley)—Walter Spencer Stanhope, Esq., to be Captain; Robert Couldwell Clarke, Gent., to be Lieutenant; William Anbone Potter, Gent., to be Ensign; John Blackburn, Gent., to be Honorary Assistant-Surgeon.

1st Division, 4th Company of Northamptonshire Volunteer Rifle Corps—Ensign George Norman Wetton to be Lieutenant.

NOTICE TO MARINERS.

(No. 39).—MEDITERRANEAN.—SARDINIA.—*Fixed and Flashing Light on Cape St. Elias.*—The Sardinian Government has given notice, that on and after the 4th day of November, 1860, a light would be exhibited on Cape St. Elias, in the Gulf of Cagliari, south coast of Sardinia. The light is a fixed white light, varied every two minutes by a red flash. It is elevated 239 feet above the level of high water, and in clear weather the white light is visible at a distance of 14 miles, and the red flash at 11 miles. The light will open on a N.E. ¾ N. bearing when entering the Gulf of Cagliari from the westward, and on a N.W. ¾ W. bearing when entering from the eastward. The illuminating apparatus is dioptric, or by lenses of the fourth order. The position of the lighthouse is given as lat. 39° 11′ N., long. 9° 9′ 21″ East of Greenwich. [The bearings are Magnetic. Variation 15° 10′ West in 1860.] By command of their Lordships, *John Washington*, Hydrographer, Hydrographic Office, Admiralty, London, 6th November, 1860. This notice affects the following Admiralty Charts:—Mediterranean General, No. 2158; Sardinia, South Coast, No. 164; and Cagliari Bay, No. 1130. Also, Mediterranean Lights List, No. 107.

NAVAL PRIZE MONEY.

Notice is hereby given to all persons interested therein, that preparations are now being made for the intended distribution of the proceeds received and tonnage bounty awarded for the slave barque, "Name Unknown," captured on the 18th September, 1859, by Her Majesty's ship *Conflict*.

THE MILITIA.

CHANNEL ISLANDS MILITIA.—Remembering the great importance of the Channel Islands, and their proximate position to the territories of our great ally, we are glad to learn that the 1st and 3rd Regiments of the Royal Guernsey Militia have completed a course of training in the use of the Enfield rifle. Although this is an entirely unpaid force, and their drill grounds lay at very considerable distances from their residences, yet there has been no slackness in their attendance, even at a heavy sacrifice of time, and therefore of money. The Hythe regulations have been completely carried out under the certificated instructors, and each trained soldier has now fired since the commencement of the course last spring, 90 rounds of ball ammunition; and as several of the non-commissioned officers and men have proved themselves excellent shots, we hope next year we shall hear of their competing with our English Volunteers for some of the national prizes. When are the Jersey Militia to be armed with the Enfield rifle? It is scarcely to be believed that our soldiers within nine miles of the coast of France are still shouldering the old Brown Bess!

As we promised our readers, we now have the pleasure of reporting that on Thursday last, the 1st instant, the watch presented by the Right Hon. Lady Panmure for the best shot in the Royal Guernsey Militia, was fired for on Lancresse Common. At the conclusion of the practice six men were found to be ties, having made three points each. By the rules drawn up they had to fire one round more, and the result was that private Peter Renouf proved himself the winner, having scored two points. It is gratifying to learn that the winner of the prize has, throughout the musketry instruction drill, proved himself the best marksman of his squad, thus proving that the system adopted is based upon certain and fixed principles. On the following day the Lieutenant-Governor presented the watch to the fortunate winner, at the government-office, who, in accepting the same, declared that he would never part with it, but that it should descend to his children. A second prize was got up on the ground by Lieutenant-Colonel Gibbins, amounting to 60 francs, which was won by Sergeant Le Page, of the 2nd Regiment. This is a move in the right direction, and we shall watch the progress of the Guernsey Militia with much interest.

The Militia Gazette.

WAR OFFICE, PALL MALL, NOVEMBER 13.

4th or Royal South Middlesex Regiment of Militia—James Sutton to be Lieutenant, vice Burke, resigned.

Royal Flintshire Militia—Philip Pennant Pennant, Esq., to be Captain.

WAR OFFICE, PALL MALL, NOVEMBER 16.

Hampshire Militia Infantry—Hugh Montolieu Hammersley, Gent., to be Lieutenant.

1st Derbyshire Militia—Joseph Paget Esq., to be Captain, vice Wilmot, resigned.

5th Regiment of Royal Lancashire Militia—The promotions of Lieutenants John Joseph Mills and John Witham Sutcliffe Witham, which appeared in the *Gazette* of the 18th September, 1860, have been antedated from the 10th of that month, to the 10th of May, 1860.

The interesting and important lecture on shot-proof gun-shields, delivered by Captain C. P. Coles, R.N., last June, before the Royal United Service Institution, has been published separately with diagrams by Messrs. Mitchell & Son. We hope to find room for a fair consideration of his principles and proposals in our next number.

VOLUNTEERS.

METROPOLITAN.

2ND (SOUTH) MIDDLESEX RIFLES.—On the return of this corps from the inspection of the West Middlesex on Saturday, in Hyde Park, where the former corps had kept the ground, a general meeting of members was held in the cavalry barracks at Knightsbridge. After the transaction of some business of an important but private nature, Lord Ranelagh announced that the regiment had been presented with the perpetual use of a magnificent piece of ground adjoining the Caterham Station, having a clear range of 2000 yards; that a lease had been taken of the Caterham Hotel on behalf of the regiment, to be used as a club-room house for the members of the corps; and that the funds of the corps were free from any embarrassment, the present subscriptions being sufficient to cover all liabilities incurred. His lordship stated that arrangements were being made for a sham fight on a very large scale on Easter Monday.

3RD (HAMPSTEAD) MIDDLESEX RIFLES.—On Saturday last a shooting match between the members of this corps came off at the practice-ground belonging to the corps, at Child's Hill, Hampstead. The first prize (a Whitworth rifle) was won by Private Donne, who made 14 points; Corporal Alexander also scored 14. The tie, on being shot off, resulted in favour of Donne; Alexander, as the next best shot, was presented with three guineas. The second prize was won by Private Field, who scored 15. This prize was also tied for by Private Field, Corporal Alexander, and Private G. Scott. Alexander, who scored 13, was presented with three guineas. The third prize was won by Private G. Scott. The money prize of three guineas was tied for by Corporal Pollar and Private Sharp, Pollar eventually being the winner.

9TH (WEST) MIDDLESEX RIFLES.—This corps was inspected by Colonel M'Murdo in Hyde Park on Saturday, when, in spite of the inclemency of the weather, there was a very good muster of seven companies, No. 8, the last company formed, not having quite completed its drill or clothing. The colonel was received with the usual salute on coming on the ground, and by his desire the companies were wheeled back into open column, and the arms, accoutrements, &c., of each minutely inspected. The battalion then marched past in quick time, and closing to quarter distance on its leading division, changed front by the wheel and countermarch of subdivisions round the centre, and returned past the saluting point at the double. Then taking ground to the right flank by fours, opened out to wheeling distance from the leading division by the diagonal march of the rear companies, halted, fronted, and wheeled into line; and was put through the manual and platoon by the major or the lieut.-colonel resuming the command. The battalion loaded with blank cartridge, and advanced in line, halted, fired volleys from right to left, and then moved in column of companies from the right (after firing) along the rear, and in rear of the left. The open column again wheeled into line, and advanced in direct echelon of companies from the right, wheeled by companies, the quarter-circle to the left, and formed line on the left company, fired volleys by subdivision from flanks to centre, and then retired (with the exception of No. 1 and 7) by subdivisions from both flanks in rear of the centre; No. 1 extending from the right to skirmish, and No. 7 moving out to form the support, as the subdivision delivered their fire and retired towards the centre. The column continuing to retreat, the support extended to relieve the retiring skirmishers, and after the bugle sounded the advance, the double line of skirmishers relieved each other once or twice, until the column coming up at the double formed line on its two centre subdivisions, the skirmishers closing to their flanks, and the battalion firing volleys from centre to flanks; then a volley from the whole, and an advance in line and charge, followed by a sudden retreat from the right of companies by fours, and the formation of square on No. 2, prepare for cavalry, and volleys from both standing and kneeling ranks, on reforming column. The enemy who had occasioned the Volunteers being out in the wet and fog, *i. e.*, the inspecting-officer, expressed himself well satisfied on the whole, and complimented the corps on the firing, telling them from what he had seen he had no doubt but they would be in perfect order by the next inspection, if they would keep to their drill as steadily as they had hitherto done. The corps then gave three cheers for Colonel McMurdo, three cheers for Lord Ranelagh and the South Middlesex, who had kindly kept the ground, and marched back to their head-quarters at Lords' Cricket Ground, headed by their fine band.

15TH (LONDON SCOTTISH) MIDDLESEX RIFLES.—At the usual parade on Saturday, Lord Elcho stated that he had appointed a court of inquiry to consider the circumstances which appeared lately in the police reports where a member of the corps was related to have been seen in uniform walking in improper company in the streets late at night. This announcement of a prompt investigation was received with much satisfaction. Lord Elcho also announced that there would be a general muster of the corps this day, when arrangements for the winter, the formation of four additional companies, and other matters would be made known.

20TH (EUSTON) MIDDLESEX RIFLES.—On Tuesday evening a crowded public meeting was held at Holborn Hall, Holborn-bars, for the purpose of furthering the formation of the Western Central company of this corps; Captain Houghton presided. The chairman, in opening the proceedings, said the real object of the meeting that evening was to increase the number of the Western Central company. A great many names were enrolled.

32ND (VOLUNTEER GUARDS) MIDDLESEX RIFLES.—This corps will muster to-day at Carlton Ride, the authorities having allowed them the use of that spacious building for drill.

39TH (NORTH) MIDDLESEX RIFLES.—Captain Ross and the officers of the 1st company of this corps, of which Lord Enfield, M.P. has just accepted the command as Lieut.-Colonel, have offered for competition, open to all the members of the 1st company, to be shot for on Friday next, the 23rd inst., a very handsome silver cup as the first prize, a Lancaster or Whitworth rifle as the second, and a short Enfield rifle as the third prize.

22ND SURREY RIFLES.—This corps made its first appearance in public on Saturday, under the command of Captain Hinxman, M.D. Having assembled at head-quarters (65, Westminster Bridge Road), they marched to Clapham Common. The 22nd Surrey is composed chiefly of workmen, and has been accepted by Government. The cost of uniform being moderate, and the subscription merely nominal, a large increase in their number may be expected.

2ND (BRIXTON) SURREY ARTILLERY.—The services of this corps have been accepted by Her Majesty. The officers in commission are—Mr. Frederick Andrew Durnford, of Park Lodge, East Brixton, captain commanding (late captain in the 1st (South London) Surrey Rifles); Mr. Frederick Hughes Gilbart, of Canterbury Villas (late of the Honourable Artillery Company), first lieutenant; Mr. Alfred Austin, of Adeline Villas, second lieutenant. The head-quarters are at the Institution, Gresham Road, Brixton, which possess every possible accommodation for a corps of this description. The corps has been formed in an incredibly short time, and is daily increasing in numbers. The uniform is blue, with scarlet facings, trimmed with silver lace, busby, white belts, and sling swords. Both as regards durability, comfort, and elegance, this uniform is complete. Considerable attention and consideration has been given to every subject connected with the corps. The appointment of non-commissioned officers is postponed until all seeking promotion have had sufficient time to qualify and pass a proper examination.

LONDON WELSH RIFLES.—On Wednesday evening an influential public meeting was held at the Freemasons' Tavern, Great Queen-street, for the purpose of forming a Volunteer corps of Welshmen; Sir W. W. Wynn, M.P., in the chair. A committee was appointed to organise the corps.

CAMBRIDGESHIRE.

6TH (ELY) CAMBRIDGESHIRE RIFLES.—The Earl of Hardwicke, Lord Lieutenant of the county, reviewed this corps on Wednesday, in a large field near Littleport Road. At a dinner which took place after the review, the noble earl, in acknowledging the toast of his health, said, they must next turn their minds, not only to discipline and duty, but as to the mode in which, if called upon, they were equipped to take the field. If such a calamity were to arise it would be a sudden call; there would be little or no notice. The resources of other nations in Europe were such that no notice would be given in the event of a descent upon these shores. Should this occur, they would be at once called upon to rush to the railways, and what comforts were they supplied with? They had no knapsacks, no greatcoats, and without these their position would be extremely miserable indeed. They would require a change of linen, combs, brushes, and other little comforts: a greatcoat was an absolute necessity, and he should recommend it, with a knapsack, a mackintosh cloth coat, which, if properly cut, would well wrap them round, and in it they could sleep on the ground in defiance of cold and rheumatism. The Volunteers had undertaken a noble duty, and nothing connected with it should be half done. Their equipments up to the present time were next to useless. He should take an early opportunity of adopting the proper steps for making Her Majesty acquainted with what he had seen, and he should likewise take advantage of the position in which he was placed of putting all the county corps into one battalion under the command of an adjutant and paid officer of the Crown. In the course of the day a silver bugle, subscribed for by the ladies of Ely, was presented to the corps.

DURHAM.

1ST (SUNDERLAND) DURHAM ARTILLERY.—The anniversary of the Prince of Wales' birthday was celebrated by the Volunteers of Sunderland. At half-past two in the afternoon three detachments of the artillery (numbering thirty men, or ten for each of their three 24-four pounders) assembled on the garrison parade-ground, under the command of Lieutenant Hamilton, and fired a royal salute of twenty-one guns. In spite of the thorough November weather, there was a good attendance of spectators.

HAMPSHIRE.

2ND HANTS ARTILLERY.—In order to promote efficiency in firing with shot from battery guns amongst the members of this corps, the commandant (Major Hall), Captain E. Galt, and the rest of the officers, intend to give an elegant silver challenge cup of the value of 20 guineas, to which a gold medal will be attached, to the best shot in the corps. The conditions of the match, as at present arranged, are—that the winner is to hold the cup for a year, or longer, if he continues to be the best shot at the next trial of skill, but the gold medal he is to retain permanently. This novel essay with heavy guns will come off, to use a sporting phrase, next spring, at Southsea Castle, and the weapons will be the ordinary 32-pounders, with which its batteries are armed. The final arrangements respecting the firing, such as distance, &c., will be concluded shortly, under the direction of Major Hall and some of the officers of the Royal Artillery. This novel match is exciting much interest, not only in the corps, but also with the officers in the garrison. Messrs. E. and E. Emanuel, the goldsmiths to the Queen, at Portsmouth, have received orders to prepare the cup and medal.

3RD HANTS (PORTSMOUTH CIVIL SERVICE) ARTILLERY VOLUNTEERS.—The two new companies, 5 and 6, recently added to this corps, have received their non-commissioned officers. One half of their number required having been appointed from the existing companies, and the other moiety were balloted for from the corporals and bombardiers. The vacancies of the non-commissioned officers elected from the existing companies will be filled up by promotion. The strength of the corps is six companies, and the following promotion has accordingly taken place—Major-Commandant Sturdee to be Lieutenant-Colonel. The promotion was made by the Marquis of Winchester, the Lord-Lieutenant of the county, and bears date the 10th inst. A reading-room has been established in the dockyard for the use of the corps, as well as for the rest of the artisans and mechanics employed in the establishment. It is proposed to maintain the library by a twopenny subscription weekly. At present the expenses are defrayed by voluntary contributions in money, books, periodicals, and papers. The library was opened for the first time on Tuesday evening last, and it will continue open every evening for the future from 6 to 9 o'clock. It is

Digitized by Google

unnecessary to dilate upon the advantages that will be likely to grow out of this effort, on the part of the Civil Service Volunteers, in establishing a library for their use. It is a step in the right direction, and may keep many a man from the canteen and the grog shop. Any donations of books, periodicals, or newspapers will be thankfully received by the officers of the corps, if directed to the Dockyard, Portsmouth, and would be placed in the library immediately. The Civil Service Artillery at this port has not been in existence six months, and yet it has achieved in that limited period a great deal, and is now fast extending not only in numbers but in efficiency, and bids fair to be the leading corps of this county. It is anticipated that the Lords of the Admiralty will soon be convinced of the necessity of further assisting the corps, by promoting those improvements by which the great body of the artizans and mechanics in Portsmouth dockyard may be induced to come forward and join the corps. A very little encouragement, and the removal of certain impediments, would add very materially to the Volunteer movement in our chief naval arsenal. There is every reason to believe that under judicious management two battalions of a thousand men each might be raised in this yard alone, and every man would be a stout and able Volunteer, fit to do duty anywhere, if his services were required.

5TH HANTS RIFLES.—The members of the first three companies of this corps met at Stokes Bay during the past week for target practice. The firing was at short ranges, but from the very careful training of the members at position drill some good shots were made.

KENT.

27TH (DEPTFORD) KENT RIFLES.—A second company in connection with this corps (which is composed of officials and men employed at the Royal Victoria Victualling Yard and Deptford Dockyard) has just been formed, to command which the following officers have been selected and approved by the Lord-Lieutenant for recommendation to Her Majesty for commissions :—Mr. Fincham, master shipwright, Captain; Ensign Stubbings, 1st company, Lieutenant; and Mr. Sturgess, clerk, and private of 1st company, to be Ensign. Mr. G. Brown, clerk, private of the 1st company, has been nominated Ensign of that company, in the room of Ensign Stubbings, selected for promotion to Lieutenant of 2nd company.

LANCASHIRE.

On Monday evening the competitors in the Lancashire rifle contest had the various prizes awarded them at a meeting held in St. George's Hall, Liverpool. Lord Stanley offered some excellent advice to the companies, both as to their drill and shooting, and warned them against suffering such a grand and noble movement to be tarnished or impeded by feelings so insignificant as local jealousies and rivalry. Lord Elcho recommended that they should form a county association to be connected with the national one, having its rules constructed on a similar basis.

NORFOLK.

MOUNTED RIFLES.—At a meeting held on Saturday at Norwich, Colonel Brett in the chair, the question of organising a mounted corps in Norfolk was brought under consideration. It was stated by Captain Gurney that the view of the Government was that mounted Volunteers should be treated, not as cavalry, but as mounted infantry, it being considered that cavalry were of no use unless highly trained, which was not to be expected of Volunteers; but it was thought that if expert riflemen could be moved rapidly from place to place their services would be extremely available. A committee was appointed to make the necessary arrangements.

The members for King's Lynn—Lord Stanley and Mr. J. H. Gurney—having offered three cups for competition among the Volunteers of the town, a contest took place in the course of last week. The value of the first cup was 20*l.*, the second 10*l.*, and the third 5*l.*; and the successful competitors were Privates Agger, Potter, and Elliott. The ranges were two shots at 200 yards, two at 300 yards, three at 500 yards, and three at 600 yards. The highest number of points made by any of the 40 competitors was 11.

NOTTINGHAMSHIRE.

4TH (MANSFIELD) NOTTINGHAMSHIRE RIFLES. — This corps, which has made considerable progress in drill, discipline, and target practice, has recently received a considerable addition to its numbers. Within the last week nearly 40 eligible recruits have presented themselves from Sutton-in-Ashfield, Kirkby, and elsewhere, so that the company has nearly attained its maximum complement of 100 effectives. They will shortly be inspected by the inspecting-officer of the district.

SHROPSHIRE.

4TH (BRIDGENORTH) SHROPSHIRE RIFLES.—On Wednesday the 7th instant this corps assembled under the command of Captain John Charles Lloyd, of Dudmaston Hall, and marched to the parade ground with their band and colours for inspection by Captain Coldwell, Adjutant of the 1st battalion of the Shropshire Rifles. The corps mustered 89 effectives, exclusive of the officers. At the conclusion of the evolutions the men formed a hollow square, when Captain Coldwell stepped into the centre and addressed them in very encouraging terms, and said he considered it his duty to report to Colonel Hill the great gratification he experienced in witnessing the manner they had acquitted themselves.

SOMERSETSHIRE.

3RD (SOMERSET) SOMERSETSHIRE RIFLES.—This corps had a grand shooting match on Tuesday at Orchard Portman. On the return of the party to Taunton, Mrs. Sanford, wife of the captain of the corps, presented the prizes to the successful competitors in the presence of a large concourse of spectators on the Parade. The prizes consisted of a handsome silver cup, the gift of Mr. G. C. Bentinck, M.P., and a gold medal, the gift of Mrs. Sanford, together with a number of "cross-rifles" for distinguished marksmen. The cup was won by Private Geale, and the gold medal by the honorary surgeon, Dr. Edward Liddon.

SUFFOLK.

6TH SUFFOLK RIFLES. — Another shooting match has taken place at Finborough-park, near Stowmarket, among the members of the corps, the first prize (a rifle given by Sergeant-Armourer Colson) having been won by private Oxer, who scored 19 points; the second by Sergeant Matthew, 16 points; and the third by Corporal Matthew, 14 points. The ranges were 200, 300, and 400 yards, and the shooting was, on the whole, very creditable. A public meeting has been held in the Bungay Corn Exchange to increase the interest felt in the movement in that neighbourhood, and 25 additional men have been obtained for the local corps.

Lord Elcho, in a letter to the *Globe*, combats Colonel M'Murdo's theory that the country may safely rely upon the powers of expansion possessed by our Volunteer force, and rest satisfied with a permanent nucleus of 100,000 men. "Aye ready" is the motto of the noble Lord, who deems it a false policy to "make our permanent defensive organisation dependent for its efficiency upon time being given us for preparation." Lord Elcho, at the same time, takes the opportunity of expressing his opinion that Colonel M'Murdo, in giving 130,000 men as the total of the present force, "greatly under estimated" its strength. We may here mention that Mr. Klotz Rowsell, in a letter to the *Times*, repeats, in the most positive terms, that his proposed Volunteer excursion to Paris has received the approval of both the Duke of Cambridge and Mr. Sidney Herbert.

An entertainment presenting several features of interest has just been given at Lowestoft by Messrs. Lucas Brothers, the metropolitan builders, who, on Wednesday night, invited all the members of the local Volunteer corps, formed principally from among the persons employed by them, with the other persons on their establishment, to an excellent dinner at the Royal Hotel. The company numbered no less than 260, and the *restaurant* of the hotel was decorated in military fashion for the occasion. Several visitors of note were present—viz., Major-General Sir R. Dacres, R.A.; Sir S. M. Peto, M.P. for Finsbury; Colonel Wingfield, Colonel Hockley, Captain Joachim, R.N., the Rev. F. Cunningham (the venerable vicar of the parish of Lowestoft); Captain Fowler, Captain Steward, Captain Leathes, Captain Morse, Lieutenant Lucas, Lieutenant Bazalgette, &c.

On Wednesday evening there was a great gathering in the Town-hall, Newcastle-on-Tyne, on the occasion of Mrs. T. Headlam presenting a silver bugle on behalf of the ladies to the 1st Newcastle Rifle Volunteers. About 700 Volunteers were present, and also a large company of ladies and leading inhabitants.

A movement has been made to form a corps of mounted Rifle Volunteers for the county of Pembroke, the headquarters of which would be at Haverford-west.

There was a grand ball in connection with the London Rifle Brigade, on Thursday evening, at the Guildhall, under the patronage of the Lord Mayor and Corporation, and the leading commanding officers of the metropolitan rifle corps. The large hall was ornamented in a very tasteful style, the major portion of the decorations at the civic banquet on the 9th of November being retained. The Guildhall was crowded, but not to inconvenience, and dancing proceeded with spirit until a late hour in the morning.

At the dinner of the Salter's Company on Wednesday evening, Colonel M'Murdo gave some statistics of the Volunteers. He said, it had been his duty, with the co-operation of his staff, to test the value of these noble corps, and he could state that we had 78 solid battalions, comprising about 42,000 men, who, he could declare, would be fit in a very short time to take their place with the Line. Besides these there were upwards of 36,000 other Volunteers, who, although composing scattered corps, had already been brought into 68 different administrative battalions, which were also ready with their field officers and staff to take the field, if need were. True these corps had not often the means of coming together for drill; still when they did muster for that purpose the manner in which they had moved had astonished all who had witnessed the reviews at Hyde Park, Edinburgh, Knowsley, York, Gloucester, and many other places. These 68 administrative battalions, consisting of 36.000, could move almost as well as the 42,000 men constituting the 78 solid battalions which he had mentioned. Thus we had between 70,000 and 80,000 Volunteers equal to the conditions of the line of battle, and it was expected that in the course of next year the remainder of this large force would be brought into the same organisation of administrative battalions. Even now they were capable of doing their work in a campaign.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, NOVEMBER 13.

Kent Rifle Volunteers—2d Battalion—Alexander Valentine Bond, Esq., to be Adjutant, from the 3d of August, 1860.

Carnarvonshire Volunteer Rifle Corps—5th Company—Picton Jones, Gent., to be Ensign, vice Pugh, resigned.

1st Merionethshire Rifle Volunteer Corps—Hugh Richard Pughe, Gent., to be Ensign, vice Jones, resigned.

Memorandum—Her Majesty has been pleased to accept the resignation of the commission held by Ensign Jones in the 1st Merionethshire Rifle Volunteer Corps.

3d Merionethshire Rifle Volunteer Corps—The appointments of the following officers of the above company, namely:—Captain John Casson, Lieutenant Walter Henry Blackden (whose name was inadvertently described as William Blackden), and Ensign William Davies will bear date subsequent to the 2d of November inst.

Kent Rifle Volunteers—2d Battalion—Alexander Valentine Bond, Esq., Adjutant of the 2d Battalion, to serve with the rank of Captain.

37th Corps—Arthur Charles Ramsden, Gent., to be Lieutenant; Philip Simpson, Gent., to be Ensign.

18th Middlesex Rifle Volunteer Corps—John Henville Hulbert to be Lieutenant.

Memorandum—West Middlesex Rifle Volunteer Corps—The Queen has been graciously pleased to accept the resignation of the commission held in this corps by Lieutenant Alfred Wills.

3d Selkirkshire Rifle Volunteers—Henry Scott Anderson, Esq., to be Honorary Assistant-Surgeon.

3d Hampshire Artillery Volunteer Corps—Major Alfred Barnes Sturdee to be Lieutenant-Colonel.

1st Cardigan Rifle Volunteer Corps—Evan Rowlands, Gent., to be Honorary Assistant-Surgeon.

2d Cardigan Rifle Volunteer Corps—Thomas Jones, Gent., to be Honorary Assistant-Surgeon.

4th Cardigan Rifle Volunteer Corps—John Thomas, Gent., to be Honorary Assistant-Surgeon.

2d Company of Surrey Artillery Volunteers—Frederick Andrew Durnford, Esq., to be Captain; Frederick Hughes Gilbart, Gent., to be First Lieutenant; Alfred Austen, Gent., to be Second Lieutenant.

WAR OFFICE, PALL MALL, NOVEMBER 16.

12th Lancashire Artillery Volunteer Corps—David Fernie, Esq., to be Captain; Robertson Fernie, Gent., to be Second Lieutenant.

15th Lancashire Artillery Volunteer Corps—John Towne Danson, Gent., to be Second Lieutenant.

1st Battalion Lancashire Rifle Volunteers—James Burnside Taylor, Esq., to be Major.

4th Battalion Lancashire Rifle Volunteers—John Dugdale, Esq., to be Major; Daniel Dorning, Esq., to be Surgeon; Reverend St. Vincent Beechey, M.A., to be Honorary Chaplain.

1st Lancashire Rifle Volunteer Corps—Lieutenant John Lord Howard to be Captain, vice Taylor, resigned; James Lister the younger, Gent., to be Lieutenant, vice Howard, promoted.

5th Lancashire Rifle Volunteer Corps—Lieutenant Richard George Bushby to be Captain, vice Tinley, promoted; Ensign Samuel Saudbach Parker to be Lieutenant, vice Bushby, promoted; George Hampson Morrison, Gent., to be Ensign, vice Parker, promoted.

7th Lancashire Rifle Volunteer Corps—John Morris Gillespie, M.D., to be Honorary Assistant-Surgeon.

31st Lancashire Rifle Volunteer Corps—Thomas Evans Lees, Esq., to be Captain; Daniel Greaves, Gent., to be Lieutenant; Joseph Rowland the younger, Gent., to be Ensign.

3rd Manchester or 40th Lancashire Rifle Volunteer Corps—John Slagg the younger, Gent., to be Lieutenant.

46th Lancashire Rifle Volunteers—Peter Hopwood Moore, Esq., to be Captain; Jonathan Waddington, Gent., to be Lieutenant; William Robert Bindloss, Gent., to be Ensign.

73rd Lancashire Rifle Volunteer Corps—The Reverend Peter Legh, M.A., to be Honorary Chaplain

74th Lancashire Rifle Volunteer Corps—Captain George Stanley Willings]to be Captain Commandant.

4th Manchester or 78th Lancashire Rifle Volunteer Corps—John Averley Lathbury, Esq., to be Captain; Robert Young, Gent., to be Lieutenant; James Todd Mackie, Gent., to be Ensign.

Memoranda—Lancashire Rifle Volunteers—The 63rd and 61th Corps have been united to the 2nd Administrative Battalion, which previously comprised only the 5th, 14th, 19th, 39th, and 71st Corps. The two first-mentioned Corps were in the *Gazette* of the 9th instant, erroneously stated to have been united to the 4th Administrative Battalion, which still consists of the 46th, 67th, and 76th Corps only.

Her Majesty has been graciously pleased to accept the resignation of the Commissions held by Lieutenant John Tyson and Ensign Hugh McMonagle, in the 41st Lancashire Rifle Volunteer Corps.

1st Nairn Artillery Volunteer Corps—Alexander Findlay Esq., Lieutenant-Colonel, late of the 3rd West India Regiment, and Captain in the 1st Nairn Artillery Volunteer Corps, to be Captain Commandant; John Mackintosh, Gent., to be Captain of the 2nd Company; James Wilson, Gent., to be First Lieutenant of the 2nd Company; James Squair, Gent., to be Second Lieutenant of the 2nd Company.

South Middlesex Rifle Volunteer Corps—The Honourable Robert Bourke to be Lieutenant.

Queen's (Westminster) Rifle Volunteer Corps—Arthur Styan to be Captain, vice Dowling, resigned.

43rd Middlesex Rifle Volunteer Corps—Robert Barton to be Ensign.

1st Kinross-shire Rifle Volunteer Corps—William Patrick Adam, Esq., M.P., to be Lieutenant; Henry Maitland, Esq., to be Ensign; William Marshall to be Honorary Assistant-Surgeon.

2nd Administrative Battalion of Monmouthshire Volunteers—The Honourable James Fitzwalter Clifford Butler to be Major.

5th Monmouthshire Rifle Volunteer Corps—Samuel Elmes Steel, Gent., to be Lieutenant; John Farrant Williams, Gent., to be Ensign.

Memorandum—Her Majesty has been pleased to approve of Captain Richard James Pye Steel bearing the title of Captain Commandant.

7th Monmouthshire Rifle Volunteer Corps—Richard Laybourne, Gent., to be Ensign, vice Gething, resigned.

Memorandum—Her Majesty has been pleased to accept the resignation of the Commission held by Ensign James Edwards Gething.

Memorandum—8th Monmouthshire Rifle Volunteer Corps—Her Majesty has been pleased to accept the resignation of the Commission held by Captain the Honourable James Fitzwalter Clifford Butler.

Memorandum—Her Majesty has been graciously pleased to accept the resignation of Ensign Charles Wilkinson of the 13th Derbyshire Rifle Volunteers.

1st Battalion Warwickshire Rifle Volunteers (Birmingham)—Ensign Thomas Partridge Salt to be Lieutenant, vice Jefferys, resigned; John Palmer Phillips, Gent., to be Ensign, vice Salt, promoted; Ensign Thomas Turner Slaney to be Lieutenant, vice Armfield, resigned; William Septimus Harding, Gent., to be Ensign, vice Slaney, promoted; William Ledsam, Gent., to be Ensign, vice Scholefiel, resigned; Ensign Henry Rofe to be Supernumerary Lieutenant.

33rd Company of Cheshire Rifle Volunteers—Major Samuel Cross Starkey to be Captain; John Jasper Garnett, Gent., to be Lieutenant.

10th Cornwall Artillery Volunteer Corps—Charles Dacres Bevan, Esq., to be Captain.

11th Cornwall Artillery Volunteer Corps—Robert Snaith Hichens, to be Captain; John Newman Tremearne to be First Lieutenant; Charles Granville Grenfett to be Second Lieutenant; Daniel Freeman Stevens to be Honorary Assistant-Surgeon.

5th Cornwall Rifle Volunteer Corps—William Brown to be Honorary Assistant-Surgeon.

20th Cornwall Rifle Volunteer Corps—Richard Boyns to be Lieutenant; George Edward Tresise to be Ensign.

Resignation—14th Cornwall Rifle Volunteer Corps—Captain Edward Williams has received permission to resign his Commission.

3rd Brecknockshire Rifle Volunteer Corps—James Peirce Gent., to be Lieutenant; William Jayne, Gent., to be Ensign.

14th Perthshire Rifle Volunteer Corps—William Walter Cargill, Esq., to be Captain.

Memorandum—In the Notice of these Commissions as published in the *Gazette* of the 6th November instant:

In place of *South* Banffshire Rifle Volunteer Corps (Keith), it should have been *4th* Banffshire Rifle Volunteer Corps (Keith).

In place of William *Thinbam*, Esq., to be Captain, it should have been William *Thurburn*, Esq., to be Captain.

MOUNTED VOLUNTEERS.—A corps of "Mounted Volunteers" has been formed in Austria. They were recently reviewed by the Emperor, who expressed great satisfaction at their efficiency. They are "light cavalry." Their horses are trained to leap, swim, and obey every movement of their riders. Man and horse know each other. An Austrian officer thus expresses himself on the subject of this new corps. "Broken ground which, hitherto, was regarded as an obstacle to cavalry, will, on the contrary, henceforth, be its proper battle-ground. It will advance, under cover, stealthily on the enemy, make a sudden attack, and, if not successful, retire again as quickly as it advanced. Acting on outpost duty it will render better service to an encampment than stationary outposts. On 'reconnaissances trusting to the strength and agility of their horses, they will be enabled to get so close to the enemy as minutely to ascertain his position." The Austrian government proposes creating two or three regiments of these mounted volunteers.

His Royal Highness the General-Commanding-in-Chief is shortly expected to visit Harwich for the purpose of inspecting the fortifications at that port and at Landguard Fort. The Local Volunteer Artillery corps will attend his Royal Highness as a guard of honour on the occasion.

Referring to our anomalous position with the Government of China, the correspondent of the *China Telegraph* points attention to the fact that at the very time the French and English troops were storming the Taku forts and bayoneting the Imperial troops on the banks of the Peiho, another body of the English and French troops were mounted on the walls of the Imperial city of Shanghai, and side by side with the Chinese soldiers were repelling the fierce onset of the Emperor of China's rebellious subjects, with the Chinese commander-in-chief standing on one leg in ecstasies of delight at the fearful havoc which M'Intyre's howitzers, of the Madras Artillery, were making amongst the rebels.

Messrs. E. and E. Emanuel, silversmiths to the Queen, Portsmouth, have received instructions to manufacture the Goodwood Cup for 1861.

THE ARMY AND NAVY GAZETTE
AND
JOURNAL OF THE MILITIA AND VOLUNTEER FORCES.
EDITED BY W. H. RUSSELL, ESQ., LL.D.,
(Late Special Correspondent of *The Times*.)

The subscription is 7*s.* 7*d.* per quarter, or 30*s.* 4*d.* per annum, payable in advance, postage included (excepting abroad, which varies according to the route and destination). All Editorial Communications should be addressed to W. H. Russell, Esq., and business letters and advertisements to Mr. Archibald Graham, to whom post-office orders, &c., are payable. Advertisements received up to Thursday evening. The Paper is published every Saturday in time for the Morning Mails.
Office, 16, Wellington Street, Strand, London, W.C.

ALDERSHOT DISPENSARY.—AN URGENT APPEAL.

An effort is being made by officers and gentlemen to establish a Dispensary; and, if well and generously supported, it is hoped that it will soon be made a most efficient Infirmary for Aldershot and its neighbourhood. Medical advice, medicine, and food will be dispensed to the poor, the outcast, the fallen, and the destitute; some of whom have actually perished for lack of such immediate assistance. The Committee feel that they have only to appeal to the public, and to the hearts and sympathies of their military friends and neighbours in the Camp, when they will cordially and liberally respond. They need not assure them that there are many such wanting instant aid, for their own eyes may behold it daily. Subscriptions of any amount will be most thankfully received; and directly that £100 is in the Treasurer's hands the Institution will be commenced. These may be paid in at Messrs. Mangles' Bank, in Aldershot; to Mr. D. M. Dewar, the Treasurer; or to the Rev. J. Dennett, Parsonage, Aldershot.

Subscriptions.

BENSON'S WATCHES.
"Perfection of mechanism."—*Morning Post.*
Gold Watches, 5 to 100 guineas; Silver, 2 to 50 guineas. Send two stamps for Benson's Illustrated Pamphlet, descriptive of every construction of watch now made. Watches sent to all parts of the world.—33 and 34, Ludgate Hill, E.C.
Established 1749.

ARMY, NAVY, AND COLONIAL AGENCY.—On and after 1st January, 1861, Messrs. W. R. Looker & Co. offer the services of their AGENCY to Officers and Members of the above Services at a fixed charge of ONE GUINEA PER ANNUM. A detailed prospectus forwarded on application.—12, Pall Mall East, London, S.W.

MONEY ADVANCED on BILLS, PROMISSORY NOTES, POST-OBIT BONDS, or other securities, and at 5 per cent., on property derived under wills or settlements, without publicity or delay. Confidential applications may be addressed to Mr. Monris, Solicitor, 11, Beaufort Buildings, Strand, opposite Exeter Hall, W.C.

NOTICES TO CORRESPONDENTS.

Sariva.—The regiment in question will be among the first to come home if any can be spared from India. We cannot answer the second question, to which possibly a reply could be obtained by means of an advertisement.
It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.
As a *general rule* the Editor cannot undertake to answer questions or to return rejected contributions.
No communications can be published which are not accompanied by the name of the writer, given in confidence to the Editor.
It is particularly requested that applications for copies of the Army and Navy Gazette, &c., and advertisements be sent to the Publisher, Mr. Archibald Graham, and not to the Editor.

Army & Navy Gazette.

LONDON, SATURDAY, NOVEMBER 17, 1860.

No English journal can be insensible to questions which affect the character and reputation of whatever calls itself British, and stands with that name affixed to it before the eyes of the world. It is natural that a nation of freemen should feel and show the deepest sympathy with the efforts of less happy peoples to obtain the blessings which have been so long denied to them by their own passions and weakness, and by the coarse tyranny of powerful empires, but at the risk of some unpopularity we expressed our opinion a long time ago, that it would be as well for Englishmen to abstain from fighting in the Italian quarrel, unless they really felt they were in their consciences justified in what they were doing, and that they were animated by a sincere love of the cause, and by feelings of sympathy so strong for it as to render obedience to these feelings an individualduty. We had a painful experience of the rabble rout of swashbuckler blackguardism, of the vile led-captaincy of the gaming-tables, and of the chivalry of the infamous industry of all the capitals of Europe, which hangs on the skirts of an army like tattered braid on a new coat, and seeks to belong to it on the smallest thread of connection, and we were therefore anxious to warn men of honour against any approximation to the degrading association to which they would inevitably be subjected by the rejected of the army, the expelled and warned off of the turf, the swindling Pistols and rascally Bardolphs—the outcasts of society, among whom they were going to cast their lot. There is no sort of sentiment in common between these men and the professional soldiers of fortune of former days, any more than there is between them and men of honour—they must live, and there is only one way of doing it! They swarm in the cafés in the rear whilst the fighting is going on at the front. They are ever ready to gamble and drink, but they reserve their swords for each other. They have a noble readiness to help a countryman in distress—to accept a bill, or to decline an engagement.

The accounts which come to us from Naples made us anxious that the really gallant men of the British legion who were maintaining the name of their country, should be distinguished and kept apart from the swaggering brawlers who were the contemned even of the lazzaroni.

General Garibaldi, in the purity and nobleness of his nature, received every one "who came to fight for Italian freedom" as a man of honour and a gentleman; and to him repaired all the riffraffery of the world; the flow increasing in intensity in proportion as his success was augmented, and the dangers of his enterprise were diminished. He made little or no distinction between the true men and the men in buckram. The consequences were such as might be expected. A series of discreditable brawls have taken place, in which the highest names are introduced in very strange company. A Seymour, a Wortley, a Garibaldi, and a Cosenz figure in a transaction in which a London tailor, a money lender, a dishonoured bill, a number of intended duels, some accomplished assaults, H. de Stedingk, Esq., Colonel Leveson, late on General Türr's staff, Captain C. A. Scott, "well known on the British turf," and the words "base calumny," "lie," "swindlers," "scoundrels," &c., &c., are introduced with more dramatic effect of the lower sort, than elegance or propriety.

The story, as far as we can make it out from the documents, appears to be nearly as follows:—Last September a certain Captain Isaac, of the Northampton Volunteer Rifles came out to Naples, and was presented by Mr. R. Phillips, of London, to Colonel Leveson. The last-named gentleman describes himself as one who commanded several battalions in the expedition concentrated in the Gulf of Aranci, in an expedition which never took place, as an officer appointed to General Türr's staff by Garibaldi, as a soldier who served at Messina and throughout the campaign, till he was laid up with the fever caused by malaria, bad living, and fatigue, and as a colonel "late on General Türr's staff." Being informed that "Captain Isaac had just arrived from England with important dispatches from the different members of the Italian Committee in London for Garibaldi, which he was charged to deliver in person," Colonel Leveson gave Captain Isaac a seat in his carriage to the front, and introduced the enthusiastic Volunteer to Garibaldi at the railway station, "as a countryman and well-wisher of the cause, "who had brought dispatches from England." The unsuspecting Dictator asked the Northampton Volunteer to dinner, and Captain Isaac, who had kept back the most valuable of his little dispatches, accepted the invitation, and dined at Caserta with the Liberator. One of the great charms of Garibaldi is his unsuspecting nature, his charming simplicity of character; but Captain Isaac, if wise as a serpent, was not as harmless as a dove. In a weak moment after dinner Garibaldi invited his guest into another room, and then, "during a private interview" the perfidious captain of Volunteers put his hand into his bosom, and rushed upon his host "with a little bill for clothes," standing confessed not only as a captain of Northampton Riflemen and "well-wisher of the cause, a bearer of important dispatches, to be delivered in person," but asthe representative of "his house, Messrs. Isaac, Campbell, & Co., of London!" Can anything be finer than that little *coup-de-main?* Captain Isaac could not speak a word of French or Italian, but he could ask for the money due to "his house;" and Garibaldi, with a magnanimity which cannot be too much commended, signed an order on the Minister of Finance for the payment of the sum. Unhappily, however, the Minister of Finance took it into his head just at that moment to resign, and poor Captain Isaac, who had propitiated the Liberator and Dictator by a present of a couple of Isaac, Campbell, & Co.'s swords, and some "articles of dress," had to apply *adjuvante* Leveson, to the "Minister of War," who referred him to the "Director of Finance," who give him an order in Italian, signed by the Secretary-General which was presented next morning to the Director of Finance again, who gave Captain Isaac a cheque at sight on the Bank, which was duly dishonoured on being presented "as directions had been given," says Colonel Leveson, "to have the payment stopped on account of certain misrepresentations, most injurious to the house of Isaac, Campbell, & Co., having been made by certain parties." Among these parties were, it appears, Captain Sarsfield. It is no secret that this young gentleman is the only son of the Duke of Somerset, heir to one of the proudest titles and highest positions in the English peerage, with the free and warm impulses and genius of a Sheridan in his veins—who has gone out under a feigned name to fight for Garibaldi and Italian liberty, and who has won for himself the regard and admiration of his comrades in the field. He is no common enthusiast. In his desire to see service he accompanied the Persian Expedition under Sir James Outram, and was named by that gallant officer in his dispatches for his acts in the field, done *en amateur;* and not content with that, he visited India in the midst of the rebellion; attached himself to the 53rd regiment; distinguished himself by gallant conduct under Sir Colin Campbell's eye at the relief of Lucknow; and afterwards served at the storming of that city, and at several operations in the field in 1858. He entered a heavy cavalry regiment on his return home; and at the commencement of the Volunteer movement he worked with energy at his favourite scheme of mounted Volunteers, a troop of whom now bear his name in Devon. Though Captain Isaac's "house" was accused of "dishonourable conduct" by Lord Seymour, it does not appear that Captain Isaac thought it necessary to fight; but somehow or other Colonel Leveson was, he tells us, "accused of having shirked a duel with Captain Sarsfield;" and he therefore disproves the calumny by citing not only the evidence of his seconds—H. de Stedingk, Esq., and J. O'Brian, Esq., but a letter from Capt. Scott with whom Captain Sarsfield had "an affair," of which we shall hear more presently. Captain S. Isaac retires from the scene; but H. de Stedingk declares under his hand, "Hotel Vittoria, October 16," that he had several times pointed out to Captain Sarsfield's seconds that Colonel Leveson "could not fight with swords because his right hand was disabled," but that he was very anxious to take to pistols as soon as possible, which the seconds would not agree to till after a duel with swords as the weapons originally selected by them. H. de Stedingk on the 8th of October gave up the matter because nothing could be settled; "besides which, my time was imperatively demanded by my own private affairs, and" (we are sorry to hear) "did not admit of further delay." Colonel Leveson had applied to four medical officers for their opinion as to his thumb. We do not know when the, *casus belli* took place, but after it occurred, certainly on the 6th of October—the colonel dislocated his thumb at the second joint, and Dr. Brian, surgeon-general of the division Dunne, and Dr. Morange de Rosieres, two of the four doctors, certify that he was thereby rendered unable to grasp a sword, —in fact, we wonder how he could have managed a pistol. Captain C. A. Scott, who is described as over sixty years of age (a gentleman well known on the British turf, "as well as one of the staunchest supporters of Italian liberty"), now comes on the arena, and tells us that, in consequence of Lord Seymour's intolerable insolence, he consented to fight him in a duel with small swords at 7 a.m. on 8th October, although he regards duelling in general as a remnant of barbarism.

The curtain rises again, and "Garibaldi's Englishman," a Colonel Peard, walks upon the stage! He bears a letter in his hand addressed to Mr. C. A. Scott, which he reads for us, and the result of which is this, that Colonel Peard has forbidden his "military secretary," Lord Seymour, to meet Mr. Scott, on the ground that he (the said C. A. Scott) is a "usurious money lender," whose "word is valueless," and who "is unworthy of credit and belief," inasmuch as he had done a little bill of 1000*l.* at thre[illegible]onths for one

Digitized by Google

Captain Hare, to whom he had given 900*l.*, and his promise to extend the time of payment, and whose body he then placed in durance vile, because a friend of his, a Mr. Lloyd, wished to ascertain the strength of Captain Sarsfield's sword play after the challenge had been given. Colonel Peard's letter is not very coherent, but his statement that he intended to arrest Captain Sarsfield if he attempted to fight a duel with Mr. C. A. Scott, is very decided. C. A. Scott rejoins in two letters more suitable in style to the position of a gentleman well-known on the turf, than an elevated friend of freedom and of Daniel Manin,—always supposing that such friendship may be connected with some slight knowledge of English composition. But he declares that Lord Seymour has been in such bad company that he has three times been struck by three different men, and that he will hold Colonel Peard responsible for his conduct when he returns to England, "unless your unfortunate mania should assume a still more violent character, and then I shall pity you still more." There are no further materials in our possession to continue this contemptible Iliad. Every one wants to fight every one, and no one is able to carry out his benevolent desires. Stay! here is a foot note by Colonel Leveson which exhibits the action of the *Deus ex machinâ*—"Captain C. A. Scott now lies in an almost precarious state, having been waylaid and cruelly beaten with a stick on the head by Captain Sarsfield."

It is with sincere regret that we see men like Lord Seymour and Major Wortley in such *galère*. It is with greater sorrow we see Englishmen bringing such disgrace on their country, themselves, and the cause they profess to serve. But pitch cannot be touched without defilement. Englishmen have legitimate missions to which they may devote all their energies without risk of such degradation.

In another place will be found some remarks respecting the Military Train, from the pen of the Special Correspondent of the *Times* in China, in which he bears heavily upon them for being above their work. It is certain, at all events, that Major Cooper, who commanded the battalion of the Military Train attached to the army in China, has been relieved of his command; but we are not so sure that the correct cause is assigned for his supersession. Before the officers and men of the Train are condemned for being above their work, it would only be fair to state what their work is, and to let them understand the nature of the duties they may be called on to perform. There are some of the most hardworking and meritorious officers in the Service attached to the corps; and the non-commissioned officers and old soldiers are equal to those of any regiment in the Service; so that it is scarcely probable they would wilfully neglect their duties, unless there is some grave mistake respecting them. In fact, it may not be unlikely that the Military Train —a combatant body—feel no little astonishment at finding themselves placed under the orders of a civil branch of the Service. Their position in the *Army List* is between the Royal Engineers and the Grenadier Guards. They are equipped, armed, and drilled as regular soldiers—and very nearly resemble the Train des Equipages Militaires, in France; and it is no disgrace to officers or men that they should seek to render the same distinguished services in China, that Colonel Robertson's second battalion performed under Outram in India. They should really be informed that they are to be under the orders of the Commissariat, and the sooner the thing is done at the camps where the Military Train battalions are stationed the better, for it is assuredly undesirable to acquaint them with the disagreeable fact for the first time when in face of an enemy. An arrangement like that proposed for the Land Transport Corps, and recommended for the Military Train; or, better still, some such arrangement as that of the French Intendance, might obviate those difficulties. For our own parts, without any inclination to prejudge the question, we must say that, if Sir Hope Grant placed officers and men of the Military Train under the direct controul of Mr. Turner and the Commissariat sub-officers and clerks, he gave them cause for great annoyance and disappointment. We doubt not when they know what their duties are at home they will readily perform them when called on to do so abroad.

Lord Hardwicke and Colonel M'Murdo have made two useful speeches in reference to the Volunteers and their efficiency. We must admit that the sailor did not speak quite as hopefully as the soldier; but then his lordship seemed to think it quite likely that without a moment's notice a descent might be made upon our shores, and that the Volunteers might be called on to turn out of their beds and take post wherever the railway trains disgorged them, "without change of linen, brushes, combs, or other little comforts," happy to sleep without great-coat, macintosh, or cape, *sub Jove frigido!* Cocks'-plumes, kilts, tufts, and knickerbockers; even shiny gaiters would avail them but little then. As the Emperor of France can be the only potentate capable, either physically or mentally, of such an enterprise, according to geographical possibilities and Lord Hardwicke's view of his morals, we beg to suggest to his lordship whether it would not be a good thing to throw a corps of Volunteers upon Hamilton Palace, and to make a sudden descent upon the Empress, who is understood to be residing there? There would be a "material guarantee" with a vengeance! Always supposing that the Emperor entertains for the mother of the Prince Imperial the deep and tender affection which even his enemies say he feels for his wife.

It is evident that in his Machiavellian subtlety Napoleon III. is seeking to throw Lord Hardwicke and others off their guard, by pretending to trust the Empress among us. Volunteers, pray get your macintoshes, combs, brushes, and other little comforts at once! The insidious nature of this last *coup* of the Emperor is the surest proof of his intention to invade us immediately; and those Dutch sailors who plundered our coast villages the other day, show how easily the whole thing can be managed. Colonel M'Murdo, indeed, gives us hopes that, if we have a little time, we may make a fair show of resistance; for we have, he says, 78 solid battalions of 42,000 men, who will soon be fit to take their place in line of battle by the side of regular battalions, to whom might be added 36,000 men, belonging to 68 administrative battalions, ready to take the field in case of necessity. Now, that is a result the country may feel proud of; but Colonel M'Murdo does not pretend to say that these 70,000 and odd men could be collected together, at even a pretty good notice, so as to form front of battle in position, or to take the field in the actual plain sense of the term. They are here, and they may be had under certain conditions when wanted; but it must be remembered, that they are not on hand as regular troops are. The spirit of Englishmen would animate them to meet the enemy in one grand struggle, even though they were destitute of Lord Hardwicke's little comforts; but it will be long ere the Volunteers can be regarded as an army *en mobilité*. Their highest praise is, that they have approached so closely to that perfection as to be capable of attaining it in time when more fully equipped; and much of the credit outside that due to their indefatigable spirit, is owing to the exertions of Colonel M'Murdo himself and of his officers, and the plain, honest purpose and sincerity of speech with which they have treated the Volunteers.

We are glad to find from the Official Report of Mr. Raffles, stipendiary magistrate at Liverpool, on the case of the Conway, that a satisfactory explanation is afforded how that vessel, after being rejected for the conveyance of troops, by the Surveyor of the Indian Department, was soon afterwards taken up by the Emigration Commissioners to convey the families of soldiers to India. Mr. Raffles states:—

"He had, however, the report of the Emigration Surveyor before him, and he found, from its perusal, that material repairs had been made in the ship since his inspection, and to a great extent in accordance with his own suggestions."

The only other portion of the Report which bears upon the points raised in the articles in this journal of September 29th, and October 6th and 20th last, is the following:—

"The fall of the mainmast had rent open the upper deck; through this rent the sea found its way into the passenger or lower deck, and thence by the scuppers into the lower hold. The quantity of water in the ship was thus as much attributable to internal as to external leakage, and appears to me to justify the conclusion that the vessel was to the last a good and staunch ship."

It is not, however, stated whether the decks had been weakened by the cuttings usually required by the Emigration Commissioners; so that we are left where we were as to whether Mr. Phillipps and Mr. Marshall of London, or Mr. T. M. Mackay of Liverpool, are right in their views as to such cuttings endangering a vessel, or otherwise.

But, though we do not know whether the rending open of the upper deck resulted from its having been thus weakened, it is clear that, since the leakage of the Conway was over-deck (or what Mr. Raffles calls "internal") leakage, this proves, not merely that the hull was sound, but also (as the London shipowners say) that the safety of a vessel is risked when her upper decks are too much opened. This was precisely the point on which they and Mr. Mackay were at issue in their evidence before the Transport Committee,—Mr. Mackay going so far as to say that it did not signify how much the decks were cut open, so that the hull of the vessel was left intact.

The artificers of the War Department at Portsmouth are now employed in the construction, or rather alteration, of a sea-service heavy gun-carriage for the use of the 40-pounder Armstrong gun, about to be introduced into the naval service of the country. The carriage for this gun, made at Woolwich Arsenal, is termed the non-recoil sliding carriage, because, by means of a self-acting arrangement, with a bar sliding in a groove, the recoil of the gun, when fired, is checked by the high angle at which the slide is inclined. This carriage has been some time under trial on board of the gunnery ship Excellent, where the only advantage it is found to possess over the old pattern is in the return of the gun after recoil to its original position. On the other hand the details of the manufacture of the new carriage are complicated with bars and screws, not easily removed in case of damage, india-rubber buffers, iron supports for handspikes, and such like innovations. Captain Hewlett has, therefore, adopted an old pattern carriage for the 40-pounder Armstrong, by substituting chocks for the rear-trucks, which it is anticipated will sufficiently check the recoil, and the gun will be run home again while the necessary loading and spunging is being effected. This carriage will be far more simple than the non-recoiling one; and it is very satisfactory to see the attention of scientific naval officers turned to such mechanical questions as vitally influence the welfare of the naval prestige of the country; the more so, because, although the work of the carriage department in Woolwich Arsenal is turned out in first rate style, yet the officers conducting it cannot be expected to understand the actual requirements of the sister service so intimately as to overcome at once all the difficulties of an entirely new system. With the wise king of old we may say, "In the multitude of counsellors purposes are established."

A paragraph has been going the round of the papers by which that portion of the public who have not referred to the GAZETTE may be led into error, as to the honour actually conferred on Rear-Admiral James Hope, C.B., the Naval Commander-in-Chief on the coast of China. It has been stated that the gallant officer has been elevated from the second to the first division of the Most Honourable Order of the Bath. This is a complete mistake. He has been appointed an Ordinary Member of the Military Division of the Second Class, or Knight Commander of the said order.

In compiling our Naval Intelligence we are naturally dependent upon the information which we receive from the various quarters of the globe at which the ships are stationed, and in the great majority of instances we have no occasion to find fault with the correctness of the statements conveyed to us. There is an exception however in the case of the shipping news from China, which, for several mails, has stationed vessels in the Canton River while they were actively employed at a very different part of the coast.

A committee, consisting of Commodore the Hon. James R. Drummond, C.B., Commodore the Hon. Hastings R. Yelverton, C.B., and William Hickman, Esq., have been sitting at the Admiralty, Whitehall, for the last few days, occupied with the task of revising the naval instructions.

Captain the Hon. J. Denman, R.N., will proceed to Antwerp on the 19th instant, for the purpose of receiving Her Imperial Majesty the Empress of Austria, and will be in attendance during the time Her Majesty is under the British flag. Captain Denman will be accompanied by one of the officers of Her Majesty's household.

We believe that from economical reasons several of the changes of the regiments in India, which were anticipated this winter, will not take place.

The Colonelcy of the 13th Light Dragoons, vacant by the death of General the Hon. E. P. Lygon, is not likely to be filled up for some days; but we have reason to anticipate it will be conferred on Major-General Sir James Hope Grant, G.C.B., a selection the propriety of which both the Army and the public will cordially ratify.

The following promotions in the higher ranks of the Army will take place consequent upon the death of General Lygon: Lieut.-General Sir F. Cockburn, Colonel of the 95th, to be General; Major-General Sir John Pennefather, Commanding at Aldershot, to be Lieut.-General; Colonel J. F. G. Campbell, C.B., to be Major-General. The Senior Colonel is now Lord Frederick Paulet, C.B., Coldstream Guards.

It is not unlikely, we hear, that Mr. Whitworth may be at present making 12-pounder guns for field service, and 80-pounder ship-guns for the Government. None of his guns were used in Italy by the Piedmontese or Garibaldians. A letter in another place states some facts in reference to the remarks in our late numbers, bearing on the relations between Mr. Whitworth and the Government, arising out of the *communiqué* which appeared in the Paris correspondence of the leading journal on that question. We have no interest in the matter—all we want, is to know the facts about the best gun, and to get that gun for the public service.

Not merely in the spirit of charity, but of prudence and economy, the attempt now being made to organise a dispensary at Aldershot, is one deserving every co-operation. The condition of the poor wretches who swarm round the Camp has been described to us as most horrible, and in endeavouring to give them the relief likely to be afforded by an institution such as that which is projected, its originators are exercising charity in a most discriminating way. Wretched outcasts as they may be, they surely do not merit the heartrending sufferings they undergo, ending sometimes in such a death as humanity must shudder to contemplate. We trust the Government will not withhold its assistance, as the indirect operation of the institution must be attended with results most beneficial to the sanitary condition of the soldier, and, of course to the public finances which suffer in proportion as they become unfit for service by disease. The Rev. J. Dennett, Incumbent of Aldershot, and Messrs. Mangles' Bank, Aldershot, receive subscriptions.

OPERATIONS IN CHINA.

The late operations in China will probably be long and lasting in their effects; and day by day the civilised and especially the commercial world, will become alive to fresh benefits resulting from the gallantry of our troops and the skill of our generals in that sharp little battle before the Taku forts. But one result needs neither time nor diplomacy to complete it; it may be regarded as *un fait accompli*, of so satisfactory a nature, and so important withal, that we need make no apology for again alluding to it. We refer to the success of the Armstrong guns, and the part which they played in the action.

Our desire to direct attention to this subject does not arise from any apprehension that it is likely to be overlooked or neglected, but because in their over-eagerness to do justice to it, some of our contemporaries, quitting matters with which they were more competent to deal, have remarked upon it in a manner calculated rather to mislead than to instruct the public; and because we consider that the points upon which most stress has been laid have not always been those which artillerymen regard as the most important, and that we may, with a little pains, arrive at more valuable conclusions than any which have been hitherto deduced from the occasion in question.

The results, then, of this *baptême de feu* of the Armstrong guns appear to us twofold; for convenience we may class them as physical and moral results.

Of course, the importance of the former can hardly be overrated; but the undue prominence which has been given to the accurate practice made by these guns, and to their destructive effects, compared with the far more important discovery of their capabilities for enduring the rough work and usage of war, the continual shipping and unshipping (than which no severer test could be applied to guns of this description), and the troublesome transit across the pathless morass and over the unbridged ditches which lay before the camp at Senho, proves how little ground there was for the anxiety with which many experienced practical men saw these weapons introduced into the Service. As to their shooting qualifications, artillerymen have long ceased to be in doubt; a long and patient course of experiments at Shoeburyness had given incontestable proof of their excellence in this respect, as well as of the destructiveness of the terrible shell when furnished with the ingenious and beautiful fuze, which, like the gun, we owe to Sir William Armstrong. The range, the accuracy, the penetrating power of the weapon, had been laboriously spelt out and decided many months before we thought of dispatching it to avenge our Peiho disaster; the authorities would have been much to blame had it been otherwise. It is not necessary to have a Tartar or a Taku fort to practise at to determine the qualification of a gun in these respects; and we imagine that the moment of firing the first shot against the enemy was a far less exciting and anxious one for Captain Milward and the officers about him, than when the battery was halted after its struggle through the treacherous mud, and underwent the inspection to which we are told that officer subjected it. That inspection satisfactorily concluded, Captain Milward must have known that all would be well; and the fatal "three degrees" were doubtlessly given out in the cheery, confident tones of a man who feels he is handling a weapon superior to anything that will be brought against or alongside it. That the range and accuracy of the fire "excited the admiration of the whole force" we can readily believe; but that it excited any astonishment on the part of the artillerymen we are inclined to doubt. Each shot as it tore through the Tartar ranks,—each shell, bursting with deadly precision at the point of impact, scattering destruction and havoc around, but confirmed the experience of many months' experimental practice at home; and satisfactory as it undoubtedly is to find that we were not mistaken in our calculations, the real cause for congratulation lies in the trimpbant refutation which this trial has given to the gloomy forebodings of those who feared the weapon would prove too delicate and fragile for actual warfare, and in the fact of the dark shadows which passed at times across the bright horizon that bounded our view of the future of these guns having dispersed so completely, and passed away in the smoke of battle.

We do not think it necessary to allude to the question of the carriages, the pattern of which has long since been materially improved and lightened, while in other minor, though not unimportant details, improvements have been effected which render the Armstrong guns with which our home batteries are at present equipped, vastly superior to those which have just achieved such a signal triumph in China. But we may add that there is reason to think that *all* the carriages did not stand the work required of them.

As regards the comparative merits of the Armstrong gun and the French *canon rayé*, although, as was before observed in this journal, there were no means at hand upon this occasion for instituting a very exact comparison between the two—still, we imagine that now the question of the efficiency of the former on active service has been decided, nobody acquainted with the two weapons will hesitate to admit the superiority of our own, in all except portability. The success of our Armstrong guns may be considered as complete, and we may well congratulate ourselves upon the possession of so admirable and serviceable a weapon. In deciding upon its introduction, and in the energetic measures which they have taken to ensure its rapid manufacture, the authorities have had to overcome much opposition, and to take upon their shoulders a greater responsibility than is generally supposed. It was an anxious moment rattling the dice, for the stake was a heavy one: fortune has favoured us, and we have thrown "sixes."

So much for what we have designated as the physical results; there is, however, another lesson to be learned from the part which these guns played upon the occasion in question, a lesson which we shall do well not to neglect; and, in speaking of the moral results of this trial, we do not allude to the moral effect of the terrible weapon upon those opposed to it,—the effect by which we obtained possession of the remaining forts without a struggle, and which we are told has been such, that Sang-ko-lin-sin and his warriors exclaimed, "What use in contending with an enemy whose guns carry eight miles?"—we refer to the position which it is evident will henceforth be occupied by artillery on the field, and to the revolution which the introduction of rifled ordnance has effected in the relative importance of the different arms.

The prominence given by the French to artillery upon all occasions, the attention which the Emperor has constantly paid to its improvement and development, and the part which it was called upon to play in the late Italian campaign, will sufficiently indicate the readiness with which our military neighbours across the Channel have recognised and adopted the new order of things; while the importance which all continental nations are beginning to attach to the efficiency and organisation of their artillery makes it evident that the French are not singular in this respect, and that there is a general and settled conviction, that upon the comparative excellence and proper application of this arm the success of future operations will mainly depend.

Our own generals also in China, cannot certainly be accused of having overlooked this, or of having kept their artillery in the background, for they appear to have availed themselves to the utmost of the services of the guns at their disposal—with what result we all know; and we only hope that the brilliant success of their tactics upon this occasion, the example of other nations, and generally the teaching of recent events, will induce Government to spare no efforts or expense to promote the efficiency of our artillery, to complete as rapidly as possible the equipment of our batteries (both field and garrison) with Armstrong guns, and to take such steps as shall secure to us a numerous body of skilful and well-trained artillerymen for the service of these beautiful weapons.

When this has been done, and the necessary additions made to both the *matériel* and *personnel* of this branch of the Service, we may hope that the skilful management and judicious disposition of artillery in the field will be more insisted upon in the education of our staff officers than has hitherto been deemed necessary, and that the subject will receive that attention which the prominent position that artillery must henceforth occupy, and the increased importance of that arm, render imperative.

CHINA.

In addition to the official despatches, the letters of newspaper correspondents contain long accounts of the progress and experiences of the allied armies. The letters from Tien-tsin, September 9th, anticipate that the army will reach Pekin in seven days:—

There we are informed that Sang-ko-lin-sin is endeavouring to rally his beaten troops, but I hardly believe they will ever meet the allied army in the field. All the country people state that the men who escaped from the forts were completely panicstricken. "What is the use," said they, "of fighting against men whose guns carry eight miles?" Sang-ko-lin-sin himself arrived the night of the fight, with jaded horse and torn garments. He exchanged his coat with a villager, at a place three miles hence, and lost no time in proceeding on his journey to Pekin. He was said to have been degraded, but there is no certain information on the subject.

OUR SICK AND WOUNDED.

After visiting the hospital ships the correspondent of *The Times* reports the condition of the men as satisfactory, although in the case of the Mauritius the heights of the upper berths, and the smallness of the port-holes, are objectionable.

The men were hearty and cheery. Each man had good flannel clothing, and on every bed was a clean pair of sheets and a famous blanket. Each vessel was supplied with a complete file of the London papers, and a good selection of books. The men seemed most grateful for this, and nearly every one not too ill to read had in his hand a paper, arrived by the mail of the previous day. The newspapers will be continued as long as the army remains in China. "You had your work to do the other day," said I to a wounded 67th man. "Yes, sir, and we did it." "What will they think of it in England? Will the Queen know what a fight it was?" asked a 44th man with five gingal balls in him. I ventured to assure him that Her Majesty would be the first to appreciate the valour displayed at the storming of the fort. They were all anxious on the subject, for the Chinese war has excited so little interest at home that the soldiers fear they may not obtain that best salve for all wounds—the sympathy and admiration of their countrymen. Never did men deserve it more. Here, at 15,000 miles from home, were upwards of 150 44ths and 67ths wounded in the attack, and nearly all belonging to two companies of each regiment. There was no grumbling, no vain complaints. Every man was resigned to his fate, and an artilleryman, whose leg had been amputated, cheerily hoped to obtain a situation among the soldier *commissionaires* of London. Various games had been sent from the War Office—chess, backgammon, draughts, solitaire, &c.—of which the last was the favourite. As to stores and medical comforts, these ships contain a supply of everything that by the most remote possibility can be needed. The sick and wounded are tended with the same care and solicitude as in the best London hospitals, and the arrangements made by Dr. Muir and his staff leave little or nothing to be desired.

A TOWN ON THE ROAD.

Four miles' march brought us to another town, Kiang-kia-chwang, near which we determined to halt for the night. A large acacia at the entrance of the village shaded a strip of green by the side of some water, and here we pitched our tent. The whole population turned out to see us. They were soon assured that we meant them no harm, and became inconveniently inquisitive. They peered into our eyes, wished to know our ages, and our "honourable names," and were delighted at the materials of our garments. A tweed shooting-coat of mine excited special admiration. It was handled and fingered by all who could get near it. The watch and the compass they understood at once, but a copy of the *Times* which I spread open for their inspection, caused a wondering shout of "Aah yah!" Having bestowed sufficient attention on us, "the great Kings," they turned to the Sikhs, "the black Princes," as they are christened. They marvelled at their horses, stood by their side, and measured their height, inspected the saddles and trappings, touched the bridles, and kept at a respectful distance from the scimitars. The Sikhs were in their glory. They unsheathed their sabres, and ran their fingers along the keen edges, explained the theory of their double-barrelled pistols in unmistakeable pantomime, and showed how their lances had pierced the Tartar cavalry.

DESCRIPTION OF TIEN-TSIN.

Tien-tsin, on the south bank of the Peiho, 38 miles from the Taku Forts, and 68 from Pekin, is the largest port on the coast, north of Shanghai, not hitherto open to foreign trade. It is the terminus of the Grand Canal, which skirts the town and enters the Peiho outside the walls. By this canal all the produce and taxes for the use of the capital have been brought for centuries. Since it was "broken up" by the irruption of the Yellow River the produce and taxes have equally reached Tien-tsin, born by junks across the sea and then up the Peiho. All the salt for the use of the capital is stored here. An Imperial monopoly, the dreary salt flat on which we landed constitutes one of the most valuable appanages of the Crown. There, and all along the coast, may be seen innumerable salt hills. When the salt is evaporated it is brought to Tien-tsin, and piled in stacks covered with matting, large as the largest haystacks in England. Acres of them may be seen on the north bank of the river just below the town. A considerable trade is carried on in grain and rice. The river is thronged with junks, and the crowded, bustling streets, are full of life and motion. The position of Tien-tsin renders it one of the most important cities in China, and the key of the capital. Its population is said to be nearly half a million of souls. It is certainly upwards of 300,000. Though the Gulf of Pecheli be shallow, the Peiho difficult of navigation, and the bar at its mouth inconveniently large, yet ships of considerable burden can ascend the river. The Peninsular and Oriental steamer Granada, which brought up Lord Elgin and Sir Hope Grant, and draws 11 feet water, is anchored off the town at the mouth of the Grand Canal. The steamer Carthage, drawing 12ft., with commissariat stores on board, is moored just below, and Her Majesty's despatch gunboat Reynard, of the same draught, just above her.

THE COMMISSARIAT AT TIEN-TSIN.

Mr. Parkes heard that a committee of merchants had been appointed by Sang-ko-lin-sin to furnish supplies for the whole Chinese army in the north. He sought them out, and explained that, as their office had now become a sinecure, they must transfer their allegiance to the allies. The committee made no demur, and a tariff of prices was soon arranged. They rated the Mexican dollar at 1000 cash, which, at the present rate of exchange, gives 200 cash for a shilling. The pound avoirdupois is equal to the Tien-tsin catty, by which everything is sold. Bullocks are divided into three classes. The first weigh about 500 lb. and cost 25 dollars (5*l.*) per head; the second, weighing about 400 lb, are fixed at 20 dollars; the third, about 300 lb., are 15 dollars each. Sheep of all sizes cost 3 dollars per head. Beef and mutton are also sold by retail, the first at 3*d.*, the second at 4*d.* per lb.

Tea is 1*s.* 2*d.*, sugar 4*d.*, and flour 2½*d.* per lb.; onions, turnips, and pumpkins, five cash per lb.; fowls 9*d.*, and ducks 1*s.* 9*d.* each. The finest grapes may be had in abundance at 3*d.* per lb.; the largest peaches at 1*d.* each. Water melons—most refreshing of fruits and large enough for a dozen—cost 5*d.* each. Ice in large blocks of 25 lb., pure and clear as the finest Wenham Lake, is sold for 6*d.* a block. There is any quantity of forage of every description —hay, millet, stalk, green grass, paddy, peas, beans, and Indian corn. Coal costs ½*d.*, and charcoal 1*d.* a pound. Coolies receive 1*s.* per day per man. Supplies of every description are abundant and excellent.

THE ADVANCE TO PEKIN.

YUNG-TSUN, WITHIN 45 MILES OF PEKIN, Sept 11, 6 a.m. —I take advantage of the courier, who leaves this morning for Tien-tsin, to add a short postcript to my letter of the 9th. We reached this place yesterday, after two days' march through frequent villages, and over a flat alluvial plain covered with millet. Had we to contend with an enterprising enemy this march would have been attended with the greatest difficulties. In the first three miles out of Tien-tsin we crossed seven bridges over wide canals, not one of which had been broken. The road thence runs along the south bank of the river, and a few gingal men in the high millet on the opposite side might have galled us fearfully. Had barricades been made, or the roads been broken up in the villages, a serious obstacle would have been afforded, for the streets are narrow, and every inch of country, save only where the road is made or houses are built, is covered with millet 14 feet high. But the "enemy" is invisible, and, according to the villagers' account, the Tartars were too much alarmed in their flight to think of any-

Digitized by Google

thing except their own safety. Soon after encamping here yesterday we had a tremendous thunderstorm. For seven hours the rain descended in torrents, and soon converted the country into a swamp. The road was quite impracticable for artillery, and the order was given that we should not march this morning. However, it cleared up at 11 p.m., and now the sun has risen with every promise of fine weather, and a fresh breeze is blowing which will soon dry the roads.

A flag of truce has just come in, borne by two Mandarins of the fourth class. They announce that the leading member of the war party, Tsai-wan, President of the Imperial Court of Punishment, and Mu-hyn, President of the Council of War, and a member of the clique which has of late directed the government, are coming down to Tien-tsin in order to treat. The order is given that we march at noon, which is the best answer to this announcement. Tsai-wan and Mu-hyn will be met on the line of march, and informed that the Ambassadors refuse to treat before arriving at Tung-chow. At last the fox is unearthed, and it will be our own fault if he be not killed in the open. The Pekinese will see an European force under the walls of their capital, and the leaders of the war party, unable to protect them, suing for mercy. Last night, during the storm, the drivers of the carts hired at Tien-tsin bolted with their horses. This was no doubt, done by order of the government, in hopes of delaying our march. The scheme will not succeed. A number of junks have been seized and manned by sailors, and, as the river runs up to Tung-chow, the baggage will be carried by water instead of by land.

NEW ZEALAND.

The following from a correspondent of the *Sydney Morning Herald* is the latest intelligence of the war in New Zealand:—

On Monday last a strong force of military, blue jackets, and militia, commanded by the general in person, proceeded to attack W. King in his stronghold, inland of Waitara. The force consisted of 40th, 65th, and naval brigade, and numbered upwards of 1400 men. The expedition left town on the afternoon of Monday, and camped at a pah named Mahoetahi, about four miles from the rebels' strongholds. On Friday morning they were joined by Major Nelson's division at Waitara, and at six a.m. attacked two strong pahs named Ngataiparirua and Kairau, which were found untenanted, and which were forthwith destroyed. The troops then proceeded to attack a pah called Hiurangi, situated on the edge of the forest. This was also found evacuated, but while in the act of destroying it a small party of skirmishers of the light company of the 40th, who were advancing towards the bush were fired upon by a party of natives in ambush, killing one man, named Ramsay (a private), and slightly wounding three others. The rebels allowed the skirmishers to advance within a few yards of them, when they delivered their fire from, it is supposed, one hundred muskets, and it is a surprise to every one that our casualties were so few. A skirmish now took place between the troops and the rebels, who kept up a smart fire from the bush, without effects the balls whizzing harmlessly over the heads of the men, but unpleasantly near, several shots falling near the general, who remained within range. The general would not allow the men to follow the enemy into the bush, and after pouring in shell, grape, canister, rockets, &c., the order for retiring was sounded, and the forces, after destroying Hiurangi and another pah near to it, marched to camp at Waitara, and next day to town. I am sorry to say that Ramsay's body was not recovered, but was taken by the rebels with his rifle and ammunition; also an officer's sword, which was dropped when the volley was fired.

A great many opinions have been expressed regarding the general's return with such a force at his command, without attacking King's stronghold (Mataitawa) in the bush, and leaving the field to the enemy. The natives will, no doubt, construe the affair of Tuesday into a victory on their part, for we did not dislodge them from the bush, and we left our dead in their hands. The general may have his own reasons, and it may be best, perhaps, not to find fault.

The enemy were supposed to be about 150 strong, as they were only King's immediate followers, the Waikatos having returned to their homes.

The southern rebels have returned to their pahs on the coast, and to their homes. The majority are prostrated with the influenza.

We have received the following from a correspondent:—"We understand it is rumoured in military circles that the officers commanding cavalry and infantry brigades will, in future, not be placed on the staff of the Army, but that these commands will be held by the senior regimental officers without any additional rank or allowances, and will not be permitted the assistance of paid brigade-major or aides-de-camp. This method of carrying on the duties in the Royal Artillery and Engineers (which are infinitely more numerous and responsible) has been found so satisfactory to the authorities at the War Office, that they have naturally considered it might be adopted in the rest of the Army. This would at any rate save considerable expense, and that prospectively; for it is impossible that the Government can much longer burk the just demands of the Ordnance officers to be placed upon the same level (whatever that may be fixed at) of the other branches of the Service."—[Although the above rumour is in circulation, we believe it is not altogether correct; and that the arrangements which we announced in one of our late issues have been again remodelled. We know that the whole question is under the anxious consideration of the Secretary of State for War, to whom it has been frequently referred by His Royal Highness the Commander-in-Chief, and we believe we shall shortly be able to announce that it has received a solution at his hands which will be satisfactory to all parties. When we hear of young officers appointed to the command of two or three regiments in camp, and gazetted therefrom to the rank of brigadier-general, and know that in the same districts old greyheaded officers, who were at Waterloo and Salamanca before they were born, are still serving as colonels without staff rank, yet in charge of vast public stores, and of still larger bodies of men, we do but give expression to a feeling of common justice, when we hope that the balance of authority will soon be more evenly poised.—ED.]

ALDERSHOT.

Aldershot, Nov. 14th, 1860.

The following orders were issued for the 15th:—

The division will march from camp to-morrow morning, and occupy the defensive position extending from Warren Corner to the north end of Beacon Hill, facing westwards.

The cavalry brigade will patrol the roads leading to the front, on both flanks of the position, as far as Curley Hill Church on the right, and through Crondall village on the left, returning by the road leading from Crondall to Heath House.

The 1st brigade will occupy the ground between the northern extremity of Beacon Hill and Heath House, throwing out a line of picket sentries along the lane, running parallel to the front of the position.

The 3rd brigade will take up its position at Warren Corner, throwing forward advanced pickets a short way down the roads leading to the front and left flank.

The 2nd brigade will be in support in rear of the centre of the position.

The troops to be in position at 11 o'clock.

On a given signal, the firing of two guns, the cavalry will commence its retreat on Warren Corner.

The regimental returns show the following average number of points, and classification per cent. of men at target practice, on the 31st of October, 1860.

Regiments.	Average Points. 1st period.	File firing.	Volley firing.	Skirmishing.	Figure of Merit. Batt.	Figure of Merit. Best Company.	Average Points. 2nd period. 1st cl.	Average Points. 2nd period. 2nd cl.	Average Points. 3rd period. 1st cl.	Final Classification of Men per cent. 3rd cl.	2nd cl.	1st cl.	Marksmen per cent.

* This regiment has counted ricochets.

Captain W. H. Rowland's company, 55th Regiment, shows the highest figure of merit, viz.:—47.81.

We still regret to observe that the Rifle Brigade do not take the position we might naturally expect them to hold; although the late opportune match, instituted by General Russell, C.B., proves that no fault is to be attributed to the short Enfields. We suspect we know where the blot lies; and in our public duty shall not hesitate, if necessary, to hit it. But we trust that the next publication will show that a vast stride ahead has been made both in the firing of this gallant regiment and in that of the 29th as well, where there is certainly much room for improvement.

A Board of Examination assembled in the mess hut of the 45th Regiment at 11 a.m. on Friday next, the 16th instant, for the purpose of examining and reporting upon Lieutenants Beamish and Cosens, of that corps, as to their qualifications for promotion to the superior grade:

Colonel Edwards, C.B., 49th Regiment, President.
Lieutenant-Colonel Hume, 55th Regiment } Members.
Lieut.-Colonel Allen, 2nd Batt., 25th Regt. }

The attention of this board was called to page 72, Queen's Regulations, and to section 31, Extracts from Divisional Orders.

Mr. Jenney, the Assistant Military Storekeeper, being now Treasurer for the Officers' Children's School, all unpaid accounts are to be paid to that officer.—The monthly fees in advance will also be paid to him instead of to Mr. Grant.

PORTSMOUTH.

RIFLE PRACTICE.—The following Return of Target Practice is promulgated for the information of Corps and Depot Battalions in the S.W. District. The regiments practising stand according to merit, as follows:

Number.	Corps.	1st Period. 3rd Class.	File Firing.	Volley Firing.	Skirmishing.	Figure of Merit.	2nd Period. 2nd Class.	3rd Period. 1st Class.
1	1st Batt. 11th Regt. ...	17·43	11·94	10·16	5·56	45·09	8·87	6·45
2	2nd Batt. 19th Regt....	15·10	11·19	9·32	4·58	40·19	8·76	6·36
3	2nd Batt. 11th Regt....	15·15	11·18	8·64	4·77	39·74	8·03	5·86
4	7th Depot Battalion ...	14·09	9·88	7·11	4·10	35·18	8·49	5·73
5	21st Depot Battalion...	14·70	9·07	7·18	4·15	35·10	8·08	5·60
6	36th Company Royal Engineers.....	13·08	10·61	7·28	3·35	34·32	6·57	8·40
7	5th Depot Battalion ...	13·89	8·76	6·83	4·08	33·56	7·93	4·94
8	Bedford Militia	12·46	8·92	6·95	3·53	31·86	7·35	8·48
9	1st Batt. 8th Regt.	10·75	—	—	—	—	—	—

We observe that the final classification of men, and the percentage of marksmen in the different regiments, have been omitted in this return. We should have been glad to have had it, in order to compare the firing with that of other districts; believing that such emulation and publicity is beneficial to the public service.

Lord William Paulet is not going on leave of absence.

Colonel Haines, 8th Regiment, is on leave of absence; and the statement that he was going to command the S.W. district during Lord William Paulet's absence, was, we are informed, incorrect.

The following Order has been issued at Portsmouth by Major-General Lord William Paulet, C.B., commanding in the S. W. district:—"Assistant-Adjutant-General's Office, Portsmouth, November 14, 1860. District Order.—With reference to paragraph 9, page 59, of the Queen's Regulation, the regiments and detachments of corps in this district will march out in the different roads in the vicinity of their quarters in heavy marching order once a week until further orders; with advanced and rear-guards, and flank guards when practicable. The whole distance marched is not to be less than eight miles. Whenever the country offers opportunity, pickets may be placed, and videttes thrown out while the regiment is halted. The advanced guards in open ground may be extended in skirmishing order, and an increased front shown by the regiment, or it may march in a double column of attack; side roads should be patrolled by the men from advanced and rear-guards, when flank guards are not thrown out; and the videttes posted till the main body comes up. Commanding officers will inspect the kits, and see that a full one is carried. A report showing the number of all ranks on parade, the hour of parade and dismissal, the distance marched in and out, to be settled by each corps, so as to arrive at this office on Monday morning of each week. The column of route or plan of march will be sent to the Assistant-Adjutant-General by each regiment, drawn out by such officer as the commanding officer may select; such selection to vary on each different occasion."

MALTA.

Her Majesty's line-of-battle ship London came in on the 1st inst., from Naples, where she was relieved by Her Majesty's ship Queen. The paddlewheel steam-corvette Scourge arrived on the 3rd from Gibraltar, having been relieved by the Argus. The store-ship Supply left on the 3rd instant for Gibraltar and England. Her Majesty's ship Mars arrived on the 4th from Gibraltar and Plymouth. The line-of-battle ship Victor Emmanuel came in on the 6th from Corfu; when she left, the following ships were in that roadstead:—Marlborough, Exmouth, Neptune, Orion, James Watt, and Alacrity, gunboat.

Her Majesty's troop-ship Megæra arrived on the 8th from Gibraltar and Portsmouth with artillerymen for this station. Sir W. Codrington, K.C.B., Governor of Gibraltar, and Colonel Elrington, R.B., arrived here by her; the former on a visit to his brother, Rear Admiral Codrington. She leaves in a few days for Corfu.

Her Majesty's ship Melpomene left on the 8th for Corfu, conveying Admiral Martin's family. She took a mail for the fleet at Corfu.

Captain J. Harvey, lately appointed to the Cressy, left on the 3rd inst. for Naples, to take command of that vessel. The St. Jean d'Acre leaves for Gibraltar on the arrival of Captain Elliot from Naples.

Her Majesty's ship Firefly arrived at Alexandria from Syria on the 2nd inst., and she was expected to remain there for about two months.

Orders have lately been given to have all the batteries in the garrison completely armed, and provided with every requisite for immediate action. All the men off duty have been ordered on fatigue to assist the Royal Artillery in carrying the above orders into effect.

The following are Her Majesty's ships of war at present in this port:—St. Jean d'Acre, London, Cæsar, Mars, and Victor Emmanuel, line-of-battle ships; Megæra, troop ship; Scourge, corvette; Boxer, tender; and Hibernia, receiving ship.

November 10th.

Great activity is now prevailing in the garrison to place everything on a war footing as quickly as possible. On the 3rd, inst. all drills were suspended and the entire garrison told off for fatigue parties to mount every gun and mortar in the fortress with piles for 1000 rounds for each gun in all the batteries. Sir Gaspard le Marchant was most anxious to effect this before, but was stopped by the intense heat of the autumn; and he aims to do it without any expense to the imperial treasury.

The Fleet are taking up their winter quarters; 10 sail of the line at Corfu, with the Commander-in-Chief; 2 sail of the line at Naples, under Admiral Mundy; 2 in rotation, repairing and refitting at Malta; and the St. Jean d'Acre goes to Gibraltar as soon as the weather settles. The Honorable Captain Elliot has joined the ship: and Captain Henry succeeded him in command of the Cressy. Captain Elliot is said to be immensely pleased with his new ship, which is looking first rate, and he has written to that effect to the Commander-in-Chief. Strange to say, no cause whatever can be discovered for the heavy and extraordinary sickness which has prevailed in the ship, and the medical men are all in the dark on the subject; there is but one opinion among them, that there never was a ship in which there was less apparent cause for it. The ship is now 300 short of her effective strength; but that includes 100 sick still on board. If the health of the men does not improve at Gibraltar, she will be ordered home.

The rumoured resignation of Admiral Martin is not believed in the fleet.

Melpomene sailed on the 8th for Corfu, with Mr. Martin and family; Mars on the 9th; and Megæra with supernumeraries to-morrow.

The Cæsar, London, and Victor Emmanuel, are refitting in port. The latter ship has been found to be very defective, and will be a long time in the hands of the dockyard. The cause is supposed to be building her in a hurry and using green wood, which has shrunk to such an extent that you can see daylight in several places between her seams!

The presentation of the freedom of the city of London, with swords, to Lord Clyde and Sir James Outram, which has been delayed principally on account of the visit of the former to the south of France, and the illness of the latter, will take place early in December. The presentation will be followed by a banquet, on a magnificent scale, at the Mansion-house.

FUNERAL OF LORD DUNDONALD.

On Wednesday the mortal remains of the late Lord Dundonald were interred in Westminster Abbey. The procession was formed at Queen's Gate, Kensington, at half-past 11 o'clock, and the funeral *cortége* consisted of a hearse drawn by six horses and eight mourning coaches and four, followed by many of the carriages of the nobility and gentry. In the first carriage were the chief mourners, the new Earl of Dundonald and his three brothers; the second and third carriages contained the pall-bearers, the others being occupied by mourners immediately related to the family. The *cortége* proceeded by Piccadilly, St. James's Street, Pall Mall, and Parliament Street, to the Broad Sanctuary, arriving precisely at 1 o'clock. The doors of the Abbey were opened for the admission of those having tickets shortly before 12 o'clock, and, although the crowds around the entrances were considerable, everything connected with the external and internal arrangements was so complete that no unseemly pressure or confusion took place. The nave, nearly in the centre of which the grave had been dug, was occupied by spectators in mourning, leaving only sufficient space for the movement of the procession from the cloister door round by the grave into the choir. Just as the clock in Poets' Corner struck 1, the body of the deceased, followed by the chief mourners, was met at the cloister entrance by the Very Rev. Dr. Trench, Dean of Westminster, and the Canons—the Rev. Dr. Cureton, the Rev. J. Jennings, and the Rev. W. Nepean; and the Minor Canons—the Rev. Messrs. Haden, Lupton, Jones, and Arnold, preceded by Mr. Owen, High Constable of Westminster, and the Beadsmen belonging to the Abbey. The members of the choir, in their surplices and black scarfs, joined the procession as it entered the Canons' door, proceeding up the south aisle to the west end of the nave, when the organ commenced Croft's magnificent music, "I am the resurrection," &c. The effect of this, as the procession moved up the nave towards the choir, was most solemn and impressive. The pall was borne by Admiral Sir George Seymour, G.C.B., His Excellency the Brazilian Minister, Admiral Grenfell, Admiral Collier, Captain Goldsmith, C.B., Captain Schomberg, Captain Hay, and Captain Nolloth. The body being placed under the organ gallery, and the procession having entered the choir, which was entirely occupied by the chief mourners and friends of the deceased, the Psalms were sung to Purcell's chant in G minor. The Lesson for the burial service was most impressively read by the Senior Canon, the Reverend Mr. Jennings. The Reverend Mr. Haden then announced that the words of the anthem would be found in the 7th verse of the 140th Psalm, and the 6th verse of the 31st Psalm:—"O Lord God, the strength of my heart, Thou hast covered my head in the day of battle. Into thy hands I commend my spirit, for Thou hast redeemed me, O Lord thou God of truth." The anthem—composed for the occasion by Mr. John Goss, composer to Her Majesty, and organist of St. Paul's Cathedral—was most effectively given, and was singularly appropriate, as recognising at once the heroic character of the deceased, and ascribing the glory to Him alone "in whom we live, and move, and have our being," with trust in Him for the future—the sure and certain hope of acceptance through the Redeemer. The anthem being concluded, the procession was again formed, the body being moved from under the organ gallery towards the grave, into which it was lowered, and Croft and Purcell's funeral service was concluded, being rendered most effectively by the choir. The Dean read the prayers in a most impressive manner, after which, and before the Grace, Handel's appropriate anthem, "His body is buried in peace, but his memory shall live for ever," was admirably given. The effect of the whole was most impressive. The musical arrangements were under the superintendence of the Rev. J. C. Haden, the Precentor, and there were present, besides the young gentlemen of the Abbey, the following gentlemen of Her Majesty's Chapel Royal and the Choir of Westminster Abbey:—Messrs. Bradbury, Hobbs, Barnby, Benson, Brownsmith, Machin, Foster, M. Smith, Dawson, and Whitehouse. Mr. Turle presided at the organ, and Mr. Brownsmith conducted the choir.

Among the mourners we observed Lord Brougham, who, after the service was concluded, shook hands with Lord Dundonald, evidently labouring under deep emotion.

The coffin was covered with black superfine cloth and gilt furniture, the lid being ornamented with Earl's coronets and the Grand Cross of the Order of the Bath. It bore the following inscription:—"The Right Hon. Thomas, Earl of Dundonald, G.C.B. Born 14th of December, 1775; died 30th of October, 1860."

Among the carriages of the nobility and gentry which followed the funeral procession was that of Miss Burdett Coutts, daughter of the deceased earl's colleague in the representation of Westminster when he was expelled the House of Commons.

We understand that the banner of the late Earl of Dundonald was, by command of Her Majesty and His Royal Highness the Prince Consort, Great Master of the Order of the Bath, restored to its place in Henry VII.'s Chapel on the day previous to the funeral.

When the preparations for restoring the banner of the deceased hero were in progress, it was discovered that some enthusiastic admirer had, years ago, to all appearances, inscribed on the vacant socket from which the staff had been removed, "Chili, Cochrane, Liberty." It is also a curious fact, that the banner which Her Gracious Majesty had ordered to be restored was the identical one which, when party strife ran high, was so unceremoniously, and we may now say, vindictively, removed from the Abbey. It was some time since discovered, tattered, dusty, and torn, in an obscure dealer's shop by the present Earl of Dundonald, who has the melancholy gratification of preserving it for its original and present position. We may add that not only in naval, but in other circles, it was remarked, with some degree of bitterness, that the Admiralty was not represented on the occasion by any one of its members. The Queen had rendered honour to the departed; the Dean and Chapter of Westminster had testified their admiration of his deeds by granting to his remains a resting-place under their time-honoured roof; and the general public exhibited their strong admiration of his deeds of valour by a rush for tickets of admission to the Abbey, and by other unmistakeable tokens, shown in different ways. We therefore regret, in common with many others, that the surviving friends of the daring and skilful Cochrane should have occasion to feel that a slight had been passed upon the memory of one who in life was looked upon by his countrymen as second only to Nelson. We shall be truly glad to hear that the omission was accidental: but in the meantime we must award praise to Sir George Seymour, and the other naval officers, who by their presence at the solemn ceremony rendered this meed of homage to their illustrious chief. We have reason to believe that Vice-Admiral Sir Houston Stewart, K.C.B., Commander-in-Chief at Devonport, would have been present had he not been detained by the expected arrival of the Prince of Wales.

ROYAL GEOGRAPHICAL SOCIETY.

The opening meeting of this society for the session of 1860-61 was held on Monday evening; Lord Ashburton, President, in the chair.

Among those present were Lord Clyde; Sir R. I. Murchison; Captain Collinson; Colonels Gawler, Hamilton, Gordon, and Ainslie; Captains Nolloth, Ommanney, Sherard Osborn, and Bedford, R.N., and W. H. Walker, Mangles, and Clarke; Lord Alfred Churchill; Lord Keane; Sir Thomas Fremantle; Major Cooke; Mr. Crawfurd; Mr. J. S. Roe, the Surveyor-General, and Mr. F. Gregory, Assistant Surveyor of Western Australia; Mr. Cave, M.P.; Mr. Gladstone; Drs. Hodgkin, Davis, Shea, Dobie, Kinkel, and Bennett; Mr. Charles White; Mr. Arrowsmith; Mr. Bentley; Mr. Muir; Mr. Osborne Smith; Mr. Gould; Mr. Duncan Macgregor; Mr. Silver; Mr. R. T. Cocks; Mr. Lockhart; Mr. Hogg, &c. &c.

Presentations.—Dr. Thomas Fox; Dr. A. D. White; T. Longridge Gooch; R. Biddulph Martin; J. Septimus Roe; and Thomas Wilson, Esqrs., were presented upon their election.

Elections.—Captain J. Grantham, R.E.; Robert Lush, Q.C.; James Alfred Lockwood, and Henry Cartwright, Esqrs., were elected Fellows.

Proposals.—The Rev. S. J. Bernays; the Earl of Dunmore; Major J. B. Edwards, Beng. Eng.; Lieutenant A. Giffard Glascott, R.N.; Colonels W. L. Grant, W. R. Haliday; His Excellency Lieut.-Governor R. W. Keate; Lieut.-Colonel W. K. Loyd; Rev. R. Comyn Lumsden; Captain Sir F. Leopold M'Clintock, R.N.; F. Perkins, Esq., Mayor of Southampton; Captain R. Lambert Playfair; Rev. G. Richards, D.D.; Lieut.-Colonel L. Shadwell, C.B.; Consul Don Ramon de Silva Ferro; Colonel Sir Anthony Sterling, K.C.B., Assistant Commissary-General; E. Strickland; T. S. Begbie; H. W. Birch; Amos Cave; J. Rodney Croskey; T. Devine, N. Gould, B. Handley, A. Jessop, Esqrs.; W. Richardson, M.D.; J. Sherin, J. Coysgame Sim, J. W. Sullivan, J. Irwine Whitty, D.C.L., LL.D., Esqrs., were proposed as candidates for election.

Accessions.—The accessions to the Library and Map-rooms since the former meeting were numerous, and the following were among the more important:—U. S. Reports of Explorations and Surveys; Marco Polo, edition by W. Marsden, presented by Mrs. Leake; Raleigh's "History of the World;" Ouseley's "Travels in the East;" Thorton's "British India;" Erman's "Siberia;" Tennent's "Ceylon;" Bowring's "Philippine Islands;" Brown's "Sequel to the N.W. Passage;" Swart's "Journaal van Tasman's Reis," and map; Black's, Blackie's, the Dispatch, Keith Johnston, and Van Carnbée's Atlases; sheets of the Government Map of Saxony; of the U. S. Map of Nebraska and Dakota; and Maps of Otago by J. T. Thomson, &c.

Exhibitions.—Colton's Map of North America and General Atlas, with descriptions, published in the United States; and a portrait of Baron Alexander Humboldt, were exhibited at the meeting, and greatly admired.

The minutes of the former meeting having bee confirmed, the chairman said that a letter would be read from Captain Burton by the Secretary. It would be a matter of pleasure to all present to know that Captain Burton was in good health. Dr. Shaw then read the following characteristic letter from that officer:—"Salt Lake City, Utah Territory, September 7, 1860. My dear Shaw,—You'll see my whereabout by the envelope. I reached this place about a week ago, and am living in the odour of sanctity, a pretty strong one it is too—prophets, apostles, '*et hoc genus omne.*' In about another week I expect to start for Carson Valley and San Francisco. The road is full of Indians and other scoundrels; but I've had my hair cropped so short that my scalp is not worth having. I hope to be in San Francisco in October and in England somewhere in November. Can you put my whereabouts in some paper or other, and thus save me the bother of writing to all my friends. Mind, I'm travelling for my health, which has suffered in Africa, enjoying the pure air of the prairies, and expecting to return in a state of renovation, and perfectly ready to leave a card upon Muata Yanvo, or any tyrant of that kind.—Meanwhile, ever yours, R. F. Burton."

The Papers read were:—1. *Proposed Exploration in North-Western Australia under* Mr. F. Gregory, F.R.G.S.—Dr. Shaw read a copy of a letter which, by the direction of the Council, he had written to the Colonial Office, advocating this expedition, which was intended to connect the travels of Mr. A. C. Gregory from the north on the Victoria, and those of Mr. F. T. Gregory from the west coast—a space of between 600 and 700 miles. The letter pointed out the advantages that this country and the colonies might hope to derive from the opening up of these parts, in the production of wool, cotton, rice, &c. Towards the expenses of this expedition Mr. Chichester Fortescue, the Under-Secretary for the Colonies, had informed the Council that Government would consent to advance 2000*l.*, provided that an equal sum be contributed by the Government of Western Australia. The exploration is to extend from the FitzRoy river southwards. Mr. Roe and Mr. Burgess, belonging as they did to the colony of Western Australia, thought that the proposition of the Society included too great an extent of territory, and would have preferred that the exploration should, in the first place, have commenced from Nicol Bay, to which Sir Roderick Murchison explained that the exact limits of the exploration could not at present be strictly defined, but that Mr. Gregory, the leader, would, on his arrival at Western Australia, place himself in communication with the authorities there, and to a certain extent, be guided by their advice and wishes. It was at the same time highly desirable that an Expedition, one-half of the expenses of which was to be paid by the parent country, should not limit its proceedings to the mere outline of the colony. Colonel Gawler (late Governor of South Australia) next combated the opinions entertained by Mr. Jukes and others respecting the totally sterile character of Central Australia, to which a great expedition under Mr. Burke had lately started from Victoria attended by about twenty camels. This expedition was to rendezvous at Cooper Creek, and endeavour to cross the entire Continent. The President then mentioned that Sir George Bowen, Governor of Queensland, had communicated through the Colonial Office the discovery, by Mr. Dalrymple, of the mouth of the Burdekin River.

Mr. Galton read letters from Captain Speke, in command of the East African Expedition, conveying the gratifying intelligence that, through the kind assistance of Sir George Grey, Governor at the Cape of Good Hope, the party had been strengthened by the accession of a guard of twelve Hottentot soldiers and 300*l.* Admiral Keppel had conveyed the Expedition in Her Majesty's steamer Brisk to Zanzibar.

An interesting despatch from Sir George Grey on Mr. Chapman's and Mr. Andersson's late journeys in South Africa having been read,

The President finally announced that subscriptions would be received at the Royal Geographical Society, 15, Whitehall Place, in aid of Consul Petherick's Expedition, to co-operate with that under Captains Speke and Grant, *viâ* Khartûm and the Upper Nile.

The meeting then adjourned to Monday, November 26th.

NEWS FROM THE SEAT OF WAR IN ITALY.

[From our own Correspondent.]

Naples, 10th November.—The king has come at last, and even now rather before he was wished for; this, however, must not be attributed to any want of loyalty on the part of the people of these kingdoms, nor any diminution of anxiety on the part of the inhabitants of the beautiful city of Naples, but solely to the fact that the municipal authorities were behind-hand in the preparations for his reception. A month ago we heard that 20,000*l.* had been voted for the purpose of building triumphal arches, illuminating, &c.; and had anything at all approaching the diligence of the last few days been employed, the city would have had a different appearance to that it presented on the morning of the 7th instant. That his arrival was before he was expected, could hardly be urged as an excuse, seeing that he has been so long expected; and the deputation that went to retard the king's entry, must have been almost without reasonable excuse, or, at all events, unable to "show cause" of delay; and the consequence was, Victor Emmanuel, to whose object the illumination was the least part of the play, declared his intention of entering Naples the next morning. The receipt of this news had a galvanic effect upon the municipality, and thence communicating to the architects, scene-painters, plaster-moulders, carvers and gilders, lamp makers, *et hoc genus omne*, in consequence of the urgency of the circumstances, the utmost diligence was at last brought to bear upon the arches, or rather as it was in some cases upon the poles of which the arches were to be formed. To add to the *triste* effect produced by so many unfurnished constructions, the morning was wet; and the day of the king's arrival was preceded by fine weather, and it was followed by the most delightful day that Naples has seen for a long time. Now, when it rains heavily, enthusiasm, at least when exposed in the open air, becomes proverbially damp, and it requires a very considerable excitement to keep a crowd of people under a heavy rain for twelve hours; and as for cheering, of course the king was cheered; but it was by no means as enthusiastic a reception as that which greeted Garibaldi when, just two months before, he entered Naples. This is partly owing to the presence of a king in Naples being no novelty, and partly owing to the fact that Garibaldi is far more the idol of the people than Victor Emmanuel will become. Had it been a question of whether of the twain was to be king, there would be a vast majority for Garibaldi; he is a man of the people, knows them well, and is loved by them; besides, Garibaldi has delivered them, has performed prodigies of valour, has had miraculous, or almost miraculous escapes, seems to be specially protected by Heaven, possesses the rare gift of attracting the devoted attachment of all his followers to himself personally, is altogether unselfish, of simple life, easy of access, and, in fine, his character is formed of the very ingredients that would naturally present themselves as the component elements in the formation of a hero as near perfection as mortal could be. Now, on the other side, there was the fact that Victor Emmanuel was a king, and that used to outweigh much; but the Neapolitans have so lately dispensed with their allegiance to Francis II., the mere fact of any one being a king might not be expected to overcome them at once, nor are they likely to be impressed with any conviction that "such divinity doth hedge a king." Fortunately, Garibaldi, from the first, by employing the name of Victor Emmanuel, prevented the possibility of contemplating any other as the future king. Every conquest that was made in Sicily was solemnly taken possession of in the name of Victor Emmanuel; every garrison that was summoned in Calabria or northwards was called to surrender to the victorious arms of Victor Emmanuel; and the consequence was, that he was practically proclaimed throughout the whole kingdom, from south to north, before ever the note was taken; and, as all this was by Garibaldi's doing, it is a most surprising thing that anyone could for a moment doubt the singleness of purpose and unwavering loyalty of one who is perfectly unmoved by motives of personal ambition. Garibaldi was received as a deliverer; young and old, rich and poor, all celebrated his arrival, and the mob shouted itself hoarse to the tune of Viva Garibaldi, Viva L'Italia, and became drunk, not with strong drink, but with excitement. The entry of the king was opposed by a pelting rain, wet, sloppy streets, and the dripping garments of all who were not the fortunate possessors of umbrellas; those who were stood the wetting better, and so were able to await the royal *cortége* at different points of the route programmed. The guns from

Digitized by Google

all the forts began firing at ten o'clock on Wednesday morning, and thus gave notice of the king's arrival; and of course great crowds determined to brave the fury of the rain, rushed out to meet the king; and one cannot help thinking that Scott's words of the king—

"With like acclaim they would him greet,
Could he but hurl me from my seat,"

might be uttered by Victor Emmanuel respecting Francis II. I do not mean to say that there is the slightest present probability of the return of the Bourbons, or perhaps at any future time. But stranger things than the restoration of the royal family have occurred, and restoration itself has been brought about sufficiently often to at all events establish its possibility. There is little sympathy for the late dynasty, and even the children sing popular songs, celebrating the fall of the "Infamia dei Borboni."

I am not aware of any incident connected with the arrival of the king worthy of note, except that on entering the cathedral where, as part of the published programme, divine service was to be performed, the king, who was closely followed by Garibaldi, found himself solus in the crowd, and on looking back for his faithful follower, discovered him surrounded by Neapolitan ladies of the highest rank, all of whom were kissing the illustrious ex-dictator in turn—a part of the proceedings that took the king by surprise, as it had certainly not been mentioned in the programme, and gave his majesty as good an idea of the estimation in which Garibaldi is held by the higher classes as the reiterated cries of "Viva Garibaldi!" alternating with those of "Viva Vittorio Emmanuele!" proved the attachment of the mob in general. On arriving at the Palazzo Reale—which but two short months ago was tenanted by Francesco Secondo—the crowd, the cheering, &c., as well as the rain, were redoubled, and the king, after receiving deputations, &c., was forced to appear on one of the balconies and bow his acknowledgments to the people ere they dispersed. "The solemn act," as it is called, of annexation, has been performed with all due ceremonial, and the proclamation published by the king almost immediately after his arrival has given great satisfaction: it runs as follows:—"Universal suffrage gives me the sovereign power of these noble provinces. I accept that high decree of the national will, not through ambition of dominion, but through the conscience of an Italian. My duties, and those of all Italians are increased. Now, more than ever, are sincere concord and constant abnegation necessary. All parties should bow devotedly to the Majesty of Italy which God raises. Here we are bound to inaugurate a government that will give a guarantee of living free to the people, and of a severe probity to the public opinion. I build upon the support of all honest men. Where power is curbed by the law and liberty guarded, there the government can benefit the public good in proportion as the people are virtuous. We ought to show Europe that if the irresistible force of events overcomes conventionalities founded during the centuries of Italy's misfortune, we know how to restore in a united nation the dominion of those immutable principles, without which every society is weak, every authority exposed to uncertainty." As the proclamation, of which the above is a literal translation, alludes to the national vote, I may as well insert here that the result of the voting in Naples was as follows:—Voters, 1,313,376; of these 1,303,064 were for SI, and 10,312 for NO. It needs scarcely to be mentioned that there were many who did not vote at all, through fear or some other motive; and I have no doubt had the vote been by ballot, there would have been a great many more for NO, but the majority would, in any case, have been triumphantly on the affirmative side. Meanwhile, before the arrival of the king, the public were very plainly given to understand that what is deemed a proper respect for the sovereign will be exacted from the press when making mention of him, as may be learned from the rather startling appearance of a decree announcing the fact, that a newly-started journal, a sort of Naples *Punch*, but called the *Tower of Babel*, has been suppressed, as has also another yclept *I Tuoni*. The decree of suppression emanates from the Minister of the Interior and Police, Raffaele Conforti, and runs as follows:—"Considering that the journal entitled *La Torre di Babele* offends the moral sense of the country by caricatures which refer to those whose persons are inviolable: in virtue of the extraordinary powers conferred by the Dictatorship, we ordain what follows—That the aforesaid journal is suppressed. Considering that the journal entitled *I Tuoni* is an impudent and calumniating journal: in virtue of the powers, &c., it is also suppressed." This act of Conforti has produced a considerable ferment; and whilst the same journals have appeared under other names, the Naples press has been busy canvassing the propriety of the suppression. The fact is, that liberty of the press is so new here that it can scarcely be used without some abuse appearing; and the night of slavery through which this kingdom has passed produces its reaction in an excess of liberty. The most equitable article upon the subject I have as yet seen was a leader in the *Nationale*, and even this draws a line of distinction that would not suit our English *Punch*—namely, that the Ministers are fair game for a satirist and for caricature, seeing that they are but the instruments by means of which the laws are administered; but that the sovereign, being the fount of law, if his person be held up to ridicule, it is the law, and not its mode of administration, that is thereby ridiculed.

On Sunday, the 4th inst, a most interesting ceremony—the presentation of the medals for the first expedition—took place here at the hour of 8 a.m.; the place chosen was the Piazza di S. Francesco di Paola, and notwithstanding the early hour a goodly crowd assembled to witness the scene. The medals in question were struck by the municipality of Palermo, and forwarded to the government here for distribution. Garibaldi distributed them in person to his brave companions, pronouncing at the same time a few words of praise and admiration for those who had shared the danger and borne such a prominent part in events that are now inscribed on the scroll of history. The medal bears on the front the coat of arms of the city of Palermo, encircled by the words Marsala, Calatafimi, Palermo. On the reverse, the following inscription is borne: "To the valorous followers of Garibaldi from the municipality of Palermo liberated." After the distribution of the medals commemorative of the landing at Marsala, another presentation took place on the part of the ladies of Naples, who have been for some time since preparing a banner for Garibaldi, and selected this auspicious day for its presentation. The deputation consisted of the Princess Pignatelli Labonia, and the Ladies Turchi, Giunti, and Giudice. The banner is of tricolor satin, and embroidered in gold; it represents on the one side the lion of St. Mark chained, having on the left the malign genius of Italy. In the distance is the Queen of the Adriatic with a rainbow crown, and on the right stands the good genius of Italy, beckoning to Garibaldi with an air at once invoking him, and expressive of gratitude. In the angles are the names of the localities that record the glorious proofs of his valour and patriotism. On the reverse side of the flag is a shield with the cross of Savoy. The Dictator expressed his admiration of the design and execution of the splendid banner which was presented to him, as well as his gratitude to the committee, to be by them presented to all the ladies concerned in the preparation of a gift so appropriate and beautiful.

Now that the king had come, Garibaldi, after having received him with all honour, determined to quit Naples, seeing that his work, at all events for this year, was at an end. Besides which, magnanimous to the last, he is said to have done so in order not to divide the public favour with his king, knowing that his presence would have that effect. Garibaldi's acts are their own best eulogy; he has been consistent throughout, and nothing so becomes him as the quiet manner in which he so gracefully retired from the scene to resume in the cultivation of his farm the life he pursued before he was called by Heaven, as he believed, to the work of delivering Sicily and Southern Italy. Before quitting Naples he took leave of the king, and their parting was a most affectionate one; but titles, cordons, crosses, all were respectfully declined, and after borrowing 80*l.* from a merchant to pay his private debts, hotel bills, &c., the greatest man of modern times took leave of the generals who had accompanied him through the whole campaign, and finally bidding adieu to his more intimate friends, he retired to rest. On the morrow (the 9th inst.) at 6 a.m., he went on board Her Majesty's ship Hannibal to take leave of the British Admiral, and was received in the same hearty manner in which he was ever greeted on board an English man-of-war. Such of the officers as happened to be up at that early hour had the honour of a personal farewell: and then departing as he came, in a small merchant-ship's boat, pulled by four seamen, he repaired on board the Washington, and shortly after steamed out of the Bay of Naples in the most unostentatious manner. Seven officers of his personal staff accompany him to his residence in the little island of Caprera. The events of this week have completely eclipsed Capua; but as I have made a personal inspection of it, I shall duly report it next mail. The letter of Lord John Russell has been translated into all the Naples papers, and has increased the popularity of the English immensely, and stands in favourable contrast with the "dispute epistolary" of some English officers, who, having printed their letters, are resolved to make their quarrel public.

WARRANT OFFICERS.—The subjoined circular has just been issued. There is not much in it beyond the fact that it proves that the attention of the Lords of the Admiralty has been directed to the position of that very useful and important class of men, the Warrant Officers of the Navy:—"Admiralty, 5th November, 1860.—(Rank of Warrant Officers.)—My Lords Commissioners of the Admiralty have been pleased, under the sanction of her Majesty's Order in Council of the 26th ultimo, to establish the following regulations, respecting the rank and classification of the Warrant Officers of the Royal Navy: 1. Gunners, boatswains, and carpenters shall in future take rank according to the dates of their appointment to the class to which they shall at any time belong; and not according to the dates of their first warrants. 2. Advancement from one class to another shall be considered as a promotion. 3. These regulations do not alter the present relative rank and precedence of gunners, boatswains, and carpenters.—By command of their Lordships, C. Paget."

The flag-officer's good service pension, vacant by the death of Admiral Sir Charles Napier, K.C.B., has been conferred on Admiral John Ayscough.

Last week we quoted a paragraph from the *Mechanics' Magazine*, in which it was stated that every Armstrong gun hitherto manufactured, had cost the country the "amazing sum of 2000*l.*" Sir William Armstrong, in a letter to the *Times*, corrects this astounding estimate, and asserts that his 12-pounder can be supplied to the Government "at two-thirds of the price of the old 12-pounder brass guns, the cost of which is 170*l.*" Sir William adds that the difficulties which formerly beset the construction of the larger descriptions of his canon have been surmounted, and that no impediment now stands in the way of their rapid production.

NEW BARRACKS.—In the year 1855, when Lord Panmure was Secretary of State for War, an official committee was appointed to report on "The barrack accommodation for the Army," and the first great experiment of improvement arising from their labours is now about taking place in London for the benefit of "the Guards." The committee of 1855, in order to give practical effect to their conclusions, suggested that Government should invite designs founded upon recommendations and evidence accompanying their report. Accordingly, numerous designs were submitted by military and civil architects, and the first prize for infantry barracks was awarded to Mr. George Morgan, and that for cavalry barracks to Messrs Thomas and Digby Wyatt, all fellows of the Royal Institute of British Architects. The cavalry barracks are to be erected at Nottingham, and the infantry barracks have just been commenced on land adjoining the grounds of Chelsea Hospital, and are intended for the Guards. The site embraces between eleven and twelve acres, and is separated from Chelsea Hospital on the north-eastern side by the new road leading to Battersea new bridge to which road it has a considerable frontage. It is bounded on the north-west by Grosvenor-row, and on the south-east by the Commercial Road.

INDIA.—We are glad to notice, in General Orders, the fact that two non-commissioned officers, Acting Sergeant Henry Blockman, of the 38th Foot, and Lance-Corporal W. Shakespear, of the 8th Foot, have passed the examination in Hindustanee; the former the test for military interpreters.

Obituary.

The colonelcy of the 13th Light Dragoons has become vacant by the demise of General the Hon. Edward Pyndar Lygon, C.B. The gallant officer expired on Sunday night, at his residence, in Upper Brook Street, Grosvenor Square, after a very short illness, having only taken to his bed on Saturday. The hon. general was the third son of William first Earl Beauchamp, and was brother of the present peer. He entered the army as sub-lieutenant in the 2nd Life Guards, and served with that regiment in the Peninsula, during the campaigns 1813 and 1814, having joined the army in Spain in November, 1812. He was present at the battle of Vittoria, and served with his regiment to the close of the war. In 1815 he accompanied the army to the Netherlands, and as major and lieutenant-colonel had the honour to command the 2nd Life Guards at Waterloo, where he eminently distinguished himself. For his services on that memorable occasion he was made a Commander of the Order of the Bath; he was also made a Knight of the Order of St. Vladimir of Russia. For many years he commanded the 2nd Life Guards, and only relinquished that command when he obtained promotion of major-general. The deceased officer held the appointment of inspecting-general of cavalry for some years. He had received the silver war medal and one clasp for service in the Peninsula. He was appointed colonel of the 13th Light Dragoons in January, 1845; and his commissions bore date as follows:—Sub-lieutenant, June 1, 1803; lieutenant, November 7, 1805; captain, February 15, 1808; lieutenant-colonel, April 27, 1815; colonel, April 27, 1822; major-general, January 10, 1837; lieutenant-general, November 9, 1846; and general, June 20, 1854.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BLUNT—November 9, at Lytchett Matravers, the wife of Francis T. Blunt, Esq., 12th Lancers, of a daughter.
BRIGSTOCKE—September 16, at Simla, India, the wife of Captain Brigstocke, of H.M.'s 51st Regiment, of a daughter.
CARNEGY—September 20, at Mussooree, the wife of Patrick Carnegy, Esq., Deputy-Commissioner of Lucknow, of a son.
GILPIN—October 31, at Halifax, Nova Scotia, the wife of Captain B. T. Gilpin, 62nd Regiment, of a son and heir.
HAMILTON—November 14, at Southampton, the wife of Captain Hamilton, H.M.'s 98th Regiment, of a son.
HOPE—September 28, at Secunderabad, Madras, the wife of Captain Hope, 1st Royals, of a son.
JOHNSTONE—October 30, at Greenhithe, the wife of Deputy-Assistant Commissary-General Johnstone, of a daughter.
MACKENZIE—November 5, at Newport, the wife of Captain C. G. Mackenzie, 28th Regiment, Assistant Royal Engineer, of a son.
MACFARLAN—September 23, at Meerut, the wife of Lieutenant D. MacFarlan, Bengal Horse Artillery, of a daughter.
TAYLOR—November 13, at Plumstead, Kent, the wife of Captain Markham Lefer Taylor, Royal Artillery, of a son.
THOMAS—November 8, at Chatham, the wife of F. W. Thomas, Esq., Lieutenant and Adjutant Royal Marines Light Infantry, of a daughter.
THORNHILL—November 13, at Rushton, Northamptonshire, the wife of W. C. Clarke Thornhill, Esq., of a son.
WATSON—September 25, at Hindoo Rao's, Delhi, the wife of Lieutenant John Watson, 4th Sikh Cavalry, of a son, prematurely.
YATES—At Perleppe, in Hungary, Wilhelmine, the wife of Frederick Yates, Esq., Major in the Austrian 1st Regiment of Light Dragoons, of a daughter.

MARRIAGES.

DAWSON—GORING—November 13, at St. Bartholomew's Church, Sydenham, by the Rev. D. M. Alexander, M.A., assisted by the Rev. Charles English, M.A., incumbent, William Walker, of Her Majesty's Indian Navy, eldest son of Alexander Dawson, Esq., 24, Throgmorton Street, to Kate, third daughter of the late Robert Goring, Esq.
GILLUM—BELL—November 13, at Christchurch, Albany Street, by the Rev. Sydney Gillum, B.A., Major William James Gillum, late of the Royal Regiment, to Leonora Georgiana, third daughter of William Bell, Esq., of No. 36, Woburn Place, Russell Square.
MAYNARD—TREVOR-ROPER—November 8, at the parish church, Hope, by the Rev. J. Watson, M.A., brother-in-law of the bride, assisted by the Rev. J. Williams, M.A., vicar, Lieut.-Colonel E. G. Maynard, 88 Connaught Rangers, to Gertrude, third daughter of C. B. Trevor-Roper, Esq., of Plas Teg Park, Flintshire.
SCOTT—DAVIDSON—October 5, at Hydrabad, East Indies, Allan N. Scott, Esq., Captain H.M.'s Madras Artillery, to Maria, daughter of the late H. Davidson, Esq., of Cantray, Inverness-shire.
STOLL—VON SCHRAISHOUN—November 6, at the British Legation, at Stuttgart, William Gordon Stoll, Esq., H.M.'s Madras Army, to Anna Emille, daughter of Major Von Schraishoun, Wurtemburg Army.
WAYMOUTH—CARPENTER—September 13, at Secunderabad, Deccan, Charles Waymouth, Captain 17th Lancers, to Annie Frances, eldest daughter of Major-General Carpenter, Madras Army.

DEATHS.

BABINGTON—November 11, at Luscar House, Fifeshire, Adeline, only daughter of Lieut.-Colonel Babington, late 7th Hussars.
BELL—August 25, from congestion of the brain, caused by sunstroke, at Fort Macao, China, Lieutenant Alexander Bell, of H.M.'s 3rd Regiment Bombay Native Infantry, son of the late Alexander Bell, Esq., Bombay Civil Service, aged 30.
DAVIS—November 10, at Windsor, George H. J. Davis, only surviving son of the late Lieut.-Colonel G. Lenox Davis, C.B., 9th Regiment, aged 21.
DE BLAQUIERE—October 23, at Toronto, Canada, the Hon. Peter Boyle De Blaquiere.
DRESING—November 8, at Dover, Rosa Isabella Douglas, the beloved wife of Captain Charles Dresing, aged 30.
EASTON—November 2, three days after his return from Bermuda, John Henry Ward Easton, of H.M.'s War Office, aged 21.
EVANS—November 12, Anne Rosilin Eizabeth, widow of the late Kingsmill Evans, Esq., of the Hill Court, Herefordshire, eldest daughter of the late Colonel Thoroton, of Flintham Hall, Nottinghamshire, aged 75.
GIBBONS—October 21, at Whitneyville, United States, William Gibbons, Esq., Retired Commander R.N., son of the late Sir William Gibbons, Bart., aged 85.

FATIGUE CAPS.—A new pattern fatigue cap, for the use of the gunners of the Royal Artillery, has been forwarded to the different districts for trial, and, the manner of its construction being ingenious and economical, merits a word of explanation. When the tunics have been in wear for twelve months, and are replaced by new ones, they are sent to the tailor's shop to be converted into fatigue jackets. The piece of the skirt or tail which is thus cut off has hitherto been useless, but has now been converted into a cap, which, to all appearance, is equally as good as the one furnished by the contractors. After a few months' time, should it be found worth the expense of making up, directions will be given to the master tailors to adopt this plan, so simple and inexpensive. If it succeeds, we hope the idea will be followed in the other branches of the Service, as we do not see why a red cap should not be as becoming as a black or blue. Economy to a soldier's pocket is of more consequence than colour.

ADVANTAGES OF ASSURING WITH THIS COMPANY.

The premiums are on the lowest scale consistent with security.

The Assured are protected by an ample subscribed capital—an assurance fund of 480,000*l*., invested on mortgage, and in the Government Stocks—and an income of 85,000*l*. a year.

Premiums to Assure £100.				Whole Term.	
Age.	One Year.	Seven Years.	With Profits.	Without Profits.
20	£0 17 8	£0 19 9	£1 15 10	£1 11 10
30	1 1 3	1 2 7	2 5 5	2 0 7
40	1 5 0	1 6 9	3 0 7	2 14 10
50	1 14 1	1 19 10	4 6 8	4 0 11
60	3 2 4	3 17 0	6 12 9	6 0 10

MUTUAL BRANCH.

Assurers on the Bonus system are entitled, after five years, to participate in nine-tenths, or 90 per cent., of the profits.

The profit assigned to each policy can be added to the sum assured, applied in reduction of the annual premium, or be received in cash.

At the first division a return of 20 per cent. in cash on the premiums paid was declared; this will allow a reversionary increase, varying, according to age, from 66 to 28 per cent. on the premiums, or from 5 to 15 per cent. on the sum assured.

One-half of the "Whole Term" Premium may remain on credit for seven years, or one-third of the premium may remain for life as a debt upon the policy at 5 per cent., or may be paid off at any time without notice.

Claims paid in one month after proofs have been approved.

Loans upon approved security.

No charge for Policy Stamps.

Medical Attendants paid for their reports.

Persons may, in time of peace, proceed to or reside in any part of Europe or British North America without extra charge.

No extra charge for the Militia, Volunteer Rifles, or Artillery Corps on Home Service.

The Medical Officers attend every day, at a quarter before Two o'clock. E. BATES, Resident Director.

ESTABLISHED 1838.

LOST, on or about a Month ago, from Williams's Army and Navy Cigar Divan, High Street, Sandgate, near Shorncliff Camp, a DARK ROUGH HAZEL or CRAB STICK, belonging to one of the Artillery Officers, and supposed to have been taken away in mistake by some other Officer belonging to the Camp. Whoever will return the same to the above-named Proprietor, it will be most thankfully received.

TUNBRIDGE WELLS.—TO BE LET, fully and well-furnished, for six months, a delightfully situate DETACHED RESIDENCE, adapted in every respect for a first-class family. It has seven bedrooms, three dressing-rooms, box-room, spacious and well-proportioned drawing and dining-rooms, library, study, housekeeper's room, servants' hall, with man's bed, capital kitchen, and offices; stabling for three horses, double coach-house, and harness-room, in an enclosed yard; nicely arranged gardens of about an acre, which will be kept in order by the proprietor. The house stands high and dry, and commands some of the most beautiful views in the neighbourhood. Particulars of Mr. SAWYER, House Agent, Tunbridge Wells; and of Messrs. DEBENHAM & TEWSON, 80, Cheapside, London, E.C. (4854).

HUNTERS AND CHARGERS, &c., &c.—TALLY HO!—Gentlemen requiring MOUNTS for the coming season will study their pecuniary and personal safety by sending address and postage for October Number of ROYAL BRITISH & FOREIGN HORSE REGISTER, in which will be found advertised some noted flyers in the stables of noblemen and private gentlemen declining hunting, &c. Wanted for sale immediately, sound horses of all kinds. Many applications for young, well-bred horses, likely to make hunters. Address, the Secretary, Horse Register, 70, Berners Street, Oxford Street, London, W. Some broke chargers and young high-bred horses, suited for officers' chargers, on sale, 50 per cent. under ordinary prices.

J. B. JOHNSTONE, MILITARY TAILOR & OUTFITTER, 34, SACKVILLE STREET, LONDON, W. AND 50, DAWSON STREET, DUBLIN,

Respectfully informs his Patrons that he has transferred the management of the Dublin business to his Son, from whom the most careful attention to commands may be expected; and J. B. J. takes the present opportunity to return very earnest thanks for the favours he has hitherto received. Books, measures, and patterns having been carefully retained, orders (by letter or otherwise) can be executed in London or Dublin; and all accounts due to the house are payable to J. B. JOHNSTONE, at either address:

34, SACKVILLE STREET, LONDON, W. OR, 50, DAWSON STREET, DUBLIN.

PLEASURE AND PROFIT. Both may be derived from a purchase at E. MOSES & SON'S Establishments, which are furnished with an immense stock of every description of Attire for Adults and Juveniles of every grade of society.

Comfort, Style, Durability, and Neatness are combined with a Lowness of Price which could only be remunerative on such an extensive sale as no other house in the trade can boast of.

The Departments to which E. MOSES & SON invite particular attention are the READY-MADE and BESPOKE CLOTHING, the HOSIERY and DRAPERY, HAT and CAP, and BOOT and SHOE, and GENERAL OUTFITTING Departments.

The BESPOKE TAILORING DEPARTMENT has been replenished with a splendid collection of the newest and choicest home and foreign manufactures. Accuracy of Fit, Elegance of Style, and Promptitude in the Execution of Orders, have gained for this Department a large and daily increasing connection.

N.B. Should any article not be approved of, it will be exchanged, or the money returned.

E. MOSES & SON'S rules for self-measurement and list of prices, with pamphlet on the Ready-made Clothing System (Past and Present) gratis on application, or post free.

The Establishments are closed every Friday Evening at sunset until Saturday sunset, when business is resumed until eleven o'clock.

E. MOSES AND SON, MERCHANT TAILORS, WOOLLEN DRAPERS, HATTERS, HOSIERS, BOOT AND SHOE MAKERS, AND GENERAL OUTFITTERS.

LONDON HOUSES:

Corner of Minories and Aldgate.
New Oxford Street, corner of Hart Street.
Corner of Tottenham Court Road and Euston Road.

COUNTRY ESTABLISHMENTS:

Thornton's Buildings, Bridge St., Bradford, Yorkshire.
Fargate, Sheffield.

SPECIAL NOTICE.—E. MOSES & SON take this opportunity of reminding their Friends and the Public that their new Branch Establishment at the Corner of Tottenham Court Road and Euston Road, was opened on the 6th instant.

THE MOUNTED RIFLE CORPS BOOT. Can be worn outside the trowsers in wet weather, entirely superseding the trouble and inconvenience of leggings, forming, in fact, the most complete military boot extant. Suitable for a knock-about boot in the country, &c. Price 38*s*. Shooting and Hunting Boots in every design and material.

KING & SOTHERS, 21, Piccadilly, W.

RIFLE VOLUNTEERS AND THE PUBLIC.—The E. I. O. WATERPROOF will make Boots pleasurably soft for Summer wear, healthily impervious to wet, and improve the polish. Price 6*d*., 1*s*., and 1*s*. 6*d*. E. I. O. Royal Crimean Waterproof Company, 124, Aldersgate St., E.C. Knickerbockers, Capes, and Overalls.

AGENT WANTED.—WANTED, a PARTY having a connexion with Military Clothiers and Army Contractors, to SELL on COMMISSION goods in common use by them. Apply by letter, addressed S. R., Office of this Paper.—November 1, 1860.

WANTED, LEFT-OFF CLOTHES FOR AUSTRALIA.—MR. and MRS. JOHN ISAACS, 319 and 320, Strand, W.C. (opposite Somerset House), continue to give the highest price in cash for Ladies', Gentlemen's, and Children's Clothes, Regimentals, Underclothing, Boots, Books, Jewellery, and all Miscellaneous Property. Letters attended to. Parcels sent from the country, either large or small, the utmost value returned by post office order the same day. Reference, London and Westminster Bank.

SPORTSMEN AND GENTLEMEN OF THE ARMY AND NAVY.—S. & B. SOLOMONS, Opticians, 39, Albemarle Street, Piccadilly, W., opposite the York Hotel. Portability combined with great power in FIELD, RACECOURSE, OPERA, and general out-door day and night powerful waistcoat-pocket PERSPECTIVE GLASSES, weighing only 4 ounces each, containing 12 and 18 lenses, constructed of German glass, will show distinctly persons to know them at two-and-a-half and three miles. They serve equally purpose on the Racecourse and at the Opera House. Country scenery and ships are clearly seen at eighteen ten miles. They are also invaluable for Shooting, Deerstalking, and Yachting. Her Majesty's Coldstream Guards are making use of them as day and night glasses. The terms for them are powerful and brilliant. Telescopes for both eyes. The most powerful Telescopes, possessing such extraordinary power as some, three-and-a-half inches, with an extra achromatical eyepiece, will show distinctly Jupiter's moons, Saturn's ring, and the double stars; with the same telescope a person can be seen and known three miles a-half miles distant, and an object from fourteen to sixteen miles. They are in endless variety of power, and all sizes, with increasing powers, and are secured by Her Majesty's Royal Letters Patent.

FIELD GLASS.—The BEST is BURROW'S MALVERN LANDSCAPE GLASS, invaluable to Sportsmen, Military and Naval Officers, Travellers, &c. Compact, portable, and efficient, combining a wide field of observation with extraordinary definition power. In sling case, 3½ guineas. Sent free on receipt of post office order to W. & J. BURROW, Great Malvern, Worcestershire.

GUSH & FERGUSON, ARTISTS AND PHOTOGRAPHERS, beg respectfully to solicit the Nobility and Gentry to view their First-class PORTRAITS, in Oil and Water-Colours.

GALLERY, 179, REGENT STREET, W.

DINNEFORD'S PURE FLUID MAGNESIA

Has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for ACIDITIES, HEARTBURN, HEADACHE, GOUT, AND INDIGESTION.

It is a MILD APERIENT, it is admirably adapted for DELICATE FEMALES, *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the

ACIDULATED LEMON SYRUP,

forms an *Effervescing Aperient Draught*, which highly agreeable and efficacious.

PREPARED BY DINNEFORD & CO., DISPENSING CHEMISTS, and General Agents for the *Improved Horse Hair Gloves and Belts*),

172, NEW BOND STREET, LONDON, W.,

and Sold by all respectable Chemists throughout the Empire.

DR. BUCHAN'S PATENT SUGAR-COATED VEGETABLE PILLS, VEGETABLE SKIN OINTMENT, and CONCENTRATED VEGETABLE ESSENCE, for Purifying the Blood, Regulating the Bowels, and Removing Vitiated Humours, Bilious and Liver Complaints, Rheumatism, Gout, Corbutic Affections, Costiveness, Skin Eruptions, Deep-seated Ulcers, and all Diseases of the Nervous System, from whatever cause, &c., affording at once a new lease of life to the sickly and aged of both sexes, also giving a beautiful and clear complexion. Proved by the sworn testimonies made before the Lord Mayor of London and sitting Magistrates. Sold by Buchan & Co., Patentees, 22, Newman St., Oxford St., London, W., and all chemists in town and country. Prices:—Pills, per box, 1*s.* 1½*d.*, 2*s.* 9*d.*, and 11*s.*; Ointment, per pot, 1*s.* 1½*d.*, and 2*s.* 9*d.*; Essence, per bottle, 4*s.* 6*d.*, 11*s.*, or bottle containing four times that quantity, 33*s.* Agents:—Barclay, 75, Farringdon Street, E.C.; J. Sanger, 150, Oxford Street, W.; Hannay, 63, Oxford Street, W.; Butler, 4, Cheapside, E.C.; Hooper, 43, King William Street, London Bridge, E.C.; R. Howden, 78, Gracechurch Street, E.C.; Prout, 229, Strand, W.C.; &c. &c.

Gratis, or post free for one stamp, of all Agents, and 7, Newman Street, W., Dr. Buchan's Work, entitled, BUCHAN'S DOMESTIC MEDICINES, containing instructions for the cure of every ailment incidental to man, woman, or child.

A Physician and Member of the Royal College of Surgeons, England (Registered under the New Medical Act), attends daily to give advice, without fee, to those purchasing Buchan's Medicines.

DAVARESSE'S PATENT FLEXIBLE CAPSULES, by which all nauseous Balsamic Medicines may be taken without inconvenience. These capsules are made of animal membrane of slow solubility, thus obviating the usual nausea and unpleasant sensations which follow the use of those made with gelatine. From numerous medical testimonials, EVANS AND LESCHER, the Patentees, need only select the following by William Acton, Esq., see page 96 of his celebrated Treatise:—"In many instances I have known the gelatine capsule burst in the effort of swallowing, and dissolve as soon as it is in the stomach; an improvement has latterly been introduced by Messrs. Evans & Lescher, by enclosing the medicine in membrane, thus obviating the objection to all gelatine capsules." The Membranous Capsules may be obtained of all chemists, in town and country.

TRUSSES. — HUXLEY'S IMPROVED PATENT MOC-MAIN TRUSS dispenses entirely with the lever spring. A flexible band, perfectly imperceptible, encircles the body (in lieu of the old steel spring), and an elastic pad secures the hernia. Measure required—circumference two inches below the hips. Price single, 12*s.*; double, 18*s.*; postage 1*d.* and 16*d.* Illustrated circulars on application to Mr. E. HUXLEY, 12, Old Cavendish Street, Oxford Street, W.

A BOON TO NERVOUS SUFFERERS.

HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., will send, post free, on receipt of a stamped directed envelope, THE WARNING VOICE, a new medical work on the most effectual cure of Nervous Debility, Loss of Memory, Indigestion, &c., which, if neglected, result in consumption and premature decay; with plain directions for perfect restoration to health and vigour. The true guide to those who desire a speedy cure. Every young man should peruse this excellent little work, if he values his health, happiness, and peace of mind. Sent direct from the Author's residence, 8, Burton Crescent, Brunswick Square, London, W.C.

Just published, price 1*s.* 6*d.*, post free for 18 stamps.

DAVIESON'S EVERLASTING TEETH.

THE LATEST DISCOVERY.

MR. EDWARD DAVIESON, SURGEON-DENTIST, has introduced a material for the construction of ARTIFICIAL TEETH so extraordinary that nature appears to have made good the ravages of TIME, DISEASE, or ACCIDENT, and when fitted detection is impossible, even though the wearer's mouth be closely examined. The price is so moderate that it is within the reach of all, and it is fitted without springs or other unsightly fastenings. The removal of stumps is unnecessary, and thus all pain is avoided. MR. EDWARD DAVIESON invites one visit of inspection to his establishment, which will convince the most sceptical of the truth and straightforwardness of this statement. The LIQUID ENAMEL, for Stopping Decayed Teeth, is ENAMEL WHITE, keeps its colour, and lasts for ever. It is invaluable for Front Teeth. Attendance daily from Ten till Six. Consultations free. MR. EDWARD DAVIESON, Electric Telegraph Office, 448, West Strand, London, W.C. The Descriptive Pamphlets free for two stamps.

WEST MIDDLESEX RIFLES.

Lieut.-Colonel Lord Radstock, Commanding.

PRIZES.

The following Prizes will be competed for at the First Prize Meeting of the Corps, NOVEMBER 20th, 1860.

EIGHT COMPANY PRIZES of 5*l.* each, open to the Members of each Company who have obtained Fifteen Points in the first period. Range, 200 and 300 yards. Five shots each range.

THREE BATTALION PRIZES, consisting of 20*l.* and the SILVER MEDAL; 10*l.* and the BRONZE MEDAL; 10*l.* given by T. Hughes, Esq.; for the first, second, and third shots of the Battalion. These Prizes to be competed for by the Thirty men who obtain the greatest score in firing for the Company Prizes. Range, 400, 500, and 600 yards. Five shots each range. The Silver and Bronze Medals have been presented by the Chaplain, the Rev. J. E. Cox.

THE CHALLENGE CUP, presented by F. H. Bridgman, Esq., Captain Bridgman, and Ensign Phillips, to be shot for by the Twelve men who make the highest score in firing for the Battalion Prizes. Ten rounds at 700 yards range, at a target 6 feet square, with a 2 feet centre. The Cup to become the absolute property of any Member who wins it three years in succession.

A WESTLEY RICHARDS' BREECH-LOADING RIFLE, presented by Lieut.-Colonel Lord Radstock. Each Company to send in their Ten best Runners, to go through Judging-distance drill. Five distances. The Twenty-four men who make the highest score are to fire five rounds at 300 and 400 yards range.

A LADIES' PRIZE.—Subscriptions are now being raised for a Ladies' Prize, the regulations for which will be announced previous to the meeting.

All Shooting for the above Prizes must be made with the Long Enfield Rifle with the Government Ammunition, and in Hythe Position.

Entrance Fee for each Prize, One Shilling.

Honorary Members or Ladies who are desirous of adding to the foregoing List of Prizes are requested to signify the same to the Secretary, Lieutenant G. MARRINER, Orderly Room, 70, Seymour Place, N.W.

By order, G. PENNYMORE, Adjutant.

NAVAL CADETS, MARINE CADETS, ETC.

EASTMAN'S ROYAL NAVAL ESTABLISHMENT,

EASTERN PARADE, SOUTHSEA.

357 Gentlemen have passed from this Establishment as Naval Cadets, and more than 200 as Marine Cadets, &c.

At the last Examination, FIRST, SECOND, THIRD, FOURTH, FIFTH, and SIXTH Places were taken by Pupils in different classes.

Pupils receive a Classical and sound General Education, and careful preparation for Naval Examinations.

Applications to be addressed to the Head Master, Mr. G. EASTCOTT SPICKERNELL. Prospectuses and other information may be had at Messrs. Booth's Library, 307, Regent Street, W.

A Seaman-Rigger is attached to the Establishment.

ARCHIBALD GRAHAM, *to whom remittances are payable. The subscription to the paper is 7s. 7d. per quarter, or 30s. 4d. per annum, payable in advance, postage included.*

WERE it not that the questions of shot-proof ships, long range ordnance, and arms of precision, are all bound up together, and in the aggregate present one of the most important problems which has ever been offered to the rulers of a state anxious to preserve her independence, her power, and her glory, we would turn from inventors with a shudder and a feeling stronger than mere dislike, and would regard them very much as the unhappy gentlemen at the War Office must look at the last "long-range lunatic," who rushes upon them in Pall Mall with some impracticable model and Dodonean diagrams. But the vital consequences to armies and navies—which are even yet the sole physical means by which nations are permitted under Heaven to live and breathe—of these tremendous implements and means of offence and protection, forbid any indifference to these issues. And so inventors may have their fling. The War Office must go on with its modest overflow of public money into the tubs of those Danaids; Ordnance and Small Arms Committees must continue their experiments, discussions, and reports; and public journalists must print correspondence and investigate statements, sift facts, and endeavour to find out what is the best gun for the country, and what is the best ship and the best rifle. Now, in addition to the different plans which are alluded to in another article in this paper for securing the sides of ships against the effects of the new artillery, we have new artillery of different sorts and in various stages, from crude theory to tested completion, and a small army of rival systems. We need not allude to foreign inventions, or to the struggle which is taking place abroad also between contending innovators. The French are satisfied for the moment with their rifled musket and rifled cannon, and no doubt they have managed to dispose of their enemies very effectually with these weapons, and they are equally contented with their Gloire, and with the principles on which they have built their new gunboats. In this country there is a great controversy between Mr. Whitworth, who claims for his mode of manufacturing guns and muskets far greater results than can be had from the Armstrong gun or the Enfield musket, and those who stand up for the arms which are manufactured at the Government establishments for the public service. In an article from the pen of the Paris correspondent of the leading journal, there appeared a statement that, since 1857, when Mr. Whitworth clearly proved the superiority of his rifle over the Enfield, no serious steps had been taken by the Government to secure for the Army or Navy either the cannon or the rifle, though Mr. Whitworth had made every exertion to get them introduced into the Service—the result being that Mr. Whitworth might be supposed to feel himself perfectly free to sell his patent or his guns to France, or any other more liberal and more appreciative Power. In reference to that remarkable statement, which was very explicit in some points, the ARMY AND NAVY GAZETTE of 10th November contained an article, in which doubts were expressed that Mr. Whitworth had had so much reason to complain, and some facts were given to show that the Government was not to blame so much as might be supposed for delays and obstructions, all of which could not be laid to its door. In reply to that article we gladly publish a letter from "The Whitworth Rifle Company" of Manchester, on which it is our duty to offer a few remarks. They assert that the results of the experiments at Hythe and Woolwich, proved the superiority of the Whitworth over the Enfield—that it has no tendency to foul when used with proper ammunition—that when an apparent advantage was gained over the Whitworth in the maker's absence, the shooting was below its average, the powder was short of weight, and the superior rifle was one in which Mr. Whitworth's bore and turn had been adopted—that the results of the recent rifle contests show what the Whitworth can do. As regards the delay in the delivery of the guns purchased by Government, the Company say the 80-pounder was detained in order to make experiments with shells, and that the Committee, though not in possession of the gun purchased from Mr. Whitworth, had, at any rate, brass guns bored and rifled on his system. We have little fault to find with the statement as an exposition of the views of the Manchester Company; but it is open to some remarks seriously affecting the conclusions. It must first of all be borne in mind that a weapon may be very well suited for nice experiments which cannot be used for general purposes. Supposing that it can be adapted for these purposes, it is to be considered whether the cost is not so great that the advantages may not be nullified by enormous expense. Thus, if the superiority of A to B is as 12 to 11, and if the cost of the one to the other is as 10 to 4, it is obvious the question of expense must exercise a very legitimate and powerful influence when those proportions are multiplied by hundreds of thousands. Supposing that the Whitworth can be made as effectively for common use and as cheaply as the Enfield, the superiority of its action certainly gives it a great claim to the national patronage. Now, as to that superiority, the Committee appointed *ad hoc* were not agreed. We may remark here that the War Office — the Government—can only act through the agency of properly constituted recognised bodies of their own responsible officers—in that way alone can they arrive at positive results and conclusions. Now, of the Committee, two were in favour of the polygonal system (called Whitworth's), one of whom however thought that the expense of the arm, and the readiness with which it could be supplied, should be taken into consideration; the other, no mean authority—General Hay—who regarded the weapon as the means of hitting the bull's-eye, being strongly in its favour, but the Committee in their Report declared they were not able to recommend any change in the Enfield system. Of the remaining four members of the Committee two we believe distinctly asserted that the Enfield was superior to the Whitworth in trajectory and accuracy; the two others agreed in the Report that they were not in a position to recommend the substitution of the Whitworth for the Enfield. In the middle of last year there was another Ordnance Select Committee appointed, who, in order to equalise the conditions of the two systems, made certain proposals to Mr. Whitworth, who considered that the alterations proposed would in fact constitute a partial adoption of his system at Enfield, and who declined to compete in any trials except such as should be made between the Whitworth and the Enfield *pure et simples*. As the arms were not sent to the Committee the experiments could not be proceeded with for a long time, but we believe that Mr. Whitworth has prepared some rifles of the same material as those made at Enfield, and that trials are being or will be made from which decisive results may be expected. In reference to the cost, it is asserted that Mr. Whitworth several years back offered to give his assistance at Enfield, where the machinery could, he stated, be adapted to the manufacture of his rifles; but until the superiority of his system is clearly shown, it does not appear how his proposition could have been accepted. There can be no doubt that when the Manchester Company appeal to the favour in which the Whitworth rifle stands among the Volunteers they are on strong ground, and that the shooting has been very good; but the Government cannot occupy that position; and in fact, no corps has been able to afford itself the luxury of Whitworth rifles. As regards the cannon, we have little to add to, and nothing to modify in, our previous statement. The ARMY AND NAVY GAZETTE has contained from time to time the fullest information respecting the trials of these guns, and critical notices on the results written in a spirit of strict impartiality, and dictated by a desire to find out what was really the best gun for the public service. The programme for the trial between Mr. Whitworth and Sir W. Armstrong was not accepted by the former for reasons already indicated in this journal, but if the large gun was detained in order that Government experiments might be made with it, any complaint of delay in delivering it cannot be fairly made against Mr. Whitworth. The guns which we saw at Southport have been bought by the Government, and the 12-pounder has, we hear, realised the hopes to which its performances gave rise this year. The 80-pounder has exhibited, as we read, a small flaw, or, rather, a slight expansion between two of the metal bands at the breech; but Mr. Whitworth is confident that no harm can be done to the gun, and the testing experiments will be continued with it. All we hope is that the best gun may win, the Government must hope the same; and it would greatly facilitate the result, if those who wish to abide by the test of excellence would trust to the honour and skill of British officers, the responsible representatives of the State, whose desire and interest it must be to secure for Army and Navy the best weapons that can be made.

In the perusal of some recent courts-martial at Portsmouth, not in themselves of any particular interest, we cannot avoid remarking the great length of time which has elapsed between the trial of the prisoners and the promulgation of their sentences; being in one instance no less than 113 days. During this time the man is kept in the common guard-room, there he is also placed previous to trial some 12 to 20 days additional. To the culprit this is of little consequence, as he there passes in the society of his comrades a part of his punishment. But to the young men of the Service this forced and promiscuous assortment of good and bad is fraught with the worst consequences. Such men as were lately tried at Portsmouth know perfectly well what the nature of the sentence is likely to be; and they become reckless in their language, contaminating all who are brought in contact with them. Many a harmless young fellow, a little the worse for drink, or a little late at tattoo, is thrust into the common lock-up room with such ruffians as these: and it is not likely that in the morning he will quit without having heard much mutinous and abominable language. There ought to be a classification of crime in guard-rooms as well as elsewhere, and therefore a separate room for the confinement of prisoners whose crimes are to be subjected to the adjudication of a court-martial. Nor can we avoid expressing a hope that the sentences of penal servitude passed on the offenders at Portsmouth will not, we trust, be mitigated by a misplaced leniency. The convicts should not obtain their liberty before the expiration of their punishments. We drew not long ago the serious attention of the authorities to the impression that was abroad among the men, of liberty obtainable by the commission of crime; and to the necessity of speedily effacing it. Even since that time we have seen men brought up before magistrates for robbing houses at night, and setting fire to farm-yards, who openly stated that they did these fearful acts for the purpose of getting out of the Service. There has hitherto been some ground for believing that such evil methods would be successful; and we require a General Order which shall assure the small body of evil disposed in our ranks, that under no circumstances will a sentence of penal servitude once passed upon a soldier and approved, be commuted for any other punishment. If this is done we shall have fewer courts-martial.

THE ARMY.

1st Dragoon Guards. The letters from China state that the health of the two squadrons engaged in the operations there was good. The size and martial appearance of the men had caused great sensation among the natives.

3rd Dragoon Guards.—Cornet Fitzgerald has arrived at head-quarters from England.

6th Dragoon Guards. This regiment may be expected in England early in the ensuing summer. It was to be relieved at Meerut and Muttra by the 3rd Dragoon Guards, from the Bombay Presidency.

7th Dragoon Guards. Lieut. E. H. O'Dowd has leave to England upon the recommendation of a medical Board.

6th Inniskilling Dragoons. Lieut. D. M. M. Inge has been appointed Instructor of Musketry to the regiment, in succession to Lieut. the Hon. E. R. Bourke, who is on the eve of promotion by purchase to a troop.

8th Hussars. Col. de Salis's leave is extended. Cornets J. G. Stopford and T. Coates have arrived at head-quarters, from England.

Royal Artillery. His Royal Highness the General Commanding-in-Chief has made the following appointments :—Second Capt. H. J. Alderson to be Assistant-Superindent of Experiments at Shoeburyness, vice Lyons, appointed Assistant-Inspector of Artillery at Woolwich ; Lieutenant T. C. Price, of the 15th brigade, to be Acting-Adjutant and Quartermaster at the School of Gunnery, vice Alderson ; Lieutenant M'Murray, of the Coast Brigade, has been removed from Buncrana to Carlisle Castle, where he will do duty until further orders ; and Lieutenant M'Keown has been ordered to Weymouth. Veterinary-Surgeon Anderson has been nominated to proceed to New Zealand to join Captain Mercer's battery, and will take his departure on the 20th instant, *viâ* Egypt. Lieutenant-Colonel Middleton, C.B., has embarked for the Mauritius to assume the command of the Royal Artillery at that station, in the room of Colonel Cockburn, who will return to England. Lieutenant H. M. Moorsom is transferred from No. 6 battery, 12th brigade, to No. 1 battery, 4th brigade. Lieutenant J. H. Wilmer, of the 11th brigade, is raised to increased pay therein, vice Traill, deceased. The under-mentioned lieutenants, who obtained their commissions on the 1st, as announced in a General Regimental Order, are to be posted to batteries as annexed :—W. H. Wright, 5th brigade, 2nd battery, Gibraltar ; Arthur Warry, 5th brigade, 8th battery, Gibraltar ; Charles Kirkwood, 1st brigade, 3rd battery, Woolwich ; John Andrew Kelso, 14th brigade, 4th battery, India ; John Edward Toller, 3rd brigade, 2nd battery, Guernsey ; Henry Knollys, 10th brigade, 7th battery, Isle of Wight ; William Alexander Day, 1st brigade 7th battery, Woolwich ; Spencer Gardiner, 3rd brigade, 7th battery, Plymouth ; Henry R. Yates Browne, 6th brigade, 3rd battery, Malta ; Edward G. B. Gattey, 1st brigade, 2nd battery Woolwich ; John Tyndale Greenfield, 12th brigade, 7th battery, Cape of Good Hope ; C. W. Thomson, 3rd brigade, 5th battery, Plymouth ; Frederick, W. Nind, 15th brigade, 1st battery, Gosport ; Frederick W. Carey, 15th brigade, 3rd battery, Gosport ; Francis H. E. Day, 6th brigade, 1st battery, Malta ; W. H. M. Duthie, 10th brigade, 6th battery, Portsmouth ; Price Lewes, 15th brigade, 4th battery, Gosport ; Allan Henry Maclean, 3rd brigade, 8th battery, Plymouth ; General C. H. Parbly, 6th brigade, 10th battery, Corfu ; Allan B. Davies, 7th brigade, 1st battery, Jamaica ; and Henry Woolcombe, 2nd brigade, 4th battery, Plymouth. Such of the before-mentioned officers as are posted to batteries at home stations will join them on the 1st of January next. Those for the Mediterranean stations will hold themselves in readiness to embark about the 4th of that month, on which subject a future communication will be made to each of them ; and the remainder will join at Woolwich on the 1st of January for duty, until passages are provided for them to their respective destinations. The staff officers of the new battery, to be commanded by Major G. Davis, have been appointed, and, with the exception of a few gunners, the battery, which is attached to the Depot Brigade, is now complete. Captain Mercer's 3rd battery, 4th brigade field artillery, embarked this week at Woolwich, on board the troop-ship Norwood, Captain Bristow, for Auckland, New Zealand. The battery consists of Captain Mercer, in command ; Second Captain W. H. Watson, who has proceeded by the overland route to prepare the horses for the use of the battery on their arrival ; Second Captain A. S. Hunter, Lieutenant H. C. Magenis, Lieutenant A. T. Pickard, and Assistant-Surgeon W. Temple, M.B., 256 non-nommissioned officers and men, and 22 women and children.

Royal Engineers. Lieutenant Montgomery, R.E., has received orders to join the head-quarters of the Royal Engineer establishment at Chatham. The 27th (Captain A. W. Durnford's) company is ordered from Chatham to Gibraltar, to relieve the 2nd company, whose term of foreign service has expired. An address, signed by 700 inhabitants of Sheerness, has been presented to Lieut.-Colonel Montague, R.E., thanking that officer for his great exertions in carrying out certain Government works, and especially in the removal of several stagnant ditches, whereby the utmost sanitary benefit will result to the town and garrison.

Military Train, 3rd Battalion. Surgeon Reynolds is on leave to December 31, on private affairs.

2nd Regiment. The 2nd battalion, under the command of Major Rose, arrived at Corfu in the early part of this month, from the Southern Islands.

4th Regiment, 1st battalion. Lieutenant Boyce and Ensign Plummer have arrived out in India to join the regiment.

8th Regiment. Colonel Paul Haines has joined from leave of absence. Captain de Vic Tupper proceeded on the 12th inst. to join the second battalion stationed at Gibraltar, accompanied by the sword of honour given to him by the Royal Guernsey Militia on his return from the Crimea, for his gallant conduct before the enemy in that memorable campaign.

9th Regiment. The 2nd battalion has moved from Corfu to the Southern Islands of the Ionian group, relieving the 2nd battalion, 2nd Regiment.

11th Regiment, 1st battalion. A detachment of this regiment, consisting of Lieut. Poole and 60 men, left Portsmouth on the 20th inst., to relieve the Suffolk Militia Artillery in charge of the magazines at Marchwood on Southampton Water. Although the facilities for landing powder close to the sea was no doubt a reason, originally, for establishing this depot, yet in these days of rapid and sudden descents by steam, the position is eminently dangerous. If the passage of the Needles were freed, a gun-boat could blow this magazine to smithereens in five minutes ; a risk which there is no necessity to incur, and which might just as well be avoided.

2nd battalion. At a general court-martial held at Portsmouth on the 18th of September, Quartermaster William C. Napier, 2nd battalion 11th Regiment, was arraigned upon the following charges :—1st charge : For having at Portsmouth on or about 6th July, 1860, absented himself without leave from the 2nd battalion 11th Regiment, and for not having returned until on or about 28th July, 1860. 2nd charge : For disobedience of orders, and making use of highly insubordinate and threatening language in the following instances : 1st instance : For having at the United Service Hotel, Portsmouth, on or about the 13th July, 1860, when absent without leave, as stated in the 1st charge, disobeyed the lawful command of his superior officer, Lieut.-Colonel Augustus Frederick Jenner, commanding 2nd battalion 11th Regiment, conveyed to him by Lieutenant and Acting-Adjutant J. R. Kelsale, 2nd battalion 11th Regiment, and making use of the following expressions with reference to Lieut.-Colonel A. F. Jenner, commanding 2nd battalion 11th Regiment, "I will not go into arrest ; and the first person who lays hands on me I will blow his brains out. I will see him, Lieut.-Colonel Jenner, to hell first before I will obey him ; and if I see him go down the street I will pull him out of the ranks," or words to the like effect. 2nd instance : For having at the Clarence Barracks, Portsmouth, on or about 28th July, 1860; disobeyed the lawful command of his superior officer, Lieut.-Colonel Augustus Frederick Jenner, commanding 2nd battalion 11th Regiment, conveyed to him by Captain Thomas Lindsay Stack, 2nd battalion 11th Regiment, in refusing to go into arrest when ordered so to do by the said Captain T. L. Stack, at the same time making use of the following expressions :—"If any man lays a hand on me I will shoot him," or words to the like effect ; declaring that he had a loaded pistol in his pocket.

FINDING.

1st Charge—Guilty—1st Instance.
2nd Charge—Guilty—2nd Instance.
2nd Charge—Guilty, with the exception of that part which charges the prisoner with declaring that he had a loaded pistol in his pocket.

SENTENCE.

To be dismissed from Her Majesty's Service.

17th Regiment. The depot of the 2nd battalion has left for Limerick, to be stationed.

20th Regiment. On 16th October, Lieutenant-Colonel Radcliffe and officers of the 2nd battalion of the 20th Foot presented a purse containing 20*l.* to Mr. Thomas Peden, as a slight token of respect for his character, and the great satisfaction given by him during two years' catering for their mess. Mr. Peden was formerly colour and mess-sergeant of the 1st battalion 20th Foot, and on that battalion proceeding to India received a silver teapot and a purse, which were presented to him at the head of the regiment by Colonel Eveleigh on the part of the officers.

21st Fusiliers. The 2nd battalion moved this week from Aldershot to Shorncliff and Dover, to be stationed. The Dover detachment consists of 300 men. The depot has proceeded to Birr to join the Depot Battalion.

25th Regiment, 2nd battalion. Lieutenant Handy is on leave to January 13, 1861.

27th Regiment. The trial of Captain Urquhart, of the 27th Foot, was to have taken place on the 17th of October, at Umballah. The delay that has taken place is to be attributed to the spirit in which the Commander-in-Chief expressed a desire that Captain Urquhart should have the fairest trial.

33rd Regiment. Major Wickham has arrived out in India to join his regiment. Ensign Mundy is on leave to March 5, 1861.

42nd Highlanders. We are sorry to notice the death of Lieut. T. M. James, which occurred at Almorah on the 26th of September. He entered the service in May, 1855, as ensign by purchase, and obtained his lieutenancy by purchase in November the same year.

44th Regiment. A very neat mural tablet has been placed upon the southern wall of St. Peter's Church, Colchester, to the memory of the officers of this regiment (the East Essex) who fell in the Crimean War. The tablet in question is of pure white marble, and is supported by the colours of the regiment, which bear unmistakeable proofs of the severity of the conflict through which they have been carried, having been completely riddled with bullets. Upon the upper portion of the tablet, which has been erected by the officers of the 44th, there is in relief a figure of the sphynx, and beneath, the following inscription :—"Sacred to the memory of Captains B. Fenwick, Hon. C. Agar, W. H. Mansfield, F. W. Caulfield, who were killed 25th June, 1855 ; Lieutenants R. Eyre, who died at Balaklava 13th October, 1854 ; M. Bradford, died 1856 ; Assistant-Surgeon J. Thomson, died at Balaklava 5th October, 1854 ; 18 sergeants, 12 drummers, and 420 rank and file, who were killed or died of wounds or disease, during the War in the Crimea, doing their duty under the colours which hang over this stone." The monument erected by the regiment in the Crimea, which was substantial and in very good taste, was in excellent preservation according to information lately received by the Editor.

47th Regiment. On Saturday evening, the 10th instant, the corporals and privates of letter E company assembled in the casemates of the Citadel, Dover Heights, to bid a last farewell to their colour-sergeant, who has been transferred as a company sergeant-major to the 2nd West India Regiment, also to his wife, schoolmistress Yeabsley, who is likewise transferred to the same corps. Sergeant-major Yeabsley was presented with a splendid gold Albert chain, and Mrs. Yeabsley with a handsome brooch. On the ensuing Monday evening the sergeants of the regiment assembled in their mess-room to demonstrate their high esteem for him, and presented him with a very beautiful silver inkstand, bearing a suitable inscription. Sergeant-major Yeabsley has been 15 years and 6 months in the Service, and 14 years a non-commissioned officer. Ten years ago he was well known in the Ionian Islands as the author of a pamphlet entitled "An Address to a Young Soldier," and during the latter part of the Crimean campaign, while in the Second Division reserve battalion, in Malta, was much respected, and must still be, by many of the eight depots composing the battalion for the valuable assistance rendered to many young pay-sergeants and officers in command of companies.

Royal Marine Light Infantry. Captain Poore, of the artillery division, two sergeants, and two corporals, belonging to the Woolwich division, have proceeded to St. Alban's to-day on recruiting service for the division. Lieutenant Brand, one sergeant, one corporal, one drummer, and 45 privates are also under orders to embark at Portsmouth, for service.

56th Regiment. Captain Eden and Ensign Grimes have arrived out in India to join the regiment.

64th Regiment. Major Francis has leave from Kurrachee to England viâ the Cape, upon medical certificate.

72nd Highlanders. Captain Robinson, Ensigns Pardoe and Hebden have arrived out in India to join the regiment. Lieutenant Kildahl is on leave to March 31, 1861.

83rd Regiment. Captains Wakefield and Mearant embarked at Southampton on the 27th ultimo to rejoin their regiment at Belgaum. Captain E. W. Bray is also under orders for India, and is to embark in the mail steamer on the 27th instant for Bombay. Captain Wright has been appointed a staff-officer of pensioners in Ireland.

90th Light Infantry. The regiment was inspected at Seetapore early in October by Brigadier-General R. Walpole, K.C.B., who inspected the troops, barracks, hospitals, &c. Some good horse racing came off each afternoon, none but gentleman riders being allowed. Another treat was given at the Regimental Theatre of her Majesty's 90th Infantry. The bill of fare is a good one ; viz., "Used Up," followed by "The Ethiopian Serenaders," and concluding with "My Wife's Second Floor."

94th Regiment. A few days ago James O'Neil, private of H.M. 94th band, was presented by Captain Charles Arthur Elliot with a new trumpet. Captain Elliot, after having made a most encouraging speech to the band, was heartily cheered by the men.

95th Regiment. Lieutenant Stubbs is acting as Instructor of Musketry to the regiment.

97th Regiment. Lieutenant Shaw has been examined at Aldershot this week by a board of which Colonel Edwardes, C.B., 49th Regiment, was president, as to his fitness for promotion to the rank of captain.

Royal Malta Fencibles. Letters from Malta announce the death of Captain G. Gouder of this regiment on the 14th inst. He had been over 50 years in the Service.

We learn from the *North China Herald* that the main forts at Taku are being systematically and effectually destroyed. The same authority informs us that the English and French forces do not seem to amalgamate, but keep quite distinct from each other, which appears to be satisfactory to both parties.

One of the heaviest Armstrong siege guns manufactured in Woolwich Arsenal was this week tested at the proof butt. The gun was fired two rounds, each time with a charge of 25 lb. of powder and a 100 lb. shot. The trial was perfectly satisfactory, and the gun was forthwith stored with others of that class proved during the preceding days of the week, to be issued for service. A couple of the Whitworth cannon were afterwards subjected to the ordinary test. The first was a 12-pounder, which stood the trial exceedingly well, and was very much admired. The power of the gun was of such an extraordinary nature that the shot penetrated completely through the mound of earth against which it was fired. The second, an 84-pounder was then fired—two rounds with a charge of 24 lb. of powder and a service shot. After the second round it was observed that the joints had started, showing a crevice at that part of the gun where the junction of the segments is effected. The crevice, although exceedingly slight, was clearly perceptible when pointed out by those accustomed to that duty.

The following Circular Memorandum has been issued :—"His Royal Highness the General Commanding-in-Chief desires that in future all demands from regiments abroad for arms, accoutrements, or other stores, be, prior to their transmission to head-quarters, submitted to the military store-officer at the nearest station, in order that he may state, on the demands, whether he has the means of complying with them in whole or in part.—By command, James Yorke Scarlett, Adjutant-General."

Colonel Ladonni, an officer of the Sardinian Cavalry, intrusted with a special mission to this country, for the purpose of entering into negotiations for the manufacture of English ordnance for the Sardinian Government, has visited Woolwich Arsenal with a view of making arrangements for proving at the Government butt a number of the guns and mortars already completed.

The 12-pounder guns (iron), which have for so many years past done duty in the saluting battery on the Spar Bastion of the Portsmouth lines, having become overvented from continued firing, a fatigue party of the Royal Artillery has during the last week been employed in mounting new guns, which were received at the gun department from the Royal Arsenal, Woolwich.

Experiments have again been made at Shoeburyness, under the direction of the Ordnance Select Committee, against Thorncroft's patent iron embrasure, and with great success. Although the granite masonry surrounding the embrasure was entirely destroyed by the tremendous strokes of iron hail directed against it, the embrasure itself was comparatively uninjured. Truly at the present time gold and iron are running a keen race together for the honour of christening the wonderful age in which we *live*, and by which it will be known to our posterity.

It will be seen by the *Gazette* of November 20th that Lieutenant Rogers, H.M. 44th, and Lieutenant Burslem, H.M. 67th, who were mentioned in dispatches, have been promoted to unattached captaincies without purchase for their distinguished conduct. The latter officer's commission as ensign bears date 20th February, 1857 ; the former has two years more service, and was present with his regiment at the fall of Sebastopol. Ensign Chaplin has also received an instalment of the reward of his gallant behaviour by promotion to a lieutenancy without purchase in H.M. 100th Regiment.

A number of Major Rhodes's patent picketing screws,

Digitized by Google

which are eminently adapted for an extemporary encampment, or roadside bivouac of cavalry, have been received at Woolwich for experimental trials, by order of Sir Richard Airey, Quartermaster-General. The screws are after the corkscrew fashion, and, with lines attached, are for the purpose of tethering horses. They are of two sizes—viz., 14 inches and 16 inches long, and weigh, with two ropes attached, 2 lb. and 2¼ lb. each; and, according to the statement of the Duke of Cambridge, recommending the screws for a service trial with the Royal Artillery in their Monday's route marches from Woolwich, the method of picketing horses will be exceedingly simplified. This system is two-thirds lighter, and about an eighth cheaper than the new French system of picketing horses adopted only last year, the weight of which, giving accommodation for 15 horses, is about 125 lb., and the cost from 24*s.* to 28*s.*; whereas 15 of Major Rhodes's heaviest tethering screws, with connecting lines attached, weigh only 37½ lb., and cost from 18*s.* to 20*s.* only. The first trial is expected to take place on Monday next.

Major St. George Nugent, Deputy-Assistant-Adjutant-General at Aldershot, is on leave to the 31st of December.

The majority of the troops at the Hythe School of Musketry having completed their course of instruction, have left during the present week. Second-Class Instructor Richardson has returned from Canada, where he has been attached to the Royal Canadian Rifles.

Sir Maurice Berkeley.—We (*Cheltenham Examiner*), regret to have to state that Sir Maurice is at present confined to Berkeley Castle by a rather severe attack of gout. The friends of the gallant admiral will, however, be pleased to learn that the attack is not considered to be of a dangerous character.

Red Tape in China.—The *Times* correspondent writes:—"Some complaints have been made about the Commissariat, and Sir John Michel commented strongly on the Commissariat officers of his division during the march from Tang-kow. The fact is that the Commissariat officers are so tied down by red tape that they dare not purchase anything for which they cannot produce a receipt. The villages contained ample supplies; the villagers were anxious to sell, but, not being acquainted with the mode of writing practised by Europeans, they could not supply a receipt for the money they received. This produced some delay, but the men eventually got their rations, and orders have been given with a view of obviating such difficulties in future."

Wafer Rations.—The French papers are full of a wonderful tablet prepared by the Maison Chollet, of whose preparations our Crimean soldiers must have so many grateful recollections. One of the new preparations about the size of a visiting card, put into hot water, will furnish a capital rich soup, and the *Moniteur de l'Armée* declares that 100,000 rations may be packed in the space of three cubic metres (or 9 feet 9 inches square).

The French Army.—Brigadier-General Collineau, who has been advanced to the grade of General of Division (Lieut.-General) for his services in China, served in the 2nd Regiment of the Legion Etrangère; his commission as captain bears date Jan. 1845. Auguste Andre O'Malley, a captain of 1843, in the old 51st Regiment of the Line, colonel of the 102nd of the line, has been promoted to the rank of Major-General. M. de Bentzmann, who has received similar promotion for services, is a captain of Artillery of the date of 1841. A considerable number of promotions in the Legion of Honour, appear in the *Moniteur* for the Chinese War, as well as a long list of *decorés* and men promoted.

Amusements for the Soldiery in India.—The following Order has been issued by Sir Hugh Rose:—"Head Quarters, Calcutta, October 6.—The Commander-in-Chief wishes to place on a regular and permanent footing, and to render general the means of recreation, instruction, and employment in useful trades, of the soldiers of the army. In this sense His Excellency calls on officers commanding divisions to transmit to the Adjutant-General of the Army reports carefully drawn up on the means in question, which are actually in existence at the stations under their command, specifying their description and capability of improvement. For example: Whether there are barrack accommodations for schools, soldiers' reading and coffee rooms, workshops for instruction and practice in trades, gardens for the growth of vegetables, gymnasia, single stick practice and cricket grounds, skittle and ball alleys. The reports should also specify the capabilities which each station, and the country around it, afford for the practice of the various trades, which in the soldiers' hands may be a source of pastime and profit to themselves, and of essential use to troops in the field. Workshops, as a system, may be said to be unknown in this army. The Commander-in-Chief is most anxious that they should be introduced into it, and developed to the greatest possible extent, that not only soldiers, but their children also should learn trades." Sir Hugh Rose can speak from his own experience as to the advantage of soldiers knowing trades. It would have been a material advantage to the force under his orders in the late campaign, as well as to the Service, if there had been soldiers in its ranks who worked in iron and wood; who could have repaired damaged rifles, saddlery, tents, &c., made shoes and summer clothing. There was plenty of material, wood, iron, khakee cloth, leather, &c., but unfortunately next to no workmen. General Officers are invited to offer any suggestions which may occur to them, and to elicit information from officers commanding regiments on the important subject of the Government Order, which has for its object the useful occupation of the soldier's long leisure during an Indian hot season, as well as his comfort and welfare whilst in the service, and after he has left it. Useful occupation must be the means of raising the moral condition of the soldier; it causes habits of order and industry to take the place of idleness and intemperance, which enervate the best health, the noblest energies, the ablest intellects. Useful occupation has further advantages. It enables the soldier to gain a competency whilst in the service, and a livelihood when he returns to his home. It enables him to bring up well his family, to assist aged parents, and to settle down into a good and useful member of the State.

Jersey.—In consequence of the inconvenience and danger attendant on the passage of the "Bridge," a ledge of rocks which is uncovered for a few hours at low tides between Elizabeth Castle, Jersey, and the main land; the new Lieutenant-Governor, Major-General Douglas, has determined on removing the troops from the Castle to the barracks in Fort Regent, on the hill over the town of St. Helier's. This change will be a boon to the men and officers who have hitherto been almost close prisoners in the Castle, especially during the winter months; and even when able to leave, the tide, particularly during the prevalence of north-west winds, rushes up with such speed as to render the danger very great, and not a year passes but that men are drowned in returning off pass at night to their sea-girt quarters. The old Castle will in future be occupied by married men, who seldom quit the place, and are glad of the good accomodation it affords; and the rest of the troops will be quartered on the main land as soon as the casemates in the Fort are sufficiently repaired to receive them. Major-General Douglas deserves the best thanks of the soldier for this most considerate act. We learn by a letter from Jersey that the guns which are mounted in Fort Regent, and in all the other batteries round the island, have been painted in colours similar to the parapets and embrasures on which they are mounted. This is in accordance with the recommendation of the engineers to the War Department, that the objects in a fortification should be rendered as little conspicuous as possible, and that by an assimilation of the colours this object would be effected. We understand that the deception thus carried out is perfectly successful, and we presume that it will be extended to all the batteries throughout Her Majesty's dominions. It will however be some time before, at a nearer view, our eyes are accustomed to green guns and stone-coloured muzzles, instead of the sober hues our dogs of war have hitherto sported.

Recruiting.—The annexed Circular Memorandum has been addressed to the Army at home in reference to recruiting for the regular Army:—"Horse Guards, November 13.—In every instance of the enlistment of volunteers from the Militia into the regular and Indian military forces, commanding officers are requested to report to adjutants of Militia the approval, or otherwise, of the men, within the period specified in the conditional discharge certificate received by the volunteer from the Militia previous to his enlistment into the regular or Indian Army. The attention of commanding officers is called to the annexed Circular Memorandum,* addressed to inspecting field-officers of recruiting districts, prohibiting recruiting parties from attempting in any way to induce Militiamen to leave their respective regiments in order to enlist into the Line.—By command of His Royal Highness the General Commanding-in-Chief.—A. Horsford, Deputy Adjutant-General."

* All recruiting parties are to be strictly forbidden from attempting in any way to induce Militiamen to leave their respective regiments in order to enlist in Her Majesty's regular forces; Militiamen having no more right so to enlist than men of one Line regiment have to enlist in another, without the consent of the commanding officer. Such a proceeding on their part amounts to desertion, and will expose them to the penalties attached to that offence, a liability which every opportunity should be taken to make known. Volunteers, therefore, who may be anxious to enlist in the regular Army, should apply for permission to their commanding officers, who will exercise their discretion as to granting their request. It is to be clearly understood, that in all cases of men receiving conditional releases for the purpose of enlisting into the Line, they will, as now, be required to refund 18*s.* 6*d.*, to cover the bounty and other expenses incurred on their enrolment, also any balance of bounty they may have received in advance on account of their first engagement, if reattested for a second.

Paymaster.—A correspondent suggests that "a paymaster who had served 15 years as commissioned and non-coramissioned officer, of which 10 years shall have been as a commissioned officer on full pay, and therefore in receipt of 15*s.* a day, should at once receive the honorary rank of captain (now conferred for five years' service as paymaster, although he may not have served in any rank previously). After 25 years' service as a commissioned and non-commissioned officer, of which at least 15 years shall have been as a commissioned officer on full pay, including not less than five years as a paymaster, to rank as an honorary major (now conferred after 15 years' service as a paymaster only, or after 15 years as a commissioned officer, of which 10 years shall have been as a paymaster). To attain the rank of captain all previous service before appointment as a paymaster is now ignored, and for that of major all service in the ranks, as also all but five years of commissioned service. As regards the first, there are instances of paymasters of thirty years' general service, nearly twenty of which commissioned, but not having five as a paymaster, who have not yet got rank as captain, while others of simply five as a paymaster have attained it. Secondly, others of more than fifteen years commissioned service, and ten years previously as non-commissioned officers, are precluded from the rank of major, because ten of the fifteen had not been as paymaster; thus, in some instances, the far senior officer is without honorary rank at all, his junior having attained it simply as the result of accident from a death vacancy, &c., giving him the paymastership earlier, and not from any superior merit."

COLCHESTER CAMP.

The yearly course of musketry instruction of the 9th and 10th depots, stationed in this camp, has just concluded, and by an examination of the subjoined returns, it will be seen that the improvement, at least in one Depot Battalion, has been most marked and regular during the past three years. The 9th battalion comprises the depots of the 1st Royals, 6th, 54th, 56th, 66th, and 88th Regiments, and the 10th battalion includes 5th Fusiliers, 34th, 37th, 38th, 44th, and 97th Regiments, the total number of men under rifle instruction being about 1300; these, however, do not include the best soldiers in the Army, the depots being made up chiefly of young recruits, or men who have been invalided home after years of foreign service, and therefore not the most likely men to rank high in the figure of merit. It is now well known that each man is expected to have eight days' firing during the year, and that the range varies from 100 to 900 yards. For this purpose the men have been regularly drafted to Landguard Fort, near Harwich, where an excellent rifle range has been obtained, and the following is the official result of the yearly course of instruction:—

	Average Points.				Figure of Merit.		Average Points.		No. of Men per cent. in each Class at Final Classification			Marksmen, per cent.
	1st Period.	File Firing.	Volley Firing.	Skirmishing.	Battalion.	Best Company.	2nd period 2nd class.	3rd period 1st class.	3rd cl.	2nd cl.	1st cl.	
9th bat.	14·88	8·9	7·35	4·01	35·22	39·37	8·85	5·11	17	58	25	5
10th do.	15·14	10·13	8·21	4·88	38·36	44·11	8·16	5·41	18	59	24	4

The best shot in the 9th battalion was Sergeant M. Knights, 1st battalion, 6th Regiment, who made 13 points; the best judge of distance was Private J. Smith, 88th Regiment, who made 23 points in the 1st class. The figure of merit in the 10th battalion in 1858 was 28·04, and in 1859, 35·21, thus showing an increase of several points in each year, which clearly proves the soundness of the principles upon which the musketry training of the soldier is based. A powerful spirit of emulation exists amongst the men, espepeially of the 10th battalion, which is fostered and encouraged by the officers, who have done all in their power to promote the efficiency of the troops. In fact, the men in their undue anxiety to stand well, have failed to make so good a score as they might otherwise have obtained. Although the ordinary summer course of instruction has terminated, the recruits, in large bodies, are still sent to Landguard Fort for proliminary instruction. Without any invidious allusion to other depots, we may mention that the men of the 5th Fusiliers have considerably distinguished themselves, Private J. Lomas, of the 1st battalion of that regiment, being the best shot in the Depot Battalion, having gained 12 points, and Private J. Bargair obtained 22 points as best judge of distance.

SHORNCLIFF.

The Infantry Brigade at Shorncliff, consisting of the 1st battalion 16th, 2nd battalion 17th, and the 2nd battalion of the 18th Regiments, marched out on Tuesday under the command of Brigadier Garvock. The route taken was down the Military Road into Sandgate, through the turnpike across Coolnige Bridge over the S. E. Railway, thence along the Cheriton Road and into Folkestone, returning to the camp by the upper Sandgate Road. During the march the 16th Regiment enlivened it by singing several part songs and choruses.

2nd battalion 21st Regiment. The head-quarters of this regiment, consisting of six companies, marched on the camp on Tuesday last, under the command of Lieut.-Col. Edward W. D. Lowe, C.B. The following officers also accompanied the battalion:—Captains F. G. King, S. G. B. St. Clair Giffard; Lieutenants Channer, Browne, Thornburn, Blakesley; Ensigns Walker, Feilden, Whitton; Paymaster G. Thompson; Adjutant Ferguson; Surgeon T. L. Nash, M.D.; Quartermaster P. F. Foley; 27 sergeants, 16 drummers, 427 rank and file, 31 women, and 51 children. Four companies have also marched to Dover, 2 captains, 4 subalterns, 1 staff, 14 sergeants, 2 drummers, 254 rank and file. The depôt marched from Aldershot on Monday last for Portsmouth, to embark for Nenagh, Ireland, it consisted of 140 of all ranks.

On the arrival of the 21st at Shorncliff, the sergeants of the 16th Regiment invited the sergeants of this Regiment to dinner, and the sergeants of the 18th gave them an invite to breakfast and dinner on the following day.

To show the good fellowship existing between the different corps in the Army, it may be mentioned that on the night previous to the 21st leaving Aldershot the sergeants of the 2nd battalion of the 25th Royal Scotch Borderers invited the sergeants of the former regiment to a dinner and ball; the lieut.-colonel of the 25th and many of the officers honoured the ball with their presence. The ball-room was decorated with evergreens and colours, and dancing was kept up with great animation until morning.

Testimonial to a Sergeant.—On Monday evening, the 19th inst., the non-commissioned officers of the 4th battalion Military Train, assembled in their mess-room, E range, Shorncliff, for the purpose of presenting to Sergeant Dominick Diamond, who has completed 24 years and 38 days' service, with an elegant gold lever watch, with the following inscription, "Presented to Sergeant Dominick Diamond by the non-commissioned officers of the 4th Battalion Military Train, as a token of their esteem, November, 1860." At the same time also a handsome Douay Bible, value 3*l.* 15*s.*, which was purchased by subscription amongst the privates of the corps, was also presented to the sergeant. In it was the following inscription:—"Presented to Sergeant D. Diamond by the privates of the 4th battalion Military Train, as a token of esteem, November, 1860."

On Thursday morning last Captain G. H. Gordon, of the Royal Engineers, stationed at Shorncliff, was married at Sandgate Church to Miss Blanche Emma Beatrice Case, daughter of Mrs. Case, Undercliff. The gallant captain gave a day's leave and a day's pay to every man in his company, and a large number availed themselves of the privilege granted by attending to witness the ceremony.

Volunteer Movements.—On October 29th a ri contest for prizes took place at Rye, Sussex, between members of various corps of the Cinque Ports, Surrey, Sussex, and Kent Rifle Volunteers. On that occasion the 1st prize, a silver cup, was awarded to Sergeant Renhall of the 1st (Hastings) Rifle corps; it having however come to the knowledge of Lieutenant A. M. Leith, commanding the 5th (Folkestone) Rifle corps, that Sergeant Renhall had contested the match with a five-groove rifle, instead of a long or short Government Enfield one, that officer immediately put himself in communication with the officer commanding the Rye corps, claiming the first prize for Private Thomas Kennett, of the Folkestone corps, the result will be apparent on perusal of the following:—

Right Sub-Division, 3rd Company, Cinque Port Rifles,
Rye, 12th November, 1860.

Sir,—A meeting of the officers and non-commissioned officers of this sub-division, held this day to take into consideration a letter received from Lieutenant Leith, the officer commanding the 5th (Folkestone) Company Cinque Ports

Digitized by Google

Rifles, relative to the silver cup awarded to Sergeant Renhall, of the 1st Company, Cinque Ports Rifles, on the 29th October, 1860, at Rye.

It was unanimously resolved that Sergeant Renhall is not entitled to the silver cup, he not having complied with the printed regulations for the day confining the competition to the use of the long or the short Enfield rifle, and also that Private Thomas Kennett of the 5th (Folkestone) Company, C.P.R., is entitled to the said cup; Lieutenant Crake of the 1st (Hastings) Company to the silver medal, and Private Brittenden, of the 4th (Hythe), C.P.R., to the bronze medal. Signed, WM. MACKINNON, Captain Commanding C.P.R.

F. BELLINGHAM, Ensign.
R. C. N. DAVIES, Honorary Surgeon.
JAS. F. PLOMBY, Paymaster.
A. B. VIDLAR, Colour Sergeant.
T. L. GRACE, Sergeant, &c. &c.

The Army Gazette.

WAR OFFICE, PALL MALL, NOVEMBER 20.

UNATTACHED.

To be Captains without purchase.

Lieutenant Robert Montresor Rogers, from the 44th Foot.

Lieutenant Nathaniel Burslem, from the 67th Foot.

100th Foot—Ensign John Worthy Chaplin, from the 67th Foot, to be Lieutenant without purchase, vice Bleazby, appointed to the 90th Foot.

NOTICE.

The next examination of candidates for admission to Sandhurst will be held during the week which commences the 17th of December, 1860.

WAR OFFICE, PALL MALL, 23RD NOVEMBER, 1860.

1st Regiment of Dragoon Guards—Assistant-Surgeon Joseph Watts, from the 70th Foot, to be Assistant-Surgeon, vice Davidson, appointed to the Staff.

10th Light Dragoons—Lieutenant Robert Spencer Liddell, from the 15th Foot, to be Lieutenant, vice Thomas Shirley Ball, who exchanges.

11th Light Dragoons—Surgeon John Burton St. Croix Crosse having completed 20 years' full-pay service, to be Surgeon-Major, under the Royal Warrant of 1st October, 1858.

4th Regiment of Foot—Staff-Assistant-Surgeon James Bell Jardine to be Assistant-Surgeon, vice Kearney, appointed to the Staff.

11th Foot—Serjeant-Major John Robinson Atkins to be Quartermaster, vice William Charles Napier, dismissed the service by the sentence of a General Court Martial.

15th Foot—Lieutenant Thomas Shirley Ball, from the 10th Light Dragoons, to be Lieutenant, vice Robert Spencer Liddell, who exchanges.

31st Foot—Staff-Surgeon William Freeman Daniell, M.D., to be Surgeon, vice Atkinson, appointed to the Staff.

39th Foot—Staff-Surgeon Charles Thompson Abbott, M.B., to be Surgeon, vice George Thomas Woodman, M.D., placed upon half-pay.

53rd Foot—Captain Sidney Godolphin Quicke to be Major, by purchase, vice Annesley Paul Gore, who retires; Lieutenant Robert Fannin Stoney to be Captain, by purchase, vice Quicke; Ensign Robert Brown to be Lieutenant, by purchase, vice Stoney.

56th Foot—Ensign Henry John Nuthall to be Lieutenant, without purchase, vice Williams, promoted; Lieutenant John William Huskisson to be Adjutant, vice Lieutenant Williams, promoted.

58th Foot—Major Charles Hood to be Lieutenant-Colonel, by purchase, vice Brevet-Colonel Cyprian Bridge, who retires; Captain and Brevet-Lieutenant-Colonel Charles William Thompson to be Major, by purchase, vice Hood; Lieutenant John Augustus Tighe to be Captain, by purchase, vice Brevet-Lieutenant-Colonel Thompson; Ensign Charles Edward Foster to be Lieutenant, by purchase, vice Tighe; William George Clayton Wade, Gent., to be Ensign, by purchase, vice Murray, promoted.

70th Foot—Staff Assistant-Surgeon William Evelyn Alston, M.D., to be Assistant-Surgeon, vice Watts, appointed to the 1st Dragoon Guards.

84th Foot—Surgeon James McGrigor Grant, M.D., having completed 20 years' full pay service, to be Surgeon-Major, under the Royal Warrant of 1st October, 1858.

87th Foot—Surgeon Richard George Davys Banon, having completed 20 years' full-pay service, to be Surgeon-Major, under the Royal Warrant of 1st October, 1858.

89th Foot—Staff Assistant-Surgeon J. Sumpner Joyner, to be Assistant-Surgeon, vice Walsh, appointed to the Staff.

93rd Foot—Captain and Brevet-Major William Gustavus Alexander Middleton, to be Major, by purchase, vice George Cornwall, who retires; Lieutenant Arthur Collett Nightingale, to be Captain, by purchase, vice Brevet-Major Middleton; Ensign Charles Hastie, to be Lieutenant, by purchase, vice Nightingale.

96th Foot—Captain William Frederick Metge from half-pay Gold Coast Artillery Corps, to be Captain, vice John Smith Cannon, who exchanges; Lieutenant George Irwin Thompson, to be Captain, by purchase, vice Metge, who retires; Ensign Edward Barrett Hodges Curteis to be Lieutenant, by purchase, vice Thompson.

1st West India Regiment—Ensign Arthur F. Piercy Cosens, from the 9th Foot, to be Ensign, vice Bourke, promoted.

2nd West India Regiment—Ensign Andrew Halliday Hall, from the 20th Foot, to be Lieutenant, by purchase, vice O'Shaughnessy, promoted.

UNATTACHED.

Captain and Brevet-Colonel William Henry Adams, half-pay unattached, Professor of Fortification at the Royal Military College, to be Major, without purchase.

MEDICAL DEPARTMENT.

Surgeon Thomas Johnston Atkinson, from the 31st Foot, to be Staff-Surgeon, vice Daniell, appointed to the 31st Foot.

To be Staff-Assistant Surgeons—Assistant-Surgeon William Alexander Davidson, M.D., from the 1st Dragoon Guards, vice F. O'Conor, placed upon half-pay; Assistant-Surgeon Thomas Walsh, from the 89th Foot, vice Alston, appointed to the 70th Foot; Assistant-Surgeon Edward Barrett Kearney, from the 4th Foot, vice Joyner, appointed to the 89th Foot.

BREVET.

Captain Robert Petley, Half-pay, Unattached, Professor of Military Surveying at the Royal Military College, to be Major in the Army.

Captain Francis Tower, Adjutant of the Recruiting District at Warley, to have the local rank of Major while so employed.

THE WHITWORTH RIFLE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In an article contained in your paper of Saturday, Nov. 10th, some statements are made respecting the Whitworth rifle and ordnance, which we think render a reply necessary.

It is, we believe, admitted that the results of the experiments at Hythe and Woolwich proved incontestably the superiority of the Whitworth rifle over the Enfield, in accuracy of shooting, power of penetration, and flatness of trajectory, and it is difficult to believe that these are not advantages showing superiority "in respect of its use as a military arm."

With regard to fouling, we are not aware that on any occasion the Whitworth rifle, when used with proper ammunition, has fouled. We are quite ready to prove, if indeed any other proof be now necessary, that it has no tendency to foul.

We have been informed that when certain official experiments were made, at which Mr. Whitworth was not present or represented, one rifle had shown some superiority over the Whitworth, and that the latter had manifested a tendency to foul; but we also ascertained that the shooting of the Whitworth was, on that occasion, far below its average, and the cartridges supplied from the Government establishment were found to have a short weight of powder.

It may be well to mention that the alleged superior rifle above referred to was a grooved rifle, made with the bore and turn adopted by Mr. Whitworth, that it has since been tested with some of our rifles, and did not appear by any means superior. We may add that it did not devolve upon Mr. Whitworth to supply ammunition for the official trial, and we know of no reason why his rifles were not (if they were not) fully tested with regard to fouling. It is hardly worth while to state that Mr. Whitworth did not decline to supply ammunition, and that he did not place any impediments in the way of an investigation which he was very anxious to have concluded, having placed at the free disposal of the Government the improvements he had made.

It may, however, be fairly suggested, that there is now no necessity to refer to trials made at Hythe or Woolwich in 1857 to ascertain what the Whitworth rifle can do; we venture to appeal to the results of the recent rifle contests held in various parts of the country. It is reasonable to suppose that similar results were, or ought to have been, obtained in the Hythe and Woolwich official trials, as our rifles have not been altered since these trials were made. In reply to your statement respecting the delay of the delivery of the 12-and 80-pounder guns which were purchased by the Government on the 27th of August, we beg to say that the 80-pounder was detained in order to enable us to make some experiments with shells of very large capacity. In doing this we were furthering the objects of the Government, and were not delaying the experiments of the Committee, who have been long in possession of brass guns bored and rifled on our system.—We are, &c.,

THE WHITWORTH RIFLE COMPANY.

Sackville Street, Manchester.

MR. THOMAS'S RIFLED CANNON.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Considerable attention was excited a few weeks back by a report of the enormous range obtained with Mr. Lynall Thomas's rifled cannon; and some surprise has been manifested that no further trials should have been made with this gun.

Will you permit me, as a friend of Mr. Thomas, and a lover of fair play, to explain the cause of this delay?

In the spring of last year a field-gun, rifled on Mr. Thomas's principle, gave so great a range (at that period, the greatest ever obtained) as to attract the attention of the Government; and he was requested by the Secretary for War to furnish an estimate of the expenses necessary for continuing the trial. In reply, he asked to be allowed to make the experiment on a much larger scale. To this the Secretary for War objected, stating, however, that if Mr. Thomas chose to produce a large gun, and projectiles of the description he proposed, he might do so; but that the expenses could not be guaranteed to him unless the trial proved successful.

Mr. Thomas, accordingly, at his own risk and with numerous obstacles to contend against, produced the gun recently tried; but notwithstanding the unprecedented results obtained with it, and the enormous test which it stood, every kind of shift has been employed not only to evade payment of expenses already incurred, but also to compel Mr. Thomas to continue the trials at his own private costs.

Having no other alternative, Mr. Thomas signified his willingness to continue the trials, provided the Secretary for War would distinctly state what result would be considered successful, and whether or no the expenses would be guaranteed to him in the event of such result being obtained. To this an answer was received last week, stating that if the gun upon a further trial again gave satisfactory results, that is to say, if it stood 50 rounds in succession, fired with the unheard-of charge of 25 lb. of powder, and if the projectiles gave equally satisfactory results then, "the trial being concluded," "the payment of the expenses would be considered," adding, moreover, that before any such payment could be made (*i.e.* the bare expenses of the trial), it would be necessary that Mr. Thomas should place unreservedly in the hands of the authorities the whole principle of the construction of the gun and projectiles, the result of six years' labour, and for the cost of as many thousands spent in experiments!

Now, sir, Mr. Thomas complains that whilst others have had large sums of money granted for the purpose of carrying out immature ideas, he, who never demanded his expenses until he had exhibited a result which should fully justify the Government in making the necessary outlay, has had his claims evaded.

It is to be hoped that the attention of the Secretary for War will be directed to this matter.

It really is not to be supposed that a hard-working inventor will devote his time, energy, and money, solely for his individual gratification, or even for the collective "beaux yeux" of a committee, however select.—I am, &c.,

A MINOR CANNON.

P.S. Since writing the above I observed in the *Times* of Wednesday that one of the Armstrong guns, a new "7-inch strengthened," is stated to have been proved at Woolwich with a charge of 25lb. powder and 100lb. shot; three rounds being fired, it was returned into store for use, having been pronounced perfectly successful. From Mr. Thomas's 7-inch rifled cannon three rounds were fired, with charges of 25lb. of powder each, and one of 28lb.; but with this difference, that three rounds, two with 25lb. and one with 28lb., were fired at an elevation of 37 degrees, and projectiles of 174lb. weight, notwithstanding which the success of the trial is attempted to be denied!

[NOTE.—A charge of 25 lb. is certainly heavy; but the gun, which seems to possess very considerable power, is very heavy also. Our correspondent will perhaps oblige us by comparing the results achieved with the weight, or portability of the two guns. Mr. Thomas's gun can no doubt be much reduced in weight, and if it stands the test he will not consider himself discouraged from the prosecution of his experiments.—ED.]

THE NAVY.

ADMIRALTY, NOVEMBER 20.

APPOINTMENTS.

Lieutenants—The Hon. W. Chetwynd to the Ariadne; Thomas W. Simeon to the Miranda, additional, for disposal.

Master—W. H. Fawchner to the Mersey.

Staff-Surgeon—John Sloan, M.D., to the Royal Adelaide, depot ship at Devonport.

Surgeons—William Davis, M.D., M.A., to the Immortalité, 51, at Portsmouth; George B. Hill to the Jason; John Johnson, M.D. (c), to the Sansparcil.

Paymaster—Edwin Harris, additional, to the Indus.

Assistant-Surgeons—William Carmichael, M.D. (acting), to the Immortalité; Charles C. Mitchinson (acting), to the Jason; F. F. Flynn to the Argus.

Assistant-Paymasters—Thomas Backhouse to the Immortalité; Thomas O. Joynson in charge of the Caradoc; Melville Maxwell to the Impregnable, as supernumerary.

Secretary's Clerk—Assistant-Paymaster James N. Robinson to the Impregnable.

Clerks—C. R. Drew to the Immortalité; Horatio W. P. Koosgstra to the Jason; Richard Drury to the Ariel; Thomas March to the Geyser.

Clerk's Assistant—Alfred Smith to the Colossus.

Inspectors of Machinery Afloat—William Rumble, from the Royal Albert to the Marlborough; John Davey to the Royal Albert; John Downie to the Princess Charlotte.

Chief Engineers—Francis Pearce, from the Cressy, to the Asia, for service in the Duke of Wellington; Richard H. Cowan to the Cressy; John Bonney to the Racoon; Thomas H. Symons to the Jason; Francis G. Barr to the Immortalité.

First-Classs Assistant-Engineer—Stephen Matthews (acting) to the Immortalité.

Second-Class Assistant-Engineers—George L. D. P. Keeling, to the Jason; John Osborne, and John Critchley (acting), to the Immortalité; William Young, to the Pembroke.

Third Class Assistant-Engineers—Joshua Kay, to the Indus, for the Procris; John Ferguson (acting), to the Russell; James Ritchie and John Stewart, to the Jason; George J. Barber (acting), James Wootton (acting), and Daniel Cartmel to the Immortalité; Joseph Tapp (acting), to the Jason; William Stewart (acting) and George Sullivan (acting), to the Cumberland, as supernumeraries; John Reeth (acting), to the Indus, as supernumerary.

ADMIRALTY, NOVEMBER 22.

PROMOTIONS.

Captain—Commander Frederick H. Stirling (1854), of the Hero, to be Captain.

Commanders—Lieutenant Alexander Philips (1850), of the Ariadne, to be Commander; W. H. Edye to the Hero, vice Stirling, promoted.

Lieutenants—William Parsons and Francis S. D. Broughton.

APPOINTMENTS.

Lieutenant—E. F. Weld (additional), to the Hawke, for the Coast-Guard service.

Masters—Henry W. Inglis to the Gorgon; Frederick Townsend to the Icarus.

Paymasters—Alfred Barrow to the Barraconta; Edwin Harris and John Retalluck to the Meander (additional), for service on shore.

Second Master—John E. Price to the Nile.

Midshipman—A. A. S. Watts to the Mersey.

Master's Assistant—William J. Taylor to the Rhadamanthus.

Chief Engineers—James Roffee to the Asia, for the Sutlej; Peter Wood to the Mersey.

First-Class Assistant Engineers—James Leatham to the Racoon; Thomas A. Simmonds to the Gorgon.

Second-Class Assistant-Engineer—Walter Ash to the Marlborough.

Third-Class Assistant-Engineers—John Taylor to the Hero; Peter M'Allister to the Firebrand.

Alacrity, 4, screw steam-sloop, Commander John K. E. Baird, left Malta on the 22nd instant, with a mail for the fleet at Corfu.

Ariadne, 26, screw steam-frigate, Captain Edward Vansittart, has gone into harbour from Plymouth Sound.

Bulldog. Captain Sir L. M'Clintock is now dismantling along side the Dockyard, Portsmouth, and returning to the Board of Trade the scientific instruments which he has used during his survey of the coast of Greenland. No orders have yet arrived to pay her off, but they are hourly expected.

Camperdown, old sailing three-decker, is rapidly progressing under the hands of the workmen in her transformation to a coal depot; she will lie up the harbour with three others of a similar class, and supply the smaller vessels with fuel for the purpose of replenishing the men-of-war at Spithead. Moorings are now being laid down for her in Borough Hole, and it is expected that in about six weeks she will be ready to take them up.

Centaur, 6, paddlewheel steam-sloop, Commander E. D. D. Aplin, was at Shanghai on the 19th of September.

Charybdis, 21, screw, Captain the Honourable G. D. Keane, arrived at Spithead on Wednesday last, from Sheerness.

Coquette, 6, dispatch-vessel, will go out of dock at Portsmouth on Monday next, after undergoing a repair, which may be best described by stating that she has been three-fourths newly built. She never was such a sound vessel as at the present time. She is receiving her copper.

Dasher, Commander Philip de Saumarez, with the whole of the officers and crew, and the officers and crews of the tenders Mercury, Ceres, and Jersey, have subscribed one day's pay towards the fund for assisting the unhappy families of the cutter Express, lost some few weeks ago on the rocks off the French coast.

Dee, 4, paddlewheel steam-vessel, Master Commander T. C. Pullen, was hauled on Tuesday into the basin at Keyham steamyard, to unload boilers and marine gear.

Desperate, 8, Commander John Ross, which had been ordered round from Plymouth to Portsmouth, and was waiting orders at Spithead for the West Indies, was suddenly

Digitized by Google

directed by telegraph on the afternoon of the 19th inst. to proceed to Portland, and there await further orders for sailing to her destination.

Euryalus, 51, was paid off on the 19th, and is now dismantling, under the hands of the steam reserve alongside the dockyard, Portsmouth. She is to be fitted with a poop, and will probably be commissioned for an Admiral's flag. Her crew were paid off under the new system lately brought into operation, by which, instead of leaving the men hanging about a fortnight or three weeks, they were settled with and dismissed forty-eight hours after arrival. By this, Jack is able to keep up the good character he may have earned at sea, and to present himself for a new ship, with none of his shore-going scrapes to go against him. It also enables the Service to secure the return of the men at an earlier date, and is in all respects an improvement. The ship is expected to be ready for sea in about two months.

Fancy, 2, screw gun-boat, has been placed in dock at Portsmouth to have her beds lowered prior to receiving her new boilers. The latter are fitted on the tube-protecting plan of Mr. Langley, inspector of machinery afloat, and attached to Her Majesty's Royal yacht Victoria and Albert.

Flying Fish, 6, screw steam-sloop, Commander Charles W. Hope, arrived on Sunday in Plymouth Sound from Portland, United States, having made a better passage than might have been expected, when the weather which she had to encounter is taken into consideration. The following is an abstract of her log:

Date.	Wind.	Force.	Latitude.	Longitude.
Oct. 21	E.S.E....	6	43 12	68 12
Oct. 22	Easterly	3	42 6	66 3

Nov. 17	Northerly	6	49 4	6 42
Nov. 18	North ...	6	Anchored in Plymouth Sound.	

On the 23rd of October the foretopsailyard of the Flying Fish was sprung, and a heavy swell was experienced from the eastward; on the 24th confused sea. November 6th, ship was struck by a heavy sea; 7th and 9th, heavy swell from the north; 10th, very heavy sea from north-east; 12th, same from north; and 13th, from north-east. This ship has gone up Hamoaze to make good her defects.

Foxhound, 4, screw steam-sloop, Commander Alfred Mitchell, had, according to our advices from Malta, which reach down to the 22nd instant, arrived at Malta after a long passage of 23 days from England. She took 9 days in running up to the island from Gibraltar.

Geyser, 6, paddlewheel steam-sloop, Commander Jackson, arrived at Plymouth on Sunday from Portsmouth, with supernumeraries. She has drawn charts for the West Coast of Africa, and has sailed, calling at Lisbon, with supernumeraries for the Channel Fleet.

Glasgow, 51. This magnificent frigate is rapidly approaching completion in Portsmouth dockyard. Her guns in the Royal Arsenal, Woolwich, were landed at the War Department on the 20th inst., and will be there numbered and stored ready for immediate service.

Harrier, 17, Commander Sir M. MacGregor, is in the basin at Portsmouth, and is rapidly setting up her rigging and running gear. She crossed yards yesterday, and is expected to be ready for sea in about a week or ten days.

Hero, 91, screw liner, Captain G. H. Seymour, has gone into Devonport harbour with a view of being docked and having her defects made good.

Himalaya, 6, iron screw steam-transport ship, Captain John Seccombe, having returned to Portsmouth at the end of last week from her successful trip in search of the Prince of Wales's squadron, began immediately to prepare for further services in her own particular department, and on Monday last she embarked detachments of the 17th, 21st, and 26th Regiments; on Tuesday morning she took on board the City of Dublin Militia Artillery, and sailed for Kingstown, which she safely reached after one of her usually rapid passages, and landed the troops safe and well at their destination.

Immortalité, 51, Captain Hancock, is lying in the basin, Portsmouth, and receiving the last touches from the hands of the caulkers and painters. She is known among her new crew by the rather uneuphonious name of "'Mottalite," Jack being quite unable to twist his tongue into a French mould. This fine frigate is in want of able seamen and petty officers, but we should not think she will have to wait long for hands.

Indus, guard-ship of steam ordinary at Devonpor, Captain Astley Cooper Key, C.B. The crew of this ship have been publicly thanked by the Admiralty for their smartness in fitting out the Orlando.

Jason, 21, screw steam-corvette, Captain E. P. B. Von Donnop. Steam was got up on Monday on board this ship at Devonport, and she went from Hamoaze outside the breakwater to try her speed at the measured mile, and subsequently returned into harbour.

Jersey, cutter, tender to Dasher, Master Barney commanding, employed in the Channel Islands fishery, returned to Portsmouth on the 19th inst., for the purpose of shortening her mast. She was towed over to Alderney by Captain Saumarez.

Megæra, 6, iron screw steam transport-ship, Commander Samuel H. Henderson, left Malta on the 12th instant for Corfu, for the purpose of bringing back invalids. Several officers belonging to the garrison took a passage in her for a trip.

Miranda, 15, screw steam-sloop, Commander Henry C. Glyn, fitting at Sheerness. On Saturday last this sloop, under the charge of Commander O. B. Crewe Read, Mr. W. Price, inspector of machinery afloat at Sheerness, and Mr. G. Blaxland, chief engineer in Her Majesty's dockyard, left Sheerness harbour and proceeded to Mapling Sands for a trial of her machinery at the measured mile, previous to her leaving for Portsmouth. She attained the mean speed of 8½ knots per hour, but it was found necessary to bring her into the harbour again, to undergo some alterations in her boiler, consequent upon the too great accumulation of water. She will remain at Sheerness for some days until the defects are made good.

Nimrod, 6, screw steam-sloop, Commander R. J. Wynniatt, was at Shanghai on the 19th of September. This sloop, which has been in commission since March, 1857, and which left England on the 8th of April following, has been ordered home for several months past.

Octavin, 51, old sailing frigate, having been cut and lengthened about 60 feet, is progressing fast under the workmen's hands in No. 9 dock, Portsmouth yard. The joiners have been put on during the last week. It is expected that she will turn out a fine frigate when completed.

Osborne, paddle, Master-Commander C. H. K. Bower. The suite of Her Imperial Majesty the Empress of Austria embarked on board this ship on Wednesday, and soon after 11 a.m. she steamed down the Scheldt, and arrived safely yesterday morning in Plymouth Sound.

Pioneer, 6, screw steam-ship, Commander Hugh A. Reilly, arrived at Shanghai, from the Peiho, on the 18th of September, with the detailed account of the proceedings which had occurred at the seat of operations up to the 12th of that month.

Prince of Wales, 131, screw, will try her measured mile next spring.

Rosamond, paddle-vessel, now undergoing extensive repairs in Portsmouth Dockyard, is the late Eclair, which vessel returned from the coast of Africa some years since with the most fatal cases of fever known in this country. She was sunk for a considerable time, and raised again, when she was commissioned and sent to the West Indies. Ill-luck still attended upon her, for she continued to be a very sick ship. Under the name of the Rosamond she is now again in dock undergoing repairs, which she stands much in need of, her timbers in places are full of rottenness and fungus. Some specimens of the latter may be seen branching out like a tree from her midship timbers.

Rose, gun-boat, lying alongside the dockyard at Portsmouth, is fitting out for commission, and had her masts stepped on the 21st inst.

Sanspareil, 70, screw liner, Captain A. P. E. Wilmot, C.B., has had her defects made good at Plymouth, and will return to Queenstown and re-hoist the flag of Rear-Admiral Charles Talbot.

St. George, 90, screw liner, Captain the Honourable Francis Egerton. The crew of this ship were mustered and inspected on Tuesday last at Devonport by the Commander-in-Chief, Vice-Admiral Sir Houston Stewart, K.C.B. A court-martial was held on board the Impregnable, guard-ship, in Hamoaze, on Saturday, to try John Smale, an ordinary seaman of the St. George, the Hon. Captain F. Egerton, for insubordination, in refusing to obey the orders of Commander E. H. L. Ray, of that ship. The court was composed of Commodore G. H. Seymour, C.B. (Hero), President and Captain A. C. Key, C.B. (Indus), the Right Hon. Lord F. H. Kerr (Impregnable), W. H. Hall, C.B. (Royal Adelaide), A. P. E. Wilmot, C.B. (Sanspareil), E. W. Vansittart (Ariadne), Mr. William Eastlake officiating as judge advocate. From the evidence given it appeared that the prisoner, while the ship was lying in Plymouth Sound on the morning of the 8th instant, was placed in the black list for two days by the commander for "skylarking" about the decks. When the commander directed that punishment, the prisoner said to him in reply, "That all the gun's crew knew that he was not skylarking." The commander thereupon doubled the punishment. In the evening, about an hour and a half after supper, when the black-list men were mustered, the ship's corporal ordered the prisoner to holystone the galley. To that order the prisoner replied that "he could not do it." He was then taken on the quarter-deck, where the commander repeated to him the same order. The prisoner made to that officer the same reply. He was then put in irons. The prisoner, in his defence, admitted the above facts, and said he was now sorry for what he then said. The prisoner called upon Captain Hall, one of the members of the Court, for a character. Captain Hall said the prisoner's character, whilst with him in the Indus, was either "good" or "very good," but, as he had not the certificate with him, he could not say which. The Indus was the prisoner's last ship, from which he was discharged a first-class boy. The Court sentenced him to receive 48 lashes on board the St. George, and to be placed in the second-class conduct list.

Supply, 4, iron screw steam store-ship, Master-Commander W. H. Balliston, arrived at Spithead on Tuesday from the Mediterranean with return stores, &c. She has since reached Woolwich, where she will discharge her cargo, refit, and prepare for further service.

Trafalgar, line-of-battle ship, Channel Squadron, is undergoing a thorough refit alongside the dockyard, Portsmouth, and is at present under the hands of the scrapers and painters.

Tribune is now completely dismantled in the basin, Portsmouth; as in the course of inspection it has been found that some of her timbers are defective, she will go into the dock vacated by the Coquette, when the latter vessel has completed her repairs. Her magnificent lower mainmast is now in the hands of the carpenters, who are stripping off the hoops and bands for the purpose of refitting them with others of a stronger description. This splendid stick, which is said to be the finest and most free from knots ever brought into Her Majesty's Dockyards, was cut ten miles inland, on Vancouver's Island, and dragged down to the sea shore with tackles by the crew of the ship. When we add that the spar is over 100 feet in length, and 2 feet 8½ inches in diameter, the labour and skill required for such an undertaking is not easily appreciated.

Victoria and Albert (Royal yacht), Captain the Hon. J. Denman, embarked the Empress of Austria at Antwerp on Wednesday, and reached Plymouth at 7·30 a.m. yesterday morning. She went into Hamoaze, and having coaled, proceeded on her voyage to Madeira.

THE ARMSTRONG GUN CARRIAGE.—The carriage which is intended to supersede the non-recoil principle for the use of Armstrong's 40-pounder naval gun, and which has been constructed by able and intelligent workmen of the War Department at Portsmouth under the direction of Captain Hewlett, C.B., has undergone some preliminary trials on board of the Excellent gunnery-ship with success. Five-and-twenty rounds were fired from the new carriage with rear-chocks, and on each occasion the recoil came smoothly home to a taut breeching. The carriage was then returned to the workshop to undergo some further improvements of an almost equally important nature. It had been found that on giving the required elevation to the gun, no slide could adjust itself on the stool-bed, on account of the grease and dirt which drip upon the bed when the gun is sponged out. An elevating screw has now been run through the stool-bed, to which also has been attached a new stool-block with hinges, and which can be used with the usual depression block of the service, or not, as may be required. In the absence of the stool-bed, and when the breech of the gun rests on the transom, an elevation of 22 degrees can be obtained for upper-deck firing; and with the assistance of the stool-bed, screws, and quoins, working singly or together, any elevation between that and point blank, and between point-blank and six degrees of depression, which is all the sill of the port will permit of. The gun will also be far more easily trained by the use of rear-chocks in preference to trucks; and so far as the carriage is concerned, we are really now in a fair way of overcoming the great difficulties which have presented themselves in the adaptation of the rifled cannon to the use of the Naval Service.

We find, by intelligence from Lisbon, dated the 17th inst., that the *Diario do Governo* has published an order that the officers and men of the Portuguese navy assume mourning for the space of three days, in memory of the death of Admiral Sir Charles Napier, who was Count of Cape St. Vincent in the Portuguese peerage. Moreover, the keel of a war schooner has been laid in the Royal Arsenal, which is to be called the "Admiral Napier," in commemoration of his services in the so-called war of independence in Portugal.

The Plymouth division of the Channel Fleet had, by the last accounts, arrived at Lisbon, and was at anchor in the Tagus. Nothing of consequence had occurred during the passage out.

The officers of the Revenue Cruisers and stations of the Weymouth divison of Coast Guard have presented to Commander C. M. Luckraft, late inspecting commander of that division, with a classic silver ink-stand, as a token of their esteem and respect for him during the period of his inspection of that division. The pupils of the Rev. William Lake Onslow, M.A., Chaplain and Naval Instructor of H.M.S. Euryalus, have presented him with an elegant silver chalice, bearing an appropriate inscription. Both of the above testimonials were made by Messrs. Emanuel, silversmiths to the Queen, Portsmouth.

The Navy Gazette.

WHITEHALL, Nov. 22, 1860.

The Queen has been pleased to direct letters patent to be passed under the Great Seal, granting unto Admiral Sir Graham Eden Hamond, Bart., G.C.B., the office or place of Rear-Admiral of the United Kingdom of Great Britain and Ireland, and of the Admiralty thereof, in the room of the Earl of Dundonald, deceased.

ADMIRALTY, NOVEMBER 22.

PARLIAMENTARY GRANT.

Notice is hereby given to all persons interested therein, that preparations are now being made for the intended distribution of the sum of £33,000 voted by Parliament for the Naval Forces employed on the China Station, between the 1st October, 1856, and the 26th June, 1858, which will be distributed upon the principle of granting to each person so employed, one month's additional pay of thirty days, according to their respective ratings on the last day of their service on that station, within the above-mentioned period. Agents and all other persons holding powers of attorney, prize orders, assignments, or other instruments, by virtue of which they may be legally entitled to claim the share belonging to any person, are requested, with as little delay as possible, to transmit the same, accompanied by the usual documents, to the Prize Branch of the Department of the Accountant-General of the Navy, Admiralty, Somerset House. Due notice will be given, by future advertisement in the *London Gazette*, of the date proposed for the commencement of distribution. The names of Her Majesty's ships entitled to participate are as follows:—Acorn, Amethyst, Actæon with Dove gun-boat, Algerine, Assistance, Adventure, Bustard, Banterer, Belleisle, Barracouta, Comus, Calcutta, Camilla, Cruizer, Cormorant, Clown, Drake, Encounter, Elk, Esk, Fury, Forester, Furious, Firm, Hornet, Highflyer, Haughty, Hesper, Inflexible, Janus, Kestrel, Loven, Lee, Minden, Melville, Nankin, Niger, Nimrod, Opossum, Pique, Plover, Princess Charlotte, Racehorse, Sybille, Sampson, Starling, Staunch, Sans Pareil, Slaney, Surprise, Spartan, Tribune, Volcano, Woodcock, and Watchful.

PRIZE MONEY.

Notice is hereby given, to the officers, seamen, and marines, and to all persons interested therein, that the distribution of proceeds arising from coals captured on board a Russian vessel, name unknown, by Her Majesty ship "Viper," on the 26th of May, 1855, in the sea of Azov, will commence on Thursday the 29th November, 1860, in the Prize Branch of the Department of the "Accountant-General of the Navy, Admiralty, Somerset House."

The following are the shares due to an individual in the several classes:—

	£	s.	d.		£	s.	d.
Flag share	12	14	0	Seventh Class	2	19	7
Lieutenant Commanding	30	3	3	Eighth Class	1	9	10
Fourth Class	8	18	11	Ninth Class	0	19	10
Fifth Class	4	19	5	Tenth Class	0	9	11
Sixth Class	4	9	5				

THE MILITIA.

The Queen has been pleased to approve of the Argyle and Bute Regiment of Militia being henceforth an artillery corps. The Marquis of Breadalbane is the colonel.

Suffolk Militia Artillery, under Lieut.-Colonel Adair, left Fort Gomer on the morning of the 23rd instant for Gosport, *en route* for Ipswich. They were played into the station by the band of the Royal Artillery, and arrangements were made to enable the regiment to travel by train without stoppage, until their arrival at head-quarters, when they will march in 360 strong, and nine officers. The practice which has been carried on during the past summer from Southsea Castle, was of the most satisfactory character, every attention having been paid by Colonel Adair to the instruction of his men, in which he was ably seconded by his acting-adjutant, Lieutenant Wilkinson. Fortified by the great experience he had acquired in military matters during the last five years, we shall hope soon to see the gallant colonel regain his place in Parliament, where as a senator he will be able to serve the county as well and zealously as already he

Digitized by Google

has done as a good and earnest soldier. It is probable that the Militia will be replaced at Fort Gomer, and at Sandown, Isle of Wight, by batteries of the 15th brigade of Royal Artillery, whose head-quarters under Colonel Franklyn, C.B., are now at Haslar Hospital, Gosport.

Antrim Artillery. A most fortunate escape happened to the men of the Antrim Militia this week, while at ball practice at Pembroke Dock Barracks. They had been making successful firing at a target, the flagstaff of which they had knocked away, when one of the guns burst, throwing a large portion of it into the dockyard adjacent. Only one of the men at the gun got hurt, and he not seriously, while the workmen in the dockyard, several of whom saw the mass of iron approaching, were equally fortunate in escaping injury.

MILITIA ORDERLY-ROOM CLERKS.—An intelligent correspondent, under the signature of "Veritas," calls attention to the pay of orderly-room and paymasters' clerks of Militia generally, and those of the Artillery Militia in particular, and thinks they have good reason to complain of being unfairly excluded from the benefits conceded to the Infantry under the recent alterations. The additional pay as orderly-room and paymasters' clerks, granted by the Regulations of the 1st of September, 1854, appears to be considered more than equivalent to their services, for they get no increase, and are moreover deprived of the additional pay hitherto granted during the training period, the ordinary sergeants getting an equivalent in the shape of 4*d.* a day all the year round, and which, it must be admitted, is of far greater value than the same amount for the twenty-eight days' training in the year; this is no doubt justly appreciated, and will operate advantageously. In September, 1859, a Circular was published, authorising the increase of an orderly-room clerk with the pay of a quartermaster-sergeant, which gave promise that their services would be acknowledged. But the new scale has set them down as not being worth so much as an ordinary sergeant by 4*d.* per day.

RIFLE COMPETITION FOR THE PRIAULX CUPS.—The two silver cups presented by Colonel Priaulx, Q.A.D.C., for the promotion of rifle firing amongst the men of the Guernsey Militia, were competed for on the 19th instant at the Grand Rocques. As the wind during nearly the whole of the contest blew rather strongly across the target, it was impossible for the men to fire with the same precision as they would have displayed in calmer weather. Nevertheless the practice was declared by competent judges to be a very good specimen of rifle firing under difficulties, and showed that the men had been well instructed in the use of their weapon —the regulation Enfield. Private Bonamy Martel of the 2nd company of the North Regiment, was the winner of the first cup, he having made four points. The second cup was disputed by Sergeant John Carré of the 1st Regiment, Sergeant-Major Hally, of the 2nd Regiment, and Private A. de la Mare, of the 4th Regiment, each having made three points. On the tie being fired, the cup was won by Sergeant Carré. At the close of the match the cups were presented to the winners by the Adjutant-General, Colonel White, who complimented them and the Militia generally on the skill which they had displayed. The contest occupied about six hours.

The Militia Gazette.

WAR OFFICE, PALL MALL, NOVEMBER 20.

Royal Cumberland Regiment of Militia—The Hon. Jocelyn Francis Pennington to be Captain, vice Beetham, removed from the strength of the regiment.

Regiment of Royal Perthshire Rifle Militia—Lieutenant Oliver H. Minchin to be Captain; James M'Gibbon Burn Murdoch, Esq., to be Captain; John Wedderburn Ogilvy, Esq., to be Lieutenant.

2d Regiment of Royal Cheshire Militia—Lieutenant Edward Reddish to be Captain; Ensign William John St. Aubyn to be Lieutenant, vice Reddish, promoted.

90th, or Stirlingshire, &c., Highland Borderers Light Infantry Regiment of British Militia — Allan John Colquhoun, Esq., late Captain in the Forfarshire Militia, to be Captain, vice James Colquhoun, Esq., resigned; Ensign Arthur Fawkes to be Lieutenant, vice Macalister, promoted; John Carmichael, Gent., to be Ensign, vice Fawkes, promoted.

Warwickshire Militia—1st Regiment—Oswald Augustus Grimston, Esq., late Captain 19th Regiment of Foot, to be 2d Major, vice Wise, promoted; Ensign Herbert Harrington Roberts to be Lieutenant, vice Norton, resigned.

Her Majesty has been graciously pleased to accept the resignations of the commissions held by Captain Henry S. Bowes Watson and Lieutenant John Joseph Coppinger.

WAR OFFICE, PALL MALL, NOVEMBER 23, 1860.

Her Majesty has been graciously pleased to direct that the two Regiments of Artillery Militia of the East and North Ridings of Yorkshire, shall, on and after the 1st instant, be united and form one Artillery Corps of Militia.

2nd Somerset Regiment of Militia—Lieutenant E. G. H. Salter to be Captain, vice Woodman, resigned.

5th Regiment of Royal Lancashire Militia—Ensign George Fenton to be Lieutenant, vice Richard Horley, deceased; Harry Creeke, Gent., to be Lieutenant, vice Henry John Barker, deceased; John Grimshaw, Gent., to be Lieutenant, vice Alfred Edmund Lawless, deceased; William Dugdale, Gent., to be Supernumerary Lieutenant; Paul John Henry Butler, Gent., to be Supernumerary Lieutenant.

Memorandum—Her Majesty has been graciously pleased to accept the resignation of the Commission held by Captain Allan John Colquhoun in the Forfar and Kincardine Militia Artillery.

Hertfordshire Militia—We, the undersigned, do hereby summon a General Meeting of the Lieutenancy of the county of Hertford, to be holden at the Court House, at Saint Albans, on Saturday, the 15th day of December next, at twelve o'clock at noon, for carrying into execution the purposes of an Act of 23rd and 24th Vic. cap. 120, sec. 1 and 5.—Dated the 17th day of November, 1860.

Verulam, Lieutenant,
Geo. R Marten, } Deputy-
Granville D. Ryder, } Lieutenants.

Ayrshire Yeomanry Cavalry—Major James Ogilvie Fairlie to be Lieutenant-Colonel-Commandant, vice Fairlie, resigned.

A WELL-MERITED PUNISHMENT.—On Wednesday, John Fenn, keeper of a boarding-house for seamen, in Ratcliff Highway, was charged, at the Thames Police Court, with assisting a sailor to desert from the Royal Navy. According to the Act the penalty attached to this offence is a fine of 30*l.*, or six months' imprisonment. The sailor, named Gordon, belonging to the Trafalgar, had come from Portsmouth on leave of absence, and lodging at defendant's house had been there induced by him to desert. Defendant had also promised to procure him a berth on board a merchant ship, and in the meantime furnished him with a forged certificate of service and discharge, besides exchanging the naval uniform for another dress. Mr. Yardley fined the prisoner 20*l.*, and a further charge of forgery was, at the suggestion of the magistrate withdrawn, on the ground that there was not sufficient evidence to support it.

VOLUNTEERS.

METROPOLITAN.

2ND CITY RIFLES.—Her Majesty's Court of Lieutenancy has sanctioned the addition of three new companies to this corps (Captain Commandant G. A. Spottiswoode). Its strength is therefore now four companies. It meets for drill three times a week—twice at head-quarters, 10, Little New Street, for recruits, and once in the courtyard of Bridewell Hospital for company drill.

9TH (WEST) MIDDLESEX RIFLES.—The first prize meeting of the West Middlesex Rifles commenced on Tuesday last at the rifle practice-ground, Wormwood Scrubs. The following were the successful members:—A company, Mr. F. Picton, 13 points; B company, Corporal R. Taylor, 13 points; C company, Ensign Morris, 12 points; D company, Captain Dear, 14 points; E company, Mr. W. Watson, 19 points; F company, Corporal J. Clark, 15 points; and G company, Mr. W. Barker, 10 points. On Wednesday the firing commenced at 10 a.m. The first prize of 20*l.* and the silver medal were won by Mr. W. Watson; the second prize of 10*l.* and the bronze medal were won by Captain Dear. For the third prize of 10*l.*, given by Mr. T. Hughes, and the fourth prize of 5*l.*, given by Mr. H. G. Yatman, there were five ties of 12 points each; and, after a spirited contest at the 600 yards' range, in which ties were made several times, the second prize was won by Lieutenant G. Marriner, and the fourth by Corporal Key. The prize for Instructors was won by Sergeant Roberts, Captain and Adjutant Pennymore and Sergeant Stapylton dividing the second and third prize. The Challenge Cup will be competed for to-day.

15TH (LONDON SCOTTISH) MIDDLESEX RIFLES.—This corps had a general muster on Saturday last at Westminster Hall, and, though the weather was very bad, there were between 400 and 500 members present. The "Marching Chorus," established under Mr. Benedict, and numbering 70 members, sang three airs as they marched round the hall four deep. This was their first performance, and after only three lessons, but it was a decided success, and was warmly applauded. The central company presented a handsome silver-mounted cane to Sergeant Ross, of the Scots Fusilier Guards. The battalion then formed square, and Lord Elcho addressed the corps. He stated that a Court of Inquiry, consisting of the Marquis of Abercorn, Captain Carlisle, Sergeant Leitch, and Private F. Robertson, had reported upon the case of a member of the corps found in the streets at midnight in improper company, wearing his uniform, and that he was accordingly expelled from the corps. The names on the roll-book were stated to be 870, but of these about 70 could not well be relied on, so that the corps is now 800 strong, and additions are made to the numbers every week. Lord Elcho then announced that the Lord-Lieutenant had sanctioned the formation of four additional companies. There would thus be in all 10 companies, of which four would wear the kilt, in order that a symmetrical appearance might be maintained in line by having two kilted companies on each flank. The arrangements for winter drill were then announced. Volunteer pipers, Volunteer bandsmen, and Volunteer pioneers were asked for, and the prizes for shooting were mentioned. One of these is a silver challenge cup, presented by Lord Elcho, for which 10 men from each company will compete. The prize shooting is to take place in April or May. The school of arms at Mr. Angelo's is open for three hours once a-week, when about 80 members of the corps learn to fence and box, and singlestick and sword exercise. A number of visitors were in the hall, but, by a proper restriction of the space occupied by those "off duty," the movements of the corps were not incommoded.

23RD (INNS OF COURT) MIDDLESEX RIFLES.—Colonel M'Murdo has appointed Saturday, the 1st of December next, to inspect this corps in Richmond Park.

28TH (LONDON IRISH) MIDDLESEX RIFLES.—The following Regimental Order, issued by Colonel the Marquis of Donegal, was read on parade on Tuesday evening:—"Orderly-room, Nov. 20. In consequence of the strict regulations with regard to rifle practice issued by the War Department, I am compelled to postpone the date of shooting for prizes, at present fixed for the 26th of December, until such time as the members of the corps shall have had the opportunity of qualifying themselves to contend for them. I trust that by Easter Monday all members will have passed through the requisite musketry instruction, comprising both 'preliminary drills' and 'target practice;' and, if so, the prizes offered for competition may then be shot for. I avail myself of this opportunity of alluding to a printed paper, signed 'Hibernia,' which has been placed in my hands. While deprecating anonymous effusions, there is a great deal in the paper alluded to that meets with my approval. I have much fault to find with some of the officers for non-attendance, and most sincerely hope they will be more regular in their duties for the future. If the officers of companies do not personally superintend the drill and instruction of those they command, they cannot expect their men to be as efficient as they should be. The non-attendance of officers is, however, no excuse for the members of the battalion following a bad example. There is always one officer present, the Adjutant, ready and willing to instruct them; they ought therefore to attend. The time is now drawing nigh when the regiment will be inspected, and it will undoubtedly forfeit the good name it at present bears should it be found inferior to other corps in its battalion movements, &c. It is my firm determination to recommend for promotion, as officers or non-commissioned officers, those only who are most attentive to their duties, most constant in their attendance at parades and drills, and who shall also prove themselves fully qualified to fill the different posts they aspire to; and those members only, be they officers or men, will be permitted to shoot for the battalion prizes who have gone regulary through the prescribed course of musketry instruction. In conclusion, I have only to assure the officers, non-commissioned officers, and effectives, that my constant care shall be to watch over the interests of the corps by every means in my power, to promote its prosperity and efficiency, and thereby add fresh laurels to the wreath that has ever crowned the brows of our fellow-countrymen in arms.—By order, F. Daubney, Adjutant."

1ST MIDDLESEX ENGINEERS.—This corps (head quarters South Kensington) now musters nearly 550 strong, and will probably soon reach the full strength of six companies. It has been most successful in obtaining skilled workmen of the class from which are drawn the Royal Engineers.

LONDON NATIONAL RIFLES.—A public meeting for the purpose of promoting the success of the London National Rifles was held on Tuesday evening at the sale-room of the Corn Exchange, Mark-lane; Sir John Shelley, M.P., presided. The corps mustered to the number of 400 at Westminster Hall, and marched to the place of meeting headed by drums and fifes. The proceedings were of the usual character, and steps were taken to forward the interests of the corps.

LONDON LIGHT HORSE.—The services of the London Light Horse Volunteers having been accepted by the authorities, under the designation of the 1st Middlesex Light Horse Volunteers, measures have been taken for the organisation of the corps. The authorities did not think there was sufficient distinction between the uniform selected for the corps and that of the officers of the regular Army. Instead of the silver lace, therefore, the privates of the 1st Middlesex Light Horse are to have their uniforms trimmed with white braid, and the pantaloons were to have a stripe of white cloth.

19TH (LAMBETH) SURREY RIFLES.—Saturday last this corps proceeded to the Horns Assembly Rooms. For the first time the 9th company (mustering upwards of sixty men), under the command of Captain Prewett, appeared on parade. The company, headed by the band of the regiment, marched from the St. Peter's schoolroom, Walworth, where they had been drilled by Sergeant-Major Sharpe (Scots Fusiliers). The captain has most liberally assisted a number of respectable young men in their equipment, and the corps, which now has a muster roll of nearly 650 men. The addition of an entire company was made the occasion for a display of that good feeling of the officers towards the men which has always existed in this corps, the non-commissioned officers and men being most liberally entertained. The health of the Major-Commandant was proposed and received with due enthusiasm; and a variety of other toasts were given, including that of Captain Truman, to whom the proposer (Captain Prewett) and the seconder (Captain M. Plews) paid the highest compliment for his untiring perseverance, energy, and zeal, in the promotion and welfare of the corps. The band was in attendance during the evening, and played a variety of popular airs, and the company separated about ten o'clock, highly delighted with the entertainment. It is such occasional meetings as these between officers and men which tends so much to promote the permanency of the Volunteer movement, and to destroy that class feeling so detrimental to the object one and all have in view.

BUCKINGHAMSHIRE.

ETON COLLEGE RIFLES.—This corps having recently obtained an acknowledged place among the Volunteer force of the county of Buckingham, Lady Carinton, wife of the Lord-Lieutenant, has acknowledged the zeal and merit of the young riflemen by the presentation of a silver bugle to the regiment.

ESSEX.

22ND (WEST) ESSEX RIFLES.—This corps now numbers upwards of seventy members, and is proceeding rapidly with its drill. The uniform decided upon is extremely neat.

ONGAR RIFLES.—Upwards of 60 members have enrolled themselves in this rifle corps, which possesses a well supplied exchequer. A movement is being made to provide a band, and from the donations and subscriptions published, there is every probability of its succeeding.

HAMPSHIRE.

2ND (PORTSMOUTH) HANTS ARTILLERY.—This corps has taken possession of their new quarters in the High-street, where they have their armoury, committee-rooms, sergeant-major's quarters, drill and reading-rooms, &c. Three cups and a gold medal have been presented to the corps, to be competed for by the members during next spring, from the 32-pounder practice guns at Southsea Castle; distance 1200 and 2000 yards.

KENT.

GRAVESEND ARTILLERY.—A Brigade Order has been issued prohibiting the assembly of this corps in uniform on any public occasion without the sanction of the Lord-Lieutenant of the county. The wooden model of a 68-pounder gun is being constructed, to afford the members an opportunity of frequent drill practice. A number of the new pattern bayonet carbines have been received for the use of the corps.

LANCASHIRE.

1ST LANCASHIRE ENGINEERS.—On Tuesday night this corps was sworn in at St. George's-hall, Liverpool, which was densely crowded on the occasion. Eight companies in all were sworn in, under the immediate command of Captain-Commandant Newlands, the borough engineer, under whose auspices the corps has been chiefly organised. After the oath had been administered Colonel Wilbraham, C.B., addressed the men, and in doing so expressed his partiality for the red uniform. He said his own feelings were in favour of red for the whole Volunteer force, as in 1804. He considered that a great deal too much had been said about making our soldiers invisible. No doubt, it was desirable that skirmishers should be hidden from the enemy to some extent, but skirmishers formed a very small portion of troops in position, and, as General Sir George Wetherall had said to the Derby Volunteers, if ever their services were required it would be as troops in position. He had a great belief in the wholesome effect the sight of imposing masses of red coats would have upon any invading force; and, if that force did come near enough to distinguish between the Volunteers and the Line, he hoped they would find, to their cost, that it was, as the old proverb has it, a distinction without a difference.

SURREY.

13TH (GUILDFORD) SURREY RIFLES.—On Wednesday last the first annual rifle contest in connection with this corps, came off at Blackheath, in the parish of Wonersh. Private Bond carried the first prize by scoring 11. For the second and third prizes ties had to be shot, and the result was that the former fell to Private De Wilton, and the latter to Private Dart. At 200 yards there were ties for all the

Digitized by Google

prizes, and the following were eventually declared to be the winners :—1st prize, Private H. Roker; 2d, Sergeant Impey; 3rd, Private J. Moon.

SUSSEX.

12TH (WESTBOURNE) SUSSEX RIFLES.—This corps, which is making considerable progress in drill and target practice, have received during the last week upwards of 20 eligible recruits, most of whom are from the parish of Funtington, so that the company now numbers upwards of 60 effectives.

BOUSFIELD TESTIMONIAL.—On Monday last, at St. George's Hall, Lord Elcho (no mean authority on Volunteer matters), in his eloquent address to his distinguished audience, at the distribution of the Hightown prizes, stated, amidst the universal applause of the company, that whilst others were talking, "Lieut.-Colonel Bousfield and the gentlemen of Liverpool were practically carrying out the principles of the Volunteer movement." And we this day notice with peculiar pleasure that Lord Derby has indorsed the sentiments of the committee—"that Lieut.-Colonel Bousfield, as the pioneer of a movement that led to the formation of the present large Volunteer force, is entitled to a substantial recognition of those services," by adding his name to the list of subscribers; thus confirming the paragraph in the letter of Sir Duncan M'Dougall, that it was Lieut.-Colonel Bousfield's offer of service that led the Government of the Earl of Derby to issue the Circular from which has resulted the success of the Volunteer movement.—*Liverpool Albion.*

WALTHAMSTOW.—In this town a corps has been formed, numbering about fifty effective numbers, but to facilitate their general efficiency they have joined the 2nd Essex, or Ilford company. W. Catesworth, Esq., has been chosen captain, A. Wilson, Esq., lieutenant; and H. Dobree, Esq., ensign.

ESSEX.—This county, which from the commencement of the Volunteer Movement, has evinced a deep interest in the principles and practice of self-defence, has now enrolled upwards of 20 companies of "good men and true," numbering altogether very few short of 3000 effective troops. Generally the funds are in a satisfactory state, the men in high military condition, and well versed in all the routine of active duty, and their popularity in no degree diminished.

CHELMSFORD.—This corps has laboured under great disadvantages in consequence of the rifle butt having been condemned, after considerable outlay of money, which prevented the corps having its proper rifle practice; but a suitable butt will shortly be constructed, and the firing re-commence.

COLCHESTER.—The members of this corps have obtained from the corporate authorities the use of the Town Hall for evening drill; the town has also liberally provided new instruments for a rifle corps brass band, including 16 performers, who are members of the corps.

MALDON.—In this town the liveliest enthusiasm prevails, and although only a few months have passed since this corps was enrolled, it now numbers nearly 100 members, including a very efficient band. The donations to the fund for supplying the corps with the requisite equipments amount to more that 500*l.*, and the uniform has been determined upon. Immediately the men are prepared to commence firing, an excellent range of 1000 yards for ball practice, with a natural butt, which has been sanctioned by the Government Inspector, will be provided for their use, and this corps bids fair to be second to none in the county.

IMPROPER CONDITION OF ARMS ON INSPECTION.—The commanding officers of the various corps of Rifle Volunteers have received the following War Office Memorandum, as to the improper and unserviceable state in many instances in which the arms of Volunteers had been found on inspection, arising from dirt, rust, &c. :—"War Office, 19th Nov., 1860. —*Memorandum*—The Secretary of State for War has learned with regret from the reports of inspecting officers, that some of the Government arms in possession of certain corps of Volunteers are nearly unserviceable from dirt and rust; that in some instances rifles which were foul from previous firing had been left uncleaned for a month, and that in others some of these valuable arms had been taken away by members of the corps, and even lent by them for private purposes. Mr. Secretary Herbert, in reminding commanding officers of their responsibility in regard to the Government arms intrusted to the corps under their command, thinks it necessary to point out that the barrel of the rifle is so delicately finished that the action of rust inside must inevitably destroy the integrity of the grooves, and, that, consequently, independently of the discredit which attaches to a corps the members of which prove to be unfit to have the charge of such weapons, serious damage is done to the property of the public by those whose pride it should be to maintain their arms in perfect order. The establishment of officers and non-commissioned officers for a company of Volunteers is amply sufficient to insure a proper supervision of the arms consistently with other occupations. Mr. Herbert is therefore forced to the conclusion that neglect of duty must always exist in corps where arms are reported to be nearly unserviceable through dirt. The cleaning of a rifle constitutes an important part of the drill of every recruit. (See 'Field Exercise,' sect. 33, part 6). Too much pains cannot be taken to impress upon the minds of the men the necessity of preserving their rifles at all times in the highest condition, and the impossibility of producing accurate shooting with them when dirty. This is the first exercise in which the recruit is to be instructed. The habitual inspection of arms upon parade forms an equally important branch of the duty of an officer.—Sect. 31, part 6. With the arms at the 'port' and at the 'half-cock,' the inspecting officer will pass down the ranks to ascertain that the locks and the sights are serviceable and perfectly clean, and that the nipples are free from rust. With regard to the examination of the barrel, the piece of rag kept in the pouch having been placed in the jag or slit in the head of the ramrod, and passed down the inside, the officer will proceed to ascertain if the insides of the barrels are clean or otherwise. 'If clean, no dirt should appear on the rag.' These are simple rules, and the strict observance of them should become the habit of every officer and Volunteer.—De Grey and Ripon. To the commanding officer, —— Volunteer Corps." The complaint contained in the foregoing document can, of course, only apply to those rifle corps which have already undergone the inspection of Colonel M'Murdo and his coadjutors, but it is also, no doubt, intended as a salutary warning to those regiments which have as yet to undergo that searching ordeal.

On Friday week the commanding officers of the various regiments received the following communication, with a view to ascertain the strength and conduct of the same :—"War Office, Nov. 12, 1860. Sir,—I am directed by Mr. Secretary Herbert to request that you will cause the inclosed form of diary to be strictly kept by the adjutant of the corps under your command (from the date of the receipt of this Circular), and transmitted through the assistant-inspector of the division, on the 1st of every month, for the information of the Secretary of State for War. I have the honour to be, &c., George Erskine. To the commanding officer —— Rifle Volunteer Corps." The form accompanying this document is of a very elaborate character, and calls upon the adjutants of regiments to make correctly the following returns monthly, viz. :—The designation of each corps, station of head-quarters, distance from head-quarters of battalion, establishment, companies, sub-divisions, sections, enrolled strength, field-officers, captains, subalterns, staff-sergeants, buglers, rank and file—total. Daily distribution of duties, with date, where employed, how employed, the description of parade or drill, and the nature of instruction imparted. Present on parade, field officers, captains, subalterns, staff, sergeants, buglers, rank and file—total. It will be therefore seen that this return will not only embrace the numerical strength at which the various Volunteer corps muster from day to day, but it will also form a guide to the War Office authorities of how the officers who have been honoured with Her Majesty's commission perform the duties entrusted to them.

A spirited effort has recently been made in Lambeth and Bermondsey to form an Artillery Volunteer Corps, and already, though the attempt was set on foot so recently as the middle of September, 200 men have enrolled themselves as members, about a third of whom are artisans, and the rest belong to the trading and professional classes. The head-quarters of the corps are in Union Place, Lambeth Road, where one of the arches of the South Western Railway has been inclosed, adapted, and lighted as a place for drill.

A company, 50 strong, has been organised at Brandon, Lord William Powlett has been chosen Captain; the Baron de Bliss, First Lieutenant; Mr. J. Gates, Second Lieutenant; and Mr. D. Garner, Ensign. Major-General Angerstein has presented 50*l.* to the funds of the corps, and Lord William Powlett has added a similar donation, and the Baron de Bliss has promised the use of his park for drill, practice, &c.

The Earl of Yarborough has consented to become a patron of the Lincolnshire Rifle Association, and Earl de Grey and Ripon will be President. Major Amcotts has been elected a vice-president, and several captains of local corps have announced their willingness to serve on the council. The proposed mounted corps formed in the county will serve as a portion of the Lindsay battalion, the regulations of the War Office not admitting of the organisation of a distinct mounted force.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, NOVEMBER 20.

Renfrewshire Rifle Volunteers—1st Battalion—George Barrington Godbold, Esq., late Captain 4th Middlesex Militia, to be Adjutant.

Memorandum—The name of the Right Hon. John Major Henniker, gazetted as Lieutenant in the 10th Suffolk Rifle Volunteer Corps, ought to be John Major Henniker Major, instead of John Major Henniker only.

THE ARMY AND NAVY GAZETTE
AND
JOURNAL OF THE MILITIA AND VOLUNTEER FORCES.
EDITED BY W. H. RUSSELL, ESQ., LL.D.,
(Late Special Correspondent of *The Times*.)

The subscription is *7s. 7d.* per quarter, or *30s. 4d.* per annum, payable in advance, postage included (excepting abroad, which varies according to the route and destination). All Editorial Communications should be addressed to W. H. Russell, Esq., and business letters and advertisements to Mr. Archibald Graham, to whom post-office orders, &c., are payable. Advertisements received up to Thursday evening. The Paper is published every Saturday in time for the Morning Mails.
Office, 16, Wellington Street, Strand, London, W.C.

ALDERSHOT DISPENSARY.—AN URGENT APPEAL.
An effort is being made by officers and gentlemen to establish a Dispensary; and, if well and generously supported, it is hoped that it will soon be made a most efficient Infirmary for Aldershot and its neighbourhood. Medical advice, medicine, and food will be dispensed to the poor, the outcast, the fallen, and the destitute; some of whom have actually perished for lack of such immediate assistance. The Committee feel that they have only to appeal to the public, and to the hearts and sympathies of their military friends and neighbours in the Camp, when they will cordially and liberally respond. They need not assure them that there are many such wanting instant aid, for their own eyes may behold it daily. Subscriptions of any amount will be most thankfully received; and directly that £100 is in the Treasurer's hands the Institution will be commenced. These may be paid in at Messrs. Mangles' Bank, in Aldershot; to Mr. D. M. Dewar, the Treasurer; or to the Rev. J. Dennett, Parsonage, Aldershot.

Established 1749.

ARMY, NAVY, AND COLONIAL AGENCY.—On and after 1st January, 1861, Messrs. W. R. Looker & Co. offer the services of their AGENCY to Officers and Members of the above Services at a fixed charge of ONE GUINEA PER ANNUM. A detailed prospectus forwarded on application.—12, Pall Mall East, London, S.W.

MONEY ADVANCED on BILLS, PROMISSORY NOTES, POST-OBIT BONDS, or other securities, and at 5 per cent., on property derived under wills or settlements, without publicity or delay. Confidential applications may be addressed to Mr. Morris, Solicitor, 11, Beaufort Buildings, Strand, opposite Exeter Hall, W.C.

NOTICES TO CORRESPONDENTS.

The strength of a Company of Volunteer Engineers should be 1 captain, 2 lieutenants, 1 colour-sergeant, 6 sergeants, 6 1st class and 6 2nd class corporals, 2 buglers, and from 80 to 120 privates. We believe, however, that a half company under a lieutenant will be accepted by the authorities.

L. A. V.—The motto and badges referred to belong exclusively to the Royal Artillery, and no other corps has a right to assume them.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the Editor cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the Editor.

It is particularly requested that applications for copies of the Army and Navy Gazette, &c., and advertisements be sent to the Publisher, Mr. Archibald Graham, and not to the Editor.

Army & Navy Gazette.

LONDON, SATURDAY, NOVEMBER 24, 1860.

Is it possible that the rulers of a nation, fairly wishing to fulfil its high duties under Providence, can be afflicted, for any cause, by something corresponding to what is called judicial blindness in theology? We had indeed hoped that light had burst in upon the mind of the present First Lord, and—to pursue our theological simile—that he was at least in the first stage of conversion. His Memorandum on Dockyard Economy was a signal specimen of "attrition," not merely in respect of its pounding very unmercifully the Report of the late Committee, but in its equally plain confession of the shortcomings and the backslidings of successive Lords of the Admiralty. No doubt, he did not proceed to personal confession on that occasion, appearing to be rather unconscious of the special failings of his own Board; and though all that their Lordships afterwards did was but to change the official name of Sir Baldwin Walker—calling him Comptroller instead of Surveyor of the Navy—still, they said they were also "thinking about" giving him another assistant; and we have charitably hoped ever since, that "contrition," and a sense of utter unworthiness, would certainly follow, when we might have looked for a real revival and reform at Whitehall. Instead of that (there having been no articles in the *Times* on naval affairs for some ten days) we have had the Duke of Somerset, "heady and high-minded," at the Salters' Hall, actually "boasting" and "vain-glorious" of the deeds done in his Board for maintaining the efficiency of the Navy! When the thunder of the *Times* was heard after the launching of the La Gloire, the Board of Admiralty, all of a tremor, devoutly gave itself to the subject of iron-cased ships, making, as it were, upon its knees, a bated confession of its previous shortcomings, and forthwith promised to build three more vessels like the Warrior. It was scarcely reproved for not having done so months before. The country was so glad that at last more iron-clad ships were about to be built, that they said nothing about the past; and not a whisper was heard to distract the Admiralty from their purpose. The *Times*, it is true, very properly hinted, that since the Warrior had been laid down, certain experiments had been made under the auspices of their Lordships, and that probably the Warrior might be improved upon, if those experiments were not to go for nothing, On this we contented ourselves with observing, that we trusted these considerations would not be made an excuse by the Admiralty for again doing nothing at all; and that while these old-shaped vessels were building, the present Dockyard Commission might probably get at the reports relating to diverting shot and to angulated-sided ships, and make them public; for certainly if the present Commission does not do its duty thoroughly, we shall soon have another appointed to inquire into the Admiralty as a whole. But no sooner had the Press so spoken, and the thunder of the *Times* ceased, than, as we announced on the 10th inst., the Board of Admiralty suddenly changed its mind—and the progress of the three new Warriors was at the very last moment altogether stopped! It is during this fresh pause in the fitful proceedings of the Admiralty Board that the First Lord takes credit to himself for having satisfied the expectations of the country. His Grace may be assured, that though no one doubts that "English sailors will be found to be of the same stuff as in former days," the country has no desire to find the Admiralty management always of the same stuff as he himself has described it. The French, and even the Spanish ships, to say nothing of the American, were notoriously better than ours in former wars. We suffered much in consequence; and only the admirable stuff of our blue-jackets saved us from all the natural results. "Closing with the enemy" to make up, as we used to do, for our other deficiencies, would be a melancholy and dernier resort. All the action of the next naval war will be swifter and severer than was possible with slow sailing vessels of wood and armaments of carronades. If iron-cased frigates and gun-boats mounting rifled ordnance should come against us while unprepared, not even the fire and courage of the bravest sailors in the world will be able to save either themselves or us in such a fatal contingency.

A paragraph in another column, relating to the new-shaped iron-cased gun-boats building for the French Emperor, copied from the *Patrie* of 16th November, the substance of which was given by the Paris correspondent of the *Times* on Monday last, compels us once more to revert to the subject of iron-cased vessels.

Almost from the day the Army and Navy Gazette commenced, this subject has been pressed upon the notice of the country by our correspondents or ourselves. As it now appears that the French Emperor is building iron-cased vessels modelled upon principles first recognised in England, it is only the barest justice to the English inventors, who have had the merit of anticipating what is now being adopted in France, and doing their best to give their country the benefit of their ideas, that we should publish what we happen to know on this subject.

So far back, we believe, as 1823, Mr. Gompertz proposed to the Government a plan for diverting shot, and of throwing it back upon the enemy from the sides of ships. From the drawings we have seen, we imagine all that Mr. Gompertz proposed could never be accomplished, and would not even be attempted. But still there was the germ of an idea, which even then might have been turned to a practical purpose, if inventors were encouraged instead of being "snubbed" by the authorities in England.

Again Mr. Reddie, of the Admiralty Department, in February, 1846, shortly after experiments had been made with shot as to the resistance of ordinary iron vessels at Portsmouth, suggested that other experiments should be made, chiefly with the view of protecting the bows and paddles of swift-sailing steamers by means of concave and yielding plates of steel or iron, obliquely placed, so that the shot might glance; but not a single experiment was made to test this principle, notwithstanding the fact borne testimony to by Captain Hall, who commanded the Nemesis in China, that a ball, after having indented, had actually glanced off even the convex side of that vessel. Mr. Reddie again brought the subject before the late Board of Admiralty in February, 1859, after submitting it privately to various eminent officers, and, as advised by them, also to the War Department. He has had three several answers from the Admiralty, one very recent, all differing from one another, and not, therefore, very satisfactory. The War Department decided against making the requisite experiments as to whether shot could be diverted by oblique metal surfaces, though they appear to have given considerable attention to the matter, and treated the various suggestions made to them, as to the application of this principle, afloat and on shore, in a complimentary manner, though they doubted its success.

Mr. Drake several years ago, and Mr. Clare, junior, both of Liverpool, in 1853 and 1855, also proposed to the Admiralty to build tortoise-shaped vessels, somewhat similar in principle to the tortoise gun-boats, now described as "planned by Louis Napoleon," in the French newspapers.

Captain Cowper Coles's cupola-shield for protecting guns in rafts, and which he has recently proposed should be mounted on iron-cased vessels with angulated sides, it is well known, were strongly recommended to the notice of the Admiralty by the late Admiral Lord Lyons in 1855. But not even such a recommendation, supported as it was by the favourable report of a committee of naval officers, was sufficient to influence the Board of Admiralty and the Department of the Surveyor of the Navy to make any experiments. Captain Sleigh, R.N., also, in 1858 or 1859, proposed tortoise-shaped vessels and covers for guns.

Lastly, Mr. Josiah Jones, junior, also of Liverpool, fully elaborated the idea of building a ship with inclined or angulated sides; and confident that he could build such a shaped vessel so as to be seaworthy, and that so built, its sides must needs resist shot better than any wall-sided vessel, patented his invention, and at his own expense had plates prepared for experiments. The result—contrary to what the authorities at the Admiralty and War Department expected—proved that shot could be successfully diverted by oblique metal surfaces; his plates being neither penetrated nor broken, nor the woodwork behind them materially damaged, after successive firing against them with a ten-inch gun at 200 yards. A full account of these experiments will be found in the *Times* of the 6th, 8th, and 10th August, and 14th September last, and they are also noticed in the *Cornhill Magazine* for October.

No sooner had Lord Clarence Paget announced to the House of Commons that we were only to have *four* iron-clad vessels to the *ten* laid down in France—which have since been increased to sixteen, and a fleet of gun-boats besides—than we recalled attention to this important subject, which was then taken up by the *Times*, and indeed the whole press. We have alluded elsewhere to the strange orders and counter-orders given by the Admiralty recently, and after these experiments. So far back as the 18th of August last we wrote:—

"The matter is now in the hands of the Admiralty. How soon might we have a sufficiency of invulnerable steamers! Or, are we to be surprised by the expected European crisis in the midst of jog-trot building and building, and only woke up to our desperate folly by the arrival of vessels from France, all cased in invulnerable angulated armour, quietly copied from English inventions, neglected by the Government of England?"

It is not often we care to quote ourselves. But it seems that this "desperate folly" and shameful neglect are likely to be reserved for us. The French tortoise gun-boats are as nearly as possible a combination of Mr. Jones's and Captain Coles's inventions, "quietly copied" and quickly constructed in France, while the Board of Admiralty are looking at one another in a maze, or gossiping about rams and Warriors at their clubs,—and—*doing nothing!*

Speaking of the Warrior, we beg to state that her bulwarks are not pierced for guns, as stated in last week's *Saturday Review*, nor are they intended to be. The only port-holes she will have are on her main-deck, and they are less than four feet square (and will probably be reduced, on the advice of Sir William Wiseman, R.N., to two feet, after she is launched), although they are strangely described in that erudite journal as "openings of more than 12 square feet!" There are 12 feet *between* each port-hole, which may have led to this somewhat odd description of the Warrior; and we suppose 12 feet square

Digitized by Google

was not intended by this unusual expression "12 square feet"! The Warrior, as we stated last week, is intended to be launched on 29th December.

We are very glad to state that new Warrants are in course of preparation for regulating the allowances commuted, and not drawn in kind by officers of the Service, according to their respective ranks. Among the list there are two which are, it is well known, far below the rate at which the officers supply themselves, viz., the lodging and forage allowances. With regard to the former, which is for a captain at the rate of 2*s.* a-day (and from which 6*d.* must be deducted for coals and candles, as the two allowances are never issued together), where, we ask, can lodgings for 14*s.* (or, indeed, for 10*s.* 6*d.* as it really is) be obtained in any respectable situation suitable for the convenience of a gentleman? Nor for 25*l.* a-year can a decent house of the smallest size be procured in the neighbourhood of large garrisons. It falls to the lot of very, very few officers to enjoy this allowance, as it is only given when the barracks are full; and even then only for the days on which there is no spare room in quarters; so that if an officer joins, and finding there is no accommodation, takes a lodging for a week, as he is compelled to do, the country only pays him the days in which there is no barrack room, and he may be (and always is) considerably out of pocket by the transaction. In the case of a married man it is doubly hard; for he can never get a house under a year; has heavy rates and taxes into the bargain; and taking it, perhaps in the hope of saving something out of the fire, is cut off the lodging list at a day's notice at any moment. Field officers are particularly unlucky under the present dispensation. In nearly all barracks, in a common passage with all the subalterns, a room with a closet attached is marked off as "F. O. Quarters," impossible for a married man to inhabit, the more so if he desires to keep up the respect and dignity of his rank, as the country expects him to do. But, nevertheless, this mark on the door saves the country the expense of his lodging money, and drains his pocket of one-third his pay! Now, all this is very illiberal, and requires alteration. It is unfair to expect an officer, on attaining a certain rank, and becoming a family man, to live in barracks all his life; or, otherwise, suitable quarters should be provided. In fact they are for all officers holding appointments, and for all civil officers: for regimental officers, who are the worst paid—never. Why should this distinction exist? To turn round upon a man, and say, "Live here, these are the quarters the country provides you;" knowing that a man cannot house himself and a family therein, is like asking him to have faith without works; and, as the Apostle tells us, that is even as the dead, and profiteth nothing. Respecting the forage allowance, we would simply remark that for 1*s.* 10*d.* a-day, no man can keep—that is, feed, shoe, and groom a horse for the money. Many of the contracts lately taken up for the year 1861 throughout the kingdom, and which was for feeding only, and that in large quantities, exceed that sum, clearly demonstrating the truth of what we assert. Added to this must be the risk of sickness, death, cost of saddlery, and stable appointments, for all of which nothing is allowed. Now, we by no means wish that an officer should gain a farthing by the transaction, but that he should be a heavy loser, as at present, is what we do not believe a country such as ours is ever intended.

We believe that Major-General Maclean will be transferred from the Colonelcy of the 14th to that of the 13th Light Dragoons, a regiment in which he served with great distinction for many years. Major-General Marten is the senior Cavalry General who has not got a regiment, and that fact will render his succession to the Colonelcy of the 14th Light Dragoons not unlikely.

Colonel J. L. A. Simmons, C.B., has arrived at Aldershot, and taken up the duties of Commanding Royal Engineer from the 22nd instant.

Colonel Erskine is discharging the duties of Inspector-General of Volunteers during the absence on leave of Colonel M'Murdo.

We are all naturally anxious to know the strength of the Volunteers, but the returns in reply to the demand of the War Office have not yet been received in sufficient numbers to enable us to form a close approximate estimate. We trust that the commanding officers of the different corps will be prompt in making their returns.

We gather from the *on dits* in military circles, that important changes for the welfare of the British soldier are to be introduced into our Service, which plainly evince the anxious attention the subject is receiving at the hands of the authorities. Ever ready as this journal has been in pointing out the necessity of assisting the soldier in the wear and tear of his kit, as well as the difficulty of maintaining it in decent order with the slender means at his disposal, we cannot refrain from the pleasure of giving a tangible shape to rumours of improvements which will, if realised, be considered no slight boon. It is stated that at an early date Government will provide yearly for the soldier, in addition to his tunic and trousers, two pairs of boots, one pair of light summer trousers, a fatigue jacket and cap, shirts, flannels, and socks. The soldier will be required to keep these in proper repair; and they are to last a specified time before replacement. The smaller articles of the kit he will provide himself as now; but allowing for this, repairs, and rations, we calculate a good soldier may be able to clear 6*d.* or 7*d.* out of his daily pay. We should like to hear that the opportunity of conferring such solid benefits was taken advantage of to strike off the bounty money on enlistment; for this is the chief temptation to desertion, still so common in our ranks; and with such an addition to his income as is, we believe, now contemplated, the Service will soon present sufficient attraction to young men to enable us to dispense with the fictitious and baneful allurements of bribes to induce them to enter it. We shall soon be able to say, "Nous avons changés tout cela."

The *North China Herald* of the 8th of September, in referring to the march from Peh-tang and the taking of Taku, has the following paragraph, to which we call the attention of the Board of Admiralty:—"After a too long delay at the dirtiest of dirty cities, the news was spread about that the field was to be taken on the 10th. Up to that time the movement of our troops had been impeded by the unreadiness of the French, who, although they made every exertion, could not get everything into working order as soon as the British. We must pay tribute to the zeal and excellence of the Navy at Peh-tang. They did literally everything; they conveyed the troops on shore and their baggage, became porters and guards, policemen and scavengers, so that everything began to assume something like order under the willing hand of Jack; and yet these hard-working fellows do not get a cent more for anything extra that is done, as do their more fortunate brethren of the red coat. Naval officers may sigh and think it hard, but the Admiralty will grant them no batta or Indian allowances. We for our part hope to see a more liberal policy pursued towards this popular Service, and to see all belonging to it placed at least on equality, as far as remuneration goes, with the Army."

A very extraordinary and serious accident occurred on board of H.M.'s gunnery ship Excellent, in Portsmouth harbour, on the 16th inst., which has been the subject of anxious deliberation among the naval scientific officers of the port. The men were at practice with the 40-pounder Armstrong gun, which is still under trial before final introduction to the service; on the word being given, and the lanyard pulled as usual, a concussion took place, which instantly proved to those standing about that something had gone wrong. On examination it was found that the handles of the heavy vent-piece which blocks the chamber of the gun were blown completely off, and that passing along the deck to a distance of over 50 feet, they struck and shattered the bulkheads of the sick-bay, and smashed the bottles therein. It was evident that the breech screw was not "home," and therefore that the vent piece had not been properly jammed up; but the most extraordinary part of the whole affair was, that the vent-piece itself, which is loose, had not been blown out of the chamber, and that the wrought-iron handle should have been wrenched off instead. At the time of the accident, an experiment was being made to ascertain the time in which five rounds could be fired at a target 2600 yards distant, and this particular shot fell about 1500 yards short, the force of the powder having been wasted by the chamber. The very serious question therefore arises, how far these guns are adapted for rapid firing, when, although there is risk at all times, the danger then necessarily increases in a multiplied ratio. The want of ramming home of the ventpiece, may arise from the slightest bit of the flannel cartridge protruding over the lip of the chamber, and therefore intwining itself between the flat surfaces which ought to meet with mathematical precision; or it may happen at any time from a little caked powder, or grit, in spite of all precautions. Some shot are of higher gauge than others, and take more ramming home into the chamber, which might, and probably would not be perceived in the heat of action. It is not a very uncommon thing in the Armstrong field-pieces, for the vent-piece to fly out altogether for want of tightening the breech screw; and although, on account of its great weight, it was, in the first heavy guns, proposed to place the vent-pieces in the chamber sideways, yet the wisdom of dropping them in perpendicularly is now very apparent; for otherwise one accident such as this might sweep a dozen men into eternity. The flaw in the construction is by no means irremediable; and it is very fortunate that attention has been so promptly called to it; as before the general introduction of the gun into the Navy, either by means of a slot, or a flange, or a groove, or some such simple mechanical contrivance, the matter must be remedied. It is of paramount importance that our sailors should have unlimited confidence in the fearful weapons which science and experiment are together forging for the maintenance of our power and prestige throughout the world.

It is very rarely indeed that we feel ourselves called upon to comment on the sentences of courts-martial. Many reasons, independent of considerations relating to the discipline of the Service, would forbid our doing so. But as far as the statement which appears in another part of the paper enables us to judge, the sentence passed on John Smale was rather severe. Captain Hall, a member of the court, declared the prisoner's character was either "good" or "very good," and the offence for which he was black-listed was "skylarking." He was not insolent, and he evaded rather than refused the order given to him to swab the galley. Of course the disobedience to orders implied in his answers deserved punishment, but the man expressed contrition for his offence; and we think that in addition to his removal to the second conduct list, the 48 lashes constitute an exceeding severe sentence. Ordinary seamen of "very good" character are not very common now-a-days.

The state of uncertainty which has now for several weeks prevailed at the Admiralty, in reference to the plans which should be adopted for building a further number of iron-plated ships, still exists. It appears that in the department of the Comptroller of the Navy there exists a strong party in favour of having the new vessels built on the plan of the Warrior, now in course of construction; while at the Board opinions are very much divided on the subject, for the reason that upright sides have hitherto invariably on trial presented no effectual resistance to shot. We understand that in order to arrive at an early decision their Lordships have summoned to London Mr. Richard Abethell, the master-ship-wright at Portsmouth dockyard, who has been engaged during the week in going carefully through all the various drawings on the subject, which have hitherto been sent into the Admiralty.

On Tuesday the Duke of Somerset, accompanied by Rear-Admiral Lord Clarence Paget, C.B., M.P., Captain Charles Eden, C.B., and Captain John Moore, C.B., proceeded to a factory in the vicinity of the Regent's Park, for the purpose of viewing and inspecting some very ingenious machinery, the invention of a clever American geutleman. The object sought to be obtained is the saving of time, labour, and expense in boat building; and when we state that by the process in question, a cutter of 36 feet in length can be turned out of hand ready for the water in ten hours, we have said enough to show the extraordinary character of the means used to produce such a result, especially when it is considered that the same work performed by the process now in existence could not be finished under eight days.

The Admiralty have under consideration the mode by which officers serving as First Lieutenants of Her Majesty's ships are now paid, and we confidently hope that in future the distinction as to seniority will be abolished, and that all officers when acting in the above-named capacity will receive eleven shillings per diem. The increase upon the Naval Estimates by which this plan can be carried into execution, would be a mere bagatelle, while the measure itself would be very popular in the Service.

It is understood that the Lords of the Treasury have at last yielded to the necessity of bringing together the two departments of the Admiralty at Whitehall and Somerset House in one building, which measure the Duke of Somerset, it is believed, has been most anxious to have effected.

It will be observed in the last *Gazette* that the 33,000*l.* granted to the naval forces employed in China is now advertised for distribution. It is understood that arrangements are also in a forward state for distributing the naval proportion of the Canton booty.

The Comptroller of the Navy was expected back from his short leave of absence on Monday last. His return, however, has been deferred till the beginning of next week, when he will resume the discharge of his official duties.

The Royal yacht, with Her Imperial Majesty the Empress of Austria on board, reached Plymouth yesterday morning at 7·30 a.m., and was to proceed on her voyage to Madeira if the weather continued fine. The Osborne arrived at 9·30, and after coaling, would again go to sea. We understand that the Empress did not suffer any inconvenience from sickness during the passage down the Channel.

THE ITALIAN ARMY.—General Fanti has already made his plans for the organisation of the Italian army on the basis of a population of 22 millions of inhabitants. His programme is as follows:—104 regiments of the line; 8 of grenadiers; 4 of marines; 54 battalions of Bersaglieri; 4 regiments of engineers; 16 of artillery; 8 of regular cavalry; 12 of lancers; 12 of light cavalry; 2 of hussars; and 2 of guides à cheval. Count Cavour is taking steps for the organisation of an Italian navy. It is said that Admiral Persano will be made Minister of Marine.

AUSTRIAN PREPARATIONS.—The *Militär Zeitung* publishes the following from the *Adige*, November 1st:—"The fortifications which are being constructed on the Tyrolese frontier are pushed forward with the utmost expedition. The fortifications of Deutschmetz, at the entrance of the Nonsberg, are not only worked out by day, but also through the night, by torchlight. This fortress will be bomb-proof; it commands both the left and right bank of the Noce, and the roads leading from Nonsberg, and, so to say, hermetically closes the pass. It is true the fortress may be circumvened over the Mendel towards Kaltern, and on another side over the mountains through the Ultenthal, but only by mountain paths, impracticable for any vehicles, and easily defended by riflemen."

MILITARY TRAIN IN CHINA.

The remarks in reference to the alleged "break down" of the Military Train in China, which appeared in last week's number, have excited some controversy and a good deal of comment, generally of a friendly and favourable character. A "break down" may be caused either by loading with an over-weight, or by putting on a load which is not suited to the carrier; by inherent weakness, or by the ignorance of the loaders; it may also arise from deficiency of courage or good-will on the part of the working creature. Now, we did not say one word in reference to the causes which caused the officer in command of the Military Train in China to be sent home, nor on the nature of the misunderstanding which seems to have arisen there; but we did endeavour very humbly to call the attention of the authorities at home to the fact, that it is just possible their own want of decision and definite views respecting the Military Train may have led to the occurrences which, in so far at least, are unfortunate, that they revive the traditions of misfortune which have been so long attached to our arrangements for transport and carriage. Now, let us examine this question candidly and closely, and we shall perhaps be led to the conclusion that the peculiar nature of the warfare in which Great Britain has generally been engaged has given our military authorities very imperfect notions of the duties and necessities of the transport department of our army. We have, in fact, waged no great continental war single-handed. We have had many expeditions; some not glorious—some moderately successful—a few of the highest character of military achievement. These expeditions have been either fleet-fed and fleet-carried, or have been landed in countries where there were friendly populations, to whose good dispositions English gold added a sufficient stimulus. Continental armies once launched beyond a boundary, often imaginary, into an enemy's country, have been obliged to provide for the conveyance of munitions of war and food, of sick and wounded in the field, over long distances, without definite bases of operations; and the longer their stay in the hostile country the larger their development of the special department of transport. In all the old French wars the English troops acted with large bodies of foreign soldiery, and were generally supplied by the machinery which was in use at a time when universal plunder, without any idea of compensation, was the soldier's notion of the fortune of war. We have rarely been so far from the sea as not to have felt the influence of our fleet in securing to us that universal "base of operations." In the Peninsula that was our ultimate hope, when the energies of twelve millions of Spaniards seemed inadequate to feed us. In India our armies are the mere fighting nuclei of feeding and carrying hordes of natives, whose cost in the aggregate is enormous. The Crimea opened any eyes which had lids to them, to the fact, that for want of transport it was quite possible to lose an army which was only seven miles from a base of operations, constantly supplied by the navy of the world with all the necessaries and luxuries that could be provided by the richest and most generous people in the world.

What was called the Commissariat was then said to have "broken down." Now, the Commissariat consisted of a number of gentlemen, collected suddenly from various colonies where they had been living in snug little offices, issuing contracts in the newspapers for beef and bread, keeping accounts, marrying and giving in marriage, several of whom indeed had served in Canada, during the rebellion—in China, during the war—haply in New Zealand against John Heki,—or in the arduous but not highly glorious campaign against the Caffres. Some might have had remembrances of trains of mules and droves of muleteers under the Duke in Spain. But not one of them had ever been permitted to serve at home;—there was no organisation to feed them, there was no department in the United Kingdom to control their action, and a thing called the Treasury was unpleasantly supposed to be able to direct the machinery for the maintenance of an army in the field, thousands of miles from Whitehall. The shifts we made are well known. Our navvies, our railroads, our Croats, our Turks, our Greeks, our "all sorts of corps"—Army Works Corps, Hospital Corps, Mounted Staff Corps—their names are legion, and their cost must be counted by millions. Then started up at last out of all the débris of these galvanized skeletons, under the direction of a vigorous hand, the Land Transport Corps. We shall not say a word of the early vagaries of its infant life, which were rather of a Frankenstein character. The corps absorbed some of the best soldiers in the Army. The fighting colonels mourned over the loss of their best sergeants. The Army regretted to see some very thorough soldiers going into the corps where they were likely to get promotion, and get away from expense. People of all nations in the world were assembled to act under the orders of these officers and men. Enormous matériel—some of it as rotten as if it were built by the most honest and unimpeachably high-minded contractors in the world—was sent out, and the Transport Corps seemed to be almost an army in itself, with carts, waggons, and all kinds of transporting apparatus. But we learned the great lesson once more, that it is almost impossible, even for money—and Heavens, how it was spent, as it to test its impotency!—to produce an effective organisation in the actual face of the enemy. When Sebastopol fell—and we do not say this to blame the Land Transport Corps—if it were to save our lives, and supposing they had fled, we could not have marched 10,000 men in pursuit of the Russians for three days! "Peace broke out," as the Irish soldier said—the Land Transport Corps was disbanded, and gave out its short shriek of agony. It was felt that "something must be done." The Commissariat had, everyone said (but its own particular body, and one or two people who had their own notions on the subject), "broken down"—the ass had not been quite up to the elephant's piece of artillery. And so, with some compost of the ashes of the old Land Transport Corps, and with a good deal of new elementary life, the Military Train was established. At first it was on the footing of a cavalry corps of many regiments—later it became rather a hybrid sort of mounted infantry regiment—of many battalions—purely military and combatant in so far as regarded its drill, its composition, its internal organisation, the status of its officers—more particularly in reference to some of the more curious idiosyncratic portions of the machinery of our army which relates to purchase, price of commissions, and interchange of officers from one regiment to another. The Military Train was dressed and armed as well as any regiment in the Service. There are few cavalry corps with such a becoming military uniform and more ornamentation and cavalry decoration. But though they have colonels, majors, captains, and lieutenants, instead of cornets they have only ensigns, and they are connected with certain blue carts and waggons, which they trundle about on field days, looking very like some supplementary artillery.

Some of their battalions are attached to the camps in England, where for the first time there are also to be found Commissariat officers on duty. The Quartermaster-General of the camp informs the officer in command of the battalion of the Military Train that he requires such an amount of transport to be placed at his disposal; and the carriage animals and the men under their own officers, from whom alone they receive orders, are furnished accordingly. But so far as the affairs of the Commissariat are concerned, the Military Train have no more to do with them than they have relations with the mounted sentry at the Horse Guards, with the purveyors, or with the hospital orderlies. We are not saying whether this is right or wrong. We are merely showing, according to our notions, why it was that in China the Military Train had reason to feel they were not properly treated when, as we are told, they were placed under the orders of the Commissariat (which means any one in the department, from the Commissary-General to the latest appointed clerk), without laying themselves open to any imputation that they were above their work, or that they broke down. Again, we say, let it be distinctly understood what the Military Train is—what are its duties, its rights, its position. On the question of mere obedience to orders, there can be little dispute. If the Guards were in China, and Sir Hope Grant ordered Lord Rokeby to use his battalions in cleaning the camps, in escorting cattle, in protecting the communications in the rear, and in guarding the fixed magazines, no one can deny that it would be the abstract duty of his lordship to obey. But we all know what the results of the order would be. If the Military Train is to be a sort of Commissariat Transport Corps, with officers and men on a military footing, under the Commissariat, which is not a military body, properly so called, let the authorities acquaint them with the fact and break them into it at home. *Optat ephippia bos.* Small blame to him if he be fit to wear them, for surely horse trappings are lighter than the bull's yoke; but let not the bull fancy he is a horse if he be only a bull after all. We see with dismay in the occurrences in China a fresh proof of the sad probability, that in a new war the utter inefficiency of our transport system would be as manifest and as deplorable as in the early days of the Crimea. We call on the authorities to set this question right. The transport of the Army means its life, its activity, its honour. In China we find that the Commissariat has been severely censured by the officers of division, and the Military Train does not seem prepared to make up for the deficiencies with which they conceive they have nothing to do.

GAETA.

Gaeta may cause more trouble to the Piedmontese than they are prepared to expect, if the anti-annexationists rise on their flanks and rear in any vigour, and the garrison maintains an attitude of vigilant defence. Speculations on such matters are out of our province, but we may be permitted to give some idea of the military position, which is exceedingly formidable, except the Piedmontese fleet should be enabled to take a vigorous share in the assault. Gaeta is on a peninsula, surrounded on the north, the east, and the west, by the sea, forming an isosceles triangle, of which the base is the Mediterranean, and the apex the mountains from which flows the Ausenta. On the east runs a belt of marsh land from the Mola de Gaeta to the mouth of the Garigliano, through which the strategical road of the south passes. On the west is rocky ground, gradually losing itself in marshes about fifteen miles from the fortress. Towards the north the ground is very irregular, rising as it recedes towards the interior. Several lines of narrow plateaux, one after the other towards the north-east, seem as if nature intended them to afford defensive positions for an enemy falling back from the Garigliano on Gaeta. The principal line of communication from Garigliano to Mola is, however, under fire from the sea, and the sole point of attack on the land side, by Monte Secco, is equally covered by the guns of a flotilla. It is yet to be seen, notwithstanding what has occurred, if the non-recognition of the blockade by Admiral Persano will not prevent his fleet from operating on the weak points of the position. On the land side Gaeta offers a front of less than half a mile in extent. This is covered by works of an irregular trace, built on the solid rock, and well revetted, armed with a great number of heavy guns in batteries, tier over tier, bomb-proof for the most part, with a great command and a converging fire on the points of attack. The fosse is cut in the rock, and a double covered way runs along the north side, the other sides being protected by masses of rock which extend to the sea. The base of the escarp is completely covered. The trace of the works, though irregular, has this great advantage in closing up the gorge, that it offers very few points of prolongation, and, as the greater part of the revetments are cut in the rock it is almost impossible to make a practicable breach in them. All the approaches must be made through a rocky soil, covered with enormous boulders, where no material can be had for sand-bags, fascines, or gabions, and which is under a plunging fire from 18 batteries, armed with more than 100 heavy guns. The sole drawback to those advantages is one which will not be felt much by the Neapolitans, as it is merely the want of facilities for vigorous sorties. On the sea-side there is the citadel with its casemated batteries looking on the Gulf of Gaeta. Next, five batteries along the shore covering the hospital, the magazines, the barracks, and the arsenal. Towards the south-west are works on perpendicular rock, which consist of the Castle, of St. Francis' Tower, and of Monte Orlando, the culminating point of the interior of the Peninsula. From the southern point to the intersection of the line of the land forts, with the creek on the right, are cliffs crested with batteries, which fire on all accessible points. Such is the position, and it can only be attacked on a line of about 650 yards, under such difficulties, that, if the garrison defends itself, and the sea is in possession of the besieged, or even is neutral, the defence can be indefinitely prolonged.

Gaeta has undergone three or four memorable sieges. In 1460 Alphonso V. of Spain was obliged to retire after a long investment. In 1707 the Austrians were equally unsuccessful, after a siege of three months. In 1734 a garrison of 1500 resisted for five months the efforts of an army of 16,000 men, and only surrendered in consequence of dissensions inside. In 1799 the Neapolitans indeed yielded Gaeta to Championnet; but in 1806 the garrison, aided by the English fleet, resisted Massena and 16,000 French troops successfully for nearly six months. Since the above was written, news has reached us which gives reason to think the besieged are not in a position to make the most of their advantages.

STORES FOR NEW ZEALAND.

When the late General Sir Harry Smith was haranguing a very worn and seedy looking regiment on their return to Cape Town after a miserable campaign against the Kaffirs, and shouting at the top of his voice from the centre of the square, "My brave fellows! my gallant soldiers! it will be my proud office to report to the Commander-in-Chief the deeds of valour by which you have rivalled the heroes of antiquity, &c. &c. &c.," a sturdy Yorkshire voice was heard calling from the rear, "We don't want no gammon—we wants boots!" These few plain words threw the gallant orator on his haunches, and expressed, better than oceans of foolscap bound with red tape could have done, the pith of the cry which has risen from the ranks of our Army for many decades of years. It is now our province to announce to the soldier the happy news (gathered from reports circulating among clubs and messes, but of which we have no reason to doubt the truth) that he is to have, when in future fighting his country's battles, not only his boots, but his "gammon" into the bargain.

Under the presidency of Sir Richard Airey, the Quartermaster-General, an influential board of officers has been sitting for the last three weeks at the War Office, for the purpose of considering the nature of stores to be sent to New Zealand, best adapted for equipping the soldiers to enable them to cope with a brave and wily enemy in the dense bush of that country. When such men as the President, Mr. Power, of the Commissariat; Dr. Gibson, at the head of the Medical Staff; and Mr. Ramsay, of the War Office; meet together, unfettered in their deliberations by instructions, or minutes, or estimates; and assisted by the experience of officers of various regiments who have served in that country (among whom we may mention Lieutenant-Colonel Jenner, commanding the 2nd battalion 11th Regiment), we may naturally expect a result worthy of such an opportunity; nor, believing the reports, are we disappointed. It is stated that the men are to be formed in camps of reserve in the neighbourhood of hostilities; and that strong detachments will be organised in a peculiar manner to clear the bush thoroughly of our assailants. These men will lay

Digitized by Google

aside tunic and shako, and mount a rough blue thick flannel Jersey; fatigue cap and buffs, leather gaiters and boots to lace outside, will complete their fighting costume, while each man will carry a hatchet, a tomakawk, a strong jack-knife, a tin pot, his cloak rolled, a new oilskin haversack, with provisions ready cooked inside, and a tin pot to boil his tea in the bivouac. The country through which the men have to force their way is thick bush, intersected with watercourses, and subject to heavy showers; such a country for "cock" as, excepting Albania, never was seen, only unluckily of birds of that ilk there are none. The hatchet will chop down boughs and ferns in abundance, and with his cloak will make him a bed which a prince might envy, as happily the scrub is wonderfully free of insects and other parasitical abominations. With his knife he will tripod a few skewers over the fire, and hang his pot thereon with stew, or soup, or tea; and the oilskin will keep his provisions free from wet and mould. What would not some of our newly-fledged Volunteers give to try a maiden campaign under such circumstances? The more so as our fellows are to fight with a full stomach;—an Englishman's delight this has always been, as in future it will be his privilege. The ration is increased to 1 lb. of meat, 1½ lbs. of biscuit, 1 gill of rum, coffee, tea, sugar, salt, pepper, vinegar, and mustard, the whole of which are to be served out free to the men so long as they are in presence of an enemy: that is, so long as the country is under martial law: nor is any deduction whatever to be made for his fighting kit. Coolies will follow up with provisions and ammunition; so that the men, unincumbered, will be ready to make descents on the enemy; and civilised man will stoop to fight the savage in his own way, and conquer, God willing, in so doing.

The Commissioners have, on hearing the evidence of officers of the 58th, and other regiments, recommended that large supplies of rockets, hand-mortars, and shells, should be sent out with these stores. It is the custom of the natives of New Zealand to fight, and then to eat and sleep, reversing in fact the British quality we have mentioned. Nothing annoys them more than to have their sleep disturbed by a rocket or 5½-inch shell pitched every quarter of an hour among their pahs. It was on this principle that Van Amburgh tamed his wild beasts, by stirring them up with a long pole whenever they attempted to sleep, until he had, by outraging Nature's laws, rendered the poor brutes so tame, that he could introduce his head into the lion's mouth with impunity. Such a master in the art we may safely follow.

Nor have medical comforts been omitted in their catalogue of stores, as well as many hundreds of dozens of porter, ale, and soda-water. Armstrong guns with Mercer's battery, supplied with abundance of ammunition, are, as we write, sailing down Channel *aura favente Austri:* and Veterinary Surgeon Anderson of the Royal Artillery sailed on the 20th *viâ* Egypt and Sydney to Melbourne, there to purchase horses and forward them as rapidly as possible to New Zealand, in order to be ready to mount the battery as it lands.

Considering the prevalence of the trade-winds in that region, blowing as they do for nearly 8 months in the year from the north-west, and thereby constituting of the greater part of the coast a stiff lee shore, we think it would be almost as well to send the whole of the stores to an Australian port, and there tranship them in colonial or Government steamers to New Zealand. It is the longest route, but might probably prove the shortest and safest in the end.

It is refreshing to hear of these things, and to note the good common sense which is evidently the guiding principle of the whole machinery. We doubt not but that the soldier when he reads it will prefer the "bacon" of Sir Richard to the "gammon" of Sir Harry; and agree with us most thankfully in thinking that the former gallant officer has driven his "pigs" and experience to an excellent market.

THE TRANSPORT SERVICE.

The public have sustained a very severe loss by the wreck of the screw transport ship Perseverance. It is not only the money value of the vessel that is gone, but the country has to put up with the inconvenience attendant upon the sudden withdrawal from the Transport Service of a fine ship which was in every way adapted for carrying out the duties on which she was engaged when the calamity which resulted in her destruction overtook her. We some weeks since announced that the Lords of the Admiralty had resolved upon bringing forward a scheme for introducing into the Navy a further number of large and commodious steam-transports. No time must now be lost in arriving at a decision. We have had the wreck of the Perseverance close upon that of the Assistance, and we have no right to calculate upon the future safety of the few remaining ships of the same class left to us. We must either buy or build without delay; perhaps do both if we are in earnest to profit by the experience gained by the employment of the Himalaya, and to depend upon transport ships as the most reliable source from which we are to draw an efficient supply of seamen on an emergency wherewith to equip an enlarged fleet.

THE DEFENCES OF THE TAKU FORTS.—Nearly all the guns which belonged to the Cormorant, Lee, and Plover, sunk in the attack of last year, were found mounted in the forts.

PARIS.

[FROM OUR OWN CORRESPONDENT.]

If preparations for war are to prevent war, Europe will long rest in peace, for never was there more activity displayed than at the present moment in the organisation of fleets and armies. Hardly a week passes without its new invention, either for the purpose of offence or defence. Civilisation was to do a great deal in the way of turning the sword into the ploughshare, and treatics of commerce were to finish the business altogether. Mr. Cobden has most adroitly tickled France under the fin, but not sufficiently to cause even a lull in the re-organisation of her forces.

Last week it was reported that in the commencement of spring a squadron of reserve would be formed and got ready for sea as soon as possible. A few days afterwards a paper called *L'Aigle* announced to the world that a third gun-boat had just passed Toulouse on its way from Bordeaux to Toulon, where its rigging was to be completed. This gun-boat is built on a new system, after a design by the Emperor, and is, as it were, a combination of the angular and tubular. It represents the form of a tortoise, and the single gun with which it is armed pierces the summit of the shield and moves round on a turn-table. What may be termed the shell of the vessel presents to the enemy an inclined plane from which every projectile will glance, no matter what its weight. Its sides are sheeted with steel, and it is propelled by two screws of 14-horse power. That these boats are looked upon as a success is proved by the fact that several more are in course of construction.

One of the principal questions occupying the attention of the government is the construction of an army of reserve. A captain of Pompiers has written a brochure on the subject, calling the Emperor's notice to the fact that the firemen, if organised, would produce a body of troops 200,000 strong. They are already an armed body under the control of government, and as each man is required to be well up in gymnastics, they would make excellent soldiers. If called on to serve, however, it would be a serious matter to leave the towns without proper assistance in cases of conflagration.

In England the public seem very well satisfied with the Armstrong guns, and if the accounts from China be true, the public is decidedly right. On the other hand, it appears that France is also satisfied with the performance of the "canon rayé," for orders have been given for the creation of 16 more battalions of artillery to be armed with this weapon. It is to be hoped that there is no mistake in the matter, and that it is really the "canon rayé," and not another hired cannon of English manufacture with which these new battalions are to be furnished.

For the siege of Gaeta we are promised another piece of ordnance invented by a certain Major Cavalli, which will do away with the necessity of making trenches. To each of Cavalli's guns is attached an apparatus, which occupying, from its peculiar construction, but little space, can be formed at once into either square or round towers, which will entirely shelter both artilleryman and gun. It is stated also that, far from hard to work, the major's cannon can be fired with the greatest rapidity. Its invention dates from the Crimean war, where it seems that he obtained permission from the French to try it against Sebastopol; but, unfortunately for Cavalli, he and his piece only arrived when the Malakoff had fallen. The Italian war offered a fresh opportunity. The Sardinians commenced opening their trenches before Peschiera, but before Cavalli could arrive, the armistice had been signed which so shortly was to be followed by peace. Again the Sardinian army was put in motion. Lamoricière with 50 horses, takes refuge in Ancona, which is to be besieged, but the place falls before the guns of Admiral Persano—another disappointment for Cavalli. He has now gone up to Gaeta with his "jettatura" where he again hopes to put his gun to the proof.

The commission for inquiring into the state of horse-breeding in France has just published its report. Of course "La Question Militaire" occupies a prominent place. The subject is one upon which the commissioners say it is time to pronounce some "serious decision," the question having been long enough discussed, and the remedy which they propose is the intervention of the state. Great efforts have already been made by the government, but without success, owing to their not having been seconded by private individuals. Every year France is forced to import between 11,000 and 12,000 horses, at an expense of somewhere about 18,000,000 francs, and still the supply falls short of the demand. For "haras" she spends close on 2,000,000, and last year the government imported one horse costing more than 40,000 francs, four costing more than 30,000, three more than 20,000, and in all a total of 1311 horses for the purpose of breeding. Notwithstanding all this, France finds the greatest difficulty in obtaining a remount for her cavalry directly her army passes from a peace to a war establishment. Algeria supplies her in some measure with Arabs, but in case of a war with England and Germany, she would soon be left without a squadron. The last war in Italy, which did not last long, saw France in the greatest distress for horses, and the very day that the guns of the Invalids told Paris that the armistice had been concluded, Marshal Randon was to have signed a contract with an English gentleman, who now wears the legion of honour in his button-hole, for a supply of 18,000 horses, 9000 of any shape or size to be for the military train.

The war brought to a termination, France had more horses than enough for a "peace-footing," but instead of selling off those over the number required, they were given to any farmer who applied for them on the guarantee that they should be well cared for and delivered up when the State had need of them.

Austria continues not only strengthening her position on the Po and the Mincio, but she is also busily constructing numerous works on the coasts of the Adriatic after the system Todleben. It is said that at the last inspection of Venice the engineers were not wholly satisfied with the defences, and commenced several new forts, and also some floating batteries.

Marshal Randon, the Minister of War, has addressed a circular to the generals commanding districts, relative to the formation of the army of reserve. It is reported also that a telegraph has been sent to the marshals requiring their presence in Paris, ostensibly to take into consideration the promotions for New Year's Day. General Martemprey has also been telegraphed to in Algeria, in order that some decision may be arrived at which will put an end to the continual misunderstanding between the civil and military authorities of that colony. Some of these difficulties have excited more than interest in the capital, and an affair in which the Commander-in-Chief in China, General Montauban, and a Lieutenant Drouineau, were implicated, has not yet been forgotten.

Le Nord of to-day contains an article on the Russian army. In alluding to the reduction which has taken place since the Crimean war, it remarks that Europe regards a reduction in the effective military strength of a country as a sure sign of a desire for peace. But it is more than that, it shows both force and moderation in a state which can disarm with impunity. Before the Crimean war the Russian army amounted to 1,140,000 men, during the war this effective was nearly doubled. The next year, reduced by a million in 1859, the Russian army only amounted to 850,000, which is certainly not more than sufficient for a population of 70,000,000, and a chronic war in the Caucasus. But what Russia has lost in quantity she has endeavoured to make up in quality. Many old institutions have been destroyed, and new ones created. For Russia the most important step is the relaxation of discipline, which rendered it almost impossible for an officer to distinguish himself. Once an order issued, no intervening circumstance excused disobedience. He was a mere puppet, worked by strings held at St. Petersburg. *Le Nord* states, however, that the genius showed by the Russian soldier at Sebastopol, whenever an occasion required that he should act on his own judgment, has produced such an impression on the government that much greater liberty will be allowed to him for the future. This new regime has already produced the most favourable results, so palpable indeed as to attract the attention of all the foreign officers who were at Varsovia[t]

FRENCH GUNBOATS.—A gunboat, on a new model, passed through Toulouse a few days since, coming from Bordeaux and proceeding to Toulon, where she is to be prepared for sea. This boat is constructed on an entirely new model, of which the plan is said to have been given by the Emperor. It is composed of steel plates, and will be propelled by two screws set in motion by a machine of 14 horse-power. It will carry but one piece of cannon. The boat is shaped like a tortoise. The mouth of the cannon will pass just over the back of the fish, which will present an inclined plane to the enemy, over which the balls will slide [*sic* in *Times*, should be "glance"]. The crew will be completely sheltered under the roof, of which the force of resistance is so well calculated that the heaviest shot or shell cannot injure it. It is said that several gunboats, conducted on the same model, will pass through Toulouse for Toulon. The first gunboat ready for sea is to go round to Havre, and thence up the Seine to Paris.—*Times*, Nov. 19.

We are glad to find that the friends of the Royal Naval School at New Cross are not relaxing in their exertions to raise a fund of 300*l.*, by which the council will be enabled to roof in the swimming bath, so as to make it available for the use of the pupils during the winter months. The advantages to be derived from the art of swimming can scarcely be better described than in the following letter, addressed to a contemporary by an officer educated at the school:—"Harwich, November 17.—Sir,—The wreck of the Royal Charter exemplifies, in a way to reach the hearts of all, the fearful risks to which all who 'go down to the sea in ships' are exposed, but it also enables us to realise the advantages that a knowledge of the art of swimming confers upon the shipwrecked. The waters are our highway, as they are to no other people in the world, and yet we do not qualify ourselves to traverse them. There have been shipwrecks enough to show us that the best swimmer on board becomes the prince and arbiter of the company. He who can carry a rope to shore, as in the case of the recent disaster, or pull the greatest number of helpless beings after him to a rock, is like a heaven-sent messenger to the rest. No other manual exercise or sport can be so useful or so invigorating. Yet how few sailors even are expert swimmers! It has been my duty to muster all hands for bathing in the beautiful climate of the Mediterranean, and out of a crew of two hundred men not thirty could swim! No public school, or private one of any pretension, should omit encouraging this thoroughly English and manly sport. At Eton, no pupil is allowed to boat on the river until he shall have obtained a swimming certificate. Under these circumstances, I ask you, sir, for a small space, as an old pupil of the Royal Naval School, New Cross, and one who has seen large numbers of lives lost for the want of the easy precaution of swimming, to bring under your kind notice a project for the completion of the swimming bath in that valuable institution. When I tell you that there are upwards of 200 sons of naval and marine officers receiving their education there, a large number of whom embrace the professions of their fathers, I am sure you will give a corner in your journal for the promotion of such an object. This school is, in truth, a nursery for the British naval officer; and, seeing that its benevolent foundation provides for the education of a number of the less affluent of that service, it has peculiar claims on the public—naval as well as non-naval—for support. Let us then encourage the art of swimming in every educational establishment in the kingdom; but let us, at any rate, at once give the Naval School a bath for its scholars, if only in testimony of the recent magnificent behaviour of our splendid Channel fleet.—Yours respectfully, A Lieutenant, Royal Navy." If the parents of the scholars (and who can be more interested in the question than they?) will only each contribute a trifle, the work can be set about immediately, and accomplished before the coming spring. The question is not a frivolous one, for the Lords of the Admiralty, may yet among other certificates required from a young candidate for employment in the public service, demand one for swimming. We are informed that Messrs. Drummond & Co., bankers, Charing Cross, and all the Navy Agents, will receive subscriptions; which may also be sent to the Secretary, by post office order, payable at New Cross, or in postage stamps.

Messrs. Edward Moxon & Co. announce that they will publish, early in December, a Second Series of "Hood's Own," in one volume, 8vo., illustrated with numerous cuts, price 10*s.* 6*d.*, elegantly bound in cloth.

INDIA.

[From a Correspondent.]

The Volunteer Movement.—The views of the Government in reference to Volunteers in India, are contained in a letter dated Fort William, Sept. 10, the purport of which is that no aid which the Government of India can give in furtherance of the object shall be wanting. The press in general is in favour of the move. The *Delhi Gazette*, however, can see no benefit to be derived from it, except in the Presidency towns. Its chief reasons for holding this opinion are, 1st, that the Europeans in India are so engrossed with business, and so anxious to get out of the country, that they have neither the time nor the inclination to attend drill, &c.; 2nd, that our Government when pressed for troops in England or elsewhere, will not hesitate to tell us to trust to our Volunteers; 3rd, that the numbers must be very small, and therefore that the different corps are not likely to be of much, if any, use.

It is not difficult to find answers to all these objections. The readiness with which tradespeople have already come forward at Lahore, Simla, and Delhi is proof that the move is a popular one, and that the drill, &c., is looked forward to as likely to provide a great deal of pleasurable relaxation. The second and third objections are absurd, like a woman's arguments,

"that directly tend
Against the side she would defend."

If Government can be capable of such folly as to denude the country of troops to a dangerous extent; it is obviously better that the few Europeans who are in it should be well armed, thoroughly able to act as soldiers, and completely accustomed to use that most formidable weapon, the Enfield rifle. Again with regard to numbers, who will deny that a body of 50 determined, well disciplined Englishmen, armed to the teeth, and well supplied with ammunition, are a match for almost any number of men, not only without arms but without any knowledge of the use of arms. The way that a handful of brave Englishmen held out at Arrah affords the best evidence of the value which Government may derive from its armed Englishmen. In England a Rifle Volunteer can scarcely be counted as more than a match for one French soldier, whereas a Volunteer in India may be fairly reckoned a match for any number of unarmed natives.

At Lahore the Volunteer Corps numbers 80; Sir Robert Montgomery, Colonel; Mr. A. A. Roberts, Financial Court, Captain-Commandant. At Simla, Lieutenant B. Hay was elected Captain-Commandant, and Major Good, Retired List, second in command. At Delhi Mr. Frederick Cooper, Civil Service, Deputy Commissioner, and noted for his conduct during the mutiny, has been chosen Captain-Commandant of the Delhi Corps. We hear of other corps springing up, and I hope, in the course of another month to be able to give you a list as long as that of the "ships."

The income and licence taxes are to come into force in the Punjaub on the 1st of November. The sums deducted from July, August, and September's pay bills, are to be refunded to officers stationed in the Punjab—but October's salary is to be cut—on the old ground that it is audited in the month following. Another reason put forth in an official communication is that the Income Tax being only for five years, the last month of the five years will escape. So much for Indian logic; no wonder the European soldiers were driven to mutiny when Government is capable of such subtle sophistry.

We have heard nothing more about soldiers' pets, or of the party that issued the obnoxious and mischievous order.

If the head of the Quartermaster-General's Department is to blame—the hand that could not spare General Horsford should not spare Colonel Beecher.

The income tax will practically end in the imposition of an annual fine to be distributed by the heads of guilds, castes, &c., and collected by our officers.

The instructions from the supreme Government are extremely well written, and have evident marks of Lord Canning's careful pen. A heavy fall of rain throughout the north-west provinces has done much to avert a famine, but prices are still very high, and will continue so until the winter crops show themselves.

The Ganges canal can do little, it is now discovered, to avert a famine; for want of rain of course affects its supply, and renders it of no use. Besides, it is boldly asserted that the water supplied by the canal does more harm than good, owing to the hurtful character of the soil it deposits. The masonry work, too, is in a bad way, so much so, that more than one engineer of eminence has declared it his opinion that the great Solâni aqueduct will not last five years.

We are speculating as to who will succeed Lord Canning. Sir George Clerk would be a very popular appointment, and it is said he was offered, but declined the viceroyship on the score of failing health.

By the news from India to the 27th of October, we learn that the Wagheers, baffling the vigilance, and overcoming the somewhat feeble resistance, of the Guicowar's troops, suddenly dashed out from the Gheer, and surprised the town of Korinar, thus getting possession of some hundreds of Enfield rifles and several pieces of artillery. As the treasury happened to be unusually well supplied, a large sum of money also fell into their hands, to which they incontinently added whatever valuable plunder they were able to discover in the shops. Their position is admitted to be a formidable one, and there is no doubt of their making a desperate defence. They are favoured, too, by the unhealthiness of the climate, and it is therefore to be feared that both loss of life and waste of public money will be the result of another miserable campaign against a small body of resolute marauders.

The supernumeraries brought from Portsmouth to Plymouth on Sunday by the paddlewheel steam-sloop Gorgon, 6, Commander Pim, have been transferred to the reserve depot ship Royal Adelaide, 104, Captain William K. Hall, in Hamoaze.

On Wednesday Sir Richard Mayne, the Chief Commissioner of Police, and Superintendent Mallalieu, of the London Police, arrived at Sheerness dockyard for the purpose of making arrangements for the introduction of the metropolitan force into that establishment, in compliance with the provisions of the recent Act of Parliament to that effect. The new arrangement is to come into operation at Sheerness dockyard on the 3rd of December.

INTELLIGENCE FROM THE SEAT OF WAR IN ITALY.

[From Our Own Correspondent].

Naples, 17th November.—The course of political events in this region, although progressing, has not been uniformly satisfactory. Amongst recent appointments, the more important are those of the Cavaliere Luigi Carlo Farini to be Governor of Naples and the provinces of Southern Italy; and of the Marchese di Montezemolo, to be Governor of Sicily. A royal decree, dated at Sessa, 6th November, announces the recognition of Garibaldi's position as a generale d'armata. This was a graceful compliment on the King's part, and nothing more than an act of justice done to one who had borne the whole weight of responsibility before entering on the possession of what those labours had conferred on him. The departure of Garibaldi, which my last letter reported, although expected for some time past, seems, nevertheless, to have taken many persons by surprise, and the more so, owing to the quietness of it. His parting with the King was no doubt an affecting one. It can easily be imagined that Victor Emmanuel, who has received more territory from Garibaldi than he ever did from his father, must have expressed himself in terms of affection and gratitude; the particulars of this interview are not, however, publicly known, but the manner of it may be gathered from the fact that Garibaldi refused all reward, declining even the title of marshal, as well as the "Order of the Annunciation." The only decoration the victorious general consents to wear is a star set in diamonds, to be presented by his own followers, and to bear the following legend, "I mille al loro Duce" (the thousands to their leader). It is said that the only cause of regret in Garibaldi's mind at leaving arose from an impression that his army would not be treated as he wished, i.e., incorporated into the Sardinian Army with the same grade they now enjoy, for those who should desire to remain. Various rumours have since been in circulation upon the above subject, some of which tended to confirm that impression, and others to contradict it. Meanwhile, on Monday night, a large crowd of people, armed, each with a banner or a lighted torch, traversed the Strada Toledo, crying out, "Vogliamo Garibaldi a Napoli! vogliamo il ritorno di Garibaldi! vogliamo Roma e Venezia!" Whether the movement arose spontaneously as an expression of sorrow on the part of the people for the loss of their much-loved liberator, or was, as some assert, got up by the old Bourbon party in order to produce discord, I cannot say. From whatever cause this revival of Garibaldi's popularity has arisen, certain it is, that he will himself be the one most grieved on learning what has occurred. The original army of Garibaldi's formation, and including the survivors of the expedition to Marsala, was not in the most desirable position after the arrival of the King, inasmuch as they were not certain what was to become of them. The volunteers, desirous of returning home, would be, it was well known, at liberty to do so, but the future of such as desired to remain seemed clouded with uncertainty as to the circumstances under which they would be incorporated into the Italian army, if admitted at all. The uncertainty has, at length, begun to disappear, and its disappearance is due to the publication of the following decree:—

"Order of the Day.

"The army of volunteers, commanded in Southern Italy by General Garibaldi, has deserved well of the country and of us. Whilst I with my Government endeavour to regulate it definitely according to the laws and regulations of the State, I determine—1. That as regards the grades of the officers, a commission of generals and superior officers, chosen from both armies, will make suitable propositions to me upon the documents relative to the question. 2. That to the officers, under-officers, corporals, and soldiers, rendered unable to serve owing to wounds received in the war, will be applied the provisions instituted by virtue of the laws regulating pensions, as existing in the old statutes. 3. To the under-officers, corporals, and soldiers who desire to return to the bosom of their families, a discharge will be accorded, and the means of transport will be given them, either by sea or by railway, besides which, as a mark of gratitude, they will have, to defray expenses, three months pay. The above discharge does not exonerate those who are otherwise bound to the State by the provisions of existing laws. 4. The volunteers who wish to remain under arms must enlist for two years from the present date. They will be organised conformably to the other corps of the army. 5. To the officers resigning will be given a 'gratificazione,' equivalent to six months' pay. 6. To the officers and soldiers of the National Guards, who made part of the Southern Army, is accorded also a gratificazione equivalent to a month's pay.

"(Signed) VICTOR EMMANUEL.

"Given in Naples this 12th November."

On the same day as the date of the above, the King presided at a military council composed of Generals Sirtori, Medici, Cosenz, and Fanti. There is little doubt of its object being the compilation of the articles contained in the order of the day afterwards published. It was resolved that the above-named generals, with the addition of Generals della Rocca, Cialdini, Bixio, and Türr, should constitute the commission for examining those who hold the grade of officers in the volunteer army, retaining those who are fitted for them. And as no doubt most of your readers are more interested in the result as it affects the British Volunteers, I may add that they are included in the provisions of the above recited rules. Of the British volunteers there is little to relate, but that little is startling; a number of the officers, some say as many as twenty-seven, sent in a request to Colonel Peard, requesting him to resign; this letter was followed by another, the latter has been forwarded to the War Minister, in order to be submitted to the King. As Colonel Peard has no notion of resigning the command, I fancy the dispute will serve as a reason for disbanding the corps altogether; the men will probably be sent back to England, and some, if not all, the officers admitted to the Sardinian Army. The number at Caserta when last reported to me, represented the volunteers as mustering five hundred odd, the remainder having claimed their discharge, and in many instances gone into other corps. I met one man, a sergeant, who told me he would be glad to go as servant to any gentleman going to England, if he could get a passage thereby. The sick Englishmen are to be brought down from Caserta to the Naples Hospital, which will be a much more convenient arrangement, as they will then be all together. Madame Mario, who has been very attentive to the sick, has, in pursuance of Garibaldi's wish, and consequent upon his departure, published a statement of the manner in which she has expended the money sent by the Ladies' Committee in England, and announcing the amount of balance 500 scudi, which she hands over to Colonel Repari Capo Medico, of the army, who, in conjunction with two Englishmen, will see that sum faithfully expended. The newspaper, *Il Popolo D'Italia*, in which the above statement appears, ushers it in with a well-deserved eulogy upon the Signora Jessie White Mario, who it declares has outdone even the Italian ladies in care and attention to the sick and wounded, and whose example of charity, abnegation and patriotism is held up as a pattern to all. On Saturday last Victor Emmanuel visited the temporary hospitals in the old college of Jesuits, and passed two hours and a half in conversing with the poor fellows, who are some 1200 in number; this visit was not only philanthropic but politic as well, as nothing attaches men more to their commander than evidence of sympathy for them on his part. The King also visited the Countess of Syracuse, his cousin, an attention prompted by reasons probably of the same nature. The fickle population of Naples are already beginning in part to tire of the new sovereign, and to suspect that there will be a domination of the Sardinian element in all their future governments—an idea that never seems to have struck them before. There is no doubt but the Sardinian element will predominate, and justly so, as is evidenced by a fair comparison of the respective merits of the people of Sardinia and that of Naples. On the one side is discipline and the habit of obeying lawful authority, on the other a people habituated to slavery and degradation; self-respect, self-control, and manly bearing, all distinguish the northern Italians from their southern countrymen. To the former the freedom of Italy and its unity are not mere watch-words of party, they are the symbols of a faith for which he has fought bravely and successfully; to the latter they are at the most the names of a panacea that is to remedy all political ills. The northern Italian has now been free for a long time; his brother now for the first time sees the light of freedom, and is dazzled with it. The injustice, the torture, the dungeons of the Bourbon dynasty, so far from preparing the people for freedom, have had an opposite effect, in demoralising all but the higher spirits; under such circumstances there must, at all events for a time, be a predominance of the Sardinian element; this will be essential to the practical indoctrination of a correct notion of liberty, for the accomplishment of which, in the case of a people long accustomed to fraud and injustice, and long skilled in the arts of place-hunting and mendicancy, it will require not only teaching, but example as well. Every political change that has hitherto taken place in Naples has ever been regarded solely as productive of fresh places. At the stairs of the Government offices, duly crowded with a host of urgent besiegers, the most obsequious court, the most slavish fawning, must needs be brought to bear in order to obtain any of the requests that were urged, and although "Nous avons changé tout cela,"—and the people themselves were the first to notice the change—yet it would be too much to expect its consequences to disappear as yet altogether, and until they do, there will and must be a predomination of the Sardinian element.

Again, the difference between an educated people, and one almost uneducated, will, by the simplest process, arrange the order of precedence to be occupied by them respectively. And this is perhaps the great cause of the difference between these two neighbouring peoples; the one is educated, has had schools for the poor as well as the rich, and has had them long enough to have a population that can read, whilst the Neapolitans have never had schools for any but those who were able to pay for their education, and even of the middle classes there are many who cannot read; so, when this is the case, how dense the ignorance is which pervades the masses may easily be concluded. Religious liberty will here, as it did in Sardinia, follow in the wake of education, and so long as neither one nor the other exists to raise the Neapolitan to the level with the Sardinian, the latter must, however inferior in numbers, possess the old supremacy of intelligence over ignorance, and use it for removal of the very distinction that gave it the pre-eminence. Meanwhile, the news from Gaeta seems to betoken gradual narrowing of the theatre of war, and consequent approach towards capitulation. The garrison is reported by latest advices to be receiving half rations, but as long as there is no close blockade, the Spanish ships may, as it is said they are now doing, supply them with provisions.

The latest news is of an attack by the Italian army upon the camp of the Bourbons, outside of Gaeta. The result was that the enemy was dislodged from the pazza, and the position taken. The loss on the Italian side did not exceed 100 men. The positions were of such a nature that they could only be reached with great trouble and labour. The Brigade Bergamo, commanded by General Casanova, and the 11th Bersaglieri, commanded by Major Buri, distinguished themselves much. The following day two merchant vessels (French) left Gaeta with Bourbon troops on board, destination unknown. Upwards of 1000 Garibaldians exchanged prisoners arrived here in the beginning of the week, and are, I suppose, the whole number taken. The latest report as to the future of the volunteer army is founded on a decree signed by Cavour and by Fanti, and bears date Turin, 11th November; which ordains, 1, that the volunteer army is to be kept distinct, and to be on a two years' enlistment; 2, that the advantages and obligations of officers and men will be the same as in the regular army; 3, that a mixed commission will determine the grades and seniority of the officers of volunteers as to past services, &c.; 4, that the government reserves to itself to pass officers of these corps into the regular army in such manner as to respect the acquired rights of officers of the regular army; 5, that the above do not dispense with any civil or military obligations due by any to the state. Now whether this or the order of the day will hold good, I cannot say, but incline to Cavour's as the wiser plan. The people of Naples, meantime, are more occupied with the preparations for the illumination than even with politics. To-day and to-morrow are to be the grand days, being those on which the results of the voting from Marchia and Umbria are expected; but the intention of the illumination is still to be the same as the smaller one on the 7th and 8th—an expression of joy on the part of the people at the arrival of the King.

WOOLWICH.

The appointment of Instructor in "Plan Drawing and Military Sketching," at the Royal Military Academy at Woolwich, will become vacant on the 1st January, 1861, by the resignation of Captain Pitt. Officers who are desirous of becoming candidates for the appointment are directed to address their application to the Inspector of Studies at the Academy.

Orders have been transmitted to the head-quarters of the different brigades of Artillery, directing them to raise drivers for the service of the regiment, and forward the men to head-quarters as soon as attested. Small active men accustomed to horses are not easy to pick up.

The officers of the Royal Artillery who have been at Shoeburyness for a course in the Armstrong gun, having completed their work, a fresh number, selected from all the brigades on home service, is ordered to join at Shoebury, on the 26th inst. A new course for long instruction under Colonel Gardner will also join them early in January, as the present officers will complete their studies about the 10th proximo.

THE WAR IN CHINA.—A letter just received at Plymouth from a young officer on board a Government transport at the seat of war says, "I have been inside one of the forts at the Peiho, and have had a good view of all four. They are built almost entirely of mud, and the guns, which are numerous and of heavy calibre, are for the most part fixed, but such as are not are clumsily worked by capstans on each side. The north fort was taken with great difficulty, the Chinamen standing to their guns, and defending themselves to the last, when they were overpowered and bayoneted. After the north forth was taken the allies turned one of the guns or the other forts, which soon after surrendered. The forts are very little elevated, except a kind of inner fort inside each. They are surrounded by two, and, in some places, three ditches, the strip of land between the ditches being stuck as thick as possible with sharp-pointed sticks about two feet high—a most valuable protection from attacks in that direction, as the Chinese could easily have shot down their opponents while embarrassed among the sticks. There is nothing to see ashore but mud—everlasting mud. The first time I landed the tide was low, and there was about four miles of mud, which rose so gradually that in our boat we did not know but that it was water till we stuck on it, and then with difficulty managed to get off again. I saw the very place where the troops were landed in the mud and massacred at the former attack on the forts. My last letter was directed to you from the Peiho. Since then we have sailed round to Odin Bay, and are now taking in water, with which we are to fill up. Everything is very cheap here except dollars, which I believe cost much more than they should. We can get 150 eggs to the dollar, and a fine full-grown bullock, in good condition, for 30 dollars. Similar bullocks at home would cost from 18*l.* to 20*l.* Calves from 4 to 7 dollars, and so on upwards. Peaches, pears, and apples are plentiful and cheap. Fowls at the rate of four large or six small to the dollar. Pumpkins, also, are as plentiful as can be. We have fresh meat very often while we are here, and the captain is going to take some bullocks to sea with him for us. When we left the Peiho the troops were at Tien-tsin. A rumour is afloat here, in Odin bay, that the Chinese have broken out in all parts again, and that the troops will have to fight their way to Pekin, but I cannot vouch for the truth of it. It appears to me that if the negotiations are not carried on quicker we shall be like the French army at the taking of Moscow; that is to say, cold weather is gradually coming on, and it is likely to nip us. The Magicienne, in company with the dispatch-boat Sparrowhawk, is lying at anchor here, the former in charge of our division, which is watering as fast as possible; the latter is stationed here on the look-out, at least I think so. It is said that all the soldiers and sailors in Odin bay are to keep holyday some day next week. The captain of the Magicienne has headed a subscription with 40 dollars, and the captains of the different vessels and the military officers are likely to follow his example. I suppose they will have boat racing, and jumping in sacks, donkey racing, &c., and perhaps a public dinner."

ROYAL HUMANE SOCIETY.—A meeting of the committee of this institution was held on the 21st instant; T. E. Baker, Esq., treasurer, in the chair. On the 20th July, 1860, during a passage from the Cape of Good Hope to the Mauritius H.M.S. Persian, commanded by Captain Edward Hardinge (son of General Hardinge) experienced a severe gale of wind. A boy accidentally fell overboard, and on hearing the cry the commander immediately directed the first lieutenant to heave the ship to, and running himself to the life-buoy tried to let it go. The port-fire attached to the life-buoy lighted, a rope was thrown to the child, who caught it, but the head-way of the vessel dragged the boy under water, and he let go the rope with a cry of despair; the gallant commander jumped at once into the sea in his uniform, and being a good swimmer soon reached the boy and held him up. A tremendous sea then struck them and tore the lad from his grasp. Captain Hardinge made another plunge, and seized the boy by the hair. The ship had forged away some distance, but he kept the boy up, cheering and encouraging him, whilst striving his best to reach the life buoy, which was still fifty yards distant, in a very heavy sea, and his strength was well nigh expended, when the whale boat reached them, and saved both the commander and the boy—recommended to the next general court for silver medal. Lieutenant W. R. Kennedy, R.N., H.M.S. Wasp, for having saved John Sier, A.B., who accidentally fell overboard at sea on the 22nd June, 1860—recommended for silver medal. Mr. William F. Harton, medical student, for having saved a female who attempted suicide in the river Shannon, Banagher, King's County, on the 29th August, 1860—recommended for silver medal. Lieutenant G. L. Sullivan, R.N., H.M.S. Exmouth, saved a seaman named Burke, who accidentally fell overboard in Suda Bay on the 24th Sept. 1860—thanks of the society inscribed on vellum, Mr. Sullivan having already received the silver medal for a similar act in 1852. Mr. J. G. Bryant, a member of the 4th Tower Hamlets Rifles, saved a female who accidentally fell into the New River, Highbury, on the 6th October, 1860—thanks of the society on parchment. The other rewards given comprised nine bronze medals and pecuniary rewards amounting to 4*l.*; and after the dispatch of various other business the meeting adjourned.

THE MEDICAL DEPARTMENT OF THE ARMY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The opening of the Army Medical School at Chatham for the instruction of the medical candidates of the Army in the military part of their profession, is totally a new era in the annals of Fort Pitt. It is not at present my intention to dwell on the importance of the school in a scientific point of view to the medical officers of the Army, but will merely remark that if scientific officers are not in future supplied to the Army, it will not, at all events, be the fault of the authorities. The establishment at Fort Pitt has now something of the appearance of a military college. The pupils attend lectures in uniform, and in uniform perform their military duties. Formerly they were to be seen even on parade in mufti, as if to make them feel how unworthy they were to possess uniform, and how unnecessary it was that they should command respect; the candidates were sent down from Whitehall in driblets, and in a very short time gazetted and sent to different stations, where their services were required, consequently all *esprit de corps* was wanting among men so circumstanced, and no feeling but that of intense disgust was manifested, which was in no degree alleviated by a contemplation of their future prospects—these being equally disheartening.

At present there are some forty gentlemen attending the course of instruction laid down in the Circular regulating the school. The course will be of six months' duration, when they will be gazetted to commissions, and succeeded by another batch, and thus a continous supply of medical officers will be furnished to the Service. A bond of union will at the same time be established, and a spirit of emulation infused among the members of the department, which will be productive of much good. But to return to the school. It occurs to me that advantage might be taken of its existence to impart other information to the candidates in addition to that given in the lectures. The students should be formed into a company for the purpose of drill, of which as much should be known as would enable them to appreciate the duties of the soldier, and their effects in health and disease. This, I believe, is the practice in the continental armies; and when it is considered that the medical officers are exposed to the dangers of their combatant brethren in the field, and may suddenly find themselves in a position where they are not only obliged to draw the sword in self-defence, but rush to the rescue of others, or perhaps assist in retaining an important position, an additional reason is found for the candidates being instructed in the rudiments of drill. The rescue of His Royal Highness the Commander-in-Chief from the hands of the Russians by an assistant-surgeon, is an apt illustration from many which might be adduced on this point, and must be fresh in the memory of your readers.

By the late Warrant the position of medical officers has been much improved; the rank carries with it something of a substantive character. Sanitary science is now recognised as a distinct principle by those in authority, and the medical branch is considered the right hand of the Army. A new code of medical regulations has been issued, and the medical officers who are responsible for the interior economy and discipline of the hospital establishments, are at length entrusted with the duty of advising commanding officers on every point connected with the sanitary condition of the troops; and means are taken to prevent such advice being thrown overboard, as was at one time too often done, to the disgrace of those in authority, and to the detriment of the health of the soldier. But why should the last step in the elevation of the department to its proper status be withheld? Why is a proper position in the *Army List*, &c., not assigned to it, along with the scientific corps, instead of occupying the position which it does at present among departments with which it has nothing whatever in common, and whose duties are for the most part clerical? When the Parliamentary Commission recommended that the department should take precedence of the commissariat in the *Army List*, &c., they merely expressed the feeling which is abroad, that the corps is not properly classed; but they might have seen that their recommendation would have the effect of creating jealousy in others, without improving the evil it was intended to remedy, and which consists solely in the faulty classification; the true remedy being the assigning to the medical staff a position in the *Army List* after the Royal Artillery and Engineers.—I am, &c., M. D.

THE STAFF COLLEGE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In a recent number of your paper, you animadvert upon the rule which removes captains from the staff on obtaining their majority, or obliges them to retire upon half-pay, if they wish to retain their appointments.

When the arduous course of study through which an officer must pass to obtain a staff appointment from the Staff College is considered, it is an ungracious return to place him in such a dilemma as this rule may put him, and to do so is certainly injurious to the interests of the Service.

The higher situations on the staff are held by field-officers; and if the General Order of the 17th of December, 1857, is to be respected, it is difficult to discern from what quarter field-officers are to be selected to fill vacancies, if the class of officers affected by this rule are to be virtually set aside. No order can be more explicit than that to which I refer, it says, "after the first of January, 1860, no officer will be appointed to the staff who shall not have gone through the Staff College, or passed the final examination of that college, with the exception of those who shall have attained, at that date, the rank of lieutenant-colonel."

This Order presents no opening by which the introduction of unqualified men to the staff below the rank of lieutenant-colonel can be justified. How the exception in their favour can be explained is an enigma. If the rank of lieutenant-colonel brought with it intuitive gifts, superseding in the chief the necessity for that system of training which is so indispensable in the subordinate, it would be intelligible; but upon no other ground, unless it is intended to revert to the odious system which it was hoped had passed away for ever. An apprehension, however, that such may be the case, seems to be justified by a recent memorandum from the Horse Guards, to the effect that in future no subaltern officer shall be appointed as an aide-de-camp until he has passed the usual examination for promotion to the rank next above that which he holds at the time. When such an examination as this is brought into comparison with the final examination at the Staff College, which the General Order declares to be indispensable, it is a burlesque upon the whole affair; either an aide-de-camp is a staff officer, or he is not; if he is, any such appointment is a direct infraction of the General Order.

It is true, the Staff College has been instituted to prepare officers for the highest branch of the staff; but hitherto the qualified candidates for admission to it have been a little in excess of the vacancies; but those officers who have suffered the disappointment, have undergone a much more severe test than it is proposed to put the young gentlemen to who desire to become aides-de-camp, and in common justice should be offered those appointments in preference to them.

This institution is now in its infancy; its success will mainly depend upon an exact observance of the promises and hopes held out to those who enter it. If they are trifled with, or deceived, candidates for admission will first diminish in number, and then cease altogether.—I am, &c.,

AN OBSERVER.

NAVAL CADETS AND THE BRITANNIA.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I have only just seen a letter in your publication of the 3rd inst., signed "One who is serving, and has served for twenty years in succession;" stating that the naval cadets in the Britannia "would have been better off if they had never seen her;" "that they have gradually deteriorated within the last year;" "and that their run down hill has been alarmingly fast;" "that the new brooms started in the Illustrious are worn out," &c.; and that "the youngsters have only learnt how to colour a clay;" and then this "anonymous party's" ultimatum is—more ships of the same sort! — more brooms! — and "competitive training ships!"

I will not stop for an instant to defend the comprehensive system of instruction pursued in the Britannia, but simply remark that it is a carefully devised extension of the plan pursued in the Illustrious, which meets with the approbation of the impugner; nor still less to defend an officer of such undoubted character, capability, and watchfulness over the best interests of the youngsters as Captain Harris; nor that of the Rev. Robert M. Inskip, the chaplain and naval instructor, or of his able staff of assistants; but this I will say—under my own signature—that it is a great happiness to me that my son was placed within reach of the great advantages offered in the Britannia, and that he passed out of her with credit, and to my entire satisfaction, about nine months since; and the same satisfaction has, I know, been generally felt and expressed by my brother officers, who have had sons or relations in her.

As to "colouring a clay"—otherwise smoking—I know that smoking by the cadets is strictly forbidden on board the Britannia.—I am, &c., F. LIARDET, Captain R.N.

ORIGIN OF THE VOLUNTEER MOVEMENT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I have seen in the ARMY AND NAVY GAZETTE some skirmishing among the originators of the Volunteer movement, and in your paper of 27th October there is a regular fight. It is perhaps an old feeling that induces me to ask you to allow me to join in the *mêlée*, and to fire only two shots. It appears that on 16th April, 1859, St. Martin's Hall was taken possession of, and on that evening the garrison started Captain Busk lecturing, Lieut.-Colonel Bousfield memorialising, the War Office circularising, Tennyson singing, and "Riflemen forming." Such a garrison must have been strong to send away so many detachments. As the *long range* is the fashion of the day, I refer the garrison so far to the rear, even to the *Daily News* of 23rd January, 1851, where they will see my letter on "National Defences and Volunteers," addressed to Lord John Russell, when the nation was in a panic caused by Sir F. Head in his book offering up the "booty and beauty of England" to the French invaders! My letter is signed "A Soldier." The Minié was then almost unknown in Great Britain, but I recommended in that letter that our Volunteers should be armed with that new weapon; but my suggestion for Volunteers was, in the words of your gallant correspondent of 27th October, 1860, "most injudiciously rejected by Her Majesty's Government." Every one will allow that the power of the Volunteers has been increased by their present weapons, which I recommended in 1851. I had the honour to be with the advanced guard in the movement which armed our troops with the Minié. The *Times* published my letter on 3rd January, 1852, stating in the leading article—"Sir Charles Shaw argues plausibly to arm our troops with a more efficient weapon." You know how my proposal was pooh-poohed by the husbands of the Brown Besses. In the valuable book of that hard-working, enthusiastic Volunteer, Captain Hans Busk, "The Rifle, and how to use it," page 31 third edition, are to be found the principal part of that letter Let the originators of the Volunteer Movement, whoever they are, be assured that its success is owing almost entirely to the blessings of a free press. The *Saturday Review* of Feb. 1859, gives great credit "to Colonel Chesney and Sir Charles Shaw for their exertions in forcing upon the Government the adoption of the Minié for our army." I have a letter from a gentleman lately (whose name to mention would be acknowledged as authority); he says, "I am aware, and so is the public, that you did good service to the Army in directing attention to the advantage of employing the rifle. But have you ever got thanks from any one or other of them? I suspect not; although I am sure the country at large is indebted to you for your able advocacy of a new system that has done so much." I did not answer the letter of that gentleman (I give you his name), but I had my reward, at Alma, at Inkerman (where you, Mr. Editor, said, "the Minié, that queen of weapons"), at Sebastopol, India, and though last, not least, our freedom from invasion by the army of our Volunteers in 1860, which I recommended to the British Government in 1851-1852. I am, &c.

CHARLES SHAW.

THE EX-ROYAL FAMILY OF FRANCE.—Mr. John Watkins of Parliament Street, photographer to the Queen, had the honour of attending at Claremont on Monday and Tuesday last, to take portraits of Her Majesty the ex-Queen Marie Amelie and His Royal Highness the Prince de Joinville, which were very successfully accomplished. Mr. Watkins had also the honour of receiving a commission to execute portraits of each member of the ex-royal family of France.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BRANFILL—November 17, at Peterstone Court, Brecon, the wife of Captain Branfill, of a daughter.

COOPER—November 17, at 3, Union Street, Rochester, the wife of Captain Cooper, 7th Royal Fusiliers, of a son.

HALL—October 11, at Saugor, the wife of Captain Edward Hall, 52nd B.N.I., of a son.

HAMILTON—November 14, at Southampton, the wife of Captain T. R. Hamilton, H.M.'s 98th Regiment, of a son.

HARRIS—November 16, at 3, Upper St. Germain's Terrace, Blackheath, the wife of Captain John R. Harris, of a daughter.

JAMES—November 19, at 46, Cambridge Terrace, Hyde Park, the lady of Colonel Sir Henry James, Royal Engineers, of a son.

JOSLING—November 20, at 15, King Street, Portman Square, the lady of Commander Josling, R.N., of a son.

PEARS—October 11, at Ootagamund; the wife of Lieut.-Colonel Pears, of a daughter.

PILKINGTON—November 19, at Brampford Speke, near Exeter, the wife of Captain R. W. Pilkington, late 20th Regiment Bengal N.I., of a son.

SMYTHE—November 14, at Hilton, Bridgnorth, Shropshire, the wife of Lieut.-Colonel Smythe, of a daughter.

STANIFORTH—September 11, at sea, 400 miles from Melbourne, the wife of Captain W. L. Staniforth, R.N., of a son.

STUART—November 17, at 11, Southwick Place, Hyde Park Square, the wife of Major George Francis Stuart, of twins, the daughter only survived its birth.

WETHERALL—November 20, at Geddington Priory, Northamptonshire, the wife of Captain Wetherall, of a son.

MARRIAGES.

CHAMBERS—PEEL—November 17, at Mulbarton Church, near Norwich, Richard Chambers, Lieutenant R.N., of Haverfordwest, youngest son of the late Captain John Chambers, formerly of the 10th Hussars, to Caroline Anne, widow of the late Arthur Wellington Peel, Esq., of Denant, Pembrokeshire, fourth daughter of the late James Bellairs Stevenson, Esq., of Uffington, Lincolnshire.

GREY—PEARSON—November 20, at St. Luke's Church, Cheltenham, by the Rev. Sir Henry Thompson, Bart., rector of Frant, Captain George Henry Grey, Grenadier Guards, only son of the Right Hon. Sir George Grey, Bart., to Harriet Jane, youngest daughter of Lieut.-Colonel Charles Pearson.

OGILVIE—PILCHER—November 15, at All Saints' Church, Blackheath, by the Rev. H. C. Blagden, brother-in-law of the bride, Charles Fredk. Ogilvie, Esq., M.D., Bombay Army, youngest surviving son of the late John Ogilvie, Esq., surgeon, R.N., to Anne Emily Pilcher, third daughter of James Pilcher, Esq., of Bow, Middlesex.

PRICE—WALLISFORD—October 9, at St. Peter's Church, by the Right Rev. the Bishop of Colombo, assisted by the Rev. J. Brooke H. Bailey, chaplain, George Price, Esq., Captain H.M.'s 1st Bengal Fusiliers, to Fanny Durand, eldest daughter of F. W. Wallisford, Esq., M.D., of the Fort, Colombo.

PROTHER—SEMPLE—November 20, at Bathwick Church, Bath, by the Rev. E. R. Prother, rector of Farnham and Chettle, Dorset, uncle of the bridegroom, E. H. Prother, Esq., H.M.'s 6th Madras N.I., eldest son of the late Captain C. W. Prother, Bombay Rifles, to Amelia, second daughter of Major H. Semple, late of H.M.'s 35th Regiment.

TREVOR—SPARKS—September 18, at Rangoon, by the Rev. H. W. Crofton, Salusbury, Thomas Trevor, Captain H.M.'s Bengal Engineers, to Mabel Mary, eldest daughter of Major T. P. Sparks, Judicial Deputy Commissioner, Rangoon.

WALLACE—PARKER—October 10, at the church of the Holy Trinity, Sanawur, near Kussawlie, N.W.P., East Indies, by the father of the bride, assisted by the Rev. H. F. Carbyn, M.A., Chaplain of Subathoo, Henry R. Wallace, Esq., Captain 92nd Highlanders, to Fanny, youngest daughter of the Rev. William John Parker, Principal and Chaplain of the Lawrence Military Asylum.

DEATHS.

ALBIN—October 23, at Jamaica Hospital, of yellow fever, William Powell Albin, clerk of H.M.S. Imaum, and grandson of the late James Powell, Esq., of Glocester Terrace, Southsea, aged 21.

CARPENTER—October 17, at Secunderabad, Deccan, Thomas David Carpenter, Major-General Madras Army, aged 56.

CORY—October 6, at Shahjehanpore, Ernest William John, the infant son of Lieutenant Cory, second in command 3rd Irregular Cavalry.

DELMEGE—November 17, at 8, Clifton Vale, Clifton, Hamilton Hadley Cambridge, child of Susan Maria and C. C. J. Delmege, Esq., M.D., Staff-Surgeon-Major, aged 8 months.

MAXWELL—November 17, at 1, George Street, Bathwick Hill, Bath, Catherine Wade, widow of the late Lieutenant-General Sir Charles William Maxwell, K.C.H., C.B., formerly Colonel of the 3rd West India Regiment.

MAXWELL—November 13, at Cardoness, in the Stewartry of Kirkcudbright, Sir David Maxwell, Bart., Hon. Colonel of the Galloway Militia.

PETTINGAL—November 17, at 134, Regent Street, London, Major-General Edward Pettingal, of H.M.'s Indian Army, aged 69.

RICHMOND—November 4, at Cannstatt, Wurtemberg, Sophie, youngest daughter of Thomas Richmond, Esq., Commander R.N., aged 11.

SCOTT—November 12, at Malta, Victor William Ebenczer, youngest son of J. Scott, Esq., Paymaster 6th Brigade Royal Artillery.

WARBURTON—November 10, at Leamington, Garnett Warburton, Esq., third son of the Rev. J. Warburton, rector of Kill Naas, county Kildare, formerly Captain in the Buffs, and late in the 2nd Regiment of the Warwickshire Militia, aged 30.

THE NEW GENDARMES FOR ITALY.—The Royal Carabineers, or Gendarmes, will constitute a military corps of 24,000 men, partly on foot and partly on horseback. It will be divided into twelve legions, with their respective head-quarters at Turin, Milan, Genoa, Bologna, Florence, Ancona, Naples, Campobasso, Potenza, Benevento, Reggio in Calabria, and Palermo. Of course another legion may be appointed for Venice and another for Rome, should the great national scheme at any time be brought to full maturity. Every legion will be commanded by a colonel and a lieutenant-colonel; the whole corps will number 28 majors, 97 captains, 179 lieutenants, and 77 sub-lieutenants. It will be under the direction of a general staff (or committee), presided over by a lieutenant-general, and consisting of three major-generals, a field officer, a secretary, and two subalterns.—*Letter from Turin.*

Advertisements.

ANTONIO POLETTI, THE WIZARD FROM ROME, amazes all who behold his extraordinary feats in NATURAL, MECHANICAL, and CHEMICAL MAGIC, combined with MESMERIC PHENOMENA, at the GALLERY OF ILLUSTRATION, 14, REGENT STREET, W., ANTONIO POLETTI appears to-night and every evening at Eight; and, in consequence of the brilliant success of his morning performances, every Monday, Wednesday, and Saturday, at Three. *** The most original and surprising Exhibition in England. Stalls, 3*s.*; centre seats, 2*s.*; back seats, 1*s.* May be obtained of the principal Musicsellers, and at the Gallery of Illustration from Eleven till Five daily.

For further particulars apply at the Company's Offices, 122, Leadenhall Street, London, E.C.; or Oriental Place, Southampton.

INDIA, CHINA, AND AUSTRALIA.—OVERLAND ROUTE.—Officers and Civilians returning from Furlough, or joining on first appointment, can secure their passage through Messrs. WHEATLEY & CO. (late Waghorn), West End Office, 23, Regent Street, Waterloo Place, S.W., and be thus spared the inconvenience, delay, and trouble of going to the City. Handbooks on application. Baggage collected and shipped at a through charge. Insurances effected. Files of the latest news in the Reading-room.

MESSRS. A. K. KING AND COMPANY,
ARMY & GENERAL COMMISSION AGENTS,
41, OLD COURT HOUSE STREET, CALCUTTA.

TO OFFICERS, REGIMENTAL MESSES, &c.

MESSRS. SAUNDERS, OTLEY, & CO., East India Army Agents, 50, Conduit Street, Hanover Square, W., draw and remit Pay, Pensions, Dividends, &c., and transact every description of Financial Business. They purchase and forward Miscellaneous Supplies, and ship them to Officers, Regiments, and Messes in India and the Colonies. Letters and Parcels received and forwarded.—SAUNDERS, OTLEY, & Co., East India, Army, & Colonial Agents, 50, Conduit St., Hanover Square, London, W.

MESSRS. ADDISON & CO., ARMY AGENTS, 11, WATERLOO PLACE, PALL MALL, S.W. Exchanges negociated.

Pecuniary accommodation afforded to officers on full pay, on their notes of hand only, at a few hours' notice. Applications by letter promptly attended to. Every description of army business transacted.

REMITTANCES TO INDIA AND AUSTRALIA.—The undersigned GRANT DRAFTS and LETTERS OF CREDIT on Calcutta, Madras, Bombay, Melbourne, and Sydney, at the exchange of the day. Rupee Paper and Interest Bills negociated.—GRINDLAY & Co., East India Army Agents, 55, Parliament Street, S.W.

MONEY.—MONEY ADVANCED at a few hours' notice, on the most advantageous terms, to Noblemen, Officers in the Army, Heirs to entailed estates, and Gentlemen of property, on their personal security, also on security of reversions to landed estates, at 5 per cent., payment of which may be deferred until possession, on application to Mr. DICKER, 10, Craig's Court, Charing Cross, S.W.

MONEY.—£100 to £100,000 to LEND on Reversions, Life Interests, Freehold, or Leasehold Security. Gentlemen of property accommodated on their notes of hand to any amount; and for 50*l.* to 3000*l.* on personal security and bills of sales.—Apply personally or by letter to Messrs. LLOYD, HUDSON, & Co., 14, Chatham Place, Blackfriars, London, E.C.

MONEY.—REVERSIONS & ANNUITIES under Wills SOLD, or any amount ADVANCED thereon by mortgage, at 4 to 5 per cent. First-class bills cashed.—Messrs. WINTER & Co., Reversionary Property Agents, 12, Pall Mall East, S.W.

SPORTSMEN AND GENTLEMEN OF THE ARMY AND NAVY.—S. & B. SOLOMONS, Opticians, 39, Albemarle Street, Piccadilly, W., opposite the York Hotel. Portability combined with great power in FIELD, RACECOURSE, OPERA, and general out-door day and night powerful waistcoat-pocket PERSPECTIVE GLASSES, weighing only 4 ounces each, containing 12 and 18 lenses, constructed of German glass, will show distinctly persons to know them at two-and-a-half and three miles. They serve every purpose on the Racecourse and at the Opera House. Country scenery and ships are clearly seen at eight to ten miles. They are also invaluable for Shooting, Deerstalking, and Yachting. Her Majesty's Coast Guards are making use of them as day and night glasses. The terms for them are powerful and brilliant Telescopes for both eyes. The most powerful Telescopes, possessing such extraordinary power that some, three-and-a-half inches, with an extra astronomical eyepiece, will show distinctly Jupiter's moons, Saturn's ring, and the double stars; with the same telescope a person can be seen and known three-and-a-half miles distant, and an object from fourteen to sixteen miles. They are in endless variety, of larger and all sizes, with increasing powers, and are secured by Her Majesty's Royal Letters Patent.

FIELD GLASS.—The BEST is BURROW'S MALVERN LANDSCAPE GLASS, invaluable to Sportsmen, Military and Naval Officers, Travellers, &c. Compact, portable, and efficient, combining a wide field of observation with extraordinary defining power. In sling case, 3½ guineas. Sent free on receipt of post office order to W. & J. BURROW, Great Malvern, Worcestershire.

THE RELIEF OF LUCKNOW.—The Triumphant Meeting of Havelock, Outram, and Colin Campbell, surrounded by their brave companions. This Grand Picture, by T. I. BARKER, Esq., is still ON VIEW from 9 to 6 o'clock. Admission free, by private address card. N.B. In dark weather, and after 3 o'clock, the picture is brilliantly illuminated by artificial light.

HAYWARD & LEGGATT'S, 70, Cornhill, E.C.

MAPPINS' TABLE CUTLERY.—SEASON 1860.

CAUTION.—MAPPIN BROTHERS beg to advise their customers and correspondents that they have only one establishment in London, viz., at London Bridge, and they hope that their friends will be careful to address them in full, either Mappin Brothers, London Bridge, London, E.C.; or Mappin Brothers, Queen's Cutlery Works, Sheffield. Established in Sheffield, A.D. 1810. None are genuine without their corporate mark, the "Sun," granted to their father by the Cutlers' Company of Sheffield, June 26, 1835.

Messrs. MAPPINS' Table Knives still maintain their unrivalled superiority; all their Blades being their own Sheffield Manufacture, are of the very first quality, with secure Ivory Handles, which do not come Loose in Hot Water; and the difference in price is occasioned solely by the superior quality and thickness of the Ivory Handles.	Ordinary Quality.	Medium Quality.	Best Quality.
	£ s. d.	£ s. d.	£ s. d.
Two Dozen full-size Table Knives, Ivory Handles	2 4 0	3 6 0	4 12 0

DAVIESON ON THE TEETH AND COMPLEXION.

Just published, price 1*s.*, free by post for 14 stamps,

THE HANDBOOK TO YOUTH, BEAUTY, AND REFINEMENT.

By EDWARD DAVIESON, Surgeon-Dentist.

448, West Strand, London, W.C.; HOLYOAKE & Co., 147, Fleet Street, E.C.; and all Booksellers.

DAVIESON'S EVERLASTING TEETH.—THE LATEST DISCOVERY.—MR. EDWARD DAVIESON, Surgeon-Dentist, has introduced a material for the construction of ARTIFICIAL TEETH so extraordinary that nature appears to have made good the ravages of TIME, DISEASE, or ACCIDENT, and when fitted detection is impossible, even though the wearer's mouth be closely examined. The price is so moderate that it is within the reach of all, and it is fitted without springs or other unsightly fastenings. The removal of stumps is unnecessary, and thus all pain is avoided. MR. EDWARD DAVIESON invites one visit of inspection to his establishment, which will convince the most sceptical of the truth and straightforwardness of this statement. The LIQUID ENAMEL, for Stopping Decayed Teeth, is ENAMEL WHITE, keeps its colour, and lasts for ever. It is invaluable for Front Teeth. Attendance daily from Ten till Six. Consultations free. MR. EDWARD DAVIESON, Electric Telegraph Office, 448, West Strand, London, W.C. The Descriptive Pamphlets free for two stamps.

☞ *It is particularly requested that applications for copies of the* Army and Navy Gazette, &c., *and Advertisements, should* not *be sent to the Editor, but to the Publisher,* Mr. Archibald Graham, *to whom remittances are payable. The subscription to the paper is 7s. 7d. per quarter, or 30s. 4d. per annum, payable in advance, postage included.*

WE have alluded elsewhere in general terms to the extraordinary letter in the *Times* by "One who knows the Service." It has already been pointed out how very far he is out in his knowledge as to the pay of the Navy, and other advantages; but, as the subject is most important, we give here in greater detail a *résumé* of the relative advantages of the two Services.

Every man entering the Navy gets gratuitous bedding and mess traps. He must pay for those things in merchant ships. Every man entering the Navy is allowed rations free, more than he can eat, of most excellent quality, and is paid for what he saves. He is not so paid in the merchant service, nor generally so well fed. Every man entering for ten years continuous service in the Navy, as well as every boy on reaching eighteen, gets gratuitous clothing worth about 2*l.* 10*s.*, in addition to the bedding, worth about 16*s.* There is nothing similar in the merchant navy. He also at present receives bounty money on entering the Navy, which he generally spends as money is spent, when flush, at naval seaports. Instead of going to his ship, too, he gets some crimp to take him, who is paid "bringing money" by order of the Admiralty, and who spunges "Jack" freely besides. To the honour of the merchant service, there is nothing of either kind in it. If the seaman in the Queen's service has a very good character he may have a good-conduct badge bearing 1*d.* a-day after three years' service, 2 badges after 8 years' service, and 3 badges after 13 years' service; and, notwithstanding "One who knows the Service," there are thousands of men wearing one, two, or three badges in the Navy, thus proving both good behaviour and continuance of men, without their "running" at "every opportunity." The wages of an able seaman, continuous service, are, 2*l.* 9*s.* in the Navy; he may have his one, two, or three badges, with 1*d.* a day for each besides,—he may be a qualified "diver," and have a penny a-day also for that,—he may also be a seaman gunner 1st class, and have 4*d.* a-day, or 2nd class, with 2*d.* a-day in addition; and there are no such additions to pay in the mercantile marine. There are other additions to pay in the Royal Navy, but these are the principal; and there are various grades of 1st and 2nd class petty officers, chief petty officers, and the rating of leading seaman, to which good men may look forward—to say nothing of the "warrant" and the far-off "commission" in the distance—and these highly-paid grades amount to a goodly number in the whole fleet. Then we come to pensions. Under the continuous-service system a man may become a short-service pensioner after 10 and 15 years. The long pension is granted to men who have volunteered for any period above five years' service since 1853, after 20 years' service from the age of 18, instead of after 21 years' service from the age of 20, which is the period for non-continuous service men. Men, and even boys, are also pensioned or paid gratuities in the Navy when invalided, and for wounds and accidental hurts—a provision for the contingencies of life not to be found in the merchant service, or any private service on shore.

The fact is, the seamen of the fleet are better paid than in the merchant service. Even leaving out the pensions they really cost more money, especially if we add the bounty, the bringing money, expense of "raising men" (which might be roughly but truly described as coaxing men half drunk to join the Navy), the gratuitous clothing, bedding and mess traps. We mean that even the worst men are thus paid very highly, and the money is only wasted upon them, for the numerous desertions from the Navy are facts which cannot be denied.* No one will grudge the high pay paid to the good man, though most people will think it might be paid in a more straightforward and simple manner. The present system is, unfortunately, to begin by paying a good deal down—bounty, gratuitous clothing, and bedding—then a moderate rate of wages, with a promise for the future. The baits or bribes are taken—spent as easily as got; then comes the lowish wages and the discipline, and the long engagements, binding the man, perhaps an imaginary grievance, but one that affects him, and which the distant hope of a pension does not counterbalance. Hence desertions in the Navy; and the worst of it is, that the men are not only lost to the British Navy then, but to the country altogether. The majority leave for the American trade or United States navy, where they are only a little better paid, but not bound beyond a voyage or three years. Coincident with this long-service system inducing desertions, the registration system is said by many naval witnesses to have driven men from England to America from our merchant service. Much as we talk of liberty and freedom, we appear poorly to appreciate them in the regulations for our marine. Were bounties and additions to pay of various kinds thrown boldly into one intelligible rate of pay for thorough good seamen, with lesser rates for inferior qualifications, but equally intelligible as showing really what wages in the Royal Navy are, we are certain we should require no other inducements for manning our ships, and might save short-service pensions. The rates should be higher than in the merchant service, higher than in the American navy. Moreover, we believe they might be made so, and not a penny more be required to pay them. It costs 11*l.* now to raise a man, and every deserter has cost the Service, even in money, not a little under our present system, to say nothing of the evil of bad example and a bad tone throughout the Service.

It used to be a favourite subject of discussion, whether the spendthrift or miser most benefited society. Indeed, this was the chief formula applied to political economy long before it was thought of disturbing the Corn Laws by even the imposition of a fixed duty, as proposed in the famous "Edinburgh Letter." We have, however, now got far beyond that stage of the question—witness Mr. Ruskin's papers in the *Cornhill Magazine;* but who can tell how much of the advanced knowledge of the subject, almost universally professed in these days, may not be due to that old issue. The ancients had a simple and striking way of proposing very deep questions—"What is strongest?" for instance; "iron, money, wine, or women?" We trust we shall be considered quite *en règle*, and not without a purpose, if we put the question (as one about which we really begin to entertain some doubt), whether bounce—or what the Yankees call bunkum—is not more useful in discussing public matters, than the most perfect moderation and accuracy.

We are naturally led to this sort of inquiry by the letter signed "One who knows the Service," which appeared in last Saturday's *Times*. It startled everybody as to "the state of our Navy." The Duke of Somerset at Salters' Hall, only a week before, was boasting that "the stuff of our blue jackets" was as good as in Nelson's days; and the only thing people had been lamenting for the previous nine months was that these "good men and true" were likely to be left at cruel disadvantage to fight in wooden ships, while the enemy might come against them in iron-cased frigates and gun-boats; suddenly this gentleman who "knows the Service" comes to tell us, in the loudest tones, that we scarcely have "blue jackets" at all worth the name in the Royal Navy—that their beef is also bad—that there were no pensions in the Navy before the continuous service system of 1853—and that the wages in the Royal fleet are little more than half or two-thirds of what they are in merchant ships! There are now 80,000 men in the Royal Navy; many of them have given testimony before several Commissions as to the sufficiency of the quantity of provisions allowed to each man—in confirmation of which some 30,000*l.* a-year used to be paid as saving money for rations unconsumed—while the excellent quality of the food supplied is notorious; there is old Greenwich Hospital down the river, and the Blue Book on its management published just six months ago, which tells us the hospital is deserted, mainly because the men like the pensions better than going in; there are, also, we might add, in the Estimates, some hundreds of thousands voted every year for pensions, which would have been impossible if the statements of "One who knows the Service" were correct; and, lastly, there are Navy Lists published quarterly at half-a-crown, and Blue Books innumerable, at less money, containing the actual scales of wages in the Royal Navy, the merchant service, and in other navies, but all of which "One who knows the Service" does not find it necessary to study before he indites his letter to the *Times*.

Still his letter has done good; more good, perhaps, than all the numerous leaders in this journal on the subject of Navy pay and pensions, and the want of discipline in the fleet, between May last and the present date. We cannot help admiring what a little impudent assertion can do on a large theatre, even when it involves the confession of our own comparative impotence. It would be a mistake to disregard its influence. Whilst one man remarks, depreciatingly, "that there could not have been less knowledge of the subject, had the writer been a new Lord of the Admiralty;" another, with more admiration, declares that, "had the letter been *spoken* in opposition in the House of Commons, the fellow would be certain of a place at the Board on a change of administration." But our own unfeigned thankfulness for the letter arises from the circumstance that it has produced a leader from the *Times*, which may force the Board of Admiralty to look at the real bearings of the case.

Their Lordships ought not in the meantime forget the equally important, and still more pressing subject of iron-clad vessels. They had better not supinely wait to hear more "thunder" upon that subject, or we think we may presage that, if they do, the peal will startle them. One might almost imagine we were among the ancients again. "What is strongest?" is once more a modern question. We think Iron, rather than Wood. Are their Lordships prepared to prove that the old Boards and Women are strongest? The Navy Estimates suggest a revival of the spendthrift question on a very large scale.

The Cavalry Cornetcies do not now present so many vacancies. From the 65 existing at the commencement of the year they are now reduced to 28, of which 4 exist in the 5th Lancers, 3 in the Inniskilling Dragoons, 2 each in the 3rd Dragoon Guards, 3rd and 4th Light Dragoons, 8th, 11th, and 18th Hussars, and 1 each in the 1st, 2nd, 6th, and 7th Dragoon Guards, 14th Light Dragoons, 16th and 17th Lancers. The 4th and 5th Dragoon Guards, 2nd Dragoons, 7th Hussars, 12th Lancers, 13th Light Dragoons, and 15th Hussars, have no vacancies. It should be noticed, however, that there are three Lieutenancies unfilled in the King's Dragoon Guards, two of which have been vacant since the 21st of September, and the remaining one since the 21st of October, 1859.

* Bounty was re-introduced into the Navy after a long desuetude in 1859, contrary to the earnest warning of Sir James Graham and the late Sir Charles Napier. This was done, notwithstanding the long experience at the War Office, that the desertions are in proportion to bounty paid in the Army. *Vide* also article on Desertions, Army and Navy Gazette, May 19th, which we could only iterate if we went further in this subject now.

THE ARMY.

1st King's Dragoon Guards. Captain Bradbury the senior captain of the regiment, was severely wounded in the encounter with the Chinese on September 21, where the squadrons, under Lieut.-Colonel Sayer, very much distinguished themselves. Assistant-Surgeon Davidson has leave to England from Bangalore.

6th Dragoon Guards. Lieutenants Doering and Graham are on their way home from India, viâ the Cape, in charge of invalids and discharged soldiers.

6th Dragoons. Lieutenant Baskerville has leave to England for one year.

17th Lancers. Lieutenant Harrison has leave to England from Secunderabad on medical certificate.

Royal Engineers.—The 27th (Captain Durnford's) company of Royal Engineers, which has been held in readiness to proceed on foreign service, has received orders to embark to-day for Gibraltar, where it relieves the 2nd company, whose term of foreign service has expired. The 27th company consists almost exclusively of the most experienced artisans and mechanics in the corps of Royal Engineers, the men having been employed on various Government works, the last occasion being one in which their services were instantly required to complete the gun factory at Woolwich on the occasion of the late strike, when the men of the company finished the building in such an excellent manner as to elicit the commendation of the Commanding Royal Engineer, the architect, and contractors.

20th Regiment, 1st battalion. Captain G. B. Duffin is on his way to England, viâ the Cape, with discharged soldiers and invalids.

23rd Fusiliers, 1st battalion. Captain C. Monsell is on his way to England, viâ the Cape, with discharged soldiers and invalids.

24th Regiment, 1st battalion. Lieutenant G. Scott is officiating as Military Storekeeper at Dum Dum during the absence of Major Brookes, 75th Regiment.

35th Regiment. Brevet-Major Tisdall is on his way to England, viâ the Cape, with discharged soldiers and invalids.

38th Regiment. Assistant-Surgeon T. Wright, passed his examination in the vernacular at Roy Bareilly on the 17th September.

42nd Highlanders. Captain W. Green is on his way to England, viâ the Cape, with discharged soldiers and invalids.

54th Regiment. Assistant-Surgeon Youell has leave to England on medical certificate. Captain Fowke is ordered from Colchester to join his regiment in India. The Board of Revenue has received orders to refund, under the special circumstances of the case, the duty charged on the mess plate.

60th Rifles, 3rd battalion. Brevet-Major B. E. Ward has been granted 18 months leave to England.

66th Regiment. Captain Watson, now with the depot at Colchester, is under orders to join the regiment in India.

68th Light Infantry. Lieutenant E. Deshon is in command of invalids coming home to England in the ship Accrington, viâ the Cape.

70th Regiment. Captain J. Green and Lieutenant T. D. Backhouse are on their way to England, viâ the Cape, with discharged soldiers and invalids.

73rd Regiment. Brevet-Lieut.-Col. J. C. Gawler is appointed commandant of the Provisional Battalion, Dum Dum.

75th Regiment. Major Brookes, Military Storekeeper at Dum Dum, has been ordered to join his regiment, for the present his services being urgently required there.

81st Regiment. Captain H. A. Chichester is on his way to England, viâ the Cape, with discharged soldiers and invalids.

82nd Regiment. Lieutenants Sullivan and Fisher are on their way to England, viâ the Cape, with discharged soldiers and invalids.

88th Regiment. Lieutenant J. B. Whitla is on his way to England, viâ the Cape, with discharged soldiers and invalids.

89th Regiment. Captain J. Barstow is on his way to England, viâ the Cape, with discharged soldiers and invalids.

92nd Highlanders. Lieutenant and Adjutant Humfrey, Lieutenant Kilvert, and Ensign Hicks have leave to England—the first-named officer to April 15, 1862, the latter on medical certificate.

93rd Highlanders. Lieutenant E. C. Haynes is on his way to England, viâ the Cape, with discharged soldiers and invalids.

94th Regiment. Surgeon Stoney is appointed to take medical charge of invalids from the Peshawur division, on their way to England, viâ Kurrachee.

98th Regiment. Lieutenant T. T. Simpson passed his examination in the vernacular at Murree on the 15th of September.

Rifle Brigade, 2nd battalion. Captian J. Singer is on his way to England, viâ the Cape, with discharged soldiers and invalids. Assistant-Surgeon Reade passed his examination in the vernacular at Murree on the 15th of September.

The collector of Customs, Calcutta, has received instructions from the Supreme Government to the effect that all regimental mess plate should for the future be exempted from the payment of customs duty, in the event of a declaration from the commanding officer of the corps that the articles have been in use for twelve months previous to the time of importation.

One of the cast-iron experimental guns, strengthened according to a principle suggested by Sir W. Armstrong, in order to prove their capability of being rifled for service, was on Saturday tested at the Royal Arsenal butt, Woolwich. An order having been given to increase the charges and continue firing so as eventually to burst the gun, the experiment was carried out in a bomb-proof shed recently constructed for that special purpose. The chamber of the gun was solidly imbedded in a coating of gun-metal three inches in thickness, which was incrusted over the entire portion subject to the greatest amount of shock from the explosion, and extended over the headpiece (leaving the cascable ring only visible) down to the trunnions. Several rounds were fired with exceedingly heavy charges, and at length the gun itself gave way under the excessive charge, and was found torn into fragments, but the coating of gun-metal remained entire.

Another step has been made by the military authorities of India towards encouraging soldiers' gardens. Henceforth on the first week of January each year the commissariat officers are to furnish commanding officers with a note of the probable quality of vegetables which will be required during the official year. Committees will then determine the articles that should be taken from soldiers' gardens and the prices to be paid each month. Each man is to be allowed one pound of vegetables daily.

The Empress of the French, while at the station on her way to Perth, had her attention drawn to a soldier in extreme ill-health, but bearing upon his person several decorations for actual service. Prompted, doubtless, by sympathy for his infirmity, she gave him a small donation, when one of the attendants, with more officiousness than good taste, reminded Her Majesty that she had befriended a man who had fought at Waterloo. "Then he is the more deserving," replied the Empress, "for he contended with a brave enemy."

The will of Lieutenant-General Sir Harry Smith, Bart., G.C.B., Colonel-Commandant of the Rifle Brigade, and late Governor and Commander-in-Chief at the Cape of Good Hope, was proved in London on the 15th November by his relict, the sole executrix, the personalty being sworn under 6000*l*. The will is attested by General John Bell and Lieutenant-Colonel H. R. Digby: it was executed on the 30th July, 1860, and Sir Harry died on the 12th of October at his residence, Eaton Place West, aged 72. The general married in 1814 a Spanish lady—Donna Suana de los Dolores de Leon, of Badajos—to whom he leaves all his property, both real and personal, for her own use absolutely. There being no issue of the marriage, and the general having no male relative surviving, the baronetcy becomes extinct.

A statue to the memory of the late Marquis of Anglesea, the result of public subscription, was on Saturday last raised on the column already erected on a commanding site in the Isle of Anglesea, opposite the great tubular bridge over the Menai Strait. The column itself, 100 feet high, was erected after the campaign of Waterloo, as a memorial of the late marquis's military achievements, and is on the summit of a rock 250 feet above the level of the sea; so that, with the statue superadded, the entire monument is upwards of 360 feet above the sea level, and is now a conspicuous object for many miles round. The figure, of colossal proportions, and executed in bronze metal, is the work of Mr. Noble. It represents the late marquis in the Hussar uniform, and its attitude is dignified and soldierlike. The height of the column, and the great weight of metal to be lifted to its summit rendered the raising of the statue a matter of considerable difficulty; but, by means of an apparatus of an elaborate and ingenious character, the contrivance of a local engineer, Mr. Haslam, the figure was safely placed upon the top.

Shooting Match between the 19th and the 11th Regiments.—A match between ten non-commissioned officers of the 2nd battalions of these two regiments, stationed at Portsmouth, came off a few days since at Brown Down. The ground was well attended by the officers of the different regiments in the garrison, as well as by amateurs and Volunteers. The shooting commenced at 11 o'clock in the forenoon, and occupied about five hours, when the non-commissioned officers of the 19th were declared the victors. The shooting was first-rate, and at the respective ranges of 200, 400, and 600 yards, has rarely been equalled. At the extreme range of 800 yards very few points were made, in consequence of the fog, which came on at that period of the match.

Examination for the Indian Army.—The following notice has been issued from the Horse Guards:—"The competitive examinations hitherto held of candidates for the artillery and engineer services of the Indian Army will cease, and all candidates for the artillery and engineer services generally will in future have to go through a course of instruction at the Royal Military Academy, Woolwich. The next competitive examination, in conformity with the annexed regulations, will commence on 7th January, 1861. The number of vacancies to be competed for is 70. Application of candidates, as required by Art. 8 of the regulations, will in this instance be received until the 20th of December inst. The successful candidates will be admitted in the first instance to the Royal Military College, Addiscombe, and eventually transferred to the Royal Military Academy, Woolwich. As in the prospectus formerly issued for admission to Addiscombe College, it was provided that candidates might be examined in the use of astronomical and surveying instruments, there will be an examination in that subject for such as desire to take it up in January next; after which date, however, it will not be included among the the subjects of examination for admission to Woolwich. Seven hundred and fifty marks will be alloted to this subject, as heretofore.—W. F. Forster, Military Secretary."

The Taylor Fund.—The Editor begs leave to acknowledge the receipt of an order for 2*l*. from O. C., for the object to which attention was called in the Army and Navy Gazette, and which the Editor ventures to recommend as one worthy of support—of raising a fund for the children of the late Captain T. Taylor, 17th Lancers. Major Stephenson's letter explained the case very fully, and we can only add that we shall be happy to receive further subscriptions at the office of the Army and Navy Gazette, and to pay them over to Major Stephenson, or those acting for the orphan children.

Suicide at the War Office.—On Monday evening one of the principal messengers of the War Office, Pall Mall, committed suicide by hanging himself. The unfortunate man, whose name was Stiller, was a very steady and valuable public servant, and was much respected. He had suffered greatly from acute rheumatism, and during the day previous to his death was observed to be somewhat absent in his manner. In consequence of his unusual absence from home his wife made inquiries at the War Office, when he was discovered by two of the messengers hanging quite dead in one of the rooms in the basement of the building. The cord the poor fellow had used was so thin as to cause abrasion of the skin. A messenger named Gray, holding a similar position, destroyed himself in the adjoining room in March last.

SHORNCLIFF.

A general court-martial, of which Colonel Francklyn, 17th Regiment, was president, Major Gamble, Deputy Judge-Advocate, and Captain Turner, R.A., Prosecutor, assembled at the clerk's room, in the brigade office, Shorncliff, on Thursday last, at 11, a.m., for the trial of No. 621 gunner, Charles John Snow, of the 4th brigade, Royal Artillery, on the following charges:—1st, for highly insubordinate conduct when brought before a district court-martial for trial, when asked if he objected to be tried by the court, replied that he did, as he objected to be tried by such a lot as they were—a —— lot of rogues, or language to that effect; 2nd, for striking the Adjutant of the 4th brigade a violent blow, he being then and there his superior officer. The result of the trial will of course not be made known till approved of by the General Commanding-in-Chief.

Referring to the number of charges of striking officers for the purpose of getting tried by general courts-martial, the sentence of which is generally penal servitude for four years, it seems pitiable that such a state of things should be co-existent with the desire expressed and carried out for the amelioration of the condition of the British soldier. The professed object, openly expressed by many of the men, is to obtain a release from the Army, which almost invariably follows a sentence of penal servitude, when inflicted upon any soldier by sentence of court-martial. It would almost appear to be necessary to resort to the old system of having battalions formed entirely of soldiers who have been guilty of offences of this description, where officers are struck down without any previous malice or ill-will borne against them individually by the offenders, but simply a most unmanly and unsoldierlike proceeding on their part to rid themselves of the engagement they have voluntarily entered into to serve Her Majesty. Let the offenders by all means have penal servitude, but at the termination of the sentence let them be remanded to some condemned battalion, to serve out the remainder of the time for which they were originally enlisted, and not allow them to reckon the penal servitude as part of the service required by the terms of their original enlistment; such a course would be the strongest check against a recurrence of those dastardly attacks upon officers that we are continually hearing of, and have a great effect in checking the insubordination which is unfortunately so rife amongst the privates of many corps at present in the British Army. The manner in which many of the assaults have been committed upon officers estimable for their general conduct with respect to the men under their command, is degrading to the British Army generally, and calls aloud for some severe measures to repress an evil which is gradually growing up amongst the men, and is eating into the vital interests of the Service, destroying that which is of paramount importance in an army—namely, discipline.

On Wednesday last the whole Infantry Brigade at Shorncliff, consisting of the 1st battalion 16th, and the 2nd battalions of the 17th, 18th, and 21st Fusiliers, assembled on the general parade ground on the camp at 10 a.m., and after being inspected by Brigadier Garvock, went for a march in full marching order.

The old *esprit de corps* is to a regiment the foundation of its chivalry and well-doing. The blazon on its colours, the distinctive honours bestowed by the sovereign, and the old traditions give a life to individual regiments, which it would be perilous to its good to lose. It has been the policy of the military authorities to foster this spirit, by giving to particular corps a national distinction; as in the case of English regiments which carry the Lion-crest, the badge of the Order of the Garter, with its motto, or that of the sovereign; and in the instance of Scotch regiments which bear the cross and motto of St. Andrew; just as the Irish regiments are distinguished by the Harp of Old Erin, or the badge and motto of St. Patrick; and the Welsh regiments are known by the Prince of Wales's plume and motto, or by the Dragon and Rising Sun of the principality; whilst in remembrance of the time when Hanover was an appanage of the British crown, the White Horse and motto of Brunswick have been in some instances retained.—*Once a Week.*

The Army Gazette.

WAR OFFICE, PALL MALL, November 27.

6th Dragoons—Major-General Thomas Marten to be Colonel, vice Major-General Beckwith, transferred to the 14th Light Dragoons.

13th Light Dragoons—Major-General Allan T. Maclean, from the 14th Light Dragoons, to be Colonel, vice General the Hon. E. Pyndar Lygon, C.B., deceased.

14th Light Dragoons—Major-General William Beckwith, from the 6th Dragoons, to be Colonel, vice Major-General Maclean, transferred to the 13th Light Dragoons.

ST. JAMES'S PALACE, November 27, 1860.

The Queen has been pleased, on the nomination of The Right Honourable Lord Foley, to appoint Henry Gillett Gridley, Esq., one of Her Majesty's Honourable Corps of Gentleman-at-Arms, vice J. W. C. Ewart, Esq., resigned.

WAR OFFICE, PALL MALL, November 30, 1860.

1st Regiment of Dragoon Guards—Captain Waller Ashe, from the 85th Foot, to be Captain, vice John Cuningham, appointed to the 12th Light Dragoons.

6th Dragoons—Lieutenant The Honourable Edward Roden Bourke, to be Captain, by purchase, vice Arthur Finch Dawson, who retires.

12th Light Dragoons—Captain John Cuningham, from the 1st Dragoon Guards, to be Captain, vice Charles Joseph Harford, appointed to the 85th Foot; Crofton Thomas Burton Vandeleur, Gent., to be Cornet, by purchase, vice Macaulay, appointed to the 72nd Foot.

15th Light Dragoons—Alexander Martin Edmiston, Gent., to be Cornet, by purchase, vice John Evelyn Kingston Morley, who retires; Joseph Norton, Gent., to be Cornet, by purchase, vice Maxwell, promoted.

17th Light Dragoons—Edward Henry Maunsell, Gent., to be Cornet, by purchase, vice Fraser, promoted.

Royal Artillery—Lieutenant Philip Henry Sandilands, to be Second Captain, vice Molony, placed on the Supernumerary List; Acting Veterinary-Surgeon, John Anderson, to be Veterinary-Surgeon, vice Ball, deceased.

Royal Engineers—The under-mentioned Lieutenants with temporary rank to be Lieutenants with permanent rank, viz.: Robert Young Armstrong, Robert John Bond, Arthur Kyle Haslett, George Edward Grover, Charles Harland Craigie Halkett, George Henry Law Pole, Charles Bowen, George William Johnson, William Hutchinson Mulloy, William Randall Slacke, Edward Toler Wynne, Francis George Oldham, Henry Allen Gun, George Gordon Chamberlin Bigsby, John Charles Ardagh, James Jameson Robertson, William Emmerson Peck, Christopher Josiah Russell, John Mabbott Morgan, Arthur Balfour Haig, Henry Cautley, Joseph Henry Satterthwaite, Ernest Marsh Lloyd, Thomas Howard.

Grenadier Guards—Lieutenant and Captain Sir John Montagu Burgoyne, Baronet, to be Captain and Lieutenant-Colonel, by

Digitized by Google

purchase, vice Ralph Bradford, who retires; Ensign and Lieutenant The Honourable Norman Leslie Melville, to be Lieutenant and Captain, by purchase, vice Sir J. M. Burgoyne, Baronet; Henry Amelius Coventry, Gent., to be Ensign and Lieutenant, by purchase, vice Melville.

3rd Regiment of Foot—Ensign John Law, to be Lieutenant, without purchase, vice Harry Arthur Alexander Breedon, deceased; Ensign Robert Charles Hearn, to be Lieutenant, without purchase, vice Law, whose promotion on the 9th September, 1860, has been cancelled.

8th Foot—Lieutenant William Hunter Baillie, from the 91st Foot, to be Lieutenant, vice Charles Dyneley Baynes, who exchanges.

9th Foot—Lieutenant Francis Tuach Rolls, from the 53rd Foot, to be Lieutenant, vice Harry Elmhirst, who exchanges,

20th Foot—Ensign George Duncan Walsh, to be Lieutenant, by purchase, vice The Honourable Adolphus E. P. Vereker, promoted.

22nd Foot—Ensign Michael Fenton, to be Lieutenant, without purchase, vice Ellis, promoted; Lieutenant Edward Murray Cookesley, to be Adjutant, vice Ellis, promoted.

24th Foot—Lieutenant R. P. O. P. Lord Louth, from 79th Foot, to be Lieutenant, vice Alexander John Colvin Birch, who exchanges.

26th Foot—Lieutenant James Armstrong, to be Capt., by purchase, vice James Young, who retires; Ensign Henry P. Wolferstan, to be Lieutenant, by purchase, vice Armstrong.

44th Foot—Ensign Francis O'Neill, to be Lieutenant, without purchase, vice Robert Montresor Rogers, promoted without purchase to an Unattached Company.

50th Foot—Ensign William Richard White, to be Lieutenant, by purchase, vice the Honourable Charles C. Chetwynd, promoted by purchase to an Unattached Company.

53rd Foot—Lieutenant Harry Elmhirst, from the 9th Foot, to be Lieutenant, vice Francis Tuach Rolls, who exchanges.

56th Foot—Ensign Thomas Charles Watson, from the 14th Foot, to be Ensign.

67th Foot—Ensign James Hardie Fraser, to be Lieutenant, without purchase, vice Nathaniel Burslem, promoted without purchase to an Unattached Company.

79th Foot—Lieutenant Alexander John Colvin Birch, from the 24th Foot, to be Lieutenant, vice Lord Louth, who exchanges.

85th Foot—Captain Charles Joseph Harford, from the 12th Light Dragoons, to be Captain, vice Waller Ashe, appointed to the 1st Dragoon Guards.

91st Foot—Lieutenant Charles Dyneley Baynes, from the 8th Foot, to be Lieutenant, vice William Hunter Baillie, who exchanges.

95th Foot—Lieutenant Norton Knatchbull, to be Captain, by purchase, vice Brevet-Major The Honourable Edward S. Plunkett, who retires; Ensign Henry V. Brooke, to be Lieutenant, by purchase, vice Knatchbull.

99th Foot—Lieutenant William John Kempson, to be Captain, by purchase, vice Lempster R. Elliot, who retires; Ensign Philip Homan ffolliott to be Lieutenant, by purchase, vice Kempson; Ensign John Francis Stephens, from the 86th Foot, to be Ensign, vice ffolliott.

3rd West India Regiment—John Francis Henry Harrison, Gent., to be Ensign by purchase, vice Croft, promoted.

Cape Mounted Riflemen—Ensign Walter J. Wyatt, to be Lieutenant, by purchase, vice Talbot de Bashall Hughes, who retires.

UNATTACHED.

Lieutenant The Honourable Charles C. Chetwynd, from the 50th Foot, to be Captain, by purchase.

BREVET.

Lieutenant-Colonel John Miller Adye, C.B., of the Royal Artillery, having completed the qualifying service for the rank of Colonel, under the 8th and 10th clauses of the Royal Warrant of 14th October, 1858, to be Colonel in the Army.

The undermentioned officers of the Royal Artillery having completed five years service in the rank of Lieutenant-Colonel, to be Colonels in the Army, under the 8th clause of the Royal Warrant of 14th October, 1858, viz.:—Lieutenant-Colonel Edward Price, C.B.; Lieutenant-Colonel James William Domville.

To be Majors in the Army—Captain Edward Thomas Wickham, 61st Foot; Captain Chandos Frederick Clifton, 12th Light Dragoons; Captain Richard Francis Holmes, 89th Foot; Captain Alfred Stowell Jones, 13th Foot; Captain Charles C. Wellesley Vesey, 72nd Foot; Captain John James Hood Gordon, 46th Foot.

Paymaster George Pollard, of the 66th Foot, to have the honorary rank of Captain, under the Royal Warrant of 27th January, 1860.

The undermentioned promotions to take place, consequent on the death of General The Honourable Edward Pyndar Lygon, C.B., Colonel of the 13th Light Dragoons, on the 11th November, 1860.

Lieutenant-General Sir Francis Cockburn, Colonel of the 95th Regiment, to be General.

Major-General Sir John Lysaght Pennefather, K.C.B., Colonel of the 22nd Foot, serving with the local rank of Lieutenant-General in Great Britain, to be Lieutenant-General.

Lieutenant-Colonel and Brevet-Colonel John Francis Glencairn Campbell, C.B., from the 91st Foot, to be Major-General.

Brevet Lieutenant-Colonel William Clarke, Major, half-pay, unattached, to be Colonel.

Major Thomas Matthias Luz Weguelin, 100th Foot, to be Lieutenant-Colonel.

Captain Albert O'Donuel Grattan, Royal Engineers, to be Major.

Memorandum—Captain Brook John Knight, upon half-pay, Royal Staff Corps, has been permitted to retire from the service by the sale of his Commission, he being about to become a settler in Canada.

STATIONS OF THE BRITISH ARMY.

Corrected up to 1st December, 1860.

[Where two places are mentioned, the last-named is that at which the Depôt is stationed.]

1st Life Guards — Regent's Park

THE ROYAL ENGINEERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The September monthly number of Colburn's "United Service Magazine," commences with "Notes on the Engineer Corps of the French Army," wherein the writer states, that its establishment for the year 1859, consisted of 724 commissioned staff and regimental officers, and 585 Gardes du Génie, that 175 of the officers and all the Gardes have risen from the ranks, that they qualify for these promotions in the school established and kept up in the engineer regiment at government expense, that the Gardes, feeling they have but little chance to qualify themselves for officers, never rise to that distinction, and are therefore content to accept the subordinate position, and take army rank above all non-commissioned, and below all the commissioned officers, and are employed in superintending the works, &c.

The writer of "the notes" seems to have come to the conclusion that "at the present time the insufficiency of our own engineer force is felt, and that proposals for its increase are under discussion," but he does not state whether the subject is under discussion of Her Majesty's Government, or of any interested subordinate branch thereof; and he appears to wish it to be understood that there is a great similarity between the Gardes du Génie of the French Army and our own "civil branch of the Royal Engineer department," but, as the latter learn their profession, and qualify themselves entirely at their own expense, seldom enter the Service until they are from 25 to 30 years of age, and have then to pass a pretty rigid professional examination, and produce testimonials as to character, &c., before obtaining their appointments, the only similarity appears to be "that they never obtain commissions as officers in the corps."

It is very likely that the large amount of money propose to be expended on our fortifications during the next few years, as well as the increased demands of late to improve our old-fashioned barrack accommodation, will necessitate some addition to the Engineer staff; but, whether this can best be accomplished by still further permanently augmenting the corps of Royal Engineers, or by some other plan, is a problem yet to be solved.

Without going too much into detail, or further back than the year 1845-6, it may be seen from the parliamentary estimates, that our Royal Engineers then consisted of 240 officers; and in order to carry on the various works in Great Britain and its colonies, they had the assistance of 186 civil superintendents, very inappropriately styled "clerks of works, &c.," whose actual duties then, as now, comprise those generally performed by architects, civil engineers, and surveyors, in private practice, but from their constant employment in planning, erecting, and repairing our fortifications and barracks, many of them have acquired as good a knowledge of military engineering as the officers of the Royal corps, which has been gradually increased from the period named to no less than 393 in the present year's estimate, being an increase of about 64 per cent. in 15 years, whilst the permanent civil establishment, who have equally shared with them all the vicissitudes of home and foreign climate, &c., except actual warfare (in which but comparatively few of the officers themselves have ever been engaged) only number according to a Royal Warrant, dated April, 1858, a total of 180 clerks of works, of whom there are but 40 on the first-class, with relative army rank of captain, 90 on the second class, ranking as lieutenants, and 50 on the third class as ensigns.

The parliamentary estimate for the present year, however, provides for 191 permanent clerks of works, and a great number of temporary superintendents, from whom the permanent list is recruited as vacancies occur; but it would be very difficult to ascertain the exact number temporarily employed; at present they are probably not less than 150 to 200, for, as the works increase, so also must this temporary assistance. It may fairly be calculated that, in proportion as the corps of Royal Engineers may be augmented by young officers fresh from the college, so must the temporary list be increased; for it takes up so much of the time of the permanent establishment to teach these young officers their duties for the first few years after getting their commissions, that it is impossible to carry on the authorised works and repairs without civil temporary aid.

Now, as the large amount of money proposed for our fortifications will most probably be expended within the next four or five years, it may be seen that if the Engineer corps be again augmented by an extra batch or two of inexperienced young officers, it will not only cause the immediate increase in the estimates of their own pay and allowances, and that of the temporary civil assistance before alluded to, but when the works may be completed they will probably have learnt sufficient of their duties as to become a permanent expense to the country.

Seeing, therefore, that a large number of officers in the French Engineer corps, as well as a few in other arms of our own Army, have risen from the ranks, and considering that in every civil branch of our War-Office establishment, except in our Royal Engineer, the clerks even, who require no professional qualifications, have the prospect before them of becoming heads of their departments at our various stations at home and abroad, and that but very few of the officers of Royal Engineers are ever otherwise than "civilly employed" on duties for which many of the civilians in the Service are as well qualified as themselves, I would beg to suggest for consideration a plan at once practically useful and economical, both for the present and future; which is, to augment the corps to its present requirements by granting commissions to a supernumerary list of officers, to be taken entirely from the present permanent civil establishment, thus converting their relative into substantive army rank, and whose future promotions could be so arranged, as not in any way to interfere with that of the present officers, so that no injustice would be done them; by which plan many other well qualified persons in the junior classes, who are far advanced in life, and have served their county well and truly in different climates, would be promoted into a higher class, and their places filled from the temporary list: all of which, permit me to observe, would be a graceful acknowledgment of the professional services of a useful class of public servants, who would thus be stimulated and encouraged in such a manner as they would no doubt duly appreciate, and I trust fully deserve.—I am, &c., C. W.

THE MILITARY TRAIN.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The correspondent of the *Times* in China states in his letters that the Military Train were above their work. This naturally brought about a discussion as to the organisation of that corps and its efficiency in the field on active service. The reason he gives for this is that they went out there expecting to be employed as cavalry; but had he given the matter a little thought, he would have seen at once that the sole break down was on account of the Military Train being placed under the orders of a civil body. The Military Train is organised in the same manner as any regiment in the Service. The commission and steps are regulated by purchase; they are a combatant corps, and its officers are composed of men who have seen much service, and in the higher grades, I will venture to say, have more decorations than any other regiment; consequently, no doubt, they felt themselves hardly used in being thus treated. Had the orders come through the proper course, viz. the quartermaster-general, all would have gone on smoothly and proper, and there would have been no break down. An attack has been made on them in a letter, which appeared in a contemporary of yours, calling them belaced dragoons, and recommending their being immediately attached to the Commissariat. This letter is evidently written in a jealous, vindictive spirit, and by one (if he has ever served) who ought to know military discipline better. The Military Train never were in a more efficient state; there never was a smarter or better drilled body of men; their uniform is plain, soldierly, and useful; and, surely, being good cavalry soldiers is no detriment to them, as no one can tell better than you can the god-send they were, acting as cavalry, during the Indian Mutiny. Let the requisition for transport come from the proper quarters, and the Military Train are able and willing to do any work allotted to them, but as to attaching them to the Commissariat, the thing is an utter impossibility, and will never work. Let the Commissariat have a train of their own if it must be, but I do not see that it is necessary; as long as there as a quartermaster-general in existence, they have only to apply to him, and what transport they require will be furnished.

The transport in China is deficient; but when you consider only one battalion consisting of under 300 men was sent out to convey the transport of 12,000 troops, no wonder there was a break down. It was almost an impossibility to do the work, as the Coolies deserted and left them to their own resources.—I am, &c. ONE WHO HAS SEEN SERVICE.

THE COMMISSARIAT AND THE MILITARY TRAIN.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In your editorial remarks of the 17th inst., you make a most excellent suggestion as to the propriety of assimilating the war and peace practice of the relations that should exist between the Commissariat and the Military Train. The collision between these branches of the Army in China is a result always foretold by the officers of Commissariat, from the fact of the Military Train having been embodied as a combative corps, while the Commissariat has remained a civil department. The Military Train, no matter what may be its organisation, must be, *de facto*, subordinate to the Commissariat in the field, if it is to do the Commissariat transport; for the Commissary-General, who is responsible for the supply of the Army, must have the "entire controul" of his means of transporting the supplies. The mistake appears to be in having constituted the Train a military force, and leaving the Commissariat in the peculiarly hybrid position it now occupies.

I may, perhaps, be allowed to observe, that you have hardly taken a correct view of the matter in looking upon it as an anomalous state of things for the Military Train to receive orders from officers of Commissariat, inasmuch as the latter have the command of a military body now existing, under the style of the "Commissariat Staff Corps," which is composed of drilled soldiers bearing arms, and in all respects on a footing with other parts of the Army. I cannot, therefore, perceive why an auxiliary branch of the Service, such as the Military Train, is to be placed beyond the control of a superior auxiliary department, when, beyond doubt, the existence of both should be made contingent on their efficiency and usefulness to the Army at large.

It can scarcely be legitimate to designate the Military Train a cavalry force, for it was raised to serve the Army and not to fight. The arms given into the hands of the soldiers of the Train are given for the same reason to the "Commissariat Staff Corps," that they may protect themselves and the stores under their charge when necessary, and also that they may be kept at all times in a state of soldierly discipline; and the sooner that the Train is placed upon a footing for general transport service the better for the Army and the country.—I am, &c. KOSLOV.

CHAPLAINS IN INDIA.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Do you think "the powers that be" are aware that at the station of Neemuch, in central India, which has a population of 3000 Europeans, there is no chaplain, and that when the soldiers die the lieutenants in command of companies have to read the burial service over them? But lately the cholera was prevalent there, and the men sickened and died, and there was no one to pray beside them or administer to them the last rites of religion. There can be no christenings, so any unfortunate child who may be born there may die outside the pale of Christianity for want of baptism. Surely you, who have reformed so many abuses, may do something to remedy this—your pen is known to be all-powerful. I believe there is no want of missionaries to Timbuctoo and "Borrioboolagha," but our soldiers of course rank many degrees below the "nobler savages,"—they are, in fact, but food for powder and shot, or disease, if they live. Well, if not, enlist more! That they have souls to be saved does not matter—Government does not enlist souls! There are those who will bless you if, through your instrumentality, a chaplain be appointed.—I am, &c., JOHN.

THE ENGINEER OPERATIONS IN CHINA.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In your remarks upon the late operations in China in the ARMY AND NAVY GAZETTE of November 10, you allude to the mischances which so often attend our Engineer operations in the field, and in particular to the failure in bringing up the scaling-ladders and pontoons at the late assault upon the Taku forts. Now, I think it can be easily shown that under our present system, the responsibility of these failures does not rest with the Engineers.

Special operations require for their performance men who are specially trained; but yet we find in the history of all assaults by British troops that our Engineer officers, from the paucity of numbers of their own men, are obliged to borrow troops of the Line or Marines to carry scaling-ladders and other Engineers' *matériel* for them. The consequence of this system is, that the men are unknown to the officers and the officers to the men. The service is one to which the men are unaccustomed; they don't perceive that any distinction or promotion is to be gained by it; they consider their position inferior to that of their comrades of the same regiment, who are fighting in the ranks; they consequently dislike the service upon which they are engaged, and—failure, of more or less magnitude, is sure to ensue.

It has been remarked over and over again, that when troops of the Line find themselves exposed under these circumstances to an enemy's fire, their natural impulse is to return it; and not being trained to resist this impulse, they yield to it, and ladders, or pontoons, or anything which may hamper their movements, are forthwith left on the ground.

In reading over the military opinions of Sir John Burgoyne, I find that that officer brought this very circumstance under the notice of the authorities many years ago. He writes:—

"There is another service, viz., escalading, where the Engineer troops are employed with great advantage. In this operation, if the ladders are carried by soldiers of the Line, we know from experience that when they get under the enemy's fire, they feel the ladders as clogs about their necks, and in spite of every endeavour to the contrary will leave a portion by the way and join their comrades in the ranks: the Sappers, on the contrary, being sensible that it is a service in which they are to distinguish themselves, carry and rear the ladders with regularity and expedition, and in a way which I expect will open a new and important road to enterprises of this description.

"It must not be supposed that I mean to depreciate the services of the soldiers of the Line; no man can be more sensible of them than I am; what is here adverted to are properties of human nature which are immutable."

When our armies in the field are supplied with their proper proportion of Engineer soldiers and Engineer stores, such failures as are here adverted to will be extremely rare.

In the late operations in China I perceive only 12 Sappers could be spared to accompany the pontoon bridge; and if I remember right, the whole force of Sappers does not exceed 100 men for an army numbering nearly 12,000. The proportion of sappers in the continental armies of Europe to such a force would be at least 400.—I am, &c.,

AN OFFICER OF ROYAL ENGINEERS.

MR. THOMAS'S RIFLED CANNON.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Sir William Armstrong's new 7-inch gun, I find, was proved with only two charges instead of three, of 25 lbs. each, while Mr. Lynall Thomas's 7-inch gun was fired with four rounds of 25 lbs. each, and one of 28 lbs., which may fairly be looked upon as double the proof, when the extra weight of Mr. Thomas's projectile is taken into consideration.

Perhaps some one would kindly inform me whether the shot or bolt used in the proof of the Armstrong gun is the same as that which is usually fired from the gun on service, *i. e.*, whether it be forced through the bore in the same manner, and if so, how it is contrived that the double charge of powder (25 lbs.) is placed in the chamber of the gun?

As to your remarks with regard to the weight of Mr. Thomas's gun, I would observe that, when he undertook to construct a rifled cannon of large size, no gun had ever been (and it was then supposed could not be) made of sufficient strength to project a shot of 180 lbs. weight with a proper charge of powder; and, if Mr. Thomas's gun had been 10 tons instead of 6½ tons in weight, I boldly assert that it should have been pronounced a successful experiment.

It is well known that thickness of metal does not necessarily imply a proportionate increase of strength. As it is, Mr. Thomas's gun is, comparatively speaking, one of the lightest guns ever constructed; Mr. Whitworth's 80-pounder weighing 4½ tons, Sir William Armstrong's 100-pounder shell-gun, weighing nearly 4 tons, and Mr. Thomas's 180-pounder, 6½ tons only.

At present, there is no evidence to show that a breach-loading gun of any kind can be constructed which shall bear the test to which Mr. Thomas's gun has already been submitted.

I beg, in conclusion, to state that Mr. Thomas never offered to construct a gun and projectiles which should show a sufficient superiority on every point, to be at once admitted into the Service without any further test (and that for the mere purpose of being re-imbursed his expenses), but that he simply volunteered to show that a gun on the proposed scale could be made with so much likelihood of obtaining these superior results, as to justify the Government in going to the expense of making the trial.

Such a gun he did produce, and at his own risk, and yet the War Office would now compel him to continue the experiments at his further risk and cost!—I am, &c.,

THE MINOR CANNON.

P.S. I again observe a paragraph in the *Times* of the 26th, giving an account of the proof of another of Sir William Armstrong's large experimental cannon, re-inforced with brass, the whole at a cost probably exceeding Mr. Thomas's gun. This was to be tested, as stated, up to bursting point. After a few rounds were fired it appears that the attempt to burst* it was crowned with the most signal success.

[* Only the gun inside the casing was burst.—ED.]

THE RIFLE BRIGADE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I was much amused at the propositions set forth in your paper in a letter bearing the signature of "Subaltern," and "aiming" at the transfer of first-class shots from the other Line regiments to the Rifle regiments—so called.

I believe it is well known that such a proposition was mooted in 1856, in a quarter whence it was likely to emanate more successfully than it can from "Subaltern," therefore it has not now the merit of originality. I have seen several officers smile at the paragraph in a subsequent issue of the ARMY AND NAVY GAZETTE, manufactured on completion of the opportune rifle match between three regiments in the North Camp; which, by the way, was regarded here with the sort of interest Mr. Merry would feel on seeing the exertions of three dray horses in a amateur race at Epsom on the Derby day. "Still harping" on the Rifle Brigade, there is in your late issue another paragraph, expressing regret at the comparative defection of the 1st battalion of that regiment in rifle practice. "Subaltern's" pathetic appeal to "ancient superiority," his palliation of the shortcomings of our Rifle regiments in the assumed disadvantages of assumed William Tell and Robin Hood in their ranks, and his disadvantageous comparison of the British with continental armies,—this latter is too much a practice with our military theorists—are in our matter-of-fact days out of place.

I would submit that the splendid shooting of some Line regiments is more a subject for congratulation, than the non-proficiency of the Rifle Brigade in that respect is matter of regret, for a public journal; and I say this in view of some feelings of dissatisfaction which the letter of "Subaltern" and your subsequent remarks on "Musketry" have excited. That one regiment is drilled better than another is too frequently a matter of opinion—that some regiments shoot better than others is a matter of fact. It is quite possible that merit in drill may be measured by a partial vision—merit in shooting is measured by figures. Good shooting has been a point of competitive honour in the British infantry for several years; and if past reputed superiority meant anything, surely the Rifle regiments set out in this competitive race under many advantages. They were beaten when all regiments were similarly armed, they are beaten now; and they and their friends must submit to defeat, and to seeing the 51st, the 18th, the 55th, the 22nd, and the 47th Regiments, successively reported by Major-General Hay as first of the British Army in a race where Rifle regiments are not placed.

Honour, therefore, to whom honour is due—to those officers who secure, in the instruction of the individual soldier, the success of a regiment. No one more than I will rejoice to see the Rifle Brigade maintain an efficiency in shooting equal to our other Line regiments, but it is manifestly inconsistent with fair play to transfer to their ranks the first-class shots of other regiments, to make good a very patent defect somewhere in Rifle regiments.—I am, &c.,

AN EX-OFFICER INSTRUCTOR.

SANDHURST MILITARY COLLEGE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—There are now about 150 cadets at the Royal Military College, Sandhurst, who were put there by their friends, in many cases at a great pecuniary sacrifice, under the belief (as clearly stated in the printed regulations) that they would, on attaining a certain qualification, become entitled to a commission, without purchase, in the line.

As you are aware, an attempt was made at the last half-yearly examination to depart from that regulation; but the injustice of the case was so clearly shown in some remarks that appeared in the *Times* and in the ARMY AND NAVY GAZETTE, that the authorities were induced for the time to give up the point. It appears that the attempt is now to be renewed, a notice having, I believe, been given, that only 20 commissions will be given at the forthcoming examination, whilst there are 60 cadets ready to prove their qualification. Consequently, the forty unsuccessful candidates, whether or not they obtain the qualifying number of marks prescribed by the regulations under which they entered the College, will be returned to their friends no better off than when they joined it, and that, after an outlay (which many of them could ill afford) of some two or three hundred pounds. I cannot believe, however, that such a glaring breach of faith can be persevered in, particularly if, as I hope, the case be again taken up by the press; and perhaps, if you would be good enough to insert these few lines in your influential paper, they might not be without some effect in bringing about a favourable consideration of the case.—I am, &c.,

JUSTITIA.

ARMY TRANSPORT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I observe that on two occasions in stating the case of the Military Train and Commissariat, you have laid considerable stress on the probability of Commissariat clerks exercising authority over the officers of the Train, and the matter has thereby been placed in a light strongly adverse to the control which the Commissariat ought to exercise over the transport given to the department for purely commissariat purposes.

You are doubtless not aware that the grade of Commissariat clerk, as formerly existing, has been abolished, and that the junior commissioned ranks of the department are now filled from the line by subalterns entering the department as Deputy-Assistant-Commissary-General.

This change was effected by the Royal Warrant of October, 1858; and as the junior grade of deputy-assistant enjoys the relative rank of captain, it can hardly be looked upon as so very anomalous a proceeding for the officer of transport to receive his orders from the officer of commissariat, the latter in no wise interfering with the discipline or interior economy of the transport corps.

I would earnestly beg your influence in having this most momentous subject of Army Transport set on a sound basis. The want of transport with the Army of the East when it left the shores of Britain to enter upon the Russian war was the primary cause of most of the disasters that subsequently happened, and unless unity prevails between the vital

Digitized by Google

services of supply and transport, no army can ever be efficient in the field, and no campaign free from the most cruel privations and disappointments.

This matter of Army Transport is, in fact, more pressing than that of Navy Transport, so ably advocated by you, inasmuch as there is a total want of Commissariat Transport for our armies, if the Military Train is not to do the work on a sound system; whereas, for the conveyance of troops by sea, there is always available mercantile transport, though not possessing the advantages of a properly constructed and organised fleet of Government ships.—I am, &c.

KOSLOV.

PAYMASTERS IN THE ARMY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The article in your last week's paper, under the head of "Paymasters," is well-intended and deserving of public attention, inasmuch as the writer recommends all paymasters in receipt of 15*s.* per diem to the honorary rank of captain. This would be only justice to those who have served in other ranks, many of whose services exceed thirty years, with fifteen and upwards as commissioned officers. There is a paymaster, now with his regiment, whose services exceed 42 years, 30 of which a commissioned officer, but not having five years as paymaster, he is, by a recent Warrant, ineligible for the honorary rank of captain. Notwithstanding, very many paymasters from civil life, being fortunate, in having five years' service, fly over "in rank" the heads of these old warriors.

I trust the day is not far distant that the evil complained of may be rectified, more particularly as it does not interfere with the public purse.—I am, &c.,

ONE OF THE OVERLOOKED.

THE STAFF COLLEGE.

The following General Order, signed by Sir J. Y. Scarlett, Adjutant-General, has been issued from the Horse Guards, dated November 24:—

"The subjoined list, showing the result of the examination for admission to the Staff College in February next, is published with reference to the last paragraph of the General Order, dated the 25th of February, 1860, No. 745. The successful competitors have the word 'recommended' against their names. The names of the candidates who have failed are omitted, but by the index numbers such officers can ascertain what marks they gained:—

Rank and Name.	Corps.	Index Number in the Examination.	No. of Marks obtained by each.	Remarks.
Capt. T. D. Baker	2nd Bat. 18th Foot	131	2884	Recommended.
Capt. W. K. Elles	38th Regt ...	7	2800	Ditto.
Lieut. J. P. Nolan	Rl. Artillery ...	1555	2726	Ditto.
Lieut. J. T. Barrington ...	Rl. Artillery ...	140	2534	Ditto.
Bt.-Major E. C. Bolton ...	Rl. Artillery ...	130	2288	Qualified, but no vacancy for another officer of the Rl. Artil., or Rl. Engineers.
Lieut. E. Mitchell	Rl. Engineers ...	21	2287	
Lieut. A. G. F. Griffiths ...	63rd Regt. ...	139	2199	Recommended.
Lieut. W. H. Wardell	Rl. Artillery ...	135	2145	Qualified, but no vacancy for another officer of the Rl. Artillery.
Lieut. A. Murphy	5th Lancers ...	35	2118	Recommended.
Lieut. C. J. East	32nd Regt.	65	2104	Ditto.
Capt. W. Black	2nd Bat. 6th Foot	133	2092	Ditto.
Capt. C. K. Parsons	2nd Bat. 3rd Foot	1001	2009	Ditto.
Lt. W. L. K. Ogilvy	4th Bat. 60th Rt.	134	1997	Ditto.
Capt. C. Acton ...	51st Regt. ...	132	1906	Ditto.
Lieut. T. Gonne	17th Lancers ...	62	1796	Ditto.
Capt. C. D. C. Ellis	1st Bat. 60th Rt.	68	1759	Ditto.
Cap. W. W. Lynch	2nd Bat. 2nd Foot	38	1702	Ditto.
Capt. H. Nangle	1st Bat., 15th Ft.	136	1700	Ditto.
Capt. G. A. Wilkinson	Rl. Artillery ...	138	1697	Qualified, but no further vacancies.
Lt. A. L. Emerson	28th Regt. ...	36	1689	
Lieut. A. H. Bell	Rl. Artillery ...	141	1668	
Lieut. C. R. Johnston	50th Regt. ...	1	1647	
Capt. R. Harboro	2nd Bat., 7th Ft.	42	1602	
Bt.-Major G. N. Fendall ...	53rd Regt. ...	66	1305	
Capt. G. C. L. Lombard	2nd Bat., 16th Ft.	41	1221	
Capt. H. De. R. Pigott	83rd Regt. ...	63	933	
		137	1221	Failed in Modern Languages.
		39	1192	
		69	1034	
		72	701	Failed in Mathematics, and in Modern Languages.
		71	598	Ditto.
		75	483	Ditto.

"It was announced by the General Order 745, dated the 25th of February, 1860, that there would be 15 vacancies to be competed for on this occasion, of which two would be open to officers of either the Royal Artillery or Royal Engineers."

PORTSMOUTH AND ITS DEFENCES SEAWARD.—A sea attack must come either from the westward, by way of the Needles and the Solent, or from the south-eastward. It would almost require a separate article to give any adequate idea of the defences of the Needles' passage, existing, in progress, or about to be constructed. Its natural features have been already alluded to. To these must be added the combined cross and raking fires of extensive batteries at Hurst Castle, on the north, and of no less than six others lying along the shore, or perched on the cliffs for five miles on the south. A strong boom is also to be placed, in war time, across the narrowest part of the channel, and under the guns of Hurst Castle; and it seems to be considered tolerably certain that no enemy would risk the natural difficulties of the passage, and the damage which must be inflicted in running the gauntlet of so formidable a chain of forts, for the mere sake of scrambling up to Spithead by the Solent, only to find himself, when there, involved in the same kind of difficulties from the cross-fire of sea and land forts, which are next to be described.—*Once a Week.*

THE NAVY.

ADMIRALTY, NOVEMBER 28.

APPOINTMENTS.

Lieutenants—The Hon. J. T. Fitzmaurice to the Edinburgh; W. W. Howell and Henry T. Boger to the Jason; Colin W. Lindsay to the Dauntless, additional, for service in the Coastguard; George T. Medd to the Flying Fish; Frederick S. Vander Meulin to the Marlborough, additional, for disposal.

Surgeons—William L. Gordon, M.D., to the Immortalité; James Sproule to the Ariel.

Second Master.—William J. Grady to the Himalaya.

Midshipmen—R. P. W. Powney to the Jason; F. J. Easther to the Harrier.

Clerk—William B. Edkins to the Majestic.

First-Class Assistant-Engineer—James Ross to the Indus, for the Lark.

Second-Class Assistant-Engineer—John H. Cooper to the Cumberland, for the Cochin.

Third-Class Assistant-Engineers—Joshua Conolly (acting) to the Cumberland; Richard Green (acting) to the Asia, as supernumerary.

ADMIRALTY, NOVEMBER 29.

APPOINTMENTS.

Commanders—James Ball to the Colossus, and Archibald D. W. Kitchen to the Pembroke, both additional, for service in the Coastguard.

Lieutenant—Pownall Pellew to be Flag-Lieutenant to Vice-Admiral Martin, Commander-in-Chief of the Mediterranean.

Mates—Mather Byles to the Firebrand; John C. Y. Holbrook to the Charybdis.

Assistant-Surgeons—William H. Clarke to the Cambridge; J. R. Holman, M.D., to Chatham Dockyard, vice Peacocke.

Midshipman—Tom H. Falcon to the Harrier.

Chief Engineers—Thomas S. Walker to the Hero; George Cook to the Asia, for the Frederick William; Robert Williams to the Indus, for the Liverpool.

Agamemnon, 91, screw liner, Captain Thomas Hope, was at Palermo on the 20th of November. A letter dated Palermo, November 5th, says:—"H.M.S. Agamemnon left Naples on the 2nd and arrived at Palermo on the 4th. I believe she is sent down to receive King Victor Emmanuel, who is expected here in about ten days' time. A salute of 101 guns was fired here yesterday for the taking of Capua."

Alacrity, 4, screw steam-sloop, Commander John K. E. Baird, arrived at Malta from Corfu on the 22nd of November. She was under orders to return to the fleet at Corfu on the 23rd, immediately after the arrival of the English mail due at Malta on the evening of that day. A letter dated Corfu, 20th November, received by H.M.S. Alacrity, says:—"Our roadstead is quite grand with Admiral Martin's magnificent ships. The Admiral changed his flag yesterday morning. No news of importance. H.M.'s frigate Melpomene was to leave on the 24th for the coast of Syria."

Amphion, 36, screw frigate, Captain Cochran, was in Malta harbour on the 23rd of November.

Argus, 6, paddlewheel steam-sloop, Commander Herbert F. W. Ingram, was at Gibraltar on the 20th of November. In reference to the wreck of the Brazilian corvette, Donna Isabella, we find that the Argus was dispatched to Tangier for the survivors, and returned to Gibraltar on the afternoon of the 17th inst. with the whole of them, numbering 103. Eighteen of the crew, who received injuries consequent on this unfortunate disaster, were landed and conveyed to the Civil Hospital, where every attention was paid to them. Lieutenant Lima, who was slightly wounded, and seven other officers, had taken up their abode in an hotel in town. The acting Brazilian Consul lodged 2 officers and 75 men on board a hulk in the bay until an opportunity offered for sending them to the Brazils. Both surgeons of the ship met with a watery grave. Nothing whatever in the shape of clothing or personal effects was saved, as the vessel was rent to pieces by the heavy surf twenty minutes after taking the ground. The corvette was bound from Marseilles to Rio Janeiro at the time of the melancholy occurrence. The commander, Captain Carvalho, as well as 23 officers and about 100 seamen, were drowned. Lieutenants Salgado and Lima, with six other officers and 93 seamen, succeeded in gaining the shore. The Arabs treated the shipwrecked crew with great humanity; they took them to their tents, lighted fires to warm and dry them, and killed an ox to supply them with food. The Viceroy, Muley Abbas, ordered a barrack at Tangier to be prepared for the reception of the survivors, and sent out a supply of provisions for their sustenance. The Brazilian officers and crew, having placed themselves under British protection, received all the assistance they were in need of from Her Majesty's minister in Morocco.

Ariadne, 26, screw steam-frigate, Captain Edward W. Vansittart, was put into No. 3 dock in Keyham steamyard on Tuesday evening. On Wednesday morning she was shored up, and the water was pumped out of the dock, in order that she may be cleaned and overhauled.

Ariel, 9, screw steam-sloop, Commander John R. Alexander, will, as soon as her repairs are completed at Devonport, proceed to the Cape of Good Hope station.

Assurance, 4, screw steam-sloop, Commander Aynsley, was at Corfu on the 20th of November.

Banshee, 2, paddlewheel steam-vessel, Commander Campbell, was in the Bosphorus on the 20th of November.

Barracouta, 6, paddle steam-sloop, Commander W. Wood, arrived at Spithead on Sunday evening, with the yellow flag flying at the fore, having on board upwards of 30 cases of fever from Her Majesty's ships Imaum, at Jamaica, the Icarus, and other vessels on the station. Six deaths have occurred since leaving Jamaica on the 24th of October, but the remaining cases are now progressing favourably. The ship called in at Bermuda on the 3rd of November and remained there until the 5th, when she left for England. She has discharged her sick to Haslar Hospital, and went into Portsmouth harbour on Wednesday to make good defects. She has brought to England her Bermudan pilot in consequence of the roughness of the weather at the time of leaving. He returns to the West Indies in the Firebrand. The Barracouta's appearance gives positive evidence of the rough weather she has met with.

Boxer, 1, screw gun-boat, Second-Master C. F. Gulliver, tender to Marlborough, left Malta on the 19th of November for Tripoli, having on board Lieutenant Porcher, R.N., and Lieutenant Smith, R.E., who are about to pursue some antiquarian researches.

Brisk, 16, screw steam-sloop, Captain A. F. R. De Horsey, was at the Mauritius by the last advices, bearing *pro tem.* the flag of the Commander-in-Chief, Rear-Admiral Sir Henry Keppel, K.C.B. The Brisk has captured a slaver with 846 slaves.

Cæsar, 90, screw liner, Captain Mason, was in Malta harbour on the 23rd of November.

Caradoc, 2, paddlewheel steam-vessel, Lieut.-Commander J. B. Scott, was at Marseilles on the 20th of November.

Charybdis, 21, screw steam-corvette, Captain the Hon. George D. Keane, has been towed from Keyham steamyard, and placed alongside the hulk Endymion in Hamoaze.

Cressy, 80, screw liner, Captain Thomas Harvey. By accounts from this ship we hear that some of the crew were suffering from pulmonary complaints.

Cumberland, 70, guardship of the steam ordinary at Sheerness, Captain Charles F. Schomberg, has been paid wages, under the superintendece of Captain Charles Wise, Superintendent of Her Majesty's dockyard, and her crew granted eight days' leave.

Doris, 32, screw frigate, Captain Heathcote, was on the 20th of November on the coast of Syria.

Exmouth, 90, screw liner, Captain Paynter, was at Corfu on the 20th of November.

Falcon, 17, screw steam-sloop, Commander A. G. Fitzroy, arrived at St. Helena on the 26th of October in 11 days from Loando, and not from London, as reported by the Union Mail steamer Dane.

Firefly, 4, paddle-wheel steam surveying-vessel, Commander A. L. Mansell, was at Alexandria on the 11th Nov.

Forte, 51, screw steam-frigate, Captain Edward W. Turnour, flag-ship of Rear-Admiral the Hon. Sir Henry Keppel, K.C.B., left the Cape of Good Hope for the Mauritius on the 20th of September, with dispatches from England for the Admiral.

Foxhound, 4, screw steam-sloop, Commander Mitchell, was in Malta harbour on the 23rd of November.

Frederick William, 86, screw liner, was tried at the measured mile in Stokes Bay on Thursday. Her machinery answered perfectly well, and her mean speed was 11·782 knots, with a mean of 72 revolutions. During the trial one of the men at the wheel got his arm jammed between the spokes and the standard, and broke the large bone of his arm, midway between the wrist and elbow. The assistant-surgeon of the Asia, who is always on board on trial-trips, at once bound the man's arm up, and on returning to the harbour accompanied him to the Royal Hospital at Haslar.

Gannet, 11, screw steam-sloop, Commander Lambert, was at Constantinople on the 20th of November.

Gorgon, 6, paddle-wheel steam-sloop, Commander Bedford C. T. Pim, from Portsmouth, arrived at Plymouth on Tuesday, and went into Hamoaze. She will coal and provision, and take the mooring brig Swift under her care, and then proceed to the Cape of Good Hope.

Greyhound, 17, screw steam-sloop, Commander F. W. Sullivan, was off the coast of Syria on the 20th of November.

Growler, 1, screw gun-boat, Lieut.-Commander H. E. Crozier, was at Gibraltar on the 20th of November.

Hannibal, 91, screw liner, Captain Farquhar, flag-ship of Rear-Admiral Mundy, C.B., was in the Bay of Naples on the 23rd of November. Small-pox was very prevalent on board, and seventy-four of the crew were in the lazaretto. The Admiral had been assailed by the disease.

Hero, 91, screw liner, Captain George H. Seymour, C.B., in Devonport harbour, will be docked as soon as room can be made for her at Keyham.

Hibernia, sailing three-decker, Commander the Hon. A. C. Hobart, flag-ship of Admiral-Superintendent Codrington, C.B., was in Malta harbour on the 23rd of November.

Himalaya, 6, iron screw steam-trasport, Captain John Seccombe, got up steam on Wednesday, and proceeded from Plymouth Sound into Hamoaze, preparatory to her going into dock in Keyham steamyard, to have defects made good.

Hydra, 6, paddle steam-sloop, Commander Richard V. Hamilton, was by the last accounts at Halifax, Nova Scotia. The Hydra had, it is stated, been brought from the West Indies by Commander Hamilton on his own responsibility, owing to the yellow fever having broken out on board with great virulence, contracted, it is supposed, while stationed at that unhealthy locality, Greytown. We regret to say that it has been reported that two officers had died in the Naval Hospital at Port Royal, Jamaica, and that the casualties among the crew amounted to 14. The officers who have fallen victims to the disease are a mate and a master's assistant. The former is a Mr. Edward Austin, whose father is the present Rear-Admiral Horatio Austin, C.B., the chairman of the Thames conservancy. The Hydra was to be thoroughly fumigated, and as she has been in commission since June, 1858, she will probably be ordered to England by the Admiral as soon as he is in possession of the facts connected with her case.

Inflexible, 6, paddlewheel steam-sloop, Commander George A. C. Brooker, was, by the last accounts from the north coast of China, under orders for Japan, but as fifty-four of her men and two of her boats, including the launch, were away on duty, some time would necessarily elapse before she could be enabled to proceed. Lieutenant H. E. C. Robinson was present with the rocket brigade during the operations against the Chinese.

Intrepid, 6, screw steam-sloop, Commander Marryatt, was off the coast of Sicily on the 23rd of November.

James Watt, 91, screw liner, Captain James Codd, was at Corfu on the 20th of November.

Jasper, 1, screw steam gun-vessel, Lieut.-Commander W. H. Pym, has been ordered home from the West India station. The Jasper was commissioned at Portsmouth on the 31st of July, 1857, and left England in the following month of September, and has therefore had the pendant flying upwards of three years.

Lapwing, 4, screw steam-sloop, Commander O'Reilly, was at Latakia on the 20th of November.

Liffey, 51, screw frigate, Captain Preedy, C.B., was on the 20th of November on the coast of Syria.

Digitized by Google

Liverpool, 51, new screw frigate, at Devonport, is in the north basin at Keyham steamyard, and is receiving her machinery.

London, 90, screw liner, Captain Henry Chads, was under orders to leave Malta on the 25th of November, to join the Admiral at Corfu. On the 17th of November, in a quarrel which ensued between a boatman named Vincenzo Buttigieg and three Sicilian musicians named Antonio Andreozzi, Antonio Enerresi, and Giovanni Lemonne, the former two belonging to Her Majesty's ship London, and the latter to Her Majesty's ship Victor Emmanuel, the boatman was stabbed in the breast with a sharp instrument. The wound is supposed to be dangerous, as it penetrates the cavity of the chest. The boatman states that the blow was inflicted by Andreozzi. A constable named Carmelo Magro, who went to arrest the prisoners, was also wounded in the head, it is supposed with a stone. The prisoners were immediately taken into custody, and they will be brought to-morrow before one of the police magistrates. Here we have the knife again, but in this instance it is so far satisfactory that the miscreants are not Englishmen; still, as the crime was committed while the culprits were attached to a British man-of-war, we trust that they will be signally punished.

Lyra, 9, screw steam-sloop, Commander R. B. Oldfield, was on the 23rd of October cruising to the eastward of the Cape of Good Hope.

Malacca, 17, screw steam-sloop, at Sheerness, is preparing for commission.

Marlborough, 131, screw three-decker, Captain W. H. Stewart, C.B., flag-ship of Vice-Admiral W. F. Martin, was at Corfu on the 20th of November.

Mars, 80, screw liner, Captain Strange, was at Corfu on the 20th of November.

Megæra, 6, screw, iron troop-ship, Commander S. H. Henderson, arrived at Malta from Corfu on the 21st of November with invalid sailors and soldiers.

Melpomene, 51, screw frigate, Captain Ewart, was at Corfu on the 20th of November, but was reported to be under orders for the coast of Syria.

Mersey, 40, screw steam-frigate, Captain H. Caldwell, C.B., left Spithead, under canvas, for the West Indies, at 11 a.m., on Wednesday.

Miranda, 15, screw steam-sloop, 250-horse power, Commander H. C. Glyn, left Sheerness harbour on Monday, and proceeded on trial of her engines, after undergoing the necessary repairs, which were found to work satisfactorily. Notwithstanding the unfavourableness of the weather (a strong wind and tide being against her), she attained a mean speed of eight knots an hour. She was inspected on Tuesday by Vice-Admiral W. J. Hope Johnstone, Commander-in-Chief, and staff, and sailed for Plymouth.

Mohawk, screw steam-sloop, Commander Howard, was off the coast of Syria on the 20th of November.

Narcissus, 51, new screw frigate at Devonport. The rigging has been placed over the foremast of this vessel, and her topmasts are ready for pointing. She is kept under the shears for the purpose of shipping and unshipping her propeller.

Neptune, 90, screw liner, Captain F. A. Campbell, was at Corfu on the 20th of November.

North Star, 22, a splendid screw corvette, 400-horse-power, is being built in the Sheerness dockyard. Her armament will consist of 20 guns, 8 feet 10 inches long, weighing 60 cwt. each, and two pivot-guns, 10 feet long, weighing 90 cwt. each. Her tonnage will be 1856 and 82·94. She will present a very favourable contrast to her old namesake of "Jackass" notoriety.

Orestes, 21 guns, 400-horse power, screw steam-corvette, which was launched in August last, has undergone a trial of her engines, which worked admirably. Her engines are of a new description, called "plunger" engines, and were manufactured by Messrs. Napier & Son, of Glasgow. She is now in No. 3 dock at Sheerness, having her salt water distilling apparatus fitted. The Orestes is considered one of the handsomest vessels afloat, and is much admired as a piece of naval architecture.

Orion, 91, screw liner, Captain Frere. A letter, dated the 3rd of November, from this ship, has been received at Plymouth. It states that one of the crew quarrelled with a shipmate, whom he stabbed with a knife. Death followed almost immediately, and the perpetrator was sentenced by court-martial to six months' imprisonment in England. This appears a most lenient punishment for so heinous a crime. We can scarcely imagine any extenuating circumstances existing in connection with the use of the knife, which is so opposed to all ideas of English fair-play. The culprit may regard six months' imprisonment in a snug English prison as a treat during the cold winter season, rather than as a hardship. He will have plenty of excellent food, warm clothing, and lodging, and all night in. We are no advocates of flogging, but in a case like this, four dozen well laid on, prior to the commencement of the other part of the sentence, would not have been amiss, and would have been perfectly justified by the act of the prisoner, who, whatever might have been the provocation of the unfortunate deceased could not have been justified in resorting to the employmen, of a weapon which, by the vast majority of his countryment is fortunately looked upon with abhorrence.

Quail, 1, screw gun-boat, Lieut.-Commander Noel Osborn, was at Gibraltar on the 23rd of November.

Queen, 86, screw liner, Captain Charles F. Hillyar. A letter from Naples states that this ship was to embark the Hon. H. G. Elliot, English Ambassador to the Court of the late King of the Two Sicilies, and convey him to Marseilles.

Racoon, 22, screw steam-corvette, Captain Chamberlain, was at Beyrout on the 20th of November.

Rapid, 11, screw steam-sloop, was on Thursday launched from Deptford dockyard, in the presence of Captain Buckle, C.B., Commodore-Superintendent of the yard, Mr. Fincham, Master-Shipwright, and a numerous assembly of visitors. The ceremony of christening the vessel was performed by Miss S. Gordon, youngest daughter of Admiral Sir James Gordon, G.C.B., Governor of Greenwich Hospital. The following are the vessel's dimensions:—Length, 181 ft.; ditto moulded, 161 ft.; depth, 15 ft. 10 in.; breadth, 30 ft. 4 in.; burden in tons, 668 79·94. She will be fitted with engines of 150 horse-power, and her armament, which is to be furnished from Woolwich Arsenal, will consist of 11 guns of 32 cwt., and 6 ft. long.

Recruit, 6, screw steam gun-vessel, Commander D. Spain, was in the Danube on the 20th of November.

Redpole, steam-tug, tender to Hibernia, bearing the pendant of Captain Warden, C.B., was at Gibraltar on the 23rd of November

Renown, 91, screw liner, Captain Forbes, was at Naples on the 23rd of November. Smallpox of a mild type had broken out on board this ship, and 16 of her crew were in hospital.

Rhadamanthus, 4, paddle-steamship, Master-Commander F. R. Sturdee, took on board a quantity of new boats at Plymouth on Tuesday, and has since arrived at Deptford.

Serpent, 4, screw steam-sloop, lately built by C. J. Mare & Co., at Millwall, has been duly examined and passed by the Government inspectors, and will it is expected be shortly commissioned. She was undocked at Woolwich on Tuesday.

Sidon, 22, paddle steam-frigate, Captain Richard B. Crawford, was in Simon's Bay on the 23rd of October.

Scourge, 6, paddlewheel steamer, Commander William G. Jones, left Malta for Candia on the 17th of November.

Scylla, 21, screw corvette, Captain Rowley Lambert, arrived at Malta on the 19th of November from Messina, and was to leave again in a few days with provisions for Rear-Admiral Mundy's fleet.

St. Jean D'Acre, 101, screw liner, Captain the Hon. C. G. J. B. Elliot, C.B., was, on the 23rd of November, *en route* from Malta to Gibraltar, to recruit the health of her crew.

St. George, 90, screw liner, Captain the Hon. Francis Egerton, left Plymouth Sound yesterday week, and will it is stated proceed on a month's cruise prior to Prince Alfred joining in January. The St. George is of course manned by freshly-raised men, who will thus be somewhat disciplined, and will have fallen into their duties before the leave which the Prince is now enjoying will have expired. The Euryalus having been paid off, some others of the midshipmen lately belonging to her will probably join the St. George with His Royal Highness. Among them will be Mr. Harris, a son of the gallant captain of the training ship Britannia.

Star, 4, screw steam-sloop, 200 horse-power, building by C. J. Mare & Co., at Millwall, is a smart looking vessel, and will be ready for launching in a few days.

Terrible, 21, paddlewheel steam-frigate, Captain Glasse, C.B., was off the Coast of Syria on the 20th of November.

Victor Emmanuel, 91, screw liner, Captain W. J. C. Clifford, C.B., was in Malta harbour on the 23rd of November.

Warrior, 36, iron-plated screw steam-ship, building at Blackwall. Workmen are busily engaged almost day and night upon this vessel in order that she may be launched on the 29th inst. There is much to do before it would be safe to remove her from the stocks, and it is doubted if she will be ready on the day named.

Wasp, 13, screw steam-sloop, Commander Charles Stirling, was at the Mauritius by the latest accounts, in order to be examined, after having got on shore at the Cape of Good Hope.

Weazel, 1, screw gun-boat, Lieut.-Commander William Howorth. By the last mail from China we have received the subjoined information referring to an unfortunate movement made by this vessel:—From Swatow we hear of the bombardment of another unfortunate village. This time H.M.'s gun-boat Weazel has been the assailing party. Certain information of the names of the Chinese who made the attack on Messrs. Jardine, Matheson, & Co.'s agent's house on Double Island—the planner of the raid and the disposer of the plunder—being obtained by the British Consul, the gun-boat on the 16th September left this port for the village of Boehoey, situate up the Haimun Creek. After a delay of three days, for the local authorities, who, on the plea of the diminutive size of the attacking force, and the dread of the villagers' vengeance being turned towards themselves in case of the defeat which they anticipated, ultimately refused to assist, the usual demand in such cases being made—*i.e.*, restoration of plunder, and delivery of ringleaders—and compliance being refused by the villagers, who did not attempt to deny their participation in the robbery, the gun-boat tried the persuasive powers of shot and shell, ineffectually, as far as obtaining any desire for treating was concerned. A landing-party was sent on shore with a howitzer, and were driven back to their boats, providentially without mishap. The gunboat then taking another and superior position to the former threw more shell amongst the houses, and sent a boat in to observe their effect. The boat, with an officer and four men were taken prisoners, lured, as has since been heard, by a letter being held up. The Weazel had of course to withdraw, for fear of compromising their safety. Letters have been received from the prisoners, who appear to suffer more from anxiety of mind than from their wounds or personal discomforts. The gun-boat returned to Double Island on the 1st October to await reinforcements.

National Life-boat Institution.—The Report for 1859 contains a long list of noble services from January 1st to December 30th:—April 15, Goodwin Sands—terrible name of ill omen to sailors—wind W. N. W., sloop Liberal, of Wisbeach, one man saved by the Walmer life-boat. September 17 and 18, Misner Haven, wind N. and W., strong gale, brig Lucinde, of Memel, 11 men saved by the Southwold life-boat. February 28, Jack's Hole Bank—a cognomen fearfully suggestive of danger—brig Louise, of Genoa, ship assisted by the crew of the Padstow life-boat. March 8, Doom Bar Sands—another hideously suggestive designation—brig Gonsalve, of Nantes, 7 men saved by the Padstow life-boat. November 1, Holm Sands, wind S., heavy gale, steamer Shamrock, of Dublin, 14 men saved by the Lowestoft life-boat. November 2, Whitburn, blowing a hurricane, schooner Anton, of Denmark, 6 men saved by the Whitburn life-boat. November 26, Redcar wind S. E., heavy gale, brig Fortuna, of Memel, 11 men saved by the Redcar life-boat. December 30, Barmouth, wind from the S. W., blowing a gale, ship Britannia, of Bath, United States, 14 men saved by the Barmouth life-boat. December 21, Lytham, weather stormy, the brigantine Hannah Jane, of London, 7 men saved by the Lytham life-boat; and so the record goes on through a long page, enumerating services of the most humane and sterling character, in words and figures as simple as an ordinary entry in a merchant's ledger. We have said sufficient to show the inestimable public value of the National Life-Boat Institution; but how much more might be said of the services it has rendered to what may be called the private and hidden circles of our life. Running the eye down the list of vessels to which the boats of the Association have paid a visit, when the wind was blowing "great guns and small arms," we have of course the most liberal supply from our own islands. The Betsys, Johns, Georges, and Marys are unmistakeably attached to the north-east coast. The simple maritime nomenclature of Shields and Sunderland is almost confined to the family circle, and a favourite son, or a brother, or a wife, or some one "nearer and dearer," is generally the godfather or godmother of the first venture of the small shipowner. But every little port and every large harbour in the island have representatives in the National Life-Boat Institution list, and from thence the area of services rendered extends to natives of France, Spain, Genoa, Norway, Prussia, United States, Sweden, Denmark, the whole maritime world, in fact, for misfortune and loss are just as catholic in their visitations as are the services of the life-boats on our coasts. Now, looking at the use of the Institution in this light, it is the distributor of an amount of happiness almost incalculable. All the thrilling narratives that have been written for a century are sketchy and feeble before the reality of a life-boat adventure. Ten or a dozen, or it may be 20, 30, or 40 men are hanging on to the shrouds of a shipwrecked vessel, as powerless to help themselves as is the vessel which gives them a momentary resting-place. Death is literally hanging over them, with his fingers outstretched to pull them into his ravenous maw; and the only human means to save them is the agency of a life-boat. Each one of those poor fellows who were one moment dead, and in another restored to life, was, to use the expressive phrase of the old Scotch wife, "somebody's bairn;" and how many thankful hearts must their redemption from a watery grave create! Last year the losses by shipwreck on our coast amounted to 1646 lives. Of persons saved there were 2332, making together in the course of one year close upon 4000 people who were exposed to the miseries of shipwreck on the shores of the British isles. Since 1824, the Life-Boat Institution has been instrumental in aiding to save 11,401 persons, and we see at a glance what a large share the working of the Institution has in our national comfort. At a moderate computation the number of the lost will be about three-fourths of those saved; another very powerful reason why the Society should receive public assistance. But the last, and perhaps the most powerful claim which the Society has upon the public at this moment is, that its liabilities for life-boat establishments amount to nearly 4000*l*. There is continual improvement, repair, and care needed in the boats which the Association have at present; but this cannot be done without money either. The men who are engaged in the life-boat service are, no doubt, as brave and devoted as men can be; but it is not fitting that these men should risk their lives, expose themselves to danger, hardship, and inconvenience without fee or reward. All these are matters which the Institution has to provide for; and the only means by which they can provide for them are the generosity and benevolence of Englishmen. We may add that contributions in aid of the funds of the National Life-Boat Institution are received by all the London and Country Bankers, and by the Secretary, Mr. Richard Lewis, John Street, Adelphi, London.

The "Ridge" and the "Varne" Shoals.—The thousands of passengers that now annually pass from Folkestone to Boulogne, en route to Paris, have perhaps noticed, as they neared the coast of France, a patch of troubled water. The commotion may be observed in the calmest weather, and is caused by the Ridge and Varne Shoals. These banks are composed of chalk and sand, and geologists tell us that they are evidences of the link that once connected England to the continent. And they give as a reason that all the sea-way between Boulogne and Folkestone the water is shallower than anywhere else in the locality. Upon these dangerous shoals, where the depth of water at low water in ordinary tides is only nine feet, many a "good tall ship" has been lost, but as these shoals never "dry," only a few of the disasters that have occurred upon them have been made known. The sea swallows all, and it is only when a drowned sea chest, a floating bale, or a shattered portion of the frame of the wrecked ship is washed ashore that the inhabitants of the "Boulonnais" conjecture that a calamity has happened in the dead of the night on the Ridge and the Varne. The total loss of the Blervie Castle, with all hands, was attributed to her running upon these shoals in a gale. And the wonder is, that wrecks did not happen oftener upon these unlit banks, when we consider their position in the fair-way down channel, and the thousands of vessels that pass them in all weathers in the course of a year. Their whereabouts is, however, thanks to our Trinity Board, now well advertised, for a red revolving floating light was placed on the south-west end of the treacherous "Varne" on the 1st Oct. last. Its luminous ray can be seen for miles. The benefit to the channel will be appreciated by every seaman in the habit of navigating the "narrow," and the boon which this light has conferred upon the mariners of all nations is another reason why Englishmen claim the Channel as their own.

STATIONS OF THE ROYAL NAVY IN COMMISSION.

With the dates of Commission of the Officers in Command.

Aboukir, 90, sc., Capt. D. Curry, 1846, Channel Squadron.
Acorn, 12, Com. R. B. Pearse, 1856, East Indies.
Actæon, 26, surv.-v., Com. J. Ward (b), 1858, East Indies.
Adelaide, tender to flag-ship, Cape of Good Hope.
Adventure, sc. store-ship, Com. E. Lacy, 1856, East Indies.
Advice, st.-ves., tender to Sanspareil, Cork.
Agamemnon, 91, sc. Capt. T. Hope, 1852, Mediterranean.
Ajax, 60, sc. Capt. J. M. M'Niell Boyd, 1856, Coast Guard.
Alacrity, 4, sc., Com. J. K. E. Baird, 1857, Mediterranean.
Alecto, 5, st.-ves., Com. H. J. Raby, V.C. 1855, Coast of Africa.
Alert, 17, sc., Com. W. A. R. Pearse, 1855, Pacific, ordered home.
Algerine, sc. gunboat, Lieut.-Com. W. Arthur, 1854, East Indies.
Algiers, 91 sc., Capt. G. W. D. O'Callaghan, 1846, Channel Squadron.
Alligator, at Whampoa, lent to Consular Department.
Amethyst, 26, Capt. S. Grenfell, 1853, Pacific, ordered home.
Amphion, 36, sc., Capt. T. Cochran, 1857, Mediterranean.
Archer, 13, sc., Capt. F. A. B. Craufurd, 1856, Coast of Africa.
Ardent, 3, st.-v., Com. J. E. Parish, 1857, S. E. Coast of America.
Argus, 6, st.-v., Com. H. F. W. Ingram, 1856, Mediterranean.
Ariadne, 26, sc., Capt. E. W. Vansittart, 1856, Devonport.
Ariel, 9, sc. Com. J. R. Alexander, 1858, Devonport.
Arrogant, 47, sc., Commodore W. Edmonstone, West Coast of Africa.
Asia, 84, steam-ordinary ship, Capt. G. T. Gordon, 1846, Portsmouth.
Asp, st.-ves., tender to Saturn, Bristol Channel.
Assurance, 4, sc., Com. C. M. Aynsley, 1856, Mediterranean.
Atholl, 4, Com. E. Wilson, 1845, Greenock.

Avon, st.-ves., tender to Impregnable, Plymouth.
Azov, schooner, tender to Hibernia, Malta.
Bacchante, 51, sc. Rear-Admiral Sir J. Maitland, C.B., Capt. D. M. L. Mackenzie, 1859, Pacific.
Bann, st.-ves., tender to Fisgard, Coast of Cornwall.
Banshee, 2, steam-vessel, Com. C. A. Campbell, 1858, Mediterranean.
Banterer, sc. gunboat, Lieut.-Com. H. P. Knevitt, 1855, East Indies.
Barracouta, 6, st.-v., Com. W. Wood, 1854, Portsmouth.
Beagle, 4, sc., Com. E. Hay, 1858, East Indies.
Biter, 2, sc. gunboat, tender to Colossus.
Black Eagle, st.-yac., Mast.-Com. J. E. Petley, 1844, particular service
Blenheim, 60, sc., Capt. E. Tatham, 1854, Coast Guard.
Bloodhound, 3, st.-ves., Lieut.-Com. F. W. Bennett, 1854, Coast of Africa.
Bouncer, 2, sc. gunboat, Lieut.-Com. A. R. Owen, 1852, East Indies.
Boxer, 1, sc.-gunboat, tender to Marlborough, Mediterranean.
Brilliant, 20, Com. G. H. Gardner, 1848, Naval Reserve training ship, City Canal.
Brisk, 16, sc., Capt. A. F. R. D'Horsey, 1857, Cape of Good Hope.
Britannia, training-ship, Capt. R. Harris, 1840, Portsmouth.
Brune, 2, paddle st.-ves., tender to Arrogant, Coast of Africa.
Buffalo, screw, Mas.-Com. A. Brown, 1854, Coast of Africa.
Bulldog, 6, st.-ves., Capt. Sir F. L. M'Clintock Kt., 1854, Portsmouth.
Bullfinch, 2, sc.-gunboat, tender to Britannia, Portsmouth.
Bustard, 2, sc. gunboat, Lieut.-Com. F. W. Hallowes, 1856, E. Indies.
Buzzard, 6, st.-v., Com. J. Trevenen (acting), S.E. Coast of America, ordered home.
Cadmus, 21, sc., Capt. H. S. Hillyar, C.B., 1854, N. America, and W. Indies.
Cæsar, 90, sc., Capt. T. H. Mason, 1849, Mediterranean.
Calypso, 18, Capt. F. B. Montresor, 1851, Pacific.
Cambrian, 40, Capt. J. J. M'Cleverty, C.B. 1848, East Indies.
Cambridge, gunnery-ship, Capt. A. W. Jerningham, 1851, Devonport.
Camilla, 16, Com. G. T. Colville, 1855, East Indies.
Caradoc, 2, st.-ves., Lieut.-Com. J. B. Scott, 1846, Mediterranean.
Castor, 36, Com. J. Palmer, 1855, Naval Reserve training ship, North Shields.
Centaur, 6, st.-v., Com. E. D'o, D'a, Aplin, 1853, East Indies.
Centurion, 80, sc., Capt. H. D. Rogers, C.B., 1846, Channel Squadron.
Charybdis, 21, sc., Capt. the Hon. G. D. Keane, 1855, Devonport.
Chesapeake, 51, sc., Vice-Admiral J. Hope, C.B., Capt. G. O. Willes, 1856, East Indies.
Clinker, 2, sc.-gunboat, tender to Indus, Plymouth.
Clio, 22, screw, Capt. T. Miller, 1855, Pacific.
Clown, sc., gunboat, Lieut.-Com. W. F. Lee, 1855, East Indies.
Cockchafer, 2, sc. gunboat, Lieut.-Com. H. L. Holder, 1854, East Indies.
Colossus, 80. sc., Capt. F. Scott, C.B., 1848, Coast Guard.
Conqueror, 101, sc., Capt. E. S. Sotheby, C.B., 1852, Channel Squadn.
Cordelia, 11, sc., Com. C. E. H. Vernon, 1855, Australia.
Cornwallis, 60, sc., Capt. G. G. Randolph, C.B., 1854, Coast Guard.
Coromandel, 5, st.-ves., Lieut. Symons, tender to Flag-ship, Hong-Kong.
Cossack, 20, sc., Capt. R. Moorman, 1857, N. America and W. Indies, ordered home.
Cressy, 80, sc., Capt. J. Harvey, 1843, Mediterranean.
Crocodile, 8, rec.-sh., Com. W. Greet, 1854, off the Tower.
Cruiser, 17, sc., Com. J. Bythesea, V.C., 1856, East Indies.
Cumberland, 70, Capt. C. F. Schomberg, 1851, Sheerness.
Curaçoa, 31, screw, Capt. A. Phillimore, 1855, S.E. Coast of America.
Curlew, 5, sc., Com. E. W. Shaw, 1857, S.E. Coast of America.
Cyclops, 6, st.-ves., Capt. W. J. S. Pullen, 1856, East Indies, ordered home.
Dapper, 2, sc. gunboat, tender to Majestic.
Dasher, 2, st.-ves., Com. P. De Saumarez, 1845, particular service.
Dauntless, 31, sc., Capt. L. G. Heath, C.B., 1854. Coast Guard.
Dee, 4, tr.-sh., Mast.-Com. T. C. Pullen, 1844, particular service.
Desperate, 8, sc., Com. J. F. Ross, 1856, Portsmouth.
Diadem, 32, sc., Capt. J. H. Cockburn, 1850, Channel Squadron.
Donegal, 101, sc., Capt. H. Broadhead, 1846, Channel Squadron.
Doris, 32, sc., Capt. E. Heathcote, 1852, Mediterranean.
Dove, 2, sc.-gunboat, Lieut.-Com. Bullock, tender to Actæon, China.
Drake, sc., gunboat, Lieut.-Com. A. R. Blane, 1856, East Indies.
Eagle, 50, training-ship, Com. F. T. C. Strode, 1854, Southampton.
Edgar, 91, sc., Rear-Adm. J. E. Erskine, Capt. J. E. Katon, 1856, Channel Squadron.
Edinburgh, 58, sc., Capt. E. C. T. D'Eyncourt, 1849, Coast Guard.
Elfin, st.-yac., tender to Victoria and Albert, Portsmouth.
Emerald, 51, sc., Capt. A. Cumming, 1854, Channel Squadron.
Encounter, 14, sc., Capt. R. Dew, 1858, East Indies.
Erne, 2, sc. gunboat, tender to Edinburgh.
Esk, 20, sc., Capt. Sir R. J. Le M. M'Clure, C.B., 1850, East Indies.
Espoir, 5, sc., Com. S. Douglas, 1858, Coast of Africa.
Excellent, 46, gunnery-ship, Capt. R. S. Hewlett, C.B., 1850, Portsmouth.
Exmouth, 90, sc., Capt. J. A. Paynter, 1854, Mediterranean.
Fairy, screw-yacht, tender to Victoria and Albert yacht, Portsmouth.
Falcon, 17 sc., Com. A. G. Fitzroy, 1857, Coast of Africa.
Fanny, cutter, tender to Victory, Portsmouth.
Fawn, 17, sc., Com. R. P. Cator, 1858, Australia.
Fearless, st.-ves., tender to Cumberland, Sheerness.
Ferret, 8, Com. W. E. Fisher, 1856, tender to Sanspareil.
Firebrand, 6, st.-ves., Com. J. M. Bruce, 1855, particular service.
Firefly, 4, st.-ves., Com. A. L. Mansell, 1855, Mediterranean.
Firequeen, st.-ves., tender to Victory, Portsmouth.
Firm, sc., gunboat, Lieut.-Com. W. R. Boulton, 1854, East Indies.
Fisgard, 42, Commod. Hon. J. R. Drummond, C. B., Woolwich.
Flamer, sc. gunboat, Lieut.-Com. H. M. Bingham, 1851, East Indies.
Fly, 2, sc. gunboat, tender to Cornwallis.
Flying Fish, 6, sc., Com. C. W. Hope, 1854, Devonport.
Forester, 2, sc. gunboat, Lieut.-Com. A. J. Innes, 1853, East Indies.
Formidable, 84, Vice-Admiral W. J. H. Johnstone, Capt. W. G. Luard, 1857, Sheerness.
Forte, 51, sc., Rear-Admiral Hon. Sir H. Keppel, K.C.B., Capt. E. W. Turnour, 1857, Cape of Good Hope.
Forward, 2, sc., Lieut.-Com. C. R. Robson, 1851, South America.
Foxhound, 4, sc., Com. Alfred Mitchell, 1856, Mediterranean.
Furious, 16, st.-ves., Captain O. J. Jones, 1855, East Indies.
Fury, 6, st.-v., Com. J. C. Wilson (acting), East Indies.
Ganges, 84, Rear-Admiral Sir R. L. Baynes, K.C.B., Capt. J. Fulford, 1848, Pacific, ordered home.
Gannet, 11, Com. E. H. G. Lambert, 1854, Mediterranean.
Geyser, 6, st.-ves., Com. G. M. Jackson, 1855, Devonport.
Gipsy, cutter, tender to Sanspareil, Cork.
Gladiator, 6, st.-ves., Com. H. D. Hickley, 1858, N. America and W. Indies.
Gorgon, 6, st.-v., Com. B. C. T. Pim, 1858, Devonport.
Grappler, 2, sc., Lieut.-Com. A. P. H. Helby, 1849, Pacific.
Grasshopper, sc. gunboat, Lt.-Com. J. C. Tucker, 1855, East Indies.
Greyhound, 17, sc., Com. F. W. Sullivan, 1859, Mediterranean.
Growler, 2, sc. gunboat, Lieut.-Com. H. E. Crozier, 1854. Mediterran.
Hannibal, 91, sc., Rear-Admiral G. R. Mundy, C.B., Capt. A. Farquhar, 1849, Mediterranean.
Hardy, 2, sc. gunboat, Lt.-Com. A. G. Bogle, 1855, East Indies.
Harpy, st.-vessel, tender to Hogue.
Harrier, 17, sc. st.-sloop, Com. Sir Malcolm MacGregor, Bart., 1856 Portsmouth.
Hart, cutter, tender to Formidable, Sheerness.
Hastings, 60, sc., Com. C. M. Luckraft, 1855, Naval Reserve training ship, Liverpool.
Haughty, 2, sc. gunboat, Lieut.-Com. G. D. Broad, 1851, East Indies.
Havock, 2, sc. gunboat, Lieut.-Com. C. Fairholme, 1851, East Indies.
Hawke, 60, sc., Capt. W. Crispin, 1852, Coast Guard.
Hecate, 6, st.-ves., Com. A. H. Hoskins, 1853, Pacific.
Herald, 8, sur.-ves., Capt. H. M. Denham, 1846, Feejee Islands, ordered home.
Hero, 91, sc., Commodore G. H. Seymour, C.B., Devonport.
Hesper, sc. st.-ship, Master-Com. W. H. Harris, 1853, East Indies.
Hibernia, rec.-ship, Rear-Admiral H. J. Codrington, C.B., Com. Hon. A. C. Hobart, Malta.
Highflyer, 21, sc., Capt. W. A. Heath (acting), East Indies.
Himalaya, sc. store-ship, Capt. J. Seccombe, 1859, particular service.
Hind, 2, sc. gunboat, tender to Russell.
Hogue, 60, sc., Capt. R. J. J. G. Macdonald, 1854, Coast Guard.
Hornet, 17, screw, Com. W. B. Elphinstone, 1856, East Indies.
Hydra, 6, st.-ves., Com. R. V. Hamilton, 1857, North America and West Indies.
Icarus, 11, sc., Com. N. Salmon, V.C., 1858, North America and West Indies.
Illustrious, 72, Rear-Admiral the Hon. G. Grey, Com. H. C. Harston, 1845, Portsmouth.
Imaum, 72, Commodore H. Dunlop, Capt. O. Morrish, 1857, Receiving Ship, Jamaica.
Immortalité, 51, sc., Capt. G. Hancock, 1855, Portsmouth.
Imperieuse, 51, screw, Rear-Admiral L. T. Jones, C.B., Capt. R. Maguire, 1854, East Indies.
Impregnable, 104, Vice-Adm. Sir H. Stewart, K.C.B., Capt. Lord F. H. Kerr, 1852, Devonport.
Implacable, 72, Com. J. W. Dorville, 1853, training ship, Devonport.
Indus, 78, steam-ordinary ship, Capt. A. C. Key, C.B., Devonport.
Industry, st.-v., 2, store-ship, Mast.-Com. G. J. Hodges, 1841, particular service.
Inflexible, 6, st.-v., Com. G. A. C. Brooker, 1856, East Indies.
Insolent, 2, sc.-gunboat, Lieut.-Com. E. H. Seymour, 1860, East Indies.
Intrepid, 6, sc., Com. J. H. Marryat, 1855, Mediterranean.
Iris, 26, Commodore W. Loring, C.B., Australia, ordered home.
Jackal, 4, st.-v., Lieut.-Com. E. F. Lodder, 1854, particular service.
Jackdaw, 2, gunboat, tender to Hogue.
James Watt, 91, screw, Capt. E. Codd, 1831, Mediterranean.
Janus, sc. gunboat, Lieut.-Com. D. G. Davidson, 1855, East Indies.
Jason, 21, sc., Capt. E. P. B. Von Donop, 1855, Devonport.
Jasper, sc. gunboat, Lieut.-Com. W. H. Pym, 1849, West Indies, ordered home.
Jersey, cutter, tender to Dasher, Portsmouth.
Kestrel sc. gunboat, Lieut.-Com. H. Huxham, 1855, East Indies.
Kingston, schooner, tender to Imaum, Jamaica.
Kite, st.-tug, Bermuda.
Landrail, 5, sc., Com. T. H. M. Martin, 1859, North America and West Indies.
Lapwing, 4, screw, Com. M. F. O'Reilly, 1856, Mediterranean.
Leopard, 18, st.-v., Rear-Admiral Sir S. Lushington, K.C.B., Capt. F.B. Wainwright, 1856, S.E. Coast of America.
Leven, 1, sc. gunboat, Lieut.-Com. J. S. Hudson, 1854, East Indies.
Leveret, 2, gunboat, tender to Dauntless.
Liffey, 51, sc., Capt. G. W. Preedy, C. B., 1855, Mediterranean.
Lightning, st.-ves., tender to Saturn, Pembroke.
Lively, 2, sc.-gunboat, tender to Cumberland, Sheerness.
Lizard, 3, st.-ves., tender to Formidable, Sheerness.
London, 90, sc., Capt. H. Chads, 1848, Mediterranean.
Louisa, 2, gunboat, tender to Edinburgh.
Lynx, 4, sc., Lieut.-Com. H. Berkeley, 1854, Coast of Africa, ordered home.
Lyra, 9, sc., Com. R. B. Oldfield, 1855, Cape of Good Hope.
Madagascar, store-ship, Capt. R. D. White, 1856, Rio Janeiro.
Mæander, 44, Capt. W. F. Burnett, C.B., 1854, Ascension.
Magicienne, 16, st.-ves., Capt. J. E. Commerell, V.C. (1859), E. Indies.
Magnet, 2, gunboat, tender to Pembroke.
Magpie, 2, gunboat, tender to Hawke.
Majestic, 80, sc., Capt. W. R. Mends, C.B., 1852, Coast Guard.
Marlborough, 131, sc., Vice-Admiral W. F. Martin, Capt. W. H. Stewart, C.B., 1854, Mediterranean.
Mars, 80, sc., Capt. J. N. Strange, 1854, Mediterranean.
Medina, 4, st.-ves., Capt. T. A. B. Spratt, C.B., 1855, Mediterranean.
Megæra, 6, sc., Com. S. H. Henderson, 1855, particular service.
Melpomene, 50, sc., Capt. C. J. F. Ewart, 1855, Mediterranean.
Melville, hosp.-ship, Hong-Kong.
Mercury, cutter, tender to Dasher, Portsmouth.
Mersey, 40, sc., Capt. H. Caldwell, C.B., 1853, Channel Squadron.
Miranda, 15, sc., Com. H. C. Glyn, 1855, Devonport.
Mohawk, 4, sc., Com. E. H. Howard, 1857, Mediterranean.
Mutine, 17, sc., Com. W. Graham, 1858, Pacific.
Naiad, 42, store-sh., Mas.-Com. W. W. Dillon, 1843, Callao.
Nautilus, 6, Lieut.-Com. W. B. Grant, 1852, apprentice ship.
Neptune, 91, sc., Capt. F. A. Campbell, 1857, Mediterranean.
Nereus, 42, store-depôt, Mas.-Com. J. C. Barlow, 1853, Valparaiso.
Nettle, 2, sc.-gunboat, tender to Terror, Bermuda.
Niger, 14, sc., Capt. P. Cracroft, 1854, Australia, ordered home.
Nile, 90, sc., Rear-Admiral Sir A. Milne, K.C.B, Capt. E. K. Barnard, 1857, North America and West Indies.
Nimrod, 6, sc., Com. R. J. Wynniatt, 1859, East Indies, ordered home.
Oberon, 3, st.-ves., Lt.-Com. F. G. C. Pagot, 1852, South-East Coast of America.
Odin, 16, st.-ves. Capt. Lord J. Hay, C.B., 1854, East Indies.
Onyx, 2, sc.-gunboat, tender to Terror, Bermuda.
Opossum, 2, sc. gunboat, Lieut.-Com. Brine, E. Indies.
Orion, 91, sc., Capt. J. B. E. Frere, 1854, Mediterranean.
Osborne, st.-ves., Mas.-Com. C. H. K. Bower, 1842, particular service.
Pearl, 21, sc., Capt. J. Borlase, C.B., 1855, East Indies.
Pelorus, 21, sc. Commodore F. B. P. Seymour, 1854, Australia.
Pembroke, 60, Capt. E. P. Charlewood, 1855, Coast Guard.
Persian, 12, Com. E. Hardinge, 1856, Cape of Good Hope.
Pigmy, 3, st.-ves., Mast.-Com. W. Johnston, 1856, Portsmouth.
Pioneer, 6, screw, Com. H. A. Reilly, 1858, East Indies.
Plumper, 9, screw, Captain G. H. Richards, 1854, Pacific, ordered home.
Porcupine, 3, st.-ves., Capt. C. H. Otter, 1854, particular service.
Porpoise, 2, sc.-gunboat, tender to Royal Albert.
Princess Charlotte, receiving-ship, M.-Com. H. G. Thomsett, 1854, Hong-Kong.
Prometheus, 5, st.-ves., Com. N. B. Bedingfield, 1856, Coast of Africa.
Pylades, 21, sc., Capt. M. de Courcy, 1852, Pacific, ordered home.
Pyramus, hulk, Halifax.
Quail, 2, sc., gunboat, Lieut.-Com. N. Osborn, 1856, Mediterranean.
Queen, 86, sc., Capt. C. F. Hillyar, 1852, Mediterranean.
Racer, 11, sc., Com. A. M'L. Lyons, 1858, North America and West Indies.
Racoon, 21, screw, Capt. W. C. Chamberlain, 1856, Mediterranean.
Rainbow, 2, gunboat, tender to Ajax.
Ranger, 5, sc., Com. H. R. Wratislaw, 1858, Coast of Africa.
Recruit, 8, st.-ves., Com. D. Spain, 1856, Mediterranean.
Redpole, 1, Capt. Warden, C.B., 1845, Gibraltar.
Redwing, 2, sc.-gunboat, tender to Cambridge, Plymouth.
Renard, 4, sc., Com. J. G. Goodenough, 1858, East Indies.
Renown, 91, sc., Capt. A. Forbes, 1846, Mediterranean.
Retribution, 28, st.-ves., Commod. H. E. Edgell, C.B., East Indies, ordered home.
Rhadamanthus, 4, st.-ves., Master-Com. F. R. Sturdee, 1843, particular service.
Ringdove, 4, sc., Com. R. G. Craigie, 1856, East Indies.
Roebuck, 6, sc., Com. Marten, East Indies.
Rolla, 6, Lieut.-Com. C. G. Nelson, 1854, Portsmouth.
Rose, tender to Impregnable.
Royal Adelaide, 104, training-ship, Capt. W. K. Hall, C.B., 1853, Devonport.
Royal Albert, 121, sc., Rear-Admiral R. F. Stopford, Capt. H. J. Lacon, 1856, Channel Squadron.
Ruby, 2, gunboat, tender to Cornwallis.
Russell, 60, sc., Capt. G. Wodehouse, 1854, Coast Guard.
St. George, 90, sc., Capt. The Hon. F. Egerton, 1855, Channel Squad.
St. Jean D'Acre, 101, sc., Capt. The Hon. C. G. J. B. Elliot, 1841, Mediterranean.
St. Vincent, 102, Capt. T. Wilson, 1853, Portsmouth.
Sampson, 6, st.-ves., Capt. G. S. Hand, C.B., 1852, East Indies.
Sandfly, 2, gunboat, tender to Cornwallis.
Sanspareil, 70, sc., Rear-Admiral C. Talbot, Capt. A. P. E. Wilmot, C.B., 1854, Cork.
Sapphire, hulk, Trincomalee.
Saracen, 4, Master-Com. W. Stanton, 1852, East Indies.
Satellite, sc., 21, Capt. J. C. Prevost, 1856, Pacific, ordered home.
Saturn, 72, Capt. G. Ramsay, C.B., 1843, Pembroke.
Scourge, 6, sc., Com. W. G. Jones, 1854, Mediterranean.
Scout, 21, sc., Capt. J. Corbett, 1857, East Indies.
Scylla, 21, sc., Capt. R. Lambert, 1855, Mediterranean.
Seagull, 2, sc.-gunboat, tender to Porcupine, Hebrides.
Sealark, 8, brig, tender to Britannia, Portsmouth.
Seringapatam, coal depôt, Cape of Good Hope.
Shamrock, 2, gunboat, tender to Fisgard.
Sharpshooter, 8, sc., Lieut.-Com. C. Gibbons, 1848, Coast of Africa.
Sidon, 22, st.-ves., Capt. R. B. Crawford, 1856, Cape of Good Hope.
Simoom, 8, sc., Com. J. M. Cooke, 1852, East Indies.
Skipjack, 2, sc. gunboat, Lieut.-Com. J. Murray, 1848, West Indies.
Slaney, 2, sc. gunboat, Lieut.-Com. G. D. Bevan, 1855, East Indies.
Snake, 4, sc., Com. H. Harvey, 1857, East Indies.
Snap, 2, sc. gunboat, Lieut.-Com. W. O. Butler, 1855, East Indies.
Southampton, Capt. Charles Wise, 1847, Sheerness.
Sparrowhawk, 4, sc., Com. J. C. Byng, 1856, East Indies.
Sphinx, 6, st.-ves., Com. G. F. Day, V.C., 1855, East Indies.
Spiteful, 6, st.-ves., Com. W. C. F. Wilson, 1858, particular service.
Spitfire, 5, st.-ves., Lieut.-Com. C. O' D. Allingham, 1856, Coast of Africa, ordered home.
Sprightly, st.-ves., Master-Com. G. Allen, tender to Victory, Portsmouth.
Spy, 3, Lieut.-Com. A. Tabutean, 1855, S. E. Coast of America.
Starling, sc. gunboat, Lieut.-Com. J. A. Whitshed, 1854, East Indies.
Staunch, 2, sc. gunboat, Lieut.-Com. E. J. Pollard, 1855, East Indies.
Stork, 2, sc.-gunboat, tender to Excellent, Portsmouth.
Styx, 6, st.-ves., Com. J. H. Cave, 1855, North America and W. Indies.
Supply, store-ship, Mast.-Com. W. H. Balliston, 1845, particular serv.
Sylph, cutter, tender to Impregnable, Plymouth.
Tartar, 20, sc., Capt. J. M. Hayes, 1855, Pacific.
Termagant, 25, sc., Capt. R. Hall, 1855, Pacific.
Terrible, 21, st.-ves., Capt. F. H. H. Glasse, C.B., 1846, Mediterranean.
Terror, 16, Capt. F. Hutton, 1844, Bermuda.
Topaze, 51, sc., Capt. the Hon. J. W. S. Spencer, 1854, Pacific.
Torch, 5, Com. F. H. Smith, 1858, Coast of Africa.
Trafalgar, 91, sc., Capt. E. G. Fanshawe, 1845, Channel Squadron.
Traveller, 2, sc.-gunboat, tender to Asia, Portsmouth.
Triton, 3, st.-ves., Lieut.-Com. R. H. Burton, 1849, Coast of Africa, ordered home.
Urgent, sc. tr.-ship, Com. H. W. Hire, 1854, East Indies.
Valorous, 16, st.-ves., Capt. W. C. Aldham, C.B., 1853, North America and West Indies.
Victor Emmanuel, 91, sc., Capt. W. J. C. Clifford, C.B., 1847, Mediterr.
Victoria and Albert, 2, st.-yacht, Capt. the Hon J. Denman, 1841, special service.
Victory, 101, Vice-Admiral H. W. Bruce; Capt. R. Coote, 1854, Portsmouth.
Violet, 2, gunboat, tender to Blenheim.
Vivid, st.-yac., Mast.-Com. Henry W. Allen, 1842, Woolwich.
Vixen, 6, st.-ves., Com. F. W. Richards, 1860, Pacific, ordered home.
Vulcan, 6, sc. tr.-sp., Com. A. C. Strode, 1856, East Indies.
Wasp, 3, sc., Com. C. Stirling, 1856, Cape of Good Hope.
Watchful, 2, sc., Lieut.-Com. F. W. Inglefield, 1857, East Indies.
Weazel, 2, sc. gunboat, Lieut.-Com. W. Howorth, 1856, East Indies.
Wellesley, 72, Capt.-Sup. G. Goldsmith, C.B., 1842, Chatham.
Wellington, 72, Rear Admiral Sir T. S. Paisley, Bart.; Com. Fred. Cannon, 1842, Devonport.
Weymouth, hulk, Bermuda.
Wildfire, st.-ves., tender to Formidable, Sheerness.
Woodcock, 2, sc. gunboat, Lieut.-Com. G. S. Bosanquet, 1855, East Indies.
Wrangler, 4, sc., Com. H. H. Beamish, 1858, Coast of Africa.

CUPOLA SHIELDS FOR SHIPS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—A paragraph in your impression of last Saturday, viz., "Captain Cowper Coles's cupola shield for protecting guns in rafts, and which he has *recently* proposed should be mounted on iron-cased vessels, with angulated sides," calls upon me to beg you will kindly insert the following facts in your columns, as it might be otherwise considered that I had only recently conceived the idea of deflecting the shot, by sloping the iron protection afforded to my ships and forts.

First—I proposed in 1855, as will be seen by my drawings published in my lecture on iron-cased ships, an angulated side sloping at 40 degrees to my light-draft vessel, or raft, and the only difference that I have since made with regard to the side is that I have added an outer vertical side, which may be of any form most suitable to give a deep-draft vessel the extra displacement required for a sea-going ship.

Secondly—In March, 1859, I sent a description and plan to the Admiralty of my shield adapted for iron-cased ships, either with vertical or inclined sides—for it is not at all necessary, in order that the shield should be adapted to ships already built, that the side should be sloped.

Thirdly—In October, 1859, I produced before the Committee of Naval Officers on National Defences, plans and models of an iron-cased shield ship with inclined armour at an angle of 45 degrees, and an outer perpendicular side.

Lastly—On September 24th, 1860, I again sent plans and models to the Admiralty, showing still further details and improvements in the construction of iron-cased ships, either with or without inclined sides.

I do not claim any merit for originality in the mere sloping of a side, because I am aware that Mr. Drake proposed this some twenty years ago, and that several naval officers and others did so at the close of the Crimean War; but I do profess to have devised in 1855, and after five years' perseverance, to have completed an iron-cased shield ship, with her armour sloping at any angle found to be most desirable for invulnerability, both to vertical and horizontal fire. At the same time, by my outer, or side proper, I am enabled to give the ship the most suitable form for combining all the qualifications necessary for a man-of-war and a sea-going ship in every respect, either under sail or steam.—I am, &c.,

COWPER P. COLES, Captain, R.N.

NAVAL REFORM.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Many letters have recently appeared in the papers upon the subject of Naval Reform, and one of the evils complained of is that the provisions are not such as ought to be served out to our seamen. There is great truth in this, and may be accounted for in this way:—A ship, for instance, leaves any of our naval ports with six months' provisions on board, (if she can stow as much away,) for a foreign station. As these provisions become exhausted the ship is supplied from stores on the station wherever she may be, and it may so happen, as indeed it often does, that the meat thus supplied has been in store three, four, or even five years. Some of the pieces of beef and pork so obtained may weigh in the cask 8lbs., and are given to the different messes as such, but when they come out of the cook's coppers perhaps not 4lbs. of eatable meat is left. There is an awful shrinkage in long kept salt provisions. Again, the men do not come off merely second best in the choice of pieces when the casks are opened. The captain's steward, for instance, wants two or three prime briskets for the captain's table; of course there is no refusing such a request. Then the ward-room steward has his pick. Then the midshipman, and perhaps the warrant officers have similar requests to make. At last the men's turn comes, who of course have what may be left. I am not disposed to say that many good pieces are not left even after this sort of weeding; but it must be admitted that a great many of the best are gone.

Too much stress must not be laid upon the fact that from 40,000*l.* to 50,000*l.* a year is paid to seamen in the Navy for food they do not want. It would be nearer the truth to state for food they cannot eat, not on account of its savoury but its unsavoury qualities.

In respect to diet, our ships will not bear comparison with the Americans, or indeed with any of the great steam shipping companies of this country. The biscuits are better in the American navy than in ours, and as to quantity the shipowners of the United States have found it more economical as a general rule to have an open cask of biscuit on deck for the men to help themselves than to weigh it out to them. "Plenty, and no waste allowed," is their motto. In the Mediterranean ports fresh meat is to be obtained oftener than on other foreign stations, and the evils of salt junk are not so apparent there as in the East Indies and China. The evil of this system reaches it climax on the Pacific station, where fresh meat is upon the average cheaper than any other quarter of the globe. We, however, do not avail ourselves of this cheapness, although the Americans do

Digitized by Google

Let any one who wishes to see the difference between the dietary of the two services go on board an American ship from Callao or from the Pacific, and then let him visit an English ship from the same quarter. The chances are ten to one that the American will have good fresh-killed and fresh-salted beef on board, and the English ship will have old salt junk, taken out of store where it has been lying for years. Beef is cheap enough in many parts of the world, and the Americans have a knack of supplying their ships with sweet provisions, while we in England, where beef is always dear, salt it down at a high price, and send it out to some distant store, where it lies for years until some unfortunate ship of war arrives, when it is stowed on board for our sailors to grumble at.—I am, &c., A BLUE JACKET.

NAVAL AND MILITARY REWARDS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Can you or any of your numerous readers give any reason why the Government so tardily, and certainly not lavishly, bestows the well-earned honours on our soldiers and sailors?

It was only the other day, after three years, Her Most Gracious Majesty decorated several for their distinguished acts of bravery during the Indian mutiny in 1857; and in the late affair in China nobody but the general and admiral have as yet received any public official recognition of their services; whilst, in contrast, the Emperor has conferred the Legion of Honour on about 71, and the Medal of Merit on 66, sub-officers and soldiers, and only a few days after the dispatches were received. Surely it is disparaging to the gallant exertions of our officers and soldiers to have the official acknowledgment of their claims so long delayed. Perhaps it is to be the custom that an interval of three year. must elapse for the serious and responsible considerations of their claims.—I am, &c., INQUIRER.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Public interest and attention is more than ever drawn towards our affairs in the East, and more especially China. With the last telegram it appears a grateful country's rewards to the sailors who so nobly sustained, in 1858, the honour of the British flag in the Canton and Peiho Rivers, is the liberal reward of one month's full pay of 30 days, that is nearly, for I quote *Navy List* 31 days:—

To a Captain—Colonel in the Army		£38	4	8
To a Commander—Major in the Army		25	11	6
To a Lieutenant—Captain in the Army		15	10	0
To a Midshipman—Subaltern in the Army		2	14	3
To a 1st Class Petty Officer	If	3	2	0
To a 2nd Class Petty Officer	continuous	2	16	10
To an A.B.	service	2	9	1

Let these figures go forth in your journal; and may they meet more than naval eyes, and say how it is, three years after a brilliant achievement took place—nearly one half are invalided or dead—so handsome a reward is thus given? The sailors were not, like their brother service, allowed batta or field allowance, though they took to the field right well; and this is what is given them by a liberal Government. Why, sir, I have before me a naval officer's account from his agent for passage home on promotion, in which he had to pay 3*s.* 6*d.* a-day for fifty-four days. Thus:—

54 at 3*s.* 6*d.* (paid on board)	£9	9	0
Accountant-General, for contract passage from Hong-Kong	27	5	0
	36	14	0
	25	11	6
Out of pocket	11	2	6

And as he is 11*l.* out of pocket merely for his journey homewards, and ordered that route by the Commander-in-Chief, I trust others will, besides myself, help to expose so great an ingratitude to men who so exposed their lives, and who still suffer from the climate of CHINA.

THE MILITIA.

The Suffolk Militia Artillery have left Portsmouth for Ipswich preparatory to their disembodiment. Only one militia regiment now remains in the south-west district, the Bedfordshire Light Infantry, commanded by Colonel Gilpin, stationed at Portsmouth.

The Militia Gazette.

WAR OFFICE, PALL MALL, NOVEMBER 27.

6th Regiment of Royal Lancashire Militia — Richard Maunsell, Gent., late of the 7th Foot, to be Adjutant.

6th Regiment of Royal Lancashire Militia — Adjutant Richard Maunsell to serve with the rank of Captain.

1st Regiment of Royal Cheshire Militia—Ensign William Vigor Fox to be Lieutenant, vice Jeffcock, promoted; Ensign George Francis Hewson to be Lieutenant, vice Mudd, resigned; Thomas Acres Ogle, Gent., to be Lieutenant, vice Sykes, resigned.

Warwickshire Militia, 2d Regiment—Her Majesty has been graciously pleased to accept the resignation of the commission held by Captain John Payn.

Royal Midlothian or Edinburgh Yeoman Cavalry—Cornet David Wedderburn to be Lieutenant, vice Wellwood, resigned.

Prince Albert's Own Leicestershire Yeomanry Cavalry—Lieutenant John Bainbrigge Story, jun., to be Captain, vice Story, sen., promoted; Cornet Edward Finch Dawson to be Lieutenant, vice Story, jun., promoted; Duncan James Baillie to be Lieutenant, vice Apthorp, promoted.

WAR OFFICE, PALL MALL, NOVEMBER 30.

Memorandum—4th or Royal South Middlesex Regiment of Militia—The Queen has been graciously pleased to accept the resignation of the Commission held in this Regiment by Lieutenant Preston Osborne Page.

2nd Regiment Royal Bucks Yeomanry Cavalry—Viscount Hirkwall, Lieutenant, to be Captain, vice Robarts, deceased; John Henry Bryant, Gent., to be Cornet, vice Maberly, promoted.

West York Rifle Regiment of Militia—Thomas Robert Johnston Logan, Gent., to be Ensign, vice Ledger, promoted; William Charles Sylvester, Gent., to be Ensign, vice Whittle, promoted.

Anglesey Wing of the Royal Carnarvon and Anglesey Regiment of Militia—William Henry Copeland, Gent., to be Lieutenant; Alfred Theodore Williams, Gent., to be Lieutenant.

Memorandum—The Queen has been graciously pleased to accept the resignation of the Commission held by Quartermaster Francis Murdoch, in the City of Edinburgh Artillery Regiment of Militia.

THE ROYAL DOCKYARD COMMISSION.—The remaining members of the Royal Dockyard Commission have been engaged this week in receiving further evidence in London. We presume, as the members consist of an even number, their decisions must be unanimous, as no chairman has been appointed to succeed Mr. Frederick Peel.

VOLUNTEERS.

METROPOLITAN.

11TH (ST. GEORGE'S) MIDDLESEX RIFLES.—The winter drills have now commenced at Allen's Riding School, Seymour Place, Bryanstone Square, and will take place every Tuesday and Thursday evening from 7 till 9 o'clock, consisting of sword exercise for the officers, bayonet exercise for all ranks, and the usual manual, platoon, and company, as well as recruit drill.

20TH (EUSTON) MIDDLESEX RIFLES.—Monday last being the day appointed to shoot for the prizes of Captain Collard's company (No. 5), namely, a Whitworth rifle, given by the commissioned officers, and a valuable short Enfield-pattern-rifle, given by the non-commissioned officers, 22 of the most carefully selected shots proceeded to Hornsey-wood House. Seargeant W. F. Osborn gained 23 points, and won the first prize; Privates Thomas Young and J. Wells tied, and on shooting off T. Young became the winner of the second prize.

22ND (QUEEN'S WESTMINSTERS) MIDDLESEX RIFLES.—The 4th company of this corps, under the command of Captain Charles Vacher, met on Tuesday at Wormwood Scrubs to compete for a valuable rifle, given by the captain, and two money prizes, given by Sergeant White and Mr. C. Stephenson, for second and third prizes. Captain Vacher, in addressing the company previous to shooting, said he should compete with them for the sake of good fellowship, and to prove to the company that their captain was competent to instruct them in position and aiming drill; and that should he be so fortunate as to gain a sufficient number of points to entitle him to one of the prizes, he did not intend to accept it, but leave it for the member who gained the next highest score. Mr. C. Stephenson acted as umpire. The ranges were 200, 300, and 400 yards, four shots at each range. Mr. Taylor gained 13 points; Captain Vacher, 13; Sergeant Ray, 12; Sergeant A. White, 10; Mr. Morton, 9; Mr. Woodcock, 8; Mr. Stephenson, 7. Captain Vacher declared Mr. Taylor the winner of the first prize, and Sergeant Ray the second. Sergeant A. White having won the third, his own prize, the four next highest on the score competed, when it was gained by Mr. Woodcock. Then Captain Vacher and Mr. Taylor shot off their ties for honour, which was won by Captain Vacher.

29TH (NORTH) MIDDLESEX RIFLES.—On Friday week the competition for prizes given by the officers, and open to every member of the 1st company of the 29th North Middlesex Rifles, commenced at the temporary rifle practice ground, Hornsey-wood House. There were about fifty members who entered the lists, the prizes being:—First prize, a silver cup; second prize, a first-class rifle; and third prize, a short Enfield rifle, valued at between five and six guineas. The range was at 150 and 200 yards, five rounds each, and the following were the successful competitors:—At 150 yards: Mr. G. Stoneham, 12; Captain Ross, 9; Mr. F. Tilley, 9; Sergeant Wells, 9; Mr. Dore, 8; Mr. Hoyer, 8; Mr. Ottley, 8; Mr. Maryon, 7; Mr. G. Wilson, 7; Mr. Worrell, 6; Mr. Underwood, 5; Colour-Sergeant Timpson, 5; Ensign Oughton, 5. At 200 yards: Captain Ross, 8; Mr. G. Stoneham, 7; Mr. Tilley, 7; Mr. Dore, 6; Mr. Maryon, 6; Mr. Hoyer, 5; Mr. Ottley, 5; Ensign Oughton, 5; Mr. Underwood, 5; Sergeant Wells, 5; Mr. Worrell, 5; Mr. Nicholls, 4; and Sergeant Timpson, 3. Night having come on, the final contest for the prizes at 300 yards' range was postponed.

4TH (BRIXTON) SURREY RIFLES.—On Saturday last the members of this corps assembled at their butts, at Streatham, for the purpose of contesting for the prizes given by the ladies of the district. The first prize was won by Ensign Coles; the second by Ensign Oxley. The ranges were at 200 and 400 yards, five shots at each distance. Subjoined is a list of a few of the highest scores:—

	200 Yds.	400 Yds.	Total.
Ensign Coles	9	5	14
,, Oxley	6	7	13
Private G. Carpmeal	7	5	12
,, Round	9	3	12
Lieutenant Carpmeal	6	5	11
,, Payne	6	5	11
Private A. Kingsmill	4	6	10
,, Tarn	5	5	10

Of the 80 shots fired by these gentlemen, only six failed to score, viz. four at 200 yards, and two at 400 yards.

CAMBRIDGESHIRE.

1ST CAMBRIDGESHIRE RIFLES.—This corps having attained its maximum strength of 100 members, steps are being taken for the formation of another company, with a view to the organisation of a battalion. The cost of membership has been greatly reduced. The members of the Cambridge Working Men's Corps are being equipped at the cheap rate of 2*l.* 5*s.* each, exclusive of their accoutrements.

DEVONSHIRE.

6TH (BARNSTAPLE) DEVON RIFLES. — On Wednesday, 28th of November, both companies of this corps, to the number of 115, exclusive of the band, marched from their depot to Trafalgar Lawn, where Mrs. Potts, wife of Mr. G. Potts, M.P., presented them with two banneroles. After an appropriate speech, in which she expressed her intention to present the North Devon battalion also with a saluting banner early in the ensuing spring, as well as a silver cup, to be shot for on the same occasion. The ceremony of trooping the colours was then gone through, after which the whole of the effective, as well as many honorary members and numerous friends, partook of a most sumptuous entertainment at the residence of Mr. Potts. The corps is considered by military men to be in a state of great efficiency.

ESSEX.

11TH (DUNMOW) ESSEX RIFLES.—This corps has just held a general meeting to take into consideration its proceedings for the coming season. The chair was taken by Mr. J. Maryon Wilson, a resident gentleman of considerable influence; and after the ordinary business had been transacted, Sir Brydges P. Henniker, Bart., announced his intention to give a prize for target-shooting, to be competed for early in the Spring, and the Rev. E. Maxwell and others have contributed towards a second prize. The total receipts have amounted to 390*l.* 13*s.* 6*d.*, and the disbursements to 342*l.* 17*s.* 8*d.*, leaving a balance in hand of 47*l.* 15*s.* 10*d.* The corps, which is often augmented by the pupils from Felstead Grammar School, is in a very efficient state.

HAMPSHIRE.

2ND HANTS ARTILLERY.—Two small silver cups of the value of five guineas each, have been presented to this corps, in addition to the twenty-guinea cup already in the possession of the 2nd Hants to be shot for next spring. The donors are Mr. A. Lockie, late a member of Lord Elcho's Scottish corps, and Mr. J. Tilsey, a member of the Honourable Artillery corps of London. All members joining the 2nd Hants previous to the 1st January next, will be, as we are at present informed, eligible to shoot for these prizes. The members of this corps attended divine service at St. Bartholomew's on Sunday last, when the Rev. N. S. Godfrey preached an excellent sermon on the Volunteer movement.

LANCASHIRE.

40TH (MANCHESTER) LANCASHIRE RIFLES.—On Wednesday, Major Buchanan, Inspector of Volunteers for Lancashire and Cheshire, inspected the books and rifles belonging to the 3rd company. He visited the Orderly Room, Town Hall Buildings, Cross-street, and inspected the muster roll and other books, with the state and keeping of all of which he expressed himself perfectly satisfied. Afterwards he proceeded to the drill-rooms of the various companies, and inspected the arms stored at each of those places. At the conclusion he intimated his satisfaction at the generally clean and serviceable condition of the rifles; and added his unqualified praise of the general management and superintendence of the regiment. The 1st and 2nd Manchester Volunteer Regiments will be inspected shortly by the same officer.

SUFFOLK.

12TH (NEEDHAM-MARKET) SUFFOLK RIFLES.—The Hon. Lady Middleton, widow of the late Sir W. F. F. Middleton, has presented a silver bugle to this corps.

BRANDON RIFLES.—The members of this corps have held a meeting and appointed their commanding officers as follows:—Major-General Angerstein, commander of the battalion; Lord William Paulett, colonel; the Baron de Bliss, lieutenant-colonel; and Captain Tyssen, captain.

YORKSHIRE.

WAKEFIELD RIFLES.—Arrangements have been made for some prize shooting in connection with the Wakefield Rifle Volunteers, to come off this month. On the 3rd there will be a match open to all the members of the corps, the prizes to consist of a medal for the best shot of each company, presented by a friend of the corps; and on the 12th two prizes, consisting of cups to the value of 10*l.* and 5*l.* respectively, given by Major Holdsworth, will be competed for.

VOLUNTEER MOVEMENT.—On Tuesday evening last Captain Rapillon, in command of the E troop Royal East Kent Mounted Rifles, entertained, by invitation to dinner, about 40 members of his troop, at the "Rose and Crown" Inn, Elham. The regiment have lately had served out to them the new pattern cavalry rifle carbine, and many of the members have become quite famous shots.

WANSTEAD.—A very influential meeting has been held in this parish for the purpose of forming a corps, and the preliminary arrangements having been completed, several persons have enrolled themselves as members of the corps. A committee, with Alderman Finnes at its head, has undertaken the conduct of the corps, which will probably be united with the Beacoutre, Stratford, or West Ham corps, several of the officers of the first-named corps being present at the meeting.

ANOTHER SHAM FIGHT.—On Saturday most of the commanding officers of the organised regiments of Rifle Volunteers in the metropolis received a letter from Viscount Ranelagh, Colonel-Commandant of the South Middlesex Rifles, proposing a sham fight, to come off next Easter Monday, and wishing to know whether such officers would like the corps under their command to participate in the evolutions. Lord Ranelagh states that he has secured the range over a splendid country, for an extent of seven miles, in the vicinity of Croydon, and that his object in moving in the matter thus early is, that every arrangement may be made to carry out the evolutions efficiently. He proposes that the battle should commence much earlier in the day than the hour at which it took place at Chiselhurst.

RIFLE SHOOTING MATCH.—The public challenge of the Barnet Corps, contained in Captain Wilbraham Taylor's letter, published in the *Times* on the 23rd November, has been accepted by the Admiralty company of the Civil Service Corps, and the match is appointed to take place at the practice ground of the Barnet Volunteers, on Saturday the 1st December, the shooting to commence at 11·15. The terms of the match are that 10 men shall be selected on each side to compete for a silver cup of the value of 10*l.*, to be paid for by the losing side; that the winning company shall be bound to accept the challenge of any one other Middlesex company for a similar match, if made within a month, but that the same companies are not to compete with each other twice in the same year. The ranges will be 300, 500, and 800 yards, five shots to be fired at each range.

DISCUSSION ON VOLUNTEERING.—A public discussion on "The Volunteer Movement" was opened by Mr. H. Catt, at the Town Hall, Brighton, on Wednesday. The Mayor presided, and there were about 150 persons present. Mr. Catt argued very much in favour of the movement, as did also Mr. Brooks and Mr. Robins, who took part in the discussion. Mr. Patching, jun., Mr. Fry, and Mr. Hemmings were opposed to it altogether, and another gentleman, Mr. Day, who spoke on the question, argued either one way or the other, or both ways. He said that there was a time when he could call on a tradesman and find him at home in the morning, afternoon, or evening; but now if he called he was told Mr. So-and-so is just gone to the morning drill, or he has gone down in the barracks to afternoon drill, or he is gone to evening drill. He had been to a lady and had asked her opinion of the Volunteer movement. She said, "It has broken up all my domestic happiness; there was a time when my husband was at home of an evening, but now I never see him; he is always going to drill, and so much

Digitized by Google

drilling makes him very thirsty, and he then goes to the 'Three Tuns.'" When Mr. Day had done speaking, a gentleman got up and asked the mayor which side of the discussion Mr. Day had taken, and the mayor replied that he really couldn't tell. The discussion was then adjourned for a week.—*West Sussex Gazette.*

VOLUNTEER JOBBING.—It would appear from a trial at the Old Bailey on Thursday that the Volunteer force is not altogether free from that purchase system which in the regular Army is the subject of so much public disapprobation. A Mr. Eicke, whose name is not new in the annals of military jobbing, advertised in the newspapers an appeal to the patriotic—not of limited income—inviting some gentleman to come forward and equip a Company of Volunteer Rifles at his own expense, and offering him the command as an equivalent. His man was ready. Mr. Andrew Steinmetz, a gentleman educated for the Church, but subsequently diverted to the Bar, was at the moment labouring under an uncontrollable desire for military rank. He had been an ensign in the Victoria Rifles, but notwithstanding an expenditure of 200*l.*, he could attain no higher grade, complained that he was deceived in not being appointed a captain, and threw up the whole thing in disgust. After a little, however, the disappointment would seem only to have had the effect of further whetting his appetite for the rank if not the pay, of captain, and in this frame of mind he jumped at the invitation of Mr. Eicke, answered his advertisement, and an agreement was regularly entered into, that on condition he was appointed captain-commandant, he should equip sixty men at a cost of 3*l.* 10*s.* each. Very shortly, however, a little reflection and some further knowledge of the persons with whom he was engaged in negotiations, induced him to repent what he had done. He demanded back his agreement from Eicke, stating that it had been obtained from him "by surprise and unfairly," and threatened to bring the whole affair before the Lord-Lieutenant of Surrey, to which county the projected company belonged, and in one of the Militia regiments of which Eicke holds a commission as lieutenant. He was not destined, however, to get out of it so easily. Eicke not only commenced a civil action against him for the sum he had agreed to pay for the equipment of the Volunteers, but while Mr. Steinmetz was abroad, preferred a criminal charge against him of feloniously sending him a letter containing menaces, with a view to the restoration of a valuable document, without reasonable or probable cause. Upon this charge Mr. Steinmetz was tried at the Central Criminal Court on Thursday, and acquitted.

THE FORESTERS' RIFLES.—The trustees are proceeding with the organisation for forming a Volunteer rifle corps, or rather companies. The principle is to form companies, to be attached to various local corps, such Foresters' companies to meet together occasionally for battalion drill, and to march out together on important occasions as one battalion.

A meeting was held at Thrapstone on Tuesday afternoon, for the purpose of forming an additional corps of Northamptonshire Volunteer Rifles. Lord Lyveden presided, and he was supported by Mr. Ward Hunt, M.P., one of the members for the northern division of the county.

To the 13th Berks (Forest) Company, which has been established for Ascot and the neighbouring parishes, His Royal Highness the Prince Consort has subscribed 25*l.*, and his Excellency the Belgian Minister 10*l.*, with an annual subscription.

A silver challenge cup of the value of 12 guineas, given by the ex-Mayor of King's Lynn (Mr. L. Self), has just been shot for by the Volunteers of that town. The number of rounds was three each, at 250, 300, 500, and 600 yards; and the highest scores obtained were, Corporal Cooper 13, and Privates Agger and Pridgeon 11 each. The cup is to be won two years in succession by the same person before it becomes his permanent property.

Several matters of interest may be noted with reference to the progress of the movement in Lincolnshire. The members of the Stamford Corps held a competition last week for a silver cup, presented by the mayor, and two small money prizes. The shooting was at ranges of 200 and 300 yards, five rounds each, and the cup was won by Lieutenant Phillips, the second prize, by Private F. Simpson, jun., and the third by Private Spriggs. The Falkingham Volunteers have had a competition for a series of prizes. The first—a badge of honour, cross muskets and crown—was won by Ensign Cragg (18 points); the second, by Private Green (13 points); and the third by Private Richards (12 points). At Lincoln there was an interesting competition last week for prize silver cups, given to the first and second companies by Major Amcotts and Captain-Commandant Trollope. The contest was limited to first and second class men. The ranges were at 300 and 400 yards, five rounds each, and in the match for Major Amcott's cup—restricted to the first company—Sergeant Kirton, Private Hanson, and Private Ladbrooke made 10 points each. On the three ties being shot off at 400 yards, Private Ladbrooke proved victorious, and received the cup. The second company shot, under the same conditions, for Captain Trollope's cup, which was won by Private Drury (12 points). Two other cups, presented by Dr. Lowe and Mr. Doughty, are to shot for next week.

On Saturday afternoon an influential meeting of the inhabitants of Surrey was held at the white Hart Hotel, Guildford, at which it was agreed to establish a mounted rifle corps in the rural districts of the county.

A rifle shooting match took place on the Knaresborough shooting ground on the 21st ult., between two officers and 10 staff sergeants of the 5th West York Militia, and two officers and 10 men of the Ripon Rifle Corps. The number of rounds was to have been 5 at each of the ranges of 200, 250, and 300 yards. When the first two ranges had been fired, the score was 120 for the Volunteers and 90 for the militiamen. This majority was considered decisive of the contest, and as the rain was falling continuously it was mutually agreed to abandon the 300 yards' range. Two of the Volunteers scored 15 points each.

A meeting was held in the Grand Stand, at Ascot, on Tuesday, to receve from the committee a report of the names of gentlemen disposed to act as officers of the corps now being raised in the Ascot division of the county of Berks. Sir W. G. Hayter took the chair, and among those present were the Belgian Minister, Major-General Seymour, Major Scott, and others. Resolutions were passed, appointing Major Scott captain-commandant; Victor Van de Weyer (son of the Belgian Minister) lieutenant; and Mr. Franklyn, of Windsor, ensign.

Many of the corps formed in the county of Essex have passed through the first and most trying year in their history, but no diminution has taken place in the interest in the Volunteer movement. There are now 24 companies enrolled, including about 3000 men, scattered over the county between Stratford on the south and Saffron Walden on the north, between Harwich on the east and Epping on the west. The rifle practice returns during the summer, indicate general efficiency.

At Rotherham the Volunteer movement is making very satisfactory progress. The two companies already established number from 170 to 180 men, and a third company is being formed at Parkgate with gratifying success. The establishment of a fourth company is under consideration, with a view to the formation of a separate battalion at Rotherham, the companies there being at present battalionised with the Doncaster Corps.

An Engineer Company has been established at Sheffield in connection with the School of Art, Mr. Younge Mitchell, the head master of the school, being captain.

On Friday a public meeting was held at Taunton, at which a large number of the leading country gentry were present, when it was resolved to form a Mounted Rifle Corps for that division of the county of Somerset.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, NOVEMBER 27.

6th Tower Hamlets Rifle Volunteer Corps—Charles Mackinnon Walmisley, Esq., lately a Captain in the King's Own Light Infantry Regiment of Militia, to be Adjutant.

London Irish Rifle Volunteer Corps—Frederick Sykes Daubeney, Esq., to be Adjutant, from the 27th of August, 1860.

1st Battalion of Lancashire Rifle Volunteers—Richard Holden, Gent. (late Sergeant-Major 49th Regiment), to be Adjutant, from 17th September, 1860.

Memoranda—Her Majesty has been graciously pleased to accept the resignation of the commissions held by Major Robert Raynsford Jackson in the 5th Lancashire Artillery Volunteer Corps, and Honorary Surgeon James Ainley Mouncey in the 29th Lancashire Rifle Volunteer Corps.

The 23d Lancashire Artillery Volunteer Corps has been united to the 3d Administrative Brigade, which previously consisted of the 5th and 22d Corps only.

16th Glocestershire Rifle Volunteer Corps—Sir John Maxwell Steele, Bart., to be Captain.

29th Middlesex Rifle Volunteer Corps—Lieutenant-Colonel Viscount Enfield, M.P., to be Lieutenant-Colonel.

39th Middlesex Rifle Volunteer Corps—Major Thomas Harpur Colvill to be Lieutenant-Colonel; Frederick Pontifex, M.A., to be Captain.

41st Middlesex Rifle Volunteer Corps—The Rev. John Harman, M.A., to be Honorary Chaplain.

10th Shropshire Rifle Volunteers—Lieutenant Rodney Anderson to be Captain, vice Sir Charles H. R. Boughton, Bart., resigned; Ensign John Minor Kilvert to be Lieutenant, vice Anderson, promoted; Robert William Lloyd, Gent., to be Ensign, vice J. M. Kilvert, promoted.

1st City of Edinburgh Artillery Volunteers Corps—Robert Brydone, Esq., to be Captain; William Campell to be First Lieutenant; Joseph Sexton to be Second Lieutenant; Alexander Ritchie to be Supernumerary Lieutenant.

City of Edinburgh Artillery Volunteer Corps—Second Lieutenant William Steel Millar to be First Lieutenant, vice Henry, promoted; John Park to be Second Lieutenant, vice Millar, promoted.

City of Edinburgh Rifle Volunteer Corps—Robert Christison, Esq., to be Captain, vice Dalzell, resigned.

18th Kent Rifle Volunteer Corps—1st Battalion—Heckstall Smith, Gent., to be Honorary Assistant-Surgeon.

Kent Rifle Volunteers—37th Corps—Robert Tooth, Esq., to be Captain; Francis Barrow, Esq., to be Lieutenant; Frederic Daniel Hardy, Gent., to be Ensign.

4th Hampshire Rifle Volunteer Corps—William King to be Ensign, vice Birt, resigned.

11th Monmouthshire Rifle Volunteer Corps—John Bladon, the younger, gentleman, to be Lieutenant.

Erratum—25th Company of Cheshire Rifle Volunteers—For William Smith, Gent., "to be Lieutenant," read "to be Ensign."

5th Company of Cheshire Rifle Volunteers—Lieutenant Francis Henry Randle Wilbraham to be Captain, vice Sir Charles Watkin Shakerley, Bart., promoted.

The following Appointment is substituted for that which appeared in the *Gazette* of the 23rd November instant.

5th Corps of Northumberland Rifle Volunteers—Robert Buchanan Graham, Gent., to be Honorary Assistant-Surgeon.

VOLUNTEER UNIFORMS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The time appears to me to have arrived when the question of similarity of uniform for the whole of the Volunteer force of Great Britain should be taken up and decided by its recognised leaders.

I wish to urge, through the medium of your columns, the immediate adoption of this principle of similarity. Many regiments are now considering the preparation of new uniforms for next year, and by the summer of 1862 the whole will require renewal. A Volunteer uniform should last in tolerable condition for two years; the belts, much longer. If, therefore, some of the regiments first formed, and those now being raised, obtain during the present winter uniforms of their own fancy, the question of similarity will be practically decided in the negative. I cannot but think that such a result would prove no slight obstacle to the progress of the Volunteer movement; and that, on the contrary, any step leading to the adoption of a uniform dress would be welcomed by the bulk of its supporters.

By the adoption of one colour for the cloth, three important advantages would be secured. Firstly, the greater cheapness of the material, from the economy in its production on an extensive scale, and owing to the fact that the retailer, suffering no loss from its remaining on his hands, would be forced by competition to reduce his charges. Secondly, any Volunteer leaving one part of the kingdom, and going to another district, would not be put to the expense of obtaining a new uniform, but of merely having the facings and the number of the regiment changed. Thirdly, in the event of the force being called into active service, there would not be the great risk of different bodies of Volunteers firing at each other, as there would be at present, on account of the difficulty of distinguishing friend from foe.

On these grounds, therefore, I would urge the adoption of one uniform dress on the consideration of all concerned in the prosperity of the Volunteer force.—I am, &c.,

A LIEUTENANT.

In 1572, troops of horse were called cornets, and companies of foot were styled ensigns. In the reign of Charles II. the junior officer of horse was known as a "cornet," and in 1679, a corporal of horse, saluted as a "brigadier." The dragoon derives his name from the Elizabethan fire-arm, called dragon, from the monster which figured on the muzzle; the Carabineers represent the Spanish Light Cavalry first mentioned, in 1579, as Carabins, possibly from their use of the carbine—a weapon employed on board of the vessels called "carabs." The Scotch Fusiliers, now the 21st Foot, raised in 1678, were the first to take that name, which is one of French origin, denoting a weapon lighter than a musket; while the bayonet was invented at Bayonne about the same period.—*Once a Week.*

JOURNAL OF THE MILITIA AND VOLUNTEER FORCES.
EDITED BY W. H. RUSSELL, ESQ., LL.D.,
(Late Special Correspondent of *The Times*.)

The subscription is 7s. 7d. per quarter, or 30s. 4d. per annum, payable in advance, postage included (excepting abroad, which varies according to the route and destination). All Editorial Communications should be addressed to W. H. RUSSELL, Esq., and business letters and advertisements to MR. ARCHIBALD GRAHAM, to whom post-office orders, &c., are payable. Advertisements received up to Thursday evening. The Paper is published every Saturday in time for the Morning Mails.
Office, 16, Wellington Street, Strand, London, W.C.

ALDERSHOT DISPENSARY.—AN URGENT APPEAL. An effort is being made by officers and gentlemen to establish a Dispensary; and, if well and generously supported, it is hoped that it will soon be made a most efficient Infirmary for Aldershot and its neighbourhood. Medical advice, medicine, and food will be dispensed to the poor, the outcast, the fallen, and the destitute; some of whom have actually perished for lack of such immediate assistance. The Committee feel that they have only to appeal to the public, and to the hearts and sympathies of their military friends and neighbours in the Camp, when they will cordially and liberally respond. They need not assure them that there are many such wanting instant aid, for their own eyes may behold it daily. Subscriptions of any amount will be most thankfully received; and directly that £100 is in the Treasurer's hands the Institution will be commenced. These may be paid in at Messrs. MANGLES' Bank, in Aldershot; to Mr. D. M. DEWAR, the Treasurer; or to the Rev. J. DENNETT, Parsonage, Aldershot.

RIFLE VOLUNTEER BANDS.—Officers in command are invited to apply to BOOSEY & SONS for a LIST OF THEIR MILITARY MUSICAL INSTRUMENTS, forwarded free.—BOOSEY & SONS, 24, Holles Street, W.

BUGLES FOR VOLUNTEER CORPS, Government pattern, corresponding to those used in the Line, very best make, price, in copper, 42s., or strongly electro-plated, 63s.; green cord and tassels, 3s. 6d.; silk ditto, 5s.; enamelled leather case, with strap and buckle, 12s. Sent carriage free on receipt of a remittance.—BOOSEY & SONS, Military Musical Instrument Manufacturers, Holles Street, London, W. Volunteer Bands furnished with Instruments and music of every description.

THE LONDON RIFLE BRIGADE BAND of 21 performers, is provided entirely by H. DISTIN with his newly-invented VENTIL-HORNS. Distin's new RIFLE BUGLE, adopted and sealed as the Government pattern for the Army, can now be had, complete, price 2l. 2s., from the Contractor, at his Manufactory, 9, Great Newport Street, St. Martin's Lane, W.C. Estimates for Bands post free. Retail Depot, 21, Tichborne Street, Regent Street, W.

BENSON'S WATCHES.
"Perfection of mechanism."—*Morning Post.*
Gold Watches, 5 to 100 guineas; Silver, 2 to 50 guineas. Send two stamps for Benson's Illustrated Pamphlet, descriptive of every construction of watch now made. Watches sent to all parts of the world.—33 and 34, Ludgate Hill, E.C.
Established 1749.

ARMY, NAVY, AND COLONIAL AGENCY.—On and after 1st January, 1861, Messrs. W. R. LOCKER & Co. offer the services of their AGENCY to Officers and Members of the above Services at a fixed charge of ONE GUINEA PER ANNUM. A detailed prospectus forwarded on application.—12, Pall Mall East, London, S.W.

MONEY ADVANCED on BILLS, PROMISSORY NOTES, POST-OBIT BONDS, or other securities, and at 5 per cent., on property derived under wills or settlements, without publicity or delay. Confidential applications may be addressed to Mr. MORRIS, Solicitor, 11, Beaufort Buildings, Strand, opposite Exeter Hall, W.C.

The Navy Estimates for the coming session of Parliament must very shortly be put into shape; but, before a final arrangement is made, we would gladly call the attention of those responsible for the disbursement of the public money to the half-pay of the captains of the Navy. The cash now allotted to this class of officers is really not more than can be earned by a first-class artisan; and as it is intended to increase indirectly their full pay, the opportunity is favourable to make an alteration in the other scale.

We understand that the lists of recommendations for promotion which have been received from China have come in a very confused shape, so much so, that in some instances the identity of the individuals is not a matter of certainty. Nevertheless, we expect that the recognition of the services of those who have distinguished themselves will not prove unduly tardy. The promotion of Captains Rogers and Burslem and Lieutenant Chaplin was not only a rapid piece of officialism, but an unheard-of violation of red tape,—three officers having been promoted for gallantry in the field, in anticipation of the recommendation of the General commanding.

THE CONTEMPLATED IRON-CLAD SHIPS.—The entry of additional smiths, metal workers, and foundrymen at Chatham dockyard, to be employed on the iron-plated war steamer intended to be built at that establishment, is to be suspended for the present, in consequence of the whole of the preparations not having been yet completed for commencing the huge ship. Additional workshops and forges will have to be erected in close proximity to the second dock, in which she is to be built, but as yet no commencement of those erections has been made.

By the arrival of the mail steamer from the Cape of Good Hope, with dates down to the 23rd of October, we learn that Mr. Charles B. Sevecke, late Assistant-Paymaster of Her Majesty's ship Boscawen, had been drowned while attempting to cross the bar of Zanibar with dispatches for Dr. Livingstone.

NOTICES TO CORRESPONDENTS.

The Captain commanding 1st Lanarkshire Volunteer Engineers, Mr. Ronald Johnstone, has called our attention to the fact that Colonel Kinloch, in 1852, in his "Proposal for the Defence of the Country," suggested the formation of Engineer corps. His letter was in type, but press of matter obliged us to omit it. The organisation to which we alluded was of a different nature; but we are sure Captain Johnstone will be glad to hear that considerable progress has been made in carrying it to completion.

B. & C.—He can wear any sword he likes, subject of course to the same penalty to which he would be liable for breach of any other regulation as regards his uniform. If our correspondents mean whether he could wear any but the regulation sword with propriety, we reply "No."

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the EDITOR cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

It is particularly requested that applications for copies of the ARMY AND NAVY GAZETTE, &c., and advertisements be sent to the Publisher, MR. ARCHIBALD GRAHAM, and not to the EDITOR.

Army & Navy Gazette.

LONDON, SATURDAY, DECEMBER 1, 1860.

A notice issued this week, to the effect that no more competitive examinations will be held for the Indian Artillery and Engineers, and a general order disbanding three native regiments of Madras cavalry, and reducing the strength of the native infantry, furnish the first pieces of evidence that the work of "amalgamation" has commenced. We have some time since alluded to the main features of the scheme for absorbing the Indian into the Royal Army; and we believe that very soon we shall receive from India news of the settlement of some details, for which the entire scheme only awaits publication. It has been before stated that three new regiments of cavalry and six of infantry will be added to the Line; but in reality these corps can scarcely be so much considered new regiments, as the present Bengal cavalry and European infantry regiments turned into regiments of the Line, but with a system of non-purchase promotion like that of the Company's regiments. The present corps are weak in point of strength, but, inasmuch as the men are enlisted for Indian service only, they must be kept in India for some time, no matter what may be their denomination. When the men thus enlisted become reduced, or re-enlist for general service, the corps in question will form part and parcel of the Line, and will be liable to Indian service as much only as the rest of the Line. The artillery and engineers will all be of the Royal Artillery and the Royal Engineers, and those cadets now studying for that branch of the Service will have to divide their course of study between Woolwich and Addiscombe, after passing through which, they will be gazetted to the Royal Artillery and Royal Engineers. Inasmuch, however, as many of them may have especially prepared themselves for an Indian career, they will be posted, if they choose, to batteries and companies serving in India; and they will have all the advantages originally held out to them in the shape of Indian emoluments, &c. The present officers of the Indian Ordnance Corps will be promoted as vacancies occur in their own body, and will for this purpose form a separate list. Until each particular rank is exhausted, those to be appointed in future will take their promotion in succession to the vacancies in the Royal regiments.

It is unnecessary to say, that however we may constitute our European forces in India, we must still have a very large native force. For the future this force will be upon the footing of irregular troops. Each regiment will have attached to it six European officers, viz., a commandant, a second in command, an adjutant, and three subalterns. Their position will be to a certain extent temporary, and in the nature of a staff appointment as at present.

The general body of the Staff will be selected by examination from the Line. Every officer of three years' service, of which two years shall be Indian, is eligible, and on his proving his qualification, he will be placed on the Staff as opportunity offers, upon probation; should that probation be satisfactorily gone through, he will be taken off the strength of his own regiment, and be regularly attached to the Staff corps, with a step of rank higher than that which he last regimentally held. His further promotion will depend upon his attention to his Staff duties, satisfactory fulfilment of which for, we believe, six years, will entitle him to further promotion.

Exchanges will be allowed between all branches of the Service except the Ordnance Corps, under restrictions like those now in operation in the Imperial army. There can be no difficulty in this, as an exchange is always a voluntary proceeding, and the only duty of the authorities is to give an officer full opportunity of knowing what advantages he gains or abandons in changing his regiment. The rest is purely his own affair, and so long as he is qualified for his new position, the public has nothing to do with it. We believe that exchanges will even be allowed between the Staff corps and officers of equivalent rank in the Line, it being distinctly understood that the officer going to the Staff must have gone through the qualifying ordeal prescribed for his new appointment.

As regards the new European regiments, it must be borne in mind that the officers now attached to the regiments from which they will be converted are sufficiently numerous to fill them. Some of these no doubt are on the Staff, and as all present Staff incumbents will be left undisturbed, they will doubtless keep their appointments rather than fall back to a regimental position. After a little time, however as vacancies arise, and the new Staff regulations come into play, a pretty rapid stream of regimental promotion may be expected, as, in addition to the ordinary retirements and casualties, every appointment to the Staff will make a vacancy in a regiment. For young officers serving in India, and especially for those who will take the trouble to qualify themselves for the higher order of appointments, a fine field will be afforded when these changes are a short time in operation, while the empire will have the benefit of much of those high military qualities which were hitherto confined to one of her dependencies.

Although the Report of the Royal Commissioners appointed to consider the question of Recruiting for the Army has been signed some months, we believe it has not yet been presented to Parliament, and official etiquette requires that, meantime, it should not be formally communicated. The question is one of great public interest, and pending the partial or complete adoption of some of the Report by the authorities, the discussion of some of what are reported to be the leading suggestions of the Commissioners can have no effect that is not useful. We shall at present, then, place before our readers what we have reason to believe will prove to be the main features of the Report.

In commencing their inquiry, doubtless the Commissioners must have been impressed with the necessity of confining their observations to our own Army alone—that being the only similar body raised by means of voluntary enlistment. Comparison with the systems of other countries must have been, therefore, out of the question; and we have no doubt that the Commissioners limited themselves to suggestions as to the removal of some of the imperfections of the present system of obtaining men, and as to the means whereby the Service might be made more attractive to the intending recruit. Whatever may be the constitutional blessings of the voluntary system, it is unquestionably slow in its operation, for the 65,000 additional men added to the Army upon the outbreak of the Indian Mutiny, were not all obtained for nearly three years after they were asked for.

With respect to the Recruiting Department itself, we do not anticipate that the Commissioners will suggest any change in its superintendence in chief. The Adjutant-General now controls it, and he will continue to do so; nor is it likely that any change will be suggested respecting the enlistment of men by regiments or depots at their respective head-quarters. But we do expect to find that the employment of the Militia staff as recruiters for the Line will be made to cease, and that in future this staff will be confined to its own legitimate and important duty of filling the ranks of its regiments of militia. With reference to the officers now employed in recruiting, we see no reason to anticipate any material change in the case of the inspecting field-officers who now regulate matters in each district; but the subdivision officers, who are now subalterns, detached for two years from the regiments of the Line, will in future consist of men taken from the half-pay list, who will be permanently employed, and who, from their long residence in the district, and their uninterrupted devotion to this particular business, may be expected to give more valuable service than officers detached "as a temporary measure" for this employment. To this change will be doubtless added some improvement in the position of

Digitized by Google

the district Adjutants, and some increase to the allowances now made to the subdivision officers, with a view to a more efficient performance of the duties of inspection than can be looked for under the present system.

The period for which a soldier should be enlisted has been of recent years a subject of frequent change, dictated mainly by the varying emergencies of the public Service. In devising a settled plan, we anticipate that the Commissioners will discourage too strict an adherence to the 10 years now constituting the term. An option of enlisting for 16 years in the infantry and 18 in the cavalry and ordnance corps, with a pension of 5*d.* a day, and the retention of any extra pay earned by good conduct, would, no doubt, induce some of the best class of recruits to select it instead of the shorter period.

The question of bounty, as bearing strongly upon drunkenness and desertion, of course will have occupied much of the attention of the Commissioners; but we do not expect to find any important change suggested in reference thereto. Undoubtedly, the bounty has a most seriously detrimental effect upon the Service; but it is an old institution, and its abolition might prove to be too serious an experiment. The desertions which are to be traced to it constitute a very large proportion of the whole. We are glad to find that the desertions from the Army generally have very greatly decreased within the last two years, and that a great majority—about two-thirds—consisted of recruits and very young soldiers. The severity of the drill may probably have something to do with this, and doubtless the attention of the military authorities will be directed to this fact.

The pay and condition of the soldier, although substantially much improved of late years, continues to occupy the attention of all who desire to see the ranks well filled; and though it is not probable that any actual increase of pay will be recommended in the present instance, yet a gift of additional clothing necessary for the soldier may be suggested, which, coupled with a release from some vexatious charges now made, will no doubt prove a substantial attraction to the recruit. Of these new advantages we have already mentioned some of the details. They are wisely conceived, and will have an excellent effect.

These, with some matters of detail, will form the principal recommendations of the Commissioners. The inconvenient and expensive operation of the limited Enlistment Act, in the case of men whose term of service expires abroad, the simplification of the present form of attestation, the reckoning of service from the period of attestation in all cases, the better adaptation to the purposes of the Service of institutions like the Royal Military Asylum at Chelsea, and of the Hibernian School in Dublin, the transfer of men unfit for cavalry to infantry regiments, or from one climate to another,—all these topics will be found adverted to in the Report, which will have a great, and we trust, a most beneficial operation upon the interests of the Service.

We are all very proud of our Volunteers: but we should be still prouder of them if they would only exhibit a little more of the spirit which makes good soldiers—obedience to orders and discipline—its best exponents. Of course there may be an immense deal said on the other side—of freemen fighting for altars and homes, of patriot bands, of Switzerland and America, and consequently of the general advantages of want of discipline; but all that can be said on that side are words, mere words, and not even brave words. Freemen fighting for altars and homes have, *cæteris paribus*, invariably been beaten by soldiers fighting for pay, plunder, and promotion. Courage without discipline is a Chinese bow and arrow *versus* an Armstrong 12-pounder. We are not talking of the marching, parading, drilling, and manœuvring of Volunteers. We know perfectly and painfully well there are captains and even privates who have studied their Lysons and their manual, their regulations, their diagrams, their drill cards, and their movements, to such an exhaustive degree, that few regimental officers could stand a chance with them in a strict competitive examination.

The language of panegyric is almost "used up" by inspecting officers, in their attempts to describe their convictions of what the Volunteers of Diddlesex must inevitably become, if they only would be good enough to attend a little more to something or other; and that the particular corps of the hour under review by the authorities is always in a *paulo-post futurum* state of optimism. In the accounts of field-days and manœuvres (which we are now obliged rigidly to reject, seeing that after we have printed one—generally from an adjutant or some very trustworthy officer—a statement, on indubitable authority, is certain to be sent to us, to the effect that all the movements were erroneously described, and that none of the evolutions mentioned took place) we have far harder "military dodging"—which is the synonym, according to an irreverent young Woolwich cadet, for strategy—than Napoleon exhibited at Champauhert, Montmirail, or Craonne. That is on the principle perhaps that a candidate for a commission is required to answer questions which would "floor" the whole *Army List*, from the Field-Marshals down to the last Major-General. But discipline does not mean any of these things of parade. In its spirit and essence discipline is obedience to orders—an obedience founded on previous teaching, which enables the mass to combine in one movement a number of individual bodies and wills. Now, let our Volunteers ask themselves whether they feel that the principle on which they started and gave permanent life to their grand movement—should guarantee them against any dictation, or supervision, or compulsion: against anything, in fact, but the aid of the State? If they do not, well and good, for there are great hopes of such a splendid organisation, if it is obedient to its higher impulses. If they do, we in all sincerity declare that we do not see the elements of stability in that glorious Volunteer creation of ours, except under the pressure of an actual invasion, that would be far better met had the Volunteers exercised greater self-denial, and exhibited more readiness to obey the orders of the powers that be. There is no question that the Volunteers have deserved well of their country. But it must be remembered that the country has not been indifferent to the merits of the Volunteers. From the Sovereign down to the bad little boy who now hurrahs where he was wont to scoff, under the influence of the dog-star, all have done them honour. Parliament in the aggregate, peers and commoners in their abstract individuality, the imperial press, the local press, the inspecting officers,—with all these on their side, they have surely not wanted the auspicious influence of favouring gales of commendation, if not of flattery, to waft them along. Popular praise is not a bad fulcrum in itself; it is all that consoles many a public servant who has done good things in his day; it is often the particular and sole ambrosia on which his hungry ghost feeds in Elysian fields, whither Charon has ferried him without the bribe of an obolus, because he had not one to give. But to that rather vontose sustentation—that aëronautic help, in which a bare bodkin might make fearful collapse--the country has superadded substantial aids, which may not indeed be all the Volunteers ask, but which are not therefore to be disregarded and treated as of no account. There is the relative rank of the officer—there is the commission, the salute; there is to the private the advantages of Government arms, and other advantages less striking, because they are in some measure paid for; but still advantages that none but Volunteers could procure even by payment. Above all, there is for the whole force, military superintendence and direction.

Whatever may be thought of the soundness of the principle that such military supervision is good, on our part it is an assumption on which the whole of our remarks rest, and even for argument sake we are not willing now to have it disputed. If the Volunteers will but look back to the status of the force of which they are the avatar, and see what it was in 1800, they will find they are not so badly used either by the country or by those around them. In those days they were "bullied" tremendously, and though they got more money, they certainly earned it more severely. Their officers were ground to powder by inspecting field-officers, instead of being gently chirped to by some pleasant official canary after a caraway seed inspection. The "rows" between the two bodies were awful. The country was disposed to a comic view of them—and there was no *Punch* in those days—a sort of anticipation of a Brook Green incarnation. But there were nearly four times as many Volunteers then as there are now—though our increase in population would justify us in supposing that even the fear of invasion then so imminent ought not to have produced more Volunteers. And though "bullied," they obeyed. Now, what we have occasion to hear in reference to the Volunteers of the present day causes us, in all kindliness, to make these remarks. It has been stated that it is almost impossible to induce the Volunteer staff to send in any returns. They will not fill up papers which are forwarded to them for the purpose of obtaining useful information; they do not give the returns which they are asked to do, and they threaten to resign, that being a Volunteer privilege which would be a military offence. They regard standards of merit proposed to them as supererogatory or offensive. The difference of the effective strength and the total of corps in which "they," who are present in body, represent oftentimes but a fraction of "they" who are to be found with the corps only in name, is also very remarkable in many instances. Red tape is a very obnoxious thing when a man is made to live on it, or to dress himself in it, but it is not a bad thing after all for keeping fly leaves together, and even a little binding and edging of red tape, might set off the fine uniforms of our gallant Volunteers. Let them obey all reasonable orders—they are reasonable enough to know what such orders are—to send officers to the right about who do not obey, and to show the same alacrity in complying with the requests of the authorities, as they have displayed in preparing to defend our country.

At the eleventh hour, after more than a quarter of a million sterling has been spent upon building the gigantic armour-plated ship Warrior, the Lords of the Admiralty have discovered that she is not the description of vessel that will combine stability with invulnerability; but, after stopping the works for two whole days, pending the deliberations which were being held at Whitehall on the subject, the following decision was arrived at: "She is not the vessel we could wish for, but, after laying out so much money upon her, it will be as well to see what can be made of her." So, in accordance with this resolution, the Company in whose yard the ship is building have been urged to use every possible exertion to get the ship into the water before the end of the year. Thus, while we are wasting our energies upon a doubtful experiment, the Emperor of the French has tested his La Gloire, the performances of which have been again reported as having given great satisfaction, and is quietly but rapidly constructing several other vessels on a similar plan.

Our private correspondence from France informs us that the iron-clad steamship La Gloire is now being tried against the Algesiras, one of the finest ships in the French Navy; and as we are informed she had been at sea for five consecutive days, the rumour that she can carry only three days' coal must be unfounded. Mr. Hussey Vivian, M.P., in the columns of the leading journal of yesterday, complains that he was refused admittance on board La Gloire. He may console himself with the fact that he has been rowing in the same boat with the noble Secretary of the Admiralty, who, it is reported, was equally unfortunate in getting a peep at the wonderful ship during his late holiday tour.

The French Government are actually building steam-vessels at St. Cloud for the Imperial Navy. They have just launched from opposite the Park a screw dispatch-boat, called the Argus. She was commenced only in May last, but from 150 to 200 workmen have been constantly employed on her. The chief novelty attached to the Argus is connected with her boilers, which are chiefly heated by means of a jet of fire, carried into the water itself by means of a metal worm. The Argus, after having been subjected to various experiments before the Minister of Marine and a body of scientific engineers, will be sent to Cherbourg, there to be fitted out for sea.

The late Admiral Sir Charles Napier was in the habit of asserting that the steam block-ships Edinburgh, Hastings, Blenheim, &c., were useless as men-of-war; and it would appear that he was not singular in entertaining such an opinion, for we hear that a plan has been submitted to the Admiralty by which it is proposed to iron-plate these ships, and thus, pending the construction of a fleet of iron vessels, to keep the mind of the public at ease in reference to the movements of our ally on the opposite side of the Channel. Will these ships compete in speed with La Gloire?

The communication between Nos. 7 and 10 docks in Portsmouth yard, now being carried out by the contractors, Messrs. George Smith & Co., of Pimlico, is ordered to be completed by the 1st of March next, as the docks will then be required by the authorities for the purpose of receiving the Warrior, iron-cased frigate, now building by the Thames Ironworks and Shipbuilding Company. On the completion of the work, these two docks, by the removal of the central caisson, can be thrown into one, with a total length of 615 feet, the caissons being placed in the sunk grooves at each end. By using the western rebate and the steam-basin outside groove for the caissons, the total length may be increased to 645 feet. The breadth and the depth will be necessarily very unequal, the new portion, or No. 10 dock, as it is now termed, being of greater depth than No. 7 by five feet, and also of greater width in that portion which will be the nearest point in contact with a ship's bilges. The breadth between the entrance gate piers at the copin will be 83 feet at one and 80 at the other.

VENETIA.

[From a Correspondent.]

What is to become of Venetia? Most Englishmen throw off an answer to this question very glibly. "It is a part of Italy," they exclaim; "it is inhabited by Italians: who in his senses can doubt that it must be annexed to the Kingdom of Italy?"

But is this so? Are the four fortresses of the Quadrilateral nothing more than a piece of Italian territory, of no consequence to any one in Europe except to the Austrians who have it, and the Italians who wish to acquire it? Let us rather consider whether this is not really a European problem, and whether there are not elements of supreme military and political importance involved in its decision.

If the Quadrilateral were an aggressive fortress, to overawe the whole Italian peninsula with Austrian influence, or even a citadel to secure the possession of certain Austrian territories in Italy, every sound politician and genuine friend of Austria must desire to see her quit of it as speedily as possible. But it is something immeasurably greater than this. It is a bulwark thrown out for the defence of the southern frontier of Germany and Austria, and for the retention by the whole of Germany, of an outlet into the Mediterranean Sea. The questions therefore to be determined are, whether if Venetia be lost to Austria, Germany will not be ultimately cut off from the Adriatic, and what in that case will be the conditions on which the South of Germany can be successfully defended.

The estimation of the value of such a bulwark depends on many varied considerations. The war in Italy of 1859 has altered the character of most of the elements of the problem; but the great fact is unheeded by most Englishmen. In the first place the aggressive power of France is vastly increased. On her Italian frontier she has acquired a strong allied, not to say, dependent state. Formerly, conservative Piedmont, backed by Austria, barred the way into Italy, or threatened France, if France assailed Germany on the Rhine. Now, France is absolutely at her ease in that quarter. If, on the other hand, her desire is to invade Italy, she has gained increased facilities for carrying out such a design. She is virtually mistress of the great valley of the Rhone, with the Simplon and many other passes; whilst for many a league, she actually looks down upon the plains of Italy. The neutralities of Belgium and Switzerland cover two more of her flanks. These much-vaunted neutralities were devised as securities against French ambition; in the present day they have become eminently serviceable for the purposes of French aggression. France, it is true, will not lightly attack Belgium, because she knows that she would thereby encounter at once the resistance of the great powers: but, nevertheless, she can turn its neutrality to excellent account. In an assault on central Europe she is set free from an exhausting weakness, which weighed upon her in the wars of Marlborough and Napoleon; she is no longer under the necessity of keeping a large part of her military resources paralysed in protecting her Flemish and Swiss frontiers. She can bring the whole weight of her strength to bear on Germany, for on every other side she is covered and secure. If, on the contrary, it suits her purposes to seize Switzerland, with Italy allied to her, and the Austrian forces removed from Venetia, her task is easy. The fortress of Belfort commands a good access to Posenburg; and by her position in the valley of the Rhone, she has her hand on the vitals of that free country. No state can give succour to Switzerland, except Austria. And, when the Quadrilateral is gone, and with it the means for a flank attack on the French invaders, Austria can meet them only by a front move, and she starts already distanced in the race. It cannot be doubted that by the war in Italy the military independence of Switzerland has sustained a great defeat—a defeat most dangerous to Europe as well as to herself; and that if the Quadrilateral ceases to be German, that independence is lost altogether. Switzerland will then only wait for a fair opportunity and the good pleasure of France, to be incorporated into that kingdom by a protectorate or annexation.

These considerations establish that a strong European interest on the side of Switzerland is involved in the Austrian occupation of the Quadrilateral. Let us now examine the efficiency of the defence furnished by Venetia to Austria and the southern frontier of Germany.

Austria, it is argued, does not want Venetia. The steep slopes and the towering heights of the Alps constitute a far stronger and more impassable barrier. Let Austria fortify the passes, aud she will gain a security which no fortresses in the plain can suplpy. But is it so, we ask? Have the Alps ever prevented the invasion of Italy by Frenchmen or Germans?* Is there any reason for believing that the past cannot be reproduced?—that history has taken a new and unalterable turn? This argument misconceives the strategical value of a strong military occupation of the plain. It forgets that it is the plain which commands the mountains, and not the mountains the plain. No large army can be permanently concentrated on any single point in a mountain chain. It could not receive the necessary supplies of military stores and provisions; whilst its communications for defending a long length of line would be impracticable.* A great force posted in the Quadrilateral, near the centre of the arc of the Julian Alps, takes all the passes in reverse, and by falling on their flank or rear would crush any mass of troops which ventured to invade Germany over the mountains. Napoleon did not dare to move towards the north, although there was no army to oppose him, until Mantua had fallen. His nephew was brought to a stand-still in his onward career towards the East by this formidable buttress. But for the Quadrilateral, who can say what would have been the limit of French invasion in 1859? What annexations and concessions might not France have pronounced necessary to balance the new Kingdom of Italy? The utmost that can be done with mountains is to bar the passes; but that disperses and isolates large bodies of troops; and experience most decidedly proves that mountain defences can always be turned; 100,000 men in the Quadrilateral do the work of 250,000 on the slopes, some 300 miles long. They do it better, more cheaply, and with greater certainty. Before Austria can be invaded from Italy the four fortresses must first be stormed; that would require at least one, probably several campaigns, and the Alpine wall would still remain to be forced.

Let us now reverse the situation, and consider what the altered effects would be. Austria no longer defends her territory with four fortresses of almost impregnable strength, situated in a rich and populous country, with the amplest facilities for obtaining stores and provisions, and with the easiest communications by roads and railways for carrying assistance to any of the ports attacked. She is now perched upon the crests of the mountains, with 300 miles of frontier to guard, instead of the small space between Venice and Peschiera; she must fortify every pass, at great cost, and maintain garrisons and artillery in them with much expense and difficulty. The enemy in the plain can mass his troops at pleasure on any chosen point of assault. He can make easy feints in any or every quarter, and at the decisive moment his railways can concentrate his whole force on the point selected for breaking through. The Austrians must guard every avenue; they cannot move, for they know not the point on which the storm will fall. A large part of their army thus remains dispersed. When the attack is developed, to carry succours to the overmatched defenders is impossible. The Alps throw out spurs, which form long valleys. These spurs are usually more difficult to cross than the main chain itself, as the pass of the Stelvio so vividly illustrates; the garrisons guarding the passes on each side of the one assailed may be separated from it by only very short direct distances; yet the troops cannot concentrate except by marching down one long valley and up another. The invading force breaks through, cuts the defending army in two, and beats it in detail.†

This is no fiction of the imagination; this disaster was within an ace of happening to the finest army which probably the world ever saw. A more sagacious leader than the Duke of Wellington, and a more vigorous army than the force he commanded on the Pyrenees, history does not record. He had marched victoriously across Spain; and at the end of the campaign, he guarded all the defiles of the Pyrenees, till the fall of Pampeluna and St. Sebastian on his two flanks left him free to advance. He knew that Marshal Soult was accumulating a large army on the French side of the mountains; every disposition was made which skill or watchfulness could suggest; yet all these precautions were useless. In vain did Byng with his brigade of Guards watch the pass of Alduides, Soult pierced through with overwhelming might; the Guards and the fourth division, sorely pressed by superior numbers, were driven back; the army could scarcely concentrate in time, and but for the hard gallop of the great Duke, and the delusion he inspired in the French Marshal, and strong reinforcements, the few hours' distance which still separated him from Pampeluna would have been surmounted, the British army would have been divided in twain, beaten in parts, and driven back to Portugal, and the fruit of many campaigns would have been lost. Never was the Peninsular army in greater danger. And if this could happen in open war against a consummate commander fully aware of the peril, and a matchless army in the field, what might not Austria expect from the wiles of peace, and the treachery of a diplomacy that was designed only to deceive?

The invader has now crossed the Alps: what is his position? By a simple strategical move, without fighting a great battle,‡ he has gained more than Napoleon did by the successive defeats of Beaulieu, Wurmzer, and Alvanry; he is master of a position which, if the Quadrilateral had remained Austrian, it would have cost him several campaigns to win. The Tyrol, as in 1808 and 1809, is cut off from Austria, and virtually lost. The campaign begins in the plains of Bavaria and Austria, in the valley of the Drave, instead of on the Rhine. The defences of the Upper Rhine, of the Black Forest, and even of the Upper Danube, are turned. A third of Germany is gone or compromised; the Austrian forces can concentrate only in the centre of the monarchy, where, as the Archduke Charles designed in 1796, her generals must fight for her existence. If the invader wins a great victory, Vienna is at his mercy; the Tyrol, if not already lost, must fall into his hands. By its means he advances into the valley of the Danube; he turns the German and Prussian defences of the Rhine; and his strides are felt on the Elbe, in North Germany, and even on the Lower Rhine.

But the invader may be beaten, it may be said, and then he would be annihilated, for he could not retreat across the Alps with a whole skin. Yet Massena recrossed the Alps before Suwarrow, and the French the Pyrenees before Wellington, after Vittoria. But even if he risked the loss of his whole army, the stakes would still not be equal for Austria and her invader. He sends forward only a portion of his whole military force: the bare fact that he is an invader implies this much. Defeat to him is loss only—to the Austrians it is ruin. A lost battle in Bavaria or on the Danube puts the whole monarchy in jeopardy: the conqueror may dictate the dismemberment, or even the annihilation of the empire.

These considerations dispose of the oft-repeated assertion of the expensiveness of Venetia to Austria: Let her sell Venetia, preaches the *Times*, and employ the money in restoring her finances and paying off her debt. This is easily said, but shows little knowledge of the facts of the case. After selling the Quadrilateral, Austria must re-invest the money, and even add to it, in building fortifications along 300 miles of Alps; still more, she must maintain, at a large annual cost, a frontier line of guards, of twice or thrice the extent—250,000 men instead of 100,000. No more needs to be said to describe the character of such a financial operation.

But, it is retorted, Austria is not and can never be at home in Venetia. She is there an alien among enemies, plotted against incessantly from within, and the object of a never-dying hostility from without; she lies under a perpetual declaration of war, at the first opportunity, from the kingdom of Italy; the expense of retaining such a possession must be an exhausting and never-ending drain on her resources. Let her practise the wisdom which we so foolishly despised in the case of our American colonies; let her make an amicable cession of Venetia to the kingdom of Italy—she will attach for ever to herself their active gratitude and their faithful alliance; she will earn the support of every liberal in Europe, and acquire a strength which she has never wielded since the days of Charles V. The Italians will then enthusiastically defend her against France, for her sake, and still more for their own.

Again, we ask, is this so? Is it so certain that Italy never can be French, never can or will go hand in hand with France in a career of conquest against mid Germany? Is it impossible for wolves to hunt in couples where sheep abound? It would be the ruin of Italy, it is angrily retorted. Be it so; but has folly no part in human affairs? Would it be sane in Austria to abandon her defences, on the supposition that Italians always will be, never can be other than wise; never can be allured by an immediate ventilation into forgetting future consequences?

But even if the hostility to France of a constituted kingdom of Italy can be safely relied on, he must indeed be a sanguine politician who, at the present moment, could go to Vienna and affirm to Austria that Italy is now free, is under no subserviency to France, takes counsel of her feelings and interests alone, and can be entrusted with the Quadrilateral, or even trusted against every enticement or threat of French ambition. We are at a loss to conjecture what his answer would be, if met by Austrian statesmen with the remark that it would, at all events, be safer to wait till Italy was, *de facto*, her own mistress.

But there is a much graver inquiry yet. What will these Italians themselves do, when left to themselves? "Italy for the Italians" and a war for their Venetia; cannot the same cry be made to yield them still richer fruits? The kingdom of Italy will undoubtedly become a great naval power; and are not the waters of the Adriatic Italian waters? We know how difficult and delicate a problem it is to determine the boundaries of a great state. It is a question on which the dwellers on each side of the frontier are apt to differ. For the solution of such international questions there is no instrument so effectual as a great principle; and a great principle is not wanting here. Has it not been laid down on the highest authority, an authority specially recognised by Italian chiefs, that the slopes of the Alps belong to the nation that occupies the plain? The Tagliamento or the Isorno is a feeble demarcation, unworthy of a scientific geographer or a powerful state. It frowns with no fortresses, it presents no dangers to those who would cross it. The Julian Alps arch down to the Dalmatian Highlands; all that they embrace is Italy. The bounty of nature delivered Trieste and Firenze to the Italians. No peace with Austria till this natural, this unchallengeable right has been recovered.

But what is Germany to think and feel? Is she to acquiesce in the conclusion as a pure trifle, a new scientific ratification of natural boundaries? If Germany has a grain of understanding she must perceive that to lose Trieste and Firenze is to seal herself up hermetically, to shut herself out from the great highway of commerce, the sea, to arrest her own internal and external development, to bar herself out from the world. The liberty of the Adriatic is as vital an

* The question is, whether any invasion of the Cisalpine regions has been made by a force from the south, on which the diverging sides of the great valleys generally tend.

* These remarks are applicable to an army advancing northward through the passes.

† All these difficulties would occur to a force marching on the northern gorges from the south.

‡ There might be some very serious and very important battles, nevertheless.

interest to Germany as the liberty of the Straits of Dover is to England. Every German is unworthy of belonging to the great Teutonic race who would not be ready to spend his last florin, and even his life, rather than suffer the door by which he has access into the world, to be shut upon him for ever. And if such ought to be his feeling, is it not reasonable for him to think that if there must be a struggle, it is safer, more prudent, more statesmanlike for him to fight with the Quadrilateral for him than against him, and can any fair-minded Englishman find fault with him for thus acting?

We must, in conclusion, express our acknowledgements for the efficient help we have derived in stating this argument from the very able pamphlet, "Das Festungsvierech von Ober-Italien," by Captain Aresin of the Austrian staff. It highly deserves the careful study of every strategist and politician.

MEMORIAL OF PAYMASTERS, R.N.

We have had the Memorial of the Paymasters of the Navy for some time before us. From a copy recently forwarded we find that since the list was closed, 25 additional signatures have been obtained, giving a total of 207; but there is little doubt the Memorial represents the general views of the body, and the statement of the case and the arguments by which it is supported, ought to weigh more than the number of the petitioners.

Many of the so-called "grievances" in the Royal Navy are doubtless attributable to the patch-work manner in which various classes are dealt with. That, again, may be caused by the anxiety of successive Boards of Admiralty to do something to satisfy a particular grade, the anomalies affecting which have been especially urged upon their Lordships' notice. We naturally hear much of the circumstances affecting the different ranks of Her Majesty's naval service; and we feel certain that the class jealousies that exist arise generally from accidental causes, and that slights are not intended to any one grade or another, notwithstanding the incongruous regulations; moreover, we are sure that there is really no class of the Service desirous of obtaining undue advantages over any other, or wishing to see another depressed.

We have said thus much, because we are about to express our regret at one portion of the Paymasters' Memorial, to which we venture to think they have given an undue prominence. We allude to the passage in Circular No. 411, which reserves power to the Admiralty, in certain possible circumstances, to place a paymaster on a lower rate of half-pay than that assigned in the Circular. If we mistake not, there is a general "saving clause" of the same kind in the Naval Regulations affecting every officer, and, considering the nature of a paymaster's duties, we do not think it either politic or reasonable to endeavour to tie up the hands of the Admiralty from exercising this power, unless after a trial by court-martial. No one could suppose that any reflection was intended upon the general body of paymasters by this clause; and we are in a position to state that several paymasters would rather that these paragraphs had not been inserted in the Memorial. Were any one to read the forfeiture clauses in the Queen's Proclamation instituting the Victoria Cross in the same rigid manner in which this clause in Circular 411 has been construed, it might be hypercritically forced into a positive insult to all on whom the Victoria Cross is conferred.

We are not clear that full pay, merely according to service, is preferable to the system of classes. It may be so at present, when so many officers are employed; but it is easy to conceive a different state of things. Of course, if a man could always be employed when willing, and if means were taken to prevent unfair shirking of service when unpalatable, nothing could be better than a graduated scale, according to length of service. At the same time, unfortunately, in ordinary employments, people do not find their incomes increase exactly in this way. Still the point should be determined upon considerations based upon the regulations affecting all other ranks in the Navy.

When dealing some months ago with the question of retirement and half-pay for the executive, we ventured to point out that there was a good deal of fallacy involved in the outcry for mates' time, &c., being allowed. This is confirmed by the Paymasters' Memorial. A portion of their time as assistant-paymasters and paymasters', clerks was allowed to count under Circular 411; but, at the same time, the period of years required for a given rate, was increased—the result being that some only are benefited by this rule, and some suffer loss. The withdrawal of any "retiring allowance," in the shape of a small increase to half-pay, in cases when a paymaster may exceptionally become unfit for further service, we think was unwise, and it ought to be restored.

But unquestionably the greatest wrong which the paymaster suffers arises from the recent regulations advancing their brother officers of the civil branch—the surgeons of the Navy—to higher rank, without including the paymasters in the same arrangement. That pensions to widows, compassionate allowances to children, all honorary distinctions, and Crown grant lands in the colonies, should not be granted to paymasters in the Navy, exactly as to other officers of relative rank, appears to be a manifest injustice, though we scarcely like to use so strong a term. The individual honours that executive officers can obtain in promotion to the highest ranks, and especially during war, are so great, that the other advantages of the Service should not be begrudged to the few civilian classes. Besides, it should be remembered that we are not always in a state of active war duties. Nine-tenths, probably, of the lives of most naval officers are spent in peace, and during that time there are no "executive" duties more important on board ship than those of the paymaster. Our First Lord of the Admiralty and Secretary of State for War hold doubtless most important offices; but they ought not to be held to rank above that of the Chancellor of the Exchequer. The paymasters are the chancellors of the ship's exchequer; they are, moreover, generally best "posted up" in the knowledge of all the general regulations which guide the captains of the Navy. It was unnecessary to quote the opinion of the seven officers who sat in Committee in 1851, in favour of the paymasters.

We believe the naval officers generally who have been in command, and the great majority of all others, would say, "We do believe there is not a more honourable body of men as a class in the Navy, or any who more faithfully perform the trust confided to them;" and would probably add, "nor is any class, as a whole, more able and energetic in the performance of their highly important duties."

As the Naval Regulations are now under revision, surely anomalies as to relative rank and advantages in the Navy will appear so incongruous that they must be swept away before the new code is allowed to issue.

REMARKS ON THE WEEK.

The topics of conversation for the limited world of the "fighting interests"—whose influence, by the bye, is extending itself daily in proportion as the machinery of civilisation becomes finer, more complicated, and more likely to be deranged by hard blows—have not been unimportant this week. But even the state of the Navy, of which the pessimist view taken by an able writer startled us all on reading our *Times* last week, till the optimists came to the rescue with such vigour that they have not only apparently knocked the wind of composition out of the man "who knew the Service," but re-assured those who do not—even that great question on which Captain Sherard Osborn, sitting in his own court of *pie poudre* has passed a judgment to the effect that there is much to say on both sides—has yielded in attractiveness to the Chinese campaign. In addition to the capture of a Special Correspondent, there was the pleasure of knowing our troops were almost in sight of the walls of Pekin. The transaction as reported here looks like an attempt at very sharp practice; but without putting much faith in the sincerity of the Tartars, it is possible the view of it taken by the high authorities on the spot may be correct; and it is not quite improbable that the Chinese will allege the allies broke the terms of the armistice by advancing with all their forces beyond the prescribed limit, the exact position of which was not very clearly indicated, and the boundaries of which caused a dispute at the very outset between Mr. Parkes and the Chinese. To a philosopher it would be amusing enough to remark the indifference of the allies to each other's existence as manifested in the accounts in the French and English journals. The reports in any of the papers would lead one to believe that the country in which the particular journal is published had never heard almost of the existence of its ally. Who ever knew in England that any of the French were captured till they read of it in the dispatches of General Montauban? Probably our allies were as ignorant of our presence on their flanks as they pretend they were, though their general handsomely admits our services. It will be seen that the post of Special Correspondent in a fighting army is by no means exempt from a larger share of danger than attaches to any other we know of, if the gentleman who fills it be a man of activity and zeal, without which he is nothing. In a short time since the office was created, one had died literally on the field, one has been taken prisoner in Italy, another in China, two have been wounded, four or five have been in the very centre of most sanguinary battles; one has been made a Consul-General, a danger in itself; and one who had been in many fights has been made a General, and fought *tam marte quàm mercurio*, but with more profit in one capacity than in the other. It is all very well to tell these gentlemen they have no business to run into danger, but if they keep in the rear their letters will not be found very interesting by the proprietors or by the public. And so they must go in the front. "'Tis their vocation Hal;" and no one seems to have felt the exigencies of his calling more strongly than Mr. Bowlby, of whose letters we are only deprived for the time, we hope, in order that he may give his experiences—may they be as little unpleasant as can be possibly expected—in the form of an unbroken narrative, for his own sake as short as it cannot fail to be intensely interesting. If Mr. Bowlby had not gone on to Tungchow, and all had been well, most people in camp would have said they would have certainly accompanied Mr. Parkes, if they had been free as he, and in so far would have conveyed a sort of reproach on his energy. It is fortunate he had some one to share his captivity, or there would have been an outcry in some quarters against the audacious amateur. It is long since one has seen in a casualty list "wounded by an arrow," and the word "severely" now and then attached to the name shows that the old missile can still hold its own, and do a certain amount of work, even among Armstrongs and Enfields. Apropos of these arms, it is strange enough that the French are as persuaded of the superiority of their canon rayé, as we are of the perfection of the Armstrong. Our readers may turn to our Paris correspondence for a view of the question from the other side of the Channel. In all courtesy it is permitted to us to hope their confident anticipations of the superiority of La Gloire may not be better founded than their belief in their rifled gun, which is indeed a very fine piece of ordnance in its way. The account of the iron plated battery, from the pen of Mr. Hussey Vivian, in the *Times*, is very interesting: but he was wrongly informed that the Normandie is a two-decker. In reference to the naval controversy, there is certainly one ground of comparison on which we may safely take our stand. Let the treatment of the French, Spanish, Russian, Dutch, of even of the American sailor, be compared with that or the British man-of-war's man, and the result will prove that the miseries of his position are certainly not anything like those borne by his class under other flags. The officers may not be very well used now and then, and when they are, assuredly there is no public ignorance possible on this subject, though they do not roll shot about or douse the ship's lanterns. Sometimes, indeed, as in the case of the officers of the squadron which accompanied the Prince of Wales to America, they may bear their disappointments silently in the hope that justice will be done, and that a little brevet, such as has been given for a very trifling and expensive service, is only an instalment of good things to come; but, as a general rule, the sea-dogs open their mouths, and bark loudly enough on occasions. It addition to what appears elsewhere on this point, our readers may like to see what is the real state of the case as to wages. The following is an account of the wages paid in the merchant service from 1852 to 1860, as regulated in one of the shipping-offices of the port of London: January, 1852, 2*l.* 5*s.*; January, 1853, 2*l.* 5*s.*; June, 1853, 2*l.* 5*s.*; January, 1844, 3*l.* 10*s.*; June, 1854, 3*l.* 5*s.*; January, 1855, 3*l.* 10*s.*; June, 1855, 3*l.*; January, 1856, 3*l.*; June, 1856, 2*l.* 15*s*; January, 1857, 2*l.* 10*s.*; June, 1857, 2*l.* 10*s.*; January, 1858, 2*l.* 10*s.*; June, 1858, 2*l.* 5*s.*; January, 1859, 2*l.* 5*s.*; June, 1859, 3*l.*; Jan., 1860, 2*l.* 10*s.*; June, 1860, 2*l.* 10*s.*

Now, the whole sum in favour of the merchant-sailor, supposing that he is employed all the year round, over the pay of the able-bodied, is 3*l.* in the twelve months; but, in fact, he is rarely if ever on full wages for even ten months in the year. As regards the advantages of the allotment system in the merchant service compared with that in the Navy, they simply do not exist at all. Our sailors may all be ready to cut and run in the Navy, but, unfortunately, they have the same propensity in the merchant service, particularly in the colonies. The result is that no employer or captain will allot any portion of pay to a sailor's family, unless the man be well known to him, or has been employed before. It is rarely indeed that a ship returns from a voyage with anything like the same crew she took out. We fear that both in the Army and the Navy there is some sort of influence at work detrimental to discipline. Were the sailors of the Hero ill-treated at the other side of the Atlantic? Was faith broken with them? Were they ill fed? How many of them deserted whilst the ship was in harbour? To those who care for fighting on land rather than for naval matters, we commend an article on the Quadrilateral, in this number of our journal, as a fair exposition of the reason why Austria thinks she ought to hold Venetia in the interests of Italy.

THE PRINCE OF WALES' BIRTHDAY, AS KEPT ON BOARD THE HERO, NOVEMBER THE 9TH.—This being the anniversary of the birth of the Prince of Wales, His Royal Highness was greeted with many ardent wishes for happy returns of the day, and hopes both loud and fervent were expressed that his next natal anniversary would be celebrated under more comfortable circumstances. The Prince never lost his gaiety, and, in fact, seemed to make it a merit to be jolly under difficult circumstances. In the midst of a stiff breeze and driving rain the officers and men assembled on deck at twelve noon, and the ship was dressed in honour of the day. The commodore signalled the Ariadne, and she promptly displayed her bunting. The scene was more picturesque than comfortable. A stiff easterly gale blew throughout the day; the rain poured down in torrents; but officers and men did not seem as if they felt it. They gave the Prince three hearty cheers, which he affably acknowledged, and then, amid the waste of waters, thundered out royal salutes of 21 guns each from the Hero and Ariadne. What commotion must have been excited among the sea gulls and porpoises—there was no other living thing in sight. A singular incident occurred on board to-day. A linnet was observed to take shelter in the shrouds. The little wanderer had evidently been blown off the land by the fierce gales, and had found an ark of refuge in the Hero. It was easily captured and presented to the Prince, who has carefully tended the little warbler, and brings it with him to his royal parents as a memorial of his birthday experience at sea. In the evening there was a grand ball on board the Hero, at which the middies did duty for ladies, and the gaieties of Toronto and Washington were enacted over again—with a difference. Everybody, however, was as pleasant as possible, and the anniversary passed over happily under the circumstances,

BRITISH POLICY IN CHINA.*

This is a very remarkable pamphlet.

A former work, by the same author, had prepared us to receive with pleasure and attention any further remarks which he might have to make about the mysterious and little understood nation with which we are at war, and those who read "Twelve Years in China" will need no pressing to induce them to renew their acquaintance with Mr. Scarth.

One great merit of Mr. Scarth's writing is, that he always has his subject well in hand, and appears to think with Sydney Smith that "brevity is in writing what charity is to all the other virtues;"—this little pamphlet will accordingly be found to contain matter which many authors would have contrived to spin out into a moderate-sized volume. It is positively refreshing in these days to find a pamphlet what a pamphlet ought to be—an essay, rather than an exhaustive treatise, so arranged and stocked with information as to be calculated to promote discussion and direct attention to the subject, instead of leaving its readers imbued with the idea that it was necessary to get through so much husk and shell to obtain a kernel, that they would not care to risk their teeth a second time in the attempt.

In Mr. Scarth's pamphlet we get at the kernel very easily. He disapproves almost entirely of the policy we have hitherto pursued in China. That policy, he considers, has been to uphold the present Tartar dynasty in China. "Take, for instance," he says, "the Tartar power, or rather want of power, on the coast of China. As the Mantchoos were incapable of keeping the sea-board in order, fleet after fleet, and thousands upon thousands of Chinese (whether pirates or rebels little trouble was taken to inquire) were destroyed by the British cruisers; in a few cases accompanied by Imperial junks, and in two of the most notable instances, working in concert with a steamer that had been purchased by Chinese from foreigners. The assistance thus rendered was little tempered with mercy, and it cannot always be said to have been rendered for the protection of British or foreign trades; for one of the principal fleets was destroyed far beyond the limit appointed by treaty for the carrying on of foreign trade in China. Much of this assistance was rendered during the existence of a civil war, in which the British Government had declared and proclaimed neutrality, yet, in many instances, acting upon the information of the mandarins, fleets declared to be rebel were attacked and destroyed. British ships hunted these fleets out of the coast, and utterly destroyed their power, whether it was piratical or rebel. At any rate blockades were established by these men. Upon certain payments they undertook to convoy Chinese vessels on the coast; and the only instances known of their attacking vessels under a foreign flag was when these vessels were employed in convoying native junks. Further than all this, not only was it rare that prisoners were taken—for death and destruction appeared to be our motto—but even when some of these men surrendered, though dressed as, and bearing all the signs of being, rebels, nay, even classed in the prison records of Hong Kong as "rebels," they were, without the benefit of a trial, handed over to the Imperial authorities of Canton (while we were at war with them). Though it was well known that about 100,000 people had been executed in cold blood by these authorities, yet we added victims to the vengeance of a power which at the time was offering rewards for our heads, and attempting assassination by the most diabolical means" (pp. 13, 14). These and other instances Mr. Scarth adduces with great readiness in support of his statement that "the efforts of British diplomacy have been directed to uphold the Tartar dynasty of China," and that throughout the rebellion "the neutrality enjoined was not adhered to, and that assistance was given to the Imperial Government, and opposition shown to the insurgents of Kwang-tung."

We next come to the important question—which of these two powers is it our interest to support? Mr. Scarth decides unhesitatingly in favour of the rebels, and we are bound to admit that he does not arrive at this conclusion without adducing some very strong arguments in support of it—arguments which lead one to infer that nothing but ignorance of the real state of things in China can explain the infatuated manner in which we appear always to have shrunk from such energetic and determined measures as would long since have ensured the overthrow of the Mantchoo dynasty.

The subject is so interesting, and Mr. Scarth's treatment of it so able, that we may confidently claim the indulgence of our readers while we follow out his chain of reasoning as much as possible in his own words. Mr. Scarth's arguments against supporting the Mantchoo dynasty to the prejudice of the rebels may be concisely classed under two heads—policy, and our moral obligations as Christians. To establish the first, our author directs his efforts to show the rottenness of the Tartar government; how, during long ages of corruption and inactivity its soldiers have degenerated, and the Mantchoo power has gradually lost ground. "The Mantchoo power and prestige met with a heavy blow when the continued successes of the British forces resulted in the forced treaty of Nankin. But even before this there were many secret societies established among the Chinese for the subversion of their foreign rulers. The government officials became more and more corrupt; the weakness and poverty of the government led to the sale of appointments; and when insurrections eventually broke out, the attempt to wipe out the stain of rebellion by the unlimited shedding of blood and reckless destruction of property in disaffected districts, merely gave temporary peace, while it made the spirit of rebellion rise higher in men's hearts, and the opportunity will not be missed in action" (p. 11). Further on Mr. Scarth points to the significant fact that the "Chinese officials under the Tartar dynasty have generally been the most obstinate in negotiations with foreigners; and the Tartar officials when once forced to know the danger in which they are placed, are most ready to accede to the terms proposed, or imposed, by the foreigners. This does not arise from any desire on their part to be friendly, but from being aware of their own weakness and the danger to the Tartar power: continued defeat would be their ruin" (pp. 11-12). When to this we add the consideration that "since October, 1856, we have been more or less engaged in hostilities with the Tartar government—hostilities arising from the frequent and general non-observance on its part of some of the treaty obligations entered into at Nankin some twenty years ago," there is, certainly, some excuse for Mr. Scarth demanding in surprise, if it is not strange that "the efforts of British diplomacy have been directed to uphold the present Tartar dynasty in China!" Let us turn, then, from this corrupt and tottering government, which, "jealous of foreign interference and influence, has invariably opposed the extension of foreign relations, has repelled all peaceful overtures, and even prohibited direct and personal communications with its Court," and make a few inquiries about their opponents—the revolutionists of Kwang-tung.

Respecting this revolution and its objects Mr. Scarth gives us a great deal of very curious and valuable information. "It originated," he tells us, "in an attempt of the Imperial government to suppress a religious sect, the leaders of which were men of the Kwang-tung province." This "religious sect," it is, perhaps, not generally known, was a sect of Christians! Although this fact has been much disputed by M. Huc, and others, the recent personal observations and inquiries of missionaries have now placed it beyond a doubt, and those among our readers who perused the interesting correspondence which appeared in the *Times* upon the subject a little time back, will not be unprepared for the announcement that the creed professed and acted upon by these rebels is substantially the same as our own, distorted, however, by errors which we have never extended a kind or helping hand to correct. "Not only have the Tai-ping insurgents," says Mr. Scarth, "adopted the terms employed by the Protestant missionaries, but they actually teach and proclaim the same Christian religion. They did this from the first, and the latest accounts prove that they do so still" (p. 33).

This marvellous movement, then, is no mere insurrection against the Tartar dynasty, but a revolution in the most extended sense of the word; "not only did the chief aim at the re-establishment of a purely Christian dynasty, and the expulsion of the Mantchoos, but at the same time, he undertook to overthrow idolatry, and proclaimed the worship of the one true God, and salvation by Jesus Christ. The Holy Scriptures, so far as obtained by him, was the text-book, and the Ten Commandments were the laws" (p. 22).

Curiously enough, what will seem to English eyes the highest testimony in favour of the revolutionists has been borne unwittingly by their enemies in an official proclamation, of which Mr. Scarth gives us an extract. This document is so curious, and, at the same time, conveys so favourable an impression of the doctrines and motives of the revolutionists, that it is well worth transcribing. With regard to the rebels it says:—"The line they have taken to delude and unsettle the people has been to style their doctrine that of the Lord of Heaven, to pretend that he is their Heavenly Father. They declare that, though Jesus suffered death as a malefactor, he became the Lord of Heaven, and though he came down (to earth) alive a thousand and some hundred years ago, he is yet the Father of rebels (robbers or criminals). Can you fancy that anyone would make himself Lord of Heaven, which is greater than any? And what creature was this Jesus, that, though dead, he should be invested with the Lordship of Heaven? It is the greatest blasphemy against Heaven. It is the most outrageous rebellion against Heaven," &c. &c. (p. 21).

And this is the worst which the false and unscrupulous Tartar government can find to say of its enemies.

And these are the people against whom, if not directly, we have indirectly given arms and aid to the effete and corrupt government which they seek to depose!

Surely our policy in this matter has been a strange and contradictory one; surely it is surprising that the sympathies of our officials should have inclined towards the tottering heathen power, "which did all it could to prohibit foreign commerce, proclaimed us barbarian devils, with the hearts of dogs and the minds of foxes, made assassination the system of war, and made poison its weapon," rather than towards the Christian revolutionists struggling against cruel tyranny and oppression, and for light in the midst of darkness!

We cannot conclude our remarks upon the subject more fitly than by quoting an extract from the *Athenæum* which Mr. Scarth takes as the text and key-note of his discourse: "It will be a sad day for China, and for the whole world, when the great rebellion, here so sneered at, and so little understood, is put down. Hundreds of thousands have fallen in the cause, but thousands and myriads have stepped forward to supply their place; and it may be that, in spite of foreign opposition and the diabolical cruelties of the Mandarins, the cause of freedom will triumph, and the Tartars be driven from the land they have scourged so long. We trust it may be so. Meantime, let Englishmen open their eyes to what is going on, and see that the proud name of this country be not tarnished by upholding a despotism which even such support cannot long prevent from crumbling into dust."

Our remarks upon Mr. Scarth's little pamphlet have already extended to a much greater length than we had proposed, and we are unable to devote more space to the consideration of this very important and interesting subject. Those who desire further information upon it—who would learn something more of the origin and progress of the Great Rebellion—who would gain a further insight into the mysterious and contradictory state of affairs in the wonderful "celestial empire,"—those, in short, who would arrive at a clear comprehension of the policy which we are pursuing in China, of the manner in which that policy first came to be adopted and has since been adhered to, and of the disastrous results which it is likely to entail, will do well to refer to Mr. Scarth's little book. For ourselves, we may state, that it is long since we have read a pamphlet with greater interest, or one from which we have derived greater instruction. It seems to us, as we lay it down, that there must be something contagious in the Chinese peculiarity of transposing the European order of things, and dealing in inversions, and that the British policy in China has not escaped the infection.

* *Is our War with the Tartars or the Chinese?* By John Scarth, author of "Twelve Years in China: the People, the Rebels, and the Mandarins." (London: Smith, Elder, & Co., 1860.)

WHIRLWINDS AND DUST STORMS OF INDIA.*

All who are desirous of investigating a novel and scientific theory of storms will find the work before us to possess considerable interest, and to be eminently suggestive of thought. Dr. Baddeley's attention was first directed to the subject apparently by a desire to arrive at a satisfactory explanation of the origin of dust storms in India. The ordinary explanation that they arose from conflicting currents of the air, or from the effects of rarefaction, only added, in his opinion to the difficulty of elucidating the question, and consequently for a period of six years he devoted himself by every possible means to throw some additional light on a subject so little understood. This object, the author informs us, he perseveringly prosecuted, often at the risk of being accounted mad, following dust-storms on horseback at mid-day, with notebook and pencil in hand, noting and sketching as he went along; and thus he succeeded in accumulating the large mass of facts upon which he has founded his theory, regarding which, without deciding dogmatically upon its merits, we may say that if it be not true, it is remarkably well constructed.

The dust whirlwinds of India differ considerably both in extent and appearance, varying from a single spiral column of dust, of immense height, whirling tortuously across a plain, to three or four, or any number of such columns, each being rotatory on its own axis, though to the casual observer they may all appear confusedly commingled, rushing over the country with tremendous fierceness and velocity. The whole horizon suddenly becomes blackened by these tornadoes, which rise without any previous warning like a huge black wall out of the ground into the zenith, and burst with surprising fury upon a station or encampment, burying all around in the darkness of night, and threatening with their violence the overthrow or destruction of everything before them. When they rage upon this large scale, they often extend over fifty miles of country before their fury is expended.

Dr. Baddeley's theory is, that "all storms are caused by electrical meteors in the form of cylindrical columns working together in a spiral manner, each possessing rotatory and progressive motions, and emanating from the higher regions of the atmosphere, and traversing the earth's surface." These spiral columns set in motion the air through which they pass, and thus give rise to currents of wind which blow towards the whirling body, and also in its track. As to the nature of these columns, the author can only conjecture that they may possibly be "some modification of matter hitherto unnoticed," or that they are "identical with the electro-magnetic cylindrical beams supposed by the late Dr. Dalton to compose the Aurora." Being transparent, "their existence can only be inferred by the effect produced on matter over which they pass, as in the case of the

* *Whirlwinds and Dust-Storms of India.* An Investigation into the Law of Wind and Revolving Storms at Sea. With an Addendum containing practical Hints on sanitary Measures required for the European Soldier in India. Illustrated by numerous Diagrams and Sketches from Nature, and a Wind Card for the use of Sailors. By P. F. H. Baddeley, Surgeon, Bengal Army, Retired List. (London: Bell & Daldy, 186, Fleet Street.)

Digitized by Google

water-spout and dust whirlwind, which are familiar examples of their effects when moving over water, or a dry sandy soil: but, during a storm, when the whole atmosphere may be filled with dust or aqueous vapour, no marked indication of their existence is perceptible." Dr. Baddeley came to the conclusion in 1847 that dust storms were electrical in their origin, from the fact that during their prevalence, "the atmosphere is so highly charged with electricity that a constant succession of sparks would be given off from an insulated wire for hours together;" and in connection with this point, we have no doubt that many of our readers in India, and those who have been there will recollect the crackling sound that usually accompanied the combing of their hair, which had become electrical after dust-storms. The author therefore concludes that dust-storms probably emanate from the higher regions of the atmosphere, "where a stratum of electro-magnetic beams or spirals may exist, whence, under certain circumstances, they are diverted downwards to the earth, and become the exciting cause of wind in storms, of gusts or squalls, and of wind in general."

The above is but a very brief account of Dr. Baddeley's theory, which he has minutely explained and illustrated so as to be intelligible to the ordinary reader. Taking his electro-magnetic spiral column as a key to the whole system, he considers a diminutive whirlwind to be a miniature representation of a cyclone, with its calm centre devoid of wind, and its tangent currents blowing all around it. Upon one occasion the author followed a dust whirlwind for more than a mile, and at length succeeded in penetrating its centre, in which he remained for a considerable time, in the midst of a calm, while around him the winds were blowing in every direction. We must leave it to the reader by a reference to the work to follow out the points of analogy between the two, which, however, we may state, appear to us to resemble one another very closely.

Dr. Baddeley's book embraces other papers, besides those noticed in the title-page, upon the formation of hailstones, aerolites, and other subjects, as well as a meteorological journal upon which his theory is founded. The suggestions relative to the sanitary condition of European soldiers in India are generally of considerable value, but we are happy to say that some of them have already been carried into effect, while others are now in course of being adopted. The plates and diagrams are well executed, and render many matters of detail, which would otherwise be obscure, perfectly comprehensible. A table of contents and an index, in which the work is wanting, would considerably add to its usefulness, and save not a little unnecessary trouble to the reader. With that exception, we have for Dr. Baddeley's book nothing but praise.

MEDALS OF THE BRITISH ARMY.*

The author of "Curiosities of War" is trying a new experiment in military literature in the publication before us. This publication is, as its name implies, a general history of the medals of the British Army, and the circumstances under which they were gained.

When Mr. Carter first announced his intention, the enterprise appeared to us somewhat hazardous. The very grandeur of the subject makes it an unwieldy one, but delicate withal; and while curious to see how Mr. Carter would acquit himself, we were not, we must confess, over sanguine about his success. The part (No. IV.) which now lies before us, and those which have preceded it, seem, however, to re-assure us on these points in a very satisfactory, practical manner; and by the exercise of some skill and discrimination in the selection of his materials, Mr. Carter is month by month building up a volume which promises, when completed, to prove a valuable addition to our military library.

The work which, as we have indicated, is being published in monthly parts, will consist, the author tells us, of three sections, of about five parts each. The first section, containing the "Crimean Campaign," will be followed by the two remaining portions; "the one comprising the services enumerated in the General Orders of the 1st of June, 1847, and the 12th of February, 1850, from the campaign in Egypt, in 1801, to the battle of Waterloo." This part will very appropriately be dedicated to the late Duke of Richmond. The concluding section will contain the campaigns in India, China, &c.

Each part contains an excellent coloured fac-simile illustration of some particular ribbon and medal, and about thirty pages of letter-press, giving a brief sketch of the principal operations in the campaigns in question, a description of the different medals, and a list of those officers and men to whom they have been awarded, with "notices of regimental and individual acts of heroism." The work will have a peculiar interest for the soldier; and if Mr. Carter completes his undertaking as well as he has commenced it, he may feel sure that his industry will not be thrown away. The illustrations are particularly well done; and we may say of the execution of the work generally that it is worthy of the subject.

* *Medals of the British Army, and How they were Won.* By Thomas Carter, Author of "Curiosities of War" and "Military Studies." First Section—Crimean Campaign. Dedicated by permission to Major-General the Hon. Sir James Yorke Scarlett, K.C.B., Adjutant-General of Her Majesty's Forces. (London: Groombridge & Sons.)

PARIS.

[From our own Correspondent.]

A few months ago there appeared, from the pen of Prince Charles of Prussia, a *brochure*, entitled, "How to Fight the French." Its pages were not overflowing with bombast, but merely contained the opinions of a man who, having well studied his subject, was anxious to see carried out in the Prussian army very considerable reforms. The Prussian government, whose discipline bordered on the ridiculous, have lately determined to allow fuller play to the genius of their soldiers, well assured that hampering the instinct was a losing game. In the *brochure* alluded to, the same system is strongly recommended, and, its adoption, the writer urges, would place the German on an equal footing with the Gaul, whose success in war is more to be attributed to individual talent, than to the talent with which he is led. An anonymous reply to this pamphlet has just been issued from the busy press of M. Dentu, with the title, "Why the Art of Fighting the French is not the Way to beat them." The style of this reply, if reply it can be called, is not very brilliant; it, nevertheless, contains several remarks worthy of notice, and it also attacks two French systems—the system of the staff and the system of attacking in column, now that artillery has been so greatly improved. Prince Frederick remarks that everything is left to the generals, who, in their turn, leave everything to the intelligence of the soldier. "In our eyes," he continues, "nothing could be poorer than their manœuvres, which provoke among the French neither praise nor blame. The chief who has just commanded, no matter how unintelligent he has shown himself, retires with the naïve idea of his own infallibility." The French writer in reply to this does not undertake the defence of the Emperor, but strikes off into an eulogium of the military schools; and, indeed, in another part of this *brochure*, when alluding to the tactics in Italy, he states, of course with regret, that many officers were of the same opinion as Prince Frederick with regard to the manner in which the late campaign was conducted.

Upon the grand principle in question both Prince Frederick and the Frenchman agree. *L'idée Napoléonienne*, says the latter, is not to shackle the instinct of the soldier, but to direct it. "The evil," adds he, "which attaches to all our military theories, is that of multiplying movements without indicating for what purpose they are intended. Thus, an officer is instructed to form his company in such and such a manner, but he is seldom told the reason of such formation. . . . . .It often happens that troops are ordered to charge in a wrong formation; for instance, columns against artillery, or in line, when they should charge in masses. In the first case, the instinct of our soldiers leads them to disband and throw themselves at once on the enemy's flank, and, in the second, to mass themselves in order to break his formation. However, the officer imbued with what he has learned in a camp, naturally hesitates between his inspiration and *leserrements* of theory. The least hesitation in such a case is fatal. The officer carried away by the dash of his troops, instead of leading, is borne along with them, and finds himself reduced merely to fight. Instead of that, if the exercises of peace taught him to foresee the eventualities of war, far from awaiting an impulsion he would give one, and then the disorder being organised, would only exist in appearance. Whence comes the superiority in our campaign of those officers commonly called 'Africans?' From the pious care which they take to deposit in passing all their theories at the bottom of the Mediterranean. Thus, left to the resources of their own intelligence, they depend upon that intelligence, and always carrying with them the veritable instinct of the soldier, it naturally happens that where other officers who have not seen service, hesitate, their decision is at once taken. Prince Frederick asks himself the following question:—"What will be the fate of Prussia in a war with France?" and he answers it very satisfactorily for himself thus:—"We can conquer, and we shall certainly conquer, if we can throw off in time of war the routine of the parade ground, and change our system of tirailleurs." The French writer remarks that it is not sufficient to know what to do, and that nothing will change the nature of the Prussians—that art may for a time supersede nature, but that it never can be brought to such perfection as to meet sudden emergencies—that nothing will prevent the German from firing on the enemy instead of charging without hesitation—and, in fact, that no amount of teaching will make him, like the Frenchman, an instinctive soldier.

The French *brochure* terminates thus:—"At the end of the Crimean campaign the English, copying our *tactique*, perfected it to a remarkable degree. On parade their soldiers ran incomparably better than ours, overcame obstacles, and surpassed us in all bodily exercises; but once in presence of the enemy, every obstacle which they could not overcome in a proper manner checked them, because it never occurred to them to turn it. We have not yet had the pleasure of seeing the Prussians at work, but, to judge from appearances, we may be allowed to suppose that they resemble more the English than the French."

The *Progrès de Lyon* states that the reports of the marshals on the army of reserve have within the last few days reached government; and adds that this question, which has long occupied the first military authorities, and on which General Preval, Marshal Duc de Bellune, General Oudinot, and many others have written, is about to receive a solution which will enable the army to be augmented in time of war, and reduced in time of peace.

Le Moniteur de la Flotte thus pronounces on the Armstrong gun:—"Most of our journals have reproduced passages of a correspondence from China, published by the *Times*, on the subject of the Armstrong gun. The correspondent of the English journal after having spoken of the excellence of our matériel, and praised and spoken in high terms of the valour of our officers, thus expresses himself:—'It is not their fault if the Armstrong gun carries better, is lighter, of longer range, and more destructive;' and—'the Armstrong gun is evidently the best arm that has ever been employed in war.' Public opinion might busy itself with these assertions to which we think it our duty to reply. When the attention of Europe was awakened by the superiority which our guns exhibited in Italy and Kabylia, every power desired to have its 'canon rayé.' In the general movement England was not behind-hand, but gave birth to the Armstrong. The commission of officers appointed to report upon it, reported in its favour. This gun was adopted by the English Government, and is now making the campaign of China."

A minute description of the gun and its projectiles follows, and then M. Haridon gives us his opinion of the relative merits of the French and English pieces. "We cannot but admire this system as an invention, but it appears to us of a construction and so difficult to employ as to be little fitted for an engine of war. The Armstrong gun, besides a host of complications, has to be cleaned after every ten shots on account of the lead melting and remaining in the grooves. The canon rayé offers none of the objections applicable to the English piece. It seldom requires to be cleaned, and when it does it is cleaned without difficulty. At Solferino several guns fired as many as 300 rounds without being touched. With regard to range and accuracy, all the letters which we receive from China are unanimous in establishing an equality, if not a superiority in favour of the French gun. At Chalons the following results were given by our canon rayé. A wooden construction, 50 metres wide and 75 metres long, representing the ground covered by a battalion in columns of companies, was erected, and a canon rayé was brought to bear upon it. At between 1800 and 2000 metres in 150 rounds, 120, and 110 frequently struck the object. At 2500 the projectile buried itself. At 1800 it ricocheted, making a bound of 900 metres. At 2700 and at 3000 the results differed little from those which we have already given. The English projectile is more powerful than ours. In effect it weighs 11½ lb., ours only 8 lb."

Another grave fault which M. Haridon finds with the Armstrong is its weight, and the weight of the caisson and carriage, and he asks if in modern warfare, where so much should be sacrificed to lightness and mobility, a powerful projectile sufficiently compensates for other drawbacks. "We have now been able to judge of the two systems at the taking of Peiho. The artillery were in front. Ours, commanded by Colonel De Bentzman, opened fire at 1800 metres, and continued advancing by demi-battery. This manœuvre demands a certain regularity of execution. Each demi-battery in its turn leaves its fire, and advances. To execute this manœuvre well, there should not be too many obstacles in the way, or at least be light enough not to be stopped. From all the accounts we have received, it appears that this movement was operated without great difficulty. Our pieces were drawn by four Japan ponies, which, notwithstanding the great difficulties of the ground, were sufficient for every purpose. Our men, as the *Times'* correspondent said, were up to their ankles in water. It was, however, different with the Armstrong guns, which, although drawn by eight large horses, could only be pulled out of the mud with the aid of ropes attached to them. The English projectile is more powerful than ours, but this advantage is more than balanced by the lightness and mobility of our material, which thus answers one of the most important conditions required from artillery during a campaign. The canon rayé in the actual state of science answers every purpose to be wished for in a cannon intended for campaigning, and at present it has a real superiority over every other known gun."

The Minister of Marine has given orders for an iron-cased frigate, and two steam transports of 400 horse-power, to be placed on the stocks at Rochefort. The Algesiras, Rear-Admiral Paris, and La Gloire, having on board Rear-Admiral Lacapelle, sailed on Sunday on a trial trip, which is to last five days. It is proposed to divide the coast of France into two grand commands under two admirals—one command being for the Ocean, the other for the Mediterranean. The *Toulonnais* states that Rear-Admiral Labrousse has been appointed Inspector-General of Machinery for the fleet. This officer will visit all the steamers afloat in the harbours of France, no matter what their dimensions, and will be empowered to order such changes or modifications as he deems fit.

The *Constitutionnel*, but yesterday, whilst it admitted the formation of a 4th battalion of reserve for each regiment, maintained that it would be a mere matter of form, involving no increase to the army. Now, the fact is, that it will increase the army by 80,000 men. Moreover, the 20 battalions of chasseurs à pied are to be raised to 30, and each battalion from 800 to 1000 men. Despite the assertion of the same official journal, these "modifications," will make a very considerable addition to the army. The Emperor has sent forth his fiat from amongst the pheasants at Compiègne, that these matters of form shall be adjusted before the meeting of the Corps Legislatif.

P.S. It may perhaps also interest you to know that there are to be great alterations in the *intendance* of the army. The military tailors and shoemakers attached to each regiment are also to be suppressed, and the troops are to be soled, heeled, repaired, and mended by private contract.

The Late Admiral Sir Charles Napier, K.C.B.—The following letter has been addressed, by an order of the Portuguese Government, to the only daughter of the late Admiral Sir Charles Napier. It will show the high esteem entertained for the memory of the gallant deceased by His Majesty the King of Portugal:—"London, November 23. Madam,—His Majesty the King of Portugal, my august Sovereign, has ordered me to express to you, in his Royal name, the profound grief which His Majesty felt at the news of the decease of the illustrious and brave Admiral Sir Charles Napier, Count of Cape St. Vincent. His Most Faithful Majesty, wishing, moreover, to give a public and extraordinary testimony of the high consideration in which he held the important services rendered to the cause of the legitimate throne and of the constitutional institutions of Portugal by the said brave Admiral, Count of Cape St. Vincent, had ordered the Portuguese Royal Navy to go into mourning for three days. I request you will please to communicate these determinations of His Most Faithful Majesty to the whole of your family, and you may also publish them if you think proper. Having fulfilled the orders of my Royal Sovereign, permit me, madam, to avail myself of this opportunity to repeat the expression of my grief, and the assurance of the respectful consideration, with which I have the honour to be, madam, your most obedient humble servant, — Lavradio."

INTELLIGENCE FROM THE SEAT OF WAR IN ITALY.

[From Our Own Correspondent].

Naples, 24th November.—The future of Naples, though she descend from a capital to a provincial city, promises fairly. Already the whole kingdom, if not actually doing much towards reform is, at all events, sentient of a new life, and ready to move in obedience to the will of a paternal Government. The King has been setting a good example, by granting from his private purse the sum of 200,000 francs, for the purpose of educating the poor as well as in other ways benefiting them. In furtherance of this object, a decree has appeared which announces that four evening schools for the instruction of the adult of the poorer classes will be opened in January next, wherein this portion of the population, so long neglected, will be gratuitously taught reading, writing, arithmetic, &c., as well as their civil and religious duties. And for the support of these, 40,000 francs are allotted from the above-named sum. Asylums for the poor and a savings bank have also been established by decree; and these are the principal of the administrative acts of Government. The news from Gaeta did not, during the week, present to the volatile people of Naples half the attraction afforded by the fact that fine weather had at last permitted the coming off of the illumination. The generals and battles had been "coming off," in another sense, from the triumphal arches, owing to the torrents of rain that had fallen since the transparencies were put up. At length, on Monday and Tuesday, the fine weather permitted a successful attempt, the lamps were lighted, the fireworks went off all right, and the minds of all must have been very considerably relieved. But after the fullest allowance for all the unfavourable circumstances, the late illumination could not be compared with that which greeted the arrival of Garibaldi, either in brilliancy or universality. The popularity of Garibaldi is as great as ever at Naples, and the papers are all advocating the presentation of a national gift to the common benefactor. The origin of this highly creditable suggestion is due to Genoa, where a committee has been already formed and measures taken for carrying it out. The great difficulty, in my opinion, will be in inducing Garibaldi to accept of any present of value. The only decoration he consents to wear is the Star to be presented by the survivors of the original expedition that landed at Marsala, and a deputation of six officers will leave Naples for Caprera almost immediately to wait upon their victorious leader and present him with the gifts they have prepared. The King, meanwhile, has been visiting the jails, poor's houses, &c., thus evidencing a regard for the welfare of the less fortunate of his new subjects. The review of troops and National Guards by the King, fixed for Monday, was, through uncertainty of weather, put off till the following day, and fortunate it was, as nothing could be finer than the weather was on Tuesday. The sun shone brightly, the sky was clear, and the air milder than usual, so that one-half of Naples was able to repair to the scene of the review, and the other half to crowd the balconies and streets. The King, followed by a numerous and brilliant staff, all well mounted, left the Royal Palace at about 10 a.m., passing through the Strada Toledo, Strada Costantinopoli and Foria, was accompanied by a multitude composed of townspeople as well as peasants, all of whom had been on the watch for the state of the procession. The King reached the review-ground at 11 a.m., and was enthusiastically received by the troops and National Guards who had already preceded him thither. The National Guards, who were drawn up four deep, being twelve battalions strong, stretched across the whole length of the plain, and looked remarkably well. The King rode along their line, and expressed much pleasure at the soldier-like appearance of this force, notwithstanding the short time it has been embodied. He then reviewed the troops of his own army, and having by the time this was completed reached the boundary of the plain, he took up a position there, and remained whilst the troops and guards defiled before him. Meantime, the Strada Toledo presented a gayer appearance than ever in expectation of the return of Victor Emmanuel, and every banner, handkerchiefs, and even silk bed-covers, as well as bright-coloured hearthrugs, were displayed from all the balconies on either side. To the disappointment of a great many, however, the King entered the city by a different route, and so gave others of his subjects an opportunity of seeing him, a condescension that the papers already begin to complain of his being chary of. It has been determined to increase the national army by 24 new regiments of Infantry, so as to raise the whole number to 80, exclusive of the new regiments of Grenadiers. The 27 battalions of Bersaglieri are to be raised to 60. The 2 regiments of Sappers to be raised to 4. The Corps of Royal Carabineers will be raised to 12 regiments, forming altogether about 24,000 men. The Cavalry is to be augmented to 30 regiments, and the Artillery to 16. As soon as the proclamation of the King has been made in Naples and Sicily the Marches and Umbria, there will be a simultaneous levy of men made in all four regions, and in the last mentioned three levies are spoken of.

Palermo is declared to be in readiness to receive the King, the garlands, triumphal arches, banners, &c., have all been prepared, and are described as very magnificent. Palermo has always been noted for its illuminations, fireworks, and such like, and much is in consequence expected from it. Liberty of conscience has already dawned upon Sicily, as may be seen by the following extracts from the official journal of the 16th inst., publishing a decree declaring "The Royal authorisation to the Bull Etsi-pastoralis of Benedict XIV. to be nul and void, and that it ceases to be in force (avere vigore) in Sicily. The Greco-Albanesi, who have distinguished themselves in the Island in every contest against tyranny, will enjoy every liberty for the full exercise of divine worship after the orthodox Eastern ritual." The Greek Church will, in consequence of this decree, be in a much better position than it has ever been before—a freedom it never would have enjoyed under Bourbon sway. Victor Emmanuel gave a splendid dinner on Wednesday evening to some sixty distinguished guests, amongst whom were the heads of the different departments of the Government. A British Flag Captain (the Admiral had the honour of being invited, but was prevented by indisposition from being present), and the senior American naval officer, Captain Palmer, were among one of the guests. The King was most courteous and affable to all, and did the honours of host in a manner worthy of him, and without any of the stiffness and reserve supposed to be inseparable from Royal banquets.

The news from Gaeta still reports the struggle as continuing, but, of course, becoming more desperate on the Bourbon side. On Tuesday last a number of the troops, no longer able to support their hard lot, laid down their arms, and were subsequently sent to Naples. All the heights around Gaeta are occupied by Piedmontese troops, and every communication has been interrupted. As far as the land is concerned, supplies are at an end. The French squadron, consisting of the Bretagne (Flag-ship), Alexandre, Redoubtable, S. Louis, Imperial and Prony, is still at Gaeta, as are also two Spanish ships. It is said that the valuable property of the Royal family is being daily embarked on board the last-mentioned; these, with a Prussian man-of-war, form the whole neutral naval force. A report reached Naples, on Thursday evening, to the effect that the King Francis had burst a bloodvessel, and that a doctor was sent for to Naples in consequence; the fact, however, that the Mouette, French dispatch boat, came in yesterday morning from Gaeta, and knows nothing of the king's illness, tends to throw great doubt upon the report. According to the Mouette's account, the queen-mother has left Gaeta, but the young queen is still there. The bombardment is not expected to commence sooner than eight days hence. The private Secretary (Signore Beusc) of the Minister of War leaves Naples to-day at 2 p.m. for Palermo, to announce the proximation of the King's arrival. Operatives are busily employed in removing the decorations, triumphal arches, &c., which, however ornamental, are now a great obstruction in the thoroughfares.

The British Volunteers are pretty much "in statu quo;" they are still at Caserta, and number including sick some 580, so that there is still a goodly show as far as numbers go. What the Italian government intends to do with them has not been made public as yet; meanwhile the officers are well satisfied with the pay they receive, and I am not aware of any just cause of complaint on the part of the men. The internal state of the corps is pretty much as reported in my last letter, and seven officers have been put under arrest: it is said they are the seven seniors of those officers who signed the letter calling on Colonel Peard to resign the command. In addition to these, Major Styles is again under arrest for trial before a military tribunal (Sardinian). His reputed offence is, his having assembled all the sergeants of the corps and endeavoured to induce them to form an independent corps of some three hundred men, who choosing their own officers, would then be in a good position to treat with the Italian War Minister as to their future services and destination. If the report be true, I am inclined to think he will meet with rather severe punishment for what will be regarded as a very grave offence in the eyes of a military tribunal. It is said Major Smelt is to be raised to the rank of Lieutenant-Colonel, and his cards have not been the easiest to play since his appointment; he has been virtually the commanding officer of the volunteers for some time past, as Colonel Peard has not been at Caserta for a long time; it is said the latter would have resigned the command ere this, but for the receipt of what he considered a mutinous letter from his officers requiring him to do so. A chaplain to the corps is now here, whose presence is a great boon to the sick, as well as to the others; but I do not think the appointment of Mr. Hirsch, the gentleman in question, is permanent. The ladies of Naples having now completed the regimental colours they worked for the British volunteers, they are to be presented next week, and I shall duly report it. Colonel Dowling, an Englishman, who was in command of the field artillery of Garibaldi, and who has constantly done such good service, has been made a colonel in the Sardinian army, and been presented with two orders by the King of Italy; one is said to have been taken from the King's own breast by his Majesty, and pinned by his own hands upon the breast of Colonel Dowling. All who know the gallant colonel are pleased to hear of his good fortune, as he is a brave, unassuming fine fellow, and one of the good specimens of Englishmen who, like Colonel Dunn, Major Windham, Lieutenant Walker, and others, have served the Italian cause through good repute and ill repute, and will all, I hope, be justly rewarded. The swashbuckler gentlemen, I am happy to say, have disappeared, or which is nearly the same, if seen in the cafés, are in plain clothes. Lord Seymour has thrown over Captain Sarsfield, and has let the corps.

THE WAR IN CHINA.

The following is a consecutive detail of the events in China, from the departure of the previous mail up to the dispatch of that which reached London this week. We add two dispatches from Sir J. Hope Grant, as well as the official list of casualties on the two occasions on which our troops encountered the enemy. In our last we reported the capture of the Peiho forts, and that the Chinese appeared willing to treat with the Allied Ministers at Tien-tsin. It appears now that although the Chinese Commissioner Kweiliang, duly accepting all our terms, agreed to sign a convention, he declared on the expiration of the stipulated period of 14 days that sufficient powers had not been intrusted to him to warrant his entering upon such a step. On this being known, a portion of the allied armies was ordered to march up, and they accordingly began their march on the 9th ult. Shortly after leaving Tien-tsin the Chinese again made professions of peace, and evinced such a hearty desire to come to terms that Lord Elgin dispatched Messrs. Parkes and Wade to Tangchow to meet certain commissioners who had been appointed to treat with them at that place. These gentlemen returned stating that all was right, and that it had been agreed that the allied troops should advance within four miles of Tangchow, while Lord Elgin with an escort should enter the town and there sign a convention. On the 17th ult. Mr. Parkes returned again under a flag of truce to Tangchow to make the necessary final arrangements and on this occasion was accompanied by three officers, and Messrs. Loch (Lord Elgin's Secretary), Bowlby (the *Times* Correspondent), and De Norman, also an escort of 17 sowars and four of the King's Dragoon Guards. The vanguard of the allies, according to the terms of the agreement followed on the 18th ult., but on arriving at the appointed halting-place found a body of 30,000 Tartars occupying a position about four miles in extent drawn up to oppose their further progress. Mr. Parkes with his escort had in the meanwhile proceeded to Tangchow, and after having been greeted courteously by the commissioners and had their demands acceded to they took their departure for their own camp. Much to their surprise, the whole Tartar army was found to have been drawn up so as to completely cut off their retreat. Mr. Parkes returned to seek redress from the commissioners for the violation of the flag of truce, leaving only Colonel Walker and the four Dragoon Guards in the lines of the enemy to await his return. For a short space of time the Tartars evinced great civility to Colonel Walker and his men, but on their growing more insolent every moment the Colonel gave orders to his men to make their escape; they accordingly charged right through the enemy, and, though exposed to a heavy fire, managed to do so, one being wounded, and Mr. Thompson being hit by a spear. On the 18th the allied forces, amounting to about 4200 men and 21 guns, attacked the Tartar forces, and after a two hours' fight succeeded in driving them away with a loss of 600 to 700 killed and 75 guns. The loss on the part of the Allies amounted to 19 wounded. On the 21st the latter, strengthened by an addition of 2000 French and 12 guns, advanced two miles beyond Tangchow, and came upon a greater force of Tartars about nine miles from Pekin. A battle took place in the morning; camp after camp was taken from the enemy, until at last they retired with a loss of 33 guns and 1200 killed. The English loss was two killed and 29 wounded. On the 22nd the allied forces were encamped about six or seven miles from Pekin, and were only awaiting the arrival of the heavy guns to breach the walls. A flag of truce had been sent in, but Lord Elgin refused to entertain any proposals until the prisoners had been delivered up. A communication had been received from Mr. Parkes, stating that himself and his brother captives—consisting of Messrs. De Norman, Loch, Bowlby, Anderson, Captain Brabazon, with two French officers, six French soldiers, and 17 sowars—had been well treated, and were lodged at Pekin.

OFFICIAL DISPATCHES.

Headquarters, Chang-tsai-wan, Sept. 20, 1860.

Sir,—I have the honour to report that I left Tien-tsin on the 9th inst., with 700 infantry, 600 cavalry, and two batteries of artillery; 3000 French troops followed, one march behind me; and two days later Sir John Michel marched, with a regiment of cavalry, a 9-pounder battery, and the 2nd Infantry Brigade.

On the 13th instant I reached Hooseiwoo, 40 miles from Tien-tsin, and as several letters had been received by Lord Elgin from some fresh commissioners of high rank, I halted whilst Messrs. Parkes and Wade went on to meet them at Tangchow, 25 miles distant. On the 15th these gentlemen returned, having made satisfactory arrangements with the Chinese commissioners, by which it was agreed that the allied forces should halt at Chang-tsai-wan, five miles short of Tangchow, to which place the ambassadors should advance with an escort, and sign the convention. On the 16th Sir J. Michel's force arrived, and on the 17th, we encamped at Matow, five miles short of Chang-tsai-wan. The forces consisted of Lieutenant-Colonel Barry's Armstrong battery, Captain Desborough's 9-pounders, Captain Stirling's 6-pounder battery, the cavalry brigade, and the 2nd and 4th infantry brigades; and 1200 French, with a light battery. From the above, however, three 6-pounders and the 60th Rifles had been left at Hooseiwoo, to hold that place, where I have a depot.

Mr. Parkes rode on to Tangchow to arrange matters for Lord Elgin's reception, and to make sure of the agreement as to our advance, that a collision might not take place by inadvertence, it having been settled that the Chinese army should fall back upon Chang-tsai-wan. Mr. Parkes was accompanied by an escort of Fane's Horse, under Lieutenant Anderson, and by Mr. Loch, private secretary to Lord Elgin. On my part I sent Lieutenant-Colonel Walker, A.Q.M.G., to fix the site of our camp with the Chinese authorities, and the D.A.C. G. Thompson to receive the promised supplies for the force.

At daybreak on the 18th I marched, and after going about four miles, I came in sight of a very large force of Chinese, both cavalry and infantry. Whilst halting to form up my force, Mr. Loch galloped in with three sowars, and informed me that, on going into Tangchow, the previous day, they had found everything quiet on the road; the commissioners had agreed to all Mr. Parkes' arrangements; and that, accordingly, leaving Lieutenant Anderson and his sowars at Tangchow, Messrs. Parkes, Loch, Thompson, and Lieutenant-Colonel Walker, with five men of the King's Dragoon Guards had come out to meet us, and show us our camping ground, which was a mile and a half south of Chang-tsai-wan.

On arrival at that spot, however, they found it occupied by a large Chinese army, whilst batteries had been hastily thrown up and armed, so as to flank the proposed site of our camp. From the commanding officer Mr. Parkes could obtain no satisfaction, so he started back to Tangchow with an orderly of the King's Dragoon Guards, to see the High Commissioner and ask the reason of this move. Mr. Loch came on to tell me of this, and Colonel Walker and Deputy Assistant-Commissary-General Thompson remained on the ground with four men of the King's Dragoon Guards and one sowar, where they were to await Mr. Parkes' return.

It was only now that I learnt that Mr. De Norman, Attaché to Her Majesty's Legation, and Mr Bowlby, correspondent of the *Times* newspaper, had gone to Tangchow with Mr. Parkes and remained there with Lieut. Anderson.

Mr. Loch volunteered to return with any orders, and Captain Brabazon, Deputy-Assistant-Quartermaster-General, R.A., volunteered to accompany him.

They accordingly started under a flag of truce, for Tangchow, with my orders for Mr. Parkes and the whole party to return at once to head-quarters.

Meanwhile the Chinese cavalry advanced in great numbers on both flanks, and their infantry poured down on our right front, which was enclosed ground and carefully entrenched. I was extremely anxious not to engage, for fear of compromising our officers, who were in their lines. I therefore covered both my flanks with cavalry and ordered the baggage to be hastened on, and massed on a village in our rear, where it could be defended by a small force. This latter operation

Digitized by Google

occupied nearly two hours, during which time the enemy's cavalry had almost entirely surrounded our forces. Sufficient time had elapsed for all of our party to return from Tang-chow, and I became anxious for their safety, when suddenly a commotion appeared in the enemy's line. The guns and matchlock men in their centre opened fire, and Colonel Walker's party dashed out of the midst of their ranks. Colonel Walker reported that, whilst waiting for Mr. Parkes, a French officer joined him, who was suddenly set upon and cut down by a Chinese soldier, and, on his riding up to prevent his being murdered, his own sword was snatched from his scabbard, and some men tried to throw him off his horse. Seeing that it was a deliberate attempt to assassinate the whole of them, Colonel Walker set spurs to his horse and galloped out with his party under the fire of the Chinese line. One of his men was wounded, and one horse; Mr. Thompson received a spear thrust in his back, but they fortunately managed to reach our lines, their wounds not being severe. It was now useless to wait longer, and the attack was immediately formed. General de Montauban advanced to turn their left, and with him I sent a squadron of Fane's Horse, under Lieutenant Cattley. On the centre the 9-pounder battery opened, supported by a squadron of King's Dragoon Guards, and part of the 99th Regiment advanced up the road.

The Armstrong battery with the 15th Punjaub Infantry took ground to the left, whilst Sir John Michel, with the 1st Sikh Cavalry, three 6-pounder guns, and the 2nd (Queen's), made a wide flank movement on the extreme left, so as to turn the right of the enemy.

The action commenced simultaneously on all points, and it was now apparent that the Chinese had carefully prepared a very treacherous reception for our forces. An entrenchment, skilfully concealed by natural obstacles, extended on our right and left for several miles, and was armed with numerous guns.

Their cavalry hovered in large masses on our entire left flank, so that Sir J. Michel was unable to perform the flank movement that had been intended until the 1st Sikh Cavalry had, by a brilliant charge, discomfited the Tartar Horse, and his force, advancing, had driven them back for some miles. Finding his position to be such, I caused the Armstrong battery and the 15th Punjaub Infanty to take ground still more to the left, and with them I turned the right of the enemy's entrenchment, who thereupon fled with considerable precipitancy. I then sent the Armstrong guns and the reserve cavalry to join Sir J. Michel, who, after making a circuit of six or seven miles, joined me in front of Chang-tsai-wan at a later hour. Meanwhile the French had turned the left by a very extended sweep, and were advancing steadily up, capturing many guns, whilst the 99th, with the 9-pound battery, joined me in the centre of the enemy's position. The 15th Punjaub Infantry pushing on with much spirit, captured several guns in the act of retiring, and eventually advanced through Chang-tsai-wan, taking several large camps on the outside. Here my force halted. The French being much exhausted by their extensive movement, had halted on the Chinese position.

The enormous extent of country covered by the enemy, who showed more than 20,000 men, did not permit me to use my force with as good effect as I might have done, as it was too small to allow of its being scattered. The loss of the enemy is estimated at 600 killed, whilst 75 guns fell into our hands.

The French force encountered chiefly infantry, who, on being driven back, were charged most gallantly by Lieutenant Cattley's squadron, of whose conduct General de Montauban has written to me in the very highest terms.

The conduct of the rest of the troops was also most excellent; and I would more particularly mention the 15th Punjaub Infantry, commanded by Lieutenant Randall, who, under my personal observation, advanced with great steadiness, and kept their position to the front throughout the day.

Mr. Wade went yesterday to Tangchow to try and gather tidings of Mr. Parkes' party, but the prefect denied all knowledge concerning them. A Chinaman, however, was brought in to-day, who states that he heard that upwards of twenty foreigners went after the fight to Pekin. If this is true, we have every reason to hope for their ultimate safety.

I was compelled to leave a good force at Tien-tsin, lest the sudden withdrawal of so many troops should allow a disturbance to arise there. This in effect took place, but being judiciously met by Sir R. Napier, everything is again quiet there, and I have directed that officer to join me with two regiments of infantry, leaving two and a half regiments with two batteries of artillery, under Brigadier Staveley, at Tien-tsin.—I have, &c., (Signed) J. HOPE GRANT,
Lieutenant-General, Commander of the Forces.

The Right Hon. the Secretary of State for War, &c.

Head-quarters, Camp near Tangchow, Sept. 22, 1860.

Sir,—I have the honour to report that after the action of the 18th instant I remained in Chang-tsai-wan for two days, during which time the 1500 French troops left at Hooseiwoo joined us, and some convoys arrived in camp, together with intelligence of a flotilla of junks coming up the Peiho with further supplies. From reconnoissances on the 19th and 20th we had ascertained that the Chinese army was encamped in very large numbers about four miles off, on the road between Tangchow and Pekin, and on both sides of the canal which runs from the Peiho to the latter city.

At daybreak on the 21st I marched from Chang-tsai-wan, and parking the baggage in a village two miles in front, I was there joined by the French, who advanced on the right. Soon after passing Tangchow the French troops got under fire of the Chinese works thrown up to protect a fine bridge crossing the canal, and on the Imperial high road to Pekin. At this point the enemy's infantry appeared in considerable force. On the left the Tartar cavalry showed in large masses, and advanced rapidly until within 200 yards of our guns, which, hastily unlimbering, drove them off with a fire of canister, assisted by skirmishers thrown forward from the 2nd (Queen's). The Cavalry Brigade, which I had kept échelonned away on the left to guard that flank, was now moving up, and the enemy's cavalry driven away from the right by our fire, hung in large masses on our left front, affording an excellent opportunity for our cavalry to charge, which they promptly seized, the King's Dragoon Guards, under Lieut.-Colonel Sayer, in particular, inflicting a very heavy loss on the enemy. On the left Fane's Horse charged a similar body with great gallantry, whilst the 1st Sikh Cavalry, under Major Probyn, supporting Fane's Horse, effectually turned the right of the Chinese army.

The enemy, though defeated on the spot, yet still remained in front, in clouds of horsemen, who, though constantly retiring from the advance of any party of our cavalry, however small, never allowed more than 1000 yards to intervene between us, and showed a steady and threatening front. At this time I had with me the cavalry, the 4th infantry brigade, and three Armstrong guns; the rest of the artillery, with the 2nd brigade, having been left in the centre, with directions to feel the French left. With the three Armstrong guns, under Captain Rowley, we fired occasional single shots on their thickest masses. These shots, fired singly, at slow intervals, served admirably to illustrate the good qualities of the Armstrong gun; not one failed to strike the thick masses of the enemy, at once dispersing them from the spot.

Thus advancing, the cavalry was brought to a check by the fire of a camp, which was taken by the 99th Regiment, under Major Dowbiggin, and which proved to be the head-quarters of some of the imperial princes. This, with several others in the neighbourhood, was burnt by our troops, and the Chinese army retired upon Pekin.

We then rejoined our right, which had kept in line with the French, who had carried the bridge, inflicting much loss on the enemy.

Forty-three guns were taken during the action, and the loss of the Chinese was very severe. On the right and left were their heaviest losses, but all along the centre small groups of dead showed the effect of the artillery fire, which had followed their movements, till they finally retreated. Our loss is two killed and 29 wounded—chiefly slightly.

I should wish most particularly to bring to notice the very excellent service of the King's Dragoon Guards. The country is extremely unfavourable for cavalry at present, partly from the number of ditches, and partly on account of the crops of maise and millet having been recently cut, leaving sharp-pointed stubble, most injurious to horses, and rendering their rapid movement very difficult; their charge was however most effective, and they surmounted these obstacles in a most creditable manner.—I have, &c.

(Signed) J. HOPE GRANT,
Commander of the Forces.

The Right Hon. the Secretary of State for War, &c.

CASUALTIES.

September 18.

WOUNDED.—1st King's Dragoon Guards: Private John Collingwood, gun shot wound left thigh, severely; Trumpeter James Phillips, gun shot wound left leg, slightly. Probyn's Horse: Ressaldar Acoope Sing, arrow wound, slightly; Kote Duffadar Fuze Kan, slightly; Duffadar Pestah Sing, matchlock ball, slightly; Duffadar Sunt Sing, slightly; Sowar Mik Sing, matchlock ball, severely; Sowar Seewund Sing, slightly. Fane's Horse: Kote Duffadar Jowahir Sing, bullet in abdomen, dangerously; Duffadar Surroop Sing, bullet in leg, slightly; Duffadar Duswund A. Sing, bullet in wrist, slightly; Lance Duffadar Sundal Khan, spear wound, head, slightly; Sowar Low Sing, breast, slightly; Sowar Jhunda Sing, bullet wound, arm, severely. 1st Battalion Military Train: Captain W. R. Goodall, contusion of right shoulder by large gingall ball, severely. 15th Punjaub Infantry: Naick Jeewunb Sing, face and neck burnt by explosion of gunpowder, slightly; Sepoy Sawun Sing, struck on chest by round shot, dangerously (since dead); Sepoy Kaser Sing, left fore arm broke by round shot, severely; Sepoy Peshaura Sing, bullet in right thigh; one missing, name not ascertained. Total, 20.

FRED. STEPHENSON, Deputy Adjutant-General.

September, 21.

KILLED.—1st King's Dragoon Guards: Private John Webster. 1st Sikh Cavalry: Sowar Ahmud Khan.

WOUNDED.—1st King's Dragoon Guards: Captain E. Bradbury, severely; Private J. Davis, severely; Private C. Napier, severely; Private H. Pollett, slightly; Private D. Lawance, slightly; Private G. Mason, slightly; Private F. Hughes, slightly; Private H. Duckett, slightly. Fane's Horse: Lieutenant Luard, slightly; Duffadar Purja Sing, slightly; Duffadar Ameer Bey, slightly; Duffadar Khornal Sing, slightly; Sowar Buygorl Khan, slightly; Sowar Dad Mahomed, slightly; Sowar Luchmur Sing, slightly; Sowar Meer Sing, slightly; Sowar Shaik Buthoo, slightly; Sowar Mungloo Sing, severely; Sowar Mauban Khan, slightly; Sowar Utter Chund, slightly; Sowar Umsulla Khan, slightly; Sowar Lookman Khan, slightly. 2nd Queen's: Colour-Sergeant John Roberts, severely. 15th Punjaub Infantry: Lieutenant G. A. A. Baker, slightly; Subadar Kurruck Sing, slightly; Sepoy Narain Sing, dangerously; Sepoy Chundar Sing, severely; Sepoy Sahib Sing, slightly; Bugler Allah Sing, slightly.

Total.—Killed, 2; wounded, 29.

FRED. STEPHENSON, Deputy Adjutant-General.

The colonelcy of the 13th Light Dragoons, vacant by the death of General Lygon, has, as we anticipated in our last number, been filled by the appointment of General Maclean, who for many years served in the regiment. General Beckwith has succeeded General Maclean in the Colonelcy of the 14th Light Dragoons. General Marten gets the Inniskillings.

Of course any attempt to force the entrance of the harbour would involve the enemy in running the gauntlet between the fort on the Spit Sand and Southsea Castle, distant just half a mile from each other, whilst the whole of his passage down the narrow channel, which leads to the mouth of the harbour, must be effected under a perfect storm of shot and shell from the southern portion of the Portsmouth lines, as well as from Point Battery, Block House Fort, Fort Monckton, and such guns both of the Spit Sand Fort and Southsea as bear towards the harbour, and in the very thickest of this fire he would find himself brought up by a chain across the harbour mouth, which had been quietly reposing at the bottom like its more delicate neighbours belonging to the floating bridge, but was hauled up by capstans on each side as soon as he was descried in the offing.—*Once a Week.*

NAVAL COURT-MARTIAL.—On Monday last a court-martial was held on board the Impregnable, guard ship, at Plymouth, for the trial of Mr. George Samuel Thunder, chief engineer of Her Majesty's ship Hero, for being in a state of inebriety when that ship was leaving Portland Harbour, United States, under steam, on the 20th October last. The following officers composed the court:—Rear Admiral Sir Thomas Pasley, Bart. (president); Captains A. C. Key (Indus); Lord H. F. Kerr (Impregnable), W. K. Hall, C.B. (Royal Adelaide), E. P. B. Van Donop (Jason), J. Seccombe (Himalaya), E. W. Vansittart (Ariadne), Hon. G. D. Kean (Charybdis); W. Eastlake, Esq., Judge Advocate. The prisoner pleaded Guilty. The prosecutor, Commodore Seymour, was then called upon to state the circumstances under which the charge was preferred. He said—I had occasion to send for Mr. Thunder on the evening of the 20th ult., as the ship was leaving Portland, to speak with him on duty connected with the engines. It was some time before he made his appearance, and when he did he was not sober. I called on Commander Stirling and other officers to witness the state the prisoner was in. The prisoner was then called on for his defence, when he read the following:—"After nearly 20 years' service in Her Majesty's Navy, for which period my certificates show that I have in every ship conducted myself with sobriety, it is with deep regret I now acknowledge myself guilty of inebriety on the evening of the 20th of October. In doing so I beg respectfully to submit to this honourable court the circumstances that caused my being in that state—in the hope that, as I have generally been ever abstemious in my habits, my offence on this unfortunate occasion may not be visited with severity. Having to show hospitality and attention to some of the visitors of Her Majesty's ship Hero, at Portland, I unfortunately took more than I am accustomed to take. It is very little I can take without being affected in my speech and manner, as on that evening. I also beg most respectfully to submit to this honourable court that during my long service, I have performed my duty with zeal and attention; that I have ever been assiduous and untiring to promote and maintain the efficiency of such machinery as I have had charge of. I can only throw myself on the mercy of this honourable court." The prisoner then produced a long list of certificates from the several ships he had served on board, and Captain Key, one of the members of the court, and superintendent of the steam ordinary at Plymouth, with whom the prisoner served on board Her Majesty's ship Amphion in the late war, said he could not speak too highly of the prisoner's character. He had ever known him to conduct himself in a very sober manner, and as a most trustworthy officer, and who kept the engines in excellent order. The court was then cleared, and on its reopening the Judge Advocate read the following as the sentence of the court:—"That the court, after taking into consideration the circumstances under which the offence had been committed, of which the prisoner acknowled himself guilty, and paying due attention to the large number of certificates of high character produced by him, and the high character which he has borne for the long period of his services, does only adjudge him to be severely reprimanded, and to be dismissed from Her Majesty's ship Hero."

A very handsome square Grecian monument, with enriched cap, having polished panels of red granite, with a base and cap of grey Scotch granite finely axed, and surmounted with a trophy, was raised last week upon the crown of the beach at Southsea, near the King's rooms. On the northern panel there is the following inscription:—"Sacred to the memory of Captain Sir William Peel, K.C.B., V.C.; Captain Thomas Grey, R.M.; Mr. M. A. Daniel, midshipman; the seamen and marines of the Shannon Naval Brigade, who fell while employed in the North-west provinces of India during the mutiny A.D. 1857-8. As a tribute to their gallantry, this memorial is erected by the officers and crew of H.M. ship Shannon, 1860." The eastern panel records the casualties:—"Killed in action, 2 officers, 6 seamen, and 2 marines; died of wounds, 9 seamen, 1 marine; died of disease, 2 officers, 70 seamen, 5 marines; wounded, 7 officers, 34 seamen, 5 marines. Come, ye blessed of my Father, inherit the kingdom prepared for you from the foundation of the world." The western panel records the services:—"The Shannon's naval brigade with six 8-inch guns and four field pieces, left Calcutta for the north-west provinces August 18th, 1857, served at the battle of Kedjiva October 29th, 1857, relief of Lucknow November, 1857, defeat of the Gwalior Contingent December, 1857, battle of Kala Nudde Bridge January, 1858, capture of Lucknow March, 1858, and returned to the Shannon August, 1858." The southern panel states that the trophy is made from a gun captured at Lucknow, and presented to the Shannon's brigade by General Lord Clive, G.C.B., Commander-in-Chief of the army. The trophy, which is of brass, is emblematical of both services, and consists of a pyramid of cannon, muskets, cutlasses, anchors, cables, boathooks, ensigns, and flags, having a base of piled shot and shell, surrounded by a wreath of laurels. The trophy is well executed, and of considerable height; it weighs 5 cwt., 3 qrs., 8 lbs.

The Cambridge University Volunteer Rifles were inspected on Friday by Colonel M'Murdo on Parker's Piece. The battalion mustered 400 strong, in six companies, the left wing being composed entirely of members of Trinity College, St. John's College supplying one of the right wing companies, and the rest of the University the remaining two. The men are, with but few exceptions, taken from the undergraduate members of the University, and this gives the corps a quick, light, and active appearance in all their movements, in which Volunteers are usually deficient. Almost all their movements were performed at the double, and with a steadiness which does credit to their commanding officer, Lieut.-Colonel Baker, who has bestowed great pains upon them. Colonel M'Murdo remarked upon the great value of the University battalions, as supplying an excellent means of increasing the efficiency of the various corps throughout the country, by sending out annually a number of young men qualified by careful instruction and practice in their ranks to assist in the great national Volunteer force.

De Bernardy's "Index Register" for next of kin, heirs-at-law, legatees, and of unclaimed property, in Great Britain, the Colonies, and on the Continent, from 1754 to 1856, is published by the author at 9, Northumberland Street, Strand.

Obituary.

The late Lieut.-Colonel Robert Macdonald, C.B., commenced his career in 1797, as ensign in the Strathspey Regiment of Fencible Infantry. On its reduction he entered the Surrey Rangers as lieutenant in 1799, and served in North America. In 1803 he was appointed ensign in the 1st Royals, and in the same year he sailed with the second battalion of that corps for the West Indies, where, as brigade-major to Brigadier-General Nicholson, he was engaged at the siege of Fort Bourbon and capture of Martinique in 1809. In 1812 he joined the 3rd battalion Royal Scots in its retreat from Burgos, and served in the Peninsular campaigns of 1813-14; was engaged at Osma, on the 18th, and the battle of Vittoria, the 21st of June; at the successful assault on the Convent of St. Sebastian, on the 17th of July; and though severely wounded on the 25th of July, at the assault on the town, on the 31st of August he volunteered to the breach in command of two companies of the Royals, ordered in advance of the 1st brigade 5th Division, and was on duty in the town during the conflagration, and present at the surrender of the Castle of St. Sebastian, on the 8th of September. The wound received at St. Sebastian subsequently compelled him to use his left hand in writing. For his conduct at this siege he obtained the rank of Major, on the 21st of September, 1813. He was engaged at the passage of the Bidassoa, on the 7th of October; at the battles of Nivelle, on the 10th of November, and the Nive on the 9th, 10th, and 11th of December, 1813, and in one of the Pyrenean engagements, when a detachment of this regiment found itself in presence of a French battalion, by his presence of mind he induced the latter, who were more numerous than his party, to lay down their arms as prisoners. The gallant officer assisted in repelling the sortie from the citadel of Bayonne on the 14th of April, 1814, and served with the 3rd battalion Royal Scots in the campaign of the Netherlands, 1815. He was present and engaged, on the 16th and 18th of June, at the battles of Quatrebras and Waterloo. At Waterloo, Colonel Campbell, commanding, being wounded early in the afternoon, Major Macdonald took the command of the 3rd battalion. Here, near the close of the action, being exposed upon an eminence rallying his men, he became a mark, and fell wounded by a ball in the hip, and was for a time left for dead, but was ultimately conveyed to Brussels. For these actions he was made a Companion of the Order of the Bath, and received from the Emperor Alexander the order of St. Anne of Russia. After commanding for some time the 35th Foot, the deceased officer, compelled by ill-health, in 1831 reluctantly quitted the Service, receiving in 1849 a war medal, with five clasps.

We regret to announce the death of the Duke of Norfolk, who expired at half-past 11 o'clock on Sunday night at Arundel Castle, after a lingering illness of several months. The lamented nobleman, shortly after leaving Cambridge, entered the Army as cornet in the Blues, and served some years in the regiment.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

ADYE—October 23, at Madras, the wife of Lieut.-Colonel Adye, C.B., of a daughter.

ANSTRUTHER—November 27, at 24, Onslow Square, the wife of Capt. R. Anstruther, Grenadier Guards, of a son.

BURGESS—November 26, at Mount Albion, Ramsgate, the wife of C. J. Burgess, Esq., 46th Regiment, of a daughter.

CHESTER—November 27, at the "Grange," Belgrave, Leicestershire, the wife of Major Chester, of a daughter.

DENT—November 25, at 14, Leinster Terrace, Hyde Park, the residence of her father, the wife of Captain Thomas Wilkinson Dent, Madras Army, of a son.

EWEN—November 26, at the Depot House, York, the wife of Captain Ewen, of a son.

FITZROY—November 23, at 23, Grosvenor Street, the Lady Fredk. FitzRoy, of a son.

GIBSON—November 24, at the "Hermitage," Wateringl bury, the wife of Capt. Charles Edgar Gibson, of a son.

MANCHESTER—November 23, at 1, Great Stanhope Street, the Duchess of Manchester, of a son.

ROGERS—November 25, at 7, Hanover Terrace, Notting Hill, the wife of Robt. Gordon Rogers, Esq., H.M.'s 5th European Regiment, Bengal Presidency, of a son.

MARRIAGES.

DICKINS—ELWES—November 27, at Brighton, by the Rev. Charles Causton, Francis Atherton Dickins, Esq., 31st Bengal Light Infantry, second son of William Dickins, Esq., of Cherington, Warwickshire, to Emily Susan, eldest daughter of the late John Meggott Elwes, Esq., of Bessington, Hants.

GORDON—CASE—November 22, at Sandgate, by the Rev. Adam Gordon, brother of the bridegroom, assisted by the Rev. J. D'Arcy Preston, George Hamilton Gordon, Captain Royal Engineers, to Blanche Emma Beatrice, youngest daughter of the late John Ashton Case, Esq.

DEATHS.

ATKINSON—November 26, at 9, Rutland Square East, Dublin, Thos. J. Atkinson, Esq., M.D., Surgeon 31st Regiment, aged 33.

COOK—November 23, at Stoke Court, Somerset, Henrietta, the wife of Major William Surtees Cook.

DOBSON—November 22, at Bath, suddenly, of apoplexy, Robert Ragueneau Dobson, Esq., formerly Captain 5th Fusiliers, aged 74.

GRANGE—November 27, at the London Hotel, Dover, Leila Marie Elizabeth Temple, the only and beloved child of Henry Grange, Esq., Assistant-Surgeon 47th Regiment, to the inexpressible grief of her bereaved parents and friends; aged 3 years 2 months and 3 days.

MAIRIS—November 25, at Clifton, near Bristol, of apoplectic paralysis, Elizabeth, the beloved wife of Major Mairis, formerly of the 78th Highlanders and Carabiniers, aged 67.

RUXTON—November 25, at Winslow Hall, Bucks, Edward Henry Ruxton, third son of Major George Ruxton, of Rahanna, aged 13.

DUDLEY, General Manager.

CAMBRIDGE ASYLUM FOR SOLDIERS' WIDOWS.—The OFFICE of SECRETARY is now VACANT. Salary £100 per annum. Office hours 11 till 4 daily. Applications in candidates' own writing, with testimonials, to be sent to the office on or before Monday, 10th December. The appointment is one which might suit the circumstances of an officer upon half-pay, to whom it would be an agreeable occupation to devote his time to advancing the interests of an institution so valuable to the army.

JOHN RUSSELL CLIPPERTON, Secretary.
Office, 19, Parliament Street, S.W., Nov. 22, 1860.

TO EMPLOYERS.—THE ARMY & NAVY PENSIONERS EMPLOYMENT SOCIETY, No. 44, Charing Cross, S.W., has on its registry men of unexceptionable character, who have served as non-commissioned officers and privates in different branches of Her Majesty's Army and Navy. They are still in the prime of life, and besides the advantage of their military training and discipline, possess the material guarantee afforded by a pension, and are satisfied with moderate wages. Among them will be found men of every qualification, and fitted for situations of trust and responsibility. They are peculiarly fitted for places of the following description:—Hall and door-keepers to public and private establishments, messengers to ditto, grooms, helpers, and occasionally in-door servants and gardeners, porters, watchmen, gate, office, and time-keepers, constables, storekeepers, and park-keepers. No fees or expenses to employers or employed. N.B. The men belonging to the London Division of the Corps of Commissionaires have been obtained at this office.

OVERLAND ROUTE.
COMMUNICATION BY STEAM TO INDIA, AUSTRALIA, &c., VIA EGYPT.

THE PENINSULAR AND ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Mauritius, Reunion, King George's Sound, Melbourne and Sydney, by the steamers leaving Southampton on the 20th of every month.

For further particulars apply at the Company's Offices, 122, Leadenhall Street, London, E.C.; or Oriental Place, Southampton.

INDIA, CHINA, AND AUSTRALIA.—OVERLAND ROUTE.—Officers and Civilians returning from Furlough, or joining on first appointment, can secure their passage through Messrs. WHEATLEY & CO. (late Waghorn), West End Office, 23, Regent Street, Waterloo Place, S.W., and be thus spared the inconvenience, delay, and trouble of going to the City. Handbooks on application. Baggage collected and shipped at a through charge. Insurances effected. Files of the latest news in the Reading-room.

EDWARD HILL, deceased.—Pursuant to an Act of Parliament of the 22nd and 23rd Victoria, chapter 35, intituled "An Act to further amend the Law of Property, and to relieve Trustees," NOTICE IS HEREBY GIVEN that the creditors and all persons having any claims or demands against the estate of Edward Hill, late Commander of Her Majesty's brig Spy, a Lieutenant in Her Majesty's Navy, who died on 12th May, 1851, are required to send in the particulars of such claims or demands, in writing, to Robert Makin Bates, Esq. (to whom letters of administration of the estate and effects of the said Edward Hill were granted by the Prerogative Court of Canterbury, on 29th March, 1853), at the office of his solicitor, Mr. George Thomas Woodrooffe, No. 1, New Square, Lincoln's Inn, London, on or before the 1st day of March, 1861, and that in default thereof the said Robert Makin Bates will proceed to distribute the assets of the said deceased among the parties entitled thereto, having regard to the claims of which he shall then have had notice, and that the said Robert Makin Bates will not be liable for the assets, or any part thereof, so distributed, to any person of whose claim or demand he shall not have had notice at the time of such distribution. Dated this 26th day of November, 1860. — GEORGE T. WOODROOFFE, Solicitor for the Administrator.

HUNTERS AND CHARGERS, &c., &c.—TALLY HO!—Gentlemen requiring MOUNTS for the coming season will study their pecuniary and personal safety by sending address and postage for October Number of ROYAL BRITISH & FOREIGN HORSE REGISTER, in which will be found advertised some noted flyers in the stables of noblemen and private gentlemen declining hunting, &c. Wanted for sale immediately, sound horses of all kinds. Many applications for young, well-bred horses, likely to make hunters. Address, the Secretary, Horse Register, 70, Berners Street, Oxford Street, London, W. Some broke chargers and young high-bred horses, suited for officers' chargers, on sale, 50 per cent. under ordinary prices.

ADVANTAGES OF ASSURING WITH THIS COMPANY.

The premiums are on the lowest scale consistent with security.

The Assured are protected by an ample subscribed capital—an assurance fund of 480,000*l.*, invested on mortgage, and in the Government Stocks—and an income of 85,000*l.* a year.

Premiums to Assure £100.				Whole Term	
Age.	One Year.	Seven Years.		With Profits.	Without Profits.
20	£0 17 8	£0 19 9		£1 13 10	£1 11 0
30	1 1 3	1 3 7		2 3 5	2 0 5
40	1 5 0	1 6 9		3 0 7	2 16 0
50	1 14 1	1 19 10		4 6 6	4 0 11
60	3 2 4	3 17 0		6 12 9	6 0 0

MUTUAL BRANCH.

Assurers on the Bonus system are entitled, after five years, to participate in nine-tenths, or 90 per cent. of the profits.

The profit assigned to each policy can be added to the sum assured, applied in reduction of the annual premium, or be received in cash.

At the first division a return of 20 per cent. in cash on the premiums paid was declared; this will allow a reversionary increase, varying, according to age, from 66 to 28 per cent. on the premiums, or from 5 to 15 per cent. on the sum assured.

One-half of the "Whole Term" Premium may remain on credit for seven years, or one-third of the premium may remain for life as a debt upon the policy at 5 per cent., or may be paid off at any time without notice.

Claims paid in one month after proofs have been approved.

Loans upon approved security.

No charge for Policy Stamps.

Medical Attendants paid for their reports.

Persons may, in time of peace, proceed to or reside in any part of Europe or British North America without extra charge.

No extra charge for the Militia, Volunteer Rifles, or Artillery Corps on Home Service.

The Medical Officers attend every day, at a quarter before Two o'clock. E. BATES, Resident Director.

PRIZE CATTLE SHOW.—THE ANNUAL EXHIBITION of CATTLE, IMPLEMENTS, &c., will take place at the Baker Street Bazar, King Street entrance, on December 11th, 12th, 13th, and 14th. Open from daylight until Nine p.m. Admittance 1s.

A costly Book of Engravings, with Prices attached, forwarded by post, free.

MANUFACTORY, QUEEN'S CUTLERY WORKS, SHEFFIELD.

SPORTSMEN AND GENTLEMEN OF THE ARMY AND NAVY.—S. & B. SOLOMONS, Opticians, 39, Albemarle Street, Piccadilly, W., opposite the York Hotel. Portability combined with great power in FIELD, RACECOURSE, OPERA, and general out-door day and night powerful waistcoat-pocket PERSPECTIVE GLASSES, weighing only 4 ounces each, containing 12 and 18 lenses, constructed of German glass, will show distinctly persons to know them at two-and-a-half and three miles. They serve every purpose on the Racecourse and at the Opera House. Country scenery and ships are clearly seen at eight to ten miles. They are also invaluable for Shooting, Deerstalking, and Yachting. Her Majesty's Coast Guards are making use of them as day and night glasses. The terms for them are powerful and brilliant Telescopes for both eyes. The most powerful Telescopes, possessing such extraordinary power that some, three-and-a-half inches, with an extra astronomical eyepiece, will show distinctly Jupiter's moons, Saturn's ring, and the double stars; with the same telescope a person can be seen and known three-and-a-half miles distant, and an object from fourteen to sixteen miles. They are in endless variety, of larger and all sizes, with increasing powers, and are secured by Her Majesty's Royal Letters Patent.

FIELD GLASS.—The BEST is BURROW'S MALVERN LANDSCAPE GLASS, invaluable to Sportsmen, Military and Naval Officers, Travellers, &c. Compact, portable, and efficient, combining a wide field of observation with extraordinary defining power. In sling case, 3½ guineas. Sent free on receipt of post office order to W. & J. Burrow, Great Malvern, Worcestershire.

SAUCES.—Connoisseurs have pronounced Lea & Perrins' "WORCESTERSHIRE SAUCE" one of the best additions to Soup, Fish, Joints, and Game. The large and increasing demand has caused unprincipled traders to manufacture a spurious article; but the "GENUINE" all bear Lea & Perrins' name on Bottle, Label, and Stopper.

Sold by Crosse & Blackwell, London, and all respectable Oilmen and Grocers.

Sole Manufacturers—Lea & Perrins, Worcester.

SOYER'S SULTANA SAUCE, RELISH, SUCCULANTE, AROMATIC MUSTARD, &c.—These excellent Preparations, of which the *Lancet* in its sanitary analisation of Articles of Food reported so favourably of their Purity and Wholesomeness, are to be obtained of all Grocers and Italian Warehousemen in the United Kingdom. They are indispensable with Fish, Meat, Game, Poultry, Hashes, Stews, and all made dishes; impart also to Chops, Steaks, and Cutlets a most delicious flavour. Wholesale, Crosse & Blackwell, Purveyors to the Queen, 21, Soho Square, London, W.

In 1 vol. demy 8vo. with Portrait, price 12s. cloth.

MEMOIRS of BULSTRODE WHITELOCKE Lord Commissioner of the Great Seal during the Civil War and the Commonwealth, &c. &c. By R. H. WHITELOCKE, Esq., Royal Professor, Wurtemberg.

This new and original Memoir will be found not only interesting as the biography of a remarkable man, illustrating the mode of life of an English gentleman in the days of Charles I., but to be a valuable addition to the library of the historical student and the lawyer. Besides referring to the principal events of the time, and commenting upon the prominent actors on both sides during the Civil War, it contains a report of several remarkable conversations between Whitelocke and the King, Laud, Cromwell, Fairfax, Queen Christina, Oxenstierne, and others: as well as Whitelocke's own narrative of his embassy to the Court of Sweden.

London: Routledge, Warne, & Routledge, Farringdon Street, E.C.

Money advanced on Diamonds, Watches, Plate, Jewels, Guns, Pistols, and other valuable property.

GLASS AND CHINA.

PELLATT & CO. have for more than thirty years had the honour to supply Officers' Messes with the above articles, and continue to manufacture the quality which has during that period given great satisfaction. Patterns and Estimates forwarded to all parts of the Country.—Address, Falcon Glass Works, Blackfriars, London, S.E.

GARDNERS' £2 2*s.* DINNER SERVICES complete, best quality. A large selection of patterns of the choicest description. Breakfast, Dessert, Tea, and Toilet Services, at the lowest possible prices. Cut Wines, 3*s.* 6*d.* per dozen; Cut Quart Decanters, 7*s.* 6*d.* per pair.—H. & J. GARDNER (by appointment to Her Majesty, the Board of Green Cloth, Lords of the Treasury, Admiralty, Office of Works, Customs, and the other Government Offices), 453 and 63, Strand, Charing Cross, W.C. Established 108 years. Engravings free by post.

CHAMBERLAIN'S ROYAL PORCELAIN WORKS.—Admission of Visitors to the Works to be had on application at the Show Rooms, from 9 A.M. to 6 P.M. each day, except Saturday from 9 A.M. to 2 P.M.—W. H. KERR & Co., "Proprietors," Worcester, successors to Messrs. Flight, Barr, & Co., and Messrs. Chamberlain & Co.

THE NEW REGULATION BRIDLE.

A. DAVIS,
MILITARY SADDLER,
33, STRAND, W.C., AND AT ALDERSHOT CAMP.
OFFICERS about to join their Regiments or proceeding abroad can be supplied at short notice with the REGULATION SADDLERY OUTFIT of the best quality at the lowest prices.
MILITIA OFFICERS, CADETS, SURGEONS, &c., are requested to apply to A. DAVIS for an Estimate for Complete Regulation or Private Outfits in Saddlery.
A. DAVIS, 33, Strand, W.C.

H. PEAT,
SADDLER AND HARNESS MAKER,
14, OLD BOND STREET, LONDON, W.

GUSH & FERGUSON, ARTISTS AND PHOTOGRAPHERS, beg respectfully to invite the Nobility and Gentry to view their First-Class PORTRAITS, in Oil and Water-Colours.
GALLERY, 179, REGENT STREET, W.

Printed by JOSEPH SMITH, of No. 10, Malvern Cottages, Portland Place North, Clapham Road, in the county of Surrey, at the office of Messrs. HEADBORN & EVANS, in the precinct of Whitefriars, in the city of London, and published by him at the office, No. 16, Wellington Street, Strand, in the county of Middlesex.—SATURDAY, December 1, 1860.

ARCHIBALD GRAHAM, *to whom remittances are payable. The subscription to the paper is 7s. 7d. per quarter, or 30s. 4d. per annum, payable in advance, postage included.*

IF Southwark has achieved any honours in our day, it was from the circumstance that some of Barclay, Perkins, & Co.'s draymen inflicted corporal punishment a few years agoupon General Haynau. Its fame, in former days, of course everybody knows, rests upon its celebrated tailors of Tooley Street. Judging from the speeches of Mr. Layard and Mr. Scovell, two of the present candidates who aspire to the honour of succeeding the late Admiral Sir Charles Napier in Parliament, it would seem that the borough retains a specialty in these two matters already identified with its name. The every-day—or, rather, two or three times a day—speeches addressed to the electors, relate to Corporal Punishment and the Ballot—the whole argument urged in favour of the latter by Mr. Layard being deduced from the letter of a single tailor.

It is not in our province to discuss political questions of a special character, like that of vote by ballot and universal suffrage. But the other branch of the subjects alluded to belongs to us, and we need not say that, in discussing flogging in the Army and Navy, we have no wish whatever to address ourselves either to the draymen or tailors of Southwark. It certainly, however, augurs well for the political state of the country, or not very well for the candidates, that no political subject whatever—except that decided on by the tailors—has been once alluded to in the election speeches.

That the borough in which Haynau was corporally castigated should have returned Sir Charles Napier to Parliament was not surprising; for he always told the electors plainly, that flogging in the Navy could not be got rid of; and they consistently returned him against his abolitionist opponents. It must have been purely upon this slight ground that Mr. Scovell at first professed himself to be in favour of flogging as a necessary evil, no doubt counting on all the draymen as well as the wharfingers as his supporters, and leaving the tailors alone to Mr. Layard. Judge of his surprise, therefore, on learning that the constituency had become converted; and that under the mollifying influence of Mr. Layard's rhetoric, not a drayman could now be found in Southwark who would lay rough hands in future even on the greatest martinet.

Mr. Scovell at once hauled down his flag, and gave a pledge that he would support any bill for the total abolition of flogging throughout the country.

Mr. Layard had the hardihood to declare, that he had never spoken to a single officer who had not told him that flogging only made men ten times worse instead of better! From this we gather that Mr. Layard never spoke to the late Sir Charles Napier, which is somewhat surprising; and it might also be concluded that Mr. Layard's acquaintance in the Army and Navy was extremely limited, were it not that the contrary is well known to be the case. Almost all naval and military men are in favour of flogging as necessary, however much they dislike it; and we apprehend they think it rather does good to the men than not, though of course there are incorrigible blackguards who can only be flogged as a mere punishment, and to deter others, with no hope that it will reform them.

The question is too large to be discussed in one article For our own parts we confess, in all sincerity, that it would give us the highest satisfaction if flogging could be abolished in the Army and Navy. Unquestionably the punishment is degrading; and although nearly all punishment must bear that character to a greater or less degree, nevertheless the necessity for using the lash in our Services constitutes a national reproach, or an opprobrium on the condition of the men who cannot be kept in order—as those who ought to know best assert—without its use.

Voluntary service and peculiar states of thought and of society in Great Britain, have much to do with the continuance of that necessity. There is not an officer in the Service who would not be delighted if he thought discipline could be maintained without recurring to such a punishment—as well pleased as any elector or non-elector in Southwark. In the Services, as in the world at large, there are a number of men who commit offences either from impulse or malice prepense. It is impossible to discharge the soldier for offences which are too serious for the lighter punishments, and not grave enough for those of the severest description. Military prisons are full enough as it is. With something like a feeling of shame, then, in the face of the civilised world, we are obliged to admit that the maintenance of the punishment of flogging is necessary for the discipline of the Army and Navy, as they are at present raised and recruited. We cannot resort to a conscription of picked men or to the pressgang. Will the electors of Southwark advocate the adoption of these measures? If so, perhaps we can promise the abolition of flogging.

A year has not yet passed since the Admiralty, following the example set by the Duke of Cambridge, issued the new Punishment Regulations, under which every man who enters the Service is exempt from liability to corporal punishment till he has forfeited his presupposed "good" character by actual misdemeanor. All men who thus enter the Service and do nothing to forfeit the privilege, and all men previously in the Service having "good" characters, are placed by these regulations in a class exempting them from corporal punishment, except by sentence of court-martial. Even men in the second class, with bad or indifferent characters, are only subject to corporal punishment by sentence of court-martial, except for mutinous conduct, desertion, repeated drunkenness, theft, and other extreme offences. We had to comment very recently, it is true, upon what appeared to us a harsh decision of a court-martial, which sentenced a man of "very good" character both to a flogging and to degradation to the second class, for what was at first but a venial offence provoked into something worse. But the exception proves the rule; and we deny there are accounts of floggings in the Army and Navy in every day's newspapers.

When upon this subject, we must observe that the new Articles of War are in some respects contrary to the Punishment Regulations in Admiralty Circular No. 396; and when the two come to be read together to the crews of Her Majesty's ships on the 1st of April next (as the Circular requires), we fear the day will be regarded as only too suitable for such *disjuncta in uno!* We have already pointed out that in other respects the Naval Discipline Bill of last session wants amendment, and we only do our duty now in alluding to this discrepancy with respect to the persons now liable to corporal punishment.

We announced several months ago, that one of the main features of the new system upon which the Imperial army in India was to be governed, would be the maintenance of a Staff corps, upon a distinct and separate footing from the rest of the Service. In the further details of the plan which we inserted last week, we adverted to its influence upon regimental promotion. It appears to us that the inevitable result will be a great diminution in the number of purchasing officers, and a total abolition of extra payments beyond the sums fixed by regulation in all regiments serving in India. The present holders of Staff appointments in India are permitted to retain their position, and for that reason the new state of things will not come into existence for some little time; but probably in three or four years the change will be in full operation, and its bearing upon the purchase system, as at present practically ruled, will be developed. The official calculation is, that eventually an average of something over three appointments to the Staff will take place annually from each regiment in India. Inasmuch as each officer will be removed from his regiment to the Staff corps, a vacancy will arise in the rank which he filled in the Line regiment from which he is transferred, and it may be anticipated as a general rule that this vacancy will be filled by the promotion, without purchase, of the senior officer of the next rank below. In addition, therefore, to the deaths and retirements, a new cause of promotion will arise to the extent of quite doubling the present rate. As more than one-half of it will take place without purchase, it is not likely that the senior officers of rank will invest money in obtaining a promotion which a few months must, with tolerable certainty, bring about without any outlay. Under such circumstances the difficulty will be to get persons to give even the regulation price, and, as a matter of course, unless in very exceptional cases, extra money will not be thought of.

In announcing in the early part of this year the plan for the reduction of cavalry commissions to their present price, we took occasion to warn Dragoon officers in general that it was but the beginning of a new system which must before long have the effect of materially reducing the maket value of their commissions. Such was the declared object of the Secretary of State for War; and from what we have observed of the operation of the new prices upon those who come in to fill the cornetcies, we were certainly not inclined to modify our opinion. It is plain, however, that this Indian scheme will introduce a new element of depreciation sufficiently serious to make cautious those who are on the point of investing large sums of money in promotion, with the expectation of hereafter realising something approaching the same amount upon their retirement. Should they retire next year they will, doubtless, get it; the year after they will have less chance, and, in about the year after that, they will find a greatly diminished value of commissions. We are well aware that, in most instances, the extra money paid for steps in the cavalry has remained pretty nearly, if not quite as high as it was before Mr. Sidney Herbert's alteration. We regret this, because we should have preferred seeing the fall more gradual, so that no particular officers should be obliged to suffer the whole weight of the loss which to our minds is inevitable. It would have been a more wholesome form of change, that retiring officers should be a little more moderate in their demands, that those who succeeded them should in turn submit to a slight loss on retirement, and that thus things might be brought to their proper level without any violent hardship. The causes which are destined to accomplish this diminution are, however, accumulating; and we fear some day that serious harm may result to those who, wilfully shutting their eyes to the influences which may affect them, continue to give sums for promotion, such as were given under a very different state of things, and even then were to our minds irrationally extravagant. In regiments at home probably the effect of this Indian Staff corps will not be so much felt; but whatever influences the large portion of the army quartered in India, must to a greater or less extent affect that part which is at home which is closely associated and mixed up with it, and which must itself go to India some day. The infantry give so little above regulation price that the loss of any one officer cannot be oppressively severe, and it is only in the cavalry that we apprehend serious losses to the individual. Officers, who still give from 4000*l.* to 5000*l.* for their troops, will complain greatly when they find they can get probably only a few hundred pounds over the 1800*l.* prescribed by regulation; but they have themselves principally to blame. They will shut their eyes to what is certainly coming, and of which they have got almost official warning.

THE ARMY.

2nd Dragoon Guards. An Indian paper says that Captain Grant was about to join the China Staff as Assistant-Quartermaster-General.

3rd Dragoon Guards. The regiment moves to Meerut and Muttra on being relieved by the Inniskillings about the beginning of this month. Lieutenant H. M. Hockin, died at sea on the 8th of August, on his passage to Bombay. He entered the service in September, 1857, and obtained his lieutenancy by purchase, in November, 1859. Cornet Fitzgerald, the senior cornet of the Army obtains his lieutenancy without purchase. Lieutenant Costobadie has joined the regiment in India. Major Marsh has just become a baronet by the death of his father, the eminent Dublin physician, last week.

5th Lancers. Cornet Thackwell has been examined this week at Aldershot as to his fitness for promotion.

6th Dragoons. The regiment was ordered to move in squadrons from Kirkee on the 20th, 21st, 23rd, and 25th of November, for Ahmednuggur, to be stationed. Lieutenant Baskerville is on his way home in the steamer due at Southampton on the 11th instant. Cornet Bennitt has been examined this week at Aldershot as to his fitness for promotion.

7th Hussars. Cornet Jones, lately transferred from the Carabineers, goes out by the next mail to join head-quarters. Majors Trevelyan and Stisted are members of the court-martial at Umballa, on Captain Urquhart of the 27th Regiment, who is accused of circulating scandalous verses reflecting on the morals of society in Simla.

9th Lancers. Last week an inquest was held at Aldershot, touching the death of Samuel Wells Hillier, paymaster-sergeant in the 9th Lancers, who had committed suicide by shooting himself the previous morning. It was stated in evidence that the deceased destroyed himself by firing in his mouth a pistol loaded with blank cartridge, from the effects of which he died instantaneously; and the jury returned a verdict of *felo de se*. The deceased, who was a young man of twenty-six and respectably connected, had rendered himself very popular amongst the soldiers by his amiability of disposition.

Royal Artillery. The following movements and appointments in the Royal Artillery are announced in a general regimental order, dated the 4th inst. :—Lieut. D. M. Wilson, of the 4th brigade, is raised to increased pay therein, vice Sandilands; Lieut. Smyth-Windham has been appointed to the Horse Brigade, vice Sandilands promoted. The following removals of officers are also announced—viz. :—Capt. Sandilands, from Ireland to Corfu; Lieut. Smyth-Windham, from Corfu to Ireland. The following is to be the distribution of the assistant-surgeons of the brigades serving in India, viz. :—11th Brigade, J. H. Hearn, from the 13th brigade; L. H. Halahan, M.D., from 14th brigade; T. J. Orton, from 14th brigade; W. Y. Jeeves, from 13th brigade; J. W. Rimner, as per general regimental order, 1st April, 1859; H. F. Paterson, M.D., from 14th brigade; R. D. Burn, M.D., from 14th brigade; A. P. Cowan, M.D., as per general regimental order, July 2, 1860, 13 brigade; R. A. Chapple, from 14th brigade; R. U. Cashman, M.D., as per regimental order, April 1, 1859; J. H. Finnemore, from 11th brigade; A. J. L. Hepworth, as per general regimental order, April 1, 1859; R. W. Clifton, from the 14th brigade; A. D. Gulland, M.D., from 14th brigade; A. W. P. Pinkerton, M.D., as per general regimental order, April 1, 1859; R. C. Crean, as per general regimental order, November 28, 1859. 14th brigade, J. Barker, from 13th brigade; W. Haughton, M.B., from 11th brigade; G. Sharp, from 11th brigade; A. R. Smith, from 11th brigade; J. M. Taylor, from 13th brigade; D. F. de Hodgson, M.D., as per general regimental order, 1st of April, 1859; G. D. Milne, M.D., from 13th brigade; W. Tanner, from 11th brigade. The following appointments and removals of master-gunners have been approved :—Battery Sergeant Major Matthew Renham, of the Coast Brigade, to be master gunner at Shorcham, vice Wright, pensioned; Sergeant Bernard Dolan, of the Coast Brigade, to be master gunner at Ware Basin Battery, Sunderland, by augmentation, and Master Gunner Robinson to be transferred from the North Fort, Liverpool, to the Heugh battery, Hartlepool. Major Talbot, Lieutenants Walker and Lockhart, have arrived at Bombay from England. Colonel Cleaveland has taken command at Fort Elson on the Gosport side of the water, south-western district; and Lieutenant Percival, of the 10th Brigade, has been ordered from Block House Fort, Portsmouth, to Woolwich, where he will prepare himself at the Royal Laboratory, under Colonel Boxer, to become an assistant-inspector of warlike stores; and when qualified, will be appointed fire-master at either Bermuda or St. Helena, these being the only two vacant stations now left. Major Palmer is likely to be the successful candidate for the appointment of instructor in military drawing at the Royal Military Academy. It would appear that the removal of the Depot Brigade to Sheerness, and that of the head-quarters of the Royal Horse Artillery to Knightsbridge, is almost decided on. There is no longer any talk of the removal of the 10th Brigade from Portsmouth, as it is probable the new brigade will be formed at Sheerness; but there is a strong talk of the 4th brigade proceeding abroad in the spring, and handing over their horses to the 15th brigade, whose head-quarters are at Haslar; and it is further said, that the change of the 1st brigade to Gibraltar is postponed for a year. We do not wonder at so many "shaves" and anxieties spreading through the ranks of the gunners respecting the changes of their new brigades. No roster for service has yet been formed, though anxiously looked-for by all hands. Under the old, and, we will add most excellent system, the time almost to a day of a company proceeding on foreign service, was known years beforehand, unless some extraordinary occurrence, such as the removal of a battery on war service, moved the roster one up. It was a vast saving in expense to married officers, who are heavily taxed in rent and poor-rates, and often most unnecessarily; and we trust the authorities will soon issue a roster of brigade service, and let the regiment know what it has to expect under the ordinary chances of the Service. Orders have been sent out to Captain N. S. K. Bayly, of the 13th brigade, now quartered at Aden, to proceed to England and report himself to the head of the Laboratory in the Royal Arsenal, where he will be instructed in all the new inventions and introductions of the Artillery service, and on taking out his certificate be appointed to succeed Lieut.-Colonel Romer at Priddy's Hard, Portsmouth Harbour. We believe the gallant and fortunate officer is the son-in-law of Major-General Harry Gordon, R.A.

Royal Engineers. The 32nd company is ordered from Alderney to St. Helena. The 27th will not embark for some weeks for Gibraltar, transport being scarce. Lieutenant G. Le Breton Simmons, has been ordered, upon the recommendation of a medical board, to proceed to the Cape of Good Hope for service, a warmer climate having been considered necessary for his health. Colonel Stanton is expected to proceed shortly to Prussia, and it is stated that Colonel Keane will succeed him. Lieut.-Colonel Laffman, lately appointed to the command of the Royal Engineers stationed in Malta, arrived there on the 29th ult. by the Peninsular and Oriental Company's steamer Pera, from Southampton.

3rd Buffs. The 2nd battalion, under the command of Colonel F. F. Maude, C.B., V.C., was, on the 26th ult., inspected by His Excellency Lieut.-General Sir J. Gaspard Le Marchant, Governor of Malta; and it is said that His Excellency expressed himself much pleased with the high state of discipline of this young and gallant regiment.

4th Regiment, 1st battalion. Ensign Borrett has arrived in India to join the regiment.

7th Fusiliers. Lieut.-Colonel Poulett Somerset has left for Gibraltar to take command of the 2nd battalion.

10th Regiment. Lieutenant Rudge, 1st battalion, has been examined as to his fitness for promotion to the rank of captain.

21st Fusiliers. A draft, consisting of four officers and 60 rank and file of the depot of this regiment attached to the 13th Depot Battalion at Parsonstown, proceeded on Saturday to Cork, to join the service companies of the regiment at Barbadoes. The following are the officers who accompany the draft, viz., Major Collingwood, Ensigns Conor, Lingard, and Warner.

24th Regiment. This gallant regiment has received orders for its return to England from India. There is no question of the correctness of the statement which has been in some measure an agreeable surprise to the officers.

27th Regiment. The corps is ordered from Umballa to Gwalior, to be stationed.

32nd Light Infantry. A large and handsome monument to those of the gallant 32nd Light Infantry who perished at Lucknow and Cawnpore, namely, 15 officers, 448 non-commissioned officers and men, 4 ladies, and 98 soldiers' wives and children, has just been erected in the nave of Exeter Cathedral. It was designed and executed by Mr. Richardson, sculptor, of Melbury-terrace, Harewood-square, the subject selected being an enraged lion crushing a viper. The regimental colours and badge form an appropriate background. The whole is of the purest white marble. The inscription is as follows :—"To the memory of the following officers of the 32nd or Cornwall Regiment of Light Infantry, who, with 448 non-commissioned officers and men of that corps, were killed, or died of wounds or sickness, in the noble discharge of their duty during the memorable defence of Lucknow and Cawnpore, A.D. 1857, and in the subsequent campaign against the mutinous sepoys and rebels in India :—Colonel C. A. F. H. Berkeley, C.B., Lieut.-Colonel W. Case; Captains E. Steevens, J. Moore, J. W. Mansfield, W. Power, B. M'Cabe; Lieutenants E. de L. Joly, J. D. Thompson, F. Wainwright, P. C. Webb, J. Brackenbury, E. C. Hill, W. H. Studdy, J. W. Charlton. Also to the memory of Mrs. J. Moore, Mrs. Wainwright, Mrs. Hill, and Miss Wainwright; and of 43 soldiers' wives and 55 soldiers' children of the 32nd Light Infantry, who were barbarously massacred at Cawnpore in June, 1857. This monument is erected by their comrades and friends as a token of admiration for their gallantry, fortitude, and devotion." Lieutenants Thistlethwayte, Clery, and Cherry, and Ensign Cathcart, have been examined this week as to their qualification for promotion.

49th Regiment. Ensign Roberts has been examined as to his fitness for promotion.

52nd Light Infantry. The corps is ordered from Sealkote to Jhansi (head-quarters) and Gwalior, to be stationed.

55th Regiment. Ensign Clark has been examined as to his fitness for promotion.

56th Regiment. The wing at Ahmednuggur has been ordered to Poona, to be stationed.

57th Regiment. The "Die Hards" are under orders to march from Poonah, and to proceed to Bombay, to embark for New Zealand. We could have wished a better employment for this distinguished corps. The families and depot will remain at Bombay for the present.

71st Light Infantry. The corps is ordered to move from Gwalior to Sealkote on being relieved by the 27th.

77th Regiment. The corps is ordered from Benares to Hazareebaugh, to be stationed.

83rd Regiment. Ensign Gibb has arrived in India to join the regiment.

89th Regiment. The corps is ordered from Jhansi and Gwalior to Umballa, on being relieved by the 52nd Light Infantry.

The following Circular has been issued :—"War-Office, Nov. 24, 1860.—Sir,—An Act having been passed during the last session of Parliament relative to the postage on re-directed letters of commissioned, non-commissioned officers and soldiers, whilst on actual service, I am directed by Mr. Secretary Herbert to acquaint you that the Lords Commissioners of Her Majesty's Treasury, by their warrant dated 22nd October, have been pleased to exempt the letters of such commissioned, non-commissioned officers and soldiers from any foreign rates of postage chargeable for re-direction, whenever such letters on being re-directed, shall be again forwarded by the post through any foreign country.—I am, sir, your obedient servant, B. Hawes. The Officer Commanding — Regiment."

The War Office has given directions to officers commanding the Royal Artillery in various stations, to test and report upon a contrivance, the invention of Lieut.-Colonel H. Clerk, R.A., of the Royal Arsenal, Woolwich, which has for its aim the speedy removal of guns, carriages, and traversing platforms, when disabled in action. Hitherto it has been a work of considerable labour and time to effect this, especially when the mischief occurs in a casemate, the contracted space of which admits but few men and little machinery to be introduced for the transport of the enormous weight of the heavy armament of batteries. Lieut.-Colonel Clerk has taken the new dwarf traversing platform, and fitting two eye-bolts beneath the centre, adapted a naval axle to run through them and project on either side of the platform, in order to receive a 4 ft. 2 in. wheel on either side. In order to lift and fix the wheels the carriage is run back by the truck-lever, handspikes, and tackle, to the rear of the platform, and the gun detachment, assisted by the weight and leverage, being thus all at one end, lifts the platform in front bodily up until the nave of the wheels and axle-tree meet, the carriage is then run forward to the front, and, by another lift in rear, a smaller pair of wheels, attached to a common locking-plate and shafts, are adjusted to the front by a pintail dropping into the rear-transom, and thus the whole enormous weight is elevated off the ground, run to the rear and out of the casemate, or off the terreplein, with the greatest ease. A very few minutes suffice to effect this removal, and to haul another platform on to the battery to replace the damaged one; and we think the simplicity and ingenuity of the invention highly creditable to the gallant officer who has brought it forward, and that it will be eminently useful in the future service of the ordnance. We have also had a cursory inspection of a new pattern iron tubular triangle-gyn, as it was performing its work on the batteries. This invention is proposed for the purpose of superseding the present wooden triangle-gyns of the Service, it having the advantage of being lighter, cheaper, and of being fitted together by telescopic sections. So far as strength is concerned we have no doubt but that it will bear a very considerable weight, probably enough to lift a 95 cwt. gun into its trunnions; but, apart from this, we are not sure that tubular cast-iron will bear such blows as wood may, and in order to test it thoroughly should like to see the whole gyns, guns and all, tumbled down of a heap, by dragging away the pay-pole, and then we should be better able to judge how the hollow cast-iron sticks will stand a concussion such as in the rough usage of warfare they must always be liable to meet.

Mr. Downes, of Union Street, Southwark, has taken the contract from the War Department for the erection of a new barracks at Gravesend, and the building has been commenced this week.

The rifle match between the 2nd battalions of the 11th and 19th Regiments, now quartered at Portsmouth, to which we briefly, from want of space, alluded in our last issue, is likely, as we are glad to hear, to be renewed. On this the last occasion the firing of the musketry instructors, Sergeants Fraser and Adam Smith, was exceedingly good. A little "cockiness" on either side led to a challenge that ten sergeants in each regiment should dispute the honour; to which an additional zest was added by a subscription of ten shillings a head to form a purse for a supper when the feats of the day were concluded. The 11th had already polished off the 1st battalion 12th Regiment and 2nd battalion 16th Regiment at Aldershot, and, in consequence, betting ran in their favour; the odds, however, being eagerly taken up by some knowing ones, who knew that among the men of the 19th was a good sprinkling of the Irish constabulary, than whom there are no better shots in existence. The shooting soon established their superiority: the 11th making an average of 12, and the 19th of 14 points, and the latter thus came off the victors by 23 points.

We noticed among the names in a recent *Gazette*, that of an officer whom we might reasonably have thought to have turned his sword into a ploughshare some time back, with much advantage to himself, and, we may add, not without a corresponding gain to the public. Originally gazetted to an ensignсy in a Line regiment, he found it convenient to exchange into one of the West Indian Corps, which he was fain soon after to leave. Subsequently he was able to write home from the Antilles and purchase a fresh ensignсy in the —th Regiment, and immediately afterwards he purchased his lieutenancy over the heads of all the ensigns of his old regiment; and, as we have good reason to believe that none of the lieutenants are for purchase, some happy chance may any day enable him to become a captain in the same manner. As this is a case which may give a great hold to the opponents of the purchase system, we draw the attention of the authorities of the Horse Guards to it, with a view of inducing them to make inquiries upon a matter which has probably before this not been brought so forcibly to their cognisance.

Several of the alterations and improvements recommended by the Royal Commissioners for inquiring into the sanitary condition of barracks and army hospitals during their late visit to Chatham garrison, to promote the health, comfort, and cleanliness of the troops, are now being carried out at Chatham barracks, in addition to several important improvements already effected at the suggestion of Major-General Eyre, in command of the forces of the garrison.

The Secretary of State for War has notified to the General Commanding-in-Chief, that in consequence of the inconvenience officers are put to when moving with troops, for want of mess accommodation, he has ordered that an allowance of 5*s.* per day be granted for officers travelling coastwise with troops, provided the journey exceeds 12 hours, and there is no mess accommodation.

It is stated that the Canton prize money will be issued shortly. Considerable diligence appears to have been used in getting the accounts forward, and it is probable that the gallant fellows who assisted in the operations will receive their share many months before the Indian prize money is "ready for distribution." The account stands thus: The total amount realised is 62,293*l.* 13*s.* 11*d.* From this sum is deducted the amount apportioned to the French, 18,256*l.* 10*s.* 4*d.*; freight, 462*l.* 4*s.* 10*d.*; expense of realising, 60*l.*, leaving a balance of 54,944*l.* 18*s.* 9*d.* Of this sum the naval force, numbering 4271 men, takes 30,543*l.* 15*s.*; the army and marines, 3412 men, 24,401*l.* 3*s.* 9*d.* Major-General Van Straubenzee, who commanded, receives one-twentieth of the amount appropriated to the British force.

Brevet-Captain H. B. Blake, H.M.'s 3rd Regiment Bengal European Infantry, has been dismissed the service by sentence of a general court-martial, for having been found guilty of "fraudulently applying to his own use the sum of

Digitized by Google

Rs. 606-4-3, being public money intrusted to him for the payment of men of his company." The court recommended him to mercy, on the ground that he had refunded the amount, and of his conspicuous bravery in action recently; but Sir Hugh Rose deemed it "impossible" to allow an officer to return to the society of his brother officers, and to the command of a company, who had been found guilty of such disgraceful conduct. This is the second court-martial and second dismissal in the same corps for the same offence within the last month—the first being that in the case of Captain R. C. Stevenson.

Major-General Eyre, commanding the forces of the Chatham district, has issued a very stringent order of the day to the troops under his command, in which the conduct of certain officers who recently appeared at a party in private clothes instead of their uniform, contrary to the express regulations on that subject, is censured. The Major-General desires that the officers will strictly adhere to the regulations for dress as laid down in the standing orders of the garrison, and intimates that he will hold officers responsible for any breach of discipline under this head.

Captain D. A. Fraser, Royal Engineers, has been appointed to the command of the 32nd company of Royal Engineers, on its arrival at head-quarters from Alderney.

In consequence of the duties and heavy responsibility devolving on the various clerks intrusted with the direction of the cash establishments of Woolwich Arsenal, the Secretary of State for the War Department has recommended, for the consideration of the Lords of the Treasury, the appointment of a paymaster to each of the four departments—namely, the Royal carriage square; the military store department which includes the Royal Military Academy and other establishments drawing their salaries from this department; the Royal gun factories, and the laboratory. The appointments will be permanent, and, as suggested, on a progressive scale, commencing at 270*l.* per annum, with the equivalent rank of captain in the Army.

We continue to receive very indifferent accounts of the working of the new grates which the War Office has experimentally introduced to the barrack-rooms of certain stations in the kingdom. In many things of late years soldiers have largely benefited from improvements carefully adapted to their requirements; but in this particular they will be heavy losers, and suffer materially in their comforts if this experiment is persevered in. The allowance of coals to the grates appears to be insufficient by about one-third, and as officers commanding have declared that they have no authority to increase it, for two days in the week the men are without a fire. These grates are so constructed that they hold little fuel, and fail therefore to throw out a proper heat; in order to rectify the shallowness, the men have propped them in front with bits of old sheet-iron, without the assistance of which addition, the fire is but a sandwich, such as the Marchioness was allowed by Miss Sally Brass, and nothing more. As to the hot-air shaft and ventilator, they are beyond comprehension altogether; but if it is supposed, or asserted by any inventor, that heat is supplied to a room thereby, it is a miserable delusion, of which any one curious in the matter may easily be satisfied. We trust the authorities will not wait to the end of the experiment, but will give immediate authority to officers commanding to supply a proper amount of fuel for the service of the room. The want of a fire is severely felt at this season, but especially in damp casemates and guard-rooms, where these grates have been fixed; and we venture to ask in a fair and not in a cavilling spirit, was this the proper season, and are these the places, in which an experiment so vitally affecting the health and comfort of the men should have been tested? Economy is an excellent thing; but we suspect strongly (putting aside the discontent and discomfort) we shall soon hear from medical men that we are "paring at the wrong end of the pen."

Major Tupper, Royal Horse Artillery, and Major W. Tupper, 50th Queen's Own, and late Military Secretary to the late Governor of the Madras Presidency, have left, having obtained three months' leave of absence to visit Southern, and the Quadrilateral fortresses in Northern Italy.

We have hitherto in vain attempted to induce the authorities to rectify a false impression in the minds of evil-disposed soldiers, who attempt to rid themselves of their voluntary attestation oaths by the commission of crime; believing such to be always (as it has in some cases been) the direct road to liberty. We are glad to perceive that in a recent case, which we briefly quote below, one of the judges of the land has embodied our views in a few sound practical observations, which we suggest might be read with great advantage at the head of every regiment in the Service. A little firmness will soon put an end to the gross outrages on society, which have been so frequent of late, by the hands of men who are trained to be its protectors:—"Edward Collins, 24, a private in the Royal Artillery, pleaded guilty to a charge of wilfully and maliciously setting fire to a stack of hay, the property of Samuel Russell. The Recorder, in passing sentence, said that the prisoner, after having committed the offence, went and gave himself up immediately, and said that his object was to be sent out of the country, in order to get out of the service in which he was employed. He would, however, be very much mistaken, for the practice of the court, in such cases, was not to send the offender out of the country, but to pass upon him a long and severe sentence of imprisonment; and he would find the condition in which he would be placed much worse than that of any honest service in which he could be employed. He then sentenced the prisoner to be kept in penal servitude for ten years."

The Horsefall Gun.—During this last week fatigue parties of the Royal Artillery have been removing the nut-crackers, or the two large pair of 40-feet shears, which have so long been suspended over the monster gun in the esplanade on Southsea Common. We presume the authorities found the nut too hard to crack, and so have put it off most wisely until some more convenient season. Whatever the reason may have been for postponing the firing of the monster, we are sure that the valuable gear which has been so long, and so uselessly, exposed to wind and weather, must have been found, on its return to the Royal Dockyard to have suffered depreciation to the value of many pounds sterling. And when we hear that another monster piece of ordnance has been offered to the Service, and that any number of them can now be manufactured, we certainly hope, before accepting or purchasing, the Government will consider the available means at hand for making a sensible use of these unwieldy brutes. What human arms and legs can lift and carry shot of 180 or 360 pounds weight? We must invent corresponding machinery for serving these guns if we intend to establish them in our Artillery; and considering what an enormous expense this will entail, with the more than doubt if a second shot would ever be had at a passing ship, we ask, in all sober earnestness, are we working in a right direction? and even if we obtain monster guns which will stand any proof, are they worth the cost and labour of constructing and mounting?

Home.—War Office, 15th September, 1860.—1. Mr. Secretary Herbert having had under consideration the best mode of providing for the requirements of the Royal Artillery for service and practice, has decided, in concurrence with His Royal Highness the General Commanding-in-Chief, that estimates of the stores likely to be required for the services specified below, shall be forwarded by the Officers Commanding the Royal Artillery to the Deputy Adjutant-General by 31st of August in each year, such estimates being referred in the first place to the Military Storekeeper, who will specify thereon how far he can supply the Stores required.—2. When these estimates have been examined by the Deputy Adjutant-General, they will be transmitted to this Office for approval, and such Stores as cannot be furnished by the Military Storekeeper on the spot will be added to his annual demand and supplied as early as possible, so as to enable him to meet the demands of the Royal Artillery.—3. Under this arrangement the Stores included in these estimates are not to be inserted in the annual demands from the Station; nor are they to be issued until the regular requisitions from the Commanding Officers of Artillery shall have been put forward and approved by the Secretary of State for War.—4. Military Storekeepers will, however, make demands for replacing, if necessary, all Stores issued for the use of the Royal Artillery; and generally they will be held responsible for maintaining a sufficient Store to meet the requirements of the several Services within their respective Districts.—A.—Stores and Ammunition for service of existing armaments.—B.—(No. 1) Stores for the service equipment of field batteries; (2) Stores for 18-pounder batteries for coast defence; (3) Ammunition for field days; (4) Ammunition for salutes; (5) Ammunition for morning, noon, and evening gun; (6) Ammunition for practice and exercise Royal Artillery; (7) Ammunition for Militia Artillery, embodied and disembodied; (8) Ammunition for Artillery Volunteers; (9) Stores for Drill purposes.—J. Crawford Caffin.

The Tailors again.—The authorities do not seem to be able to please themselves about the trousers of the Commissariat. Before the Crimean war their undress trowsers were plain blue; full dress with a broad gold lace. During the war that was changed to a gold cord for full and undress. Subsequently that was altered to the plain blue for undress, and broad gold lace for full dress. When the Commissariat Staff Corps was established the trousers again underwent alteration. They were ordered a double red band for undress, and double gold band for dress. Now they are once more to be "rectified." They are to have a broad red band in undress, and ditto gold for dress. As they are dressed now, the Commissariat do not resemble any other corps; whereas, with the threatened change, they become like the general Staff, Artillery, Engineers, &c. Five alterations in six years form a heavy drain on the purses of the officers. It might be desirable to introduce a saving clause in dress regulations, to the effect that all uniforms, once decided on should be adhered to for five years.

Crime in the Ranks.—At the Kent assizes this week the presiding judge (Byles) made reference to the fact that one-half of the prisoners for trial were from the Army. He expressed his regret at the fact, and added that the offences laid to their charge were crimes of the deepest dye; amongst which he observed especially the crime of arson was very common. The circumstance of so many soldiers being charged with offences naturally led to the reflection, how could this be? Some, it was true, were set down in the calendar as imperfectly educated, but others as being able to read and write, and some as being able to read and write well. Time was when education was looked upon as some security against crime; but recent experience would seem to show that this was a very ineffectual preventive. What then were the special reasons for this crime in the present calendar? It seemed to him—and it was a remark that he should not have made but for the large number of soldiers about to be brought before them, and which he would now refrain from making if he did not think that to gentlemen of their weight and position it would not be thrown away—it seemed to him that these crimes by soldiers were simply from want of employment, and that it was from this cause that soldiers wandered about and committed crimes. It had proved, indeed, the old proverb, that employment was but another name for happiness. Indeed, a celebrated writer—more remarkable, perhaps, for his brilliancy than his soundness—said that "employment is the happiness of nine-tenths of the human race, who thus have no time to consider and to know how unhappy they really are." It was unnecessary to remind them of what they had learned as schoolboys, that the greatest military power that ever existed, and that he hoped ever would exist—one that held the world in subjection for twelve centuries—always took care in times of peace to employ an army on works of physical exertion, which made the soldiers stronger, sounder, hardier, and better men when war again made its appearance. The memorials of those peaceful labours of soldiers remained until the present day in those solid walls and straight and admirable Roman roads which extended and radiated from the metropolis to the extremities of the then known earth. It was, therefore, a very serious question whether on a frontier county like this, the superfluous energy of their soldiers might not be employed in erecting works of defence, so that if the fears which now existed in some quarters that the blasts of war, silent on these shores for so many centuries, should be again heard, they should be in a firm position to meet the foe.

Promotion for Distinguished Service.—The following has been addressed to the whole army at home and abroad:—"Victoria R.—Whereas it has been represented to us that it is expedient to exempt, in certain cases, officers who have been or shall hereafter be promoted for service in the field from the condition in the Royal Warrant of the 14th October, 1858, which requires six years' service in the rank of regimental field officer to entitle an officer to the unattached pay of a general officer, it is our will and pleasure that when captains of our army who have been or shall hereafter be promoted to the rank of field officer, by brevet, for service in the field, shall continue to serve uninterruptedly, either regimentally or on the staff, from the date of their promotion by brevet to the date of their obtaining the rank of major-general, they shall be entitled to the unattached pay of that rank, and be placed on the fixed establishment of general officers, notwithstanding that they may not have served six years with the regimental rank of field officer with a regiment, or in one of the situations specified in clause 8 of the warrant of 14th October, 1858, as required by clause 27 of the said warrant. It is our further will and pleasure that the aforesaid officers shall also be exempt from the six years' qualifying service as regimental field officers, and be entitled to succeed to the fixed establishment of general officers, if, after obtaining the rank of colonel they shall be obliged to go on half-pay, in consequence of ill health contracted by and in the service, as established by a medical board, or in consequence of wounds received in action.—Given at our Court of St. James, this 25th day of November, 1860, in the 24th year of our reign.—by Her Majesty's command, "S. Herbert."

COLCHESTER CAMP.

Major-General Hay, Inspector-General of the School of Musketry, Hythe, accompanied by Captain M'Kay, his aide-de-camp, paid a visit to this camp on Friday week, for the purpose of inspecting the musketry returns of the 9th and 10th Depot Battalions. It was generally understood that the gallant officer was pleased with the returns which we published last week, and which we understand were exceeded by only two or three Depot Battalions in the British army. The present state of the weather has caused the partial suspension of the marches into the country, which have been commenced for the winter season, and the men are actively employed daily in the manual and platoon exercises. Recruits continue to join the several depots, and the strength of the camp is gradually approaching its completion.

PORTSMOUTH.

With reference to paragraph 10, page 57 of the Queen's Regulations, the regiments in the south-west district were directed to furnish 1 officer and 12 non-commissioned officers, to be taken off duty for five days in the week, for the purpose of being instructed in gun drill; names to be sent to the officer commanding Royal Artillery. The drills commenced on Monday the 3rd of December, at half-past nine o'clock, and are continued regularly for five days in the week, until dismissed by the officer commanding Royal Artillery. The hours of drill are from 9·30 to 11·30 a.m., and from 2 to 4 p.m. The detachments of the 8th Regiment are drilled at Gosport, and the remainder at Portsmouth.

A Board of Officers assembled at the Anglesea Barracks, Gosport, on Monday last, the 3rd of December, at 11 a.m., for the examination of Lieutenants E. J. B. Donalan, J. L. Day, W. G. Byron, and P. W. Jones, as to their fitness for promotion. President, Col. Haines, C.B., 1st battalion 8th regiment. Members, Lieut-Col. Frazer, R.M.L.I., and Major Berry, 1st battalion 8th Foot.

District Order.—No. 1. In consequence of complaints having been made against the Royal Artillery for firing very near vessels when practising from Fort Gomer, and also against the infantry, for firing near the boats that are passing Browndown, his Lordship, the Major-General Commanding, directs that in future the Artillery are to cease firing whenever vessels are being tried in the measured mile in Stokes Bay. And the officers superintending the practice will on all occasions of steamers or other vessels passing, stop the practice until the vessels are completely clear of the line of fire and out of all danger. The officers superintending the musketry practice at Browndown will in like manner stop the practice when vessels are passing the line of fire.

The Army Gazette.

FOREIGN OFFICE, December 7, 1860.

The Queen has been graciously pleased to appoint Lieutenant-Colonel Edward Stanton, C.B., to be Her Majesty's Consul-General at Warsaw.

WAR OFFICE, PALL MALL, 7th December, 1860.

CHAPLAIN'S DEPARTMENT.

The Reverend Henry Hutton Parry, M.A., to be Chaplain of the Fourth Class.

OFFICERS' QUARTERS IN BARRACKS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Your remarks relative to officers' quarters—especially the accommodation of field-officers—are probably so completely verified by the experience of old officers as to render any exemplification by individual cases superfluous. My own recent experience, however, so perfectly illustrates the point of your remarks that I venture to trouble you with it.

When the Medical Warrant appeared, granting surgeons, with other privileges, the quarters of field-officer, I was residing in Dublin out of barracks with my family. The field-officers' rooms pertaining to my regiment in the Royal Barracks were of course occupied, and I applied to the barrack-master for his certificate to entitle me to the lodging allowance. He refused, and said if I desired to come into barracks, he would give me the accommodation to which I was entitled. I felt surprised, rather doubtful as to whether the decision arrived at was quite right; but finding by experience the inutility of pressing such matters I took no further proceedings. The barrack-master's rather vague promise to provide for me was, however, fully explained soon after, when a room occupied by a subaltern, possessing a dingy closet, only fit for a servant's use, was, by the magical brush of the painter, transformed into a field-officer's quarters. Comment would be superfluous.—I am, &c., A Regimental Surgeon.

THE ENGLISH LEGION.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Major Wortley's name having appeared in your paper in connection with my own, and in a manner that might lead persons to infer that he had in some way lent his services to the cause of Garibaldi, allow me through your columns, publicly to state that such is not the case. He kindly consented to act for me in matters which concerned me personally and privately, and I regret that this kindness of his has led to his name appearing in print at all.

Major Wortley was staying at Naples before General Garibaldi came there, and had no more to do with Garibaldi's army than any other traveller; the major and myself are old schoolfellows, and since we met in Italy we have naturally therefore lived very much together; but I should be sorry that any misconception should arise from this injurious to Major Wortley as an officer of Her Majesty's Army.—I am, &c.,

SEYMOUR.

THE ROYAL ARTILLERY AND STAFF APPOINTMENTS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—There is perhaps no branch of the Army of which we know so much and yet know so little as the Royal Artillery. Gunnery, both in theory and practice, has, during the last twelve months, absorbed an unusual amount of public attention. No expense has been spared in giving facility to experimental essays, and in minor details improvement has marched steadily onwards, unchecked by even the semblance of prejudice. The result has been satisfactory; and we have at the present moment, on the confines of the eastern hemisphere, an artillery force as superior to any hitherto organised, as the Enfield rifle is superior to the superannuated Brown Bess. Thus much of the Artillery is known and appreciated; but the inner life of the regiment is comparatively a sealed book to the majority of your readers. It is customary to ascribe to the Artillery service advantages more numerous than it really possesses. The general opinions entertained regarding Artillery officers may be learned from the desultory chit-chat of the military clubs. It is not uncommon to hear such remarks as "Lucky fellow, isn't he, to command a battery?" "Well, of all services, give me a troop of Horse Artillery!" &c., &c. Civilians, on the other hand, when conversing with Artillery officers, generally qualify their disapprobation of military society in general by adding, "But of course with you it is quite another thing; your officers are all well-educated men."

Now, assuming all this to be correct, I ask to what does it lead, and what advantages do Artillery officers derive from their early education? It is easy to answer the question in broad terms, and to ring the changes upon hackneyed truisms concerning the influence of education in "expanding the mind," "quickening the perception," &c., &c.; but I want more definite information than this. I want to know the value placed by the military public on acknowledged superiority. The relative advantages and disadvantages of general knowledge, in relation to especial duties, have been canvassed again and again, and the verdict of the country seems to be against competitive examinations in connection with public offices. It would be impertinence in me to enter upon the causes of disaffection in many of the public departments; but that the fault has been with the examiners, rather than with the system, no sensible man can doubt. Of the system pursued at the Staff College there can be no two opinions. Every man that has the general welfare of the Army at heart must rejoice to find the duties of staff officers deemed worthy of especial training. But even this system is not without a flaw. The highest military attainments are to a certain extent excluded from the Staff College by the veto placed upon Artillery and Engineer officers. An officer of either of the scientific corps may pass a creditable entrance examination, and obtain an amount of marks far in excess of an Infantry officer, but may, notwithstanding, see the latter preferred before him on the grounds that no vacancy exists for his peculiar branch of the Service. This state of things has ever appeared to me (and to others "whose judgment in such matters cried at the top of mine") unfair, alike to the public and the individual. If certain qualifications are deemed essential in the aspirant for staff employ, why should such qualifications be passed over to make room for one less fitted for such employment? If the public advertise for a first-class article, why reject it on account of the colour in which it is encased? If A. knows something of mathematics, history, fortification, &c., and B. beats him at an open examination on all these points, why pass over B. because he wears a blue coat? It is not easy to see the advantage the public service gains by this invidious classification. The requisites of a good staff officer are not confined to mere detail. His knowledge should be based upon the larger principles of strategy and tactics. He should have a quick eye to estimate numbers and distances; a firm seat on horseback and a light hand; a good general knowledge of the interior economy of the Service; he should be a proficient in modern languages, and a clear and perspicuous writer. Now, your readers must allow that in matters of this sort, the scientific branches of the Army are quite on a par with the Infantry. But they have another point in their favour. Their knowledge of Infantry movements is quite sufficient to enable them to form a just estimate of the capabilities of Infantry under peculiar circumstances; whereas the officers of the Line would, in most cases, require a long course of instruction prior to their forming a just estimate of the capabilities of Artillery. It may be urged that, as under the existing regulations, no officer's staff education is complete until he has served a certain time with each branch of the Service, the appointments to the Staff College should be proportioned to the relative bulk of the three arms. But if this system excludes, at the very starting point, officers of acknowledged merit, it is surely ill in accordance with the principles on which that system was originally founded. Surely, sir, if this system of classification was abolished, the public would be better served. Let our staff students rest their hopes solely on the number of marks to which their relative assiduity entitles them, and while Cavalry and Infantry officers will then, as hitherto, often head the list, "the gunners" will reap advantages to which their early training fairly entitles them.—I am, &c.

UBIQUE.

THE NAVY.

ADMIRALTY, DECEMBER 5.

APPOINTMENTS.

Commanders—James P. Thurburn (additional) and Colin C. A. Kane (additional) to the Cornwallis, for service in the Coastguard; Charles T. Dench (additional) to the Hawke, for service in the Coastguard.

Lieutenants—Frederick Hardy to the Jason; Charles Parry to the Hero; Edwin D. Acklow to the Bulldog.

Masters—Richard T. Saunders to the Imaum; Henry W. Wise, confirmed in the Colossus; William C. Buck (additional) to the Cumberland for the Challenger; John Molloy (additional) to the Cumberland.

Chaplain and Naval Instructor—Rev. G. W. R. Incledon to the Jason.

Assistant-Surgeon—J. R. Holman, M.D., to Chatham Dockyard.

Midshipman—Archer J. W. Musgrave to the Miranda.

Master's Assistant—John A. Jones to the Harrier.

Second-Class Assistant-Engineers—Samuel M'Callum to the Immortalité; Thomas Rees to the Asia, for the Rose; Thomas M. Sanders to the Harrier.

Third-Class Assistant-Engineers—Henry Vatcher (acting) to the Indus; Richard S. Kiernan (acting), W. Williams (acting), and George Thomson (acting), to the Cumberland; David Crichton (acting) to the Fisguard.

ADMIRALTY, DECEMBER 7.

APPOINTMENTS.

Masters—W. H. Balliston (in command) to the Supply; Benjamin Simpson (additional) to the Pembroke.

Assistant-Surgeons—John K. Smallhorn to the Supply; William H. Adam (additional) to the Impregnable.

Second-Master—Charles W. Ross to the Supply.

Naval Cadets—The following gentlemen have been nominated to naval cadetships:—Henry Knight Gregson; Richard George Acton; E. J. Lyall; Francis O'Donoghue Wright; the Hon. Clarence E. Graves; John Mackenzie M'Quhae; Edward Blakemore Fletcher; James Vere Darley; Edward Amphlett; and Douglas Methuen Forsyth.

Master's Assistant—Arthur Wells to the Victory.

Assistant Paymasters—Valentine Spain (in charge) to the Supply; John G. Franckly, to the Barracouta.

Clerks—Edward W. Jago to the Miranda; John H. F. Maxwell to the Excellent.

Chief Engineer—Francis Pearse (additional) to the Fisgard.

Assistant-Engineers—George Watson (1st class), R. Wallace (2nd class), and Thomas Spence (3rd class), to the Supply.

Aboukir, 90, screw liner, Captain Douglas Curry, was in the Tagus on the 27th of November.

Alacrity, 4, screw steam-sloop, Commander James John K. E. Baird, was in Malta harbour on the 30th ult.

Amethyst, 26, sailing-frigate, Captain Sidney Grenfell, from the Pacific station, arrived in Plymouth Sound on Thursday morning. She left St. Blas, Mexico, June 20, arrived at Panama, July 16, sailed therefrom on the 23rd, reached Valparaiso August 28, sailed September 15, arrived at Rio Janeiro October 14, and left on the 20th. Strong contrary gales were experienced for 13 days after, and during most of the remainder of the passage unfavourable winds from the north have prevailed. On Sunday, December 2, lat. 49 N., long. 14 W., there was a heavy gale from south-east. Since her present commission, four years and five months, she has lost five seamen and one officer, Paymaster Warrington, who died off the Cape of Good Hope in March, 1857. During her absence from home she has made good 66,037 miles. She sails so well that on the voyage home no ship passed her. The Amethyst is reported to be in very good condition. She is ordered to proceed to Chatham to be paid off.

Amphion, 36, screw steam-frigate, Captain Thomas Cochran, was in Malta harbour on the 30th ult.

Ardent, 3, paddlewheel steam-sloop, Commander John E. Parish, was in the River Plate on the 31st of October.

Argus, screw coastguard vessel, arrived at Portsmouth on Monday from the westward with Commodore H. R. Yelverton, C.B., Comptroller-General of the Coastguard service, on board.

Ariel, 9, steam-sloop, Commander Alexander, left Plymouth Sound on Tuesday for the Cape of Good Hope.

Bacchante, 51, screw steam-frigate, flag-ship of Rear-Admiral Sir Thomas Maitland, C.B., Captain D. M. L. Mackenzie, was on the 24th of October at Valparaiso, waiting the arrival there of H. M. S. Ganges, with Rear-Admiral Sir R. L. Baynes, K.C.B.

Balaclava, War Department steam-transport, left the Gun wharf Portsmouth on the 3rd inst., loaded with old guns and stores, received from foreign stations, which she will discharge at Woolwich; then she will load with Armstrong ammunition for one of the western ports, probably Portsmouth. About 20,000 Armstrong shells are immediately expected at this Naval yard for sea-service.

Barracouta, 6, paddle-wheel steam-sloop, Commander W. Wood, is engaged sending down yards and upper spars, and overhauling rigging for a refit, alongside her hulk in Portsmouth harbour.

Britannia, training-ship for naval cadets, Portsmouth harbour, Captain Harris. We are glad to report that the whole of the cadets are convalescent, and very few who were prostrated by the late epidemic remain in Haslar Hospital. We may take this opportunity of correcting a report which appeared in the columns of a contemporary, and which caused a good deal of alarm and pain to many persons. There was no cadet of the name of Wood who died; but the names of the young gentlemen who unhappily succumbed under sickness were Mr. Kirwan and Mr. Wood Cruttewell. Some of the cadets have been withdrawn by their friends to enjoy the advantages of home nursing.

Bulldog, 6, paddlewheel steamer, Captain Sir Francis L. M'Clintock, has had her foremast and broken bowsprit taken out, and been placed in No. 8 dock in Portsmouth yard to repair defects. The damage to her stem and cutwater extends nearly their whole length, a great portion of the latter being carried away below the water line. The copper on her fore body is also much chafed, and driven up in ridges by its contact with the ice.

Buzzard, 6, paddlewheel steam-sloop, Commander John Trevenen (acting), was in the River Plate on the 31st of October. The orders for this sloop to return to England have been sent out.

Calypso, 18, sailing corvette, Captain F. B. Montresor, was daily expected by the last accounts at Valparaiso from the Society Islands.

Cæsar, 90, screw-liner, Captain Thomas H. Mason, was under orders to leave Malta on the 1st inst. to join the Commander-in-Chief at Corfu.

Centaur, 6, paddlewheel steam-sloop, Commander Elphinstone D'o D'a Aplin, was the only British man-of-war at Shanghai on the 29th of September. There was, however, a considerable foreign squadron.

Centurion, 80, screw liner, Captain Henry D. Rogers, C.B., was in the Tagus on the 27th of November.

Clio, 22, screw steam corvette, Captain Thomas Miller, left Panama on the 24th of October for the coast of Mexico.

Conqueror, 101, screw liner, Captain E. S. Sotheby, C.B., was in the Tagus on the 27th of November.

Coquette, 32. This heavy frigate has been taken into No. 5 Dock, Portsmouth yard, and is under the hands of the shipwrights who are pulling her to pieces in order to discover all rotten timber and plank in her. She is heavily bitten by dry-rot, and to all appearance both her bows and stern must come away and be entirely replaced.

Cossack, 20, screw steam corvette, Captain Richard Moorman, was at Barbadoes on the 17th of November. This corvette has been, as previously stated in this journal ordered to England.

Curaçoa, 31, screw steam-frigate, Captain Augustus Phillimore, was at Bahia on the 12th of November.

Cyclops, 6, paddlewheel steam-sloop, Captain W. J. S. Pullen, was at Trincomalee on the 24th of October, preparing for her homeward passage. She was to leave some time in November. The Cyclops was commissioned at Sheerness in the month of April, 1857, but did not quit England till the following month of October. By later accounts from India we find that this steamer had left Galle on the 8th of November for Bombay. She may be looked for in England early in February.

Desperate, 8, Commander John Ross, remains at Portland organising and drilling her crew before proceeding to a foreign station. She was originally fixed for the West Indies, but no definite order has yet been issued on the subject.

Donegal, 101, screw liner, Captain Henry Broadhead, was in the Tagus on the 27th of November.

Doris, 32, screw-frigate, Captain E. Heathcote, was at Beyrout on the 18th ult.

Duke of Wellington, line-of-battle ship, first-class steam reserve, remains in the dock in Portsmouth Yard. The workmen have finished overhauling her rigging, and she remains snug for the winter. She is probably destined to replace the Marlborough as flag-ship in the Mediterranean, when the time for the return of the latter ship home is arrived.

Edgar, 91, Channel Fleet, is still alongside the hulks in Portsmouth harbour, but is all taut and ready for sea at an hour's notice, with the exception of the men who are on shore-leave; the last watch went on 21 days' leave on the 4th inst.

Emerald, 51, screw frigate, Captain Arthur Cumming, was in the Tagus on the 27th of November.

Euryalus, 51, screw steam-frigate, has been placed in the ship-basin at Portsmouth, where the shipwright department will proceed with the fitting of her poop. She has been taken in hand by the steam reserve, who have commenced sending down her yards, and overhauling her rigging for a refit. She will be shortly commissioned for the flag of Rear-Admiral Sir Baldwin Walker, Bart., K.C.B., the new Commander-in-Chief at the Cape of Good Hope.

Firebrand, 6. Commander Bruce is all ready for sea, and hove short at the middle buoy in Portsmouth harbour, waiting orders from the "clerk of the weather" to proceed to sea. She will go direct to Bermuda and report herself to the Admiral commanding on the South American station. The foul weather flag has been flying at the dockyard for the last two days, by which signal all communication with Spithead is suspended.

Foxhound, 4, screw steam-sloop, Commander Alfred Mitchell, left Malta on the 24th of November for Corfu, with a mail for the Commander-in-Chief and the ships in company with him, and returned to Valetta on the 30th, where she still remains, according to our latest dates, waiting to convey the incoming mail from England to the Fleet.

Frederick William, screw line-of-battle ship, 2nd class, is still alongside the jetty, Portsmouth harbour, where the engineers are correcting and putting in order the machinery after her late trial trip; when this is effected she will proceed up harbour and be moored there.

Hannibal, 91, screw-liner, flag-ship of Rear-Admiral George Mundy, C.B., was at Naples on the 28th ult. Small-pox of a mild form was still prevalent on board, but under the treatment of the medical staff there was every hope of the disease speedily subsiding.

Harrier, 17, screw-corvette, Captain Sir Malcolm McGregor, is out of the basin, and hove short on the buoy off Portsmouth dockyard, where she is finishing her rigging and binding sails, and awaiting sea-orders. On several occasions during last year, when no sooner out of the hands of the workmen, some defects from dry-rot were discovered, and since she has been at the buoy, several planks in her stern have been found infected, and must be replaced. She has shipped a 12-pounder Armstrong gun, with a field-carriage adapted for land-service, and another carriage for boat-work. This is the second ship supplied with the new rifled field-ordnance.

Hecate, 6, paddlewheel steam-surveying-sloop, Commander A. H. Hoskins, had, by the last advices, from Valparaiso, left that port for Vancouver's Island, to relieve H.M.S. Plumper, which would then return to England.

Hibernia, sailing three-decker, flag-ship of Rear-Admiral Codrington, C.B., Commander the Hon. A. C. Hobart, was in Malta harbour on the 30th ult.

Howe, 121, screw three-decker. On Monday last steam was got up on board this ship in the basin at Keyham steam-yard. The Howe is at present the largest ship in the Royal Navy afloat, her tonnage being 4245 or 500 tons in excess of the measurement of either the Duke of Wellington or the Royal Albert, and 200 above that of the Marlborough.

Digitized by Google

borough. Her steam power is equal to that of 1000 horses. She will be ready for commission if her services are required by the end of the year, as she has already been reported complete in her machinery department.

Icarus, 11, screw steam-sloop, Commander Nowell Salmon, V.C., was lying in Port Royal harbour, on the 9th of November.

Illustrious, 72, Portsmouth harbour. The officers of this ship have received orders to prepare for shipping early next week eight large Armstrong guns on common carriages, 40-pounders; half on pivot slides, which will be used in drilling the men of the Channel fleet when lying in winter idle in harbour. We presume orders have been given for removing the quoins and beds, which have been found not to be adapted to the service of the Armstrong guns, on account of the drip of oil, dirt, and grease, which prevents them holding. If so, they will be supplied instead with the new stoolbeds and depressive blocks, for while we are about it, we might as well teach Jack one drill instead of two; an opinion in which, no doubt, he will cordially concur.

Imaum, 72, receiving ship, Port Royal, Jamaica, Commodore Hugh Dunlop, was at her usual moorings on the 9th of November.

Immortalité, 51, screw steam-frigate, Captain George Hancock, has been removed from the steam basin and berthed alongside her hulk in Portsmouth harbour. She is completing caulking, &c., in readiness for painting, and has nearly received her full compliment of petty officers and men.

Indus, 78, guardship of steam-ordinary, Devonport, Captain Astley C. Key, C.B. Her Majesty has graciously ordered that three days' pay shall be given to each of the men who with so much alacrity got the screw steam-frigate Orlando ready for sea, and proceeded in her from Plymouth into the Channel to search for the Hero, 91, then returning with His Royal Highness the Prince of Wales from America. The Royal gift was paid last week, in Hamoaze, on board the Indus.

Kestrel, screw steam gun-boat, Lieut.-Commander Henry Huxham, left Shanghai on the 23rd of September for Chusan.

Leopard, 18, paddlewheel steam-frigate, flag-ship of Rear-Admiral Sir Stephen Lushington, K.C.B., Captain James F. B. Wainwright, was in the River Plate on the 31st of October.

Liffey, 51, screw-frigate, Captain G. W. Preedy, C.B., was at Beyrout on the 4th of last month.

London, 90, screw liner, Captain Henry Chads, quitted Valetta Harbour on the 25th of November, to join the Admiral at Corfu.

Liberty, 12, sailing-sloop, at Devonport, has been ordered to be fitted as a training-ship for boys.

Madagascar, store-ship, Captain Richard D. White, was at Rio de Janeiro on the 8th of November.

Martin, 12, sailing-sloop, at Devonport, has been ordered to be fitted as a training-ship for boys.

Medina, 4, paddlewheel steam surveying-vessel, Captain Thomas A. B. Spratt, C.B., was at Agha, on the coast of Asia Minor, on the 15th of November. The subjoined is an extract of a letter from this vessel:—"We are at present cruising round the shores of the Archipelago, correcting the various charts. Our next anchoring ground will be Mytelene. Thence we go to the Dardanelles, Salonica, and finally, Malta, which last-mentioned place we hope to see by the beginning of the year. The weather with us at present is very cold, with violent winds and rain. Winter has set in early. All the high hills are capped with snow, and last night the thermometer was as low as 38 degrees."

Megæra, 6, iron screw troop-ship, Commander Samuel H. Henderson, left Malta on the 27th ult. for Gibraltar and England. The following were passengers on board this ship:—His Excellency Lieut.-General Sir William Codrington, who is returning to his post as Governor of Gibraltar, after a short visit to this island and Naples; Lieutenant Sullivan, R.N.; Rev. Mr. Paynter, R.N.; Mr. Rentham, 22nd Regiment; Captain Thompson, 2nd battalion 2nd Regiment; Mr. Renshaw; Mr. Boxer, R.N.; Mr. E. Spinner, R.N.; Mr. Hentley, R.N.; Mr. Hathorn, R.N.; Mr. G. Denham, R.N.; Assistant-Surgeon M'Neill, 3rd Buffs; Mr. Winter, 520 invalid soldiers and sailors, 25 non-commissioned officers, five women, five children, Mrs. McCrea, and Miss Tudor.

Meteor, 14, iron-cased battery, in dock at Portsmouth, is having the removal of her iron plating continued. The outside of this vessel on the removal of her plates and planking presents a remarkable aspect, owing to the black and soddened state of her timbers, &c., an inspection of which might go far towards elucidating the important question of the best mode of applying wood and iron to the future construction of iron-cased vessels.

Mutine, 17, screw steam-sloop, Commander William Graham, was at Panama on the 9th of November.

Oberon, 3, iron paddlewheel steam-vessel, Lieut.-Commander Frederick G. C. Paget, was in the River Plate on the 31st of October.

Osborne, 1, paddle-wheel steam-yacht, Master-Commander George H. K. Bower, with the suite of Her Imperial Majesty the Empress of Austria on board, put into Vigo on the 27th ultimo, to coal and repair some damages sustained in the Bay of Biscay during a heavy gale of wind on the 25th of November. The Osborne was expected to be ready to resume her voyage to Madeira on the 28th.

Pioneer, 6, screw steam-sloop, Commander Hugh A. Reilly, left Shanghai for the Gulf of Pecheli on the 23rd of September.

Pylades, 21, screw corvette, Captain Michael de Courcy, was by the last accounts from Panama, daily expected there from the coast of Mexico, and she would there probably find her orders for England, as the Commander-in-Chief on the station has received instructions to send her home. Letters for this ship must be addressed to Valparaiso.

Racer, 11, screw steam-sloop, Commander A. M'L. Lyons, was in Port Royal harbour on the 9th of November.

Racoon, 20, screw-corvette, Captain W. C. Chamberlain, left Beyrout for a cruise, on the 3rd of November last, and proceeded to Tripoli, where he anchored for the night, and proceeded on the following morning to Larnaka, in Cyprus. She was at Latakia on the 9th, and left on the 10th on her return for Tripoli and Beyrout. By the latest advices the Racoon was at the last-named place on the 18th of last month in company with the Doris, the French ship Mogador, a Russian frigate, two Turkish frigates, and a corvette.

Rosamond, paddlewheel steamer, has been taken into No. 4 dock, Portsmouth dockyard, and is repairing under the hands of the workmen. She is heavily infected by dry rot, and is but a skeleton of a ship at present, her outer and inner planking being all removed. When out of shipwrights' hands she will be almost a new ship.

Royal Albert, 121, screw three-decker, flag-ship of Rear-Admiral R. F. Stopford, Captain H. J. Lacon, was in the Tagus on the 27th of November.

Satellite, 21, screw corvette, Captain James C. Prevost, sailed from Valparaiso on the 20th of October for England. The Satellite was commissioned at Devonport in October, 1856.

Scylla, 21, screw steam-corvette, Captain Rowley Lambert, was in Malta harbour on the 30th ult.

Skipjack, 2, screw gun-boat, Lieutenant-Commander John Murray, was at Barbadoes on the 12th of November.

Spiteful, 6, paddlewheel steam-sloop, Commander Wilson, put to sea from Plymouth Sound on Wednesday evening, in search it is supposed of some vessel in the Channel, and returned again on Thursday, at noon.

Supply, 2, iron screw steam-transport, Master-Commander W. H. Balliston, was paid off yesterday, and immediately re-commissioned.

Sutlej, 51, screw frigate, lies in the basin of Portsmouth dockyard, and is receiving a part of the machinery at the hands of the engineers.

Terrible, 21, paddlewheel steam-frigate, Captain Frederick H. H. Glasse, C.B., arrived at Malta on the 30th ult. from Smyrna.

Trafalgar, line-of-battle ship, Channel fleet, is still lying off the jetty of Portsmouth dockyard, but has finished all repairs, caulking and painting; her port watch returns off leave on the 15th inst.

Tribune, screw corvette, has been taken into No. 5 dock, Portsmouth Yard, where it is easy to perceive that her repairs from dry-rot and other causes will be of an extensive character.

Valorous, 16, paddle-wheel steam-frigate, Captain W. C. Aldham, C.B., left the Havannah for Vera Cruz on the 3rd of November.

Victoria and Albert, 2, paddlewheel royal yacht, Captain the Hon. Joseph Denman, with the Empress of Austria on board, encountered in the Bay of Biscay on the 25th ult., a very severe gale of wind, which compelled her to heave to, but on its moderating she was enabled to proceed on her course to Madeira, without touching at any intermediate port.

Victor Emmanuel, 91, screw liner, Captain Wm. J. C. Clifford, C.B., was in Malta harbour on the 30th ult.

Vixen, 6, paddle steam-sloop, Commander F. W. Richards, was to leave Callao for Valparaiso, under sail, on the 5th of November, and would then make the best of her way home, as her orders for England were sent out some time since. She has been three years and ten months in commission.

Royal National Life Boat Institution.—A meeting of this institution was held on Thursday at its house, John Street, Adelphi, Thomas Chapman, Esq., F.R.S., V.P., in the chair. The Secretary read the minutes of the previous meeting. Captain Tudor, R.N., who had for his gallant services in a life-boat received the silver medal of the Society, was presented with the second service clasp of the Institution, in acknowledgment of his intrepid and prompt services in putting off in a ship's boat manned by nine men, and saving two persons at much risk of life from the Martha, of Wick, which, during a heavy gale of wind was wrecked near that place on the 20th ult. The boat's crew had been rewarded elsewhere. Captain Tudor is always foremost in his laudable efforts to save life from wrecks; and the establishment at Wick, by the Board of Fisheries, of one of the best lifeboats on the Scottish coast, is mainly due to his indefatigable exertions. Rewards, amounting to 60*l.* were afterwards voted to the crews of the Institution's life-boats at Hauxley, Newbiggin, Filey, Lyme Regis, Middlesborough, and Yarmouth, for saving life from the wrecked vessels Susan and Isabella, of Dundee; Rose of Lynn; Flying Fish, of Whitby; Elizabeth Ann, of Lyme Regis; Prodroma, of Middlesborough; and Admiral Hood, of Rochester. 80*l.* was also voted by the Institution to the crews if its lifeboats stationed at Yarmouth, Palling, Walmer, Seaton Carew, Teignmouth, for putting off in reply to signals of distress from ships, but which had either got out of danger, or had their crews rescued by other means. It was reported that Miss Burdett Coutts had presented to the seamen of Sunderland, a lifeboat transporting carriage, built on the plan of the Institution. She had previously generously given the seamen a lifeboat. Admiral Cator stated that the barometer placed by Admiral the Duke of Northumberland at Cullercoats had been to the fishermen of that village of the greatest service. They had recently observed it falling when the weather was quite calm, and when they were preparing to go to sea. A fearful gale sprung up a few hours afterwards, when they believed every one of them would probably have perished had they gone out when it was fine. It was decided that 1000*l.* from the small funded property of the Institution should be sold to meet the heavy payments on its numerous lifeboat establishments. Payments amounting to 1300*l.* having being made on various lifeboat stations, the proceedings closed.

Naval and Military Almanacks.—The proprietors of the Army and Navy Gazette have published sheet almanacks for the year 1861 for the Army and Navy. These almanacks are handsomely illustrated with the usual insignia of war. They are surrounded by medallions, inclosing drawings of the various uniforms worn by officers of the cavalry and line, and by the Admiral down to the Greenwich pensioner. There is a capital picture of the Baltic fleet leaving Spithead in 1854, an excellent one of Greenwich Hospital, and a very true one of the Long Valley at Aldershot. We have also a bird's-eye peep at the home of the old or disabled soldier—Chelsea Hospital. Her Majesty the Queen appears on horseback in her review costume, a scarlet jacket, with the star and blue ribbon of the Order of the Bath, and followed by her Staff. There are allegorical figures of Sedition, Tyranny, Anarchy, and Treachery crushed and chained by the efforts of order and discipline. In addition to all these artistic illustrations, which are from designs by Robert Dudley, Esq., the Almanacks are beautifully printed in chromo-lithography, by Messrs. Day & Son, lithographers to the Queen. We are likewise furnished with all the useful information generally found in an almanack, and we have a chronicle of events supplied by the arms of our two glorious Services.

By accounts from Port Royal, Jamaica, which come down to the 9th ultimo, we find that the captains of the two suspected slavers captured by H.M. steamer Barracouta, and to which we lately referred, have published a protest in one of the Jamaica papers against their detention, stating that their vessels were droghers belonging to the island of Cuba, and were not engaged in the trade of which they were suspected.

Commander Lewis J. Moore, who was promoted last August while serving as First Lieutenant of H.M.'s steam-sloop Vixen, on the Pacific station, has arrived in England, having come home passenger in the Royal Mail Company's steamer Tamar, which reached Southampton on the morning of Saturday last.

We take the following from a morning contemporary:—"A serious mishap (which has been well hushed) was likely to have happened to the Princess Royal, 91, screw, in Portsmouth habour, on Saturday last. By the neglect of some one the wing-cock of the engine-room was left open, and by degrees the ship began to settle by the head. This caused much alarm, and on investigation it was discovered that upwards of six feet of water was in the hold. Signal was immediately made for the whole of the steam reserve force to proceed on board, and by vigorously sticking to the engines and pumps, the ship was prevented sinking at her moorings. It is well that this apparent carelessness should have been discovered in the harbour, and sufficiently early to prevent loss of life, for had it happened at sea, in the dead of the night, a valuable ship with 800 men might have foundered, and none been left to tell the sad tale. Orders have since been issued for the engine-rooms of all the ships to be examined every evening." We can scarcely imagine that so simple an order has not long since been in existence; but probaly, like Sydney Smith's anecdote of the railways and bishops, it was necessary to run the risk of losing a fine line-of-battle ship before having recourse to so plain an expedient.

We regret to find by our letters from Malta that Lieut. Hugh Hathorn (1852), who was only appointed on the 8th of September last as additional for disposal to H.M.S. Marlborough, but has since been doing duty on board the Cæsar, 90, Captain Mason, was on the 27th of November tried by court-martial at Malta for drunkenness, and sentenced to be dismissed the Service with, however, a recommendation to mercy on the part of the court. Lieutenant Hathorn had been the best part of twenty years in the Navy, and we do sincerely hope that some mitigating circumstances may be discovered in his case which will warrant the Lords of the Admiralty to give a favourable ear to the minute attached to the proceedings of the court, and to restore Mr. Hathorn to the profession which he has arduously served. Mr. Hathorn left Malta for England in H.M.'s troop-ship Megæra on the 30th ult.

Lieutenant Robert M. Gillson, who was First-Lieutenant of Her Majesty's late ship Perseverance, has arrived in England in the Royal Mail Company's ship Tyne, with 9 other officers and 50 seamen belonging to the same vessel. The remainder of the crew came home in Her Majesty's ship Geyser, Commander George M. Jackson, which reached Spithead on Thursday morning. The officers and crew being now all assembled, will be tried immediately by court-martial for the loss of their ship. In the meantime they have been transhipped to the Victory.

The Royal Commissioners appointed to inquire into the management and expenditure of the several Dockyards, after having visited Chatham and Sheerness, returned to Woolwich on Wednesday. The Board consisted of the Earl of Gifford, Sir H. P. Willoughby, Mr. R. Dalglish, M.P., Rear-Admiral Robinson, and Mr. A. Price, R.N., secretary. They arrived at the dockyard at 12 o'clock, and promptly commenced their duties in the office of Mr. Thornton, Assistant-Master-Shipwright of the yard, by a lengthened examination of the Commodore Superintendent, the Hon. J. R. Drummond, Mr. Turner, Master-Shipwright, and others. The proceedings were strictly private. It is stated that the Commissioners will visit Portsmouth on Monday.

The new naval gun carriage adapted for the Armstrong 40-pounder under the hands of the artificers of the War Department, Portsmouth, has been again tried on board H.M.'s. gunnery ship Excellent, with the happiest results. So successful indeed was the working of the carriage with the rear chocks, that the officers conducting the experiment was induced to fit a rear axletree and trucks in place of the chocks, with which it was also found that the recoil of the gun when discharged went smoothly home to a tent breeching. The trucks have the advantage over the chocks, that they the more easily enable the gun to be run out, and the handspikes are less in the way of the loading members. The new carriage has been forwarded to Woolwich Arsenal, when it will probably become the pattern which will guide the issue of naval carriages for rifled ordnance. The simplicity of its construction will be a great advantage to the service, and is not a little creditable to Captain Hewlett, and the intelligent foreman who carried out his ideas. Encouraged by the success of their attempts, these officers are now attempting to adopt a common carriage to a naval pivot slide, also for the service of the Armstrong gun; and experiments on this plan will be carried on board the Excellent during the following week. The public will be large gainers by the success of all these experiments, as they will enable the immense number of our gun carriages to be worked up for active use; but which, otherwise, by the introduction of the new ordnance would become a dead loss to the nation.

The Navy Gazette.

ADMIRALTY, SOMERSET HOUSE, December 4.

Parliamentary Grant.—With reference to the advertisements which appeared in the *London Gazettes* of the 23rd and 27th of November, 1860, giving notice of preparation for the intended distribution of the sum of 33,000*l.* voted by Parliament for the Naval Forces employed on the China station between the 1st of October, 1856, and the 20th of June, 1858, notice is hereby given that, as only

Digitized by Google

those ships which were present on that station for not less than three months within the above-named period, are to receive one month's additional pay of 30 days, the whole of the crew of Her Majesty's ship Spartan will not be entitled to participate, but only such portion of it as were draughted from her to other ships, and who have completed the three months' service eastward of Singapore

BOARD OF TRADE, DECEMBER 5, 1860.

NOTICE TO MARINERS.

No. 12976.—The following Despatch has been received at the Board of Trade from Her Majesty's Consul at the Cape de Verd Islands.—Copy.—British Consulate, Saint Vincent, Cape Verd Islands, November 22, 1860.—No. 5.—Sir, I have the honour to report, for the information of the Board of Trade, that the white hulk, Ocean, belonging to Messrs. Visger and Millers, and used as a coal depôt in this harbour, has been, by order of the Local Government, removed further into the bay, towards the south side of it. It is important that this information should be made public, because Masters of vessels accustomed to frequent this port, and who are not aware of this change, may mistake their position and run aground. The following are the compass cross bearings, taken by Lieutenant R. M. Gillson, R.N., of the present position of the hulk, viz.: Flag-staff of the fort, N.N.E., church, E. and by S. ½ south. Variation allowed 17° 46′ west, and the depth of water at low tide is 16 feet. I have, &c., (Signed) THOMAS MILLER, Her Britannic Majesty's Consul.

ADMIRALTY, DECEMBER 7.

NOTICE TO MARINERS.

(No. 41.) MEDITERRANEAN—SICILY.—*Revolving White Light on Favignana Island.*—The Sicilian Government has given notice, that on and after the 24th day of December, 1860, a light will be exhibited from the lighthouse recently erected on Sottile or Mamone point, on the south side of Favignana island province of Trapani, west coast of Sicily The light will be a *revolving white* light, eclipsed every *minute.* It will be elevated 141 feet above the level of the sea, and should be seen in clear weather from a distance of about 20 miles. The illuminating apparatus is dioptric or by lenses of the third order. The position of the lighthouse is given in the Sicilian Notice as lat. 37° 55′ 46″ N., long. 12° 16′ 6″ East of Greenwich. By command of their Lordships, *John Washington,* Hydrographer. Hydrographic Office, Admiralty, London, 26th November, 1860. This Notice will affect the following Admiralty Charts:—Mediterranean, General, No 2158; and Sicily, West Coast, No. 187.

(No. 42.)—AFRICA—SOUTH EAST COAST.—*Fixed White Light at Mouth of Buffalo River.*—The Colonial Government at the Cape of Good Hope has given notice, that on and after the 25th day of August, 1860, a light would be exhibited from the lighthouse recently erected at the entrance of Buffalo River, East London, South-east coast of Southern Africa. The light is a *fixed white* light, elevated 45 feet above the level of high water, and visible in clear weather from a distance of about 11 miles. The lighthouse—painted in alternate bands of red and white—stands on the reef at the south side of the entrance of the river. By command of their Lordships, *John Washington,* Hydrographer, Hydrographic Office, Admiralty, London, 26th November, 1860. This notice affects the following Admiralty Charts:—Mouth of Buffalo River, No. 1843; Africa, South Coast, Sheet 6; and Indian Ocean, Nos. 2483, 748a.

(No. 43.) ENGLAND—SOUTH COAST.—*Red Buoy off the Mewstone Ledge.*—Notice is hereby given, that a *red Buoy,* marked Mewstone Ledge, has been placed near the extremity of the rocks extending in a south-west direction from the Mewstone at the entrance of Plymouth Sound. The Buoy lies in 7¼ fathoms at low water, with the peaks of the Great and little Mewstones in line bearing E.N.E., and the south-west end of Picklecombe Fort, in Mount Edgecumbe Park, touching the north side of the breakwater lighthouse, N. by W. ¾ W. The inner chequered Buoy near the east end of the breakwater has been removed. *The bearings are Magnetic. Variation,* 23° 10′ *West in* 1860. By command of their Lordships, *John Washington,* Hydrographer, Hydrographic Office, Admiralty, London, 28th November, 1860. This Notice affects the following Admiralty Charts:—Plymouth Sound, No. 30, scale m=5·0 inches; Plymouth to the Lizard, No. 29, scale m=0·8 inches; and English Channel, No. 1593. Also, Channel Pilot, Vol. I, page 46

THE MILITIA.

The Suffolk Artillery Militia was disembodied at Ipswich on Friday week. Colonel Adair, the commanding officer, received, through the Lord-Lieutenant of the county, an intimation from the Secretary at War that the spirit and conduct of the regiment was highly appreciated by Her Majesty.

The 1st Regiment of Staffordshire Militia arrived at head-quarters at Litchfield, from Newcastle, Sunderland, and Tynemouth, last week, for the purpose of being disembodied. Previous to their departure from the north a good number availed themselves of permission to enter the regular army. Col. the Hon. W. P. Talbot addressed the regiment at Litchfield, and read a letter from the Lord-Lieutenant of Staffordshire, Lord Hatherton, conveying to the corps the thanks of the Queen for the services they have rendered to the country. The men were paid off on Friday week.

THE ROYAL EAST KENT MOUNTED RIFLES YEOMANRY.—Some dissatisfaction and universal disappointment has been experienced by the members of this fine regiment of yeomanry cavalry, consequent on the policy of the Government in not calling the yeomanry out for the annual eight days' permanent duty. The omission, however, has not, as was at one time expected, resulted in any serious falling off either in the strength or efficiency of the regiment.—*Kentish Gazette.*

The Militia Gazette.

WAR OFFICE, PALL MALL, DECEMBER 4.

4th or Duke of Lancaster's Own (Light Infantry) Regiment of Royal Lancashire Militia—Ensign Hugh Hilton Hornby to be Lieutenant, vice Frederick Henry Brice, resigned; Ensign James Frederick Steiner to be Lieutenant, vice John Bryce Wilkinson, resigned.

Artillery Regiment of Royal Lancashire Militia—Her Majesty has been graciously pleased to accept the resignation of the commission held by Assistant-Surgeon Charles Calthorp Mitchinson.

Durham Militia Artillery—Captain George Hodgson to be Major, vice Cookson, resigned.

Memorandum—The Queen has been graciously pleased to accept Major William Cookson's resignation of the commission which he holds in this regiment.

Warwickshire Yeomanry Cavalry—Her Majesty has been graciously pleased to accept the resignation of the commission held by Captain William Stratford Dugdale.

WAR OFFICE, PALL MALL, DECEMBER 7.

Northumberland Artillery Regiment of Militia—Preston Osborne Page, Gent., to be Second Lieutenant.

Artillery Regiment of Royal Lancashire Militia—The Queen has been graciously pleased to accept the resignation of the Commission held by First Lieutenant John Francis Henry Harrison.

Royal Carnarvonshire and Anglesey Militia (Carnarvonshire Wing)—Griffith Humphreys Owen, Esq., to be Captain, vice Pennant, resigned.

Merionethshire Wing of the Montgomery and Merioneth Militia—Lieutenant Edward Gilliot Jones to be Captain, vice Lee, resigned.

Memorandum—Her Majesty has been graciously pleased to accept the resignation of the Commission held by Captain Charles H. L. Lee in the above corps.

The following article is substituted for that which appeared in the *Gazette* of the 30th November ultimo:—

2nd Regiment of the Royal Bucks Yeomanry Cavalry—Lieutenant, the Viscount Kirkwall to be Captain, vice Robarts, deceased; John Henry Bryant, Gent., to be Cornet, vice Maberly, promoted.

VOLUNTEERS.

METROPOLITAN.

9TH (WEST) MIDDLESEX RIFLES.—The practice-ground of the Harrow Rifles having been kindly granted by Captain Templer to this corps, on Wednesday last 12 members of the corps, accompanied by their musketry instructor, proceeded to Harrow to fire through the ranges of 650, 700, 800, and 900 yards, in order to qualify themselves for marksmen, and to compete for a prize of 5*l.* given by Lieut.-Colonel Lord Radstock to the member making the greatest number of points on shooting through the first class. The following were the number of points made with five shots at each range of 650, 700, 800, and 900 yards:—A company.—Mr. Charles Hall, 13 points; Mr. G. Hering, 13; and Mr. F. Wiggin, 6. B company.—Sergeant Ivimey, 12; and Mr. F. H. Allies, 7. D company.—Mr. George Close, 7. E company.—Sergeant De Morgan, 8; Corporal R. Key, 13; Mr. Nankivell, 8; Mr. Spencer, 8; Mr. Blakison, 11; and Mr. Kitson, 7. Captain Bridgman, the musketry instructor, made the extraordinary number of 18 points in 20 shots, with various rifles, in firing through the several ranges. As 7 points at the above ranges qualifies the member to be classed as a marksman, it will be seen that 11 out of the above 12 competitors are entitled to that distinction.

11TH (ST. GEORGE'S) MIDDLESEX RIFLES.—Owing to various opinions that have been expressed as to which is the speediest, and at the same time the most effective way of clearing ground which is already occupied by spectators, Lieut.-Colonel the Hon. C. A. Lindsay, took the opportunity of exemplifying what he considered the surest manœuvre to gain the object, and one which he maintains cannot fail, even in the face of the largest assemblage of well-disposed persons, and with a comparatively small body of men. The corps was marched into the centre of the ground intended for the parade of the Civil Service on the 9th of November, for which corps it paid the compliment of keeping the ground. It took up its position in open column, right in front. A hollow square was then formed, facing outwards; and after the necessary cautions, the words "quick march," "step short," were given, producing a momentary effect of the object in view. The flank files of each of the four faces were instructed to keep together as they advanced, so that the extensions necessarily took place from the centre of each face. The square by degrees assumed gigantic proportions, until the required space had been gained, upon which the bugle sounded the halt. Every man had strict orders not to allow any person to pass within the enclosure thus made, and even in the event of the populace becoming obstinate or unruly (which never happens on such occasions) so that the intervals between the extending files were forced, the square would, upon the close being sounded, be simply called in, and be ready to commence the manœuvres again. Lieut.-Colonel Lindsay has established an interesting mark of distinction in the corps, which will be the means of creating an increased emulation for the annual contest for the Challenge Cup. The mark consists of an embroidered silver badge closely resembling the Challenge Cup, which is to be worn only by those members who win it from time to time. The badge will be worn on the right arm below the elbow, and will never be discontinued. All members who wear the badge will be entitled "cup-bearers," and will be in attendance as an escort upon the cup upon the annual challenge day. The cup-bearers will also be the guardians of the Challenge Cup upon the occasion of the Annual Regimental Dinner on St. George's Day.

12TH (BARNET) MIDDLESEX RIFLES.—The challenge given by Captain Wilbraham Taylor, of this corps, and which appeared in the *Times* of the 22nd ult., having been accepted by the Admiralty Company of the 21st (Civil Service) Middlesex Rifles, the match took place on Saturday, at the practice ground of the challengers at Highwood. The conditions of the match were that ten members should compete on either side, and should fire five shots at each of the ranges of 300, 500, and 800 yards. The scores made respectively were, by the Barnet Company, 34 points at the first range, 23 at the second, and 12 at the third, total 69 points; and by the Admiralty Company, 40 points at the first range, 32 at the second, and 12 at the third; total 84. The Admiralty Company, who were thus the victors by 15 points have gained the prize of a silver cup of the value of 10*l.*, but with the condition that in order to promote a continuance of similar contests, they are bound to accept the challenge of any other of the Volunteer companies specified in Captain Taylor's letter, if given within the space of one month, to shoot a similar match for a prize of the same value. During the week the *A* Company of the West Middlesex Corps of Volunteers have challenged the Admiralty Company, and having been accepted, the match will take place within a short period.

21ST (CIVIL SERVICE) MIDDLESEX RIFLES.—The anniversary meeting of the Admiralty Company of this corps was held on Thursday evening in their drill-room at head-quarters, Somerset-house, when the prizes which were competed for at the practice-ground of the corps at Wimbledon in October last, were presented to the winners. The match consisted of five shots each of the ranges of 300, 500, and 600 yards; the first prize, a silver cup, being won by Mr. S. S. Lewes, who scored 17 points, and the second, a field-glass, by Mr. Noel Smith, who scored 12 points. Mr. Lewes's score was the same as the highest made at Wimbledon in July last in the competition for the Whitworth rifles, given by the National Rifle Association. The meeting was presided over by Rear-Admiral Lord Clarence Paget, and was attended by Sir Richard Bromley, Sir John Liddel, Colonel Greene, Major Graham, Mr. Richards, and a numerous body of the gentlemen of the Admiralty and visitors, among whom were several ladies. Captain Willis's report of the progress made by the company during the first year of its enrolment was received with marked satisfaction, and the members separated with three hearty cheers for Lord Clarence Paget and their other visitors.

29TH (NORTH) MIDDLESEX RIFLES.—On Thursday evening there was an extraordinary muster of the above corps in the Riding School of the Regent's Park Barracks, for the purpose of witnessing the distribution of the prizes for the best shots at Rifle practice in the 1st Company. The men having been formed into square, Captain Ross presented the 1st prize, a handsome silver tankard, to Private George W. Stoneham; the second prize, a Westley Richards' rifle, Private Tilley; and the third prize, to Private Maryon.

37TH (BLOOMSBURY) MIDDLESEX RIFLES.—The prizes of this corps for rifle practice were to have been shot for at Harrow on the 17th November, but owing to the inclement state of the weather, and other unfavourable circumstances, the gold challenge medal of the corps was alone competed for, and was awarded to Sergeant Pearce, of the 2nd Company, he making 18 points out of 15 rounds at 150, 250, 300, 400, and 500 yards, despite the heavy rain that was falling. On Saturday last, the remaining prizes were, by the kind permission of the Victoria Rifles, shot for at their range at Kilburn, when the following was the result: Non-commissioned officers' prize (purse of 5*l.*), Sergeant-Major Hooper, 10 points, three rounds each, at 200, 300, and 400 yards; the silver medal of the 37th Middlesex, Private Cansick, 13 points; a silver medal, the gift of C. P. Robert, Esq., Private Berridge, 10 points; an Enfield rifle, the gift of the captain-commandant, Private D. Dolamore, 11 points; an Enfield rifle, the gift of R. Stedall, Esq., won by the captain-commandant, by 10 points, and given up by him to the next highest score. The proceedings terminated with a sweepstakes. The corps is rapidly increasing, having nearly doubled its numbers in the last three months.

40TH (CENTRAL LONDON) MIDDLESEX RIFLES.—Captain-Commandant Walters has received an official notification from the Lord-Lieutenant that the Secretary-at-War has sanctioned the formation of this corps as a separate battalion, with the following establishment:—1 Lieut.-Colonel, 1 Major, one Adjutant, 8 Captains, 8 Lieutenants, 8 Ensigns, 1 Surgeon, and 1 Assistant-Surgeon, and 800 men, divided into 8 companies of 100 men. Major-General Sir James York Scarlett, K.C.B., has consented to accept the honorary colonelship, and has promised to use his best endeavours to induce military gentlemen of position to fill the vacant posts of Lieut.-Colonel and Major.

2ND TOWER HAMLETS RIFLES.—The additional company for this corps, which has been formed in the districts of Clapton and Stamford Hill is rapidly augmenting, and already numbers over 50 effectives.

ESSEX.

6TH (COLCHESTER) ESSEX RIFLES.—On Monday last an interesting match took place upon the rifle practice-ground of this corps, near Wyvenhoe Park. The prize competed for was one of Wilson's patent breech-loading rifles of the value with case, of twelve guineas, and ten members entered the lists, the ranges being 300, 400, and 500 yards, five rounds each. Captain Bishop, the winner. 16 points; Lieutenant Osborne, 11; Private Tayler, 10; Private Cobb, 9; Private Duncan, 9; Corporal White 9; Private Cooke, 8; Private Wheeler, 7; Lieutenant Green, 6.

8TH (STRATFORD) ESSEX RIFLES.—Sergeant Martin, who has for some time acted as drill-sergeant to the 2nd company, was, a few days since, presented with a valuable watch and chain by his companions in arms, as an acknowledgment of his services and his exertions in the capacity of drill-master.

10TH (WITHAM) ESSEX RIFLES.—This Corps was inspected by Captain-Adjutant de Crespigny on Monday, who recommended more frequent musters for improvement in company movements.

GLAMORGANSHIRE.

11TH GLAMORGANSHIRE RIFLES.—This corps assembled at Cadoxton on Monday, the 3rd inst., for the purpose of being inspected for the first time by Major Roney, inspector of the district, who congratulated the corps on the clean, bright, and perfect state of their arms, which he said the War Office had been obliged, as they knew, in some cases to complain of.

MOUNTED RIFLES.—A Mounted Rifle corps for the town of Cardiff will soon be formed and equipped. Seventy gentlemen have already put down their names.

MONMOUTHSHIRE.

MONMOUTHSHIRE RIFLES.—The various Volunteer corps in this county are steadily increasing in strength and efficiency, and many of the corps having been united for administrative and review purposes, are numerically very effective. The 2nd Monmouthshire forms a battalion nearly 500 strong, Ebbw Vale and Sirhowy having joined it. The 3rd Monmouthshire Rifles have so increased by the accession of 100 Volunteers from Risca, and 50 from Tredegar, that the commanding-officer is to be Lieut.-Colonel in rank. The 7th Monmouthshire Rifles now number 300 men, and brigade with the Monmouth and Pontypool. It is in contemplation to unite all the Newport bodies into one battalion, which will then number some hundreds.

OXFORDSHIRE.

1ST (UNIVERSITY) OXFORDSHIRE RIFLES.—This corps formed into an administrative battalion under the command of Lieut.-Colonel R. C. H. Spenser, late colonel in the Royal Artillery, was inspected on Monday by Colonel M'Murdo, Inspector-General of the Volunteer Corps of England. His Royal Highness the Prince of Wales, who is honorary Colonel of the University corps, attended the inspection on horseback. On the conclusion of the inspection the companies were formed in square, when Colonel M'Murdo addressed them, and said he was instructed by their honorary Colonel, His Royal Highness the Prince of Wales, who had just left the ground, to convey to them the great satisfaction with which he had witnessed the inspection, and he (Colonel M'M.) had great pleasure in adding that he could bear his testimony to their efficiency. Two days ago he inspected a similar corps at the sister university (Cambridge), and was much struck with the efficiency and skill which they exhibited; in fact, he had no hesitation in pronouncing them equal to any regular or irregular regiment in the kingdom, and in that opinion he was borne out by some distinguished officers. He urged upon all of them the necessity of keeping up their drill, for this was no temporary or evanescent movement, but one which must be permanent, if they desired to be in the best possible position to guard their homes and all that was near and dear to them. He confessed that he had hoped to see a much larger corps, considering that there were from 1200 to 1500 members of the university; and he trusted that when he inspected them again next year he should find a considerable addition to their present number.

2ND (CITY) OXFORDSHIRE RIFLES. — The inspection of this corps took place on Thursday by Colonel Ibbetson.

PEMBROKESHIRE.

MOUNTED RIFLES.—A mounted rifle corps is to be formed in this county, having Haverfordwest for its centre. The strength is to be from 80 to 100 men.

STAFFORDSHIRE.

1ST STAFFORDSHIRE RIFLES.—A rifle shooting match between the members of this corps took place on Monday on the ground of the Newcastle-under Lyne Company. The winner of the first prize (6*l.* 18*s.* 9*d.*) was Private John Crompton, Newcastle company; of the second (4*l.* 12*s.* 6*d.*) Sergeant Higginbottom, Longton company; and of the third (2*l.* 6*s.* 3*d.*) Lieutenant Dutton, Newcastle company. The distances were 200 yards and 300 yards, five rounds each. The winner of the first prize obtained 15 points, the winner of the second 13, and the winner of the third 12.

JEWISH RIFLES.—A numerous meeting of gentlemen of the Jewish persuasion was held at Zetland Hall, Mansell Street, Goodman's Fields, on Tuesday, when resolutions favourable to the formation of a corps of Jewish Rifle Volunteers were carried unanimously. The members present went through their drill under an able sergeant, and evinced great zeal to qualify themselves for their new duties.

DONCASTER RIFLES.—A meeting was held in the Mayor's room at the Town-hall, Doncaster, on Monday night last, to take the necessary steps to establish another rifle company in the town. The meeting was unanimous in its opinion. Fifty-five names were enrolled, and it was stated that fifteen more had expressed their readiness to join.

A VETERAN VOLUNTEER.—Colonel Palmer joined as a private in the London and Westminster Light Horse Volunteers in January, 1819, during the reign of His Majesty George III., in which corps he served until it was broken up in 1828, with all the other Volunteer forces of the country, at the instigation of Lord Lansdowne, at that time Secretary of State for the Home Department. In December, 1830, at the time of the great agricultural riots, at the earnest request of the late Lord Melbourne, at that time Secretary of State of the Home Department, Colonel Palmer, with the assistance of the late Mr. Joseph Jessopp, of Waltham Abbey, and with the especial support and aid of the late Duke of Wellington, Lord Hardinge, and Sir George Murray, then Master-General of the Ordnance, raised a troop of Volunteer Yeomanry Cavalry, consisting of eighty-two members, which was the only Volunteer corps in the county of Essex until the formation of the new rifle corps. In 1838, when Colonel Palmer had brought the Essex Yeomanry Cavalry into a good state of efficiency, an order was issued by Lord John Russell, then Secretary of State for the Home Department, for its dismissal, with several other Volunteer corps in different parts of the country. Colonel Palmer, however, at the request, and by the advice of the late Sir Robert Peel, Lord Hardinge, and Mr. Goulburn, volunteered the gratuitous services of the West Essex Yeomanry to the Queen. These services were accepted, and the corps kept up at the entire expense of the members for five years, when tardy justice was at length done, and it was restored to the same allowance as other Yeomanry corps in the adjoining counties. In 1852—again at the suggestion and by the advice of the late Lord Hardinge—Colonel Palmer increased the force to four troops, armed them with rifled carbines, and added the artillery, which arm was speedily brought to a high state of efficiency by the aid of Colonel Collingwood Dickson, R.A., at that time the commandant at Waltham Abbey, and the officers and non-commissioned officers attached to that branch of the Volunteer service.

Messrs. Houlston and Wright have published their Volunteer, &c., Almanack for 1861, which contains the War Office circulars relating to the movement, the rifle matches, list of the various corps, and information likely to prove useful to Volunteers.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, DECEMBER 4.

39th Middlesex Rifle Volunteer Corps—Richard John Edgell, Major in the Bengal Army, to be Adjutant from the 9th of October, 1860.

1st Battalion of the Isle of Wight Rifle Volunteers—John M'Grotty, Gent., to be Adjutant, from the 8th of September, 1860.

3rd Corps (Howden)—Captain Eric William Clarke; Lieutenant Thomas Carter; Ensign Edwin Storry; Honorary Assistant-Surgeon John Hartley.

5th Corps (Burlington)—Captain Thomas Prickett; Lieutenant Thomas Harland; Ensign Joseph Barugh; Honorary Chaplain the Reverend Henry Frederick Barnes, M.A.; Honorary Assistant-Surgeon John Allison.

6th Corps (Beverley)—Captain Harold Barkworth; Lieutenant Richard Hodgson; Ensign Henry William Bainton; Honorary Assistant-Surgeon Robert George Boulton.

8th Corps (Driffield)—Captain Edmund Dade Conyers; Lieutenant Thomas Hopper; Ensign Richard Botterill; Honorary Chaplain the Reverend James Skinner; Honorary Assistant-Surgeon Alfred Scotchburn.

9th Subdivision (Market Weighton)—Lieutenant William Langdale; Ensign John Seaton West Kirkpatrick.

10th Corps (Hedon)—Captain William Raines; Lieutenant Arthur Iveson; Ensign Robert Charles Metcalfe.

A RELIC OF OLD TIMES.—Some few weeks ago an advertisement appeared in the *Times* from a fisherman in Cornwall, who offered for sale an old buckle which he had taken in his net, while out trawling off the Lizard. On examination he found that the buckle bore the name, arms, and portrait of Admiral of the White, Sir George Brydges Rodney, and the metal of which it was made was silver, gilded on the upper surface. He parted with his prize, no doubt for a consideration, to the Hon. Sarah Mundy, the only surviving daughter of the famous Admiral; and an examination of the relic has excited a good deal of interest and discussion. The letters are moulded, not cut, and are as fresh and perfect as on the day in which they were first cast. The question however has been mooted, how it was possible that, supposing this was a shoe-buckle of the admiral's, he should have worn his own crest, name, and portrait, so conspicuously on his own person. It has been stated by old sailors still living, that in former days, captains and admirals had badges for the use of their gig's crew; still this is not altogether satisfactory, nor is another idea which has been started, that it was the collar of a favourite dog, who was accidentally drowned, for in this case it would hardly have been of silver. That this is a genuine article there can be no doubt, but in what way it was used, in 1778, when Lord Rodney was Admiral of the White, is still wrapt in mystery. Perhaps some of our readers may be able to throw a light upon the subject.

LORD CLYDE AND THE SKINNERS' COMPANY.—A special court of the master, wardens, and assistants, of the Skinner's Company, was held on Thursday evening, in order to present the freedom of the guild to Lord Clyde. The freedom having been presented, a grand banquet was given; and in acknowledging the toast, "The Right. Hon. General Lord Clyde, Citizen Skinner," his lordship said:—"My Lord Mayor and Gentlemen,—I thank you for the very handsome manner in which you have druuk my health; and I also have to express my acknowledgments for the way in which the toast has been received by the distinguished assembly I see before me. I feel it is no slight favour for an old soldier to receive a welcome and a kindly reception on his return from a scene of duty to his native country. I feel very proud in having been this day enrolled a member of the ancient and honourable society upon whose lists I have seen the names of many who have performed distinguished services to their country. It is also a great gratification for me to know that the body to which, since this afternoon, I have had the honour to belong, has long been distinguished for its enlightened administration and its great liberality in the management of its property. I can only assure you that it has afforded me great pleasure to receive this honour at your hands, and I will not further trespass on your time than to express my gratitude at having been this day admitted one of your body."

THE ARMY AND NAVY GAZETTE
AND
JOURNAL OF THE MILITIA AND VOLUNTEER FORCES.
EDITED BY W. H. RUSSELL, ESQ., LL.D.,
(Late Special Correspondent of *The Times*.)

The subscription is 7*s.* 7*d.* per quarter, or 30*s.* 4*d.* per annum, payable in advance, postage included (excepting abroad, which varies according to the route and destination). All Editorial Communications should be addressed to W. H. Russell, Esq., and business letters and advertisements to Mr. Archibald Graham, to whom post-office orders, &c., are payable. Advertisements received up to Thursday evening. The Paper is published every Saturday in time for the Morning Mails.
Office, 16, Wellington Street, Strand, London, W.C.

STAFF EXAMINATIONS.—ALL BOOKS REQUIRED for Staff and other Examinations may be had at MITCHELL'S MILITARY LIBRARY, 39, CHARING CROSS, S.W.

Just published, with Maps and Index,
THE ANNALS of the WARS of the XVIIIth CENTURY.
By Lieutenant-General the Hon. Sir E. CUST.
Volume I. 1700—1739. | Volume III. 1760—1783.
Volume II. 1739—1759. | Volume IV. 1784—1795.
Volume V. 1796—1799.
Each Volume is complete in itself, and may be had separate, price 5*s.* each.
"A military text-book."—*Athenæum.*
"The 'Annals' are invaluable to the soldier who desires to know the history of his profession."—*Times.*
"These volumes supply a store of profitable reading to the soldier or sailor."—*Saturday Review.*
"A lucid summary of all the most important operations (naval as well as military) of the eighteenth century."—*Army and Navy Gazette.*
W. Mitchell, Military Bookseller, 39, Charing Cross, London, S.W.

BOX OF MILITARY BLOCKS, illustrative of the Field Exercise and Evolutions of the Army, 10*s.* 6*d.*
A CATALOGUE OF MILITARY BOOKS SENT ON APPLICATION.
W. Mitchell, Bookseller and Publisher, 39, Charing Cross, S.W.

THE LONDON RIFLE BRIGADE BAND of 21 performers, is provided entirely by H. DISTIN with his newly-invented VENTIL-HORNS. Distin's new RIFLE BUGLE, adopted and sealed as the Government pattern for the Army, can now be had, complete, price 2*l.* 2*s.*, from the Contractor, at his Manufactory, 9, Great Newport Street, St. Martin's Lane, W.C. Estimates for Bands post free. Retail Depot, 21, Tichborne Street, Regent Street, W.

BENSON'S WATCHES.
"Perfection of mechanism."—*Morning Post.*
Gold Watches, 5 to 100 guineas; Silver, 2 to 50 guineas. Send two stamps for Benson's Illustrated Pamphlet, descriptive of every construction of watch now made. Watches sent to all parts of the world.—33 and 34, Ludgate Hill, E.C.
Established 1749.

TO OFFICERS ON THE HALF-PAY LIST, &c.—Messrs. W. H. LOOKER & CO., ARMY, NAVY, AND COLONIAL AGENTS, undertake Receipt and Remittance of Full and Half-Pay, Pensions, &c., and Agency generally, in London, at a fixed charge of ONE GUINEA PER ANNUM. A detailed Circular sent on application; and the necessary Power of Attorney can be sent by post, if desired.—12, Pall Mall East, London, S.W.

MONEY ADVANCED on BILLS, PROMISSORY NOTES, POST-OBIT BONDS, or other securities, and at 5 per cent., on property derived under wills or settlements, without publicity or delay. Confidential applications may be addressed to Mr. Morris, Solicitor, 11, Beaufort Buildings, Strand, opposite Exeter Hall, W.C.

NOTICES TO CORRESPONDENTS.

Many communications which are in type must stand over owing to great press of matter. Our correspondents will therefore understand how it is they must be content to wait till next week.

A "Subscriber" is informed that the initials of the officer to whom he refers were incorrectly given in the list of candidates for admission to the Staff College issued from the Horse Guards. E. C. was not a candidate.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the Editor cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the Editor.

It is particularly requested that applications for copies of the Army and Navy Gazette, &c., and advertisements be sent to the Publisher, Mr. Archibald Graham, and not to the Editor.

Army & Navy Gazette.

LONDON, SATURDAY, DECEMBER 8, 1860.

The wars of the Roses, destructive as they were had one characteristic of the results of civil war in an island—they did not expose, at their particular epoch, the country to aggression or invasion by the weakness of exhaustion. If the enemy of the day could have known that most of the Barons of England had been slain in homely battle-fields, and that the deadly arrows of their archers had found marks in English hearts, no doubt he would have endeavoured to have taken revenge for the heavy blows dealt by invaders from the island to which the Norman had given the impulse of adventure and attack. Happily, or unfortunately, as the case may be, the Normans in England had it all their own way, and led the best of their race and the rising undergrowth of indigenous squierarchy, with all its soil-sprung tendrils, to a deadly grafting. Families and names disappeared utterly, and voices cry out in vain from Domesday-book and hear no kindred echoes. The consequence was, that for a time—a period of at least one hundred years—England was in such a state that she would have fallen an easy prey to any invader. Luckily for us, invaders, except those of our own kin, were not forthcoming. Evil-wishing enemies were engaged on their own account, doing very much the same things as our respected ancestors, their contemporaries, were busied on at the same time. In the place of the big Barons there came to the front, after the Rosalea, which spotted the land with blood, a great race of adventuring gentlemen and small squiredom, such as illustrated the reign of Elizabeth, and then—for the strangest development of all the antipathies of race, all the inequalities of legislation, and all the evils of class government—came the tremendous struggle between Roundhead and Cavalier, from the ashes of which, again, arose the British Standing Army. For nearly a century the spirit of amateur soldiering, and the love of the profession of arms, exercised a powerful influence over the gentry, as well as the classes immediately above and below them. Oftentimes from political dislikes or necessities, English gentlemen appeared in foreign armies as soldiers of fortune, and opposed to their countrymen hostile swords in many memorable fields. Scotland threw out the cadets of her Norman houses: few of her pure Gaelic population adventured in such distant battle-grounds—on the fields where Swede and Dane, Russian and Pole, Imperialist or Frenchman, were contending for the mastery; and Ireland, true to the perfervid unchristianity of her religious convictions, which have annihilated even the intense antagonism of her animosity of race, sent regiments of exiles—who were more anxious to strike a blow at England than to avenge the wrongs of their religion—to every country where they could find anyhow pay and a sword.

In the pursuit of arms during the incessant wars of the eighteenth century, a large majority of the young gentlemen of the kingdom were engaged at one time or other. It was fashionable to go to the war, to make the grand tour, to serve against the proud Turk, to take a part in a razzia against the rovers of Salee or the pirates of Algiers. Most youths of fair figure and pretensions in other countries were to be found in the great camps which dotted all Europe in those days, and till the civil dissensions which followed the advent of the House of Brunswick to the throne checked the exodus, neither Great Britain nor Ireland were inadequately represented under the contending banners which floated over half the civilised world. The immense prosperity and huge development of the influence of the agricultural and commercial classes at the close of this period, diminished the force of the motives which impelled many of the younger representatives of the families of England to go abroad in search of service. India, too, afforded them a grand career under their own flag; and the hated principles of the French Republic spread so rapidly, that they were scarcely able, as heretofore, to choose their army, and to make a campaign or two in great state, and with no very decisive result beyond those which might be had in a breach, or after a few sieges *secundum artem.* But the national repugnance to the acts and the tendency of the Revolution was acuminated by the actual danger of our position, in face of an enemy who was overrunning the world. Our armies were employed in straggling expeditions in distant countries; our shores were menaced, our homes were in danger; and the national spirit, supplementalising a deficiency in the system of our organisation for defence, which makes the performance of a common duty—the defence of country—the accident of a voluntary good feeling, individual and peculiar, presented us with a magnificent army of Volunteers. Ireland had indeed set a great example in the creation of her splendid sectarian force, but the Dungannon declaration was not an encouraging symptom of the possible results of volunteering to the Ministry, at a time when there was an amount of free-thinking, and something like treason which would shock even a Chartist gathering; and the Government were not at all sorry to be relieved from the necessity of keeping up an army of Volunteers. To give a legitimate and wholesome tendency to the spirit which is always evoked by the sound of cannon and the smell of gunpowder, the Ministry of the day, however, assisted, as far as they could, those who desired to see service as Volunteers, and gave them leave to serve in the ranks with the prospect of earning commissions by distinguished services. In the Crimean war applications for similar advantages were altogether discouraged, although we were obliged to raise foreign legions, and to equip Turkish and Polish contingents. We have now, however, an Army of Volunteers, which have sprung up like the Caducean teeth-born army, which shows a pretty fine row of incisors as it stands. There is only one drawback to it that we can see—there is too much of the gentle blood, of the intelligence, and of the old spirit which gave rise to the bodies alluded to in the ranks of the Volunteers, as mere rank and file. The leaven ought to be applied to a larger mass. The destruction of a corps of Volunteers would represent an enormous national loss, and the annihilation of a considerable number of those who in a prolonged struggle should be leaders of bodies of their countrymen. If the basis of the formation were enlarged it would rest more solidly and tower more surely. When that time comes, however, the present knowledge of the Volunteers will be useful, and will animate their fellow countrymen. It is curious to see that at the very moment a meeting of poor rebellious creatures, whose sole claim to notice consists in their having had the O'Donoghue—a very respectable young Irish gentleman, whose ancestors were generally very good subjects of the English crown—as their chairman, was engaged in spouting out or listening to "Tallagh-hill talk," which is a name in Ireland for threats not meant for execution—the Tipperary Militia, officers and all, were volunteering to the last man to join the Royal Artillery. We believe, in fact, that the Repealers themselves would take the Saxon shilling, or fight without it if it came to the worst, sooner than see the soldiers of the Eldest Son of the Church chasing the pigs and kissing the girls, from Giant's Causeway to Cape Clear, with equal pleasure and impunity.

We will not pretend just now to state the exact cause of Sir Baldwin Walker's retirement. It has been a matter of notoriety that the department of the Comptroller of the Navy has for several weeks past been in a state of variance with "the Board," on points connected with the plans for building the three additional iron-plated steam-ships, the probable construction of which we announced in this journal several weeks back. This fact, combined with other circumstances, to which reference was frequently made during the last session of Parliament, would furnish an ample reason for Sir Baldwin Walker seeking in the discharge of active duties afloat, some relief from the monotonous rule of Whitehall. Sir Baldwin will, as soon as circumstances can admit, proceed to Portsmouth, and hoist his flag (blue at the mizen) temporarily on board one of the ships in harbour; he will then strike it, and proceed on leave. In the meantime the Euryalus, his future flag-ship, will be entirely refitted and prepared for his reception, so as to enable him to leave England early in February for the Cape of Good Hope, the naval command of which he will assume in the place of Rear-Admiral the Honourable Sir Henry Keppel, removed to the south-east coast of America. Sir Baldwin Walker has held the post of Surveyor, or, as the newfangled term is, Comptroller of the Navy, during a most momentous period in the existence of the British Navy. We will not go back to the days of Rule and Seppings, further than to remark there were no foreign navies of any note in existence when they flourished. St. Vincent, the Nile, Trafalgar, and the countless number of smaller actions which have rendered famous the names of Jervis, Nelson, Calder, Strachan, Saumarez, Cochrane, Hoste, Napier, and many others, had disposed of every enemy who, prior to the breaking out of the French revolutionary war, could have opposed a line of battle to a British fleet; and until that excellent but somewhat eccentric officer, Sir William Symonds, had the opportunity of introducing an improved mode of ship-building to public notice, we were content to rub along at a jog-trot pace, occasionally going out of our way by converting a favourite square-sterned ship into an ugly goose-ended craft, by which we were enabled, in case of need, to fight perhaps two or four guns more, at the cost of almost another ship. We had, it is true, pleasant little experimental cruizes between brigs with jigger masts and brigs without jigger masts. We occasionally filled the wards of Haslar and Stonehouse hospitals with patients suffering from pulmonary complaints, contracted in the Channel during a November and December trial of speed between such useless ships; but little, or indeed no progress was made in introducing an improved style of naval architecture. Sir William Symonds and his assistants did much for us during the fifteen years he held office; but Sir James Graham, with his stern principles of economy, did much to prevent great expansion; and Louis Philippe, the staunch advocate of the *entente cordiale*, was not wanting to prop these up with the promise of keeping his fickle-minded people well in hand, so as to prevent any anxiety coming to us from a quarter more formidable than any other. Sir William, however, did his best with the means at his disposal. Steam was in its infancy during the greater portion of the time he was at the Admiralty, and his talents were chiefly devoted to the development of ships possessed of fine sailing qualities. We

Digitized by Google

could not, however, avert our destiny; steam would, in spite of old sailor fancies, make its way; paddles and screws fought hard for the ascendant, and, although at one time the advocates of the former seemed to have gained a start on the latter, their noisy splash was soon doomed to be stilled by the quiet grind of their opponents. The latter end of the year 1847 saw Sir William Symonds still Surveyor of the Navy, and Sir Baldwin Walker captain of the sailing 50-gun frigate Constance, on the Pacific station. The resignation of Sir William was accepted, and the First Lord of the Admiralty dispatched a messenger across the Isthmus of Panama to bring home his successor. This was a high compliment paid to the talents, judgment, or whatever else were the attributes of Sir Baldwin Walker in the eyes of his patrons; he was selected from the large body of naval men at home and abroad to play no insignificant part in public life. Sir Baldwin's antecedents were certainly creditable to him; he had raised himself by dint of hard work and rectitude of conduct, unaided by an atom of political interest, to the highest rank obtainable by selection in our own Service, while he had been chosen for peculiar distinction in that of a foreign, but friendly power. He assumed the duties of the office, which we regret he is now about to vacate, in the early part of 1848, and from data in our possession, we are enabled to show what has been done during its tenure by him towards the reconstruction of the English Navy, rendered imperative by the changes going on in France. It is admitted on all sides that for warlike purposes, we must discharge from our calculations sailing line-of-battle ships. They can doubtless be of some service, but one thing is certain, they can never enter a line. We will therefore give a comparison between our screw navy at the beginning of 1848, and what it will be at the commencement of 1861—which we are enabled to do with the assistance of our able correspondents at the various outports, and which from a minute check on our own part we believe to be thoroughly correct:

On the 1st of January, 1848, we had 9 frigates, 1 block-ship, 10 corvettes and sloops, 4 gun-vessels, and 4 small vessels, tenders, and yachts. On the 1st of January, 1861, we shall have 67 ships of the line (showing an increase of 67), 42 frigates (increase, 33), 9 block-ships (increase, 8), 4 iron-cased ships (increase, 4), 4 mortar-ships (increase, 4), 95 corvettes and sloops (increase, 85), 8 floating batteries (increase, 8), 29 gun-vessels (increase, 25), 164 gun-boats (increase, 164), 12 troop and store-ships (increase, 12), and 9 small vessels, tenders, and yachts (increase, 5), amounting in 1848 to 28 screw vessels, and in 1861 to 443; showing an increase of 415 of all descriptions. The tonnage (including paddle-vessels) amounting in 1848 to 120,573 tons, in 1861 to 617,493 tons (increase, 469,920 tons); the horse-power, 48,469 in 1848, and 128,482 in 1861 (increase, 80,013 h.p.).

From the first moment Sir Baldwin Walker took his seat as Surveyor of the Navy, he brought his best energies to bear upon the single discharge of his duties. He took office under a Whig Government (although no politician), and in 1852, when the Conservatives were in power, he earned golden opinions from them by his resolute recommendation to increase the efficiency of the Navy. In 1856 he was created a baronet in token of the approbation entertained of his merits. In 1858 Sir John Pakington received at his hands an amount of advice and assistance which rendered the so-called reconstruction of our Navy a facile task to him; and in 1860 he resigns his trust clear and unpolluted, and we fear the Duke of Somerset will have hard work to find an officer ready and capable enough to take it up.

The article in *Blackwood's* for December, in continuation of the previous one on iron-cased vessels, is all in favour of oblique-sided ships, as advocated in these columns, instead of fresh Trustys or Warriors. The description of the latter vessel is exceedingly good; and it is accurate, with the exception of what is said as to the probable mounting of guns on the upper deck. It is a moot point whether one or two at bow and stern may not be so placed, but it has neverbeen intended to place broadside guns on the upper deck. The article, too, overlooks the full danger arising from the fore and stern part of the Warrior not being invulnerable. No doubt buoyancy is of great consequence; but what if the most buoyant and vulnerable parts get much knocked about? If, while the Warrior pursued one vessel, another sent a few heavy shells into her unprotected stern, we fear her screw would soon be put out of order, and then!

The article does full justice to Captain Coles's cupola system, and to Mr. Jones's angulated-sided ships, and points out how necessary even yet it is to have thorough systematic experiments made to discover how shot can best be diverted by oblique metal surfaces. It declares that by May next the French will have 600 guns behind floating armour plates, 10 vessels like the La Gloire and 100 gun-boats. It even goes beyond the question of vessels, and argues that our coasts cannot now be defended by masonry-work fortifications, and that "our future bulwarks must be of iron." The article is well worthy of the pen to which it has been ascribed.

His Royal Highness the General Commanding-in-Chief will hold a levee at the Horse Guards on Wednesday next, the 12th instant, at one o'clock.

The *on dits* which have been flying about the garrison of Woolwich during the last ten days are of a numerous and mixed character; among the most prominent is the embodiment of the Tipperary Militia Artillery into the Royal Artillery, the consideration of which is now under the eyes of the War Office. The regiment volunteered, it is said, from right to left, from the colonel to the trumpeter: and, it has been reported, demands to be incorporated, officers and men all standing in their corresponding ranks! It would be impossible to describe the sensation which the bare possibility of such an event has caused among the regular officers; nor is it to be wondered at, considering how completely it would smash all vested rights, and utterly sap the prestige and faith of the regiment in our rulers. But we believe the fears are groundless on this score, and although it is probable some of the militia officers will, on passing the requisite examination, be gazetted, yet due regard will be had to the position and rights of all other officers, as already established by the rules of the Service. In consequence of this unexpected addition, it is reported that the 16th brigade will be in the *Gazette* at an early date, and that this accession will not militate against a further increase in the Army Estimates.

Those extraordinary beings who were ordinary men like any of us till they became what are called "authorities," do not seem very happy in their relations with the outer world which is non-official—that is, they do not understand the feelings of that unfortunate race which does not belong to "the authorities," and which is, therefore, not in "the proper quarter." For instance, let us take a small matter like the presentation of a medal; it is all a matter of chance whether it is presented with all the pomp and ceremony of military honours, as it ought to be whenever it is possible, or is delivered by the twopenny postman. Now, men who have earned decorations or medals like a little formality and some decent observance in the bestowal. What an immense value was added to the Victoria Cross when it was given by the hand of Queen Victoria *coram populo!* How proud the soldier feels who is picked out of the ranks, and receives his reward for good conduct or service from his commanding officer before his comrades! But for those who have won the Indian medal there is small chance of such *incrementum honoris*. The "authorities" being in a transition state, perhaps, have resolved that least said may be soonest mended. The Indian worthy, who knows that he is down for his medal, learns after some delay that if he applies for it at the War Department of the India House, he may hear of something to his advantage. It may be said, by the way, that in no Government department will he find gentlemen more obliging or courteous than those with whom he may have to transact his business in Leadenhall Street, but it is likely enough that on his first appearance, the medal seeker may be told his time is not yet come. His name is duly entered after a search in a number of small drawers, which are filled with pasteboard cases; on some future occasion he may be presented by one of the gentlemen with his medal and riband attached, for which he gives a receipt. He then retires with a sort of idea that they manage those things better in France. If he is contented, there are many of his companions in arms less easily satisfied, and some of them have even complained that they have received their honours by the legitimate constitutional mode of conveyance, which is directed by the Postmaster-General. A delivery by the members of the corps of Commissionaires might be thought by some people an improvement on that simple Anglo-Saxon mode of doing business!

Sir Richard Airey's period of service as Quartermaster-General at head-quarters expired on the 2nd of this month. As yet we hear nothing beyond rumour as to the arrangement to be made on his retirement; but we believe it is not improbable that he will hold office for a few months longer, until the new Deputy-Quartermaster-General, Colonel Herbert, shall have become thoroughly acquainted with the business of the office, when the latter will succeed to the chief post, the subordinate one which he now fills, being abolished.

In the *Calcutta Gazette* there are official notifications, that on account of Hindoo religious festivals—poojahs—the Public Treasury would be closed for twelve days in October, and for six days in November, and acceptances falling due in the interim, therefore, would be paid before the dates of closing. The Hindoos are still strong in Hindostan.

The increase to the Royal Artillery will amount to 500 men, but no addition to the Estimates will take place in consequence, inasmuch as these men are intended to supply the place of the Local Indian Artillery. Recruiting for the latter corps has long ceased practically, and is now formally forbidden by the Act of last session.

Our attention has been called to the fact that there are three companies of Royal Engineers and a strong detachment of Madras Sappers with the Expeditionary Force in China, where no seiges can be anticipated, and it is fair to admit that the force is large enough for the work expected.

Major the Hon. H. F. Keane, who has just been appointed Assistant-Adjutant-General of Royal Engineers at head-quarters, will not, we understand, resign his present honorary post of extra aide-de-camp to H. R. H. the General Commanding-in-Chief.

The Treasury have decided to issue the Delhi and Lucknow prize money according to the Crimean scale, instead of on the Indian scale, as was expected. The decision will create discontent.

Captain Flood, formerly of H.M. 53rd, a meritorious officer of long service for his rank, has been reappointed by Sir W. Mansfield to his staff.

How far the *Indépendance Belge* is correct in a portion of the statement which it puts forth, we know not; but it affords a proof, at all events, that the question of invulnerable ship-building is attracting attention in other countries besides England and France. We copy the following from our above-named foreign contemporary. "We are informed that three more iron-clad frigates are to be laid down. This, in addition to ten now building, and three launched, would give a total of sixteen. They are ordered to be completed by the 1st of January, 1862. According to the *Toulonnais*, the trial trips of the Gloire have been very satisfactory. It is stated by that paper that she has beaten the Algesiras in a trial of speed, both with full and half steam-power, and that she has shown herself a good sea-boat." We have narrowly watched the movements of our neighbours in their progress towards obtaining an iron-clad steam fleet, and with all our care we can only trace to them the following vessels, some of which have only recently been commenced building:

Tonnante, Devastation, Lare, Foudroyante, and Congrue—floating batteries, built of wood, and coated with iron; launched 1855; horse-power, 225.

Gloire, Toulon, (launched); Normandie, Cherbourg, (launched); Invincible, Toulon; and Couronne, Lorient—they are 252$\frac{7}{10}$ feet in length and 55$\frac{9}{10}$ feet beam; 900 horse-power.

Paixhans, Peiho, Saigon, and Palestro—floating batteries, building by Mr. Arman at Bourdeaux, of 150 horse-power; length, 157$\frac{1}{2}$; breadth, 47$\frac{1}{4}$; height, 21; draught of water, 8$\frac{1}{2}$.

Magenta, building at Brest; Solferino, at Lorient—rams of 1000 horse-power; length, 281; breadth, 50 feet.

The first-named vessels are the floating batteries of Russian war experience, and are no better than our own.

The return of the two steamers sent to the coast of Iceland for the purpose of taking soundings with the view of laying down a submarine telegraph between this country and America, has proved that all supposed difficulties in the way of carrying out the enterprise have disappeared. We shall doubtless shortly be supplied with the written opinions of the officers of the Bulldog and Fox on the matter, and from what we can gather they will fully confirm the statement we now give.

Mr. Ward's night signal lamps were on Thursday night subjected to further experiments at Woolwich, in the presence of Commodore the Hon. J. R. Drummond, Commander Hawker, and other officers, and we are informed that they were satisfactory. It is, however, to be hoped that no decision will be arrived at by the Lords of the Admiralty pending the trials, which are now officially going on, with the Electric Light, the invention of Professor Way.

Several officers have been named as likely to succeed Sir Baldwin Walker at the Admiralty. Among others, Rear-Admiral George Elliot has been mentioned as the probable future Comptroller of the Navy; but up to last night no decision on the subject had been arrived at by the Duke of Somerset.

CRIME IN THE ARMY.

The expressions of opinion by the judges and magistrates of the land in reference to the causes of crime are entitled to the highest consideration. But they are not above criticism any more than they are infallible. All the processes of social life are now under the microscope of the press. Every function is examined, every action is investigated, every result submitted to analysis. As in old days people died of diseases to which neither cause nor effect could be assigned, so offences were committed which were not exposed to the solvent of statistics or to the exploitations of social reformers, the world being content with the inexorable logic of facts in the shape of unrecorded results. If we had had active police officers, and intelligent magistrates to bring their offices to bear on the incidents which are indicated in Mr. Hogarth's representation of the march of the Guards to Finchley, there would have been a very large list of offences before the public eye of the day, supposing they had been duly recorded. But no reader of this journal will suppose it is our desire to evade the question which has been forced on the attention of the public by the remarks of Mr. Justice Byles, by the leaders in the leading journal, and by the acts which have *pro tanto* disgraced the Army, and with it the country whose honour and reputation that Army is more ready, or at least more successful, in maintaining abroad then at home.

If an Englishman were to read in the public journals that the majority of the criminals at a gaol delivery in France were soldiers, that the neighbourhood of the camps presented scenes of the most appalling vice and degradation, that desertions were counted by tens of thousands, that the most serious crimes were committed by soldiers, voluntarily enlisted, in order that they might escape from the Service, even with the brand of felony on their brows; that open mutiny prevailed in more than one regiment of French soldiers in Algeria, that soldiers made a trade of desertion for the sake of bounty, that in Paris itself outrages on the police by the garde and soldiers of the garrison were so common as to raise the question whether the soldiery should not be deprived of a part of their accoutrements, of which they made frequent and deadly use on the sergents de ville; if he read that the sailors of the fleet were prone to leave their ships at every port, that the lash was regarded as an essential means of keeping soldier and sailor in a state of discipline—he would certainly arrive at the conclusion that the services of France were in a bad way, that the men were ill-treated, or that they were unfit for the performance of their duty. Any Frenchman who arrives at a similar conclusion from the facts he may read in our papers, is very likely to find himself mistaken. The "bull's eye" is turned on everything we do. It is certainly to be regretted that the sights it reveals are not always agreeable. There is—let it be admitted at once—a difficulty, if not an impossibility, in reconciling the administrative action of those who are placed in command of armies and fleets with the diverse theories of public opinion. But, nevertheless, the course to be adopted is plain; it is as unpleasant as well can be, but the path of duty is often painful and rugged.

Discipline must be maintained—it must be rigidly maintained in the interests of the State, including the people who ignorantly declaim against the exercise of the authority which secures to them the possession of every right and privilege they enjoy. No reader of this journal can suppose that we would lend the influence of our opinion, such as it is, to the propagation of doctrines which emanate from an exalted view of high prerogative, or of irresponsible exercise of command. We may say, without any imputation on our honesty, or any suspicion that we desire to flatter the administration of the Army, that we believe the Duke of Cambridge and the authorities at the Horse Guards are actuated by the strongest motives to deal fairly and kindly with the soldiers of our Army. The War Office have assuredly shown no disinclination to carry out the recommendations they have received, or the plans which have been suggested by their own officers for the same object. There is no use in repeating the statement, that the English soldier is better treated than the soldier of any army in the world. He is a free agent up to the time that he accepts the conditions of service, and those conditions are infinitely less onerous than they were at the time when the English Army won its greatest triumphs. If soldiers will insist on ignoring all that has been done for them, if they will defy the law, and outrage order, then, in the name, not only of the Army, but of society itself, we call on the authorities to show that they are strong enough to vindicate the law, and to protect society against outrage at the hands of those from whom it expects protection. If those who are responsible for the discipline of the Army insist on the maintenance of discipline, they, in spite of vulgar invective of the hour, can have nothing to fear, and much to expect, in the support of sound national opinion. At whatever cost it may be achieved, the perpetration of outrage by our soldiery at home or abroad, must be suppressed. It is humiliating and painful in the last degree to be obliged to confess that there are in the ranks of the Army those who are a disgrace to the profession, which civilised as well as barbarous men acknowledge to be the most honourable in the world. Let them be punished so that the ruffianism of the islands shall learn at last that it can find no refuge under the Queen's flag, or in a blue or red coat; but let them be punished even at the risk of excluding from the Service and turning into the criminal population of civil life men whose reckless courage, strength, and daring, would be well exercised against an enemy, but who must not be permitted to find the enemy in their own countrymen.

Having said so much, we may with the greater freedom object to the inferences which have been drawn by Mr. Justice Byles, and by some journals in reference to the distressing cause of these remarks. The learned judge who presided at Maidstone the other day, has expressed an opinion that idleness is the cause of the soldier's readiness to commit outrages on law and order. He was unfortunately justified in some measure by the state of the calendar in the district where he was administering justice, in supposing that the tendency existed.

But, with some knowledge of a soldier's life, we venture to assert that there is no class of Her Majesty's subjects who are less idle or more occupied than the men in the ranks in London, or in camp and garrison, at home and abroad. If Mr. Justice Byles were to compare the work and duties of the numerous class who figure in the calendars as agricultural labourers with those of soldiers, he would find that the hours which are necessarily employed in the discharge of some duty or other in the Army are more numerous than those which the labourer must devote to his work in order to earn his daily bread. Few people out of the Service know, indeed, how much of the soldier's time must be occupied on fatigue duty, in guardmounting, in parades, in cleaning accoutrements, in camp and barrack work, long after the time when he has been dismissed from drill. The moment he leaves barrack he is a marked man — his uniform denotes his calling; he is obnoxious to many insults; he is in many cities in England still nothing more than a pariah of the public-house; a butt for the intelligent artizan of the tavern, or for the occasionally impertinent interference of the police. It is proposed to employ him on public works, on roads, or engineering operations, or trades and callings. Why, we know it as a fact, that when an officer of a regiment set soldiers to work to make shoes for his men, the "liberal" constituency of a large English town sent up a petition and memorial to complain of his conduct in interfering with one of the peculiar trades of their town—and the officer was reprimanded, and told to do so no more. Who does not know how the work of our camps is done? But who can know the tumult there would be if the soldiery were set to work "to interfere with the rates and wages of labour" in any district, unless under the pressure of a shout from the farmers that they are losing their crops for want of hands, when the assistance of soldiers is willingly received? Employ the soldiers by all means, but let it be understood that in their legitimate duty they have plenty of work to do. The cause of the crimes of soldiers, as of other men, is temptation—a motive to do something where the prospect of advantage appears to the doer to be greater than the certainty of punishment. And in the case of the Army, the influence is unhappily exercised in a larger proportion than in other classes, because there is a considerable number of unthinking, ignorant men in the ranks who would be criminals under any circumstances, and who commit outrages as soldiers which they would have committed as civilians. A drunken man as a red coat acts very much as a drunken man in a black coat would do, as soon as he gets into a quarrel. If there should, on the accidental circumstance of his being a soldier, be any reason why he should be more dangerous than another, let him be deprived of the means of mischief. In London, the public attention is caught now and then by cases of outrage on the part of soldiers of the garrison, consisting of some 2500 men; and, as in the perpetration or evasion of them the men use their belts, it has been suggested they should not in future be allowed to wear them. It would certainly be a just stigma on those soldiers who have been guilty of using them improperly to take away the right of wearing the belt off duty; and if many cases of such conduct occurred, it might be advisable to deprive the battalion to which the men belonged of their belts in the street. In our belief, the maintenance of the strictest discipline consistent with every regard for the rights and well-being of soldiers, even if it had the effect of ridding the Service of some thousands of scoundrels, would be the best remedy for the evil. Let the punishment of the soldier be as sure and as severe when he has committed an offence as that of the civilian, and there is nothing in his mode of life or his teaching and calling, to make the average number of criminals in the army greater than it is in other classes, man for man. More than that we are afraid to say, as long as our Army is recruited as it is. But let the country give its best support to those who seek to administer the affairs of the Service in justice and equity.

DISAFFECTION AMONG THE LOCAL EUROPEANS.

By the last Bombay Mail we have received tidings of another of those deplorable incidents arising from the transfer of the Indian Army to the Crown.

It appears that on the night of the 21st of September last, a great number of soldiers of the 5th European Regiment at Dinapore, seizing their muskets, rushed tumultuously to the barracks of the 4th company, 5th battalion, Bengal Artillery, and called upon the men to join them in getting their rights. Instead, however, of joining them, the Artillery, under their Sergeant-Major, Macniminie by name, turned out to oppose them, and, charging the mutineers sword in hand, put them at once to the rout, and captured their two ringleaders. These men have since been tried by a court-martial, and sentenced to penal servitude for life. Sergeant-Major Macniminie has been made an ensign, unattached; the quartermaster-sergeant, who nobly seconded his efforts, has been promoted to the grade of conductor; while in a General Order, in which the whole circumstances are reviewed, Sir Hugh has given a solemn warning to the army, that should there be any renewed attempt at mutiny, he will consider it his duty to vindicate discipline by representing to the military tribunals the necessity of visiting the crime with the extreme penalty of the law. This order, the punishment meted out to the criminals, and the rewards bestowed upon the two sergeants, have produced an immense effect all over India.

The two privates who were tried by court martial were found guilty and sentenced to penal servitude for four years. This sentence was, however, revised, and the prisoners were condemned to penal servitude for life. In remarking on the case, his Excellency the Commander-in-Chief says:—

"The prisoners and other men of the 5th Bengal European Infantry committed a double crime of mutiny. They not only rose at night in mutiny themselves, but they endeavoured to intimidate and seduce into the commission of their crime their comrades and the 4th company of the 5th battalion Bengal Artillery, for the purpose of obtaining their discharge. They did so, although that very day and the day before they had heard on parade the G. G. O. No. 918 of the 11th ult., which in the most benevolent spirit and frankest language explained to them their position with respect to the new European Forces Bill; which told them that their position was not, in any way whatever, to be affected or changed by that bill.

"These men knew that they had no just cause of complaint. They did not, therefore, in obedience to the well-known rules of the service, prefer individually and respectfully their complaints to their officers, but they collectively, and in seditious combination, endeavoured to obtain by force what they could not claim with justice.

"Fortunately for the credit of the army, for the interests of military discipline, and of public order, the wicked mutineers of the 5th Regiment met in the Company of Artillery good and loyal soldiers, who were under the full influence of those duties which they themselves had trampled under foot.

"Sergeant-Major Macniminie, with admirable presence of mind, fell in instantly, in perfect order, his resolute company, and sword in hand, drove the miserable culprits out of the Artillery lines, seizing and handing over to justice their two ringleaders.

His Excellency has not words to express his admiration of Sergeant-Major Macniminie's conduct."

His Excellency further remarks—

"When Sir H. Rose assumed the command in India, he issued a General Order, in which he said that he would, under the influence of the most binding of obligations, his duty to his most gracious Sovereign, promote the welfare, uphold the discipline, and maintain the credit, of Her Majesty's armies in India.

"These words were meant to be a warning especially to the 5th Regiment, which last year broke out into prolonged and scandalous mutiny, going so far as to depose their own officers, and to elect others in their place. How far so large a portion of the 5th Regiment has neglected these warnings is shown by this court-martial. For although numbers of the men who were foremost in last year's insubordination took their discharges, the seeds manifestly have remained and borne bitter fruits.

"Not one good soldier or non-commissioned officer denounced or reported to their officers a combination and state of feeling amongst the men of the regiment which it now appears had existed for a length of time. If the non-commissioned officers did not know the state of feeling of their men, they are unfit for their posts; if they knew it, and did not report it, they have betrayed their duty. Nor can the Commander-in Chief absolve the commanding and other officers of the 5th Regiment from great blame for their entire ignorance of the bad feeling existing amongst the men.

"It is the positive order of Sir Hugh Rose that the amplest and most patient justice shall be done to the soldier's complaints, provided they be preferred respectfully, individually, and according to the rules of the service. His Excellency's orders are as positive that soldiers who, in disobedience to the rules of the service, prefer complaints in combination, collectively or insubordinately, should be brought to trial by court-martial for so doing.

"The Commander-in-Chief is determined to uphold, by every means in his power, the discipline and the credit of the army. The surest mode of effecting both these ends is the invariable assertion of the principle, which has actuated His Excellency on the present occasion, and from which he will never swerve: prompt and generous reward of good soldiers, witness the artillerymen and their commander; and as prompt and signal punishment of bad soldiers, witness the guilty men of the 5th Regiment: exiles from their country for their lives, these mutineers, with felon's punishment, will expiate their crimes in penal servitude."

INTELLIGENCE FROM THE SEAT OF WAR IN ITALY.

[From Our Own Correspondent].

Naples, Dec. 1.—It must be remembered that as soon as Ancona had fallen, the forces led by Generals Cialdini and Della Rocca, under the supreme direction of Victor Emmanuel and General Fanti, advanced by Pescara, Chieti, Popoli, Sulmona, to Castel di Sangro, Isernia, and Venafro, in order to meet, at Teano, and Sessa Garibaldi's forces, who were then defending the line of the Volturno. The passage of the former, conducted by His Majesty in person across the Abruzzi, was attended with the most important political results. In every town it was found that the clergy were amongst the first to receive him, and vied in the enthusiasm of their reception with the most ultra liberals. At Isernia, where the Bourbon re-action had appeared, the joy of the people was unbounded on finding themselves now free from anarchy and barbarism. The troops of Victor Emmanuel, issuing from the valleys of the Abruzzi, joined Garibaldi's forces, then—as I have before observed—engaged in defending the line of the Volturno, and acting almost exclusively upon the defensive. The reason of this line of conduct on the part of an army hitherto ever offensive, will best be seen by reviewing what had taken place immediately after Francis II. had left Naples, namely, that he retired upon Capua and Gaeta, having with him not only all the troops who still remained faithful to him, but also a further force formed of such soldiers as had fled, or been disarmed, during the victorious march of Garibaldi northwards. The Bourbon force amounted, in consequence, to about 60,000 men, so that, instead of wondering at the Garibaldini not attacking so formidable a force, the marvel will always be that they should have been able for so long a period to even act upon the defensive; that this was their only wise course was an opinion in which General Sirtori fully coincided with Garibaldi; and consequently it was resolved to besiege Capua rather than attempt to storm it, a bombardment being altogether hateful to the humane Garibaldi. In such position were affairs when the Sardinian troops joined the volunteer army. By a series of rapidly executed manœuvres they discomfited the enemy at Isernia, at Capua, at the Teano, and at the Mola di Gaeta, ever contracting the Bourbon field of action to a smaller limit. In the course of the victories, captures, &c., 16,000 prisoners were taken by the Sardinians; that is, 1500 at Isernia, 11,500 at Capua, and 3000 at Teano, and other affairs of minor importance; one column, consisting of 15,000 Bourbon troops commanded by General de Ruggieri, retired by Fondi to Terracina; in this number there were 5 regiments of cavalry and 5 batteries of artillery. Another column of 4000 men, under the orders of Colonel Lagrange, retired by Isoletta into the territory of Velletri. Now, if the number, 60,000 men, the original force, be taken for base, and the 4000, or perhaps 3000, forming the garrison at Messina, and allowing for 3000 or 4000 dead, wounded, or dispersed, we shall not be far from the truth in estimating the force now in Gaeta at about 18,000 men. The existence of so large a garrison within such space as is at their disposal in Gaeta, so far from rendering the siege more difficult, has an opposite effect, inasmuch as the number of troops, in addition to the employés, &c., have crowded the place almost beyond endurance. It must, however, be mentioned as a set-off to these disadvantages, that the garrison can always be victualled from sea supplies, so long as there is no blockade, and in addition to this the nature of the ground on the land side presents great obstacles of a natural as well as artificial nature to the besieging army. Gaeta is, in fact, a sort of minor Gibraltar, and whatever may be said of its inutility as a fortress in the ordinary sense, being separated from the mainland, access to which it neither gives nor takes away, yet at the same time it must be allowed that as a place of refuge Gaeta has most important advantages in its favour. Every sovereign from Charles V. has in turn perceived the importance of adding to the strength of Gaeta, in consequence of which it is defended at every point; and in the memorable sieges of 1707, 1734, 1806, 1815, and 1821, it has always offered the strongest resistance. Ferdinand II. added the latest increases of strength by further fortifying the parts deemed easiest of attack, and it is now almost able to bid defiance to any enemy. Gaeta presents on the land side a narrow front of attack, with three rows of batteries, in front of which a large sandy plain extends itself. The mountains behind the fortress, and from which it could be commanded, are rocky, steep, and precipitous, and it is a work of the utmost labour to make a path sufficient for siege guns; nor is it less laborious to bring the earth for trenches from the great distance at which it is. And now to "sum up," Gaeta is armed with 700 guns, so that its fall, unless it be surrendered, bids fair to be at some distance. The people of Naples seem to have lost all interest in their new king's movements, and to be tired of him already; and they will be still more discontented when their city from being a metropolis descends into a provincial capital. There a great ill-feeling already existing against the present government, owing to changes they have made, such as disbanding the corps of Royal Carabineers enrolled by Garibaldi, which was composed of a better class of volunteers. Many who expected government situations have been disappointed, and are loud in their complaints. Some time will elapse ere all are satisfied—if ever—with the new rule. Amongst the most remarkable of the proclamations affixed to the walls, is one from General Sirtori headed, "Comando Generale Dell' Escrito Meridionale ordine del Giorno," to the following effect: "Officers and soldiers of the Meridional Army, there is loud talk of demonstrations caused by the enemies of Italy, in which you have been solicited to take part. You who deserve well of Italy, you first have the merit and the glory of having with your blood inaugurated in these provinces the government willed by the nation. Italy and Victor Emmanuel is the motto of your flag. To Victor Emmanuel, who loves you as his own sons, you owe love and filial reverence; and you owe the honour that is due to the King of Italy, wished for during so many ages. Soldiers, if any one amongst you (*tra voi*), profiting by the difficulties necessarily attending the situation of affairs, seeks to excite you to a demonstration of discontent, consider him as your enemy and the enemy of the country. Abnegation and discipline are the primary virtues of a soldier. Discipline exacts that every officer and soldier repair to his proper post; he who forgets honour and duty, if he absents himself, will be punished with the greatest severity.—Naples, the 26th November, 1860. The Commander-in-Chief of the Meridional Army.—G. Sirtori."

The British volunteers have, I am sorry to say, been again getting themselves talked of unfavourably of late. The cause of this was an unfortunate quarrel between them and some of the Garibaldian soldiers. Its origin is said to have been as follows:—Soldiers of both corps were in a café at Caserta, when one of the Garibaldini, whether accidentally or otherwise, drank a cup of coffee belonging to one of the Englishmen, who it appears resented this liberty very warmly. The Garibaldino in turn as warmly received him, and as neither disputants could speak the language of his adversary, high words soon led to blows, and finally several of their fellows on either side were soon drawn into the affray; and as the Garibaldini were getting the worst of it as a pugilistic encounter, they—sad to say—drew their bayonets on their allies, who in turn resorted to the same weapons; and several men were wounded on either side, amounting to some eight or ten in all, and one of the English has since died. It makes a rather sad termination to the expedition, and will be regretted by every true friend of Italian liberty. I have no doubt before this reaches you, the whole matter will have been made the subject of official inquiry; and I do hope for the honour of England, our countrymen will be proved, however inexcusable, not to have been the aggressors. It is to be attributed to neglect in some quarter, that the names of those of the British volunteers who have died from their wounds, have not been published in England, so that letters constantly arrive for those who, poor fellows, are now no more. I have just heard from the chaplain, the Rev. Herman Hirsch, that he received at the post-office a letter directed to a man named George R. Prosser, who died from wounds received on the 19th of October, before Capua. It is to be hoped this will be seen by some relatives of his, or communicated to them.

REGULATIONS FOR THE LINE OF MARCH.

The following Order has been issued:—

1. When troops are marching along the public roads, the pivot flanks are always to be kept clear for traffic.

2. The prescribed time and length of pace are invariably to be adhered to, and never exceeded unless by word of command.

3. When the head of a company cannot keep up without over-stepping, the officer commanding it must pass on word to the company in front to step short; it must however be borne in mind that each company must be kept together intact, no matter how great the gap may be between it and the preceding one.

4. In like manner, if the head of a battalion cannot keep up with the one in advance of it, the commanding officer will forward a notice to the head of the column to that effect.

5. The prescribed space at which the cavalry is moving is always to be conformed to by the head of each regiment, and no one corps is to hurry up to keep pace with that in its front, but its commanding officer will send to the front to shorten the pace of the leading regiment, as directed in the preceding paragraph, until the brigade has closed up.

6. No soldier or officer is to cross a fence or enter a house of any kind on the line of march.

7. No soldier is to quit the ranks for any purpose whatever, without having previously obtained leave from the officer commanding his company.

8. Every soldier who is obliged to quit the ranks on account of illness must apply to the officer commanding the company for permission to remain behind, and for a ticket which will be given him if the officer thinks necessary.

9. These tickets are to be made out in the following form:—

"The bearer marched off with the Regiment,
but was unable to keep up with it,
O'clock Signed ———
Date *Commanding Company.*

The tickets to be returned to the Orderly Sergeants after the men who face out rejoin their companies.

10. Officers commanding companies are always to be provided with a sufficient number of these tickets, properly dated before the regiment marches off.

11. Men who obtain permission from the captains of their companies to fall out for a short time, for a necessary purpose, are not to receive tickets, but their packs and arms are invariably to be carried by the section to which they belong, until their return.

12. When a soldier obtains permission to fall out through illness, he will be inspected by the medical officer, in rear of his brigade, and if passed as sick will be taken up and carried by the brigade ambulance; but should the medical officer consider him fit to march, he will fall in with the rear guard until the next halt, and then move up and join his company.

13. Any soldier who quits the ranks through illness, or for a necessary purpose, without having either received a ticket, or having left his pack and arms with his company, as the case may be, will be made a prisoner of and punished.

14. The ambulance attached to each brigade will march in rear of the last battalion.

15. An interval of 100 yards to be preserved between brigades on the line of march.

Assistant Quarter-Master General's Office, Aldershot, November, 1860.—By order,

Signed, H. H. Clifford, Lieut.-Colonel,
Assistant Quarter-Master General.

Lieut.-Colonel Crealock, Military Secretary to Lord Elgin, whose facile and rapid pencil has found full scope in the Crimea and in India, has sent home some sketches taken in China at the Taku forts, which have been published by Mr. Hogarth, of the Haymarket. They are "bits" of battle-field life and death, painfully accurate. They give us a better idea of the Tartar soldiers than pages of description, and they are assuredly not much calculated to popularise the results of war. We trust that Colonel Crealock will soon be able to find more pleasing subjects for his sketches, and that he will send us home a full portfolio from the interior of Pekin.

PARIS.

[From our own Correspondent.]

THE ARMSTRONG GUN, &c.

Following in the wake of the *Moniteur*, the *Débats*, a respectable old journal, not devoted to the interests of the second empire, had a long article yesterday on the relative merits of the French gun and ours, published with the view of quieting apprehensions on this side of the Channel; it nevertheless is written in an impartial spirit, shows that the writer knows something of his subject, and professes to bring forward proofs to sustain arguments. The article would be too long to be given at full length, but the following précis, now that the question of artillery is of such vital importance, will be found of great interest.

"The English press has lately echoed with songs of triumph in honour of Sir W. Armstrong's gun. If these panegyrics only celebrated the superiority of new guns over old, and but testified the joy of a nation at the discovery of a great success, we could afford to let the matter pass; but as the conclusion of all that has been written is to proclaim aloud the superiority of the Armstrong guns over those of all other nations, we think it our duty to say a few words on the subject. We have waited in vain for some official document upon which to base our remarks. All that has as yet been said reposes upon the interesting letter of the *Times* correspondent. For the guidance of those who have not had the pleasure of reading that letter, we wish to state that all through it the Armstrong gun is spoken of as a much more valuable weapon than ours. For instance we find the following—'The manner in which the French have converted the wild Japan ponies into artillery horses, has won universal admiration. It is not their fault if their cannon is inferior to ours in accuracy, range, effect, and lightness.'

"As may be seen, nothing could be more categorical, and more plainly invite discussion. Following the good example given by the English writer, we will say, like him, that it is no way our intention to seek to establish a comparison between the French and English Artillery officers—such things are odious and ridiculous. We will put aside all personality, and if, from what we say, we think ourselves right in drawing conclusions totally different from those of Mr. Bowlby, it will be clearly understood that we only speak of the matériel confided to the two armies by their respective governments. This matter decided on, we will first of all try to define as exactly as possible the field of dispute. This is not so very easy, for, if Mr. Bowlby affirms much, in revenge he does not trouble himself with proofs. He touches on a great many points, but he cites very few facts, and, above all, he neither establishes his arguments by figures, or any of those positive comparisons which produce conviction in the mind of the reader. If, instead of writing in the tumult of the camp, and during the excitement of victory, he had been quietly seated in his cabinet, he would no doubt have written differently, and we should have been deprived of a very interesting recital, which owes most of its charm to the fidelity with which is depicted everything that passed under the eye of the writer. It is for us to introduce order into the debate.

"Let us begin by stating that this is not a question of heavy artillery, as the only heavy pieces employed in China were on board the four French gun-boats, sent out in cases to Admiral Charner. Each of these gun-boats carried a 'canon rayé' throwing a hollow projectile of sixty. Admiral Page took them so close in shore to attack a battery of 100 guns, that when the tide fell they grounded, and in this position they continued to fight, until they blew up the powder magazine of the large fort on the left bank of the river. It is not only Admiral Charner who tells us of this gallant exploit; Admiral Hope also makes mention of it in a special paragraph.

"It is, then, only a question of campaign artillery; the English artillery being represented by two Armstrong batteries, and ours by four batteries of the 'canon rayé.'

"The first question is accuracy of aim. This subject is only alluded to in general terms, and the author hardly cares to insist on the matter, no doubt recollecting that in a previous letter he had given an account of some practice which certainly much astonished the French officers. A large tree at a distance of about 1000 yards was taken as a target, and several shots were fired, none of which took effect.

"If it regards range, Mr. Bowlby does not treat this question. He only cites some shots which carried 2200 yards. We cannot suppose this to be the extreme range of the Armstrong, as in that case ours would be immeasurably superior, carrying as it does, at a slight elevation, nearly 5000 yards.

"Shall we speak of rapidity of firing, which is also a necessary quality in good artillery. On this subject the writer only cites a single fact. He tells us that on the 21st of August an English battery fired 90 shots per gun in three hours and a half. This is very fine; but we can reply that if we do not know what the French artillery did on the same day, we know that at Solferino several batteries fired 300 rounds per gun, and that after all this firing the pieces were in as good a condition as when they commenced. To be loaded the Armstrong requires much more time than ours, and if the two guns were placed in equally skilful hands, the 'canon rayé' ought to be fired at least as many times again as the English piece.

"Campaign artillery ought to answer for a great number of eventualities on the field of battle; it has in view two principal objects, to fight against men and against inert objects, such as a crenelated house or village occupied by troops. For these two objects it was formerly necessary to have several canon of different calibre. To-day we have but two pieces, the 4 and the 12, and three projectiles—the hollow ball, 'la boîte,' and a shell filled with bullets. To fight men, the Armstrong employs like us a hollow projectile to answer the purpose of grape-shot; but here is the difference between the two systems. When the Armstrong ball explodes it bursts into 49 splinters—ours into 80. The splinters produced by the Armstrong ball fly up, whilst the bullets with which our ball is filled continue in the direction of the impulsion given by the canon. Again, in firing against masses or troops drawn up in several lines, our hollow projectile, on the fusee being regulated, answers two purposes, which one would search for in vain in the English gun.

"With regard to projectiles destined to act against iner

Digitized by Google

objects, Sir W. Armstrong has sacrificed too much to weight, and left too little space for explosive matériel. We have calculated better than he has, and numerous proofs have convinced us that with projectiles much lighter than those used by the English artillery, but endowed with an explosive force far more considerable, a greater effect is obtained.

"Let us try and establish a comparison between the two artilleries in point of solidity, and the facility with which they can be handled during a campaign. It is hardly necessary to say that a cannon like ours, composed of a single piece of metal, is more solid than the English gun, composed of three parts, which are held together by chains and screws. No matter how well fabricated, they must be more liable to be damaged than the French pieces. The campaign began in earnest when the allied troops left Pehtang, and it was from that moment that the trial between the two artilleries commenced. We learn then which answered best the requirements of a campaign. An artillery possessed of all the qualities imaginable, with the exception of being easily manœuvred and handled, would very much resemble Roland's celebrated mare which could do everything but 'go.'

"The first march of the English is thus described by the *Times'* Correspondent."

Here follows an extract of how the guns sunk up to the axle-tree in mud, and how the gun-carriages had to be left behind. The legs of the horses at each instant disappeared, and this fact shows sufficiently what sort of ground had to be passed, and that a much lighter artillery would have been in nearly as sad a plight with the horses up to the belly in mud and water.

M. Xavier Raymond goes on to remark that this picture is not gay, and, "at the same time, at the same hour, and upon the same ground, our pieces defiled, and, although, perhaps, our artillerymen were hard worked, they were not obliged to abandon any part of their matériel."

Here comes another extract from Mr. Bowlby, describing the French gun, and stating that the Armstrong is the lighter of the two, as it weighs 6 cwt, and throws a 12-pound ball, whilst the 'canon rayé,' weighing only half a hundred less, throws a ball of but 8 lbs., but mentioning at the same time that the gun-carriage of the Armstrong was much too heavy, and not nearly so good as that of the French gun, which, in fact, gives to their piece, when taken altogether, a great superiority in matter of weight. In claiming this lightness for the Armstrong, Mr. Bowlby only referred to the actual gun, which M. Raymond, and not without justice, remarks, is a singular way of viewing the case, and that gentleman then refers to equipage; to the small wild Japan pony, which succeeded in pulling the French guns over the bad ground, and to the splendid artillery horses brought by the English from India, which left their pieces sticking in it.

The article concludes thus: "It is no doubt very seductive to produce an exceedingiy light cannon which, without being more dangerous than another, throws much heavier metal. Without searching for the number of Armstrong guns that have burst whilst being proved—nor will we recall the answer which Mr. Sidney Herbert was forced to give on this subject—we will admit the advantage of lightness gained by Sir W. Armstrong, if advantage there be. But at what price is it obtained? The lighter the piece the more is it affected by the reaction of the powder, and what does he gain if the weight of metal which he economises in the cannon itself is made up for by the weight of the carriage. In artillery everything must be taken together. The carriage and the waggon are as necessary to a gun as are legs and arms to a man; and the best artillery will always be that, which taken in its ensemble, possesses both power and mobility.

"We might prolong this discussion, but we have said enough for to-day. However, in termination, we may be permitted to invoke the testimony of some of our officers who are now in China. We do not pretend to know all the letters that have been addressed to France on the subject, but all the correspondence, of which we have cognisance, affirms that the French artillery has nothing to fear by comparison, and that the experience of China but confirms the confidence acquired during the campaign in Italy."

La Gloire has had her trial trip, and after two days at sea returned to Toulon. It was announced that she was to be out for five days, but it is most probable that owing to a defect in her build, which is alluded to in the *Moniteur de la Flotte*, she was forced to put back to harbour. She got under way at seven o'clock on Monday morning, and steamed out with the Algesiras; there was a heavy fall of rain at the time, a good sea on, and a stiff breeze E.S.E. The *Moniteur de la Flotte* gives the following details:—

"The Algesiras and La Gloire have returned to port after a cruise of two days, during which they went to Nice. The trial has been most complete and satisfactory, and took place under the most favourable conditions. The trial of speed between the two vessels was made with two, four, six, and eight boilers. The only fault which could be found with La Gloire was that in cutting through the waves at full speed the water was found to dash into her fore ports. This inconvenience is said to be remedied in preparing the plans for the construction of the new iron frigates which are to be laid down in '61. Their batteries will be higher, and their lines be also finer.

"Plans for new floating iron batteries are now under examination. These batteries are to be much larger than those which were employed in the Crimea. They are not intended for sea, but merely for the protection of harbours and the mouths of rivers. This will also be the principal duty of iron frigates which cannot be sent unaccompanied very far from the coast. The general system for the defence of our coasts will be completed by means of cutting down our old sailing vessels, and sheeting them with iron."

After alluding to the necessity of these measures for the protection of the exposed coast of Normandy and Brittany, the article concludes by stating that Italy is about to adopt the same system for the organisation of her navy as that which has now been in force in France for 200 years.

The Minister for Marine has just issued an order to the effect that all vessels constructed for Government, must be built under shelter.

Admiral Labrousse is now at Cherbourg on his tour of inspection. All the steam-vessels in that port will be inspected by him. His duty is more specially directed towards the examination of machinery, and he is to recommend such changes as he may deem necessary to insure the greatest speed with the least consumption of fuel. The first vessel to be overhauled is the Arcole, after her, the Bayard, which has just got her crew, then the Ville de Nantes, which has just received a provisionary crew of 450 men. The Napoleon, Tourville, and Austerlitz, are also to be inspected; and lastly, a fast little boat called the Forfait, a sister-craft of the yacht Jérôme Napoleon. It is reported that the Forfait is destined for a cruise in the Pacific.

According to the *Toulonnais*, it is reported that very considerable sums have been placed at the disposal of the Minister of Marine, for the carrying out of important works now going on in the French harbours; that an augmentation is to be made in the marine; and that considerable promotions are to take place in that branch of the service before the end of the year.

L'Océan, of Brest, says, that the immediate armament of the frigate La Guerrière, that has just completed her trials, is spoken of, and that she is to be sent to the African station.

Le Phare de la Manche states that a demi-battery of artillery is about to embark at Cherbourg to reinforce the French troops now in Senegal. The Yonne, bound for the same place, touched the other day at Oran, to pick up a battalion of 350 *indigènes*, called Turco-Senegalais.

M. Ferdinand Lesseps has obtained a most important concession from Government in aid of the Suez Canal: soldiers having one year of their service unexpired, are to have that year remitted, providing they choose to work at the canal for two, during which time they will be paid at the same rate as other labourers.

The camp at Châlons is to be opened next year in April, and is again to be under the command of the Duke of Magenta. The pupils of the Guard, who are now being organised, will there make their first appearance. This corps is formed from the *enfants de troupe* being sixteen years of age.

INDIA.

[From a Correspondent.]

North-West Provinces.

The event of the past fortnight was Lord Canning's railway speech. What was once said of some orator or another who was equally unpopular, may be applied with equal truth to Lord Canning—"He rose without a friend, and sat down without an enemy."

The lecture he read to our countrymen on the subject of their demeanour towards the natives of India was equally bold and just, and will do much good. The view he took of the English character is not, however, new; and I think no writer places the matter in so clear a light as Lord Macaulay, in his essay on Mirabeau—"The Englishman is apt to regard freedom as his peculiar birthright, and is not at all disposed to allow others, especially those whom he considers morally and physically his inferiors, to share in its benefits;"—only another instance of the partiality which almost every man indulges with regard to himself. The liberty of the press is a blessiug, when we are inclined to write *against* others, and a calamity when we find ourselves overborne by the multitude of our assailants! Whether natives will ever be fit to enjoy, or even to understand what we call freedom, I leave others to decide. One thing is certain—our efforts should be to elevate, not to depress them. To treat them as slaves—as inferior beings—as wholly unworthy of the blessings of liberty, is the sure way to keep them in bondage, from which we profess to wish to emancipate them. If Lord Canning's speech does as much towards improving the relations of the Anglo-Indian and the native, as it has to enhance his reputation, it will not have been spoken in vain.

The income tax is fairly launched. In the north-west provinces all the wealthy traders have been served with notices requiring them to fill in returns exhibiting their income, &c. In the Punjab I believe each town, village, &c., will be called upon to contribute so much, and allowed to distribute the amount through a punchyant of townsmen. The licence tax is not in operation yet, so that those only whose incomes are supposed to exceed 200 rupees per annum are being at present taxed. The licence tax will practically include all those not touched by the income tax, who will be divided into three classes, paying one, two, and three rupees each. One tax, an income tax, would have been a far preferable tax, because a more simple measure, while the result would be exactly the same. Thus, the income tax is a tax of 2 rupees on incomes of 200 to 500 rupees a year; and 4 rupees on incomes above 500. All those whose incomes are below 200 rupees a year will pay either 3, or 2, or 1 rupees a year. So that it would come to precisely the same thing if the income tax had been fixed at 1 rupee on incomes under 50 rupees; 2 rupees on incomes under 100 rupees; 3 rupees on incomes under 150; and 4 rupees on incomes of 200 to 500. There are all sorts of rumours about regarding the unpopularity of the tax, and the dire consequences that will ensue from its enforcement. But beyond the fact that taxation is unpopular, I have nothing on reliable authority that need give rise to any apprehension.

The Governor-General leaves Calcutta on or about the 15th of November. His camp will be formed at Benares, whence he will march towards central India, and have an interview with Hokar and other chiefs of central India. It is expected that he will be absent from Calcutta about three months, and will take his leave of Calcutta in March. If Lord Elgin is really to be his successor, the China war may compel Lord Canning to remain another year.

The price of grain is still tremendously high, and whether there is or is not to be a famine, depends on rain falling within the next thirty days. Clouds are beginning to gather for the first time for some weeks, and the air feels damp and raw, as if rain were in the wind. I trust it may be, for a famine at such a juncture would be a fatal blow to the prosperity of the country. The Commander-in-Chief is to be at Allahabad on the 19th of November, and will visit the military posts in Oude, and end the cold weather somewhat not very far from Simla. The scarcity of grain has reduced the "relief" to the scantiest proportions. Indeed, I know of no regiments moving excepting the 71st to Amballa, the 27th to Sealkote, and 52nd to Jhansi, the worst station in India. Even the regiments at Dugshai and Suhathao will not be able to get down to Ambulla for musketry practice.

I am writing on the anniversary of the annexation of India to the crown—the 2nd Nov.; and verily the country presents a very curious and interesting aspect to one especially, like myself, who has been in it since 1845. It is in a transition state, and recalls to my mind the accounts I have read of the breaking up of the ice in the Arctic oceans. There is a great deal of confusion—a superficial observer would probably say, hopeless chaos. The great fields of ice which have for a hundred years presented immoveable obstacles to improvement of every kind, have been suddenly broken up, and all rushing to and fro in apparently inextricable confusion. Many ice-bound ships—fine old institutions—have come, and are coming, to terrrible grief in the grand struggle which is taking place. But the long night is being followed by a glorious day, and we shall soon gaze on a scene as bright and hopeful as it is now dark and uncertain. The India of the future will assuredly be an immense improvement on the India of the past. We shall not probably see again amongst us such giants as Clive and Warren Hastings, but then we shall be spared the humiliation of winning large tracts by forgery, and of indirectly sanctioning the spoliation of helpless old women. We shall never again have imposed on us the pleasing duty of rewarding a Governor-General who has increased the British dominions by the conquest of five large provinces, containing many large cities and many millions of inhabitants. But then we shall have without doubt the not less gratifying task to perform, of rewarding a Governor-General who has placed the Government of the country on a solid basis by purifying our courts, improving the police, restoring order to the finances, encouraging the sottlement of Europeans, and organising a thoroughly efficient army.

One great reform has already been accomplished. A penal code has received the assent of the Governor-General, which is to come into operation on the 1st of May next, and to which every servant of the Queen shall be subject. Punishments are—1st, death; 2nd, transportion; 3rd, penal servitude; 4th, imprisonment; 5th, forfeiture of property; and, lastly, fine. The lash is thus interdicted—a somewhat severe reflection on that barbarous code which is now in operation in the Punjab. Almost every offence is punishable by fine as well as imprisonment. The terms of imprisonment are pretty long—perhaps too long—the amount of fine levinble is generally defined, where not—"It shall not be excessive." This mode of visiting offences is particularly well suited to the Oriental, than whom no one loves money more dearly, or is more willing to make large sacrifices for its sake. All that is requisite in order to render this punishment the most effectual that can be devised as a preventive or corrective of crime, is a little care in proportioning the fine to the means of the offender. Solitary confinement will also form a portion of imprisonment, but this will be a dead letter, for it is found impossible to enforce strict rules by native agency. The chapter of offences by or relating to public servants is very full, and provides a suitable punishment for every form which corruption can take. The same may be said of the chapter of false evidence, and offences against public justice. It certainly will not be the fault of the Code if perjurers, fabricators of false evidence, and other defilers of the pure stream of justice, do not meet with their deserts. The extortions of confessions is also punished with well-merited severity, namely, by imprisonment, limited to ten years, and fine as well. Servants are liable to imprisonment for one month, and a fine not exceeding 100 rupees for breach of a "lawful contract." The punishment for adultery will, perhaps, strike you as rather severe. Whoever commits adultery without the consent or connivance of the husband, "shall be punished with imprisonment, rigorous or simple, for a term which may extend to five years, or with fine, or with both. In such case the wife shall not be punishable as an abettor." And now, at the risk of being very tedious, I have given you the chief features of the "Indian Penal Code." It will supply a great want, and one which is being felt more and more every day. Europeans will be tried at sessions held at Agra and Lahore before a court, of which one judge at least shall be one of the judges of the supreme court in Calcutta. This measure will reconcile the "Black Act" to the European, and operate to curb those evil doers, your countrymen, who, being at present practically subject to no law, are a terror to the natives—a thorn in the side of our magistrates, and a disgrace to the name of Englishman.

The Hurdwar Canal is, I fear, a gigantic failure. Not only does it not supply much water in a bad year like the present, but the masonry is in shameful order; the great Salani aqueduct is crumbling to pieces. I believe this to be entirely the case.

There will be no end of appointments vacant in the course of the next three or four months. Foreign Secretary, as Mr. Beadon goes into Council. Another vacancy in Council if Sir Bartle Frere goes to Madras. Then Oude will be vacant in March, because Mr. Wingfield takes fifteen months' leave. Mr. Roberts, Judicial Commissioner of Punjab, takes six months also, and will be succeeded by Mr. Macleod, for whom by the way he was acting.

Lord Clyde and Sir James Outram.—The Lord Mayor has appointed Thursday fortnight for presenting the freedom of the city of London to Lord Clyde and Sir James Outram, at a meeting of the Court of Common Council. Mr. John Richardson, a member of the court, has given notice of his intention to move that the meeting at which the freedom is to be conferred on these distinguished men shall be convened in the Guildhall, in order that the public at large may witness the presentation, and that it be referred to the City Lands' Committee to make the necessary arrangements. The same gentleman has notified his intention to move:—"That the freedom of this city, with a sword of the value of 50 guineas, be presented to General Garibaldi, as a mark of respect for his noble patriotism, unflinching courage, unselfish conduct, untiring zeal, and heroic deeds on behalf of freedom and independence in the late struggle for liberty in Italy." In the case of Lord Clyde and Sir James Outram, a sword of great value will be presented to each, accompanying the freedom.

Mr. Sandys, mate, R.N., has passed the last examination at the Royal Naval College, Portsmouth, and will therefore receive his lieutenancy in an early *Gazette*.

SEBASTOPOL AND THE BRITISH GRAVES.

(From the *Levant Herald.*)

At about two p.m. we passed the scene of he famous battle of Alma, and at about four .m., we were making the detour necessary for ntrance into the harbour of Sebastopol. A cene of more utter desolation and ruin can carcely be pictured to the imagination than hat which here met the eye. The stones of he forts on the right hand side which had een blown up, seemed pulverised by the orce of the explosion; whilst, on the left and, Forts Constantine and Michael still ooked proud defiance, as when they laughed to corn the efforts of the allied fleet. Not even he marks of the shots remain, and nothing ow attests their having been attacked but the moke, which, driven back from their own eavy guns, discoloured one part of the walls. n passing up the harbour here and there pro- ecting portions of the sunken vessels are still isible, a portion of the mainmast of the 'welve Apostles being particularly conspi- uous. Several vessels have, however, been aised by the American engineers, who are still uccessfully at work. Their plan of procedure s quite simple. Divers are first sent down o pass chains fore and aft under the vessel. 'hese are attached to dry docks on large quare boxes, divided by a partition into two hambers. The chambers next the sunken essel are then emptied of the water which ressed them down into the other chambers emote from the vessel, and thus, as the cham- ers next the sunken ship are buoyed up, she s raised a little, when she is tugged by a teamer into shallower water. The operation s then again repeated until the vessel is ren- ered completely accessible. The aspect of he town, after landing, is exceedingly dismal -roofless houses in all directions meet the eye. ome walls are shattered by cannon-balls, and thers of stronger build retain the balls still rmly embedded in the stonework. In the rrcets, which have not been inhabited since he siege, all is one mass of *débris*. Pillars hich once formed the porticos of noble man- ons lie broken in the dust, while the arcades ney supported lean in every sort of grotesque alformation. The scene above the Admiralty he only place the government has rebuilt) is rticularly striking; for here, at one glance, e can learn something of the ravages of war. he great military hospital is torn open and olit in every direction; no longer acting as a lessing for those in distress, it stands a ithered and a blasted monument to the fierce assions of men. In front are the earthworks hich obtained a world-wide reputation—now prooted heaps of worthless soil. Standing n the still existing fragment of masonry in he Malakhoff, one sees to the left, far over the landscape, a new Greek church being ilt. It commemorates the thousands of ussian soldiers who lie interred around. ore to the front stands the obelisk which arks the fight of Inkerman not undis- rbed by the rude hand of destruction. To e right is the interminable network of enches where the little signpost tells us so any French soldiers sleep. Their stations r attack now form their tombs. Far up on e height beyond is Cathcart's Hill, on the eak top of which lie some of the bravest and oblest of our land. Around their lowly resting ace the wall, which had fallen into decay, has en lately repaired by Col. Gowen, but as the ones are put together without mortar, they ay at any time fall again. Inside it looks glected and uncared for, as if they who slept neath had served our turn and were to be ought of no more. Further on, towards nkerman, we have another graveyard; its alls, built up of loose stones, are low, and m an utterly insufficient protection to the ounds within. Its monuments and tomb- ones, made of friable sandstone, are becoming rn with the weather. It is thus especially th the headstone of Captain Hedley Vicars: e little side stones, too, of this grave are ocked about, and the flowers all removed, cept one wall-flower. From other tombs the osses are broken, and the general appearance the whole is that of gross neglect. On the ad to Balaklava there are several little nglish burial grounds in different states of eservation; but at the bend of the road, in e centre of the famous valley, there is one, d its wall is entirely broken down. Out of as the story goes, were dug the bones, ongst which was found the purse with enty-five sovereigns; hence the reason for her graves being also opened and rifled. hether among the scores of tons of bones ich lie ready for shipment at Sebastopol ere may be human bones, it seems impossible decide; some persons of information affirm- g it, whilst others deny it. Nor will the estion be finally set at rest till some one of mpetent knowledge be sent to make a search- g investigation. To take charge of the burial ounds, Captain Manto,* a Russian officer, has been already appointed by our Government, at a salary of 400*l.* per annum. He has now been in office some time; but either from indifference or dislike of his new post, no efforts seem to have been made by him towards remedying the existing evils. It would be well to associate with him some Englishman who would take an interest in the matter; or, what would be much better, to replace him by a respectable English sexton.

* Is it possible the officer named here is the old mmandant of the Greek Legion of Balaklava, who s treated so well, as we have heard him admit, when was in England as prisoner of war? When we re last in the Crimea, Major Manto was living in the mmandant's house at Balaklava, several miles from majority of the graveyards. It can scarcely be pected the Russians will create a special staff for the otection of the remains of our dead, particularly as ir own cemeteries were not respected by us.—ED.]

CAPTAIN NORTON.—From a printed circular which has been forwarded to us, it would appear that Mr. Sidney Herbert, acting on the report of the Ordnance Select Committee, dated 19th October, refuses to entertain Captain Norton's claim for reward in respect to his inventions. The report admits that Captain Norton in 1828, possibly before, constructed bullets, which come very near those of the present day, but not in their effects, but that he was led away from the paths of discovery by converting his elongated projectiles into shells. Captain Norton's comments and replies are not very logical, but we regret that the War Office could not reconcile it to their sense of duty to give some reward to an old officer whom Mr. Sidney Herbert acknowledges to have bestowed great attention on projectiles, and "to deserve much credit for his exertions."

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BEAUMONT—December 1, at 5, Lansdowne Terrace, the wife of John A. Beaumont, Esq., late 4th Dragoon Guards, of a daughter.

HAMILTON—December 3, at Bray, Berks, the wife of Captain Hamilton, late Madras Fusiliers, of a daughter.

HOLDEN—November 29, at Uplands, near Dublin, the wife of Lieut.-Colonel Holden, of a daughter.

INNES—November 23, at Corfu, the wife of Dr. F. W. Innes, C.B., Deputy Inspector-General of Hospitals, of a son.

LANG—December 3, at Southend, the wife of Commander E. W. Lang, R.N., of a son, stillborn.

LUDLOW—December 1, at Blandford Square, the wife of Major-General Ludlow, of a daughter.

MCLAUGHLIN—December 2, at 7, Windsor Place, Plymouth, the wife of E. McLaughlin, Esq., Royal Artillery, of a son.

MEREDITH—November 30, at Aldershot, the wife of Major Meredith, 41st Regiment, of a daughter.

MOORE—December 3, at Woolwich, the wife of S. H. Moore, Esq., R.N., of a daughter.

STAUNTON—October 14, at Cape Town, Cape of Good Hope, the wife of Colonel Staunton, Commandant, of a son.

STRADLING—December 4, at Roseville, Chilton Polden, near Bridgwater, the wife of Commander Stradling, H.M.'s Indian Navy, of a son.

VAUGHAN—November 29, at 4, Cambridge Place, Clifton, the wife of Lieutenant H. L. Vaughan, H.M.'s Indian Army, of a son.

WALLACK—November 29, at the Deputy-Governor's House, Millbank, the wife of Captain H. J. Wallack, late 77th Regiment, of a son, stillborn.

WING—November 29, at Burton Hall, Christchurch, Hants, the wife of Major Vincent Wing, of twins, boy and girl, of which the former only survives.

MARRIAGES.

BROOKE—SLEEMAN—November 29, at St. George's, Hanover Square, Lieutenant T. H. B. Brooke, H.M.'s 12th Regiment M.N.I., second son of the Rev. R. P. Brooke, Ex-Chaplain Bengal Establishment, to Eliza, third daughter of the late Major-General Sir W. H. Sleeman, K.C.B., of the Bengal Army.

DAWES—KENT—December 3, at St. George's, Hanover Square, by the Rev. David M. Alexander, M.A., Wentworth, youngest son of Matthew Dawes, Esq., F.S.A., of Westbrooke, Bolton, Lieutenant and Adjutant 3rd Battalion Military Train, to Mary Emerton, second daughter of Benjamin Archer Kent, Esq., M.D., of Somerset House, Ryde.

MARSHALL—PASKE—December 4, at Creeting St. Peter, Suffolk, by the Rev. Theophilus Paske, brother of the bride, William Julius Marshall, Esq., Captain West Suffolk Militia, 19, Leinster Gardens, Hyde Park, to Fanny Curteis, elder daughter of the Rev. Edwd. Paske, rector of Creeting St. Peter, and vicar of Battisford.

MORLEY—GIBBES—December 3, at St. Nicholas Church, Brighton, by the Rev. H. M. Wagner, J. Evelyn K. Morley, Esq., to Sarah, only daughter of the late Charles Gibbes, Esq., of Cavendish Square, London.

UPTON—BEVINGTON—December 1, at St. Bartholomew's, Sydenham, Kent, by the Rev. W. B. Hayne, M.A., Edward James Upton, Esq., Captain 26th Cameronians, younger son of Thomas Upton, Esq., Sydenham Hill, to Eliza Jane, elder daughter of John Wheeley Bevington, Esq., of Malvern House, Lower Sydenham.

DEATHS.

BONIFACE—October 23, from yellow fever, off Cape Colon, West Indies, John Boniface, H.M.S. Hydra, aged 19.

COOKNEY—December 4, at his residence, 11, Bolton Row, Piccadilly, James Thomas Cookney, Esq., R.N., aged 66.

ECCLES—November 27, at Field Hall, Staffordshire, John Eccles, Esq., M.D., for many years Physician to the General Hospital, and Professor at Queen's College, Birmingham.

GIBBONS—December 2, at Chiswick, Thomas Gibbons, Esq., formerly of the Royal Arsenal, Woolwich, aged 78.

JAMES—September 26, at Almorah, North India, of fever, contracted on the frontier of Thibet, Thomas Mansfield James, Lieutenant 42nd Regiment Royal Highlanders, only son of the late Thomas Pearce James, eldest son of the late John James, Esq., of Highfield, Gloucestershire, aged 26.

MAYCOCK—November 30, at Merther, Cornwall, Mabel Maude, only surviving daughter of the late Brevet-Lieut.-Colonel Maycock, 53rd Regiment, aged 3 months and 3 weeks.

MENNIE—November 22, at his residence, 14, Brighton Terrace, Brixton, Robert, third son of Robert Oliver Mennie, Esq., Surveyor War Department, aged 24.

NEYLAND—November 28, at St. Helier's, Jersey, Mary Neyland, relict of the late Captain Neyland, Paymaster 16th Lancers, aged 71.

PURNELL—November 25, suddenly, at his residence, Blackheath, William Anthony Purnell, Esq., late Physician-General of the Bombay Army.

ROBINSON—November 30, at Sheerness Dockyard, of croup, Ernest Malcolm, youngest son of William Braham Robinson, Esq., Major, K.A.V., aged 5.

WILLIAMSON—October 4, at the Cape of Good Hope, Sarah, the beloved wife of Dr. George Williamson, Staff Surgeon, aged 27.

Advertisements.

CRYSTAL PALACE.—CATTLE SHOW WEEK.—Visitors to London will find the Palace unusually replete with attraction.

CRYSTAL PALACE.—Wednesday next and Three following Days.—GREAT POULTRY SHOW.—Admission One Shilling.

CRYSTAL PALACE.—Wednesday next and Three following Days.—GREAT AGRICULTURAL ROOT SHOW, and Collection of Agricultural Implements.

CRYSTAL PALACE.—Commencing Wednesday next.—The Stalls of Exhibitors now fitted up in the Naves preparatory to the Christmas Fair will be found replete with every description of article suitable for presents at this season of the year.

CRYSTAL PALACE.—Wednesday, Thursday, Friday, and Saturday next.—Four Lilliputian Horses, under 30 inches high. Three Brittany Sheep, weighing when fatted only 18 to 20 lbs. each. Six beautiful Cows, 36 inches high, will be exhibited in the Centre Transept. Admission to all, One Shilling; children under twelve, Sixpence.

ANTONIO POLETTI, THE WIZARD FROM ROME, amazes all who behold his extraordinary feats in NATURAL, MECHANICAL, and CHEMICAL MAGIC, combined with MESMERIC PHENOMENA, at the GALLERY OF ILLUSTRATION, 14, REGENT STREET, W., ANTONIO POLETTI appears to-night and every evening at Eight; and, in consequence of the brilliant success of his morning performances, every Monday, Wednesday, and Saturday, at Three. *** The most original and surprising Exhibition in England. Stalls, 3*s.*; centre seats, 2*s.*; back seats, 1*s.* May be obtained of the principal Musicsellers, and at the Gallery of Illustration from Eleven till Five daily.

THE BUCKLEY SERENADERS perform every night at the St. James's Hall, Piccadilly, and give an Extra Performance on Saturday afternoon. Every evening at 8, and Saturday at 3. *** The most unique and varied entertainment in the metropolis.

THE RELIEF OF LUCKNOW.—The Triumphant Meeting of Havelock, Outram, and Colin Campbell, surrounded by their brave companions. This Grand Picture, by T. I. BARKER, ESQ., is still ON VIEW from 9 to 6 o'clock. Admission free, by private address card. N.B. In dark weather, and after 3 o'clock, the picture is brilliantly illuminated by artificial light.

HAYWARD & LEGGATT'S, 70, Cornhill, E.C.

PRIZE CATTLE SHOW.—THE ANNUAL EXHIBITION of CATTLE, IMPLEMENTS, &c., will take place at the Baker Street Bazar, King Street entrance, on December 11th, 12th, 13th, and 14th. Open from daylight until Nine p.m. Admittance 1*s.*

SHIPWRECKED MARINERS' SOCIETY, supported entirely by voluntary contributions.

Patrons—The Queen and H. R. H. the Prince Consort.
President—The Duke of Marlborough.
Chairman of Committee—Adm. Sir Henry Hope, K.C.B.

An earnest APPEAL is made to the public for aid to clothe and send home our destitute shipwrecked seamen, cast or landed on the coast, and to give temporary relief to the widows and orphans of those who perish. 4,666 of the former have been sent to their homes, and 3,179 of the latter have partaken of the Society's bounty since the 1st of January last. The pressure on the funds has been so great that £1,000 stock has been sold, with little hope of being able to meet the distress from the storms and tempests of the coming winter if not liberally helped. James i., 27; Job xxix., 12, 13.

Donations and subscriptions thankfully received at Messrs. WILLIAMS, DEACON, & Co.'s; by the Collector, Mr. A. F. STREETELL; and by the undersigned,

FRANCIS LEAN, Secretary.

Office, Hibernia Chambers, London Bridge, S.E., November, 1860.

THE SOLDIERS' DAUGHTERS' HOME, HAMPSTEAD, N.W. Founded May 8th, 1855. The only asylum in the kingdom for the daughters of soldiers of the whole British Army, whether English, Scotch, or Irish. This is the only asylum open to the soldier's daughter, whether orphan or not, without limitation to any particular war, or restriction as to infancy on admission.

Under the Patronage of Her Most Gracious Majesty the Queen; H.R.H. the Prince Consort; H.R.H. the Prince of Wales; General H.R.H. the Duke of Cambridge, Commander in Chief, K.G.; and a large Committee of Noblemen, Members of Parliament, General and other Officers, Chaplains of the Army, Clergymen, and influential Laymen.

There is no government asylum for the female children (whether orphans or not) of the whole British Army; they are excluded from the Royal Military Asylums at Chelsea and Dublin. The Soldiers' Daughters' Home receives no pecuniary support whatever from the Government or from the Patriotic Fund, and is entirely dependent upon voluntary subscriptions. Funds are very much needed to complete the number of inmates to 200; 170 are now in the Home; in addition to which 110 girls have been admitted and provided for satisfactorily since the foundation of the Home. Chairman of the Committee, Major the Hon. H. L. Powys, late 60th Royal Rifles.

Subscriptions thankfully received by the Treasurer, Sir John Kirkland, No. 17, Whitehall Place, S.W.; by the Bankers, London and Westminster Bank, St. James's Square, S.W.; and Messrs. Masterman, Nicholas Lane, City, E.C.; at the Home, Hampstead, N.W.; and at the Office, No. 7, Whitehall, London, S.W. Post-office Orders should be made payable to Mr. John Marsh, Secretary, upon the Charing Cross Post-office, S.W.

VANSITTART MEMORIAL.—The Committee desire to GIVE NOTICE to those FRIENDS of the late CAPTAIN NICHOLAS VANSITTART, C.B., who have not yet paid their tribute of regard to the memory of that gallant and distinguished officer, that the SUBSCRIPTION LIST will be CLOSED on December 20, and it is requested, therefore, that their contributions may be forwarded before that day to Messrs. HALLETT, MAUDE, & HALLETT, Great George Street, Westminster S.W.

Amount already subscribed ... ... £351 7*s.* 8*d.*

A. HALLETT, Hon. Sec.

Every description of Life Assurance business is transacted. Advances are made on Mortgage of Freehold Property, Life and Reversionary Interests, &c., and also to Assurers on Personal Security. The Assets are 340,000*l.*, and the Income is over 63,000*l.* per annum. Four-fifths of the entire Profits are appropriated to the Assured. Three divisions of considerable amount have already taken place.

WILLIAM RATRAY, Actuary.

UNDER THE ESPECIAL PATRONAGE OF
HER MOST GRACIOUS MAJESTY THE QUEEN,
AND
FIELD-MARSHAL
HIS ROYAL HIGHNESS THE PRINCE CONSORT,
K.G., K.T., K.P., G.C.B., & G.C.M.G.

THE ROYAL NAVAL, MILITARY, AND EAST INDIA LIFE ASSURANCE SOCIETY,
Established A.D. 1837, for General Assurance on Lives,
13, WATERLOO PLACE, LONDON, S.W.

DIRECTORS.

Lieut.-General Sir Frederic Smith, K.H., M.P., F.R.S., Chairman.
James Frederick Nugent Daniell, Esq., Deputy-Chairman.

Gen. Edw. Wynyard, C.B.	Wilbraham Taylor, Esq.
Archibald Hair, Esq., M.D., late Royal Horse Guards.	Lt.-Col. F. S. Sotheby, C.B.
Wm. Chard, Esq., Navy Agent.	Gen. Sir George Pollock, G.C.B.
Maj. William Lancey, R.E.	Rear-Adm. Michael Quin.
Gen. H. G. A. Taylor, C.B.	Vice-Adm. Sir G. R. Lambert, K.C.B.

ASSURANCES are granted upon the lives of persons in every profession and station in life, and are extended to Tropical and other Climates, on conditions more favourable (especially to the NAVY and ARMY) than heretofore have been deemed practicable.

WILLIAM M. JAMES, Secretary.

13, Waterloo Place, London, S.W.

THE MUTUAL LIFE ASSURANCE SOCIETY, 39, King St., Cheapside, E.C.—A.D. 1834.—The TWENTY-SIXTH ANNUAL REPORT, Cash Account, Balance Sheet, &c., are now ready, and may be had on written or personal application.

CHARLES INGALL, Actuary.

TO OFFICERS, REGIMENTAL MESSES, &c.

MESSRS. SAUNDERS, OTLEY, & CO., East India Army Agents, 50, Conduit Street, Hanover Square, W., draw and remit Pay, Pensions, Dividends, &c., and transact every description of Financial Business. They purchase and forward Miscellaneous Supplies, and ship them to Officers, Regiments, and Messes in India and the Colonies. Letters and Parcels received and forwarded.—SAUNDERS, OTLEY, & Co., East India, Army, & Colonial Agents, 50, Conduit St., Hanover Square, London, W.

MESSRS. A. K. KING AND COMPANY, ARMY & GENERAL COMMISSION AGENTS,
41, OLD COURT HOUSE STREET, CALCUTTA.

MESSRS. ADDISON & CO., ARMY AGENTS, 11, WATERLOO PLACE, PALL MALL, S.W.
Exchanges negociated.
Pecuniary accommodation afforded to officers on full pay, on their notes of hand only, at a few hours' notice.
Applications by letter promptly attended to.
Every description of army business transacted.

REMITTANCES TO INDIA AND AUSTRALIA.—The undersigned GRANT DRAFTS and LETTERS OF CREDIT on Calcutta, Madras, Bombay, Melbourne, and Sydney, at the exchange of the day. Rupee Paper and Interest Bills negociated.—GRINDLAY & Co., East India Army Agents, 55, Parliament Street, S.W.

MONEY.—MONEY ADVANCED at a few hours' notice, on the most advantageous terms, to Noblemen, Officers in the Army, Heirs to entailed estates, and Gentlemen of property, on their personal security, also on security of reversions to landed estates, at 5 per cent., payment of which may be deferred until possession, on application to Mr. DICKER, 10, Craig's Court, Charing Cross, S.W.

MONEY.—£100 to £100,000 to LEND on Reversions, Life Interests, Freehold, or Leasehold Security. Gentlemen of property accommodated on their notes of hand to any amount; and for 50*l.* to 3000*l.* on personal security and bills of sales.—Apply personally or by letter to Messrs. LLOYD, HUDSON, & Co., 14, Chatham Place, Blackfriars, London, E.C.

MONEY ADVANCED to HEIRS to ENTAILED ESTATES on their Notes of Hand, on Reversions, Life Interests, Annuities, and other property.—Apply, by letter in the first instance, to S. G. N., 9, York Buildings, Adelphi, London, W.C.

MONEY.—REVERSIONS & ANNUITIES under Wills SOLD, or any amount ADVANCED thereon by mortgage, at 4 to 5 per cent. First-class bills cashed.—Messrs. WINTER & Co., Reversionary Property Agents, 12, Pall Mall East, S.W.

INDIA, CHINA, AND AUSTRALIA.—OVERLAND ROUTE.—Officers and Civilians returning from Furlough, or joining on first appointment, can secure their passage through Messrs. WHEATLEY & CO. (late Waghorn), West End Office, 23, Regent Street, Waterloo Place, S.W., and be thus spared the inconvenience, delay, and trouble of going to the City. Handbooks on application. Baggage collected and shipped at a through charge. Insurances effected. Files of the latest news in the Reading-room.

LONDON, CHATHAM, AND DOVER RAILWAY.—OPENING OF THE WESTERN EXTENSION FROM CHATHAM TO LONDON.—The Shortest Route to Canterbury, Ramsgate, Margate, Deal, Dover, Sheerness, and Whitstable, for Herne Bay.—For any distance over 25 miles ordinary return tickets are available for two days, and return tickets issued on Friday, Saturday, and Sunday are available until the following Monday. On Sundays return tickets, at a single fare, by every train, between Sheerness and Sittingbourne, and for any distance over 10 miles on the main line.

CHRISTMAS HOLYDAYS.—For any distance over 25 miles ordinary return tickets issued on Saturday, Sunday, Monday, Tuesday, and Wednesday, the 22d, 23d, 24th, 25th, and 26th December, are available for the return journey until Thursday, the 27th.

Fast four-horse omnibuses between the Company's booking-office, Stroud Street, Dover, and Canterbury Station.

At Canterbury, Faversham, Sittingbourne, and Chatham, an omnibus meets the up and down trains; and at Chatham, Rainham, Sittingbourne, Sheerness, Faversham, and Canterbury, flys are in constant attendance.

Passengers to London Bridge to change carriages and re-book at the Crystal Palace Station, and proceed by the Brighton Line.

Passengers from London Bridge to take tickets at the Brighton Station for the Crystal Palace Station, and to change carriages and re-book at that station.

TIME AND FARE TABLE, ON AND AFTER 3D DECEMBER, 1860, AND UNTIL FURTHER NOTICE.

LONDON, CHATHAM, AND DOVER LINE.

DOWN TRAINS.—All trains on the London, Chatham, and Dover Line are 1st, 2d, and closed 3d class.

DR. BUCHAN'S PATENT SUGAR-COATED VEGETABLE PILLS, VEGETABLE SKIN OINTMENT, and CONCENTRATED VEGETABLE ESSENCE, for Purifying the Blood, Regulating the Bowels, and Removing Vitiated Humours, Bilious and Liver Complaints, Rheumatism, Gout, Scorbutic Affections, Costiveness, Skin Eruptions, Deep-seated Ulcers, and all Diseases of the Nervous System, from whatever cause, &c., affording at once a new lease of life to the sickly and aged of both sexes, also giving a beautiful and clear complexion. Proved by the sworn testimonies made before the Lord Mayor of London and sitting Magistrates. Sold by Buchan & Co., Patentees, 22, Newman St., Oxford St., London, W., and all chemists in town and country. Prices:—Pills, per box, 1*s.* 1½*d.*, 2*s.* 9*d.*, and 11*s.*; Ointment, per pot, 1*s.* 1½*d.*, and 2*s.* 9*d.*; Essence, per bottle, 4*s.* 6*d.*, 11*s.*, or bottle containing four times that quantity, 33*s.* Agents:—Barclay, 75, Farringdon Street, E.C.; J. Sanger, 150, Oxford Street, W.; Hannay, 63, Oxford Street, W.; Butler, 4, Cheapside, E.C.; Hooper, 43, King William Street, London Bridge, E.C.; R. Howden, 73, Gracechurch Street, E.C.; Prout, 229, Strand, W.C.; &c. &c.

Gratis, or post free for one stamp, of all Agents, and 2, Newman Street, W., Dr. Buchan's Work, entitled, BUCHAN'S DOMESTIC MEDICINES, containing instructions for the cure of every ailment incidental to man, woman, or child.

A Physician and Member of the Royal College of Surgeons, England (Registered under the New Medical Act), attends daily to give advice, without fee, to those purchasing Buchan's Medicines.

DINNEFORD'S PURE FLUID MAGNESIA

has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for ACIDITIES, HEARTBURN, HEADACHE, GOUT, AND INDIGESTION.

As a MILD APERIENT, it is admirably adapted for DELICATE FEMALES, *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the

ACIDULATED LEMON SYRUP,

forms an *Effervescing Aperient Draught*, which highly agreeable and efficacious.

PREPARED BY DINNEFORD & CO., DISPENSING CHEMISTS, and General Agents for the *Improved Horse Hair Gloves and Belts*),

172, NEW BOND STREET, LONDON, W.,

and Sold by all respectable Chemists throughout the Empire.

DAVARESSE'S PATENT FLEXIBLE CAPSULES, by which all nauseous Balsamic Medicines may be taken without inconvenience. These capsules are made of animal membrane of slow solubility, thus obviating the usual nausea and unpleasant eructations which follow the use of those made with gelatine. From numerous medical testimonials, EVANS AND LESCHER, the Patentees, need only select the following by William Acton, Esq., see page 90 of his celebrated Treatise:—"In many instances I have known the gelatine capsule burst in the effort of swallowing, or dissolve as soon as it is in the stomach; an improvement has latterly been introduced by Messrs. Evans & Lescher, by enclosing the medicine in membrane, thus obviating the objection to all gelatine capsules." The Membranous Capsules may be obtained of all chemists, &c., in town and country.

RUPTURES. — HUXLEY'S IMPROVED PATENT MOC-MAIN TRUSS dispenses entirely with the lever spring. A flexible band, perfectly imperceptible, encircles the body (in lieu of the old steel spring), and an elastic pad secures the hernia. Measure required—circumference two inches below the hips. Price single, 12*s.*; double, 18*s.*; postage 1*d.* and 10*d.* Illustrated circulars on application to Mr. E. HUXLEY, 12, Old Cavendish Street, Oxford Street, W.

A BOON TO NERVOUS SUFFERERS.

HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., will send, post free, on receipt of a stamped directed envelope, THE WARNING VOICE, a new medical work on the most effectual cure of Nervous Debility, Loss of Memory, Indigestion, &c., which, if neglected, result in consumption and premature decay; with plain directions for perfect restoration to health and vigour. The true guide to those who desire a speedy cure. Every young man should peruse this excellent little work, if he values his health, happiness, and peace of mind. Sent direct from the Author's residence, 8, Burton Crescent, Brunswick Square, London, W.C.

ASTHMA.

DR. LOCOCK'S PULMONIC WAFERS give instant relief and a rapid cure of asthma, consumption, coughs, and all disorders of the breath and lungs. To singers and public speakers they are invaluable for clearing and strengthening the voice. They have a pleasant taste. Price 1*s.* 1½*d.*, 2*s.* 9*d.*, and 11*s.* per box. Sold by all Druggists.

TEETH.—MR. ESKELL'S INVENTION.—Surgeon Dentist, 8, Grosvenor Street, W., obtained HER MAJESTY'S ROYAL LETTERS PATENT for an improved method of fixing ARTIFICIAL TEETH to GUMS on MOVEABLE BASES, without plates, springs, or any fastening, which may be thus briefly described.

The teeth are perfectly FITTED from first to last in FEW HOURS, without pain or extraction of stumps, by means of a Moveable Base, which is placed within the gums, and applied to the gums, on which it takes a most accurate and minute impression, and adheres by such tenacity by suction, that the teeth become as immovable, except at the pleasure of the wearer. When any of the natural teeth fall out, by substituting a new base, which can be applied without the aid of a dentist, the Artificial Teeth are always useful, and last a lifetime.

Mr. Eskell's Patent, of which he is the sole inventor, can only be procured at his residence, where specimens may be seen and every information obtained. Decayed teeth stopped. Loose teeth fastened. All consultations free. Terms strictly moderate.—8, Grosvenor Street, Grosvenor Square, London, W.; 33, Old Steine, Brighton; and 39, Bennett's Hill, Birmingham.

DIMISTON & SON, Sole Manufacturers of the only WATERPROOF CLOTHING guaranteed to withstand the climate of India. GLASS AND CHINA.

PELLATT & CO. have for more than thirty years had the honour to supply Officers' Messes with the above articles, and continue to manufacture the quality which has during that period given great satisfaction. Patterns and Estimates forwarded to all parts of the Country.—Address, Falcon Glass Works, Blackfriars, London, S.E.

GARDNERS' £2 2*s.* DINNER SERVICES complete, best quality. A large selection of patterns of the choicest description. Breakfast, Dessert, Tea, and Toilet Services, at the lowest possible prices. Cut Wines, 3*s.* 6*d.* per dozen; Cut Quart Decanters, 7*s.* 6*d.* per pair.—H. & J. GARDNER (by appointment to Her Majesty, the Board of Green Cloth, Lords of the Treasury, Admiralty, Office of Works, Customs, and the other Government Offices), 453 and 63, Strand, Charing Cross, W.C. Established 108 years. Engravings free by post.

CHAMBERLAIN'S ROYAL PORCELAIN WORKS.—Admission of Visitors to the Works to be had on application at the Show Rooms, from 9 A.M. to 6 P.M. each day, except Saturday from 9 A.M. to 2 P.M.—W. H. KERR & Co., "Proprietors," Worcester, successors to Messrs. Flight, Barr, & Co., and Messrs. Chamberlain & Co.

CROSSE AND BLACKWELL, Purveyors in Ordinary to Her Majesty, invite attention to their PICKLES, SAUCES, TART FRUITS, and other Table Delicacies, the whole of which are prepared with the most scrupulous attention to wholesomeness and purity. C. & B. have for many years enjoyed the high honour of supplying Her Majesty's Table with their manufactures. A few of the articles most highly recommended are—Pickles and Tart Fruits of every description, Royal Table Sauce, Essence of Shrimps, Soho Saucc, Essence of Anchovies, Orange Marmalade, Anchovy and Bloater Pastes, Strasbourg, and other Potted Meats, Calf's-foot Jellies of various kinds for table use, M. Soyer's Sauces, Relish, and Aromatic Mustard, Carstairs' Sir Robert Peel's Sauce, and Payne's Royal Osborne Sauce. To be obtained of all respectable Oilmen, Grocers, &c., and wholesale of CROSSE & BLACKWELL, 21, Soho Square, London, W.

SPORTSMEN AND GENTLEMEN OF THE ARMY AND NAVY.—S. & B. SOLOMONS, Opticians, 39, Albemarle Street, Piccadilly, W., opposite the York Hotel. Portability combined with great power in FIELD, RACECOURSE, OPERA, and general out-door day and night powerful waistcoat-pocket PERSPECTIVE GLASSES, weighing only 4 ounces each, containing 12 and 18 lenses, constructed of German glass, will show distinctly persons to know them at two-and-a-half and three miles. They serve every purpose on the Racecourse and at the Opera House. Country scenery and ships are clearly seen at eight to ten miles. They are also invaluable for Shooting, Deerstalking, and Yachting. Her Majesty's Coast Guards are making use of them as day and night glasses. The terms for them are powerful and brilliant Telescopes for both eyes. The most powerful Telescopes, possessing such extraordinary power that some, three-and-a-half inches, with an extra astronomical eyepiece, will show distinctly Jupiter's moons, Saturn's ring, and the double stars; with the same telescope a person can be seen and known three-and-a-half miles distant, and an object from fourteen to sixteen miles. They are in endless variety, of larger and all sizes, with increasing powers, and are secured by Her Majesty's Royal Letters Patent.

SPECIAL NOTICE.

EXTRACTS FROM THE PRESS.

"Upon each floor, there are small apartments called the 'trying-on rooms,' affording customers an opportunity of avoiding the guess-work which has hitherto prevailed in ready-made emporiums, and everywhere immense mirrors are placed in which the buyer may satisfy himself with the fit and shape of the garment which he proposes to purchase."—*Standard*, 21st Nov., 1860.

"On the whole, the new establishment of Messrs. E. Moses & Son is decidedly the most complete of its class in the Metropolis."—*Morning Herald*, 21st Nov., 1860.

"The whole exterior of the building presents a noble aspect. It combines an appearance of lightness and solidity, grace and strength."—*Illustrated News of the World*, Dec. 1st, 1860.

By G. RICCIARDI. Translated from the Italian.

BRADBURY & EVANS, 11, Bouverie St., Fleet St., E.C.

MAPPINS' TABLE CUTLERY.—SEASON 1860.

CAUTION.—MAPPIN BROTHERS beg to advise their customers and correspondents that they have only one establishment in London, viz., at London Bridge, and they hope that their friends will be careful to address them in full, either Mappin Brothers, London Bridge, London, E.C.; or Mappin Brothers, Queen's Cutlery Works, Sheffield. Established in Sheffield, A.D. 1810. None are genuine without their corporate mark, the "Sun," granted to their father by the Cutlers' Company of Sheffield, June 26, 1835.

Messrs. MAPPINS' Table Knives still maintain their unrivalled superiority; all their Blades being their own Sheffield Manufacture, are of the very first quality, with secure Ivory Handles, which do not come Loose in Hot Water; and the difference in price is occasioned solely by the superior quality and thickness of the Ivory Handles.

ARCHIBALD GRAHAM, *to whom remittances are payable. The subscription to the paper is 7s. 7d. per quarter, or 30s. 4d. per annum, payable in advance, postage included.*

ON a broiling hot and sultry day in July, 1855, a gentleman with the British army encamped before Sebastopol, received an official communication from the Quartermaster-General's office at Balaklava, to the effect that there was a certain case in store there directed to him, which must be taken away forthwith, lest a hard fate should befall it. Notwithstanding the oppressive nature of the day, the expectant owner, after a few minutes' delicious reverie and speculation on the probable contents of his case, which were decided to consist of zephyr clothing and cooling drinks, directed his energies to the solution of the Transport question; and by uniting his interests among the Artillery, the Commissariat, and the Land Transport, succeeded in procuring animals, a vehicle, harness, and a driver, to proceed from the front to Balaklava, and to return with the treasure-chest from the Quartermaster-General's store. Towards sunset a bale, some five feet square, covered with black tarpaulin, was deposited in front of the hut, where, chisel and hammer in hand, with all the strength of his staff, the proprietor was standing in the shade, and wiping the perspiration from his brow. The outer cover removed, a stout elm case presented itself to view, which resisted all aperient processes with vigour for some time, but yielded at last just as the operators, suffering from the heat and their exertions, were about to try the effects of a revolver on the iron clamps. Strata of brown paper and packing canvas were pierced through and torn off excitedly, and enclosure number one neatly done up in calico was reached, and was rapidly exposed to view. Horrible to relate, it was a seaman's thick pea-jacket, lined with rabbit-skins throughout, and fortified on the back and shoulders with macintosh, and on it was pinned, "The gift of a few unknown friends, Dec. 26, 1854!" The very sight nearly made the party faint. In quick succession woollen comforters, mittens, waistcoats of Berlin wool, jack-boots lined with fur, seal-skin gloves and caps, chest-protectors, treble-milled flannel shirts, a buffalo robe, spirit-lamps, candles, provisions—all the appliances of an arctic voyager were tumbled out on the ground before the simmering wretches who were suffering under tropical heat! Of what inestimable value had those despised comforts been in the proper season!—how utterly useless they were now! What a boon any one of them would have proved to poor fellows whose lives might have been saved by them a few months before! There was all that kindness, thoughtfulness, money, anxiety, and good feeling, gone for nothing! It is needless to pain those who contributed to the friendly offering to tell the ultimate fate of their presents, which, instead of being acceptable, proved a grievous incumbrance and eyesore to those they were intended to benefit. They were too late. The fatal phrase was only too well known to English ears during that Crimean War. We do not want to hear it again coming to us over the frozen wastes from China. If any suffering occurs in our Army, which could have been avoided or evaded by energy of administration, rapidity of action and foresight, the country will not be readily satisfied. The drawbacks of constitutional checks and departmental forms are serious enough, but their existence will be a poor excuse for those who are responsible for the efficiency and health of the Chinese Expedition, which, by hard fate, if by nothing worse, seems doomed to pass the winter in a strange and hostile country, under circumstances the nature of which cannot even be surmised by the best informed amongst us.

Let us look to France. It is true that the French have not India to draw upon, but they have colonies not quite useless for aiding, reinforcing, and feeding their troops in China. In India there are rumours of famine, and of disturbances, which always attend scarcity or high prices of food. Scarcely has the news of the allied army being forced to winter in China come to Europe than the French authorities act and prepare to meet the occasion. In the correspondence of the *Times* of yesterday it is stated that one frigate will leave Toulon to-day with 2,000,000 francs and stores, for the French soldiers and sailors in the East, and that another frigate will follow her at the end of the month, with an equally large sum of money and the rest of the baggage. Great as is this promptitude of action, it will fail to arrest any sufferings on the part of the expedition, if the circumstances to which we shall advert have occurred. The French Intendance and the English Commissariat will, in all probability, be taken by surprise, on hearing that the armies are to winter in the north-east of China, and if they are driven to search for supplies beyond the limits of the country, there will be formidable difficulties to contend with in the shape of transport, which no expenditure or exertions can completely overcome. Elsewhere there will be found some remarks on our position deserving attention; and as the Chinese question is assuming large proportions, we have not hesitated to devote a portion of our space to another article descriptive of Pekin and of its resources.

Our army is at present in a most admirable position—the communications are open, the bases of operations are safe, food is abundant, the sanitary condition of the troops exceedingly favourable. But the coming winter, which has indeed already closed around our army, cannot fail to produce most serious modifications in that state of affairs. The ice and frost will deprive us of the most important base of operations—the fleet, and the use of the sea. No one knows anything of the condition of the Gulf of Pecheli in the depth of the Chinese winter; but the experience of our Sinensian mariners tends to make them think our ships must retire to Shanghai, or some safe port, for the greater part of the winter. In the present state of our knowledge on the subject of supplies, it is impossible to affirm or deny that the Commissariat have received such supplies as will render the armies independent of either land transport or sea carriage. If the Tartar commander has indeed twenty thousand horsemen, who can be taught to act on a fixed plan of warfare, and if they can keep the field and work with the smallest efficiency—if, in fact, they possess any Cossack capability—then our military status becomes exceedingly difficult. There are indications in the news of last night that a portion at least of the allies will fall back on Tien-tsin. The position of an army on a paved wall 60 feet broad, running round an enormous city, would be of course untenable. Into the city itself they could not go without serious risk of demoralisation and ruin from plundering and other temptations. But the political effect of abandoning Pekin might be turned to advantage by the Tartars, unless the allies take steps to show that they have left the city merely on account of strategical considerations. It is a reflection on our diplomatic service, and a grave censure on the Laodiceanism of well-paid public servants, that the Government has not in its possession a single document relating to the minute and careful meteorological and physical researches of the Russians in China, although by the liberality of the Czar's administration they are distributed all over Europe. Most probably all the knowledge the Government in its administrative capacity had of the climate of Pekin in winter was gathered from Mr. H. Herschel's letter in the *Times* of yesterday. The facts therein stated demonstrate the existence of cold far exceeding the average of the Crimean winter. Fuel is scarce, and the troops may suffer severely if the Tartars can cut off the supplies of any necessary from Pekin or Tien-tsin. Of furs and warm clothing there is little likelihood of scarcity as long as the soldiery keep on terms with the people. The Commissariat chest is filled. But, plundering, looting, and violence, will be our greatest enemies; and if Sir Hope Grant succeeds in restraining our troops as well as he has hitherto done, it is to be hoped his example will not be lost on our gallant allies, who have shown their usual activity in taking the "entamure" of the Imperial palace. There will be no time to make preparations for the comforts of our acquaintances in China, as the mail will leave to-day, but in next week's paper we propose to offer a few suggestions in reference to the articles which it would be most advisable for those who have relatives or friends in China to send out to them, on the chance that the communications remain open, or that they will arrive in time to mitigate some of the rigours of winter. We sincerely trust that the grounds of apprehension which we have indicated may be falsified by the result. No more arduous duty could fall on our small army than to keep open its communications for one hundred miles in deep snow; and yet it appears impossible for the Allies to retire from Pekin *re infectâ*, or to do so at all with any guarantee for the future. Their occupation of the city itself is fraught with danger, which all who know our Army or China can appreciate.

The experiments which will be undertaken during the ensuing fortnight on board of H.M.S. Excellent, at Portsmouth, will probably be of a singularly interesting character; as fresh descriptions of rifled ordnance have reached the naval yard, and will be put on board early in the week. A 100-pounder Armstrong gun, and an 80-pounder Whitworth, are among the arrivals, and practice from these widely-celebrated rivals is eagerly anticipated. The naval pivot-slide carriage, to which we alluded in our last issue, as adapted to the use of Armstrong's 40-pounder gun, has been tested during the week, and has completely fulfilled all expectations. With a tight compressor the recoil was only 2 feet 3 inches, and without a compressor it barely went home to a taut breeching. The main alterations consist in widening and contracting the cheeks to fit the Armstrong, thereby changing the position of the rollers, which must necessarily run over the iron tramway of the slide. The quoin has also been replaced by the elevating screw. By this success an immense saving to Government will be effected, and we trust that some reward, substantial in its character, will be eventually offered to the foremen of the War Department, Portsmouth, who have carried out and mainly suggested this improvement. The carriages thus altered by them have been forwarded to Woolwich; and it is not a little singular that no sooner was the first success and description of the change notified in this journal, than the following week a carriage, on a plan precisely similar, was forwarded from the Carriage Department of the Royal Arsenal, Woolwich, to the Excellent for trial. No doubt a little professional jealousy is an excellent and profitable thing for the public, and on this occasion we can record, without offence, that Portsmouth has "wiped the eye" of Woolwich. *Palmam qui meruit ferat.* The Illustrious has received eight 40-pounder Armstrongs, and the men of the Channel fleet will now be rapidly trained in the use of the new rifled cannon.

We regret to find that the mutinous spirit which has been for some time latent in the 5th Europeans at Dinapore, and which some little time since exhibited itself in an unpleasant shape, has since assumed a more serious aspect, so much so that the regiment, we learn by telegram, has been disbanded, and one man shot.

Two batteries of the new Armstrong guns, with the latest improvements in carriages and fittings, are in course of preparation, and will be ready for shipment to China very speedily. It is not probable that the guns can be conveyed to the hands of the Artillery till the end of the winter.

THE ARMY.

Royal Horse Guards. Captain Peach and Lieutenant Bennett are about to retire from the Service.

6th Dragoon Guards. Lieutenant H. R. Forster, and Cornets Bookey and Phibbs, have been examined this week at Aldershot as to their qualification for promotion to the rank of captain and lieutenant, respectively.

7th Dragoon Guards. Captain J. C. Murphy, who lately exchanged from the 3rd Light Dragoons, has sailed to join the head-quarters at Sealkote.

8th Hussars. Cornet Hutchins has sailed for Bombay to join the regiment.

Royal Engineers. Captain H. J. D. Scott, the photographic instructor at the Royal Engineer establishment, and surveying instructor to the officers and men of the Royal and Indian Engineers, having had a severe attack of illness whilst on leave of absence, Captain W. D. Marsh, R.E., has been ordered to join head-quarters to carry on the duties of instructor performed by Captain Scott.

Grenadier Guards. Lieutenant-Colonels Montresor, Stuart, and Sir William Wallace are, we understand, about to retire from the Service.

Coldstream Guards. Lieutenant-Colonel Lord Dunkellin is about to retire from the Service.

8th Regiment, 2nd battalion. A detachment left Chatham this week to join the depot at Templemore.

18th Royal Irish. A sudden gloom has been thrown over the 2nd battalion at Shorncliff, by the death of Major Armstrong, who died on Wednesday, after a short illness. Major Armstrong entered the Service in 1839, and after gallant service, he became a major in 1857, on the augmentation of the regiment to the Indian establishment. He served with the 18th Royal Irish throughout the war in China (Medal), including the storming and capture of the heights and forts above Canton (carried the colours), capture of Amoy, second capture of Chusan, attack on Chinhae, Ningpo, Segoan, and Chinkiangfoo. Commanded the guard at the west gate of Ningpo on the morning of the 10th of March, 1842, when at the head of 28 men he repulsed a column of 3000 Chinese, and captured a stand of the enemy's colours, for which service he was thanked in orders by Lord Gough, and mentioned in the dispatches. Served in Burmah from January, 1853, until the end of the war (Medal), and commandad a detachment consisting of four companies of the 18th Royal Irish, during the whole of the successful operations in the Donabew district, including the 17th of March, 1853, when the 18th Royal Irish stormed and carried the first stockade, and also the 19th of March, when the stronghold of the Burmese chief, Meah Toon, was stormed, and after considerable loss captured. Served in the Crimea from 30th of December, 1854, to 11th of August, 1855, and led the attack against the batteries at the Dockyard Creek, and was wounded. By his death Captain Kelly, Lieutenant Burke, and Ensign Minnitt, respectively obtain a step of rank without purchase.

25th King's Own Borderers. A detachment of the 1st battalion left Chatham this week for Athlone to join the depot. 2nd batallion. Assistant-Surgeon Milburn is on leave from Aldershot to January 30, 1861.

27th Regiment. A detachment left Chatham for the depot at Cork this week.

41st Regiment. James Johnson, the private of this regiment who killed Sergeant Chipt and Corporal Coles at Aldershot last September, was tried this week at Winchester, found guilty, and sentenced to death.

49th Regiment. Surgeon J. H. Bews is on leave from Aldershot to January 19, 1861.

Royal Marine Light Infantry. The appointment of Lieut.-Colonel at the Plymouth division of Royal Marine Light Infantry has become vacant by the decease of Lieut.-Colonel Edward Hocker, C.B. The deceased officer had served in the corps of Royal Marines upwards of thirty years, his commission as Second Lieutenant bearing date the 30th of January, 1830. Lieutenant Hocker served in Syria in 1840, and was at the storming of Sidon and bombardment of Acre by Sir C. Napier. He commanded a battalion of the Royal Marine forces at the China expedition in 1857, including the blockade of the Canton river, and the landing before and storming of Canton, his distinguished services on that occasion being rewarded by a Companionship of the Bath. The senior Captain on the list of the Royal Marines is Captain R. G. Conolly, Instructor of Gunnery at the Chatham division, who will be promoted to the vacant rank. A distribution of medals, awarded by the Lords of the Admiralty for long and meritorious service, has been made to several of the non-commissioned officers and men of the Chatham division of Royal Marine Light Infantry who have completed a period of twenty-one years' service, and have recently been discharged from that corps. The presentations were made on the parade-ground at Chatham by Lieut.-Colonel M'Killop, at a full parade of the officers and men, the following being the names of the non-commissioned officers and men on whom the honour was conferred:—Barrack-Sergeant Alexander Wallace, Colour-Sergeant Thomas Boyce, Sergeant Jonas Lilley, Private David Newman, Private Henry Mobley, and Drummer William Lerey.

2nd West India Regiment. We learn from Sierra Leone that Her Majesty's ship Industry arrived on the 20th of November from Mayo, with 200 troops belonging to the 2nd West India Regiment, wrecked in Her Majesty's ship Perseverance.

The next examination of candidates for admission to the Royal Military College, Sandhurst, is appointed to be held before the Vice-President and members of the Council of Military Education on Monday, the 17th inst., at the Royal College, Chelsea. The examination will extend over six days.

The examination of candidates for appointment to the Commissariat by the Council of Military Education will commence at the Royal College, Chelsea, on Monday, the 17th inst., and will extend over the week.

The next examination for admission to the Royal Military Academy, Woolwich, before the Vice-President and members of the Council of Military Education, at the Royal College, Chelsea, will take place early in the ensuing month. The examination of candidates will commence on the 7th proximo, and conclude on Thursday, the 24th.

The Secretary of State for War has notified by Circular that an Act having been passed during the last session of Parliament relative to the postage on redirected letters of commissioned and non-commissioned officers and soldiers whilst on actual service, the Lords Commissioners of Her Majesty's Treasury, by their Warrant, dated 23rd October, have been pleased to exempt the letters of such commissioned and non-commissioned officers and soldiers from any foreign rates of postage chargeable for re-direction whenever such letters, on being re-directed, shall be again forwarded by the post through any foreign country.

A monument to the late Major-General Sir William Reid, K.C.B., is to be erected at Bermuda. He was Governor of Bermuda from 1829 to 1846.

The relative rank of barrack-masters of the second-class having been erroneously inserted in the Royal Warrant of the 27th of September, 1860, as that of captain; the rank of barrack-masters of the third class as that of lieutenant; and barrack-masters of the fourth class having been omitted altogether, it is specially notified that the ranks of those officers are to be the same as authorised by the Royal Warrant of the 7th of February, 1860; and the schedule of ranks attached to the Royal Warrant of September 27, 1860, is to be altered accordingly—viz., barrack-masters of the second class, relative rank of major; barrack-masters of the third and fourth classes, relative rank of captain."

THE LATE LIEUTENANT ANDERSON.—The *Scotsman* says:—"The intelligence from China regarding the murder of Lieutenant Anderson, when a prisoner in the hands of the Chinese, will create special pain in Scotland among many relatives and friends. Lieutenant Anderson, though only 26 or 27 years of age, had rendered distinguished services in India, and had already attained celebrity and trust in the forces employed under Sir Hope Grant in China. When the mutiny in India broke out he accompanied his regiment, the Bombay Fusiliers, to the Punjab, where he greatly distinguished himself. He was afterwards attached to 'Hodson's Horse,' in which celebrated force he acted as brigade-major, serving with it at Lucknow. After the suppression of the mutiny, he applied for employment in the expedition to China, and, from his acknowledged ability, he was appointed to an important command in Fane's Irregular Cavalry. He distinguished himself particularly with the Cavalry Brigade previous to and during the taking of the Taku Forts; and it is inferred that he had been selected to the honour of commanding the escort accompanying the English and French diplomatic officers who were so basely betrayed and so cruelly treated. In private life Lieutenant Anderson, from his amiable and generous disposition, was greatly beloved by his many friends." *

ROYAL MILITARY ACADEMY.—The gentlemen cadets belonging to the Royal Military Academy at Woolwich, have entered upon their half-yearly examination duties, preparatory to closing the establishment for the Christmas holidays. The usual assembling for the distribution of prizes will take place on Tuesday, the 18th instant, which the Duke of Cambridge, in his capacity of President of the Council of Education, has consented to preside over and also to inspect the company under arms. The two new wings, situate at the extreme angles of the building, are progressing towards completion, and are expected to be ready for the reception of the cadets on the resumption of their duties after the Midsummer vacation, when each student will be afforded the long-desired advantage of a separate sleeping-room; and the inconvenience now experienced in the want of appropriate class and lecture-rooms will be effectually remedied. The architectural appearance of the exterior will be also considerably improved.

* His loss will be felt in India, where he had many friends. We know well the praise above was well deserved.—EDITOR.

The Army Gazette.

WAR OFFICE, PALL MALL, DECEMBER 11.

Royal Regiment of Artillery—Second Captain Charles Paulett Rotton to be Captain, vice Bayly, removed to the Supernumerary List.

Lieutenant William James Hall to be Second Captain, vice Rotton.

Second Captain Brymer Francis Schreibor to be Adjutant, vice Rotton, promoted.

Corps of Royal Engineers—Lieutenant George Le Breton Simmons, with temporary rank, to be Lieutenant, with permanent rank.

THE ROYAL ARTILLERY BAND.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Having lately returned from Paris, where my military eye has been accustomed to a grateful contemplation of the soldier-like appearance and equipments of the numerous troops of the "three arms" composing that garrison, during their weekly marches into the country, I was wholly unprepared to meet with the following instance of unmilitary contrast at this important outpost of the United Kingdom. Yesterday I happened to meet a detachment of Royal Artillery in complete marching order, magnificent men, and very soldier-like in appearance and equipment. They were proceeding from the railway terminus along the quay on their return from recent experiments at Bexhill. But, how effectually was their soldier-like appearance ruined through the presence at their head of a scanty apology for a brass band, in slovenly undress, with forage caps, and under the musical leadership of a man in civilian garb, consisting of a loose sort of shooting coat, hat, &c., to match! "Qu'est-ce que c'est que cela," exclaimed two foreigners looking on, and applying the "cela" by digital pointings to the hard-blowing individual in question; and well might they ask, point, and wonder! The band of many a travelling menagerie would have been preferable to the stunning discordance of this one.

Surely, in a large garrison of this sort, and one so continually under the observation of passing foreign critics, more attention should be paid to strict military outward smartness. Bandmasters should never be permitted to lead their bands on the public promenades, much less to march with them at the head of their corps, out of uniform. And, whenever a band is sent as a compliment to march a portion of its own corps, or of another, to or from the railway station, they should, as part of that compliment to the incomers or outgoers, be ordered to don their full and not their fatigue uniforms.—I am, &c., VIATOR.

CAVALRY EXPENSES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I read with a degree of personal interest a letter in your paper for November the 3rd by "O." on Cavalry Expenses. I have a son who having passed with much credit his examination, obtained a cornetcy in a good light cavalry regiment. I am unacquainted with military matters, and know nothing of the dealings that go on in regiments in regard to promotion. I simply consulted the Queen's Regulations, and found there what I thought were the prices of first commissions and the after steps. I calculated exactly my liabilities on making him a dragoon, and found that I could afford to purchase every step for my boy, and give him an allowance sufficient to keep him like a gentleman.

I was woefully deceived by these Queen's Regulations. A very few weeks before this letter of "O." appeared, my boy came to me and said he must leave the cavalry; and then for the first time, on asking an explanation, my eyes were opened.

It appears that he is now second cornet, and expects soon to be first for purchase; but instead of the 250*l.* which the Queen's Regulations told me was the price, and with which I am prepared to advance my son in his profession, 600*l.* beyond this sum is required; this I am unwilling, and indeed unable to give; and I must either have the mortification of seeing another pass over my son, or, as he terms it, he must "stick for regulation," and become an object of dislike to his brother officers; or, what he begs me to allow him to do, he must exchange to infantry.*

It is said that there is some difficulty in obtaining officers for the cavalry. Is it to be wondered at? Can the Duke of Cambridge know this state of affairs? and if he does, has he no power as Commander-in-Chief to enforce obedience to the Queen's Regulations? Or is this nefarious regimental system a sort of *imperium in imperio*, with which he does not interfere? I perceive, on referring to this same book, that a heavy punishment is awarded to those who are guilty of receiving or paying more than the sums stated in this book. Is this a dead letter? If not, why is it not inflicted! If it is a dead letter, what other parts of the Regulations are to be considered the same, and broken with impunity?

I am, &c., A FATHER.

* There is a regiment not very far from Aldershot in which an officer "stuck for regulation," and got his step; but it is hinted that his brother officers subscribed to make up the difference, without which the step would not have gone.

THE ENGLISH LEGION.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Naples, November 29, 1860.

SIR,—In a number of *Galignani's Messenger*, dated November 21st, I find quoted from the ARMY AND NAVY GAZETTE an article headed the "British Legion at Naples," in which my name and firm is dragged in a most unwarrantable manner before the notice of the British public. My residence in the city, from which this letter is dated, will explain the time that has been allowed to elapse between the publication of the article in question and my reply to it. Before the British Legion could leave England, it became necessary for the Garibaldi Committee to clothe and equip the members of it in a manner that would allow of their taking the field immediately on their arrival at Naples.

Prior to my firm being communicated with, proposals were made to Messrs. Bowater & Co., of London, to furnish certain outfits at a given sum, which proposals were accepted by them, though from some unexplained cause they were not carried out. It may be presumed that the time allowed for completion of the order was too limited, independent of which the above firm were perfectly unacquainted with the working of contracts of this description. In this dilemma Mr. Bowater called at the warehouse of Messrs. S. Isaac, Campbell, & Co., 71, Jermyn-street, and saw one of the senior partners, and there and then suggested the transfer of the contract he had undertaken to my firm, at the same time producing the order given him by the authorised agent of Garibaldi. The order read as follows:—"I guarantee on the completion of the outfit for the 600 men, and the satisfactory inspection of the same, to pay Mr. Bowater for the same, at the rate of 3*l.* 13*s.* per set. (Signed) E. Styles, Captain, Aide-de-Camp to General Garibaldi. August 18." The contract was subsequently increased for 1000 men. On behalf of the firm I accepted the terms, and hence my connection with the British Legion. As a first step on our part, a pattern set of clothing and accoutrements were made from designs given by Major Styles to Messrs. Bowater, at the price stipulated, which were submitted by Messrs. Bowater's foreman to the agents in charge, and approved of and sealed by them for our guidance.

The clothing, &c., being completed within the specified time, a board of officers assembled for the purpose of inspecting the supply, and comparing it with the sealed patterns already alluded to, previous to its being packed for shipment. Each individual article of clothing and accoutrements was minutely examined, and met with the entire approval of the board.

When the money portion of the transaction was discussed, in accordance with the terms of the contract, which, you will notice, was for cash on delivery, we ascertained for the first time that the latter portion of the agreement could not be fulfilled, the committee not having sufficient funds at their disposal to liquidate our claim. Many firms, under these circumstances, would have declined to leave the clothing in the hands of Garibaldi's agents; but such was not the case with us, for we had implicit confidence in the honour and honesty of the great man the legion was raised to serve; all we asked for was an order for payment on General Garibaldi; and having obtained this, I proceeded, at great inconvenience and expense, to Naples, with what I considered a legitimate demand upon the Dictator's treasury. If, Mr. Editor, you will turn to the *Daily News* of Oct. 31st, 1860, you will find in a letter of "Landor Praed" the following paragraphs, speaking of the conduct of the firm to which I

Digitized by Google

belong in a manner most creditable to any mercantile house placed in similar circumstances to ourselves : "The Messrs. Isaacs acted throughout not merely as honourable tradesmen, but as friends of the General, and as such the committee wished the General to receive Mr. Isaac." And again in the *Daily News* of October 15th, 1860, in another letter, signed "Landor Praed," the following: "It ought also to be said that public acknowledgments are due to the proprietors of the 'Melazzo,' of the 'Emperor,' and to Messrs. Isaac, Campbell, & Co., of Jermyn Street, for their large and liberal co-operation in these risks." The first of the above quotations will show that my proposed personal visit to General Garibaldi met with the entire concurrence of the committee in London, and indeed, several of the members, old friends of the Dictator, gave me letters of introduction to him. On my arrival in Naples, not in the character of a captain of Northampton Volunteer Rifles, but as the representative of an English mercantile house, I was introduced at the Vittoria Hotel to a Colonel Leverson, who was represented to me as an officer occupying a distinguished position on General Türr's staff, and as a man of much note in the national army.

Colonel Leverson, hearing it was my intention to seek an interview with Garibaldi, at once volunteered to take me in his carriage to the front, in order that I might complete my mission. I availed myself of this civility, and in due course saw the General. Now, sir, it behoves me to recall the attention of your readers to the unmerited satire of your editorial pen. You state in your article that Colonel Leverson introduced me to the Dictator as a countryman of his and a well-wisher of the cause, who had brought dispatches from England, thereby leading your subscribers to infer that I was flying false colours. I believe it may be permitted for even a contractor to wish well to the noble cause personified by the Liberator, and I presume also that the letters of the Italian committee may have contained much important matter, which, indeed, I was informed they did, and that it was imperative I should deliver them with the least possible delay. Let it be understood, sir, that I never intended to cloak, nor did I, under the guise of bearer of important dispatches, my business with the General; when I met him at the railway station at Sta. Maria, nothing in connection with dispatches was alluded to. Colonel Leverson merely introduced me as Mr. Isaac, from London, retiring immediately afterwards. The papers I presented to the Dictator were eight in number, seven of which were the letters already mentioned, the eighth, my account. The General opened and read one of the former, giving the remainder to his secretary, Signor Basso, at the same time requesting me to take a seat in the carriage that was to convey him to Caserta. On reaching the last named place, General Garibaldi invited me to dine with him, an invitation I was proud to accept, and in accepting which I believe I committed no crime. During the repast the General put to me many questions in reference to the Legion, &c., showing the letter he had read at the railway station had reference to my services in connection with it. On rising from the table he requested me to follow him to his closet, and there we found Basso, with all the papers spread open before him, the "little bill for clothes," amongst others. I do not see how I could well have presented my draft upon the General at a railway station, or in a dining-room, with numbers of his staff around him. And it seems to me an infinitely more delicate proceeding on my part to give it to him in his private room, where he had time and opportunity to satisfy himself of its genuineness; and so well was he conviced of this that he indorsed it with an order upon the treasury for immediate payment.

This, I presume, cannot be regarded in any other light than as a legitimate settlement of a *bonâ fide* claim, and that no "serpentine arts" were called for or used by me to achieve my purpose. The fact of my presenting the General and his son each with a sword can scarcely be construed into a wish to propitiate the Liberator and Dictator into payment of a claim that had previously been acknowledged to be just by his agents, who were empowered by him to enter into contracts on his behalf, the draft itself being drawn by one of his old and trustworthy friends. As to the non-payment of the order on the treasury, I am still in ignorance of the cause of its dishonour, as Colonel Peard, who commands the brigade, has since stated to me he never had a doubt of the correctness of my account, and I can only ascribe it to the officious meddling of certain parties who are alluded to in your article. Two months have elapsed, and my claim though passed by the commission appointed to examine it in Naples, still remains unpaid. It has certainly been my misfortune to be involved innocently in the squabbles between Leverson, Sarsfield, & Co., squabbles in which big words have been bandied, pistols and swords spoken of as trifles, though I am happy to state no great damage has been done on either side, with the exception of a dislocated thumb in a tussle, a black eye received in the ante-room of an hotel, and an old man beaten over the head with a hunting crop. At none of these fisty-cuffs was I present, neither did I take part in the gentlemanly recriminations of the belligerent parties concerned, as plain Mr. Isaac of the firm of Isaac, Campbell, & Co.

I have never been insultingly addressed by any of the gentlemen mentioned in your article, consequently it never occurred to me that it was necessary to assume the martial character of Captain Isaac of the Northampton Volunteer Rifles, and wage battles in defence of outraged dignity.—I am, &c., S. Isaac, of S. Isaac, Campbell, & Co.

THE FORTIFICATIONS OF ANTWERP.*

A bill was passed in the Belgian Chambers on the 8th September, 1859, for forming a new enceinte for Antwerp, the works to be terminated by the 1st January, 1864. The ground inclosed by the new enceinte will be nearly five times greater in extent than the actual city of Antwerp. It will comprise all the territory *intra et extra muros* of Antwerp, the maritime works of the Kattendyck, the faubourgs, a portion of the Commune of Austruweel, a portion of that of Merxem, the Commune of Borgerhout, and nearly the whole of that of Berchem. There will be fifteen gates. It would be needless to dwell upon the strategical importance of those great works, which will render Antwerp, after Paris, the largest fortified city in Europe. In a political point of view they are still more important. In case of an invasion of Belgium, the new enceinte is capable of containing the whole army, and the Scheldt is navigable up to the gates of the city. An Anglo-Belgian alliance would not be an unimportant feature in a European war.

The new fortifications of Antwerp are divided into two parts, perfectly distinct; the enceinte of the city, and the forts of the intrenched camp. The enceinte comprises an extent equal to six times that of the actual city; it is limited on the north side by a vast citadel, which occupies all the ground between the village of Austruweel and the battery of Kattendyck at the curve of the Scheldt. Starting from that citadel it takes the direction of the village of Merxem, which it runs alongside of, as also of the village of Deurne; it takes in the faubourgs of Borgerhout and of Berchem; it then runs alongside of forts 6 and 7, now standing to join the old citadel on the south. In front of this enceinte, and between the inundations north and south, lies the entrenched camp. It is covered by a line of eight detached forts of large dimensions; the development of this line is about 15 kilometres.* The great difficulty the government had to contend against was the amount of expropriation indemnity, estimated at ten millions of francs, and over an extent of ground of about six hundred hectares.† This is now all but settled; nine millions have been paid up, and the remainder will shortly be decided by arbitration.

The works are actually carried on with great activity, and the great citadel or fortress of Austruweel on the north, is advancing rapidly towards completion.

This citadel forms a vast polygon, the principal rampart of which has a development of more than two thousand metres.‡ The rampart is defended by a moat more than one hundred metres in width, and preceded by a covered road and an advanced moat nearly forty metres in width. When it is considered that in addition to the means of defence the citadel can be covered by a powerful inundation, it may be looked upon as perfectly impregnable. The *terrassements* of this important work are already far advanced; the covered road and advanced moat are almost finished, the chief rampart has been commenced, and the pilings (*pilotis*) and *grillages* of one of the casemated *caponnières* which command the moats have been placed; the sluices will be commenced in the spring; the counter-dykes which have been ready some time, will be then in a perfect state of defence. A steam-pump of great power has been put up to carry off the water; it sends forth quite a rivulet. The construction of this north fortress is under the directions of Captain Dekeuwer of the Engineers. On the next portion of the enceinte, lots 3 and 4, under the direction of Major Carette and Captain Duwelz of the Engineers, eighteen hundred men (soldiers) are employed; they comprise four fronts of fortifications, measuring each 1000 metres in development; three of these fronts will be coated with masonry externally. That portion of the enceinte which connects it with the south citadel under the direction of Captain Rousseau of the Engineers, is completely finished to and extent of 600 metres, and from the height of its reliefs an extent of its moats, some idea may be formed of the magnificent character which the ensemble of the defences of Antwerp will present.

The detached forts commence at Vieux-Dieu. This place is reached in a few minutes by train from Antwerp. All the forts are constructed on the same system, except the slight difference caused by the conformation of the ground they may be said to be identical. Each fort occupies an area of about 35 hectares; the area of the citadel of Austruweel measures 134 hectares, nearly as much as the town of Termonde. Each fort consists of five fronts coated with masonry, three of which sweep all the approaches to the interior of the position of the camp. The three first are in a straight line, and their moats filled with water will be defended by a powerful casemated artillery; the two others are in broken line, and in the salient angle which they form at the gorge at the fort, there will be a vast lodgment of masonry work destined to house the troops, and for the instalment of magazines. This building, from its elevation, will command the interior of the fort and the country around; it will allow of the defence being prolonged to the last extremity.

Seven forts are actually under construction; four of them are being built by Pauwels & Company, three by the troops, and the eighth fort will also shortly be commenced. At Fort No. 1, at Wyneghem, all the glacis are finished, and the main body is getting on actively. This fort is constructed under the superintendence of Captain Crets. Fort No. 2, situated to the right of the preceding one, is constructed by 900 men (soldiers), under the direction of Captain Langhans; the glacis is finished, and so is a portion of the principal rampart. Fort No. 3, constructed by contract, was commenced last March, and is consequently much more advanced. The masonry work of this fort shows a great development; all the foundations of the great casemated caponnière, which defends the chief moat, are completed, and the walls of the chief front are rising rapidly. In a very short time this fort will be ready to afford a stout resistance; it is constructed under the orders of Capt. Gratry.

Fort No. 4 touches upon the station at Vieux-Dieu. It can be seen from the railway. It is constructed by soldiers, under the direction of Captain Cocheteux. It is about as far advanced a fort No. 2. Forts 5 and 6, intrusted to Messrs. Pauwels & Co. are less advanced. Fort No. 7 was commenced only last month by the troops. Eighteen hundred men are actually working upon it, under the direction of Captain Mockel. Forts 1, 2, 3, and 4 are connected with each other by a railway established by the company for the conveyance of the immense amount of *matériel* required for the construction. It will be continued to fort No. 8, and then the works will be carried on on all points with the greatest activity.

The general direction of the works of the enceinte is intrusted to Colonel Poswick, of the Engineers; and that of the eight forts to Lieutenant-Colonel Chaucet, also of the Engineers. The health of the men employed at the works is most excellent.

The troops working at the enceinte are lodged in the barracks belonging to the small forts of the retrenched camp of 1853, and the troops engaged upon forts 2, 4, and 8, are lodged in excellent huts covered with thatch. Each hut contains fifty beds placed in two rows divided by a passage about one metre in width. The planks and roofs are hermetically closed; the beds, provided with mattresses, are raised upon a boarding of from 30 to 40 centimetres.* The whole arrangements of the interior are perfect. There is even all the necessary apparatus in case of fire. The food of the men is also ample. Each man receives 45 centimes per day's labour, of this sum 25 centimes go to the general mess, 10 to the clothing department, and the remaining 17 centimes remain as pocket-money. The men are cheerful and hearty. As yet no act of insubordination has taken place, and the men employed seem to take an interest in the work they have in hand. This is so much the case that they would look upon it as the severest punishment to be sent back to their corps.

THE CHINA MAIL.

Fall of Pekin. Barbarous Treatment of the English Prisoners.

We have received files of papers from India, China, and Australia, in anticipation of the Overland Mail.

The mail has brought the most exciting news that has ever reached these shores from China. Pekin has fallen, without a blow having been struck in its defence, and the allied flags now wave from the walls of the imperial capital.

The following are detailed accounts of these most stirring and important events, extracted from the *China Mail*, the *North China Herald*, and from the letters of correspondents at the seat of war:

(From the *China Mail.*)

The intelligence from the seat of war is of the highest importance. Two of the gates of Pekin are in our hands. Mr. Harry Parkes and Mr. Loch have been safely returned to us by the Chinese. The army of San-ko-lin-tsin is still in the field. The Emperor has fled to Tartary. Pekin has submitted to us. The wintering of the whole force either there or at Tien-tsin is now resolved on.

In our last Overland we mentioned that the allied army was in a hostile attitude, seven or eight miles from Pekin, waiting for the siege guns, and demanding the release of the captives who had been taken. There does not seem to have been any change in the position of matters from the 22nd of September till the 3rd of October, when an advance was made in search of the Tartar army, which only resulted in a few pickets of the enemy being seen and driven back. On the 6th a further advance resulted in an earthwork near Pekin, where no defence was made, being taken by our troops; and the Yueng-min-yuen, or summer palace of the Emperor, was taken, and completely looted, affording immense spoil. The chief share of the plunder appears to have fallen to the French, who had the first ransacking of the rich ornaments, jewels, and clocks and watches, the rich robes and embroidered silks of the Son of Heaven; but a quantity of the treasure which was taken is to be divided between both French and English. Some privates are said to have sold their shares for about 30,000 francs. The entire British share, including both treasure and private loot, is estimated at about 90,000 dollars. Next day, in reply to a demand for the release of the prisoners, Messrs. Parkes and Loch were given up, together with a French officer and seven or eight prisoners.

On the 12th everything was prepared for the first great event of the war—the assault or the occupation of Pekin, the unviolated capital of China. The siege guns and other artillery were in a position to bombard the town, unless it should be surrendered by noon of the 13th; and the following General Order was issued by Sir Hope Grant, for the disposition and control of the forces under his command:—

Head-quarters before Pekin, Oct. 12, 1860.

General Order.

"One regiment to be detailed by the first division will proceed to the Temple of Earth this afternoon, and be there quartered.

"The Deputy-Quartermaster-General will make the necessary arrangement.

"All the live cattle belonging to the commissariat will be driven to the same place to-morrow morning early, and kept there till further orders.

"The whole of the troops will be furnished to-morrow with two days' rations, cooked, and be held in readiness to turn out at a moment's notice.

"The Cavalry Brigade will detail 1 squadron to patrol in the neighbourhood of the camp to-morrow: they will move off at 9 a.m., and act according to instructions, which they will receive later in the day.

"The whole of the artillery will be placed at the disposal of Brigadier-General Crofton until further orders.

"In the event of an attack upon Pekin being ordered, the following directions will be observed:

"As soon as the officer commanding Royal Engineers reports that a practicable breach has been effected in the city walls, it will be stormed by the 2nd Division. Major-General Sir R. Napier, K.C.B., will be pleased to make the necessary dispositions. As soon as the wall has been gained the storming party will turn to the right, keeping along the ramparts, and seize the An-ting gate; this post being gained, the Engineers and Sappers, who should follow the supporting column, will proceed at once to open the gate below.

"This post will then be placed in a state of defence with the least possible delay, and be held by a garrison of such strength as may be necessary.

"His Excellency most positively forbids any officer or soldier under any pretext whatever to quit the gate or ramparts or enter any street or house without his express permission conveyed through the Deputy-Adjutant-General or that of the Major-General commanding the division, and he cannot too strongly impress upon the troops the necessity of their restraining from straggling and of keeping in as compact order as possible, not only for their own individual safety, but for the more complete efficiency of the whole force.

"His Excellency takes this opportunity of expressing to t soldiers the satisfaction he felt at their conduct on a late occasion, when a large amount of plunder was at the mercy of

* As visited in October, 1860.

* One kilometre = 1093·6389 yards.
† One hectare = 2 acres, 1 rood, 35 perches.
‡ One metre = 1·093633 yard.

* The centimetre is equal to 0·39371 inch.

Digitized by Google

the troops. No crime has been brought to His Excellency's notice, and the discipline of the army remains intact.

"His Excellency has ordered all property collected by officers on this occasion to be sold for the just benefit of all ranks, and he wishes them to bear in mind that he has taken upon himself a serious responsibility in appropriating to their benefit the treasure which was found in the Emperor's palace, and which by right belongs to the Crown.

"The troops are now about to occupy the Imperial city of Pekin, where they will be exposed to many and more serious temptations, and His Excellency trusts that the boon just conferred upon them will act as an additional inducement to them to preserve their uniform good conduct, and prove to them that they best consult their own interest in maintaining it.—By order, "(Signed) F. STEPHENSON,

"Deputy-Adjutant-General."

Just immediately before the period given for surrender would expire, Hang-chun came out and said that our demands were acceded to, no resistance would be made, and the gate was at our disposal. Thereon the outer and inner gates were immediately taken possession of; and a portion of the allied force was quartered on the wall of Pekin.

The Earl of Elgin and Baron Gros are at the military headquarters; but as Mr. Bruce has been sent for, it is possible that his lordship does not propose to spend the winter in the north. Mr. Bruce, however, was sent for before, after the occupation of Tien-tsin. Count Ignatief, the Russian minister, followed the allies to Tien-tsin, where we believe he is still. Mr. Ward, the American minister, came down here, the other day, on his way home.

There have been rumours published at Shanghae of the outbreak of a new rebellion—no way connected with that of the Tai-pings—in the province of Shen-si, which lies to the west of that where Pekin is. This, if true, would be of great importance, as placing the Emperor in a worse position than ever. Of the Tai-ping rebels we hear little at present, they are reported to have appeared before Hanchow lately, but to have moved off on finding it well garrisoned.

From Ningpo we learn that the insurgent movement in the neighbourhood of Shanghae has considerably increased the tea and silk trade at the former port. Should the approaches to Shanghae be blocked up by the same cause for any length of time, that may possibly be the means of diverting a considerable amount of the trade of that port to Ningpo, particularly as both the tea and silk districts are nearer to Ningpo than to Shanghae, and there is an easier internal communication with the former.

At Swatow a local difficulty is causing trouble. The gun-boat Weasel proceeded to bombard a village, alleged to be connected with some acts of robbery committed on the property of foreigners resident at Swatow. After the firing had been kept up for about two hours, the master of the gun-boat landed, to see how matters were getting on, and fell into the hands of the enraged villagers. These latter treated the captives well, but declared that if any further proceedings were taken they would put them to death. Lao, the Governor-General of Kwangtung, has been appealed to in their favour, and has sent up a proclamation requiring their release.

Dr. Winchester, the acting consul, goes home, and his place is now filled by Mr. Robertson, the Canton consul.

In Hong Kong the great event of the fortnight has been the visit of the Japanese ambassadors, in the magnificent steam-vessel Niagara. They and their suite have availed themselves of their stay at Hong Kong to make minute inquiries into various institutions of the place.

(From the *Overland Register*, Oct. 29.)

It is distressing to have to note that Captain Anderson and Mr. de Normann died from the effects of the brutal treatment they received at the hands of their Tartar captors. Nine sowars of the Sikh cavalry were released, and reached the camp on the evening of the 12th.

At the latest dates several of the prisoners were still in the hands of the enemy. Among those unaccounted for are Captain Brabazon and Mr. Bowlby, the *Times* special correspondent. A sergeant of the Sikh cavalry has deposed to the fact that all the prisoners were most inhumanly used, having their wrists bound with cords, an insufficient quantity of food supplied them, and otherwise barbarously tortured.

Lord Elgin has now entered upon the more legitimate duties of his office. Mr. Bruce has been summoned to attend him at Pekin. In Chinese treachery he has a more formidable obstacle to contend with than Tartar troops.

It is said to be the intention of the Commander-in-Chief to withdraw from Pekin, and make Tien-tsin his winter quarters. Lady Grant has left this to join him.

England is said to enter into all her wars unprepared, but the Chinese Expedition presents a laudable exception to this general rule; for, from the incipient to the ultimate step, so far, all the arrangements connected therewith are worthy of the highest praise. The Commissariat, even in its most trifling details, is unexceptionable, and as a consequence, the general health of the troops has all along been excellent. It remains to be seen, however, how the Indian soldier will stand the rigours of a northern winter, which does not offer a pleasant perspective even to the hardy sons of Britain. It is to be hoped that the chiefs of the Commissariat will show as much judgment in catering for the comfort of their charge during the winter as they have done for the summer campain. Big coats and blankets, warm stockings and flannel shirts, in addition to a well-filled stomach, are great assistants to the efficiency of an army. Doctors and gallipots are, at best, but necessary evils.

It is worthy of note, and highly creditable to the masters of the merchant shipping employed as transports—British, American, and others—that in the navigation of these, to many of them, unknown waters, no casualty, worthy of mention, has occurred.

A letter from the camp says that Messrs. Parkes and Loch were, whilst with San-ko-lin-tsin's army, treated in a most cruel manner; forced to kneel before every mandarin, however petty, their faces rubbed in the dust; they were bound with their hands behind them and carried on horses to Tung-Chow, and thence in the same state in one of the carts of the country to Pekin, when they were placed in dungeons, and remained so for some time. Mr. Parkes was beaten when he did not instantly reply to a question, and Mr. Loch because he could not speak Chinese.

THE NAVY.

ADMIRALTY, DECEMBER 12.

APPOINTMENTS.

Commanders—Henry F. M'Killop to the Bulldog; John W. Webb and George E. K. Gore to the Ajax, both additional, for service in the Coastguard; Henry B. Beresford to the Edinburgh, additional, for service in the Coastguard.

Surgeons—Maurice T. West to the Fisgard; John Forbes (D) to the Jason; George B. Hill to the Osborne.

Paymaster—C. Turmine to the Scourge.

Assistant-Surgeons—John S. Lewis, M.D. (acting) and George Clark (acting), additional, to the Victory; George Monteath, M.D. (acting) to the Immortalité; W. H. O'Toole (acting) and James F. Parr (acting), additional, to the Impregnable.

Second Master—Michael Stewart Guy to the Impregnable, as supernumerary.

Naval Cadets—A. M. Bowles, Arthur Basil Brooke, Augustus M. R. Hamilton, T. B. Howard, Vesey Knox, John Milligan Laws, C. G. Michaelson, F. E. Marsland, John Charles Paget, John W. Ramsay, Charles B. K. Smith, W. J. Talbot, Carleton Tuffnell, Alfred Vautier, the Hon. Ernest Willoughby, H. R. H. Wood, Francis W. O. Grant, and W. M'K. A. Cotton.

PROMOTIONS.

First-Class Assistant-Engineers—Simon Matthews of the Magicienne, William Dark of the Bullfinch, John Marwood of the Hero, John A. Lodge of the Terrible, William H. Jenkins (acting) of the Buzzard, and Edward Lewis (acting) of the Plumper.

Second-Class Assistant-Engineer—Andrew Cornish of the Miranda.

APPOINTMENTS.

Third-Class Assistant-Engineers—Thomas Stewart (acting) to the Cumberland, as supernumerary; George Hurst (acting), Robert B. Nicholson (acting), and William Hawksley (acting) to the Asia, as supernumeraries.

ADMIRALTY, DECEMBER 13.

Lieutenant—George Worsfold, additional, to the Desperate.

Surgeon—James Harvey to the Mars.

Second Master—John H. Tully, additional, to the Cumberland for the Griffin.

Naval Cadets—Charles Lucius Cary, Palmer Smythie, Cecil E. Yates.

Clerk—William Nottridge to the Jason.

Chief Engineers—Archibald Bain to the Asia, for service in the Duke of Wellington; Thomas J. Murray to the Indus, for the Gibraltar; James Ryley to the Cumberland, for the Rodney; William Dennison, of the Magæra, promoted; Robert Moore to the Cumberland, for the Newcastle; William Hall to the Asia, for the Tribune, promoted.

COASTGUARD OFFICE, DECEMBER 13.

APPOINTMENTS.

Inspecting Commanders—Geo. E. K. Gore to Ballycastle, Antrim, vice Kane; Henry B. Beresford to Montrose, vice Fletcher; John W. Webb to Clifden, vice M'Killop.

REMOVAL.

Chief Officer—Geo. F. Charles, Master, from Casemates to Dungeness, as Inspecting Chief Officer, vice Hippesley.

Alecto, 3 paddlewheel steam-sloop, Commander Henry J. Raby, V.C., sailed from Lagos for the Nun River on the 10th of November.

Algiers, 91, Captain O'Callaghan, Channel squadron, having had a thorough refit, has retaken up her berth at Spithead.

Amethyst, 26, sailing-frigate, Captain Sidney Grenfell, has been inspected by Vice-Admiral W. Hope Johnstone, at Sheerness. The officers and crew were mustered and exercised at general and fire quarters, and the books and logs were carefully examined. The admiral called the crew aft, and expressed his highest approbation of their discipline, saying that he had not inspected such a ship's company since his appointment; that the exercise in all respects was very good, and he should make a very favourable and special report to the Admiralty regarding them. The Amethyst has been more than four years and a half in commission, and took an active part in the former Chinese war, the battle of Fatshan, and the blockade of Canton, since which she has been engaged in important operations on the coast of Mexico. She returns, having circumnavigated the globe, and brings back a large proportion of those who sailed in her. As the admiral was leaving the ship, the petty officers came on the quarter-deck, and respectfully requested that he would kindly petition the Admiralty to extend their leave of absence to eight weeks instead of six (as is customary), in consequence of their lengthened commission and varied services. The admiral received the request in a courteous manner. It is to be hoped that the exigencies of the Service will admit of this request, respectfully submitted by a well-conducted and valuable ship's company, being acceded to. We have in the case of the Amethyst a proof that good officers make good men. We have here no complaints of the crew being composed of "long-shore men," "grass-combers," &c., &c. Captain Grenfell sailed in the month of September, 1856, with the usual run of men to be picked up by a newly commissioned ship, and brings them home after going round the world in a state that called forth the high commendation of the Inspecting Admiral. We can only give one opinion on this subject, and that is, we are convinced if we had more Grenfells in the Service, we should have more Amethysts, and fewer Princess Royals. We contend, and have always contended, that the Admiralty are more responsible than is generally supposed to be the case, for the internal economy of our men-of-war. They know, or certainly should know, the character and disposition of a man selected by them to have almost absolute sway over some hundreds of men (upwards of 1100 occasionally), and they should be as much guided in fixing upon an officer for employment by his moral attributes as by his mere professional attainments, or probably more so, for we have had repeated instances of ships returning home when commanded by captains having great reputations for smartness in anything but a desirable condition. The position of a gentleman in command of a British man-of-war is a proud one, and, in many respects, an enviable one. The responsibility should be proportionate.

Barracouta, 6, paddlewheel steam-sloop, Commander Wood, lately arrived with invalids from the West India station, now lies alongside the Victorious hulk in Portsmouth harbour, and is stripping and preparing to enter No. 8 dock for a thorough overhaul, as soon as the repairs of the Bulldog are sufficiently advanced.

Camperdown, old sailing three-decker is rapidly progressing in her conversion into a large coal depot for the harbour. She has received her first coat of black paint.

Charybdis, 21, screw steam-corvette, Captain the Hon. George D. Keane, left Plymouth on Wednesday for Bombay.

Cockatrice, screw gun-boat, 60 horse-power, having been completed and rigged ready for service, steamed down the river from Woolwich to Greenhithe, before leaving for Portsmouth, where she is ordered to be placed in the steam reserve.

Coquette, 4, screw steam-sloop, Portsmouth, was accidentally described last week as a heavy frigate. She is a heavily armed sloop of 670 tons, and of 200 horse-power, and, when thoroughly repaired, and her machinery fitted, will be a serviceable vessel. She will not, however, be out of the hands of the dockyard authorities till the end of January or beginning of February.

Cossack, 20, screw steam-corvette, Captain Richard Moorman, was at Antigua on the 28th of November. The orders for the return to England of this corvette having been sent out some weeks since, she should be looked for very shortly.

Cygnet, 5, screw gun-vessel, 80 horse-power, went out of Portsmouth harbour on Wednesday for trial at the measured mile in Stokes Bay. The Cygnet is looked upon as a very fast and beautiful model of a useful class of vessels.

Diadem, 32, screw steam-frigate, Captain Cockburn, Channel squadron, after a thorough repair in the dock, Portsmouth, has rejoined the squadron at Spithead. She is short of hands and petty officers.

Edgar, 91, screw liner, Captain E. Katon (flag of Rear-Admiral John E. Erskine), went out of Portsmouth harbour on Wednesday, and anchored at Spithead.

Espoir, 1, screw steam gun-vessel, Commander Sholto Douglas, arrived at Sierra Leone on the 21st of November, having in tow a splendid clipper slave brig, which she had captured in latitude 7° 10′ north, and longitude 12° 46′ west. She was fitted for carrying 500 slaves but had none on board. The captain and supercargo were on shore with a considerable sum of money with the view of purchasing her human cargo. The slave-decks were laid, and the usual irons were found. Large coppers were fitted for cooking rice, and she had nothing else on board beyond the ordinary slave requirements. When taken, she had no colours or papers. The Espoir has made a fortunate commencement, as she only sailed from England for the coast, the latter end of last September. The crew had been sickly, but no casualties had taken place.

Euryalus, 51, screw steam-frigate. Large bodies of artizans are making rapid progress with the poop now fitting on this splendid frigate for the flag of Sir Baldwin Walker, K.C.B. She was placed under the shears on the 13th inst., and her masts hoisted out; on inspection the trussle-trees and cheeks were found wrung by the heavy weight of the top-masts, and it is not improbable that new masts will have to be supplied.

Firebrand, 6, paddle steam-sloop, Commander J. M. Bruce, sailed from Spithead on Saturday morning last by the Needles passage, for the West Indies, where she will be placed under the command of Rear-Admiral Sir Alexander Milne, K.C.B., the Commander-in-Chief on the North American and West India station, and not under that of the Admiral on the South American station, as stated last week.

Geyser, 6, paddlewheel steam-sloop, Commander George M. Jackson, from Portsmouth, arrived in Plymouth Sound on Monday. She has gone into Hamoaze to have her defects made good.

Gladiator, 6, paddlewheel steam-sloop, Commander Henry D. Hickley, had, by advices received from Jamaica up to the 24th of November, gone north in consequence of sickness on board.

Hannibal, 91, screw liner, flag-ship of Rear-Admiral Mundy, Captain Arthur Farquhar, anchored off Naples on the 4th instant, having run over from Castelamare. Admiral Mundy was convalescent.

Harrier, 17, screw steam-sloop, Commander Sir M. McGregor, steamed out of Portsmouth harbour on Wednesday, and proceeded to the measured mile in Stokes Bay to test her speed at the measured mile. The ship drew 15 feet 10 inches forward, and 13 feet 8 inches aft. Revolutions of engines—maximum, 97; mean, 94; common screw, with the leading corners cut off, with a diameter of 10 feet, and a pitch of 11 feet. The mean of four runs gave the ship a speed in knots of 7·629. The Harrier is only of 100 horse-power nominal. The Harrier has a crew of 170, and will proceed as soon as she is ready for sea to the Australian station.

Hero, 91, screw liner, Captain George Henry Seymour, C. B., was taken into the basin at Keyham on Wednesday. Her crew were paid wages on Monday last.

Hydra, 6, paddlewheel steam-sloop, Commander R. V. Hamilton. Accounts from this sloop have been received down to the 27th of November. She was at that time at Halifax. The crew had all been landed, and the vessel thoroughly fumigated. There had been no fresh cases of fever, but the commander, the paymaster, and several other officers and men, had been compelled to go into hospital for medical treatment from other causes. The accounts vary as to the probable destination of the Hydra. Some send her to Bermuda, while others dispatch her to England. We are inclined to think that the last are the most correct, as in an extract taken from a letter, she is described as "old and rotten." During her last commission at the Cape of Good Hope, she was then stated as being both, and time certainly would not be likely to improve her.

Himalaya, 6, screw steam-transport, Captain John Seccombe, is ordered to be fitted with new cylinders at Keyham Yard. The cylinders now on board have been in a very defective state the whole period of the ship's commission, but nevertheless the ship has gone over upwards of 80,000

Digitized by Google

miles with them since Captain Seccombe has commanded her. The Himalaya has been in commission since the month of March, 1847, and has done her work to the satisfaction of not only the naval and military authorities, but to that of those whose duty it has been to embark as passengers. In the present reduced number of steam transports at the disposal of Government, it is to be hoped that all dispatch will be used in order to get the Himalaya once more ready for sea.

Icarus, 11, screw steam-sloop, Commander Nowell Salmon, V. C., had by the last accounts from Jamaica, proceeded to the northward, owing to the sickly state of the crew.

Imaum, 72, receiving-ship at Port Royal, Commodore Hugh Dunlop, Captain Samuel Morrish, and her tender, the Kingston schooner, were the only men-of-war at Port Royal on the 24th of November.

Immortalité, 51, screw steam-frigate, Captain John Hancock, is still lying alongside the Bellerophon hulk in Portsmouth harbour, fitting for sea. There is apparently no hurry about her progress, and she is still shorthanded, but may probably pick up some smart hands from the Retribution.

Industry, 2, iron screw steam store-ship, Master-Commander G. J. Hodges, reached Sierra Leone on the 20th of November with troops from the wreck of Her Majesty's ship Perseverance.

Isis, 44, old sailing frigate, is to be fitted at Chatham for a coal depot, and will be dispatched to the coast of Africa.

Jason, 21, screw steam-corvette, Captain von Donnop, fitting out at Devonport, will, when ready, proceed to the Australian station, which is becoming very weak by the Iris and Niger being ordered home.

Lynx, 1, screw gun-vessel, Lieut.-Commander Henry Berkeley, from Sierra Leone the 24th of October, and Fayal the 30th of November, arrived in Plymouth Sound on Monday morning. She has experienced very heavy weather on the whole passage, and since leaving Fayal has had a succession of strong westerly gales; during the last seven days her sails have been blown away and boats stove in. The Lynx spoke, October the 30th, lat. 9° 44′ N., long. 17° 27′ W., the brigantine Menta, from London for Sierra Leone, with Government stores; November the 26th, lat. 35° 43′ N., long. 23° 22′ W., the Dutch brig Christiana Lewis, from Batavia for Amsterdam, 92 days out. She left at Fayal the Scotch brig Reaper, of Dundee, homeward bound, 93 days from Benin, in distress; the captain, steward, and one seaman, having died at sea from scurvy; the rest of the crew, with the exception of two seamen, were unable to do duty, being affected with the same disorder. The Lynx was commissioned on the 20th of November, 1857, and has been engaged principally in Dr. Livingstone's expedition. During her commission she has lost eleven seamen and three officers—viz., Mr. George Walker, Assistant-Paymaster, of dysentery, at Sierra Leone, in March, 1858; Mr. Jones, Assistant-Engineer, at Mauritius, in June, 1859; and Mr. Miller, Assistant-Engineer, on the passage home. She is in a very leaky condition, and makes a foot of water every hour; and her boilers are in very bad condition. She has gone up Hamoaze to strip, preparatory to being paid off.

Meteor, 14, steam-floating-battery. The further progress in the stripping off the iron plates and inner and outer planking of this battery, in No. 2 dock at Portsmouth, fully confirms the statements which have already appeared as to her rotten and defective state.

Megæra, 6, iron screw troop-ship, Commander Samuel S. Henderson, arrived at Spithead on Monday morning, and shortly afterwards went into Portsmouth Harbour. She brings home Captain Thomas, 1st battalion 2nd Regiment; Lieutenant Phillipps, 1st battalion 2nd Regiment; Lieutenant Thompson, 1st battalion 9th Regiment; Lieutenant Crawford, Royal Engineers; Assistant-Surgeon M'Nice, 2nd battalion 3rd Regiment; Lieutenant Wheatley, Royal Engineers; Lieutenant Peechy, Assistant-Surgeon Gossett, Captain Lloyd, Captain Keene, Miss Trevor, Mrs. Lloyd and three children, Mrs. Swann, Lieutenant S. L. Sulivan, R.N., Mr. Henwood, master, R.N., Rev. W. C. P. Baylee, Captain Conolly, Royal Marines; Captain Hewett, Royal Marine Artillery; Mr. Renshaw, mate, R.N., Mr. Swain, paymaster, R.N., Mr. Boxer, Mr. Hathorn; 172 naval invalids; 23 military invalids, &c. She left Malta on the 27th of November, arrived at Gibraltar, December 3, and sailed the 4th instant. Wind principally from the N.W., blowing strong. One soldier died on the passage. On Sunday passed a vessel showing No. 2915, third distinguishing pendant. Many of the naval invalids are very bad cases, and were obliged to be taken to the Royal Hospital in their cots. The whole have received the most kind and untiring attention from the ship's surgeon, Mr. Francis H. Blaxall. Having landed her invalids from the Mediterranean, she is waiting alongside the jetty at Portsmouth Dockyard to enter the dock for repairs. Her boilers want looking up, but the repairs required generally are of a very minor character.

Miranda, 15, screw steam-sloop, Commander Carr Glyn, left Devonport on Monday for Australia and New Zealand.

Monkey, steam-vessel, Second Master Syndercombe, left Woolwich on Monday, for service at Sheerness.

Narcissus, 51, screw, at Devonport, got up her maintopmast on Monday, and as much progress is making in her fitment as the boisterous state of the weather will permit.

Osborne, 2, paddlewheel steam-yacht, Master-Commander George H. K. Bower, arrived at Portsmouth on Thursday afternoon from Madeira, last from Lisbon.

Queen, 86, screw liner, Captain Charles F. Hillyar, returned to Naples on the 6th instant from Genoa, to which city she had conveyed the Hon. Mr. Elliot and family.

Racer, 11, screw steam-sloop, Commander Algernon McLyons, arrived at Aspinwall, on the 20th of November, from San Juan del Norte.

Retribution, 28, paddle steam-frigate, Commodore Harry E. Edgell, C.B., arrived at Spithead on Sunday last, shortly before sunset, from the East Indies. She sailed from Trincomalee on the 15th of September, arrived at the Cape of Good Hope on the 23rd of October, took in a few military and naval invalids, and sailed again on the 27th; put into Teneriffe, burning the last of her coals, on the 28th of November; and, after taking in coals, water, and provisions, sailed thence for England on the 30th of November. In crossing the Bay of Biscay she encountered a heavy gale of wind from W.N.W. The ship and her machinery are in a very disabled state, and at one part of her voyage it was doubtful whether she would not break down. She has gone into Portsmouth harbour to strip and pay off. The Retribution was commissioned as far back as August, 1856, and has been actively engaged both in China and the East Indies. She will be paid off to-day on the new principle, as was the Euryalus lately, and her continuous service men granted a seven weeks' run.

Rhadamanthus, 4, paddlewheel steam store-ship, Master-Commander F. W. Sturdee, has left Woolwich.
with a cargo of plates for the iron-clad steam-ship Black Prince, building by Napier at Glasgow.

Rinaldo, 17, screw steam-sloop, has been brought down the harbour into the great basin of Portsmouth dockyard, and is to have her masts stepped and made ready for the steam reserve. It is expected that she will be brought forward for commission.

Royal William, 90, screw-liner, recently converted at Devonport, went outside on a trial trip on Tuesday, returning to the harbour in the afternoon.

Skipjack, 2, screw gunboat, Lieut.-Commander John Murray, was at St. Thomas's on the 29th of November.

Star, 4, screw steam-sloop, 200-horse-power, building by Messrs. C. J. Mare & Co. at Millwall, will be launched this day.

St. Jean D'Acre, 101, screw steam-ship, Captain Hon. C. G. Elliot, had not arrived at Gibraltar on the 4th inst. Reports have been spread that she was expected to arrive in England; but we are in a position to say that her orders from Malta were to go to the Rock and lie there for three weeks, when, if the pulmonary disease did not abate she was to proceed home. She is probably making a long voyage in order to try the benefit of sea air.

Trafalgar, 90, screw steam-ship, Captain Fanshawe, has left the jetty Portsmouth dockyard to give place to the Retribution, and resumed her position, after a thorough refit, in the Channel squadron at Spithead.

Victor Emmanuel, 91, screw liner, Captain W. J. C. Clifford, C.B. Letters from this ship, lying in Malta harbour, represent her hull to require extensive repairs; the majority of her seams being very much warped and open. Her expansive valves have proved to be useless from the weakness of their original construction. Their principle is stated to be good, but they have failed, as have those of other ships on the station from the cause already stated. New valves were about to be cast having bearings at each end, three-quarters of an inch in diameter and four inches long, to revolve in leashes let in at each end of the chest, and which would take the pressure off the spindles on to the valves themselves. In every other respect the engines, which are from the manufactory of Maudslay, Field, & Sons, gave the greatest satisfaction, and are described as "working splendidly."

Victoria and Albert, 2, royal paddlewheel steam-yacht, Captain the Hon. Joseph Denman, has returned to her moorings in Portsmouth harbour. The performances of the yacht during her late trip to Madeira were highly satisfactory. She has proved herself equal to the encountering of the heaviest weather, for it is admitted that the gale she successfully contended against in the Bay of Biscay was worthy of the locality. In addition to some handsome presents made by the Empress of Austria to the Captain and principal officers, Her Majesty left 500*l.* to be divided amongst the rest of the crew.

A court-martial assembled on Tuesday on board Her Majesty's ship Victory, in Portsmouth harbour, for the trial of a private of the Royal Marines, serving on board Her Majesty's ship Excellent, on a charge of having on the 6th instant struck Sergeant Brampton twice, on the quarter-deck of Her Majesty's ship Excellent while in the execution of his duty. The charges were found proved, and the prisoner adjudged to receive 48 lashes, and to be afterwards imprisoned for two years in Winchester gaol, with hard labour.

Some experimental practice with the 40-pound Armstrong gun took place on Monday, on board Her Majesty's ship Excellent, for the purpose of testing a new description of carriage for naval service. The carriage is similar in its chief points of construction to the old 24-pounder depressing carriage used at the siege of Gibraltar. Some further experiments will take place from the Illustrious, which will move her position in Portsmouth harbour temporarily for that purpose.

The Royal Naval Reserve.—An interesting occurrence connected with the Royal Naval Reserve scheme took place at Seaham harbour yesterday week. The success of the scheme in that place has been of the most cheering and satisfactory kind, and holds out to other ports in the United Kingdom an example that they would do well to follow. Upwards of 100 men have enrolled themselves as volunteers, these men being all able seamen; and when the size of the place and the number of seamen existing in the port are taken into consideration, Seaham, it appears, has contributed more than three times the number of Naval Volunteers than any other port in the kingdom. It was determined, therefore, by some of the more influential inhabitants of the place, to show their appreciation of the conduct of these men by giving them a substantial treat in the shape of a supper. Lieutenant Vicary, R.N., the commander of Her Majesty's ship Ruby, now stationed at Seaham, and Mr. Henry, the shipping-master, interested themselves in the matter, and the result was that on the day in question a substantial supper, with a plentiful supply of grog, was given to them in the large hall of the Literary Institute, kindly lent for the occasion by Lady Londonderry, who also contributed liberally to the treat.

Vice-Admiral Sir Houston Stewart, K.C.B., commander-in-chief at Plymouth, struck his flag at sunset on Friday week, and left for London on leave. The command of the port devolves on Rear-Admiral Sir Thomas Pasley, Bart., in the absence of the chief. Sir Houston was, during the early part of the week, in London, and transacted business at the Admiralty with the various heads of departments.

The division of the Channel fleet under the command of Rear-Admiral Stopford, consisting of the Royal Albert, Donegal, Conqueror, Aboukir, Centurion, and Emerald, was in the Tagus on the 7th inst. The squadron is ordered to Plymouth.

Some interesting experiments have been made at Spithead from the Traveller gun-boat, under the supervision of Captain Sir F. Leopold M'Clintock, with two new sounding instruments from Her Majesty's ship Bulldog. The first instrument is the one invented by Mr. Steil, assistant-engineer of the Bulldog, and used repeatedly on board that vessel during her recent expedition to the coast of Labrador. Its weight is 24lbs., and it has always answered admirably in both deep and shallow water. In deep water sling-shot can be attached to it, which detach themselves on reaching the bottom.* The other instrument is only suited for deep water, for which it is specially intended. It is named by Sir Leopold M'Clintock "the Bulldog machine," as it owes its existence to the experience obtained in that ship. It consists of two parts—a detaching cylindrical weight, and a pair of hemispherical scoops, of the same nature as Mr. Steil's, but larger, which, until the instrument has reached the bottom, are kept open by the detaching cylindrical weight above them. On reaching the botom the weight is detached and the scoops closed by a stout India-rubber band. The application of this India-rubber band is due to Dr. Wallich, the naturalist of the late expedition, and experience has proved that it retains its retractile force undiminished as far down as 2000 fathoms. It is expected that a new instrument now making on this plan will only weigh 10 lb. empty, not reckoning the detaching weight and 14 lb. when filled with sand or mud. The experiment with both were highly successful.

Royal Naval College, Portsmouth.—The following i the result of the examinations at this college which closed o Tuesday. Those marked * passed from North Grove House Southsea. Qualified for Naval Cadets (passed in the orde named):—J. H. Ramier,* A. Nance, L. J. Y. C. Scarlett W. E. Still, A. B. Collingwood, C. Campbell, F. W. Sanders,* W. V. Bayley, H. F. Birch, W. Marrack, C. W. F. Crauford,* P. S. W. Mayo, G. H. Moore, R. P. Hampage, L. A. Beaumont, A. H. S. Mercer, C. S. C. Strange, J. E. Blaxland, H. H. Dyke, A. M. Jephson, H. C. Litchfield, A. M'Leod, H. S. Godfrey, E. Hocker, E. M. Edgcumbe,* A. Cochrane, W. P. Ogle, M. L. Bridger, A. W. Moore,* B. J. S. O. Carter, J. D. Nicholls, C. H. Leycester, M. M'Causland, W. M. Gilman. (55 entered.) Qualified for Masters'-Assistants:—E. S. Clapp, R. V. Carlyon,* B. S. W. Gwynne, R. G. Roe, W. Couzens, W. J. Symons, R. H. Hunter, A. Wallis, R. A. Ramsay, G. D. Moody, G. H. Stoate, W. L. Harrison, E. F. Hemming.* Qualified for Marine Cadets:—T. Laken, B. G. Hall, C. A. Kennedy, E. M. Moore,* C. D. Macdonald, H. D. Dent, F. Hutchinson, O. Tracey, F. Roberts, E. Poole, C. Frampton, P. H. O. Despard.

The members of the Royal Dockyard Commission are industriously preparing the groundwork for a copious report. On Monday, Lord Gifford, Sir H. Willoughby, M. P., Rear-Admiral Robinson, Mr. R. Dalglish, M.P., with Mr. Price, R.N., as secretary, arrived at Dent's George Hotel, Portsmouth. In the afternoon they visited the dockyard, and after transacting business at the office of the Admiral-Superintendent, they inspected several parts of the yard, attended by the heads of departments.

The court-martial for the loss of the Perseverance, off the Cape de Verds, October 21st, will take place on board the Victory, flag-ship, on Tuesday next, the 18th inst. The master (Mr. M'Farlane) is still very unwell at Haslar Hospital; he has suffered considerably from exposure and low fever.

Sailors' Home, and Destitute Sailors' Asylum.—The monthly meeting of directors of the above Institutions was held on Thursday, 13th inst., at the Sailors' Home, Well Street, London Docks, Captain C. J. Bosanquet, R.N., in the chair. The Secretary presented the accounts; by which it appeared that the number of boarders in the "Home" has lately been very large, as many as 350 seamen having been accommodated in one night. The sums of money remitted home by seamen since 1st May last, amounted to 14,724*l.* 6*s.* 9*d.*, and the deposits in the Board of Trade Savings' Bank to 2,399*l.* 12*s.* 9*d.* A donation of 100*l.* was forwarded to the directors by an anonymous friend through Messrs. Ommaney & Co. The Secretary reported that several visits have been paid to the Home by a French gentleman, connected with the "Messageries Imperiales," with a view to the establishment of a similar institution at Marseilles for the seamen of that company. Tenders for the supply of provisions for the quarter commencing 1st January, 1861, were submitted, showing nearly the same prices as for the current quarter. The seamen enrolled at the Sailors' Home for the naval reserve number 335. With reference to the Destitute Sailors' Asylum, it appeared that during the past month 70 distressed sailors have been relieved, not only with food and shelter, but with a supply of warm clothing; and as winter approaches the number may be expected to increase daily.

The Navy Gazette.

ADMIRALTY, December 6.

Corps of Royal Marines—First Lieutenant Francis Walton to be Captain, vice C. B. Parke, to half-pay.

Second Lieutenant Henry William Frampton to be First Lieutenant, vice Walton, promoted.

ADMIRALTY, 12th December, 1860.

Corps of Royal Marines—Captain Richard George Connolly to be Lieutenant-Colonel, vice Hocker, deceased; First Lieutenant Richard John Hardy Douglas to be Captain, vice Connolly, promoted; Second Lieutenant Sydney Vere Alston to be First Lieutenant, vice Douglas, promoted.

THE PAYMASTERS' MEMORIAL.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—I trust you will allow me space in your columns for a few remarks on certain points of the Paymasters' Memorial, so ably reviewed in the Army and Navy Gazette of the 1st inst., for as it appears you take a different view on questions deemed essential by the memorialists, some explanation may perhaps be necessary to clear up any doubts now existing thereon.

First, then, as regards the obnoxious paragraph in Circular 411, I may remark that the regulations for the full and half-pay of chaplains, masters, and engineers, were promulgated

[* Mr. Skead, Master, R.N., has, if we mistake not, invented a similar apparatus, which has been used in the survey of the coast of Syria, with the best results, on board the Firefly.—Ed.]

Digitized by Google

by Circular dated 23rd February, 1860, at the same time as Circular 411 made its appearance, but only in the regulations for the paymasters was a proviso made in the event of misconduct; this exception seemed so pointed as to be the subject of universal remark throughout the Service, and very naturally caused a strong feeling on the part of those concerned. Under other circumstances such a regulation might not have been noticed, it being well known that the Admiralty possessed the power of placing an officer on such scale of half-pay as they deemed fit, for any neglect of duty or other misconduct.

The wish was so universal to mark the feeling entertained on this point, that it was determined to pray the Lords Commissioners of the Admiralty to cause the paragraph complained of to be withdrawn.

The abolition of the classification has been held by the paymasters of the Navy as most essential to their well-being; the system of pay by servitude has been found to work well in the case of surgeons, masters, and engineers in the Navy, the civil departments under the Admiralty, as well as with commissaries, paymasters, and other classes in the Army, but for some unaccountable reason has never been extended to the paymasters of the Navy, and of which many have taken advantage by avoiding active service while in a junior position, remaining on half-pay until advanced—by the death and retirement of officers on the active list—to the first or second classes; in the meantime, following their private pursuits in various ways, and only condescending to serve when they could realise an income at sea greater than they could hope to attain elsewhere.

A system thus permitting an avoidance of service, and at the same time proving in no way disadvantageous to those avoiding it, cannot prove beneficial to the public service, or fair to the hard-working and persevering, who never decline employment in any ship or climate.

That it has long been the wish of the paymasters to be placed on the same footing in this respect as other officers in the Service, is well known to the Admiralty, as will be seen by the memorial presented in 1859 (a copy of which I forward), and signed by 111 of these officers, which number was subsequently increased to nearly 200.

A memorial was also prepared in 1856, but not presented, setting forth the wish of the paymasters that their full and half-pay should be regulated by sea-service only; so that I think there can be little doubt as to the feeling entertained on this point.

In conclusion, I would beg to convey my own personal acknowledgments for the fair and just view you have taken of the requirements of my class, and it is to be hoped that the Lords Commissioners of the Admiralty will be induced to give a calm and impartial consideration to the petition of such a large body of public servants, who feel they have hitherto been passed over, it may be from want of time and opportunity for a revision of those regulations which bear so hardly upon them.—I am, &c. A PAYMASTER.

THE YELLOW FEVER AT PORT ROYAL.

The accounts brought home by the Royal Mail Company's steamer Atrato, which reached Southampton on Thursday, show that yellow fever had almost entirely disappeared at Port Royal. It had done its work, for more than an average number of victims had been carried off from the men-of-war on the station. The season has not had its equal for sickness since that in which the officers and crew of H.M.S. Dauntless suffered so fearfully at Barbadoes. The good sense which induced the authorities to order the ships contaminated with the disease to run to a northern latitude is worthy of attention, as the result places beyond all doubt that change to a temperate climate is the most effectual mode of getting rid of the plague. We are, in a great measure, by the possession of steam power, independent of winds, and can, consequently, work our ships with comparatively few men. There is, therefore, now no reason that ships should remain at their moorings like in the olden time till "Yellow Jack" has removd the best and stoutest from among their crews, and left the survivors helpless to assist themselves or others. The Hydra's late run from Jamaica to Nova Scotia is a case in point. She was being more than decimated while in the West Indies, but as soon as it was wisely decided upon her steering northwards, fresh cases became fewer, and by the time she had reached Halifax the back of the pest was broken, and with the careful attendance which they met with there, and which is now so universally found in our naval hospitals, it is to be hoped that all the sick will be restored to health. The survivors on board the Hydra have had a fortunate escape, and her Commander, or whoever else is responsible for the change of station, is worthy of commendation for the care taken in preserving for further service her *personnel*, which, under existing circumstances, it would appear to be more difficult to replace than the vessel itself, which by general rumour is "old and rotten."

THE COMPTROLLERSHIP OF THE NAVY.

We were not far wrong when we stated last week that the Duke of Somerset would find it a difficult matter to select an officer qualified to succeed Sir Baldwin Walker as Comptroller of the Navy, for up to this time the public have not been made acquainted with the decision of His Grace on the subject. We can well understand the difficulties which stand in the way of any immediate decision being arrived at. There is no very important question at the moment at issue between the departments. It has been resolved to abide the result of some experiments which will be made when the Warrior takes the water, before ordering any other iron-clad ships of her class to be built. The office machinery is amply efficient for turning out the ordinary work, and as Sir Baldwin is still present to supervise it by his judgment and experience, no great harm can arise from the delay which has occurred in finding for the Navy a future Comptroller who will enjoy the confidence of the country, and not merely that of the section of the Board of Admiralty which is answerable for the resignation of his predecessor in office. We have heard of several officers being mentioned as likely to take the vacant post. Rear-Admiral George Elliot was at one time the favourite. Rear-Admiral Robinson, member of the Royal Dockyard Commission, as Comptroller, and Captain Astley Cooper Key, C.B., as deputy, were looked upon as not unlikely for selection. Captain Warden, C.B., a good steam officer was also mentioned. In short, the changes have been rung upon every qualified scientific officer in the Service, until it is now asserted that the First Lord of the Admiralty will not exercise his privilege till after the assembling of Parliament, when the report of the Royal Commission will be made; and it will then be seen how far necessary it will be to introduce changes which, with the many conflicting opinions given to the Duke, it would perhaps be deemed premature on his part to make without the sanction of the House of Commons.

THE MILITIA.

The Militia Gazette.

WAR OFFICE, PALL MALL, DECEMBER 11.

The Queen has been pleased to appoint Frederic Henry, Baron Methuen, Lieutenant-Colonel-Commandant of the Royal Wiltshire Regiment of Militia, to be one of Her Majesty's Aides-de-Camp for the service of Her Militia force, with the rank of Colonel in that force.

Memoranda—6th West York Militia—Her Majesty has been graciously pleased to accept the resignation of the commission held by Quartermaster William Coates.

Glamorganshire—Her Majesty has accepted the resignation of the undermentioned commission:—

Royal Glamorgan Light Infantry Militia—Francis John Shortis, Lieutenant.

Ayrshire Yeomanry Cavalry.—Captain John Joseph Burnett to be Major, vice Fairlie, promoted.

WAR OFFICE, PALL MALL, DECEMBER 14.

Hertfordshire Militia—Ensign Humphrey Frederick Herne Burchell Herne to be Lieutenant; William Baker, Jun., Gent., to be Lieutenant.

North York Rifle Regiment of Militia—Edward Barrett Carter, Gent., to be Lieutenant.

Memoranda—East York Infantry Militia—Her Majesty has been graciously pleased to accept the resignation by Captain Samuel Standidge Walton of the Commission which he held in this Regiment; and in consideration of his long services has allowed him to retain his rank and to wear his uniform.

Her Majesty has also been graciously pleased to accept the resignation by Captain Marmaduke Jerard Grimston of the Commission which he held in this Regiment.

THE MILITIA AND THE LINE.

The Secretary of State for War has directed the following Circular Letter to officers commanding Militia corps to be circulated for the information and guidance of the Army generally:—

"Sir,—I have had under my consideration the conditions on which men belonging to the disembodied Militia have hitherto been permitted to transfer their services to Her Majesty's regular forces. It is most important to the efficiency of the Militia as a reserve force upon which dependence can be placed in case of national danger, that it should be raised from among men of settled habits and fixed residence within the county to which the regiment belongs.

"A Militia regiment, however short of its quota, which can annually muster as effectives for training the men who have been enrolled, is far more efficient, and contributes more to the security of the State, than one which, having a large force upon paper, can neither produce nor account for them subsequently. Militia officers, therefore, should not seek to attract temporarily to their ranks men who would otherwise enlist into Her Majesty's regular forces, of whose services the Army is thus deprived, and who, by leaving the Militia for the Line after receiving the Militia bounty, disorganise the Militia, while they enter the Army at an increased and unnecessary expense to the public.

"The regulations at present in force for carrying on volunteering from the Militia to the Line will therefore be modified in the following manner:—

"Stringent orders have been issued, prohibiting any Line or other recruiting parties from attempting in future in any way to induce Militiamen to leave their respective regiments in order to enlist in Her Majesty's regular forces or Marines, Militiamen having no more right to do so than men of one Line regiment have to enlist in another without the consent of their commanding officer. Such a proceeding on their part amounts to desertion, and will expose them to the penalties attached to that offence — a liability which every opportunity should be taken to make known. Volunteers, therefore, who may be anxious to enlist in the regular Army should apply for permission to their commanding officers, who will exercise their discretion as to granting their request, bearing in mind the policy of granting conditional releases to men who are bent on enlisting, and over whose movements, except during the one month's training, they have little or no practical control. In such cases I shall be prepared, on your recommendation, to give you authority for the release of any such men to whom you may think it right to grant the indulgence. But it is to be clearly understood that in all such cases the men will be required to refund 18*s.* 6*d.* to cover the bounty and other expenses incurred on their enrolment; also any balance of bounty they may have received in advance on account of their first engagement, if reattested for a second. The Act under which the temporary embodiment of the Militia has been sanctioned will expire on the 25th of March next, and the entire force will then revert to its normal and constitutional state as a reserve force, to be annually trained, but not to be embodied except in time of national danger; and there is every reason to hope that by a careful observance on the part of the Government of the principles on which the Militia force is founded, the disorganisation of the regiments of which it is composed will be prevented, and commanding officers will be enabled to reap the fruits of their unremitting exertions to maintain the efficiency of their corps."

VOLUNTEERS.

METROPOLITAN.

22ND (QUEEN'S WESTMINSTERS) MIDDLESEX RIFLES.—The members of the 6th (St. John's) Company, competed in a shooting-match at the butts of the 11th Surrey, at Wimbledon, on Monday last. The state of the ground at Wormholt Scrubs rendered the change of locality necessary, and the 11th Surrey generously gave up their ground for the occasion. The prizes, six in number, consisting of silver cups, and other appropriate objects, were subscribed for by the honorary and effective members of the 6th company, and averaged in value from about 3*l.* to 12*l.* The prizes, in proportion to points, were five, and the sixth was arranged to be given to the member, not being otherwise a winner, who should make the greatest number of hits, irrespectively of points. There were 39 competitors; five rounds were allowed to each competitor, at the ranges of 200, 300, 400, and 500 yards respectively. Major Mayne, the adjutant of the regiment, kindly presided over the shooting, and Captain T. M. Keogh and Mr. W. Maloney (of the Hon. City Artillery), volunteered to act as umpires. At the conclusion of the shooting of the twenty rounds the score stood as follows:—Ensign Thoms, 24 points (1st prize); Sergeant Robert Montague and Private Edward Draper, each 22 points; Privates Moone and Redgrave, each 19 points; for the 6th prize, Captain Wood and Private Higgs, each 16 hits. The ties were then shot off at 300 yards in single shots, when Messrs. Draper and Moone were successful in their competition for the second and fourth prizes, their antagonists respectively taking the third and fifth. The sixth prize was won by Mr. Higgs. The weather was very favourable; and the shooting, considering the short time this company have been in practice, remarkably steady.

29TH (NORTH) MIDDLESEX RIFLES.—On Wednesday evening Lord Enfield, the newly-appointed lieutenant-colonel, took the command of the regiment, and the effectives mustered in full force on the parade ground of the Regent's Park Barracks to receive his lordship. At the conclusion of the manœuvres the men were marched into the Riding School, where Lord Enfield addressed them, remarking that they as Volunteers should have some relaxation from duty, and therefore he proposed they should break off drill for two or three weeks, and at the conclusion of the recess he doubted not but they would return to their military duties with redoubled ardour.

32ND (GUARDS) MIDDLESEX RIFLES.—This corps is enrolling a considerable number of new members for the ensuing year, in consequence of a resolution that one company of 5 feet 11 inches to under 6 feet, and one company of 5 feet 10 inches to under 5 feet 11 inches, shall be formed forthwith.

36TH (PADDINGTON) MIDDLESEX RIFLES.—The inauguration of a school of arms and reading-room for this corps took place on Tuesday evening, with great *éclat*, in the presence of a numerous attendance of both honorary and effective members of the corps. Sir Richard Torin Kindersley Vice-Chancellor, occupied the chair.

39TH (FINSBURY) MIDDLESEX RIFLES.—This corps now numbers between 600 and 700, all of them effectives, and recruits are joining daily. A cadet corps is in course of being formed, and between 20 and 30 boys of about 12 years of age have already joined.

METROPOLITAN LIGHT CAVALRY.—This corps, raised by Lord Truro, having been sanctioned by the Crown, a crowded meeting was held on Tuesday evening at Ecclestone Hall, Pimlico, "for the purpose of forming a committee of enrolment and finance for the Kensington district, comprising Brompton, Fulham, Hammersmith, and Chelsea." Lord Truro presided.

ESSEX.

1ST (ROMFORD) ESSEX RIFLES.—The unpleasantness which existed in this corps, and which threatened at one time the dissolution of the company, has now passed away, and since the election of Major Champion Russell, of the West Essex Militia, to the command, a gradual increase of members has taken place, and the prospects of the corps are more encouraging and satisfactory. The company now numbers about 60 effective members, who, upon the whole, present a very soldier-like appearance.

5TH (PLAISTOW) ESSEX RIFLES.—On Saturday in a match various prizes were contended for by the twenty-five best shots in this corps, with the following results: a rifle, valued 25 guineas, was won by Ensign Stewart, 3rd company, 10 points; a gold medal, valued at 10 guineas, was won by Mr. Otto; a rifle, valued at 5 guineas, Mr. Boddy; a silver claret-jug, valued at 5 guineas, Mr. Western. Each of these parties but Mr. Stewart made 5 points.

6TH (COLCHESTER) ESSEX RIFLES.—This corps having become too numerous for one company, it is now proposed to form a second, with suitable officers in command. The table of the platoon and skirmishing practice during the past few months has been published, and the result has been that the firing of the Volunteers has been superior even to many of the Depots of the Line. The financial state of the corps is said to need "a refresher."

7TH (ROCHFORD) ESSEX RIFLES.—The members of this corps, a short time since, had a competition for various prizes, and after some excellent shooting, a short Enfield rifle, presented by Sergeant-Armourer Blanks, was won by Sergeant Knapping; a silver cup, which had been subscribed for by members of the corps, was carried off by George John Jones, Esq., honorary surgeon, and a silver pencilcase by Ensign Barnard. Application has been made to the Lord-Lieutenant to sanction the change of this force from a subdivision into a company.

22ND (MALDON) ESSEX RIFLES.—This corps, which was formed only a short time since, has been carried on with considerable enthusiasm, and is now in a highly satisfactory state, having enrolled between 70 and 80 members, and possessing an excellent band. The Government has now sent down the first supply of Enfield rifles, with a promise of the completion of the complement, and the members of the corps will immediately commence rifle practice. Captain Hamilton, elected to the command, has chosen the ordinary number of non-commissioned officers; and the prospects of the corps, financially and otherwise, are very satisfactory.

Digitized by Google

1ST (HARWICH) ESSEX ARTILLERY.—The ammunition for heavy gun practice from the Redoubt has for some time been made up ready for use, and it was expected long ere this that firing would have commenced, but at present no order respecting it has been received. The ladies of this district have subscribed nearly 30*l.* for the purchase of a silver trumpet for presentation to this corps.

2ND (GRAYS) ESSEX ARTILLERY.—This corps, which is known as the "North Thames Volunteer Artillery Corps," having places for drill at Grays and Orsett, has just commenced its active duties. Captain R. B. Wingfield Baker and Lieutenant Meeson have been indefatigable in their labours to promote the efficiency of the corps, whose duty will be the protection of the northern banks of the Thames. Major Walcott, from Woolwich, the Government Inspector, has visited the locality, and expressed his approval of Grays and Orsett as places of drill, and very shortly the War Office will send down two guns, one for each of those neighbourhoods, and a competent instructor for the training of the men. At present it is determined to provide the men with the undress clothing only, and Messrs. Hebbert, of London, have contracted to supply it at 2*l.* 6*s.* 6*d.* per suit.

GLOUCESTERSHIRE.

BRISTOL RIFLES.—Some tables have been compiled by Captain A. M. Jones, Adjutant of this corps, to show the high degree of efficiency which has been obtained.

NORFOLK.

AYLSHAM RIFLES.—The members of this corps have just had a competition for two prizes of 4*l.* and 2*l.*, presented by Lieutenant Ernuin. The first prize was shot for at ranges of 400, 500, and 600 yards; and the second at 200, 300, and 400 yards, three shots each. The winners were Private Gay and Private Same.

NORTHAMPTONSHIRE.

2ND (TOWCESTER) NORTHAMPTONSHIRE RIFLES. — On Thursday evening last the members of this corps held a dinner at the National Schoolroom, Towcester, at which an address was presented to Earl Pomfret, the captain of the corps. Captain Wardlaw presided, supported on the right and left by the Earl of Pomfret and the Earl of Euston, and among the company present were many of the officers and members of the different corps of the county.

NORTHUMBERLAND.

1ST NORTHUMBERLAND RIFLES.—The Duke of Northumberland has placed Percy-square, North Shields, with two cottages, at the disposal of this corps, for purpose of drill. It is proposed to form a cadet corps, consisting of young lads of from about 12 to 16 years of age, in connection with the 1st Northumberland Rifles. The corps will be one of Foot Lancers, the lances being similar to those used by the cavalry, but only about 6 feet long.

OXFORDSHIRE.

1ST (UNIVERSITY) OXFORDSHIRE RIFLES.—The cup given by the Prince of Wales, to be shot for by members of this corps, has been gained by Mr. T. Lee-Warner, scholar of Trinity College.

YORKSHIRE.

3RD (BRADFORD) WEST RIDING RIFLES. — The strength of this corps now exceeds 500, and a seventh company is contemplated.

The Wigan Volunteer Rifle contest commenced on Thursday week, and continued on Saturday, the 1st of December, was concluded on Saturday last. The prizes that remained to be shot for were a Westley Richards breech-loading rifle, presented by Colonel the Hon. J. Lindsay, M.P., to the best shot in the Wigan and Haigh Corps, and a gold rifle pencil-case, given by Lady Sarah Lindsay, to be shot for by the unsuccessful competitors for the rifle. Private Leader, of the Wigan corps, who had scored eight at 200 yards, added nine points at 300, and thus won the rifle, beating Sergeant Dongan by one point. Private Halsall, of Wigan, made 15, his score being only one behind that of the recipient of the second prize. The pencil-case was then shot for, three rounds at 300 yards being allowed. Private Meek, of Wigan, who is about the youngest Volunteer in the corps, made three centres, marking six points, as did also Captain Thompson, of the Haigh Corps. On shooting off Private Meek made only an outer, and Captain Thompson, striking the centre of the target, won the prize. It is the intention of the Captain-Commandant to present Private Meek with a decorative medal for his first-rate shooting for the pencil-case.

An official "table of performances in platoon and skirmishing practice" of the Colchester Corps has just been prepared, and the following are the results stated:—Average points, first period, 13·39; file-firing, 11·03; volley-firing, 8·19; skirmishing practice, 5·97; total, or figure of merit, 38·58. Classification of men:—Third class, 23; second class, 47; first class, 18. The best shots were:—First period, third class, Private Hast; second period, second class, Private Tayler; third period, first class, Private Tayler; skirmishing, Privates Tayler and Wright. The Volunteers compare advantageously in respect to their practice with the troops stationed in the camp at Colchester, whose "figures of merit" have been just returned as follows:—9th Battalion—whole battalion, 35·22; best company, 39·37; 10th Battalion—whole battalion, 38·36; best company, 44·11. A second company of Volunteers is being formed in Colchester, and the election of officers will take place in a few days.

The Rifle shooting match between the Civil Service and the 9th Surrey (Richmond) Rifle Volunteers, which was shot at the range of the latter corps on Sheen Common, on Saturday the 8th, terminated in favour of the 9th Surrey, who obtained four points more than their opponents, six of the members of the Richmond also firing only four rounds at the last range in consequence of the lateness of the hour. The ranges shot were 200, 300, 500, and 600 yards, five rounds being fired at each, and the following was the aggregate number of points—9th Surrey, 109; Civil Service, 105. The highest scores were made by Sergeant Plaskett (25), and Sergeant Mills (19), of the Civil Service; and Private Humphreys (23), and Colour-Sergeant Batey (20), of the 9th Surrey.

The Volunteer movement makes steady progress in Bombay. Upwards of fifty Europeans have already enrolled themselves, and it is expected that separate corps of Parsees and Eurasians will likewise be formed.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, DECEMBER 11.

1st Battalion of Somersetshire Rifle Volunteers — Francis James Bampfylde, Esq., late Captain 22d Regiment, to be Adjutant from the 9th of October, 1860.

2d Battalion of Somersetshire Rifle Volunteers—Alfred Augustus Malat, Esq., late Captain 1st Somerset Militia, formerly Captain 8th Foot, to be Adjutant from the 15th of October, 1860.

29th Middlesex Rifle Volunteer Corps—Robert Wallen Jones, late Captain Royal London Militia, and formerly of the 84th Foot, to be Adjutant from the 9th of November, 1860.

South Middlesex Rifle Volunteer Corps—Arthur Bromley, Captain in the Nottingham or Royal Sherwood Foresters Regiment of Militia, to be Captain; the Hon. Evelyn Ashley to be Lieutenant.

West Middlesex Rifle Volunteer Corps — Ensign William Page Thomas Phillips to be Lieutenant, vice Wills, resigned; Ensign Frederick Peake to be Lieutenant, vice Brodie, promoted; Ensign George Richardson to be Lieutenant, vice Barber, promoted; Thomas Price to be Lieutenant.

39th Middlesex Rifle Volunteers — Charles Pontifex, jun., to be Ensign; George Tidd to be Ensign.

Memorandum—30th Middlesex Rifle Volunteer Corps—The Queen has been graciously pleased to accept the resignation of the commission held in this corps by Captain (Colonel) John Fitzmaurice.

Oxford University Rifle Volunteer Corps—Lieutenant Walter Payne Gepp to be Captain, vice Holding, resigned.

2d Sussex Rifle Volunteer Corps—Robert Bird Thompson to be Ensign, vice Hankey, promoted.

5th Monmouthshire Rifle Volunteer Corps—John Thomas Edmonds, Gent., to be Lieutenant; William Bailey Partridge, Gent., to be Ensign.

Memoranda — 3d Monmouthshire Rifle Volunteer Corps — Her Majesty has been pleased to accept the resignation of the commission held by Captain the Hon. F. C. Morgan.

Her Majesty has been pleased to approve Captain Sir George Ferdinand Rudzivil Walker, Bart., bearing the title of Captain-Commandant.

Memorandum.—Her Majesty has been pleased to accept the resignation of the commission held by Lieutenant Nathaniel Coates.

2nd West Riding of Yorkshire Artillery Volunteers (Bradford)—George Brown, Gent., to be Second Lieutenant; John Nettleton Terry, Gent., to be Honorary Assistant-Surgeon.

4th West Riding of Yorkshire Rifle Volunteers (Halifax)—William Henry Emmet, Gent., to be Ensign, vice Sowerby, promoted.

7th West Riding of Yorkshire Rifle Volunteers (Leeds)—Francis William Tetley, Esq., to be Captain; Charles Ryder, Gent., to be Lieutenant.

16th West Riding of Yorkshire Rifle Volunteers (Harrogate)—The Rev. Horatio James to be Chaplain.

Memorandum.—Her Majesty has been graciously pleased to accept the resignation of the commission held by Major William James Armitage in the 7th West Riding of Yorkshire Rifle Volunteer Corps (Leeds).

1st Elginshire Rifle Volunteers (Forres)—Richard Heath Harris, Gent., to be Ensign.

11th Company of the Stirlingshire Volunteer Rifle Corps—George Duncan Mercer, Esq., to be Captain; Neil Cochrane, Gent., to be Lieutenant; David Dunsyre Syme, Gent., to be Ensign.

4th Midlothian Rifle Volunteer Corps—William Macfie, Gent., to be Captain.

5th Argyllshire Rifle Volunteers—Farquhar Campbell, Esq., to be Captain: William Elliott Oliver, Gent., to be Lieutenant; Walter Elliott, Gent., to be Ensign.

23rd Lancashire Artillery Volunteer Corps—Henry Parkes Barton, Gent., to be Second Lieutenant.

15th Lancashire Rifle Volunteer Corps—Frederick Hancock Boult, Gent., to be Ensign, vice Stuart, resigned.

North Lonsdale or 37th Lancashire Rifle Volunteer Corps—Adjutant Frederick Herbert Suckling to serve with the rank of Captain.

61st Lancashire Rifle Volunteer Corps—The Rev. John Stock, M.A., to be Hon. Chaplain.

74th Lancashire Rifle Volunteer Corps—Lieutenant Joshua Ashley to be Captain; Abraham Crosthwaite, Gent., to be Ensign.

Memorandum.—Her Majesty has been graciously pleased to accept the resignation of the commission held by Assistant-Surgeon Robert Thomas Lodge, M.D., in the 1st Lancashire Rifle Volunteer Corps.

1st Anglesey Rifle Volunteer Corps—Henry Brasier Mitchell, Esq., to be Captain.

2nd Anglesey Rifle Volunteer Corps—Owen Augustus Fuller Meyrick, Esq., to be Captain.

3rd Anglesey Rifle Volunteer Corps—Major-General Robert George Hughes to be Captain.

2nd Tower Hamlets Rifle Volunteers—Freeman Clark Roper, Gent., to be Lieutenant; John Simpson, Gent., to be Ensign; Samuel Gamman, Gent., to be Ensign, vice Secretan, resigned.

2nd Suffolk Rifle Volunteer Corps—Lieutenant John Pierson, to be Captain, vice Bloomfield, resigned; Ensign Nathaniel George Barthropp to be Lieutenant, vice Pierson, promoted; Robert Garrard, Gent., to be Ensign, vice Barthropp, promoted.

Memorandum.—Her Majesty has been graciously pleased to accept the resignation of the Commission held by Captain Edwin Bloomfield in the above corps.

10th Company Ayrshire Rifle Volunteers — Lieutenant William Brown to be Captain, vice Cunninghame, resigned; John Graham, Gent., to be Lieutenant, vice Brown, promoted.

Glamorganshire.—Her Majesty has accepted the resignation of the undermentioned commissions:—

1st Artillery Volunteers—Washington Hamilton Brown, Second Lieutenant.

4th Artillery Volunteers—Gwylim William Jones, Second Lieut.

10th Rifle Volunteers—Charles Henry Williams, Ensign.

14th Rifle Volunteers—Richard Sloper, Surgeon.

Permission has been granted to the 16th Rifle Volunteers to style themselves the 16th (Bute) Glamorganshire Rifle Volunteer Corps.

Memoranda — 12th Aberdeenshire Rifle Volunteer Corps—Her Majesty has been graciously pleased to accept the resignation of the commission held by Captain Francis Irvine.

Her Majesty has been graciously pleased to accept the resignation of the commission held by Lieutenant John Watt, jun.

Memoranda.—Hampshire—The 1st, 2nd, and 3rd Hampshire Artillery Volunteer Corps have been united in a brigade for administrative purposes, and the same has been numbered as the 1st Administrative Brigade in the county of Hants.

The 1st, 11th, 13th, 15th, 16th, and 18th Hampshire Rifle Volunteer Corps has been united in a battalion for administrative purposes, and the same has been numbered as the 1st Administrative Battalion of Hampshire Rifle Volunteers.

The 4th, 5th, 6th, and 23rd Hampshire Rifle Volunteer Corps have been united in a battalion for administrative purposes, and the same has been numbered as the 2nd Administrative Battalion of Hampshire Rifle Volunteers.

The 7th, 8th, 12th, 17th, 20th, 21st, and 22nd Hampshire Rifle Volunteer Corps have been united in a battalion for administrative purposes, and the same has been numbered as the 3rd Administrative Battalion of Hampshire Rifle Volunteers.

Memorandum.—3rd Battalion of Gloucestershire Rifle Volunteers—The order amalgamating the 7th, 10th, 13th, and 14th Companies of Gloucestershire Rifle Volunteers into one Corps, as gazetted on the 16th of October last, has been cancelled; and they have now been united in a battalion for drill and administrative purposes, which is numbered as the 3rd in the county of Gloucester, and the several Corps composing it will resume and retain their original numbers and designations in the county force.

WAR OFFICE, PALL MALL, DECEMBER 14

1st Battalion of Cheshire Rifle Volunteers—Frederick Torrens, Esq., late Captain 23rd Welsh Fusiliers, to be Adjutant.

Fife Mounted Rifle Volunteer Corps—Abraham Crabtree, Esq., to be Adjutant from 7th September, 1860.

1st Battalion of Fifeshire Rifle Volunteers—William Forrest, Esq., to be Adjutant from 20th September, 1860.

1st Battalion of Suffolk Rifle Volunteers—Nathaniel Barnardiston, Gent., to be Adjutant from 10th September, 1860, to serve with the rank of Captain.

1st Administrative Battalion of Surrey Volunteers—Adam Steuart, Esq., to be Adjutant, from 9th October, 1860, to serve with the rank of Captain.

7th Surrey Rifle Volunteer Corps—William Prince Jones, Esq., to be Adjutant, from 9th October, 1860.

19th Surrey Rifle Volunteer Corps—Samuel Wood Graves, Esq., to be Adjutant, from 9th October, 1860.

1st Brigade of Fifeshire Artillery Volunteers—William Heriot Maitland Dougall, R.N., to be Lieutenant-Colonel.

Wiltshire Volunteer Rifle Corps — 18th Company — Jeffery Grimwood Grimwood, Gent., to be Lieutenant; Henry Crowdy Crowdy, Gent., to be Ensign; Thomas Atherton Kennard, Gent., to be Honorary Assistant-Surgeon; The Reverend James Burn Smeaton, Clerk, to be Honorary Chaplain.

1st Hertfordshire Rifle Volunteers—John Woodhouse, Gent., to be Honorary Assistant-Surgeon.

Oxford University Rifle Volunteer Corps—Ensign Thomas Kennett Were to be Lieutenant, vice Luck, resigned; Ensign Francis Brandt to be Lieutenant, vice Gepp, promoted; Assistant Sergeant-Major Edward Carrier Smith Tompson to be Ensign, vice Traill, resigned; Colour-Sergeant John Gregory Watkins to be Ensign, vice Were, promoted.

3rd Kirkcudbrightshire Rifle Volunteers—The Rev. George Murray to be Honorary Chaplain; Alfred McKinlay Millman, Esq., to be Honorary Assistant-Surgeon.

3rd Suffolk Rifle Volunteer Corps—Rolla Rouse, Esq., to be Captain, vice Captain Brooke, resigned.

16th Suffolk Rifle Volunteer Corps—Captain Joshua Thelluson Rowley to be Captain, vice Anstruther, resigned.

1st Middlesex Engineer Volunteer Corps—Samuel Edward Peal to be Second Lieutenant.

West Middlesex Rifle Volunteer Corps—Robert Morris to be Ensign, vice Phillips, promoted; Stonhewer Parker Freeman to be Ensign, vice Peake, promoted; John David Charles Hampson to be Ensign, vice Richardson, promoted; Samuel Parkhouse to be Ensign; John Whitworth Bird to be Ensign.

Queen's (Westminster) Rifle Volunteer Corps — Horatio Nelson Hunt to be Lieutenant.

37th Middlesex Rifle Volunteer Corps—Captain-Commandant John William Jeakes to be Major.

43rd Middlesex Rifle Volunteer Corps—Vaughan Henry Alexander Holberton to be Honorary Assistant-Surgeon.

44th Middlesex Rifle Volunteer Corps—James Paine to be Captain; Edmund George Phillips to be Lieutenant; Christopher Charles Horne to be Ensign.

Memoranda—18th Middlesex Rifle Volunteer Corps—The Queen has been pleased to approve of Captain John Charles Templer bearing the title of Captain-Commandant in this Corps.

30th Middlesex Rifle Volunteer Corps — The Queen has been graciously pleased to accept the resignation of the Commission held in this Corps by Adjutant (Major) Richard John Edgell.

Kent Artillery Volunteers—14th Corps—Second Lieutenant Richard Eddey Chapell to be First Lieutenant, vice Johnson, resigned; Edward Josiah Miller, Gent., to be Second Lieutenant, vice Chapell, promoted.

Kent Rifle Volunteers—3rd Battalion (20th Corps)—Lieutenant Bedford Wilde Kenyon to be Captain; Ensign George Turner to be Lieutenant.

2nd Cambridgeshire Rifle Volunteers—Lieutenant Francis Jackson to be Captain, vice Fryer, resigned; Ensign Richard Young to be Lieutenant, vice Jackson, promoted.

1st Administrative Battalion of Northumberland Rifle Volunteers—The Earl of Tankerville to be Lieutenant-Colonel.

Memorandum—The above Battalion is formed by uniting the 2nd, 3rd, 4th, 5th, 6th, and 7th Northumberland Rifle Volunteer Corps and the 1st Berwick-upon-Tweed Rifle Volunteer Corps.

2nd Battalion Cornwall Rifle Volunteers—John Hodge Lawrence, M.R.C.S., to be Surgeon; Robert Rendell to be Assistant-Surgeon.

9th Rifle Volunteers—Lieutenant Henry Crouch to be Captain; Ensign Henry Beavan to be Lieutenant, vice Crouch, promoted; William Manley, Esq., to be Ensign, vice Beavan, promoted.

Memorandum—18th Rifle Volunteers—The correct surname of the Ensign in this Corps is Fane, not Farre, as stated in the *Gazette* of the 7th instant.

4th Administrative Battalion of Lanarkshire Rifle Volunteers—John Gowland, Esq., to be Major.

1st Lanarkshire Rifle Volunteer Corps—David Easton, Esq., M.D., to be Honorary Assistant-Surgeon.

19th Lanarkshire Rifle Volunteer Corps—John Middleton, Esq., to be Lieutenant-Colonel Commandant; Lieutenant William Cumming to be Captain, vice John Burns Mac Brayne, resigned; Lieutenant Duncan Lennox to be Captain, vice Patrick Edward Dove, resigned; Thomas Steven, Esq., to be Captain, vice Graham Gilmour, resigned; Ensign Peter Thomas Ramsay to be Lieutenant, vice William Cumming, promoted; Ensign Alexander Sword to be Lieutenant, vice Duncan Lennox, promoted; Ensign William Grant to be Lieutenant, vice Andrew Bannatyne, Jun., resigned; John Finlay, Jun., Gent., to be Ensign, vice Robert Pirrie, promoted.

Midlothian Coast Artillery Volunteer Corps—The Reverend William Smith to be Honorary Chaplain; John de la Condamine, Gent., to be Second Lieutenant.

City of Edinburgh Rifle Volunteer Corps—Lieutenant Thomas Goldie Dickson to be Captain, vice Maitland, resigned; Ensign James Howden, to be Lieutenant, vice Dickson, promoted; James Haldane to be Ensign, vice Howden, promoted.

Memorandum—1st City of Edinburgh Artillery Volunteer Corps—The name of the Gentleman, promoted to be First Lieutenant in this Corps, is William Steel Miller, and not William Steel Millar as stated in the *Gazette* of 27th November, 1860, and the date of his Commission, 16th October, 1860, and not 21st November, 1860. The Commission to John Park to be Second Lieutenant, vice Miller, is to bear date 16th October, 1860, and not 21st November, 1860, as stated in the said *Gazette*.

1st Administrative Battalion of Staffordshire Rifle Volunteers—Michael Daintry Hollins, Esq., to be Major.

2nd Administrative Battalion of Staffordshire Rifle Volunteers (25th Company)—Ensign Charles Chester Mort to be Lieutenant, vice Lea, resigned.

Memorandum—County Palatine of Durham—The 4th, 12th, 15th, and 17th Durham Rifle Volunteer Corps have been united in a Battalion for administrative purposes, which Battalion is numbered as the 2nd in the county of Durham.

Memorandum—1st Company of Surrey Artillery Volunteers—The Queen has been graciously pleased to accept the resignation by Lieutenant John Holiday Brown of the Commission held by him as Second Lieutenant.

Memoranda—The 68th Lancashire Rifle Volunteer Corps has been united to the 2nd Administrative Battalion which previously consisted of the 5th, 14th, 19th, 39th, 63rd, 64th, and 71st Corps.

Her Majesty has been graciously pleased to accept the resignations of the Commissions held by Captain Charles Backhouse Robinson in the 4th Lancashire Artillery, and of Captain Robert Ellis Green in the 36th Lancashire Rifle Volunteer Corps.

The Secretary of State for India has made the following appointments in his Council for the ensuing year:—Vice-President, Sir James Weir Hogg; Chairman of Committees—Finance, Mr. W. Arbuthnot; Military, Major-General Sir Robert Vivian, K.C.B.; Revenue, Mr. T. Prinsep; Judicial and Legislative, Sir T. Erskine Perry; Public Works, Colonel Sir Proby Cautley, K.C.B.; Railways, Mr. Eliot Macnaghten; Political, Mr. W. J. Eastwick; Public, Mr. J. P. Willoughby.

Some experimental practice with the 40-pound Armstrong gun took place on Monday, on board Her Majesty's ship Excellent, for the purpose of testing a new description of carriage for naval service. The carriage is similar in its chief points of construction to the old 24-pounder depressing carriage used at the siege of Gibraltar. Some further experiments will take place from the Illustrious, which will move her position in Portsmouth harbour temporarily for that purpose.

Owing to the lamented death of the Rev. Dr. Twining, late garrison chaplain to Her Majesty's Forces in Halifax, Nova Scotia, orders from the War Office have been transmitted to the Rev. E. W. Milner, M.A., to hold himself in immediate readiness to embark for Nova Scotia. The reverend chaplain has officiated among the troops at Portsmouth during the last eighteen years, and will carry with him to his foreign home the best wishes of all among whom he has so long and faithfully laboured.

MONEY.—CASH ADVANCES TO ANY AMOUNT.—LOANS upon REVERSIONARY PROPERTY at £5 per cent.—Apply to Mr. GUMMER, 14, Duke Street, St. James', S.W., personally and by letter.

NOTICES TO CORRESPONDENTS.

To ALDERSHOT.—The Paymaster was the senior officer present, and should take precedence of all the Captains whose commissions as such date junior to his as Paymaster, provided there was a senior commissioned officer with the regiment.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the EDITOR cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

It is particularly requested that applications for copies of the ARMY AND NAVY GAZETTE, &c., and advertisements be sent to the Publisher, MR. ARCHIBALD GRAHAM, and not to the EDITOR.

Army & Navy Gazette.

LONDON, SATURDAY, DECEMBER 15, 1860.

As all our readers may not have had the leisure or opportunity of studying Marco Polo, Du Halde, Klaproth, Stanton, Huc, and other European travellers, ancient and modern, who have visited Pekin, the great northern capital of China, and the Imperial residence, since the fourteenth century, of the Mongol and Mantchu dynasties, we supply a few details of information which may be useful at this particular juncture, when so many families are anxiously calculating what may be the chance of some one or more of their members spending a merry Christmas on the borders of Tartary, of getting a sufficiency of roast beef and plum-pudding, or of a local equivalent, and of finding shelter and covering against the wintry blast.

Pekin is nearly in lat. 40° N., nearly the same as Philadelphia, and situated like it on the eastern coast of a vast continent, and suffering, too, from the keen breezes which come in the winter from the N., N.E., and N.W., edged with the cold exhalation of fresh-water lakes and snowy mountains—but to a greater degree, inasmuch as the wind blows from Siberia over bleak and barren snowy Tartarian steppes, and alpine peaks of the Altai and Himmaleh, instead of over a forest or cultivated country, and the comparatively mild region of the Alleghany.

A population, variously estimated at from one and a-half to three millions, inhabits the city and suburbs, and they manage, furred to the nose and wadded to the heels, to keep out Jack Frost, not a little aided by coals, brought early in the season on dromedaries from Tartary. The population does not probably exceed a million, since the breaking up of the Grand Canal, the flooding of the Yellow River, and the devastations of the Taepings, have added to the difficulty of providing food in a city which has little or no trade, and which draws its supplies from great distances; the poor, barren, sandy soil about it on the verge of the steppes, producing scarcely more than vegetables for the city's wants. Its rice, since the Grand Canal was closed, comes to it by the Gulf of Pecheli from Shanghai; its corn from Shan-tung and the south-western provinces; its cattle and sheep from Mongolia. Pigs, geese, ducks, and fowls are bred in abundance, *au sein de la famille*, and the markets are well supplied with game.

We think, therefore, that where, say a million Tartars and Chinese are clad and fed, our 20,000 Britons, Indians, and camp followers, may be able to provide themselves with fur and muff, and with belly timber sufficient, or it may fare badly with the million.

To be sure the million are sometimes hard put to it; and it may have happened that, in the unexpected bustle of our arrival, some of the usual precautions may have been omitted by the paternal Government; but we give the ambassadors and the general the credit of believing that they must have lost no time in looking to the ways and means of subsisting the family they have taken on their hands; for if they make spoil of war of the people's food, and leave them insufficiently supplied, famine may bring pestilence in its train, and leave the victors little advantage over the vanquished.

The city is divided into two portions. The most northerly is the Imperial or Tartar city: nearly square, with walls 40 feet high, strengthened by towers a bow-shot apart from one another; it contains the palaces, public buildings, &c., and is divided into four parts—each part having its own wall—but the chief part is the Imperial palace itself, surrounded by high walls, 2½ miles in circuit, rejoicing in the name of the "forbidden city." In the very adyta of this forbidden ground, like eagles on the topmost eyrie, the Allies will hold their court, having their detachments on the walls of the Chinese city, which 30 feet high, with frequent towers, have 122 massive fortified gates, or barbicans, commanding the broad streets which lead in straight lines from each, and which are capable of carrying guns. The city lies below, without spire, dome, tower, or even chimney, to break the level monotony of one-story huts, houses, mansions, and palaces, differing but little in architectural design or material, and only distinguishable by the greater or less surface they occupy, and by the expense in varnish, gilding, and paint.

Drains and sewers there are none, and gas or oil-lighting have yet to be applied to the streets. Water has not been laid on, and the supply from wells is fetid and brackish; so that good water, essential to the health of European troops, must be brought from the outside. Fuel also is scarce. Coal and argols are chiefly used, and we trust a good supply will be secured on the spot, or brought from our ships in the Gulf, while the river navigation is open, for we could scarcely hope to be able to carry it by land over the hundred miles of bad road which intervenes between Pekin and the sea, unless San-ko-lin-tsin and his Tartars retire very early to their winter-quarters, and remain very supinely there. To be sure, there is a resource in the houses and temples of the city, but they contain a minimum of timber in their composition, so that, if told off in rations, they would have to be estimated at about six houses per fire, and by the end of the winter it might happen that our material guarantee, the City, had evaporated in smoke, and that the Emperor might not then be prepared to make great sacrifices to recover the desecrated soil.

On the whole, we may repeat the old adage "si sit prudentia, nullum numen abest;" but without heads, and heads with brains in them capable of combination, forecast, and judgment, as pretty a Balaklava may be made at Pekin as we have more than once made before, and such as, in our mess of conflicting authorities and antagonistic departments, we may securely look to make again a little sooner or later. May the evil augury not afflict us now!

We scarcely expected to see in print what we had certainly heard rumoured, that Rear-Admiral Robinson and Captain A. C. Key, two members of the present Dockyard Commission, were likely to replace Sir Baldwin Walker at the Admiralty, the one as Comptroller of the Navy, the other as his deputy. The Royal Commission has already been very unfortunate. Its original chairman, Mr. Ricardo, who was also considered its best man of business, very soon resigned; and when it was deemed advisable to appoint a youthful successor in the person of Mr. Frederick Peel, the young head was no sooner placed on the old shoulders of the Commission, than it was again detached, to be stuck up at the Treasury, as a warning to Mr. Gladstone, and to watch over the Exchequer! Since then the Royal Commission has been wandering all over the country without any head, and appears at present to get on very well without one. It reminds us of certain organisms described in those charming papers, "Studies in Animal Life," in the *Cornhill Magazine*, which, in certain stages of their existence, at any rate, dispense with heads altogether. It only now is employing its tentacles in groping among the dockyard sediment, and collecting not very nice-looking food, to be hereafter digested, doubtless, in a higher state of existence. The terebella, for instance, "a marine worm," Mr. Lewis describes as "living and wriggling after amputation," exactly like this Naval Commission. He states, however, that this can only go on for a time. The amputating processes cannot be carried on for ever; and if, after the head has been severed, you also proceed to cut off the tentacula in detail, you must be prepared at last to see all vitality disappear. If we mistake not, it was a naval surgeon who was asked, on his examination by two gentlemen of the old school, what he would do in action were a man brought to him with his legs and arms shot away; and he answered very sensibly, "Throw him overboard and go to some one I could benefit." What shall be done with this Royal Commission, if its right leg and right arm, as well as its head, are to be taken off? What, but pitch it overboard? And who would value the report of a Commission of Inquiry when three of its members are converted into placemen?

The loss of this Commission, to say truth, would not distress us. The Committee on Dockyard Economy was cut up rather sharply by the Duke of Somerset, though that was decently after it had naturally expired. We can therefore witness philosophically, if the Commission itself can bear it, their cutting it in pieces while alive. We thought the High Commission at Whitehall itself was the anti-type of Pelias, and looked for some cutting up there; but perhaps this yet may follow, though the Dockyard Commission is first to be sacrificed. We are really more concerned as to the uses to which the *disjecta membra* are to be put. The head—Mr. Peel—we know, is to do all the calculations of prudence at the Treasury, and guide Mr. Gladstone for the future in wisdom's ways. A head could not well be better employed. But if Admiral Robinson and Captain Key represent mere inferior limbs, where they now are or recently were, how are they to be turned, as they need be, into heads of no little importance, by simply stepping into Sir Baldwin Walker's shoes?

What is there in these two Naval officers—or in any other two that might be selected—that qualifies them more for re-constructing the Navy of England than Sir Baldwin Walker? If too much, as we often and often declared, was thrown upon that able and energetic officer, why was not a coadjutor, or more than one, appointed to assist him, instead of two raw hands now being appointed at such a conjuncture as this? We shall not for a moment imagine that Sir Baldwin has abandoned his post, at a time of difficulty, till at least he felt his hands were tied, and that he was indeed controlled so effectually by the Board (which was Lord Clarence Paget's explanation why he was to be called "comptroller!") that he felt he was powerless for any good. But faith has not been kept with him, or with the public, by their Lordships. There is a large Blue Book, of which the Duke of Somerset ought to know something, containing the Report of a Committee presided over by one Lord Seymour, in which we find a very good ideal of Navy business with reference to the construction of ships. On May 9th, 1846, Lord John Hay was appointed the Chairman of a standing Committee of Reference on Naval Construction, the other members being the Rev. Dr. Inman, and Mr. Tucker and Mr. Abethell, shipwrights.

Digitized by Google

Again, in 1848, we find the Secretary of the Admiralty apologises to the Treasury for the appointment of Sir Baldwin Walker as Surveyor, on the ground that he is to be assisted by a "Council of Science as to the construction of ships;" and that "if the Council's opinion is not taken by him in cases of moment, it would be by their Lordships themselves." He was not to be held as responsible for the lines of vessels; and in selecting him, they "looked more to his knowledge and ability as a seaman, than to his qualifications as a shipwright."

This ideal Council of Science was "to consist of two of the most scientific shipwright officers, *and one or more competent persons not officially connected with the Admiralty.*" We wish to know when this Council was last summoned? If never summoned at all, as we shrewdly suspect, who is to blame? Finally, we emphatically declare that no naval officer can be expected to do better in Sir Baldwin Walker's place than he himself did, without the assistance and advice of an independent Board of Construction or Council of Science. If one man, or one with a deputy, is to control the building of our ships of war, then he must be a man of great scientific and mechanical skill in ship building. And never was there a time in our history when such qualifications were more immediately required than now, to decide what our Navy shall consist of in future. *Dum deliberamus quando incipiendum, incipere jam alium fit.*

The reconstruction of the Militia upon the basis advocated from the commencement in this journal, and substantially promised some months since by the Secretary of State for War, appears in a fair way of being carried out. In the War Office Circular issued last week, the principles of the change are for the first time put forth in the nature of instructions. The Militia is, in fact, about to be re-formed upon its proper footing, as a reserve force available only for national defence; and Mr. Sidney Herbert promises that after the 25th of March, when the Act expires under which so many regiments have been hitherto embodied, "the entire force will revert to its normal and constitutional state, as a reserve force to be annually trained, but not to be embodied except in time of national danger." This promise was an absolute necessity, preliminary to the acquisition of the new and more settled and respectable element, which it is hoped will be induced to fill its ranks. Although the system hitherto in vogue was in principle entirely wrong, we cannot say much in the way of blame. The national wants were sudden and immense, and they had to be supplied, no matter how constitutional considerations and permanent sound policy might be ignored. Unquestionably the Militia did a great deal to supply the gaps of the moment, and perhaps we could not have resorted to any better means of encountering our immediate necessities. But it is now time that the true and wise policy should prevail, and that the Militia should be made as far as possible to resume its distinctive position. For the last seven years it has not been easy to define it at all. It was one day disembodied, again going through a month's training, then made a "nursery for the Line," then an actual Line regiment in everything but the name, garrisoning our arsenals and colonial possessions in association with the regiments of the regular Army. It is unnecessary to say that, under circumstances and vicissitudes so extraordinary, the class of men that filled its ranks were, as a general rule, the same as that from which the Line was recruited, and that the Militia consequently came into constant competition with the Line. To prevent the continuance of this anomaly, and fill the two Services with a different style of men, are the objects of the Secretary for War. By limiting the military duties of the Militia to an annual training in its own locality, he hopes that men of settled habits will be induced to enter it. We have no doubt that after a little time his expectations will be realised, and that as soon as the force becomes really a paid volunteer body, under very little greater obligations to the State, artisans and men of that class of life will not object to engage in healthful recreation—for it is not much more—for one month in the year, with the future contingent duty of serving in the field in case of national danger. Mr. Herbert carefully enjoins upon commanding officers of Militia not to look for recruits among those who are likely to enlist for the Line. Thus the field of recruiting for the regular Army will be largely extended, while a class of men who are too good for the rough-and-ready uncertain life hitherto led by the Militiaman, but who are scarcely fitted pecuniarily for Volunteer corps, will be made available for the service of the State. "Men of settled habits and fixed residence within the county to which the regiment belongs," may not be at once obtained in large numbers; but when it becomes known that the Militia in reality has been restored to its purely local and defensive position, the recruits will not be looked for in vain among this class. We cordially welcome the "stringent orders" given to prevent Militiamen transferring their services to the Line. They never were intended to form a "nursery for the Line," and we have always held, if the Militia was a desirable element of national defence, that a Militiaman was, for his particular purpose, as useful as a Linesman, and that transferring a man from his regiment to the Line was almost as slight a gain to the country as taking a man from the 60th to put him in the Rifle Brigade. We want the Regular Army, the Militia, and the Volunteers. Let us nurture and develop them all, but let us apply to each the rules which belong to its own peculiar constitution and its functions in the great machine of national defence.

In reference to the statements and rumours which have been agitating Woolwich, and which have reached even the Metropolis in spite of the difficulty of postal and railway conveyance, we think it right to state that no positive decision has yet been arrived at by the authorities as to the mode in which the augmentation of the Royal Artillery will be effected, or as to the exact way in which the Tipperary Militia Artillery will be added to the strength of the Royal regiment. In fact, it has not been positively settled that the services of that very efficient body, whose readiness to join the regular Army *en masse* has given rise to apprehensions—very reasonable, and well-grounded—among the representatives of vested interests, shall or can be made available. Many erroneous assertions have been made in reference to the case. The regiment is not disembodied; and after what we have stated, it is needless to add that the arrangements for its transfer as the 16th Brigade of Royal Artillery are not complete. There would be a grave injustice done to the officers of the Royal Artillery by the dislocation of their seniority, consequent on the wholesale irruption of some twenty-five officers into their list. But the interests of the State demand that we should not lightly throw away at a moment of pressure the advantages to be gained by the accession of a complete battalion of as fine Artillerymen as there are in the Service, according to the testimony of the best judges. We trust that some means may be found of preserving the rights and justifiable *amour propre* of the Royal Artillery intact, and at the same time of securing the effective bone and muscle and discipline of the Duke of Clarence's Munster Militia for the country.

We continue to receive very favourable accounts of the experiments undertaken by Mr. Bashley Britten in the rifling of the present muzzle-loading ordnance of the Service, and the adaptation thereto of their own shot and shell, as well as of peculiar missiles of the inventor's own manufacture. He has hitherto mainly confined his attempts to the 68- and 32-pounder iron guns, using broad shallow rifling bands along the bore, which take one complete turn in 48 feet. His projectile may be described as more resembling the present Enfield bullet than anything else in shape. It is in fact an elongated shell with a base of lead, in which is inserted a wooden plug, and which, by the discharge of the gun, is driven into the lead, so enforcing the latter into the rifled bands. With considerable elevation he has attained a range of about 5300 yards, with a shot weighing 86 lbs., projected by a 7½ lbs. charge. As it is understood, that favourable reports have been made of Mr. Britten's principle, it is probable that, during the ensuing year it will receive from the authorities considerable development. He has at present presented to the nation the best solution of the difficult problem of bringing into effective and accurate use, its immense stock of ordnance materials; and if his efforts are pronounced successful, as they appear to be, doubtless the great importance of the service which he has rendered will be duly appreciated.

In another part of this journal will be found a letter from Mr. S. Isaac, of the firm of S. Isaac, Campbell, & Co., the army outfitters and clothiers, in reference to the transaction on which we lately thought it necessary to make some remarks; and we print it willingly, as Captain Isaac thinks those remarks did him an injustice. Captain Isaac thinks his conduct was "more delicate" than we have described it, and we leave him to tell his own story. We call our correspondent Captain Isaac, as he was introduced to us by that style and title in the printed letter of Colonel Levison (not Leverson, Mr. Isaac), on which our comments were founded, and we can only say that his report of the circumstances under which he presented his bill to General Garibaldi is very dissimilar to that to which Colonel Levison has appended his name. The rest of the letter speaks for itself, and requires no further notice from us than the reiteration of the statement, that our remarks were founded on positive assertions in the printed papers circulated through the Legion, and that they are minutely coincident with the very words of those documents; and, in so far, are opposed to several details of Mr. Isaac's lengthy narrative and *exposé des motifs.*

A weekly contemporary, whose announcements are generally more startling than trustworthy, announced last week that a serious mistake was made at the War-Office respecting the ammunition sent out to China for the Armstrong guns and Enfield Rifles; that, in fact, the wrong ammunition had been sent. This is not the fact. Some of the ammunition was undoubtedly injured by damp on the passage out, and was, therefore, not so effective as it ought to have been. This was especially the case with the time fuzes, but the wrong kind was not sent. Official reports have been received from China, carefully drawn up by the officers commanding the batteries; but though they mention some incidental points in the equipment of the guns, in which improvements might be introduced or defects remedied, no mention is made that any of the ammunition was of the wrong sort.

The manufacture of heavy Armstrong guns proceeds at so rapid a rate, that we may hope to find two or three of the heaviest description of ordnance added to the armament of all our first and second-class men-of-war and frigates before the end of next spring. It is not unlikely that means will be found to make our smooth bores as effective as the French seem to have done, by a system of rifling; and Sir William Armstrong may possibly be led by his experiments to the conclusion, that the breech-loading principle is not so well adapted as that of the muzzle-loading to the heavier kinds of cannon.

We understand that Rear-Admiral Sir Baldwin W. Walker, the new Commander-in-Chief of the Cape of Good Hope Station, has nominated Captain Richard H. Risk (1860) to be his flag-captain, and Mr. James L. Southey his secretary. Mr. Southey is now serving with Rear-Admiral Sir Robert Baynes, K.C.B., but is shortly expected home in the Ganges. The Commander of the Euryalus will be Commander Alexander Philips, only recently promoted from serving as first lieutenant of the Ariadne during the cruise of His Royal Highness the Prince of Wales.

We understand that not improbably some change will, before long, be introduced in the equipment of the Cavalry. Considering that our "Light" Dragoon horses are obliged to bear a weight which scarcely a horse can be found able to carry in the hunting field, it is time to do something to decrease the burden they are now obliged to struggle under. The public attention has long been directed to the fact, and we are glad that it now occupies the official mind, with the view of ascertaining how far improvements in this respect can be carried out.

It is with regret we hear Sir Edward Lugard's health has not been improved by his visit to Nice, as rapidly as his friends could have desired. The gallant General has, however, derived some benefit from the change of air, and it is hoped that he may be enabled to relieve Lord Frederick Paulet from attendance in discharge of his duties in the spring.

We are glad to state, as a step in the right direction towards the abolition of stoppages for equipment, that in future the cavalry soldiers are to be furnished gratis with stable necessaries, such as horse-brushes, curry-combs, sponges, corn-bags, &c., instead of having them as part of their kit as heretofore.

A vacancy in the list of Assistant-Inspectors of Volunteers will be created by the retirement of Major Buchanan of the North-Western Division, who receives a majority, we believe, in Her Majesty's 9th Regiment.

Lord Clarence Paget has taken a sudden alarm, for fear any news connected with the administration of our naval affairs should find its way into the papers. Monsieur Billault himself could not have been more sensitive or more ready to launch an *avertissement* than is, from all accounts, his lordship. A printed paper has lately been circulated by Lord Clarence, marked private and confidential, purporting to give a correct account of the French Navy. Much anxiety has been evinced to keep this document from the Argus eyes of the Press. There was not the slightest necessity for all this trouble. A list of the kind has been in our possession for some months, and we could have anticipated his lordship had we deemed the subject sufficiently important. In our impression of last week we gave what is probably the most interesting part of the paper, viz., a correct list of all the French iron-clad ships built and in course of construction. We should have thought that the more widely we circulated intelligence connected with the changes going on in the French Navy, the more should we be discharging our duty. Lord Clarence evidently takes a different view of the matter.

We fear that a greater delay than was originally anticipated will take place in the removal of the Admiralty department, now located at Somerset House, to Whitehall. The estimates for converting the houses in New Street, Spring Gardens, into convenient public offices, are greater probably than the present Chancellor of the Exchequer would think of entertaining; and he may naturally ask if "le jeu vaut la chandelle?" At all events, the money required should be drawn from a full, well supplied, and not a needy purse.

The Australian squadron will shortly be reinforced by the Jason, Miranda, and Harrier; the presence of a strong force on that station has been rendered necessary by the disturbances in New Zealand.

The examination for Marine Cadetships, which closed on Tuesday last at Portsmouth, was competitive.

"THINGS OLD AND NEW" IN WAR.

THE EXAMINER AND MACMILLAN'S MAGAZINE.

Some of our contemporaries have been unwittingly let in for a hoax, by an article, all for wood, and against iron-plated vessels in last week's *Examiner*. Famous as that journal has always been for advanced opinions, it was certainly somewhat surprising to read a previous article in its columns, based *super vias antiquas*, with respect to ships of war; but we had also had occasion to notice, that even the most critical of Weeklies was for some time very antiquated on that subject, and we hoped that time, and such articles as that in the last *Blackwood*, would do much to make the press unanimous on the point of the relative merits of Wood and Iron. The *Examiner's* article of last week, quoted in the daily papers, announcing the La Gloire to be a failure, denouncing the Warrior and all iron-cased vessels, and rushing headlong to hug with frantic affection our old discarded Princess Charlottes and Queens, was rather discouraging to our hopes, although we were aware that the paper had never quite recovered its circulation or its senses since the Crimean War, when it affirmed that whatever was was right, and that all the miseries of winter were the work of Special Correspondents, unacquainted with war, as the *Examiner* was. The gravamen of the charge against the armour-ships is that they are of wood and iron mixed—in vulgar phrase, that they are neither flesh nor fowl; and La Gloire is made out to be a failure on two pleas not quite reconcilable; first, that the French would not of course tell us her bad points, and second, that their account shows that the water gets into her port-holes at full speed. And all this is so very seriously written, that we confess we never suspected its *bona fides*, till we came to the concluding paragraph. There the whole joke became apparent; and there must be some want of "surgical instruments" among us, not to have seen the wit before. It was a very clever "sell."—What! After the *Times* had thundered; after the *Saturday Review* had quoted half Sir Howard Douglas, and come down to the last experiments; after the *Cornhill*, the *Quarterly*, *Blackwood* twice, the *Artisan*, the *Engineer*, the *Mechanics' Magazine*, and —to say nothing of our humble selves—all the press in short had discussed the matter and come to a common verdict,—was it possible that the refractory, stiff-necked juryman, with great capacity in his stomach and a very small round of skull, *who would not* give up his first notions, and *who would* hold out against everybody—independent in his stock of fat—should be represented by the once-brilliant *Examiner?* Of course not—now we see!

The concluding paragraph to which we refer related to the retirement of Sir Baldwin Walker, as Comptroller of the Navy; and it expressed a hope that the post might not be filled by any *head* having merely *wooden* notions! This threw light upon the whole matter. We heartily echo the sentiment. So much for the antique!—Now for the very newest notions on modern warfare! These are put forth—as well becomes—in one of the new Monthlies. A writer in the last *Macmillan*, who has been to see Mr. Rarey, and has had his mental state somewhat deranged by what he has seen, very wisely calms himself down by writing an article, which has been not quite so wisely published, without any pruning, under the title of "Horsebreaking in the 19th Century." Its opening sentence is ambitious and rather startling:—"Since the day when to man was given dominion over the fish of the sea, and over the fowls of the air, and over the cattle, and over all the earth, there is no record of any new attempts on his part to turn his sovereignty to use." *Ergo*—if all is meant—saddle-horses were common in Paradise, and Cain and Abel, in their baby-days, drove in goat-carts as our children do in Hyde Park now!

He canters rapidly off on his hobby. "We are in truth a horse-loving nation. To us riding seems nature." And of course, with this impulse, he soon flies from Mr. Rarey to the debate on light-weights in the House of Lords, and warns us "not to deem this, in our gravity, a thing wholly insignificant." But when we had got so far, we were fairly grinning—far from grave, and we certainly did not become more so on finding that "national pre-eminence on horseback" was a truth prefigured in the fables about Centaurs and Amazons, "that the first horsemen were half divine, and the first horsewomen more than a match for men." Many a riding-habit in our own day has proved the last proposition against red coats, while snugly riding under cover! "Shall it be said," the writer exclaims, "that now we are a nation of riflemen, and not of horsemen?" "With all deference to ardent Volunteers," he answers, "No!" and admitting the propriety of "loose formation" and the "rapid dash of swarming skirmishers," he comes to his grand thesis, "So it must be with cavalry, too." Mr. Rarey, from the far west, has visited us, and here is how the thing can be done:—

"The difference between a mounted rifleman and a foot rifleman lies in the greater height and bulk of the horse. But make the horse lie down, and very little difference remains. What will shelter a man will in almost every case equally well shelter a horse lying on the ground. Moreover if in any particular situation there is not cover for a horse, even when lying down, it is pretty certain that at a very short distance sufficient cover can be had. There will be found a rising ground, a clump of trees, a hedge, a bank, or a dry ditch, any of which will quite serve the purpose. Here let the riflemen dismount, cause their horses to lie down, and leave them, perhaps, in charge of one of their number." [sic!] "While the skirmishers steal on from point to point, the horses remain close at hand, yet in safety. Suppose that the skirmishers drive the enemy back, and wish to make a further advance; or suppose they are themselves threatened, and wish to retire with all possible speed—in either case a call brings each horse to his rider's side. What immensely rapid advances [the writer carried away, exclaims!] could thus be made; how closely might the light troops hang on an enemy's flanks; how daringly might they cover a retreat, when every distance of any length could be traversed at a gallop, and the means of rapid flight in case of surprise was thus ever within call!"

We regret we cannot afford space for all the writer says. But here is how the cavalry difficulties of riding across country, when inclosed as in England, are got over:—

"Here also Mr. Rarey can help us. Horses taught, as he shows us how to teach them, will follow their masters over a fence as handily as a dog. Coming up, then, to a rasper, our armed hunting-man must for the moment forget that craning is an unknown word in his vocabulary. He must have the goodness to dismount, to push his way through the hedge, or to climb over the gate (supposing he cannot unlock it, which I trust he would always have the sense first to try), just as he would have to do were he a skirmisher on foot. When over, he calls his horse to him. Over, lightly as a bird, skims the horse. Up jumps our skirmisher, and in a moment is at the next fence, to pour his fire into the secure camp beyond, or the slow winding column in the hollow road below. . . . The game is in our hands. So soon as the tide seems likely to turn, our light cavalry are off. By the time their protecting hedge is passed by the enemy they are through the next hedge, and half-a-dozen more are placed between them and pursuit ere this one is reached by the pursuers. Will any one say that men and horses trained thus and used thus, might not half bait their foe to death ere the foe could reach an open battle-field?"

In all this there is an excellent "bait" for *Punch*. In rapidity of conception it even beats Mr. James's flight from Italy! It beats the Flying Dutchman himself! The writer's own gloss should follow:—

"I do verily believe that in all this a development of the science of war is opening to us such as the world has never yet seen; and such as will make the nation which first sees it mistress of the world, whether she cares to assert her sovereignty or not. . . . Such are some of the practical results which, in a practical age and to a practical race, it is needful to indicate in order to win a respectful consideration for any novel system" !!!

Of course everybody has longed to be "there to see," when next John Gilpin rides abroad; and so, with this hippodromatic Rarey-show! Surely our severe contemporary, the *Saturday Review*, will now be completely satisfied, after reading such a sustained piece of "practical" joking, that it was quite a mistake to deny great powers of "wut," and even of considerable fun, to at least one of the writers in *Macmillan's Magazine*. The person who could write it "in all gravity" must be clearly beyond the influence of all "surgical operations." It must be about time to shave his head!

SOME HINTS ABOUT THE CHINESE.

[FROM A CORRESPONDENT.]

MY DEAR R . . . . .,—We have got into such an egregious mess in China, and are making such a fuss —"kicking up such a bobbery," as John Chinaman would say—that I really must express my feelings of disgust at the solemn farce, which is likely to end in a dismal tragedy for all concerned, unless we look to it in time.

It is sheer perversity and mischief to persist in treating the Chinese like any ordinary foe, and to seriously make war upon them as a nation, or to accept anything they may do as a national insult. If a saucy imp of a gutter-jumper takes a sight at a full-grown swell, the latter does not take off his coat and wipe out the insult by a pitched battle in a series of rounds, although he might be capable of doubling him up or knocking him into the middle of next week; but if the insulted swell thinks it worth while, and the opportunity is offered, he applies a fundamental kick with a point of the toe, which will answer every necessary purpose of warning, vengeance, and example.

So the Chinese, who—compared with us morally and intellectually, are merely overgrown children —should be treated simply to a castigation, without further interruption of mutual friendly relations. This was our practice in the old time, and proved effectual enough then, even when we were on a more equal footing, and before steam and rifled guns gave us long odds in our favour. In a case of necessity, even a merchant skipper thought nothing of taking a fort and licking an Imperial squadron, if they were bumptious, in an interval between his bargains.

The Chinese have in this late stupid business given us some fine opportunities in this way, and have really put us under some obligations, if we had only the sense to profit by them,—in burning down the factories at Canton, for instance, which had been much too small and confined for the increased demands for space. We should have shown them that two could play at that game, and have extended the conflagration for a gun-shot round the devastated site of the factories. On this extended space, and under cover of the guns of our ships, new factories might have been erected, with an open space all round, on which the Chinamen would not have been permitted to infringe, and, my life on it, they would have entered into the spirit of the new arrangement, and would have rebuilt on the frontiers allotted to them, and have carried on their trade as cheerfully and profitably as usual. A couple of gunboats on the flank of the factory, and a company of Marines on shore, would have sufficed to save it from future insults, and, as an additional guarantee, the mandarins might have been warned that a similar procedure would be observed on every occasion, and at every port, if they proved troublesome.

This would have been less glorious, but more business-like, than sending a quantity of soldiers at a fabulous cost, to die of samshoo and malaria. If I had my wicked will, there should not be a single English soldier of the Line in China. I would begin by taking possession of Cowloon, and as much ground as may be required for the factories at Canton or Honan. In either place, with a couple of gunboats and a hundred Marines, our people should hold their own against all China, and for police purposes, a corps of a couple of hundred men might be raised in Ceylon or India.

Any governor or admiral who then ventured to allow himself to be insulted, and sat on his hunckers and roared till help came from the opposite side of the globe, should be kicked out. Pretty fellows Pizarro and Vasco, Nunez and Cortez would have looked, if they had counted heads and whined for help, instead of making fortune and safety depend on their right hands. With such scrupulous and timid warriors and counsellors in India, we should now be negotiating for the abolition of black-holes, and the privilege of direct intercourse with Dum-Dum. With such safe and sure strategy the Mantchus would have barely ventured more than a run-a-way knock at the gates of the Great Wall. They set us a lesson which, without squeamishness, we may now read them, and which will not hurt the Chinese, or do much harm to any one. The Mantchus are so few, compared with the aborigines, that they might any day be swallowed up without sufficing for a meal. They might be buried under the fans, or lost under the piles of chop-sticks in daily use. They nevertheless have ruled with bows, arrows, and pop-guns, securely enough till recently—scattered over the empire in small numbers, but in strong positions where teeth, fans, and chop-sticks, could not have fair play. Let us be the Mantchus at Canton and the six ports, or at any other port, point, or island which may suit our convenience, which possesses sufficient military and commercial advantages, instead of going about attacking 300,000,000 people at the risk of upsetting the entire social fabric, which is not calculated, either in its material or proportions, to stand rude shocks; let us sit down in strong places and be attacked, and we shall live long and die happy without seeing any serious attempt to turn us out.

The Chinese would wish for nothing better. They do not love the Mantchus a whit more than they do us. They look upon their own position as an inevitable, uncomfortable necessity, which only becomes utterly unbearable when pressed on one side by red devils, harassed on the other by Tartar devils, their houses burnt, their trade stopped, their villages harried, and their equanimity quite upset: they wish all their tormentors were consigned to Hades together.

Let us then turn the Tartars out of Canton and the other ports, and take and keep the forts and rule the cities; or, if too scrupulous to go the entire animal, let us take ground for factories, and occupy it in spite of Tartar or any other devil. It would be all the easier and pleasanter for all parties that there need be no question of indemnity. The sale of lots for building, or money raised on debentures secured on the land, would suffice to pay for everything, and would leave a surplus for the erection of public buildings and fortifications, and for making such roads, quays, and gardens, as might assist in disabusing the Chinese regarding our exclusively barbarous and sordid propensities.

It is not too late, even now, with our troops at Pekin, to revert to a more reasonable and proper policy. It was an egregious blunder to put ourselves in a false position, which has ended by our being egged on and on to do that which may prove more injurious to ourselves than to the enemy,—which when most successful, is most mischievous. We are in Pekin, and what then? Are we to sit down there till the Emperor returns from Jhehol? And did he return and sign a treaty, should we be one iota better off in any respect? Would he, who never kept his spoken word, keep his written promise; or must we repeat all that we have recently twice done, each time he grumbles or boggles over his bargain? The visits would be endless—the devastation perennial— and even the present Chancellor of the Exchequer might object to the cost of the plasters to our wounded honour or vanity, without incurring any fair suspicion of personal motives. But the Emperor may not return—no pope is more infallible—no despot more immovable. He has been in worse straits with the Tai-pings, and has not winced; they have occupied his southern capital and devastated his provinces for the last ten years, and he has made no sign. What are present evils to Chinese dynasties, which last for thousands of years! War, pestilence, and famine, are to be borne with like patience, and a good time is sure to come again. So the Emperor may not budge for us any more than for the Tai-pings.

What then? Are we to follow him into Tartary? Or are we to make a treaty with the municipal

Digitized by Google

mandarins at Pekin, after refusing to do so with the Imperial mandarins? Or shall we coax him to sign fresh treaties, not worth the material they are written on? It would be as useful to treat with the Tai-pings —blasphemers, murderers, and robbers, as they are. It would be better to put San-ko-lin-tsin on the throne, if we could leave him there in safety. It will be best of all to march back after the example we have made, and the plunder we have got; and, on the strength of having proved our capacity to go to Pekin, never to repeat the operation.

If we want further revenge or indemnity or security, instead of a treaty, let the French take Chusan, and we can take Formosa or Saghalien, at the mouth of the Amoor, in the road of Russian aggression from Mantchuria southwards, unless, as I believe to be the case, the Russians have already absorbed it, without previous notice or advertisement, in their usual great boa-constrictor fashion. It would be folly to qualify the wrong of taking an island by taking a little one, or a sickly one, or one that no one else would take, or accept, as a gift, like Hong Kong. If we are to have the obloquy of sacking and looting, let us get something for it, and take an island, or a group of islands, worth the wrong and the shame. Nothing less than Formosa or an archipelago should do. No impracticable Hong Kongs, none of your petty peccadilloes, which make up in number what they want in magnitude; but a good, swingeing, barefaced robbery, annexation, or rectification, call it which you will, The world is sick of your little-minded filching, nibbling, petty-larceny dealers in contraband goods, who compound with their consciences, and are justified in the eyes of the saints, provided, like the servant girl, they can plead the smallness of their error. We want a Clive, or a Warren Hastings, one of your wholesale unscrupulous plunderers, imperial filibusters, who take an empire in the lump. There would be nothing to prevent us, not even precedent, from disowning the robber and consigning him to infamy, after escheating the proceeds of his villainy for the public good.

Without joking, however, we are in a very nasty dilemma, and the trump card is in the Emperor's hand, if he chooses to be obstinate—a characteristic rarely found wanting in the Chinese or Tartar idiosyncrasy. We can't remain for ever in Pekin. We shall find a single winter unpleasant enough; particularly if the Tartars take to harassing us on our line of communication, and the Chinese to burn our quarters about our ears; when the water communication is frozen up, and the *vent poudré* comes howling across the frozen plains direct from Kamtschatka, without the chill off. After such a winter we shall barely be in condition for facing cheerfully the heat, and ague, and typhus which will come in with the summer.

We may then be obliged to do what might have been pretty evident before we started on our evil errand—set up another dynasty in the place of the one we have expelled, and bear the consequence of the act, as at Lucknow, by being compelled to haunt the scene of our wickedness and digest its bitter fruit in the too long leisure which may remain for repentance and regret; or, if there be yet time to retract, let us be satisfied with the mischief we have done, leaving a warning behind that we will not treat with a prince who dare neither keep his word nor defend his falsehood, but that where wrong is offered, there we will exact full compensation.

Such a policy would be in character with the Chinese practice, and would be clear and comprehensible to all parties, particularly to those in contact with us, who would be careful to avoid bringing down sin on their own heads. Moreover, it would cost us little, and do little mischief beyond the peccant part. Topical remedies are the only ones for a constitution so diseased: more vigorous treatment may not only save the patient dead on our hands, but may also throw upon us the duty of providing for the destitute family.

PEREGRINUS.

PARIS.

[FROM OUR OWN CORRESPONDENT.]

It appears that great difficulty was experienced the other day in persuading the Duke of Malakoff to accept the supreme command in Algeria. His open objection to the situation was that the Imperial Government left too much power in the hands of the civil authorities, and it was hardly probable that he would give up his present quarters in the Faubourg St. Germain, and a gilded coach equal to that of his most Worshipful the Lord Mayor of London, in order to have his arbitrary measures thwarted by a prefect and overruled by a minister. Marshal Pelissier saw no service during the Italian war. He did not make his entry into Paris at the head of troops which he had recently led to victory. At the command of a corps d'armée, he had passed his summer idly watching the Prussian frontier, and a war was commenced and concluded before he had a single opportunity of gaining another riband. It was, then, hardly to be supposed, when coming events are casting so deep a shadow before them, that the veteran Marshal should readily yield even to the solicitations of the Emperor to put up with a colonial command. The 1st Emperor, somewhat hurt at the freedom of Lannes, once sent him, as he himself expressed it, to "suck oranges at Lisbon," and the nephew would willingly follow this good example of getting rid of a troublesome customer, and send Pelissier to munch dates at Biskra. It required, however, some management to start the Duke: he had no wish to let slip another European opportunity. Though at the top of his profession, and tattering with honours, he has no idea of making a couch of his laurels, or hanging up his sword against the wall. The Emperor to persuade him, made use of the following remarkable words: "I must have a man of energy and ability to command along the Coast of Africa in case of a war with England." This is not a mere idle report. These words were really made use of by the Emperor; but, whether they were employed for the purpose of persuasion, or from the conviction that a misunderstanding between England and France was probable, is a matter for some consideration. They had the effect of the former supposition. They decided the Duke, who, on obtaining the assurance that his military rule should be despotic, and beyond any control but that of His Majesty, accepted the governorship, and he announced this intention to the Council thus: "I will not say anything of my ability, but I am certainly possessed of energy." Poor Algeria, who has long been complaining of King Log, and now, as is said of our Ionian islanders, they have got their King Stork. The littoral of the Mediterranean is a powerful Italian position. It only requires 48 hours to take troops from the African shore to the opposite coast; and Africa, now more of a military school, and less of a colony than ever, is a standing menace to the increasing power of Italy.

The *infans de troupe* of the Imperial Guard of Infantry have just received their new equipments, which are exactly the same as those of the regiments to which they belong. Small muskets, to the number of 150, have already been distributed amongst them, and the move is not as was at first supposed confined to the grenadiers, but extends also to the Voltigeurs, Zouaves, and gendarmerie. It is hardly possible to imagine the aptitude of the boys in learning the use of their arms. Notwithstanding that their course of instruction has only recently commenced, they are already firing.

A curious case of ownership is related here. A steam-frigate belonging to the fleet of Francis II., now enjoying the title of the late King of Naples, was sent to Toulon before the beginning of the revolution to be repaired. When the sovereign left his capital, the French Government caused the works which had already been commenced on the Sanita to be suspended, and shortly after this an officer arrived from the head-quarters of Garibaldi, asking, in the name of his chief, that the reparations should be continued, a demand which was immediately acceded to. The Sanita is now fit for sea, but Francis II., still holding out at Gaeta, she has been refused to the King of Sardinia. By way of solving the problem "of what should be done in the matter," the crew have been sent back to Naples in the Vesuvio, and the vessel still lies at Toulon awaiting the result of the siege, which is to decide everything.

The Phlégéton, with invalides belonging to the expeditionary corps in China, has arrived at Cherbourg. The Suez and Capricieuse, sailing vessels, are also expected at Toulon.

A large sum of money is about to be expended in improvements at Havre, and a plan presented by the engineers has been approved of. The town is not well defended, and for some reason or other considerable works defending it have not been completed. They were commenced under the present Emperor, and several forts of brick were raised by skilled English labourers, who were had over for the purpose. In the port one of the principal changes will be to convert the ground now occupied by the citadel into a carcening dock, in connection with the outer port. A quay is also to be constructed of about 1500 feet long for mooring vessels.

The Pourvoyeur, a French brig, left Havre yesterday for Toulon, laden with the detached pieces of two iron lighters, which have been made for the public service in New Caledonia.

On the arrrival, about six weeks ago, of better news from China, some French troops who had arrived at Alexandria on their way out were recalled. They are now to re-embark. The steam frigate Eldorado sails in a few days, taking out a large quantity of ammunition, clothing, &c., &c. The Ulloa is also to sail for China at the end of the month. The steam-corvette Caton has left Toulon on a secret mission. A boat of most novel construction is spoken of at present, which, on being capsized, will not only right, but disengage herself of the water. The interior of this boat, which is most peculiar, and a mechanical contrivance both simple and ingenious, produce this effect. We are promised in a few days some experiments upon the Seine.

The Algesiras and La Gloire were to have taken another trial trip which, however, has been postponed until further orders. The reason for this is stated to be that the Algesiras had commenced to repair some valves that had got out of order, and the final trial of La Gloire in a heavy sea must be waited for.

A military commission is now engaged at Vincennes in making several trials with artillery, it being proposed to adopt certain modifications in the new material. The experiments are to last ten days, unless (which is not at all unlikely), they are put an end to by the bad weather.

Some foot soldiers belonging to the Imperial Guard and wearing their new uniform, were inspected by the Emperor. It seems that the long great coat is to give place to the tunic, which has already been introduced into the line regiments since the Italian campain. The tunic hardly resembles ours, which covers that portion of the nether garment most accessible to the ravages of time. The French tunic is much shorter, coming to an untimely end on the men's hips, but it has this advantage over ours in being made with considerable taste, open a little at the side, decorated with a few brass buttons, and braided with a yellow cord, which gives it a jaunty appearance. The tunic to be adopted in the Guard is to be deep blue set off with white frogs, which will take away from its otherwise sombre look, and will have a very good effect when the men are in line. The cross-belts are to be supplanted by a waist-belt, which will be a great improvement.

It remains to be decided if, in order to complete this uniform, the capote shall be exchanged for the cloak. The cloak is said to be possessed of great advantages, but many general officers have pleaded in favour of the retention of the capote, which is so easily carried in a march.

Orders have been received from St. Petersburg directing the purchase in France of 1000 rifled carbines, which are supposed to be intended for models. The Emperor Napoleon has given his consent to the forwarding of these arms. The Sardinian government has purchased at St. Etienne, Grenoble, Besançon, and Lyons, no less than 70,000 muskets of the old brown Bess quality, which 1500 men are engaged night and day in rifling. Sardinia is determined not to be taken off her guard, although it is not supposed that she will lend her countenance to any adventurous policy which the Garibaldians and their leader may wish to adopt in the spring. The next step which the great Italian liberator will take will most likely be in the direction of Pesth; and the rapidity of General Türr's movements, who has lately visited Caprera, gives colour to the report. An American house is said to have made an offer to Garibaldi of six steamers, to be armed with Armstrong guns: steamers, guns, and all, to be paid when Garibaldi finds himself in command of a *corps d'armée*. The proposal is further stated to have been accepted. However this may be, a large quantity of cannon of heavy calibre have lately arrived at Genoa for the armament of a couple of frigates, and the foundries of Turin and Parma are working hard at rifled cannon.

It will be interesting to know that the Russian government is taking measures to re-people the Crimea, several families having already been sent there.

LUMPS FORT.

On the site of an old battery, about a mile to the eastward of Southsea Castle, a fort has just been turned out by the contractors, and will in a few days more be handed over to the engineers who planned it. It mainly consists of two faces abutting on the sea, with flanks or shoulders on either side to sweep the beach to the east and west, and a gorge, filled in by a plain brick wall, in the centre of which is a small barrack for the garrison. The whole is surrounded by a wet ditch, served by sluices from the sea at high tide, half across which stretch caponières, stone-cut and loop-holed and a sliding drawbridge, worked by a windlass, admits the visitor to the enceinte. Here he finds the earthen parapets of the flanks and faces are pierced for 17 heavy guns, which will probably be 68-pounders, of 95 cwt., solid shot, and others of 8-inch hollow shot, of 65 cwt.; these being the classes of ordnance now adopted for the use of heavy sea batteries. The shell recesses and shifting-rooms beneath the guns, cut out of the earthen parapets, and the racks for the artillery side-arms, are all well placed for service; but we take leave to question if the magazines on either side ought not rather to have been fixed as close as possible beneath the protection of the parapets, than exposed to a plunging fire at the rear of the enceinte. Three or four lucky shells pitching near the same spot in the earthen camp, might blow the whole affair sky-high. And therefore, in future erections, we would suggest that it might be as well to avoid all possible chances of such a contingency.

Built on the very edge of the sea, fronting the great Horse Shoal, which men still living assert within their memory was dry, cultivated ground, it is evident that the ocean is gradually gaining on the land at this point, and that due allowance has not been made for its encroachments. It is time that it was intended to build a sea wall between the ditch and the sea-shore; but great difficulties have presented themselves in finding a foundation, and it is clear that, unless pile-driving, or some such engineering contrivance is resorted to, a few years will suffice to fritter away every trace of one of the neatest bits of workmanship over which the Union Jack ever floated. If anything were wanted to confirm this opinion, it may be found in the fact that, about half-a-mile further down west, the old fort of Eastney has been completely cut in twain, and one-half already swallowed up in old Ocean's relentless jaws.

Standing on the crest of the glacis, and looking about as to the service this fort is expected to perform, we presume that it is mainly intended to sweep the beach, and prevent a boat landing between Southsea Castle and Eastney. Its guns could injure vessels in the Channel, more especially if iron protected, very little, if at all, and therefore, for the former purpose, we submit that the armament is of too heavy a nature, and might advantageously be exchanged for howitzers, at any rate, with the exception of these heavy guns firing en barbette from the cavaliers. Complaint has been made that the gorge is unprotected, save by a brick wall, very slightly loopholed; but to this we attach very little importance, insomuch if an enemy landed in force, and surrounded the work with riflemen, it must immediately fall; the more so, as its command over the country is of so slight a nature, that from the edge of the glacis the enceinte can be distinctly seen through many of the embrasures; a feature in modern fortification, in itself of a novel, and not of a very advantageous character.

A word, in conclusion, respecting the barracks, many points of which are open to serious objection. There is a small quarter-room for an officer adjoining a store, and facing a servant's room; this, though not desirable, we could admit, but why it should be fixed next to the "rens" we cannot imagine. Why, too, we ask, should the "woman's privy," conspicuously so printed in large letters, be placed right in the middle of the parade, outraging all ideas of decency and propriety? The barrack-room for the men is fitted with forty beds, but although by the recent warrant this number would be entitled to bring with them some five or six women, no married accommodation has been provided. Nor can the poor creatures obtain shelter anywhere in the neighbourhood; but when their husbands are sent out here, they must remain in Portsmouth. What, therefore, is the use of the benefits which the Secretary of State confers on the soldiers of the army, if they are thus to be neutralised by the forgetfulness of those whose duty it is to apply them? and how can the Service be popular when the rights of the men are so completely overlooked? There is a pump, exactly where a pump ought not to be, in the centre of the little parade, and destined to many an uncomplimentary remark from the sergeant-major in his drills; but we see no signs of a canteen, or skittle-alley, or fives'-court, though all might have been added at very little expense. It is some time before the place can be occupied on account of the want of fresh water, which has not yet been provided; and as we cannot help thinking it is undesirable that these omissions and commissions should remain overlooked and unaltered, we trust that our remarks may receive attention between this and April. We may add that it is far from advantage to the Service that officers and men should live in juxta-position and under one roof; we trust a separate residence will be built for the use of the former, and that quarters for a master-gunner, who will have charge of all the valuable stores, will not be entirely forgotten.

ROYAL GEOGRAPHICAL SOCIETY.

A crowded meeting of this society was held on Monday evening; Sir R. I. Murchison, Vice-President, in the chair.

Among those present were Lord Clyde; Sir Henry Rawlinson; Sir John Lawrence; Sir W. C. Trevelyan; Sir Henry James; Sir Henry Martin; Sir Thomas Fremantle; the Right Hon. H. U. Addington; Capt. Alexis Antipoff; Generals Monteith and Rumley; Consul Petherick; Cols. Yorke, Gawler, and Dickson; Lord Strangford; Messrs. Collinson, Sherard Osborn, Allen Young, Martin Petrie, Merivale, Oliphant, Duncan Macgregor, and Arrowsmith.

Dr. J. Cornwell, Ph. Dr.; Lieut.-Colonel Lothian Dickson; Sir Jamsetjee Jeejeebhoy, Bart., of Bombay; Dr. E. J. Pearce, Ph. Dr.; and A. M. à Beckett, W. R. Looker, J. A. Mann, G. Philip, and W. Spencer Stanhope, Esqrs., were elected Fellows.

The Chairman read a letter from Dr. Baikie (of the Niger Expedition), dated Bida, Núpe, April 24th last, announcing his arrival at the above place, hitherto unvisited by Europeans, on the 19th instant, and stating that he has been everywhere well received; that he had found the country extremely mountainous and well cultivated, the products consisting chiefly of the oil of the palm tree and cotton, the latter excellent.

Captain R. Sprye and Mr. R. H. T. Sprye in the first paper adverted to the several erroneous "notions" and misrepresentations which had been circulated respecting Western China. Dividing China Proper into equal moieties by the 111th degree of east longitude, a detailed account was given from the best authors—including Du Halde, Le Compte, the Chinese Repository, Murray and Crawfurd, Davis, Williams, Huc, Osborn, Oliphant, &c.—of the two western provinces nearest to eastern Pegu, viz., Yunnan and Se-chuen. A more succinct account followed of the four western provinces, Shen-se, Han-su, Quang-si, and Quie-chu; and the four more populous and cultivated central provinces of Ho-nan, Hoo-pe, Hu-nan, and Shansi, a portion of each of which lies west of the assumed longitudinal dividing line. The result of this review of the western half of China Proper, with which England has no commerce, showed that it comprised an area of 600,000 square miles, of which at least 25,000,000 of acres were cultivated, 100,000,000 of people exclusive of the independent hill tribes, 70 cities of the 1st, and 400 cities of the 2nd and 3rd orders, with numerous forts and garrisons; and that, enjoying the advantage of every variety of climate, this western half of the empire yielded, in commercial abundance, gold, silver, quicksilver, cinnabar, vermilion, copper, iron, coal, millet, rice, wheat, rhubarb, and other valuable drugs, musk and odoriferous flowers and woods, indigo and other brilliant dyes, wax, honey, cinnamon, lemons, oranges, pineapples, pomegranates, and other fruits, precious stones and variegated marbles, horses and mules, tea, silk, the grasscloth and other textile fabrics, wool, goats' hair, sables and other furs, with skins, hides, &c., &c., &c. The Chinese of those provinces, equally desirous of acquiring riches by commerce and trade, as anxious to become possessed of things useful or agreeable though foreign, are as skilled in traffic as their fellow-countrymen of the seaports, being far more independent (from distance) of the Imperial Court at Pekin. According to Sir Stamford Raffles, "India cannot manufacture sufficiently cheaply or abundantly for the Chinese—England can.

The geographical position of Esmok (written "Se-mao" in the Jesuits' map, and Sz'-mău in other maps), the frontier town of Pu'r'h, the most south-western department of Yunan, the capital of which department, Pu'r'h-fu, stands in 23·02 north latitude, 101·10 east longitude, and distant from Peking 6805 li. Esmok appears to be on the north or left bank of the Ta'vai'ho, a tributary of the Mei-Kong (Cambogia) river, which it enters south of Kiang-hung, and the Burman Shan town of Muang-ha, one of the twelve petty Tswabwa-ships under the Tsenwibwa of Kiang-hung. Many Chinese merchants, with caravans of ponies, mules, and donkeys, pass to and fro through Esmok, trading between China, the Laos States, and the Siamese and Burman Shan States of Zimmui, Meni, &c.

The paper stated that Esmok was within about 250 miles of our north-east Pegu frontier, at the point of the Salwan river; and that the intermediate Burman Shan princes were not only consenting to, but desirous of the establishment of such a commercial route between British territory and China, across their states.

2. The second paper, by Dr. M'Cosh, late of the Bengal Medical Staff, was, "On the Various Lines of Overland Communication between India and China." The author proposes the appointment of a scientific mission to survey and report upon these routes with a view to the selection of the best. Of the five different routes he gives the preference to the one by Munnipu'r. There is good steam communication from Calcutta by Dacca and Sylhet to Banskundu, on the Barack; thence a good road to Munnipu'r, an inferior one to Mong-fong, on the great Ningtse; and a road might easily be constructed to Bamo on the Irawadi, where the great line of communication between China begins, and leads up the valley of the Pinlang into Yunan. In this province the main channels of the great rivers of Martaban, of Cambodia, and of Nankin, are in close proximity. Thus if an expedition leaving Calcutta on the 1st of November could be at Munnipu'r on the 1st of December, on the Ning-tse on the 15th, at Bamo on the 1st of January, across the Chinese frontier on the 1st of February, and safe in summer quarters in the mountains of Northern China and Tibet before the hot season, early in October, it might cross over into Assam by the line of the Dihong, after having settled the still doubtful course of the Tsan-poo, and be again in Calcutta on the 1st of January. At Bamo an annual trade, estimated 30 years ago at 700,000*l.*, is carried on between Burma and China, which, if thrown open to England, might be more than doubled. Before any expedition could be allowed to cross the Burmese or Chinese frontier, Dr. M'Cosh mentions that passports from both these courts would be essential. Such a commercial line, if ratified by a tripartite treaty between England, Burma, and China, could not fail to add another link to the world's chain of communication, second in importance scarcely to that of the Isthmus of Suez or of Panama.

After the reading of the papers an animated discussion ensued, in which the Chairman, Mr. Crawfurd, Sir John Davis, Captain Sherard Osborn, Mr. Laurence Oliphant, and Mr. Lockhart took part. The meeting adjourned to the 14th of January.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BALFOUR—December 9, at 32, Pulteney Street, the wife of Captain Balfour, late 7th Dragoon Guards, of a daughter.

BINGHAM—December 13, at 51, Portland Place, the Lady Cecilia Bingham, of a son and heir.

BURR—December 3, at South Camp, Aldershot, the wife of John Burr, Esq., Military Train, of a daughter.

CHESNEY—October 31, at Calcutta, the wife of Major George Chesney, Bengal Engineers, of a daughter.

DENNEHY—October 19, at Papamou House, Allahabad, the wife of Captain Dennehy, of a daughter.

GRAHAM—December 11, at the Admiralty, Whitehall, the Lady Hermione Graham, of a son.

HICKS—December 4, at Gipsey Hill, Norwood, the wife of Jas. C. Hicks, Esq., 18th Hussars, of a daughter.

HOOPER—October 20, at Dinapore, the wife of William Roe Hooper, Esq., Assistant-Surgeon Bengal Army, of a son.

JAMES—October 31, at Kolapore, the wife of Captain H. H. James, H.M.'s B.N.I., of a son.

KENNEDY—December 9, at 14, Prince's Gardens, Prince's Gate, the wife of Colonel Clark Kennedy, C.B., of a daughter.

MARRIOTT—December 9, at Gillingham, on board H.M.'s ship Mercury, the wife of Lieutenant George Marriott, R.N., of a daughter.

OLDFIELD—October 30, at Mauritius, the wife of Captain Oldfield, 5th Fusiliers, of a son.

POLLOCK—November 10, at Rawll Pindee, the wife of Captain F. R. Pollock, Acting-Commissioner, of a daughter.

SOMERS—December 6, in London, the wife of Henry Somers, Esq., Surgeon 55th Regiment, of a son.

WARD—December 6, at Willey, near Farnham, Surrey, the wife of Captain Owen F. Ward, of a daughter.

MARRIAGES.

GIBSONE—HALLETT—December 8, at Petham, Kent, by the father of the bride, assisted by the Rev. J. Wilkinson, Captain Gibsone, 17th Lancers, eldest son of Colonel Gibsone, of Pentland, N.B., Commandant at Maidstone, to Mary Anne, second daughter of the Rev. James Hughes Hallett, of Higham, vicar of Petham.

HEYWOOD — APTHORPE — October 27, at St. John's Church, Secunderabad, Deccan, East Indies, by the Rev. T. D. Ostrehan, assisted by the Rev. Alfred Kinlock, J. J. Heywood, Esq., Lieutenant and Adjutant 1st Battalion the Royal Regiment, to Annie, only daughter of Brigadier East Apthorpe, C.B., K.S.F., commanding the Hydrabad Subsidiary Force.

MULCASTER—PRESCOTT—November 7, by the Rev. G. Henman, Frederick Montresor Mulcaster, Esq., late of the 12th Royal Lancers, and Charlton Park, near Canterbury, to Georgine, youngest daughter of the late Captain George Prescott, 7th Royal Fusiliers, and relict of the late Thomas Baker Bass, Esq., of Dover.

SQUIRE—COOKE—December 5, at Withycombe Raleigh, by the Rev. Sir Charles M. Clarke, Bart., rector of Hanwell, Cecil Squire, Esq., late Captain 2nd or Queen's Royal Regiment, to Jane, daughter of Otho Cooke, Esq., of Withycombe House, Devon.

WARLOW—HAMILTON—October 27, at the Cathedral at Madras, John Picton Warlow, Esq., 5th Regiment, M.N.I., son of the late Captain Warlow, Bengal Engineers, to Josephine, youngest surviving daughter of the late Joseph Hamilton, Esq., M.D, of Queenstown Heights, Canada West.

WIMBERLEY—BLAIR—October 23, at Simla, Edwin Balfour Wimberley, Esq., B.A., Trinity College, Cambridge, of H.M.'s Indian Army, to Constance Cordelia, daughter of the late Colonel C. D. Blair, C.B., formerly of the 8th Bengal Light Cavalry.

DEATHS.

BURNEY—December 11, at 11, Wellington Terrace, Beverley Road, Hull, Eleanor Elizabeth Mary, the beloved and only child of C. G. Burney, Esq., Paymaster of H.M.S. Cornwallis, aged 1 year and 8 months.

CROSSE—December 9, at Blackheath, Aretas Young Crosse, Esq., son of Thomas Crosse, Esq., late of the King's Regiment.

DAWSON—December 12, at 41, Winchester Street, Warwick Square, Pimlico, Eliza, widow of Lieutenant Henry Dawson, R.N., of Wellingborough, Northampton, aged 53.

HOCKIN—August 8, on board the Windsor Castle, on the voyage to Bombay, Henry Mapleton Hockin, Esq., Lieutenant 3rd Dragoon Guards, only child of the late Henry P. H. Hockin, Esq., of the Bombay Army, and the dearly beloved step-son of the Rev. John W. Shelton, of Westbury, Wilts, aged 20.

JENKINS—December 10, suddenly, at Portland, on board H.M.'s ship Colossus, the Rev. John Jenkins, M.A., Chaplain R.N., leaving a widow and five young children, aged 52.

MACPHERSON—December 5, at Powick, Sarah Fox MacPherson, widow of the late Major MacPherson, of the 2nd West Indian Regiment, late of Ayr, N.B.

MENZIES—December 8, at Charlotte Square, Edinburgh, Euphemia, relict of Major Archibald Menzies, 42nd Royal Highlanders.

PARRY—December 8, in his 16th year, Lionel Harvey, youngest son of Major F. J. Sidney Parry, King's Own Light Infantry Militia.

SEATON—December 7, at the residence of his brother, Camden Square, Colonel Douglas Seaton, H.M.'s 1st Bengal Fusiliers, aged 50.

Advertisements.

ROYAL ST. JAMES' THEATRE.—Sole Lessee and Manager, Mr. ALFRED WIGAN.

On Monday, Tuesday, and Wednesday, "Loan of a Wife," After which, "Still Waters Run Deep," John Mildmay, Mr. Alfred Wigan; Mr. Potter, Mr. Emery; Mrs. Sternhold, Mrs. A. Wigan; Mrs. Mildmay, Miss Herbert. To conclude with "Next Door." On Thursday, the 20th, a New Drama, called the "Isle of St. Tropez," in which Mr. Alfred Wigan will appear.

THE BUCKLEY SERENADERS perform every night at the St. James's Hall, Piccadilly, and give an Extra Performance on Saturday afternoon. Every evening at 8, and Saturday at 3. *** The most unique and varied entertainment in the metropolis.

ANTONIO POLETTI, THE WIZARD FROM ROME, amazes all who behold his extraordinary feats in NATURAL, MECHANICAL, and CHEMICAL MAGIC, combined with MESMERIC PHENOMENA, at the GALLERY OF ILLUSTRATION, 14, REGENT STREET, W., ANTONIO POLETTI appears to-night and every evening at Eight; and, in consequence of the brilliant success of his morning performances, every Monday, Wednesday, and Saturday, at Three. *** The most original and surprising Exhibition in England. Stalls, 3*s.*; centre seats, 2*s.*; back seats, 1*s.* May be obtained of the principal Musicsellers, and at the Gallery of Illustration from Eleven till Five daily.

THE RELIEF OF LUCKNOW.—The Triumphant Meeting of Havelock, Outram, and Colin Campbell, surrounded by their brave companions. This Grand Picture, by T. I. BARKER, ESQ., is still ON VIEW from 9 to 6 o'clock. Admission free, by private address card. N.B. In dark weather, and after 3 o'clock, the picture is brilliantly illuminated by artificial light.

HAYWARD & LEGGATT'S, 79, Cornhill, E.C.

SHIPWRECKED MARINERS' SOCIETY, supported entirely by voluntary contributions.

Patrons—The Queen and H. R. H. the Prince Consort.

President—The Duke of Marlborough.

Chairman of Committee—Adm. Sir Henry Hope, K.C.B.

An earnest APPEAL is made to the public for aid to clothe and send home our destitute shipwrecked seamen, cast or landed on the coast, and to give temporary relief to the widows and orphans of those who perish. 4,666 of the former have been sent to their homes, and 3,179 of the latter have partaken of the Society's bounty since the 1st of January last. The pressure on the funds has been so great that £1,000 stock has been sold, with little hope of being able to meet the distress from the storms and tempests of the coming winter if not liberally helped. James i., 27; Job xxix., 12, 13.

Donations and subscriptions thankfully received at Messrs. WILLIAMS, DEACON, & Co.'s; by the Collector, Mr. A. F. STRETTELL; and by the undersigned,

FRANCIS LEAN, Secretary.

Office, Hibernia Chambers, London Bridge, S.E., November, 1860.

THE SOLDIERS' DAUGHTERS' HOME, HAMPSTEAD, N.W. Founded May 8th, 1855. The only asylum in the kingdom for the daughters of soldiers of the whole British Army, whether English, Scotch, or Irish. This is the *only* asylum open to the soldier's daughter, whether orphan or not, without limitation to any particular war, or restriction as to infancy on admission.

Under the Patronage of Her Most Gracious Majesty the Queen; H.R.H. the Prince Consort; H.R.H. the Prince of Wales; General H.R.H. the Duke of Cambridge, Commander in Chief, K.G.; and a large Committee of Noblemen, Members of Parliament, General and other Officers, Chaplains of the Army, Clergymen, and influential Laymen.

There is no government asylum for the female children (whether orphans or not) of the whole British Army; they are excluded from the Royal Military Asylums at Chelsea and Dublin. The Soldiers' Daughters' Home receives no pecuniary support whatever from the Government or from the Patriotic Fund, and is entirely dependent upon voluntary subscriptions. Funds are very much needed to complete the number of inmates to 200; 170 are now in the Home; in addition to which 110 girls have been admitted and provided for satisfactorily since the foundation of the Home. Chairman of the Committee, Major the Hon. H. L. Powys, late 60th Royal Rifles.

Subscriptions thankfully received by the Treasurer, Sir John Kirkland, No. 17, Whitehall Place, S.W.; by the Bankers, London and Westminster Bank, St. James's Square, S.W.; and Messrs. Masterman, Nicholas Lane, City, E.C.; at the Home, Hampstead, N.W.; and at the Office, No. 7, Whitehall, London, S.W. Post-office Orders should be made payable to Mr. John Marsh, Secretary, upon the Charing Cross Post-office, S.W.

MISSIONS TO SEAMEN.—VICE-PATRONS.

His Grace the Archbishop of Canterbury.
His Grace the Archbishop of York.
His Grace the Archbishop of Armagh.
His Grace the Archbishop of Dublin.

The Society now employs 10 Chaplains and 12 Scripture Readers, provided with mission vessels, boats, &c. Contributions thankfully received by the Secretary, Rev. Theodore A. Walrond, 11, Buckingham Street, Adelphi, W.C.

HUNTERS AND CHARGERS, &c., &c.—TALLY HO!—Gentlemen requiring MOUNTS for the coming season will study their pecuniary and personal safety by sending address and postage for October Number of ROYAL BRITISH & FOREIGN HORSE REGISTER, in which will be found advertised some noted flyers in the stables of noblemen and private gentlemen declining hunting, &c. Wanted for sale immediately, sound horses of all kinds. Many applications for young, well-bred horses, likely to make hunters. Address, the Secretary, Horse Register, 70, Berners Street, Oxford Street, London, W. Some broke chargers and young high-bred horses, suited for officers' chargers, on sale, 50 per cent. under ordinary prices.

INDIA, CHINA, AND AUSTRALIA.—OVERLAND ROUTE.—Officers and Civilians returning from Furlough, or joining on first appointment, can secure their passage through Messrs. WHEATLEY & CO. (late Waghorn), West End Office, 23, Regent Street, Waterloo Place, S.W., and be thus spared the inconvenience, delay, and trouble of going to the City. Handbooks on application. Baggage collected and shipped at a through charge. Insurances effected. Files of the latest news in the Reading-room.

ESTABLISHED 1838.

VICTORIA AND LEGAL & COMMERCIAL LIFE ASSURANCE COMPANY.

DINNEFORD'S PURE FLUID MAGNESIA

Has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for ACIDITIES, HEARTBURN, HEADACHE, GOUT, AND INDIGESTION.

As a MILD APERIENT, it is admirably adapted for DELICATE FEMALES, *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the

ACIDULATED LEMON SYRUP,

it forms an *Effervescing Aperient Draught*, which highly agreeable and efficacious.

PREPARED BY DINNEFORD & CO., DISPENSING CHEMISTS, (and General Agents for the *Improved Horse Hair Gloves and Belts*),

172, NEW BOND STREET, LONDON, W.,

And Sold by all respectable Chemists throughout the Empire.

SAVARESSE'S PATENT FLEXIBLE CAPSULES, by which all nauseous Balsamic Medicines may be taken without inconvenience. These Capsules are made of animal membrane of slow solubility, thus obviating the usual nausea and unpleasant eructations which follow the use of those made with Gelatine. From numerous medical testimonials, EVANS & LESCHER, the Patentees, need only select the following by William Acton, Esq., see page 96 of his celebrated Treatise:—"In many instances I have known the gelatine capsule burst in the effort of swallowing, or dissolve as soon as it is in the stomach; an improvement has latterly been introduced by Messrs. Evans & Lescher, by enclosing the medicine in membrane, thus obviating the objection to all gelatine capsules." The Membranous Capsules may be obtained of all chemists, &c., in town and country.

RUPTURES. — HUXLEY'S IMPROVED PATENT MOC-MAIN TRUSS dispenses entirely with the lever spring. A flexible band, perfectly imperceptible, encircles the body (in lieu of the old steel spring), and an elastic pad secures the hernia. Measure required—circumference two inches below the hips. Price single, 12*s.*; double, 18*s.*; postage 10*d.* and 16*d.* Illustrated circulars on application to Mr. E. HUXLEY, 12, Old Cavendish Street, Oxford Street, W.

A BOON TO NERVOUS SUFFERERS.

HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., will send, post free, on receipt of a stamped directed envelope, THE WARNING VOICE, a new medical work on the most effectual cure of Nervous Debility, Loss of Memory, Indigestion, &c., which, if neglected, result in consumption and premature decay; with plain directions for perfect restoration to health and vigour. The true guide to those who desire a speedy cure. Every young man should peruse this excellent little work, if he values his health, happiness, and peace of mind. Sent direct from the Author's residence, 8, Burton Crescent, Tavistock Square, London, W.C.

DR. BUCHAN'S PATENT SUGAR-COATED VEGETABLE PILLS, VEGETABLE SKIN OINTMENT, and CONCENTRATED VEGETABLE ESSENCE, for Purifying the Blood, Regulating the Bowels, and Removing Vitiated Humours, Bilious and Liver Complaints, Rheumatism, Gout, Scorbutic Affections, Costiveness, Skin Eruptions, deep-seated Ulcers, and all Diseases of the Nervous System, from whatever cause, &c., affording at once a new lease of life to the sickly and aged of both sexes, also giving a beautiful and clear complexion. Proved by the sworn testimonies made before the Lord Mayor of London and sitting Magistrates. Sold by Buchan & Co., Patentees, 22, Newman St., Oxford St., London, W., and all chemists in town and country. Prices:—Pills, per box, 1*s.* 1½*d.*, 2*s.* 9*d.*, and 11*s.*; Ointment, per pot, 1*s.* 1½*d.*, and 2*s.* 9*d.*; Essence, per bottle, 4*s.* 6*d.*, 11*s.*, or bottle containing four times that quantity, 33*s.* Agents:—Barclay, 75, Farringdon Street, E.C.; J. Sanger, 150, Oxford Street, W.; Hannay, 63, Oxford Street, W.; Butler, 4, Cheapside, E.C.; Hooper, 43, King William Street, London Bridge, E.C.; R. Howden, 78, Gracechurch Street, E.C.; Prout, 229, Strand, W.C.; &c. &c.

Gratis, or post free for one stamp, of all Agents, and 22, Newman Street, W., Dr. Buchan's Work, entitled, BUCHAN'S DOMESTIC MEDICINES, containing instructions for the cure of every ailment incidental to man, woman, or child.

A Physician and Member of the Royal College of Surgeons, England (Registered under the New Medical Act), attends daily to give advice, without fee, to those purchasing Buchan's Medicines.

TEETH.—MR. ESKELL'S INVENTION.—On the 17th July, 1860, Mr. ESKELL, Surgeon Dentist, 8, Grosvenor Street, W., obtained HER MAJESTY'S ROYAL LETTERS PATENT for an improved method of fixing ARTIFICIAL TEETH to the GUMS on MOVEABLE BASES, without plates, wires, springs, or any fastening, which may be thus briefly described.

The teeth are perfectly FITTED from first to last in TWO HOURS, without pain or extraction of stumps, by means of a Moveable Base, which is placed within a tube, and applied to the gums, on which it takes a most accurate and minute impression, and adheres with such tenacity by suction, that the teeth become quite immovable, except at the pleasure of the wearer. When any of the natural teeth fall out, by substituting a new base, which can be applied without the aid of a dentist, the Artificial Teeth are always useful, and last a lifetime.

Mr. Eskell's Patent, of which he is the sole inventor, can only be procured at his residence, where specimens may be seen and every information obtained. Decayed teeth stopped. Loose teeth fastened. All consultations free. Terms strictly moderate.—8, Grosvenor Street, Grosvenor Square, London, W.; 33, Old Steine, Brighton; and 39, Bennett's Hill, Birmingham.

SPORTSMEN AND GENTLEMEN OF THE ARMY AND NAVY.—S. & B. SOLOMONS, Opticians, 39, Albemarle Street, Piccadilly, W., opposite the York Hotel. Portability combined with great power in FIELD, RACECOURSE, OPERA, and general out-door day and night powerful waistcoat-pocket PERSPECTIVE GLASSES, weighing only 4 ounces each, containing 12 and 18 lenses, constructed of German glass, will show distinctly persons to know them at two-and-a-half and three miles. They serve every purpose on the Racecourse and at the Opera House. Country scenery and ships are clearly seen at eight to ten miles. They are also invaluable for Shooting, Deerstalking, and Yachting. Her Majesty's Coast Guards are making use of them as day and night glasses. The terms for them are powerful and brilliant Telescopes for both eyes. The most powerful Telescopes, possessing such extraordinary power that some, three-and-a-half inches, with an extra astronomical eyepiece, will show distinctly Jupiter's moons, Saturn's ring, and the double stars; with the same telescope a person can be seen and known three-and-a-half miles distant, and an object from fourteen to sixteen miles. They are in endless variety, of larger and all sizes, with increasing powers, and are secured by Her Majesty's Royal Letters Patent.

ALMANACKS FOR 1861.

This day is published, price Five Shillings,

THE ARMY ALMANACK.

Also, price Five Shillings,

THE NAVY ALMANACK.

BEAUTIFULLY PRINTED IN CHROMO-LITHOGRAPHY BY MESSRS. DAY & SON, FROM DESIGNS BY ROBERT DUDLEY, ESQ.

SHIRTS of LONGCLOTH, LINEN, and COLOURED FLANNEL, unequalled for quality and accuracy of fit, are cut out on the premises, and the sizes registered for future orders, by POPE & PLANTE, 4, Waterloo Place, Pall Mall, London, S.W.

COMMANDING OFFICERS, and COMMITTEES OF VOLUNTEER CORPS, in reply to their numerous Letters, are respectfully informed that samples of the "LACERNA" (a patented Infantry Cloak Coat), are now at 114, 116, 118, and 120, Regent Street, London, W., and may, within a few days' notice of their wish to that effect, be also seen at Messrs. Nicoll's local Agents, established in every principal town in Great Britain or the colonies; it is moderate in price, considering the excellence of the material, and is well adapted for use when Volunteers are not in Uniform; but in a Military point of view it is by the *Times* and other public journals thus referred to:—

"An Infantry Cloak Coat, the patented design of the Messrs. Nicoll, has recently been inspected by the Military authorities, by the desire of the Secretary of State for War, with a view to adapt it to the Regiments of the Line and the Volunteer Rifle Corps. Its advantages consist in increased protection against cold and wet by a cape being pierced for the soldier's arms, to the movement of which, unlike other garments with capes, free play is given, while such arrangement prevents the cape getting in the wearer's way in gusts of wind. The whole of the stock of the rifle, when carried horizontally, and the cartridge-box, are protected by the cape from wet; the latter, if necessary, may be lined with a waterproof substance, without the ill effects of restrained perspiration, as it is almost detached from the person. But the hood, perhaps, is the most novel feature, as when not covering the shako it is within the cloak out of sight, and thus forms a pad for the knapsack. It is, however, to be feared that, inasmuch as this most desirable garment takes about a yard and a half of material above the officially-prescribed quantity of cloth, it will be almost exclusively confined to the members of Volunteer Corps and the Officers of the Regular Line, the Privates of the latter being excluded from its use."

A WEEK'S OUTFIT OBTAINED IN FIVE MINUTES, for Five pounds, consisting of a Black Portmanteau, Strapped, Patent Locked, and adapted to go under the seats in Railway Carriages; containing: Two Shirts, Three Collars, Three pairs of Socks, One pair of Drawers, One Flannel Waistcoat, with a Dressing-case holding a Razor, Shaving, Nail, and Tooth Brushes; "Bradshaw's Railway Guide," and a Railway Rug; the latter to act also as a waterproof cloak for shoulders, it being shaped with collar, pockets, &c. All these are articles of excellent quality, and fit for permanent use, and included in the above price.

H. J. & D. NICOLL, 114, REGENT STREET, W.

OFFICERS IN THE ARMY will find the best assortment of PORTABLE MILITARY FURNITURE, and Articles for Barrack and Camp service generally, at HILL & MILLARD'S Portable Military Furniture and Outfitting Warehouse, 7, Duncannon Street, Trafalgar Square, W.C. Illustrated catalogues on application. Manufacturers and Patentees of the Army Chair, Square-mouth Travelling Bag, Despatch Box, & Writing Dressing Case, &c., &c.

WOOLF & SON'S PORTABLE FURNITURE.—THE PATENT NEW PORTABLE BEDSTEAD, the greatest improvement ever effected in strength and lightness, and approved of by the highest military authorities. Particulars and price forwarded post free; also their Illustrated Priced Catalogue of Portable Furniture of the newest description, &c. Estimates for Uniform for any branch of Her Majesty's Service, from Messrs. WOOLF & SON, Army Contractors, 59, Piccadilly, W., opposite St. James's St., and 45, Old Bond St., W., one door from Piccadilly.

THE ARMY CHAIR is the most Comfortable, Economical, Portable, and Useful Chair yet invented, equally adapted for a Couch or Bed; simple in its action, and impossible to get out of order. For Officers in the Army or Navy, Travellers, or Invalids, it is invaluable, as it combines every comfort and convenience for rest by day and repose at night. Manufactured by the Patentees, HILL & MILLARD, Military Outfitters, 7, Duncannon Street, Trafalgar Square, W.C.

EXTRACTS FROM THE PRESS, REFERRING to the NEW BRANCH ESTABLISHMENT of E. MOSES & SON, at the CORNER of TOTTENHAM COURT ROAD and EUSTON ROAD.

"Upon each floor, there are small apartments called the 'trying-on rooms,' affording customers an opportunity of avoiding the guess-work which has hitherto prevailed in ready-made emporiums, and everywhere immense mirrors are placed in which the buyer may satisfy himself with the fit and shape of the garment which he proposes to purchase."—*Standard*, 21st Nov., 1860.

"On the whole, the new establishment of Messrs. E. Moses & Son is decidedly the most complete of its class in the Metropolis."—*Morning Herald*, 21st Nov., 1860.

"The whole exterior of the building presents a noble aspect. It combines an appearance of lightness and solidity, grace and strength."—*Illustrated News of the World*, Dec. 1st, 1860.

"The interior arrangements are in a corresponding scale of elegance, whilst convenience and comfort have not been lost sight of. . . . Nothing, in fact, that goes to constitute the completeness of an organised whole can be said to have been omitted."—*Daily News*, Dec. 11th, 1860.

"Like skilful logicians, they laid down the premises of their trade syllogism in the Minories; they next constructed their middle term in Oxford Street; and they have just now brought out their conclusion to Tottenham Court Road."—*Express*, Dec. 11th, 1860.

E. MOSES AND SON, MERCHANT TAILORS, WOOLLEN DRAPERS, HATTERS, HOSIERS, BOOT AND SHOE MAKERS AND GENERAL OUTFITTERS.

NEW GENERAL ATLAS.

Just published, imperial 4to. half morocco, gilt edges, price 5*l.* 5*s.*, with Index of nearly 120,000 Names,

THE IMPERIAL ATLAS OF MODERN GEOGRAPHY.

A Series of One Hundred carefully-coloured Maps, embracing the most recent Discoveries, and the latest Political Divisions of Territory in all parts of the World.

Compiled, from the most Authentic Sources, under the Supervision of

W. G. BLACKIE, PH.D., F.R.G.S.

With an Index of nearly 120,000 *Names, the most copious ever published.*

"This fine series of accurate and beautiful Maps."—*Daily News.*
"A highly satisfactory publication. . . . . The maps are everything that could be wished, so far as accuracy, distinctness, neatness, and fulness of detail are concerned."—*Athenæum.*
"One of the largest and most complete Atlases ever attempted."—*Critic.*
"The fullness of detail may be judged of by the Index, which contains reference to 120,000 places; notwithstanding which profusion, there is not the least sacrifice of distinctness, owing to the exquisite beauty and precision of the engraving. . . . . It is an Atlas which we can safely recommend to the merchant, the traveller, and the student."—*Examiner.*

2 vols. imperial 8vo. 2670 pp. 4*l.* 6*s.*

THE IMPERIAL GAZETTEER:

A General Dictionary of Geography, Physical, Political, Statistical, and Descriptive.

Edited by W. G. BLACKIE, Ph.D., F.R.G.S.

With above 700 Illustrations, Views, Costumes, Maps, Plans, &c.

"All the articles that we have examined, whether long or short, have exhibited a greater degree of correctness in minute details than we should have thought practicable in so comprehensive a work."—*Athenæum.*

"By far the best Gazetteer in our language."—*Critic.*

2 vols. imperial 8vo. 2888 pp. including the Supplement, 4*l.* 17*s.* 6*d.*

THE IMPERIAL DICTIONARY:

ENGLISH, TECHNOLOGICAL, AND SCIENTIFIC.

WITH A SUPPLEMENT,

Containing an extensive Collection of Words, Terms, and Phrases not included in previous English Dictionaries.

Edited by JOHN OGILVIE, LL.D.

Illustrated by above 2500 Engravings on Wood.

"Dr. Ogilvie has not only produced the *best* English Dictionary that exists, but, so far as the actual state of knowledge permitted, has made some approach towards perfection."—*British Quarterly Review.*

In the Press, and nearly ready, in 1 vol. post 8vo.

THE PRINCE OF WALES IN CANADA AND THE UNITED STATES.

BY N. A. WOODS, ESQ.,

THE "TIMES" SPECIAL CORRESPONDENT.

"It has been his happy lot at the age of 19, to render to his country a very great and essential service. Many a man, born of a Royal family, has descended into the grave, rendering to his fellow men much less good service than has been rendered by this young prince. Whatever may be the destiny which Providence has reserved for him, it is a proud thing that he can reflect on this voyage across the Atlantic."—*Extract from the Duke of Newcastle's Speech at Nottingham, Dec. 8.*

London: BRADBURY & EVANS, 11, Bouverie Street, Fleet Street, E.C.

Crown 8vo. cloth, price 3*s.* 6*d.*

NARRATIVE OF TEN YEARS' IMPRISONMENT IN THE DUNGEONS OF NAPLES. By ANTONIO NICOLO, a Political Exile.

London: ALFRED W. BENNETT, Bishopsgate St., E.C., and all Booksellers.

Now ready, with Twenty Illustrations, price 10*s.* 6*d.*

WILL ADAMS, THE FIRST ENGLISHMAN IN JAPAN. A Romantic Biography.

By WILLIAM DALTON.

London: A. W. BENNETT, 5, Bishopsgate Without, E.C.

Now ready, a New Library Edition (being the tenth) of

ALISON'S HISTORY OF EUROPE, from the Commencement of the French Revolution in 1789 to the Battle of Waterloo. In 14 Vols. demy octavo, with Portraits, and a copious Index, price 10*l.* 10*s.*

In this Edition which has been revised and corrected with the utmost diligence, care has been taken to interweave with the original text, the new facts which have been brought to light since the last edition was published. It is believed that the Work will be found in all respects brought up to the latest authentic information that has appeared, on the epoch of which it treats.

Copies of the Crown Octavo Edition of the above History may be had, in 20 Vols., price 6*l.* Also a People's Edition in 12 Vols., double columns, price 2*l.* 8*s.* in cloth, and Index Vol. price 3*s.*

EXTRACTS FROM REVIEWS OF THIS WORK.

Times, Sept. 7, 1850.

"An extraordinary work, which has earned for itself a lasting place in the literature of the country, and within a few years found innumerable readers in every part of the globe. There is no book extant that treats so well of the period to the illustration of which Mr. Alison's labours have been devoted. It exhibits great knowledge, patient research, indefatigable industry, and vast power."

Edinburgh Review.

"There is much in Mr. Alison's history of the French Revolution against which we intend to record our decided protest; and there are some parts of it which we shall feel compelled to notice with strong disapprobation. We, therefore, hasten to preface our less favourable remarks by freely acknowledging that the present work is, upon the whole, a valuable addition to European literature, that it is evidently compiled with the utmost care, and that its narration, so far as we can judge, is not perverted by the slightest partiality."

North American Review.

"After a full examination, we do not hesitate to say that this is the most complete and honest history of the French Revolution which has as yet appeared, either in England or France."

Foreign Quarterly Review.

"We acknowledge with pleasure the force and fidelity of Mr. Alison's work on the French Revolution. It is by far the ablest historical performance of the last century, exhibiting remarkable diligence without any loss of spirit, and doing impartial justice on higher principles than have yet been announced in history."

From Preface of the German Translation by D. Ludwig Meyer.

"Alison's *History of Europe*, and the states connected with it, is one of the most important works which literature has produced. Years have elapsed since any historical work has created such an epoch as that of Alison; his sources of information and authorities are of the richest and most comprehensive description. Though his opinions are on the Conservative side, he allows every party to speak for itself, and unfolds with a master's hand how far institutions make nations great, and mighty, and prosperous."

From the Preface of the French Translation by M. Paquis.

"The work of Alison is indispensable to all who are forming collections on the history of Europe during the Revolution. It is the completion of them all."

TWELFTH EDITION.

LAYS OF THE SCOTTISH CAVALIERS, and other Poems. By W. EDMONDSTOUNE AYTOUN, D.C.L., Professor of Rhetoric and Belles-Lettres in the University of Edinburgh. Foolscap Octavo, price 7*s.* 6*d.*

The Second Volume is in the Press.

The Third and Fourth Volumes, to complete the work, will, it is hoped, be published during 1861.

London: JOHN W. PARKER & SON, West Strand, W.C.

Digitized by Google

MR. WILSON, having just returned from Mauritius, and being at present disengaged, begs to offer his services to any of Her Majesty's Regiments requiring a BANDMASTER. Mr. WILSON was nine years one of the principal Clarionetists 1st Life Guards; two years principal Clarionetist Royal Academy of Music, London; four years Bandmaster 2nd Madras European Light Infantry; six years Bandmaster 51st Light Infantry; five months Bandmaster Louth Rifles; and two years Bandmaster 2nd Battalion 5th Fusiliers. Age 37. Mr. WILSON has received testimonials from the following Noblemen, Officers, and Professors of Music:—

1. Earl of Carlisle, Lord Lieutenant of Ireland—Signed, Bagot, Comptroller of the Household.
2. Lieutenant-General Sir Richard England, Commanding Curragh Camp Division, 1857.
3. Major-General Gascoigne, Commanding Dublin Brigade, 1857.
4. Colonel Parker, Commanding 1st Regiment Life Guards.
5. Colonel Errington, Commanding 51st Light Infantry.
6. Colonel Mylins, Town Major, Dublin (for directing the bands of the brigade).
7. Lieutenant-Colonel Irby, 51st Light Infantry.
8. Major Richardson, 2nd Madras European Light Infantry.
9. Major the Hon. E. J. Bellew, Louth Rifles.
10. Captain Madden, P.B.C., 51st Light Infantry.
11. Captain Macfarlane, P.B.C., 2nd Battalion 5th Fusiliers.
12. Lieutenant Wood, P.B.C., 2nd Madras European Light Infantry.
13. Mr. Lucas, Director of the Orchestra, Royal Academy of Music, London.
14. Mr. Waddell, Bandmaster 1st Life Guards.
15. M. Waetzig, late Bandmaster 2nd Life Guards.
16. The Band 2nd Battalion 5th Fusiliers.

The following extracts are taken from some of the above testimonials:—

"Royal Barracks, Dublin, 18th September, 1857.—Mr. John Wilson, Bandmaster, 51st Light Infantry, has now been six years and upwards in the above regiment, and has proved himself to be a most efficient bandmaster. When in Burmah, in the year 1853, the band of the 51st Light infantry was so reduced by casualties, that barely half-a-dozen of the original number (who had been brought into excellent order by Mr. Wilson) remained, but under this great discouragement Mr. Wilson selected a number of men from the ranks, and by dint of unwearied assiduity, and the exercise of very high abilities in his profession, in the space of six months produced a new band capable of playing at the head of the regiment, and in another six months of playing a programme in public in good style. Since which time the band has been improving under his charge, until it is at present acknowledged to be one of the best bands in the Service. . . I trust this testimonial may secure Mr. Wilson a good appointment, especially as the 51st Light Infantry is compelled to dispense with his services in consequence of the regiment being ordered on Service in India. Signed, A. H. IRBY, Major 51st Light Infantry, late President Band Committee."

"Port Louis, Mauritius, August 21, 1860. Mr. John Wilson has been Bandmaster of the 2nd battalion 5th Fusiliers for upwards of two years. He formed and made the band of the battalion. He is a thorough musician, and a most excellent Bandmaster, and I hope that on his return to England he will meet with an immediate and a good appointment. Mr. Wilson has been untiring and most zealous in his duties. . . Mr. Wilson's health I am sorry to say has suffered much from his devotion to his duties in this climate. Signed R. H. MACFARLANE, Captain 2nd battalion 5th Fusiliers, President of Band Committee."

"Port Louis, August 20th, 1860.—To Mr. John Wilson, 2nd battalion 5th Fusiliers.—Sir, We, the undersigned, present you with this ring as a token of respect for your zealous and prompt attention to our instruction, and your just and impartial mode of action during the time which you laboured with us as our Bandmaster . . . Sincerely regretting that we have lost your valuable services, and hoping that your health may be soon restored, we are, &c. Signed JAMES COX, Sergeant, and 32 men, Band, 2nd battalion 5th Fusiliers."

Mr. Wilson begs to add that he formed Stringed Bands in the 2nd Madras European Light Infantry and 2nd battalion 5th Fusiliers. The voyage from Mauritius has quite restored Mr. Wilson's health. Address, 16, Jubilee Place, Chelsea, S.W.; Messrs. CHAPPELL & Co., 214, Regent Street, W.; or to Mr. J. KOHLER, 35, Henrietta Street, Covent Garden, W.C.

ADJUTANCY OF RIFLE VOLUNTEERS.—Gentlemen desirous of an appointment as ADJUTANT to a Rifle Corps in the North of England, may address L. R. V., care of Mr. B. Wheeler, Newsagent, Manchester. One who has acted as Adjutant preferred.

Green & Ward), respectfully solicits an inspection of his Stock, comprising a choice selection of CHRONOMETERS, WATCHES, CLOCKS, &c., all of which have been recently manufactured on the most improved principles, by workmen of the first talent.

20, Cockspur Street, Pall Mall, London, S.W.

DENT'S CHRONOMETERS, WATCHES AND CLOCKS.—M. F. DENT, 33, Cockspur Street, Charing Cross, S.W., Watch, Clock, and Chronometer Maker, by special appointment, to Her Majesty the Queen.—33, Cockspur Street, Charing Cross, S.W.

FREE TRADE IN CHRONOMETERS.—JOHN PENNINGTON, Chronometer, Watch, and Clock Maker, for many years Manufacturer for the Trade, purposes supplying the public at Manufacturers' prices. CHRONOMETERS, as supplied to the Royal Navy, 25l. Terms, cash.

WATCHES & CLOCKS OF EVERY DESCRIPTION.
12, Orchard Street, Portman Square, London, W.

GOLD CHAINS.—PARIS FIRST CLASS MEDAL FOR JEWELLERY, AND LONDON PRIZE MEDAL FOR GOLD AND JEWELLED VASE.—WATHERSTON AND BROGDEN respectfully invite the public to an inspection of their GOLD CHAINS AND JEWELLERY, which have been honoured with a First Class Medal at the Paris Universal Exhibition, accompanied by the flattering testimonial of "*Excellents bijouterie courante; Modèles Spéciaux à sa Fabrique.*" "Excellent jewellery, comprising chains, bracelets, brooches, rings, necklaces, seals, &c., every article being remarkable for its best finish," all made on the premises.

WATHERSTON & BROGDEN, Goldsmiths,
Manufactory, 18, Henrietta Street, Covent Garden, London, W.C. Established A.D. 1798.

N.B.—Assays made of Chains and Jewellery for 1s. each.

BRAVINGTON, LATE YOUNG, 51, PRINCES STREET, LEICESTER SQUARE, W.C.

GOLD WATCHES, CHAINS, AND JEWELLERY, Of the Best Quality, new and second-hand, at Moderate Prices.

MONEY advanced on Diamonds, Watches, Plate, Jewels, Guns, Pistols, and other Valuable Property.

EQUESTRIANS SHOULD ADOPT GULLICK AND CO.'S PATENT "ECLIPSE" SPUR BOX, which raises the spur to the top of the heel. It will fit all spurs, but when others are required, it will be desirable to procure his REGISTERED SPURS, which have the plugs reversed, to suit more perfectly the action of the improved Box.

GULLICK & Co., Military Boot and Spur Makers,
24, Pall Mall, S.W.

THE MOUNTED RIFLE CORPS BOOT. Can be worn outside the trowsers in wet weather, entirely superseding the trouble and inconvenience of leggings, forming, in fact, the most complete military boot extant. Suitable for a knock-about boot in the country, &c. Price 38s. Shooting and Hunting Boots in every design and material.

KING & SOTHERS, 21, Piccadilly, W.

THE NEW REGULATION BRIDLE.

A. DAVIS,

MILITARY SADDLER,

33, STRAND, W.C., AND AT ALDERSHOT CAMP.

OFFICERS about to join their Regiments or proceeding abroad can be supplied at short notice with the REGULATION SADDLERY OUTFIT of the best quality at the lowest prices.

MILITIA OFFICERS, CADETS, SURGEONS, &c., are requested to apply to A. DAVIS for an Estimate for Complete Regulation or Private Outfit in Saddlery.

A. DAVIS, 33, Strand, W.C.

H. PEAT,

SADDLER AND HARNESS MAKER,

14, OLD BOND STREET, LONDON, W.

AMUSEMENT FOR WINTER EVENINGS is abundantly afforded to all purchasers of MECHI & BAZIN'S famous mahogany FOLDING BAGATELLE TABLES. Prices, complete with balls, bridge, cues, and mace, and directions for playing:—

6 feet long	£3 15 0	8 feet 6 in. long	£6 10 0
7 feet long	4 15 0	9 feet long	11 10 0
8 feet long	5 15 0	10 feet long	12 10 0

Stands for ditto, with adjusting screw legs, &c. to 7 feet. The stand is not absolutely necessary for playing the game, although its use facilitates (by ensuring an exact level) the interest of the play.

112, Regent Street, W., and 4, Leadenhall Street, E.C.

Printed by JOSEPH SMITH, of No. 10, Malvern Cottages, Peckham Place North, Clapham Road, in the county of Surrey, at the office of Messrs. HEADDART & EVANS, in the precinct of White-friars, in the city of London, and published by him at the office, No. 16, Wellington Street, Strand, in the county of Middlesex.—SATURDAY, December 15, 1860.

ARCHIBALD GRAHAM, *to whom remittances are payable. The subscription to the paper is 7s. 7d. per quarter, or 30s. 4d. per annum, payable in advance, postage included.*

THERE is no worldly cause so elevated that it can bid defiance to the cruelty of adulation or the severity of indiscriminating flattery. Sobriety of judgment, and just distribution of praise and encouragement, best become the dignity of free institutions, and the manly, independent nationality from which they spring. If we were to be judged before the public opinion of Europe by the language used in the press and at our banquets in reference to the Volunteer movement, the verdict would probably be, that we were rather ignorant, exceedingly arrogant, very boastful, and intolerably vainglorious; and that the country was losing the moderation of sentiment and equable temper which have been claimed as the characteristics of Englishmen. It would be alleged that nothing but gross ignorance of the efforts of other countries, and the history of nations, ancient and modern, could excuse the constant assertions that the movement is the most wonderful development of national spirit the world has ever witnessed; that it was arrogance to maintain an irritating and offensive tone, to keep calling out to "our powerful neighbour" across the Channel, "See what an example we will make of you if you come across the Channel"—and boastfulness to roar out ceaselessly over the Straits of Dover that "if he ventured to encounter the roused lion of England, shoulder to shoulder would be the word among the Volunteer armament, and his vaunted legions would be ruthlessly swept back and engulfed, like the host of Pharaoh, in our protecting seas." And it might be added, that the vaingloriousness of the people who had lately evinced a proclivity in declaiming to the sea-shore, with mouths full of pebbly words and froth, was intolerable, when it was recollected that the Volunteers, encouraged as they have been, do not show any tokens of steady growth, and that the whole force, out of so many millions of the adult males of Great Britain, is still far short of 130,000 effective men, of whom but a small proportion could be relied on for service in any one place, either on the south coast of England or on the east coast of Scotland.

The patriotic spirit of those who have actually joined the Volunteer Service is admirable—the conduct of the various corps has been deserving of, and has indeed received the highest praise—the efficiency of several Volunteer battalions is remarkable, and it is not too much to say that in steadiness, in marching past, and in battalion evolutions, some of them are equal to regiments of the Line. But it is as unfair to the Volunteers as it is to the Regulars to institute comparisons between the two Services. The Army of England has tested the value of its discipline and the quality of its metal in a hundred fields. It is in the last degree absurd to say that the Regular Army is composed of volunteers in the same sense that the Volunteer Army is so constituted. The voluntaryism of the soldier ceases the moment he becomes a soldier until the term of his service has expired. The voluntaryism of the Volunteer lasts as long as he likes, and he can cease to be a Volunteer as soon as he pleases. Again, we might go further and say, that it is very questionable whether the nation which accepts as an obligation, from which no one is exempt, the protection of its independence, and the maintenance of its military status, does not stand in a higher position than one which—yielding to the necessity rather than willingly embracing the principle of voluntary enlistment,—gives to its armies a mercenary character, and exposes them to the depreciation in which the profession of arms has been held by a portion of the English people, as well as to the severe judgment passed upon them by such men as the Duke of Wellington. The result of our voluntaryism has been, that in great wars England has always been obliged to subsidise foreigners; and even in the contest with Russia, confined as it was to the Crimea, the Government found it necessary to raise Foreign Legions. Where every man is bound to serve, no man can affect to contemn the Service. If the temptations of bounty failed in the hour of danger to fill the ranks of our army and the decks of our fleet, the State would have an undoubted right (which no doubt it would exercise) to resort to the ballot or to a conscription. Our great naval triumphs were won by fleets which were partly manned by the operations of the press-gang. There is often a moral or physical pressure upon the recruit who enters the Army. We admit it is not the result of the direct action of the State; but then it is very erroneous to suppose that a large proportion of those who serve in foreign armies are not Volunteers; and France may point to the greatest of all Volunteer armies in that wonderful force of ragged republicans who asserted the right of Frenchmen to decapitate their kings, and to choose their own form of government—not against their own countrymen, but against the armies of the great military monarchies of Europe—and who fought with at least as much sternness, fervour, and courage against the hosts of the German states, against Prussia and Austria, as the Honourable Artillery Company of London displayed in the battle of Newbury against the adherents of their king.

We are led to make these remarks on a perusal of the speeches delivered at the banquet at which that venerable body celebrated the 250th anniversary of its existence. The historian of the Company, we are told, has carried back its genealogy to the times of Jonathan and David; but the secretary, Mr. Tahourdin, is "content with claiming an origin lost in the obscurity of antiquity," in which we may safely leave him to find it. So we have heard the French Imperial Guard claim to be the representatives of the famous Maison du Roi, who thought they owed their existence to the mythical body-guards of Charlemagne; and the Papal Guard are not above supposing themselves to be the descendants of the Prætorians of the Empire. In all their long and honourable life the Honourable Artillery Company have happily had only to fight their own countrymen on one occasion, which is upwards of 200 years ago. But to read the speeches and the glorifications, oral and printed, greeted by deafening applause or vehement approbation, one might imagine they had been engaged in the most arduous services all over the world, till he came to the matter-of-fact precipitated to the bottom in the speech of Lord Colville. Who shall deny the tough, gnarled, obstinate courage of the old Trained Bands of London city, or suppose they would not have met any foreign foe with valour as ardent yet cool as when they encountered the gallant squadrons of the English Cavaliers? Certainly not we. But why speak of them as if they had done the same service as gallant regiments which, once baptised in fire, have lived in its flood—such as the Guards, for instance, who celebrated their anniversary not long ago, and whom in uniform and in "marching past" the Honourable Artillery Company so much resemble? And yet the speakers and the writers talked and wrote of them as though they were the 10th Legion, or the most famous of British regiments. Lord Rokeby, in returning thanks for the Army, "hedged" himself as well as he could from the effects of his excessive betting on the good horse "Volunteer," in which he laid such heavy odds against old "Guardsman;" but in trying to do so he afforded another proof of the unfavourable influence which prandial enjoyments exercise on some intellects. His Lordship indeed made the discovery that the "beacon lights" of the Volunteer movement were neither the *Times*, nor Mr. Martin Tupper, nor Captain Hans Busk, nor Sir Duncan MacDougall, nor Mr. A. B. Richards, but the Honourable Artillery Company, "who showed the Volunteers long ago the road which they ought to have followed." We wish the gallant old soldier well out of the correspondence which ought, in the course of nature, to fall upon him in consequence of his rashness! Colonel M'Murdo complicated the family relations of the Volunteer movement by declaring he was its child,—we hope its "son and heir,"—forgetting perhaps the days when he was wont to sabre Affghans under the fierce eye of Charles Napier, who would have been rather astonished to hear of his son-in-law's new relations, and to listen to him declaring he was proud of a father who was only born long after the birth and well-earned fame of his own offspring. Naturally anxious to do honour to his parent, the excellent Inspector-General declared that he himself was the result of "all that was noble, intelligent, and educated in the country;" for he is asserted, in the report of his speech, to have said the Volunteer movement, whose offspring he is, was constituted thus highly and exclusively. But we should be sorry to think he spoke absolute truth, or that he had not carried the metaphor of the earlier part of his kindly genial speech into a statement of fact, which would assign narrower limits to all that is valuable in Great Britain than we should like to own. The Lord Mayor gave the finishing stroke to the curious puzzle, which we submit for solution to the College of Heralds, when he maintained that the City of London was Colonel M'Murdo's grandfather, inasmuch as "it had given birth to the Artillery Company," which was the parent of the Volunteer movement, of which the Colonel had told them he was the child.

Concurrently with that great effort, in reference to the Artillery Company as we understand from his Lordship, the City begot the trade and commerce of England, which was, he maintained, the foundation of our present exalted position, and he superadded, as a mere exercise of intellectual gladiatorship, the difficult theses—that if we seized upon distant kingdoms, and founded an immense empire, *because* we did so in the name of trade and commerce, therefore it could not be said we went abroad for the sake of aggression or conquest; and that, *because* we went forth as buyers and sellers, therefore we may hope to see the Christian religion established throughout the heathen world.

The Honourable Artillery Company will, we doubt not, get over the effects of its banquet. And as for the City of London, which has produced a gallant body, nearly 800 strong, we trust that its relations with its artillerymen will ever be the realisation of Drawcansir's wish, with regard to his sword, which he laid on the tavern table with the fervent adjuration "God grant I may have no need of thee!"

The Warrior is to be launched from the Thames Ship-building yard on Saturday next at 2·30 p.m. So much interest has been raised respecting this ship, that it will not be out of place to give the following particulars connected with her. Her length over all is 420 feet. Her extreme breadth 58 feet. Her depth from the upper deck is 41 feet 6 inches. Her burthen in tons (builder's measurement) 6177. She will be propelled by engines of 1250 horse-power, manufactured by Messrs. Penn.

We are pleased to find that a plan has been proposed, by which Coastguard men serving on shore can be supplied with clothing from the ships of the respective districts on the same terms as if they were actually serving afloat. If the details are entrusted to the different Navy Paymasters, the authorities, by thus increasing the duties (already very heavy), are greatly strengthening the claims of these officers for further consideration.

THE ARMY.

1st Life Guards. Captain Bateson and Lieutenant Viscount Powerscourt have arrived at Madras on a sporting tour.

1st Dragoon Guards. Captain E. H. Crewe has arrived at the head-quarters at Bangalore from England.

2nd Dragoon Guards. Cornet Elrington has arrived at Calcutta from England, en route to join head-quarters at Lucknow. Captain Grant passed in Hindostance on October 1, at Calcutta.

6th Dragoon Guards. Lieutenant Buchanan has an extension of leave on medical certificate.

7th Dragoon Guards. Captain Blinkhorn and Lieutenant Redman have an extension of leave.

3rd Light Dragoons. A strong detachment has been sent to Londonderry, in consequence of apprehended Orange riots.

14th Light Dragoons. Captain Chapman, lately exchanged from the Inniskilling Dragoons, has arrived home from India to join the regiment at Newbridge. We regret to announce the death of Lieutenant G. M. Dew, of diphtheria, on the 12th instant, aged 30 years. Lieutenant Dew entered the Army October 18, 1853, and became a lieutenant, without purchase, February 29, 1856. He served in the Persian expedition, and with the Central India Force during the mutiny with distinction.

Royal Artillery. Captain Connell, who has been staying at Simla with leave, for 15 months, on sick certificate, has been ordered by Sir Hugh Rose to return to his duty.

Coldstream Guards. By the promotion of Lord Frederick Paulet the following promotions take place without purchase: Colonel Newton to command the regiment, Colonel Steele, C.B., to command a battalion, Major Crawley to be Captain and Lieut.-Colonel, and Lieutenant Buller to be Lieutenant and Captain. By the retirement of Lord Dunkellin, Captain Heneage and Lieutenant Reeve obtain promotion by purchase. An interesting ceremony took place on Monday in Hyde-park. The two battalions of the Coldstream Guards assembled to witness the presentation of a long service medal to Mr. Godfrey, the eminent bandmaster of the regiment. The regiment having formed square, Colonel Lord Frederick Paulet, C.B., called Mr. Godfrey forward, and addressing the regiment, observed that Mr. Godfrey joined the corps from the Militia in 1813—that he had carried the firelock and knapsack like the youngest soldier present, and had raised himself by his persevering assiduity and good conduct from that rank to the position he now held as bandmaster of the regiment. But Mr. Godfrey's admirable conduct in other respects also was an example for every one's imitation. He had not only attained his present eminent position, but from his praiseworthy care and exertions in the education of his family, his eldest son had become bandmaster of the Grenadier Guards, his second son was sergeant in their own band, and his youngest son the bandmaster of the Scotch Fusilier Guards. This he mentioned as a circumstance unprecedented in the records of the Army. Alighting from his horse Lord Paulet then placed the medal on Mr. Godfrey's breast. Mr. Godfrey briefly returned thanks. Upon remounting Lord Frederick stated that this probably was the last official duty, as commander of the regiment, he should have to perform, as he was about to leave the regiment, and it was one that interested him very much. He then referred to the services in which he had been concerned with the regiment, and said that he should always feel the same interest in its welfare which he had ever done, and should be ready to forward their interests, collectively or individually, as far as lay in his power. At the conclusion the regiment responded in a round of loud and hearty cheers.

4th Regiment. Major Martin, of the 4th (King's Own) Regiment, who arrived from Aden by the last mail, is (says the *Bombay Times*) under orders to proceed to Ahmedabad, where the head-quarters of his regiment are stationed, to appear before a court-martial upon certain charges springing out of a dispute between the colonel of the corps and the mess of the wing at Aden. The public exchequer ought to be flush of money to warrant the outlay entailed upon it by proceedings which, if rumour is well informed, might have been, and should have been, terminated by a reference to the Commander-in-Chief. It may transpire, however, that a principle is involved in the dispute, of sufficient importance to necessitate the trial. The public will be spared the scandal of any very startling revelations, as the charges, we believe, do not affect in any way the honour or character of Major Martin, but simply have reference to a question of jurisdiction, and the subordination of the mess of the wing to the discretion of the commanding officer. It is not improbable that the case may possess some interest for our military readers, but promises little, we believe, for the general public.

5th Fusiliers. The regiment was inspected by Sir John Hearsey on the glacis of Fort William on the 16th November, when they performed extended Light Infantry manœuvres. Lieutenant Herrick has leave to England to May 4, 1862.

7th Fusiliers. The 1st Battalion is ordered from Dehree and Ghazeepore to Hazareebagh, to be stationed.

23rd Fusiliers, 1st battalion. Lieutenant Steward has been appointed 2nd in command of Mhair regiment.

24th Regiment. The 1st battalion, which, as already stated, has been ordered home, is expected leave to India in a month or so. This will leave the brigade command at Delhi again vacant, as Brigadier Brown, now commanding there, proceeds with his regiment, the 24th, to England.

27th Regiment. The court-martial on Captain Urquhart has terminated in the acquittal of that officer, and he is ordered to return to his duty. The case is rather curious. About the end of June, or in the early part of July, Captain John Urquhart, paymaster of Her Majesty's 27th, not only wrote, but even went to the expense of printing and circulating, certain doggrel lines, by no means complimentary to the state of society at Simla. The burden of the rhymes—so to speak—is the lax morality that prevails at Simla; the ladies being charged with drinking and flirting to excess, and the gentlemen with doing the same, with "aggravating circumstances." The officer commanding Her Majesty's 27th was desired to discover the culprit if he happened to belong to that corps, as was supposed not unlikely, from the circumstance that one of the envelopes covering the offensive verses bore the regimental emblem—a castle. As soon as Captain Urquhart perceived the commotion he had caused, he at once came forward and acknowledged himself to be the offender. His eagerness to exculpate his brother officers from blame, and to take upon himself all the consequences of his folly may be regarded as redeeming his previous conduct to some extent, and a rebuke from his commanding officer might have been considered sufficient punishment. But such was not the opinion of Major-General Sir Robert Garrett, K. C. B. A court-martial was held, and the greatest possible publicity given to Captain Urquhart's ridiculous attempts at rhyme. A court-martial accordingly was held, and Captain Urquhart arraigned on the following charge, and acquitted:—"For behaving in a scandalous manner, unbecoming the character of an officer and a gentlemen, in having, at Umballa, about the end of June, or in the early part of July, 1860, written and sent to certain members of society at Simla, printed copies of a letter signed 'Catius,' and verses annexed thereto, of a scurrilous and immoral nature, and grossly vilifying the said society."

34th Regiment. Lieut.-Colonel J. Simpson, C.B., has his leave extended to November 5, 1861, to remain in England. Captain Francis Peel is about to retire from the Service.

52nd Light Infantry. Colonel J. L. Dennis is appointed Brigadier at Jullindur. Major Blane is on sick leave to Calcutta to January 9.

56th Regiment. Assistant-Surgeon Boyd has leave to England viâ the Cape, on medical certificate.

57th Regiment was to embark in two detachments at Bombay for New Zealand. The corps was paraded at Poona on the 19th November, before its departure. At the conclusion of the parade, Sir W. Mansfield, addressing the commanding officer, said the 57th was second to no regiment in India, and that it had been selected for field service by the Supreme Government on account of the uniformly good reports received of its excellent discipline and orderly conduct. Captain Brown resigns his post as Commandant of the Sanitarium at Colaba, and Lieutenant Clarke that of Adjutant of the general depot at Khandalla. Paymaster Matthews remains behind to settle the regimental accounts.

71st. Lieutenant-Colonel Rich has an extension of leave to January 25.

77th Regiment. Colonel Deverell has leave in extension to January 31, on medical certificate.

93d Highlanders. Colonel Stisted is on leave to Murree to the 10th of February. Major Cornwall, lately retired from the Service, has arrived home from India. Captain Levinge, who has been at Simla with leave, on medical certificate, for 15 months, has been ordered to join his regiment forthwith by Sir Hugh Rose's orders.

98th Regiment. Ensign Dobbs is about to retire from the Service.

Rifle Brigade. The 2nd battalion, at Subathoo, has been ordered to Umballa for the winter.

A complimentary order has appeared in the daily papers, in which the Adjutant General of the Army expresses the satisfaction of Sir Hugh Rose at the appearance and bearing under arms of the 6th B. E. I. on parade in Fort William. His Excellency has also perused with great pleasure the testimonial afforded by the Civil authority of Hazarebagh regarding the conduct and discipline of the 6th B. E. I. during their location at that station. After bestowing due praise upon Major Birch, the officer in command of the corps, on Major Wroughton, the second in command, and on the young officers of the regiment, particularly Lieutenant H. M. Evans, the order concludes with reference to the complaints of the men of the 6th Regiment regarding the non-settlement of their claims of long standing for refreshment money and ship clearance, that "under the orders of the Commander-in-Chief, steps have been taken to effect a speedy adjustment of their claims."

Mr. Ferdinand Eber, who held the rank of General of Brigade in the Volunteer army of Italy under General Garibaldi, and who belonged to the Hungarian army of 1848, has returned to England.

The examination of candidates for the Royal Military College, Sandhurst, before Major-General Rumley, and the members of the Council of Military Education, has commenced at the Royal Hospital, Chelsea. There were about 30 candidates.

The examination of candidates for admission to the Commissariat before the Council of Military Education has taken place at the Royal College, Chelsea. There were upwards of 30 candidates.

We are glad to hear that the official reports which have been received from artillery officers serving with the Armstrong gun in China, are generally of a favourable character, and settle to a very great extent the doubts which had been started, as to the capability of using with effect the new weapon with all its finer adjustments and workmanship. It has frequently been stated that it would not be able to stand the rough and tumble of a campaign; and although the test of the present one has not been perfect in this respect, yet so far as it has gone, the officers are satisfied that it is the best weapon the world has ever seen. Several attentions and suggestions are attached to the report, which no doubt will receive attention at the hands of the Select Committee; and if the arm is not as complete as it may yet be made, it is gratifying in the extreme, and reassuring as well, to feel that in so far as the test has been applied, the result of so much deep thought, skill, and expenditure has not returned upon us void.

By private letters received from India by the last mail, we hear that a Board of Royal and Indian Artillery officers had been ordered to assemble at Agra for the purpose of considering the future equipment of the ordnance service in that part of the globe. Hitherto the patterns in the three presidencies have not only differed from each other, but also from that of the Royal branch of the service. Every item of horse appointment, saddlery, harness, carriage, and general stores, for use both in the field and in the camp, was brought before the Board, and in nearly all particulars the superior quality of the Royal pattern was made apparent, and recommended for future adoption. Uniformity in this respect will not be one of the least advantages which the amalgamation of these two great and hitherto distinct branches will bring to the Service.

We have to announce the death of Lieutenant-General Willes, R.M., which took place at Bath, on the 20th inst., after a short illness brought on by an attack of epilepsy, which came upon him on Wednesday week, and which completely prostrated him from the first moment. Few officers were more respected in both branches of his profession than General Willes, and his commands at Portsmouth and Chatham were remarkably popular. He was in his 71st year.

The Armstrong and Whitworth Guns.—As we gave notice in our last issue, the 100-pounder Armstrong gun, and the 80-pounder Whitworth, were early in the week removed from the gun-wharf, Portsmouth, for experimental practice on board the Excellent gunnery-ship, and subsequently the tender Stork, gun-boat, proceeded to Spithead with the Armstrong, and a select party of scientific officers to watch the performances of the gun and its carriage. It appears, however, that soon after firing was commenced, the shot was observed to deflect; and, on examination, it was found that a flaw had occurred in the grooves which stripped the lead from the bolts; and as on each successive round the flaw had a tendency to widen, the practice was directed to be stopped, and the gun was returned on board of the Excellent to give place to the Whitworth in the tender. Workmen will be sent from the factory to examine the flaw; and it certainly is a drawback to which this kind of rifled many-grooved ordnance appears to be subject, and which, as may well be imagined, it is not easy to remedy. A rear-chock carriage for the use of the Warrior has also been tested during the week, a contracted port having been fitted up on board the Excellent similar to that proposed to be introduced into the new iron-clad ships. This carriage was regulated in its recoil by a sliding-bar, pivoted in front, passing through the centre of the under transoms of the carriage, and to it were attached strong india-rubber buffers, which were intended to break the recoil of the gun, a 68-pounder of 95 cwt. In lieu of this, the reaction was of so violent a nature on meeting the elastic pressure of the buffers, as to cause the gun and carriage to spring up and rebound back, as if it would knock the deck in. So violent indeed was the force of the blow, that the men in the magazines tumbled up on deck to know what the matter was. It was therefore clear that this did not answer the expectation formed of it, the more so as, when the gun is home in the port, nothing can be more awkward than the long iron bar projecting behind; and the trailing angle extends in the contracted port only to 30°, not sufficient to obtain a cross-fire forward, and abaft the beam. Great as is the importance of decreasing as much as possible the opening of the ports, that of obtaining a cross-fire is equally as weighty, an assertion in which we doubt not Captain Jerningham will support us, the gallant officer and Admiral Pelham having been present during many of these interesting experiments. Although we are unable to record the success of the above trials, yet it gives us pleasure to add that the two naval carriages which we have before described, altered to suit the new rifled ordnance, have been tested with eminent success before the Ordnance Select Committee at Woolwich, and having been duly sealed and approved of, a pattern for each naval port is ordered to be made as a guide for our naval storekeepers. Considering the money thus saved to the country, we trust the intelligent foremen of the war department at Portsmouth, who effected this important alteration, will not go unrewarded.

Royal Indian Military College, Addiscombe.—The distribution of prizes to the successful cadets in the examination for the past term took place on Wednesday, in the large hall of the college, under the presidency of Sir James Weir Hogg, Bart., one of the members of the Indian Council, in the absence of Sir Charles Wood. At an earlier hour in the morning, Sir Fred. Abbott reviewed the cadets, about 100 in number, in the parade court, and expressed his satisfaction at the skilful manner in which they acquitted themselves. Previous to the distribution of prizes, General Rumley read the following Memorandum of the Council of Military Education, by whom the examinations are now conducted:—"1, Whitehall-yard, Dec. 17. The Council of Military Education, in forwarding the accompaying return of the examination of the cadets of the A class at the Royal Indian Military College, have to state that the progress cannot be fairly compared with that which has hitherto been required, but, considering the very limited time allotted to the course of study, the council recommend that they shall all be commissioned, and that the six first on the list be appointed to the Engineers." He also read the subjoined returns, in which the names are arranged in accordance with the number of marks obtained by each cadet, the highest number entitling to the first place. Examinations of Class A for commissions in the Artillery and Engineers:—Kellow C. Pye, N. E. Ralph Brockman, Andrew A. Jopp, Robert J. M'Clure, William A. J. Wallis, Bindon Blood, Alfred E. Turner, James F. Brough, Charles W. Long, Edward Steadman, Herbert P. Gaimes, Henry H. Hardinge, Arthur Pearse, Charles H. Spragge, William J. R. Harrison, William H. Hallett. Examination of the first and second classes, entered by nomination in August, 1859, and February, 1860, for commissions in the Royal Indian Infantry:—Thomas H. Holditch, Ernest Cattermole, Charles E. Shepherd, John M. Trotter, John A. Temple, George H. Jackson, Charles W. Howard, Macclesfield F. Coussmaker, Louis H. E. Tucker, W. M. Playfair, John Cook, William H. C. Smith, Charles L. Heathcote, Stanley Carter, Edward A. Pemberton, H. J. Bulkeley, John A. Rowlandson, Charles M'D. Skeene, John G. M. Bean, Henry White, Henry J. Beattie, George C. Cooper, James Simpson. Sir J. Weir Hogg distributed the following prizes, addressing each cadet as he came up in a few appropriate and impressive words:—Class A. Kellow Pye, the Pollock medal, 1st military topography, 2nd fortification, and 2nd civil drawing. First class, Thos. Holdich, 1st good conduct (the sword), 1st fortifications, 1st mathematics, and 1st military topography. Class A. Ralph Brockman, 3rd good conduct, 1st civil drawing, 2nd military topography, and 2nd Hindostani; James Brough, 1st mathematics; An-

drew Jopp, 2nd mathematics and geology; Alfred Turner, 1st Hindostani and Persian; Bindon Blood, 1st fortification and French; Robt. M'Clure, chemistry. First class. Chas. Shepherd, 2nd good conduct; John Trotter, 2nd Hindostani; Ernest Cattermole, French; John Temple, civil drawing, Prize list for junior terms. Wm. Williamson, mathematics and fortifications; Macclesfield Coussmaker, 4th good conduct, Hindostani, and French; Chas. Key, topography; Geo. M'Call, civil drawing; Clayton Beauchamp, geology; Townsend Griffin, chemistry.

THE ROYAL MILITARY ACADEMY — EXAMINATION OF CADETS AT WOOLWICH.—His Royal Highness the Duke of Cambridge, accompanied by several general officers, and attended by his staff, on Tuesday went to Woolwich to distribute commissions and prizes (in accordance with a report of the Council) to cadets at the Royal Military Academy, and to review the troops in the garrison. He was received by the commandant, Colonel Wilford, governor of the academy, &c. The governor in his report stated that he was justified in reporting that an energetic application to their studies and military exercises characterised the great majority of the cadets who had devoted themselves to the acquisition of the necessary knowledge to qualify themselves for commissions, and that it would be satisfactory to His Royal Highness to know that the Royal Military Academy will, reckoning the cadets now to be commissioned, have been able to complete with officers the present establishments of the two scientific corps. Major-General Rumley then read a brief report from the Council of Military Education, to the effect that of the first-class, comprising 29 cadets, only five had been found somewhat deficient; 24 were to receive commissions—three in the corps of Royal Engineers, and 21 in the Royal Artillery. The number of marks gained by each candidate having been read over, the following prizes were now awarded:—Mr. J. Saunders, for exemplary conduct, a regimental sword, and, for fortifications, a double telescope; Mr. H. Smith, army and field works, an Aneroid barometer; Mr. Firebrace, geometry, a pocket compass; Mr. Irwin, plan drawing, a double telescope. Prizes, consisting of microscopes and valuable books, were also awarded to Mr. Begbie, for German; Mr. Alstone, for chemistry; Mr. Castle, for geology; Mr. Nixon, for philosophy; Mr. Loraine, for French and drawing; Mr. Townsend, for fortifications; Mr. Foot, for artillery; and Messrs Hill and Hemans, for mathematics. His Royal Highness then addressed the cadets in a kindly manner, and congratulated them on the proficiency they had acquired in their studies and military exercises, and concluded by saying, desirous as he was to promote the efficiency and well-being of the Army as a whole, he was glad to find that the Military Academy at Woolwich would be available to all; and felt certain, that whilst all would benefit, no particular corps would be detrimentally affected by the change. His Royal Highness and staff then left the establishment, amidst a salute of 21 guns from the small field-pieces of the cadets, and proceeded to the Common, where the troops in garrison, consisting of the Horse and Foot Artillery and field batteries, were assembled in review order. His Royal Highness inspected the force, and subsequently proceeded to the Royal Artillery Barracks, leaving for town at half-past three o'clock, the Green Hill Battery firing a Royal salute.

LECTURES AT ALDERSHOT. — The following is a programme of the lectures delivered in the Aldershot Division during the fortnight ending the 15th of December:—Monday, Dec. 3.—The Rev. J. E. Sabin, Senior Chaplain, Aldershot, "Wonders of the Insect World"—1st Battalion, 10th Regiment; Mr. John Grant, chief schoolmaster, Aldershot, "The Curiosities of Electricity"—Royal Engineers; Mr. R. T. Kenny, schoolmaster, 5th Royal Irish Lancers, "Overland Route" (second lecture)—5th Royal Irish Lancers. Tuesday, Dec. 4.—Mr. J. Grant, "The Curiosities of Electricity"—55th Regiment; Mr. W. Davis, schoolmaster, Royal Artillery, "Overland Route" — Royal Artillery, 2nd Division. Thursday, Dec 6.—Mr. John Grant, "The Curiosities of Electricity," 1st Battalion, 10th Regiment; Mr. A. Runcieman, schoolmaster, 45th Regiment, "Astronomy"—45th Regiment. Friday, Dec. 7.—Mr. J. Grant, "The Curiosities of Electricity"—Royal Artillery; Mr. H. Binckes, schoolmaster, 29th Regiment, "Astronomy"—29th Regiment. Saturday, Dec. 8.—Mr. J. Grant, "The Curiosities of Electricity"—41st Regiment. Monday, Dec. 10.—Mr. J. Grant, "The Curiosities of Electricity"—5th Royal Irish Lancers. Tuesday, Dec. 11.—Mr. J. Grant, "The Curiosities of Electricity"—9th Lancers. Wednesday, Dec. 12—Mr. W. Davis. "Astronomy" —Royal Horse Artillery. Thursday, Dec. 13—Mr. H. Binckes, "Battle-fields and Remarkable Places"—29th Regiment. Friday, Dec. 14.—Rev. Dr. Rule, Wesleyan minister, Aldershot, "Printing"—41st Regiment; Rev. J. E. Sabin, "Wonders of the Insect World"—1st Battalion Rifle Brigade; Mr. A. Runcieman, "Battle-fields and Remarkable Places"—45th Regiment; Mr. W. Davis, "Astronomy"—Royal Artillery.

KNIGHTHOOD OF COLONEL ANDREW SCOTT WAUGH, F.R.S. —The knighthood of Colonel Waugh, Surveyor-General of India, and Superintendent of the Great Trigonometrical Survey, is an event that will doubtless be gratifying to many of his friends; but it will scarcely be considered by men of science, whether in India or at home, as an adequate recognition of his long, useful, and distinguished professional services. Men of comparatively small claims, whose names are hardly known out of their profession, on being appointed to judicial and other functions in the colonies, are made knights bachelor as a compliment due to their official position, and few will be disposed to question that in such a case the occasion is properly met by the award. But Colonel Waugh belongs to quite a different class of claimants for honourable notice. He has been for thirty years a prominent member of a corps (the Bengal Engineers) which has always been fertile of men of a high order, emulous of honourable distinction, and in every way capable of achieving it. On the retirement of Colonel Everest, in 1843, from the office of Surveyor-General of India and Superintendent-General of the Great Trigonometrical Survey, Colonel Waugh was, on the recommendation of that eminently scientific officer, appointed his successor, and that he has fully vindicated the high character then given him, and his capability to carry out the great trigonometrical and geographical survey of India, designated by Colonel Everest as, of its kind, a "colossal series of operations without parallel perhaps in the history of mankind," has been repeatedly acknowledged by the scientific world, as well as by the Honourable Court of Directors and successive Governors-General, who have from time to time honoured him with their warmest approbation and thanks. Colonel, now Sir Andrew Waugh, has obtained the highest scientific honours which this country can bestow. He is a fellow of the Royal Society, and in 1857 he was awarded one of the two royal medals of the Royal Geographical Society "for the encouragement of geographical science and discovery." On this occasion the Honourable Court of Directors, in a letter to the Governor-General of India in Council, said:—"This recognition of the services of Lieut.-Colonel Waugh, in prosecuting during the last thirteen years the operations of the great trigonometrical and geographical survey of India, is highly honourable to that officer, and gratifying to us." We confidently trust that at no distant period the name of Sir Andrew Waugh will be enrolled in association with the Most Honourable Order of the Bath.

The Army Gazette.

WAR OFFICE, PALL MALL, DECEMBER 18.

7th Regiment of Dragoon Guards—Captain Archibald Philip Douglas, from the 4th Light Dragoons, to be Captain, vice William Digby Wentworth, who exchanges.

3d Light Dragoons—Dodgson Hamilton Thompson, Gent., to be Cornet, by purchase, vice Barrett, promoted.

4th Light Dragoons—Captain William Digby Wentworth, from the 7th Dragoon Guards, to be Captain, vice Archibald Philip Douglas, who exchanges.

5th Light Dragoons—Lieutenant Frederick Walter Carden to be Captain, by purchase, vice Amyatt Ernlé Brown, who retires; Cornet Alexander Ewing to be Lieutenant, by purchase, vice Carden; Richard Moore Sadlier, Gent., to be Cornet, by purchase, vice Cotton, appointed to the 99th Foot; James George Hubert Fox, Gent., to be Cornet, by purchase, vice Chaffey, promoted.

7th Light Dragoons—Lieutenant Arthur L'Estrange Hamilton Holmes, from the 12th Light Dragoons, to be Lieutenant, vice Arthur Hamilton Scrope, who exchanges.

11th Light Dragoons—Llewellyn Traherne Bassett Saunderson, Gent., to be Cornet, by purchase, vice Russell, appointed to the 10th Light Dragoons; John Delacour, Gent., to be Cornet, by purchase, vice Calvert, promoted.

12th Light Dragoons—Lieutenant Arthur Hamilton Scrope, from the 7th Light Dragoons, to be Lieutenant, vice Arthur L'Estrange Hamilton Holmes, who exchanges.

16th Light Dragoons—Charles Francis Arnold Howard, Gent., to be Cornet, by purchase, vice Edwin Andrew Corbet, who retires; James Herbert Lovell, Gent., to be Cornet, by purchase, vice Edward Philip Salter, who retires.

17th Light Dragoons—Lieutenant Robert Bainbridge to be Captain, by purchase, vice Charles Steel, promoted, by purchase, to an unattached majority; Cornet Henry Richard Abadie to be Lieutenant, by purchase, vice Bainbridge.

18th Light Dragoons—Lieutenant William Coxon to be Captain, by purchase, vice George Eden Jarvis, who retires; Cornet Harold Esdaile Malet to be Lieutenant, by purchase, vice Coxon.

Military Train—Lieutenant Edward Jervis to be Captain, by purchase, vice George Pilkington Blake, who retires; Ensign Kilner Augustus Arthur Brasier-Creagh to be Lieutenant, by purchase, vice Jervis; Samuel Masters Davies, Gent., to be Ensign, by purchase, vice Bentliall, promoted.

1st Regiment of Foot—William Collett Sandars, Gent., to be Ensign, by purchase, vice Cosens, promoted.

2d Foot—Lieutenant George Turnor to be Instructor of Musketry, vice Page, retired.

4th Foot—Staff-Surgeon Benjamin Lane to be Surgeon, vice Fisher, placed upon half-pay.

9th Foot—Major Henry James Buchanan, from half-pay Depôt Battalion, to be Major, vice Charles Henry Leslie, who exchanges.

11th Foot—Charles John Wix, Gent., to be Ensign, by purchase, vice Lewis, promoted.

13th Foot—Staff-Surgeon Thomas Ligertwood, M.B., to be Surgeon, vice Jackson, appointed to the Staff.

15th Foot—William Ernest Anderson Hooper, Gent., to be Ensign, by purchase, vice Churchill, promoted.

18th Foot—Lieutenant William Thomas Croft, from the 3d West India Regiment, to be Lieutenant, vice John Bland Sawyer, who exchanges.

36th Foot—Thomas Mercer Maxwell, Gent., to be Ensign, by purchase, vice Stracey, promoted.

38th Foot—Lieutenant Alfred Stokes to be Instructor of Musketry, vice Captain William Kidstone Elles, who has resigned that appointment; Staff Assistant-Surgeon Colin Henderson to be Assistant-Surgeon, vice Lawlor, appointed to the Staff.

53d Foot—Ensign Thomas Rendall Morris, from the 92d Foot, to be Ensign, vice Harry Hutchinson A. Stewart, who exchanges.

58th Foot—Joseph Barrington Deacon, Gent., to be Ensign, by purchase, vice Foster, promoted; Donald George Anderson, Gent., to be Ensign, by purchase, vice Webb, promoted in the Military Train.

79th Foot—Ensign Gilbert Walter Coventry to be Lieutenant, by purchase, vice Crawfurd, promoted.

82nd Foot—Captain William Cooke O'Shaughnessy, from the 2d West India Regiment, to be Captain, vice Brevet-Major Samuel Peters Jarvis, who retires upon half-pay.

87th Foot—Captain James Bailie to be Major, by purchase, vice Charles Frederick Campbell, who retires; Lieutenant Richard Throckmorton to be Captain, by purchase, vice Bailie; Ensign John Leigh Hollest to be Lieutenant, by purchase, vice Throckmorton.

92d Foot—Ensign Harry Hutchinson A. Stewart, from the 53d Foot, to be Ensign, vice Thomas Rendall Morris, who exchanges.

96th Foot—Frederick Noel Hill Rooke, Gent., to be Ensign, by purchase, vice Curteis, promoted.

Rifle Brigade—The Hon. Bernard Thomas Howard to be Ensign, by purchase, vice Cary, promoted.

3d West India Regiment—Lieutenant John Bland Sawyer, from the 18th Foot, to be Lieutenant, vice William Thomas Croft, who exchanges.

Ceylon Rifle Regiment—John Fielding Willis Kane, Gent., to be Ensign, by purchase, vice Francis Pearson Murray, who retires; Francis James Baker, Gent., to be Ensign, by purchase, vice Guy William Frederick L'Estrange, who has retired; Ensign John Glover has been permitted to resign his commission.

UNATTACHED.

Captain Charles Steel, from the 17th Light Dragoons, to be Major, by purchase.

COMMISSARIAT DEPARTMENT.

To be Assistant-Commissaries-General.

Deputy-Assistant-Commissary-General John Moira M'Lean Sutherland, vice Kean Osborn, deceased.

Deputy-Assistant-Commissary-General Theodore Ernest M'Clintock, vice Widdrington Tinling, deceased.

Deputy-Assistant-Commissary-General Alexander Walter Turner, vice George Shepheard, placed upon retired pay.

The undermentioned Commissariat Clerks having passed the prescribed examination, and having been found to possess the qualifications considered requisite for promotion to the rank of Deputy-Assistant-Commissary-General, to be promoted accordingly:—

George James Neill. | Frederick William Callaghan.

MEDICAL DEPARTMENT.

Surgeon James Jackson, from the 13th Foot, to be Staff Surgeon, vice Ligertwood, appointed to the 13th Foot.

Assistant-Surgeon Digby William Lawler, from the 38th Foot, to be Staff Assistant-Surgeon, vice James Stevenson, whose services have been dispensed with.

BREVET.

Lieut.-Colonel William Lenox Ingall, C.B., 62nd Foot, having completed five years' service in the rank of Lieut.-Colonel, to be Colonel in the army; Lieutenant William Dring, Paymaster, 62nd Foot, to to have the honorary rank of Captain under the Royal Warrant of 27th of January, 1860.

Memorandum—Brevet-Colonel Graves Chamney Swan has been permitted to retire from the service by the sale of his Commission, he being about to become a settler in North America.

WAR OFFICE, PALL MALL, DEC. 21, 1860.

1st Regiment of Dragoon Guards—Cornet George Henry Bowyer to be Lieutenant, by purchase, vice James Gunter, promoted; Philip Chetwode Browne, Gent., to be Cornet, by purchase, vice Webster, promoted.

8th Light Dragoons—Richard Chambers, Gent., to be Cornet, by purchase, vice Collier, promoted.

10th Light Dragoons—Troop-Serjeant-Major John Hill James to be Quartermaster, vice John Fenn, retired upon half-pay.

12th Light Dragoons—The surname of the Captain appointed to this Regiment, from the 1st Dragoon Guards, on the 30th November, 1860, is Cuninghame, and not Cuningham, as then stated.

Coldstream Guards—Lieutenant and Captain Michael Walker Heneage to be Captain and Lieutenant-Colonel, by purchase, vice Ullick Canning, Lord Dunkellin, who retires; Ensign and Lieutenant Ellis Philip Fox Reeve to be Lieutenant and Captain, by purchase, vice Heneage; Joseph Blake, Lord Wallscourt, to be Ensign and Lieutenant, by purchase, vice Reeve.

4th Regiment of Foot—John Edmund Sinclair, Gent., to be Ensign, by purchase, vice Freeman, promoted.

6th Foot—Lieutenant John Grahame to be Captain, without purchase, vice Walter Tyler Bartley, deceased; Ensign Thomas Greer Saunders to be Lieutenant, without purchase, vice Grahame; Lieutenant William Wastle to be Paymaster, vice Allan McDonald, deceased; William Owen Lanyon, Gent., to be Ensign, by purchase, vice Frederick Helyar, appointed to the 8th Light Dragoons.

8th Foot—Martin George Cole, Gent., to be Ensign, by purchase, vice Madden, promoted.

9th Foot—Robert Henry Nicholson, Gent., to be Ensign, by purchase, vice Josselyn, promoted; Henry Augustus Brudenell Bruce, Gent., to be Ensign, by purchase, vice Forte, promoted.

10th Foot—Captain James Farquhar, from the 48th Foot, to be Captain, vice Richard Cormick Clifford, who exchanges.

11th Foot—Walter Long, Gent., to be Ensign, by purchase, vice Hare, promoted.

12th Foot—Simon Bagge Triphook, Gent., to be Ensign, by purchase, vice Bacchus, appointed to the 7th Dragoon Guards; Henry Duppa Alfred Cutbill, Gent., to be Ensign, by purchase, vice Andrews, appointed to the 74th Foot.

13th Foot—John Moutray Read, Gent., to be Ensign, by purchase, vice Nunnington, who retires; William Frederic Middleton, Gent., to be Ensign, by purchase, vice Brooks, promoted.

15th Foot—Stewart Paxton Majoribanks, Gent., to be Ensign, by purchase, vice Brunker, appointed to the 26th Foot.

20th Foot—Henry Hays Leeming, Gent., to be Ensign, by purchase, vice Andrew Halliday Hall, promoted in the 2nd West India Regiment; Robert Herne Mardon, Gent., to be Ensign, by purchase, vice Wahab, promoted.

22nd Foot—Edmund William Grove, Gent., to be Ensign, by purchase, vice Nevile, promoted.

26th Foot—James Samuel Greer, Gent., to be Ensign, by purchase, vice Wolferstan, promoted.

29th Foot—Robert John Watson, Gent., to be Ensign, by purchase, vice Croft, appointed to the 1st Dragoons.

34th Foot—William Vaughan, Gent., to be Ensign, by purchase vice John McCarthy O'Leary, who retires; John Macredie Mure, Gent., to be Ensign, by purchase, vice French, appointed to the 59th Foot.

45th Foot—Augustine Hugh Lefroy, Gent., to be Ensign, by purchase, vice Tennant, promoted.

48th Foot—Captain Richard Cormick Clifford, from the 10th Foot, to be Captain, vice James Farquhar, who exchanges.

50th Foot—Charles Morant Churchill, Gent., to be Ensign, by purchase, vice Barker, promoted.

53rd Foot—James Anthony Hussey, Gent., to be Ensign, by purchase, vice Brown, promoted.

60th Foot—George Thomas Whitaker, Gent., to be Ensign, by purchase, vice James Blaikie-Keith, appointed to the 69th Foot.

61st Foot—James Rogerson, Gent., to be Ensign, by purchase, vice Atkinson, promoted.

63rd Foot—Morris Charles Smith, Gent., to be Ensign, by purchase, vice Hulton, promoted.

70th Foot—George Green Cuppage, Gent., to be Ensign, by purchase, vice Riddell, promoted.

75th Foot—William Scott Richardson, Gent., to be Ensign, by purchase, vice Finnerty, promoted.

79th Foot—William George Graham Glascock, Gent., to be Ensign, by purchase, vice Coventry, promoted.

82nd Foot—James Newman Tanner, Gent., to be Ensign, by purchase, vice Johnston, promoted; Staff-Assistant-Surgeon John Smeeton Allanby, M.D., to be Assistant-Surgeon, vice Spence, who exchanges.

83rd Foot—Ensign Littleton Albert Powys to be Lieutenant, by purchase, vice Gandy, promoted.

93rd Foot—Major and Brevet-Lieutenant-Colonel Robert Lockhart Ross to be Lieutenant-Colonel, by purchase, vice Brevet-Colonel Alexander Sebastian Leith Hay, C.B., who retires; Captain and Brevet-Lieutenant-Colonel William Donald Macdonald to be Major, by purchase, vice Brevet-Lieutenant-Colonel Ross; Lieutenant Maxwell Wither Hyslop to be Captain, by purchase, vice Brevet-Lieutenant-Colonel Macdonald; Ensign Charles Dennis Potts to be Lieutenant, by purchase, vice Hyslop; Edward Boase, Gent., to be Ensign, by purchase, vice Hastie, promoted.

94th Foot—Robert Lovell Gwatkin, Gent., to be Ensign, by purchase, vice Blake, promoted.

95th Foot—Henry Francis Sneyd, Gent., to be Ensign, by purchase, vice Brooke, promoted; Staff-Assistant-Surgeon John Niven to be Assistant-Surgeon, vice Sharpe, appointed to the Staff. The appointment of Staff-Assistant-Surgeon John Smeeton Allanby, M.D., which appeared in the *Gazette* of the 10th July, 1860, has been cancelled.

97th Foot—Lieutenant Andrew George Onslow to be Captain, by purchase, vice Roger Swire, who retires; Ensign Henry Champante Crespin to be Lieutenant, by purchase, vice Onslow.

98th Foot—John Robert Meiklam, Gent., to be Ensign, by purchase, vice Heathcote, promoted.

99th Foot—Paymaster Frank Potter, Paymaster for General Service, to be Paymaster, vice Charles Schomberg Thomas, whose services are dispensed with.

100th Foot—William Ritchie, Gent., to be Ensign, by purchase, vice Lawrell, promoted.

2nd West India Regiment—Thomas Peach, Gent., to be Ensign, by purchase, vice Lloyd, promoted.

Ceylon Rifle Regiment—Ensign Frederick Thomas Tegart to be Lieutenant, by purchase, vice Joseph Albert Denton, who retires.

MEDICAL DEPARTMENT.

Deputy Inspector-General of Hospitals Charles Whyte, retired on half-pay, to have the honorary rank of Inspecter-General of Hospitals, under the Royal Warrant of 1st October, 1858.

Assistant-Surgeon Robert Spence, from the 82nd Foot, to be Staff-Assistant-Surgeon, vice Allanby, who exchanges.

BREVET.

Lieutenant James Deacon, Paymaster 1st Foot, to have the honorary rank of Captain under the Royal Warrant of 27th January, 1860.

Quartermaster John Fenn, half-pay 10th Light Dragoons, to have the honorary rank of Captain.

The Commission as Brevet Major of Captain and Brevet-Major Henry Otway Mayne, of the 6th Regiment Madras Cavalry, has been antedated to the 24th March, 1858.

The Commission as Brevet-Lieutenant Colonel of Captain and Brevet-Lieutenant-Colonel William E. Evans, 1st Bombay European Fusiliers, has been antedated to 1st April, 1857.

LATEST INTELLIGENCE.

REUTER'S TELEGRAMS.

TRIESTE, 21st Dec. 1860.

The *Triester Zeitung* publishes letters from Montenegro denying the reports that Godinje would be ceded to France for the purposes of colonization.

DRESDEN, Friday.

The official "Dresden Journal" of this day contains the following:

"Count Ladislaus Teleki, the Hungarian refugee, who had arrived here with a false English passport, has been arrested and delivered up to Austria.

Vice-Admiral of the White Sir Houston Stewart, K.C.B., Port Admiral at Plymouth, who was absent on leave for a short time, returned on Saturday, and rehoisted his flag on board the Impregnable, 104, in Hamoaze, last Sunday.

HYTHE MUSKETRY REPORT.

The Annual Report of the progress of Musketry Instruction in the British Army for the years 1859—60, has just been issued by Major-General Hay, Commandant of the school at Hythe, for the information of His Royal Highness the Commander-in-Chief. The returns of target-practice and judging distance are ample and clear, and the report, in its conciseness and classification is highly creditable to the skill of its compiler.

From a brief synopsis of its contents, which is all our space admits of, we gather that during this period 202 officers, 970 non-commissioned officers and men have been trained at Hythe as instructors to the various branches of the Service, the greater part of whom furnished satisfactory proofs of intelligence and skill; also, that no less than 182 Volunteers have likewise gone through the course, and acquitted themselves most creditably, while on a review of their respective performances, it was observed that the shooting of the officers and Volunteers was superior to that of the non-commissioned officers and privates.

Turning to the tables which show the proficiency of the several corps and battalions, we observe that the laurel for the best shooting for the year has been carried off by the 1st battalion of the 22nd Regiment, the figure of merit of one of its companies being no less than 51·93. The Wiltshire Militia have made a surprising leap from the 60th place of the year before, to the 4th in the list of this one; the more remarkable as it is far in advance of any other Militia regiment in the Service.

The Guards,—Grenadiers, Fusiliers, and Coldstreams,—occupy high positions, having secured the 7th, 9th, 14th, 15th, 16th, 17th, and 20th pla ces, a running together of a remarkably even character; while in strange contrast to this, the newly raised 100th Canadian Regiment is proudly advanced to the 12th niche in this tria l of skill, and yet its congener, the Royal (Canadian) Rifles, we find at nearly the bottom of the list, in number 144. The shooting of the Rifle Brigade also presents a similar discrepancy, for whereas the 4th and 1st battalions are well placed (though not so well as we might expect), the 3rd battalion is as low down as No. 84 in the list. Of the 2nd battalion no mention is made at all.

The report characterises the shooting of the Royal Artillery as very bad, and, judging from the returns, no doubt it is so. But we think there are reasons which may in some measure account for this. In the first place, their weapon, the Victoria carbine, is very inferior to the Enfield rifle; in the second, very little practice has been carried on by the regiment, owing to the necessity of attending to their own more immediate drill, so greatly changed during the last year by the introduction of rifled ordnance. Nevertheless, we do not expect to find much improvement in this respect in any future reports from Hythe, so long as the present insidious distinctions between the Services are continued. The infantry are encouraged with prizes to become marks men—good money prizes, additional to their daily pay, which they keep for a whole year. To the gunners nothing is awarded; they were in this, as in everything else, unscrupulously kept in the background. Perhaps it may be thought that there are rewards for good shooting with their heavy ordnance. We never heard of it, and if we are wrong we shall be glad to be corrected. To excite emulation in the Service is an excellent thing, but to foster it in one branch at the expense of another is not the way to stimulate the universal exertion, which alone will render our little Army celebrated as marksmen, as were our ancestors with their arms in days of yore.

The General comes down like a sledge-hammer on the shooting of the West Indian Regiments, and points to the performances of certain black men who were sent home for instruction, and who obtained at Hythe a high figure of merit, as a proof of the indifference of the officers to the rifle-training of their men. We hardly think this a fair conclusion; for it stands to reason that the men selected for the course were of a superior stamp, and, moreover, probably spoke English tolerably well, which a great many of the black soldiers do not. If we remember rightly (and Colonel Wilford will correct us if we are wrong), the word "trajectory" was a mystery to the instructed ones, which even his power of language and explanation failed to clear up. To many of this class of men, instruction has hitherto been a sealed book; they imitate, and appear to comprehend, but have little power of intellect, and scarcely any memory at all. No doubt the shooting will in course of time improve, but we are at present by no means surprised to see them at the foot of the scale; nor are we prepared to coincide in the verdict which fixes the blame upon gentlemen who, in this respect, have a heavy tug up hill against the collar, with not a single redeeming advantage that we know of in their favour.

On the whole we are glad to note that the shooting of the Army has improved, even though the stride in advance is not prodigious. If we move slowly, we are at any rate in the right path, and sure in our advance; so, always excepting the objections to which we have briefly adverted, we are confident that nothing will more tend to keep alive our zeal in this important branch of the soldiers' training, and raise the Army to a high state of efficiency, than this annual publication of the performances of its several branches, to which we shall in future look forward with increasing interest and anxiety.

LONDON GAZETTE, MONITEUR, TIMES, DEBATS.

How is History to be written? Clio is surely one of the flightiest of the Muses. Instead of the grave aspect and decent garb she has assumed, the frail lady should wear the smiles and the free robes of the fair, who is deserved and won by the brave—the Thais who ever shares the chariot of the conqueror, regardless of the justice of his quarrel and the cause of his conquest. Let us imagine the history of the Chinese war—the ultimate effort of England—as we hope, to establish friendly relations with the Sinensians, and the culminating proof of the pyramid of friendly intentions and acts of our gallant ally, to be written in years to come by a writer anxious to tell the truth, and give a fair impartial record of the campaign to the world. The story will be as diverse as are the contemporary accounts in Russian, French, and English of the Crimean War, just as the language employed by the writer, and the source of his information is French or English. To read the *Moniteur's* dispatches, or the letters in the Paris papers, it might be imagined that all the work was done by the French; and the reader of the *London Gazette* and of the *Times* might easily be pardoned for supposing that the English were almost the sole actors in the struggle, although the impartial critic, if at all cosmopolitan, must admit that Sir Hope Grant appears to be conscious that he has allies, and never takes occasion to find fault with them, even when they performed the extraordinary flank march which, by good scent and good luck, gave them the first fruits of plunder in the Emperor's summer palace. One reason of the quaint indifference of each other's presence manifested by the allies is certainly the necessity that each officer is under to write his report of the proceedings of his own force; and the remark extends to the subordinates. But each seems to say, "I was quite alive; but I was fastened to a dead man." There is nothing in the French reports but "canon rayé," "French infantry," and a faint glimpse of an English force "en retard," and a shadowy cloud of Sikh horsemen. The English report is all "Armstrong guns," "Napier's division," "Michel's division," and a neutral tint of "French on the flank." The *Débats* thinks the canon rayé is the only piece of artillery. The *Times* is fully sure there is but one Jupiter Tonans—that Armstrong is his prophet. May Clio teach the Niebuhr of the campaign, both French and English, discretion, moderation, and justice!

CHINA.

Extract from a letter, dated Pekin, 9th October:—

"Parkes, Locke, one Sowar, and five Frenchmen, were given up to-day. They none of them knew there were other prisoners. They knew nothing of Bowlby, Brabazon, and the rest, but the Chinese say they were never in Pekin; that, if they are prisoners, San-ko-lin-tsin kept them, and carried them off with his army. God only knows where they are, and whether they are alive, poor fellows.

"We have marched round the country to avoid Pekin, and thus calm the inhabitants, and we came quite unexpectedly on the Emperor's summer palace, some five miles from the city. Its wealth is (or rather was) fabulous, and it was handed over to the French—at least they walked in first and looted it well; our fellows were too modest, and only entered when they saw the French coming out with taels of gold and silver in their hands, and their pockets well crammed with jewels and valuables.

"The Emperor was evidently in his summer palace the night before we reached it, and had evidently fled in a hurry, leaving his papers, &c., on his tables. Every official of rank has left Pekin—so they say—but I should not be surprised if a large portion of San-ko-lin-tsin's force were inside the walls.

"We have abundance of supplies, and the force is healthier and in excellent spirits. The weather is pleasant: cold and bracing at night, sharp and finger-nipping in the morning, with a hot sun throughout the day."

THE WAR IN NEW ZEALAND.

The special correspondent of the *New Zealand Examiner*, writes from New Plymouth, under date October 11:—

"Just as I was about sitting down to complain again of another month worse than wasted by the military authorities, news is brought in that hostilities have commenced at Kaihihi, a few miles south of Tataraimaka, which in a manner arrests the pen. On the 19th September, 600 men, after destroying the enemy's stockades at the latter place, proceeded on towards Kaihihi, where, finding the enemy in force, they retired upon Tataraimaka, and General Pratt was applied to for instructions. Reinforcements of men and of artillery were promised to Major Hutchins, the commanding-officer; but the general suddenly altered his mind, and ordered the force back to town. On the 9th instant, a second expedition, upwards of a thousand strong, under the command of General Pratt, started for the same place; and this morning the pah was attacked, the enemy nothing daunted (as might be expected by our repeated show of pusillanimity) by the formidable force of men and artillery, including an 8-inch gun, opposed to them. The casualties, as far as it is yet known in town, are Captain Pasley, R.E. (Staff), wounded in the thigh, ball extracted; Sergeant Howatt, R.E., dangerously wounded in both thighs; 1 sergeant, 40th; 1 bugler, 65th; and J. Batten (Militia) wounded. It is not in my power to give a description of the contest, which will not be received in time for the mail steamer. A party of Engineers, with fatigue parties from the various corps, with covering parties, were sent out to approach the pah by entrenched lines and traverses, and form a platform for the heavy gun, the position chosen for which would command the two other pahs in the neighbourhood. The smaller guns (24-pounders) were within two hundred yards. This commenced the struggle, and beyond nothing is yet known. Her Majesty's ship Cordelia opportunely arrived from Auckland as the news was received, and Captain Vernon expressed his intention at once to proceed along the coast to render any aid to Captain Seymour, of Her Majesty's ship Pelorus, who is so far recovered from his wound received at Waitara as to be enabled to take part in the expedition. It will be remembered that both gallant officers commanded the naval brigade in Colonel Gold's expedition to Warea. The natives engaged are the notorious Taranaki and Ngatiruanui; and it is to be hoped, now that the general has fired a shot, that he will not quit the district without inflicting the severest chastisement on these turbulent and aggressive people.

"It is unfortunate for the prospects of the war that General Pratt did not show equal determination to meet the enemy at Waitara an the 10th September. With a force of nearly 1500 men the destruction of a few empty pahs seems exclusively to have occupied his mind, for whilst so engaged the rebels fired upon him, but provoked only a return fire to afford time to get back to quarters. But the most discreditable feature in this extraordinary affair was leaving the dead body of a 40th soldier in the hands of the enemy, who naturally claim a victory over the largest force that has been marshalled before them. Their own number could not have exceeded 120. The effect on the forces is still more to be deplored, for men naturally become dispirited in a contest in which the same fate may await themselves. The tenderest solicitude for the killed and wounded should be shown by those in command, Our Volunteers and Militia abandoned at Waireka, guarded theirs at the risk of their lives, and in a difficult night retreat brought them away from the field.

"But all these events of the month were exceeded by Lieut.-Colonel Leslie's conduct on the 29th ultimo. Detached to destroy the rifle pits of the pahs burnt by General Pratt in the early part of the month, the enemy fired at them, but they were strictly enjoined not to fire on account of some order said to have been issued by the general. The result was that 500 men, well armed and protected by artillery, were hunted over two miles of open country, most favourable for military operations, by less than a hundred natives, and it was not till the men were falling, and the enemy getting dangerously near to the rear-guard, that the latter faced about and fired in disregard of the injunctions of their commanding officer."

PARIS.

THE *Moniteur* of to-day contains a report made by Count Walewski to the Emperor on the subject of horses. A short time ago a commission under the presidency of Prince Napoleon reported on the same matter, and recommended the direct intervention of the government. The majority of the commission, strange to say, passed over in silence the commercial part of the question, and declared that with a slight augmentation of the breeding establishments, the remount of the cavalry could be satisfactorily accomplished. A few extra stables in France, Savoy, and Algeria, together with an outlay of 1,250,000 frs., and the requirements of that branch of the service would be answered. The minority, which was only a minority of one, wished the government establishments to be done away with altogether, and the supply of the cavalry left to private industry. Count Walewski sees much good in this view. To-day all the best horses in the country are immediately snatched up by the government, and the tone of every market depends on its purchases. Buyers prefer, too, to go elsewhere, being certain that nothing worth having will be left them; and besides this, the administration of war, in buying four-year-old horses in time of war, will have nothing to fall back upon. In fact, argues M. Walewski, it is the purchaser who destroys the market; and he concluded by offering for his Majesty's acceptance several propositions, which he hopes will have the effect of encouraging the breeding of horses in France, instead of being obliged, as at present, to depend for a supply on Germany, Belgium, and England.

A letter received here from Syria gives some interesting news. It states, amongst other things, that so horrid were the scenes through which the French soldiers had daily to pass, that even those most hardened by war, who had gone through the Crimean and Italian campaigns, were sickened at the sight of the human butcheries at Dier-el-Kamar and other towns. Heaps of half-putrefied bodies were to be seen in the streets with piles of wood close at hand, and all ready laid to burn out Christianity with fire; and in one case they came across an infant crucified in a window-frame. Fuad Pacha has complained bitterly that the French soldiers have refused to fraternise with his. But the French well know that, notwithstanding the orders issued by the Sublime Porte, the sympathy of the Turkish soldier is not with those who have been so cruelly persecuted. Fuad Pacha himself is represented as continually thwarting the combinations of General Beaufort. When he ought to hem in a part of the country, he opens his ranks; and when the net is drawn on shore, the French perceive with disgust that they have toiled hard and taken nothing. The Druse has gone off to the mountain.

High words have passed between the two chiefs, and in one instance the French commander, in order not to have his supplies stopped, had to threaten to fire on the Sultan's troops. Wherever the Turkish soldier goes there he spreads alarms; and General Beaufort is actually afraid to venture in force into some of the Christian districts, apprehending that Fuad Pacha, who hangs to his skirt like a leprosy, would insist on following him.

A case of Bourbon and Bon-bon occurred at Gaeta the other day. King Francis was standing in a battery talking to some officers of artillery, when a shell fell and burst close to the group. The young monarch, with perfect serenity, remarked, "'Tis but a dragée sent us by our good cousin," and without any further comment he continued his inspection. The father of the present, or late king as he is now more generally called, had a wonderful taste for such sweets. Those journals interested for the cause of Francis II., insist that he has 23,000 men in Gaeta, and charming expectations.

The Franco-Belge battalion at Rome—a part of which was present during Lamoricière's campaign—is stated to be growing in grace and numbers, and on the point of reaching its full complement. A great many enthusiasts from the pro-

Digitized by Google

vinces are joining. The Minister of War, too, has decided on the formation of a squadron of cavalry and a battery of artillery, which are to be commanded by French officers, and, indeed be, for the most part, composed of Frenchmen. This, coupled with the fact, that a nucleus of St. Patrick's Brigade is still retained at head-quarters, looks decidedly warlike on the part of the banner of the keys.

Quartermaster Bauer, of the 4th squadron of the Artillery Train in garrison at Metz, was tried the other day for assassinating his commanding officer. The case was brought before a court-martial of the 5th Military Division, and occupied it no less than seven hours, when the prisoner was sentenced to death. It will be remembered that Bauer shot Major Arrivet for refusing him leave of absence.

A great change is about to be made in the French army. Hitherto the pay of the soldiers has been regulated on the most moderate scale; but whatever that scale was, they have had the money to themselves, the necessaries being all furnished by government. The British system has been in force for several months in the 56th and 74th of the line, garrisoned at Paris, and is to be extended to the rest of the army, who will henceforth receive higher pay, and be put under stoppages. It is hoped by this means that the men, having a greater interest in the preservation of their clothing, will be more careful of it, and that thus a large sum will be annually saved to the state. This will not apply to all the articles of a soldier's equipment; the shako, for instance, and fighting gear, will still be furnished by government. The time which things bought by the soldiers themselves is to last is not laid down, but will depend entirely on their state. The men will have the right when they leave their different regiments of taking away with them all the articles which they have purchased. In mentioning last week the new tunic for the Imperial Guard, and in describing that now issued to the line, I forgot to add that two other changes have been for some time under consideration,—one, the abolition of the stock, which is replaced by a light blue handkerchief, roped round the neck, and which is to be continued; and another, the adoption of gaiters, similar to those worn by the Zouaves and Chasseurs of the Guard. This latter innovation has met with no favour in or out of the army. It has been most severely caricatured; is hideous and expensive. The blue ties, as far as comfort goes, will of coursebe a great boon to the soldier, especially when fighting in Algeria, or anywhere else where the work is hot; but how they will look when dirty, or how they will wash, remains to be seen.

The formation of the fourth battalion is being actively carried out, and as soon as they are completed the generals commanding divisions will occupy themselves with the organisation of active divisions, that is to say, divisions ready at any moment to enter on a campaign. These divisions will be fourteen in number, and two of them will be attached to each grand command. In this manner, without any augmentation of effective troops, or extraordinary expense, the Emperor's idea is to be carried out, of having in time of peace an army always prepared for war.

A M. Olry, of Nancy, had an audience of the Emperor on Sunday, during which he presented to His Majesty a breech-loading gun of his invention. This arm had already been examined by Marshal Canrobert, who reported favourably on it. The Emperor inspected it most minutely, and felicitated M. Olry on his invention, but it is not known whether it is of sufficient importance to warrant its being tried for introduction into the service.

A detachment of the 1st section of military workmen in garrison at Vincennes have just received orders to reach Toulon with all possible expedition, to embark for China. Several detachments of artillery have received the same instructions for the same destination. This information appears in a semi-official journal, dated the 19th December, that is to say, four days after it was known here that the Chinese war had come to a termination.

In execution of orders given by the Emperor, a bridge on a new system was, on Monday, thrown across the Seine, close to the bridge of D'Jéna. This operation was executed under the orders of General Forgeot, commanding the Artillery of the Guard. As, of course, no notice was given of this, very few persons were present. The Emperor who was there, accompanied by the Minister of War, Marshal Magnan, Marshal Pelissier, and many other officers of all grades, arrived at about half-past twelve. The throwing across of the bridge was confided to the Pontonniers of the Guard who were assisted by a regiment of Horse Artillery. The new boats on which the bridge was carried over the river are of iron instead of wood. They are composed of three pieces, which put together and are packed up with the greatest promptitude and facility. When the three parts are united the boat presents a length of about 40 feet. Once taken to pieces, these boats, placed on carriages constructed on purpose, are easily carried. The experiment succeeded perfectly. The bridge, which was about 40 yards long and formed on 4 boats, was completed in a very few minutes.

Several models have this week been presented to replace the capote now worn by the Grenadiers and Voltigeurs of the Guard, and the one which it is supposed will be finally adopted is the cloak at present worn by the Zouaves. This cloak is of light grey colour, and hardly reaches down to the knee; it suits very well the picturesque Turkish style, but will be sadly out of proportion with the tall bearskins of the Grenadiers.

In alluding to the short time taken by an American machine in making a cutter, the *Moniteur de la Flotte* remarks that in the *Gazette de France*, 20th July, 1679, is to be found the following: "Arnoux,'a marine agent at Toulon, built a vessel in seven hours. Everything had been so well prepared and laid out that 700 men were employed at this work, and worked with order and diligence until the vessel was completed, which was 100 feet long, was pierced for 40 guns, and had a rigging composed of 2000 ropes." This is what M. Lacroix calls being beforehand with the Yankees.

The *Monde* is about the only paper which condemns the abolition of the passport system. It says that at the end of the last century France looked on all foreigners as foes, and she was perfectly right in doing so. *Le Monde* does not turn round with time.

The new trials with La Gloire have again been postponed, owing to some defect in the machinery of the Algesiras.

THE NAVY.

ADMIRALTY, December 19.

APPOINTMENTS.

Captain—R. H. Risk to the Narcissus.

Commanders—Alexander Phillips to the Narcissus; Leveson Wildman to the Philomel; Thomas Heard to the Castor (additional), for service in the Trincomalee, training-ship for the Royal Naval Reserve.

Masters—W. C. Bicknell to the Asia, for the Rinaldo; Richard E. Pyne to the Cumberland, for the Challenger; Thomas J. Williams to the Asia, for the Osborne; John Scott to the Asia, for the Princess Royal.

Paymaster—William H. Ozzard to the Jason.

Second Masters—George C. Larken to the Diadem; Frederick Seaton (additional) to the Victory; Michael L. Grey to the Porcupine.

Midshipmen—H. D. Macaulay and R. B. Trollope to the Immortalité; John Hope to the Ariadne; W. J. L. Wharton and W. H. Jocelyn to the Jason.

Naval Cadets—G. A. G. Grey and J. N. Mercer to the Immortalité; F. G. M. Powell and F. G. Dundas to the Jason; Augustus Graham Houlton Ward (nominated), and Francis N. H. Harvey (nominated).

Assistant-Paymasters—Frederick Brune to the Philomel (in charge); Alexander C. Archdeacon to the Naiad (in charge); William B. Edkins to the Penguin.

Clerk—William H. Mitchell to the Ariadne.

ADMIRALTY, December 20.

PROMOTIONS.

Mates to be Lieutenants—C. R. Forest, C. S. Woodruffe, D. D. Yonge, H. H. Edwards, James W. Dennistoun, B. E. Cochrane, Francis L. Wood, and W. H. St. Clair. We are informed that the four last-mentioned officers have been promoted in accordance with a special recommendation from Captain Hewlett, for the excellent examination passed by them at the Royal Naval College.

APPOINTMENTS.

Paymaster—W. W. Warwick to the Narcissus.

Second Master—George G. Larken to the Philomel.

Clerk—William Phillips, to the Narcissus.

Assistant-Clerks—Arthur Hosdon to the Hero; Benjamin Urwick and Henry G. Herbert to the Victory; Charles J. Curgenven to the Narcissus; Francis H. C. Whiddon to the Impregnable; James A. Perkins to the Formidable; Henry Bullimore, to the Ariadne; William D. Pearce to the Britannia; John Watts, to the Cambridge; Gervose F. Mathews to the Fisgard; and Francis W. Sims to the Diadem.

COASTGUARD OFFICE, December 20.

REMOVAL.

Chief Officer—Mr. George Wellington Andrews, from Misner Haven to Newhaven.

Amethyst, 26, sailing-frigate, Captain Sidney Grenfell, Chatham. We referred last week to the admirable way in which this ship had been brought home. She has kept up her character to the last by the orderly and rapid manner in which she has been stripped and dismantled preparatory to her being paid off. She will be put out of commission to-day, and her crew will, we understand, be permitted to have the extended leave for which they applied to Vice-Admiral Johnstone at the time of their inspection at Sheerness.

Amphion, 36, screw steam-frigate, Captain T. Cochran, was at Malta on the 15th inst. She was under orders to proceed to the coast of Sicily to relieve the Agamemnon, ordered to Naples.

Argus, 6, paddle steam-sloop, Commander Herbert F. W. Ingram, was at Gibraltar on the 13th inst.

Barracouta, 6, paddlewheel steam-sloop, Commander William Wood, entered No. 8 dock in Portsmouth yard, as soon as it was vacated by the Bulldog, for a complete overhaul. The caulkers are busy on her, and the shipwrights are examining her masts, which it was thought were strained in the heavy weather she encountered on her passage home; a bit of her false keel, which she lost by touching the bar at the entrance of Nassau, New Providence, when no pilot was on board, has also to be supplied. It will be three or four weeks before she is completed, when it is expected she will return to the North American and West Indian station.

Boxer, 1, screw steam gun-boat, tender to Marlborough, Second Master and Commander Gulliver, was by the last accounts from Malta under orders to proceed to Marsala, where she is to be stationed during the winter.

Bulldog, 6, paddlewheel steam-sloop, is still under the hands of the shipwrights and engineers in the basin of Portsmouth dockyard. She has been supplied with a new foremast and bowsprit during the last week. She advertises at the Royal Naval rendezvous for a number of A.B.'s and petty officers.

Centurion, 80, screw liner, Captain Henry D. Rogers, C.B., was left in the Tagus on the 18th instant, by Rear-Admiral Stopford, to wait the arrival of the St. Jean D'Acre.

Cordelia, 11, screw steam-sloop, Commander C. E. H. Vernon, was in Manukan harbour, New Zealand, on the 4th of October.

Cressy, 80, screw liner, Captain Thomas Harvey, was in the Bay of Naples by the last accounts.

Duke of Wellington, 131, screw steam-ship, in the dock of Portsmouth yard, in her dismantled state, with large tented tarpaulins on her deck, covered with snow, presents the appearance of being winter-bound in the polar regions; and painfully recalls to visitors in the docks the recollection of Franklin, and of his devoted and gallant companions.

Euryalus, 51, screw frigate, Portsmouth. This ship was originally intended for the flag of Sir Baldwin Walker, about to proceed as naval Commander-in-Chief at the Cape of Good Hope; but as, on examination, it was discovered that a longer time than could be well spared would be required to repair her decks, which have turned out to be very defective, it has been decided to commission the Narcissus at Devonport instead. Has an excessive use of the holy-stone been the cause of the present state of the decks of the Euryalus?

Eurydice, 26, sailing-frigate, is ordered for commission in the spring as a sea-going training frigate. Her cruises will extend from 9 to 12 weeks each. Commander M. Lowther will, it is stated, command her. The Eurydice has been for some time past preparing for this duty, and we are glad t find that the recommendations frequently urged in this journal in reference to the establishment of such a vessel are likely to be attended to.

Fawn, 17, screw steam-sloop, Commander Ralph P. Cator, was in Auckland harbour, New Zealand, on the 4th of October.

Foxhound, 4, screw steam-sloop, Commander Alfred Mitchell, was at Malta on the 15th inst., waiting to convey the English mail to Vice-Admiral Martin's fleet at Corfu.

Frederick William, 86, screw steamship, has been hauled down from the shear jetty to the pitch jetty, alongside Portsmouth dockyard, in order to make room for the Retribution; a few shipwrights and engineers are at work on board in finishing up.

Hannibal, 91, screw liner, flag-ship of Rear-Admiral Mundy, Captain Arthur Farquhar, was in the Bay of Naples on the 9th inst. The weather off Naples had been very severe, and the British squadron had on one occasion steam up to keep the ships to their anchors.

Harrier, 17, screw steam-sloop, Commander Sir Malcolm MacGregor, Bart., which was recalled on Saturday, sailed from Spithead on Monday for Australia, touching at Plymouth for latest orders.

Himalaya, 6, iron screw steam-transport. Captain John Seccombe, has made good her defects at Plymouth, and has been ordered round to Portsmouth.

Immortalité, 51, screw steam-frigate, Captain Hancock, is still lying alongside the hulk in Portsmouth harbour, but is nearly ready for sea, with the exception of her crew, which is incomplete in all grades. Now that the painters have been at work on her sides, she begins to present a magnificent appearance, and is truly a command which any gallant officer may be proud to hold.

Iris, 26, sailing frigate, Commodore William Loring, C.B., was in Auckland harbour, New Zealand, on the 4th of October. This ship's orders for England have been out some time as she has been in commission four years within a week, but the disturbances in New Zealand have tended to prevent her leaving the station. The accounts from Auckland which have reached this country show that the inhabitants were panic-struck in the most absurd manner, and in order to quell the fast-spreading alarm, the Naval Brigade had been ordered up to protect the city.

Kestrel, 1, screw gun-boat, Lieutenant and Commander C. D. Robinson, left Shanghai for Chusan on the 4th of October, but returned again to Shanghai after visiting Ningpo, on the 19th of the same month, and remained up to the last accounts.

Lynx, 4, screw steam gun-vessel, Lieutenant and Commander Henry Berkeley, at Devonport, will probably be paid off this day. The Lynx was commissioned in November, 1857, by Lieut.-Commandant Henry Berkeley, and dispatched to the West Coast of Africa, from thence ordered to the Cape station. During her period of service the Lynx carried the Bishop of Mauritius on a visitation to the Seychelles Islands, and her commander was one of two commissioners appointed to inquire into the condition of those holding the relative positions of master and servant in these islands, and drew up a report accordingly. The Lynx was employed in relieving and assisting the expedition of Dr. Livingstone in the Zambesi Delta, and, cruising on the eastern coast of Africa, captured two piratical Arab dhows with slaves on board. The Lynx took an active part in the suppression of a rebellion against the Sultan of Zanzibar, under the sanction of the British consul, for which Lieutenant Berkeley received the thanks of the Lords Commissioners of the Admiralty, of the British consul, and a splendid scimitar from the sultan. Lieutenant Berkeley having, during the commission of the Lynx, forwarded to the Admiralty a very able report on the Seychelles Islands, their Lordships in consequence granted him a gratuity of 100*l*. Lieutenant Berkeley holds handsome testimonials from Dr. Livingstone and the Bishop of Mauritius, in which these distinguished individuals speak of his professional attainments.

Lyra, 9, screw steam-sloop, Commander R. B. Oldfield, has been ordered home from the Cape of Good Hope station. The Lyra was commissioned at Woolwich in the month of November, 1857, and sailed from England the following January. She has, therefore, had the pennant flying already upwards of three years.

Megæra, 6, iron screw steam troop ship, Commander Henderson, came out of dock on the 19th inst., having had her bottom cleaned, and the screw-shaft, which had been jammed in shipping the fan in Malta harbour, re-arranged. She is lying alongside the jetty of Portsmouth dockyard, and as soon as the engineers have examined her boilers, and she has received coals, she will be ready for service again, and will probably carry troops to the Mediterranean.

Melpomene, 51, screw steam-frigate, Captain Charles J. F. Ewart, arrived at Malta on the 7th inst., from Corfu, on her way to Alexandretta, to relieve the Liffey at that port. She encountered very severe weather on the passage. She had on board the Princess Darinka of Montenegro and suite. Her Highness is on her way to Paris, on a visit to the Empress of the French, at the express invitation of Her Imperial Majesty. It is stated that the Princess will also visit the Queen of England before returning to her own country. It will be remembered that Prince Danilo, husband to this Princess, was barbarously assassinated at her side, a few months ago.

Mersey, 40, screw steam-frigate, Captain Henry Caldwell, C.B., after having looked into the Tagus, left that river on the 15th inst., and continued her voyage to the West Indies.

Narcissus, 51, new screw frigate at Devonport, has been selected for the flag-ship of Rear-Admiral Sir Baldwin Walker, Bart., the newly nominated Commander-in-Chief at the Cape of Good Hope. The Narcissus will be put into commission for the first time; and as the flag-captain is a native of Plymouth, and well known in the neighbourhood, he is more likely to pick up a ship's company there than at Portsmouth. The Narcissus is of the same horse-power (400) as the Euryalus, but 300 tons heavier burthen. She is quite complete as regards her machinery, and will soon be out of the hands of the Dockyard people.

Niger, 14, screw steam-ship, Captain Peter Cracroft.

Digitized by Google

This ship, as previously stated by us, has been ordered home. She was by accounts from New Zealand up to the 4th of October, in Manukan harbour.

Orion, 91, screw liner, Captain J. B. E. Frere, was in Malta harbour on the 15th inst.

Pelorus, 21, screw steam-corvette, Commodore F. B. P. Seymour, was at Wellington, New Zealand, on the 4th of October.

Penguin, 1, steam gun-vessel, at Devonport, is ordered to be commissioned as tender to the Narcissus Sir Baldwin Walker's flag-ship. The Penguin is 431 tons, and has a steam power of 80 horses.

Persian, 12, sailing-sloop, Commander Edward Hardinge, has been ordered home from the Cape of Good Hope. The Persian was put into commission at Sheerness in the month of October, 1857, and left England in December of the same year. She has, therefore, been the ordinary time in commission. This will, doubtless, be the last foreign or colonial service on which the Persian will be employed. We shall probably next hear of her as a depot for supplying fuel to the "screws" that have driven her and her sisters from the effective list of the Navy. A few more payings-off, and the once all-powerful sailing Navy of Great Britain will be represented by the two or three vessels now devoted to the training of boys at the different ports.

Pioneer, 6, screw steam-sloop, Commander Hugh A. Reilly, arrived at Shanghai on the 19th of October with dispatches from the Peiho.

Prince Regent, 91. The after portion of this converted ship is well up in frame. She has been lengthened about fourteen feet aft, or just sufficient to allow for her screw. It is not likely that this ship will ever attain great speed, her bluff bows, broad beam, and comparative shortness, being against rapid motion. She will, however, be a strong ship, for her timbers are as sound as when she was launched a quarter of a century ago. A strong gang of shipwrights and mechanics are employed upon her, and it is said that she is to be out of dock next March.

Quail, 1, screw gun-boat, Lieutenant-Commander Noel Osborne, was at Gibraltar on the 13th inst.

Queen, 86, screw liner, Captain Charles F. Hillyar, was in the Bay of Naples on the 9th inst.

Renown, 91, screw liner, Captain Arthur Forbes, was in the Bay of Naples on the 9th inst.

Retribution, 28, paddlewheel steam-frigate, Captain Edgell, C.B., has been shifted from the pitch jetty to the shear jetty of Portsmouth dockyard, and her masts removed previous to going into dock for a thorough refit. It is stated that no ship arriving from foreign service ever required it more. It was all the ship could do to get home, with her boilers given out, her seams yawning, and in fact "all to pieces." She is said to be very rotten forward. She will be paid off to-day.

Rinaldo, 17, screw steam-sloop, in the basin of Portsmouth dockyard, has made great progress in fitting out during the last week. Her masts are stepped, and rigging well forward. It is stated she will be placed for the present in the steam reserve.

Royal Albert, 121, screw three-decker, flag-ship of Rear-Admiral Stopford, Captain H. J. Lacon, arrived in Plymouth Sound on Thursday, from Lisbon, which she left on the 10th inst., in company with the Conqueror, 101, Captain Edward S. Sotheby, C.B.; the Donegal, 101, Captain Henry Broadhead; the Aboukir, 90, Captain Douglas Curry; and the Emerald, 51, Captain Arthur Cumming. All the ships were under canvas until Monday, when steam was got up. Fine weather was experienced until Wednesday evening, when a heavy squall carried away the Emerald's mainyard close off in the slings. This accident did not, however, interfere with the progress of the Emerald, for she entered the Sound with the rest of the squadron.

Scylla, 21, screw steam-corvette, Captain Rowley Lambert, was in Malta Harbour on the 15th inst., but would probably leave on the evening of that day, or the following morning, for the Levant, touching at the Piræus *en route*.

St. Jean d'Acre, 101, screw liner, Captain the Hon. C. G. J. B. Elliot, C.B., was passed on the 13th inst., under steam, steering west. She had been out 34 days from Malta to Gibraltar. The St. Jean d'Acre will proceed to the Tagus, where she will relieve the Centurion.

Star, 4, screw steam-sloop, 200 horse-power, was launched in a very successful manner last Saturday, at 3·30 p.m., from the building-yard of Messrs. C. J. Mare & Co., at Millwall, Isle of Dogs. In the absence of a lady, the ceremony of christening was performed in the old-fashioned English way by a Parsee gentleman, named Dadabhoi Navroji, who, in a loud tone of voice, and very excellent vernacular, wished success to the Star. A tug was in attendance to tow her into the West India Docks, where she will receive her machinery. The Serpent, a sister-vessel of the Star, has, we are informed, averaged a speed of 11 knots during her trials at the Government measured mile. The Star has been built from designs supplied by Sir Baldwin Walker, under the superintendence of Mr. Henwood, the draughtsman of Messrs. Mare & Co.

Trincomalee, 26, sailing-frigate, attached to the reserve at Chatham, is ordered to be brought up from her moorings in the Medway and placed in dock, where she is to be fitted as a training ship for the Naval Coast Volunteers at the port of Sunderland. She is to have a complement of 26 officers and gunners.

Undaunted, 51, screw steam-frigate, building at Chatham. Preparations for launching this ship on New Year's Day have been commenced. A large gallery at the head of the slip has been erected, and this is sufficiently commodious to accommodate a considerable number of spectators. As soon as she has been launched she will be fitted for the second division of the steam reserve at Chatham.

Urgent, 6, iron screw steam troop-ship, Commander H. W. Hire, left Shanghai on the 17th of October for the Peiho.

Victor Emmanuel, 91, screw liner, Captain W. J. C. Clifford, C.B., was at Malta on the 15th inst., making good her defects.

THE ARMSTRONG GUN.—The manufacture of the 100-pounder Armstrong guns, intended for naval service, is now making rapid progress at the royal gun factories, Woolwich. Six of that species were yesterday successfully tested at the Arsenal butt, and were passed for service. The new principle introduced by Sir William Armstrong for the purpose of affording additional strength to the breech and chamber throughout, namely, of forging that segment entire, and thereby admitting the metallic fibres horizontally, is now pronounced an undoubted improvement, as the failures, which were of frequent occurrence at former trials, occasioned by the weakness in the thread of the screw, the bursting of the breech, and the separation of the segments or opening of the crevices, appear to be totally remedied. The whole of the heavy guns, it is stated, will in future be manufactured according to that principle. Some 25-pounders are likewise to be manufactured for ship service, a sample of which has been inspected and approved by the Board of Admiralty.

In accordance with Admiralty orders received by Captain Goldsmith, C.B., at Chatham, the mechanics and other workmen employed in the saw-mills, as well as the smiths engaged in the factory, ceased working overtime on Monday last.

Letters of recent date from Corfu state that the winter has now regularly set in there, accompanied by the sudden changes which are its peculiar characteristics, alternating from the sharp, cutting north wind, which blows across the snow-capped mountains of Albania, to days of genial warmth and brilliant sunshine, interspersed with strong siroccos and showers of rain. Numerous shooting parties from Vice-Admiral Martin's fleet had been made, to visit the mainland, and good sport was expected from the fact that woodcock had rarely been more abundant.

ARMOUR-CLAD VESSEL FOR RUSSIA.—The *Levant Herald* says that the Russian admiral, Count Putiatine, has left London for St. Petersburgh, taking with him, for Imperial approval and ratification, the drawings and contract for an iron-plated vessel of war, which is to be built forthwith on the Thames.

CONTRACT OF RUM FOR THE NAVY.—The contract for 100,000 gallons of rum for the use of the Navy, has been taken by the undermentioned firms:—Henry White & Co., Thomas Lowndes & Co., Howe & Sons, and Alfred Lamb.

Mr. George H. K. Bower, master-commander of the Admiralty yacht Osborne, has been presented by the Empress of Austria with a magnificent diamond ring of the intrinsic value of 150 guineas, in recognition of his valuable services and courteous attention to the suite belonging to her Imperial Majesty during the late run from Antwerp and Plymouth to Madeira, when the yacht encountered a long continuance of very tempestuous weather.

The Rev. William Lake Onslow has been appointed chaplain and naval instructor to the St. George. The reverend gentleman was in the Euryalus during the whole time that Prince Alfred was in her, and he has now been selected to follow His Royal Highness into his new ship.

The Navy Gazette.

ADMIRALTY, DECEMBER 18.

NAVAL PRIZE MONEY.—The distribution of the proceeds and tonnage bounty of a slave bark, name unknown, captured on the 18th of September, 1859, by Her Majesty's ship Conflict, commenced yesterday (Friday), at Somerset House. The following are the shares due to an individual in the several classes:—

	£	s.	d.		£	s.	d.
Flag share ...	128	4	4	Sixth class ...	22	6	3
Commander ...	304	10	5	Seventh class ...	11	17	6
Third class ...	69	8	1	Eighth class ...	7	8	8
Fourth class ...	44	12	4	Ninth class ...	4	19	2
Fifth class ...	21	15	8	Tenth class ...	2	9	6

The *Gazette* announces that preparations are being made for the intended distribution of the proceeds and tonnage bounty of the slave schooner Stephen H. Townsend, captured, on the 26th of July, 1859, by Her Majesty's ship Archer; and of the proceeds and tonnage bounty of the slave brigantine Lillie Mills, also captured, on the 20th of September, 1859, by Her Majesty's ship Archer.

ADMIRALTY, DECEMBER 21.

Notice is given to all persons interested therein, that preparations are now being made for the intended distribution of the proceeds and tonnage bounty of the slave brigantine Lillie Mills, captured on the 20th September, 1859, by Her Majesty's ship Archer.

Notice is given to all persons interested therein, that preparations are now being made for the intended distribution of the proceeds and tonnage bounty of the slave brigantine Eloisa, captured on the 24th September, 1859, by Her Majesty's ship Archer.

PAY IN THE NAVY AND CIVIL SERVICE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—A "Paymaster, R.N.," whose letter appeared in last week's GAZETTE, is mistaken in supposing that increase of salary in the civil departments is simply based upon length of service. On the contrary, in all the public offices there are several grades or "classes" of clerks—like the classes of Paymasters in the Navy—and promotion from a lower to a higher class does not depend upon seniority or length of service, but upon qualification for the superior office, merit, and fitness for the post.

In each class, it is true, there is an annual increase of salary for length of service up to a certain limit—sometimes of 5*l.*, sometimes 10*l.* a year, and in the higher grades 15*l.* or 20*l.* In the Admiralty departments, for instance, at Somerset House, and also in the largest offices of the War Department, a clerk enters at 90*l.* a year, and rises to 300*l.*, in the third class, at the the rate of 10*l.* only a year. He cannot reach that maximum, therefore, by length of service till 21 years, and some never rise to a higher salary; but I find that the Paymasters of the Navy in their Memorial propose that 250*l.* shall be their minimum full pay on promotion; that three years' further service shall add 70*l.* to this (being an annual rise of 23*l.*); that another three years' service shall add 80*l.* more (a further rise of about 27*l.* a year); and so on, till in 12 years every paymaster shall have no less than 600*l.*,—besides extra allowances to paymasters of flag-ships, &c.

Now, I beg to say, that I know of no office "under Government" in which the civil servants of the Crown can rise to such very high salaries by mere seniority and length of service, or any in which the progressive increase of salary is nearly so great as what the Paymasters of the Navy seek for.

I venture to think that such routine advancement would soon damage the efficiency of any service, civil or military; and since the Paymasters of the Navy refer to the mode in which civil servants are remunerated and advanced in the Service, I would beg leave to call their attention to the terms of the Order in Council of 30th January, 1816, under which promotions in the Admiralty departments are regulated, and which is in fact the Magna Charta of the Admiralty clerks.

I rather think that both the Naval and Military services would be benefited, if the pay of the several ranks of officers was based upon a similar principle, and upon analogous grounds to those stated in the first part of the following quotation. It is certainly very hard to keep a man a lieutenant all his life, on 10*s.* or 11*s.* a day; but it would be worse to promote him if he is unfit. It might be well, therefore, to let him have a gradual increase of pay, as lieutenant, till say it reached 15*s.* or 18*s.*, in order that no man should be promoted merely out of compassion, to the detriment of the Service. And so of other grades, both in the Army and Navy.

The words of the Order in Council are as follows:

* "In all these classes, and in all the departments, we humbly propose that the increase from the minimum to the maximum should be at the rate of ten pounds per annum; *but as we are convinced that no system could more effectually tend to repress ability and to discourage zeal in public servants than a system in which persons should rise by mere length of service, and without reference to their talents or diligence, to high stations and large salaries*, we earnestly propose that your Royal Highness should be pleased to declare that, though the salaries of the clerks shall in each class proceed from the minimum to the maximum by length of service in the class, *yet that the removal from a lower class to a higher shall be the reward of qualification for the duties of the higher class, without any reference whatsoever to the seniority the person may hold in the lower class*; and we annex the more importance to the principle in the proposed arrangement, because, if it be not strictly and conscientiously attended to, the great advantage to the public service which we expect from this system will be entirely lost, and great injury to the public interests may inevitably ensue.

"Under the system which at present exists, there is every reason to believe that persons have been promoted by seniority into vacant situations, for which they were less fitted than junior clerks; but they have been so promoted because their inferior salaries are at present so small, that the only hope that a clerk can have of being able to live and maintain a family, even in the lowest and most frugal manner, is by his being in time promoted to one of the situations to which salaries not quite so small are assigned, and that no length of service could, without such promotion, better his condition; it was therefore not unnatural that the heads of departments were unwilling to condemn an individual to penury for his whole life. But under the proposed new system, if your Royal Highness shall be graciously pleased to approve of it, in which the length of service of each man in his several class will have its proportionate reward, and in which a fair provision will be established for the maintenance even of the lowest class, *it is to be hoped and expected no instance will occur of persons promoted from one class to the higher, or appointed to any office on pretence of seniority, or indeed any other ground than their peculiar fitness for the situation to which they may be called.*"

I may add that the same principles of promotion were specially re-affirmed by Order in Council of the 11th of August, 1854, when additions were made to the salaries and higher clerkships in the Admiralty Departments.—I am, &c.,

PALMA NON SINE PULVERE.

THE MILITIA.

The Militia Gazette.

WAR OFFICE, PALL MALL, DECEMBER 18.

Memorandum—2d Regiment of Royal Cheshire Militia—Her Majesty has been graciously pleased to accept the resignations of the commissions held by Ensigns George Ernest Elmes Blunt, and John Carmichael in the above regiment.

1st Devon Regiment of Militia—Henry Reginald Courtenay to be Supernumerary Lieutenant; Henry Bourchier Toke Wrey to be Supernumerary Lieutenant.

2d Devon Regiment of Militia—Priestly Birch to be Lieutenant, vice Lopes, resigned.

WAR OFFICE, PALL MALL, DEC. 21, 1860.

The Queen has been pleased to appoint William Alleyne Cecil, commonly called Lord Burghley, Lieutenant-Colonel-Commandant of the Northamptonshire and Rutlandshire Regiment of Militia, to be one of Her Majesty's Aides-de-Camp for the service of Her Militia Force, with the rank of Colonel in that Force.

3rd Regiment of the Royal Surrey Militia—Ensign Frederick Brown to be Lieutenant, vice Flower, promoted; Ensign William Frederick Rogers to be Lieutenant, vice Walpole, resigned; Ensign John Murray Ward to be Lieutenant, vice Platt, resigned; Francis John Bowerman Beckford, Esq., to be Supernumerary Lieutenant; Samuel Birchmore, Esq., to be Supernumerary Lieutenant.

Essex Rifles Militia—John Barrett Lennard, Esq., late Lieutenant Royal Engineers, to be Captain, vice Kirby, promoted.

7th Regiment of Lancashire Militia—John George Cooke, Gent., to be Lieutenant.

---

* This language is the more impressive, as being addressed by the Lords of the Admiralty to the Prince Regent in a Memorial which, on approval, became the wording of the "Order in Council" itself.

VOLUNTEERS.

METROPOLITAN.

THE HON. ARTILLERY COMPANY.—At a dinner given this week to celebrate the anniversary of this the oldest corps under the Crown, Lord Colville, the Lieut.-Colonel, gave an interesting historical sketch. He said, it was not to be wondered at that the Artillery Company should be proud of their origin, and should deem it fitting to celebrate an anniversary which redounded so much to their credit as a body. Not only were they commemorating the revival of their regiment 250 years ago by King James I., but they were the undoubted descendants of an armed body which existed in the City of London in the reign of Henry VIII. They did good duty in the troubled times of Queen Elizabeth in preserving the peace of the City, and they did duty also in Tilbury Fort at the period of the Spanish Armada. King James I., in his patent, called them his "Ancient Artillery Company of London," so that even then they could not have been very young; and from that time forward they continued to exercise, under successive writs from different sovereigns, and were invariably commanded either by the sovereign or by a prince of the blood royal. Their roll, moreover, bore the names of many of the most distinguished characters that existed during the 17th and 18th centuries. In the civil wars during the reign of Charles I. and the Commonwealth the company espoused the Parliamentary side, and under the leadership of General Skippon, who subsequently became their commander, they tended very much, by their gallantry at the first battle of Newbury, to save the Parliamentary army from defeat. In 1638, after having performed their martial exercises with very great *éclat* before the Lord Mayor and the civic authorities, in Merchant Taylors' Hall, they received at their hands, as a reward for their meritorious exertions, the lease of their present ground at Finsbury, which they had held ever since, moving in 1640 to their present abode. On the Restoration, in 1660, James, Duke of York, afterwards James II., became captain-general, and from that period to the end of the 18th century the company continued to hold its position as an exercising armed body in the City of London; and was frequently called on to assist in preserving the peace of the City—on several occasions receiving not only the thanks of the civic authorities, but also of the Government of the country. In 1798, an invasion being anticipated, a body of troops amounting to 8000 men, of which the Hon. Artillery Company formed part, was appointed, under the command of the Earl of Harrington, to defend the City. On the 4th of June, 1799, and again in 1803, the corps was present at reviews held in Hyde-park, before George III. On the first occasion 8000 Volunteers were present, and in 1803 no less than 30,000 Volunteers were reviewed on two successive days—15,000 on each—when the Artillery Company turned out upwards of 1000 strong. Again, in June last, the place of precedence on the right of the line was accorded to the Artillery Company. When, on the death of the lamented Colonel Fitzroy, he had the honour, on the recommendation of His Royal Highness the Prince Consort, of being appointed to the lieutenant-colonelcy of the regiment—its strength amounted to 444 members; but he was proud to say that the spirit which had so generally pervaded the country had not been wanting in its ranks, and that within the last year 300 new members had been added, and with its numbers its efficiency as a military body had also increased. A troop of horse artillery had been added, of which all but the guns were supplied by the resources of the members themselves. During the year there had been 124 musters of the regiment for drill and military purposes, exclusive of musketry instruction and recruit drill.

LONDON RIFLE BRIGADE.—On Saturday evening the ceremony of presenting the prize medals recently competed for by the various companies of the London Rifle Volunteer Brigade, at Wimbledon Common, took place in Guildhall. A large number of ladies and gentlemen were present to witness the interesting ceremonial, and the members of the cadet corps, who attended in strong force, were evidently much gratified with the proceedings. Captain-Adjutant Smith having ordered the brigade to form company, called the successful competitors to the front. The conditions were five rounds at 300, 400, 500, and 600 yards, making twenty rounds in the aggregate, and the following were the successful competitors with the total number of points scored by each winner:—Company A. Corporal B. Thorpe, 17; B. Sergeant Falconer, 14; C. Private E. J. Barron, 19; D. Sergeant Jones, 19; E. Private W. Kelley, 11; F. Sergeant Purchase, 14; G. Private J. Waldron, 12; H. Sergeant Cuthbert, 13; I. Private Crowley, 5; K. Captain Finch, 15; L. Private J. M. Gardner, 13; M. Captain Hopkinson, 14; N. Private F. Butler, 14; O. Sergeant Stuckey, 14; P. Private H. Frere, 14; Q. Private C. Young, 17. There were 135 entries, and the arrangements were under the able superintendence of the sergeant instructor of musketry, Mr. William Wyatt Grainge. The medals were of an elegant design, and bore an inscription with a wreath of laurel, "London Rifle Brigade, enrolled 1859," and on the reverse the figure of a rifleman, standing on the sea coast, and with the well-known motto, "Defence, not Defiance."

2ND (SOUTH) MIDDLESEX RIFLES.—On Thursday evening a public meeting was held in the vestry hall, King's Road, Chelsea, to promote the formation of a cadet company in connection with this corps. Lord Ranelagh presided. After addresses from several speakers a resolution was carried, pledging the meeting to support a cadet corps in connection with the South Middlesex Rifles; and a vote of thanks to the chairman closed the proceedings.

9TH (WEST) MIDDLESEX RIFLES.—On Thursday the members of the corps assembled in uniform at the University College, in Gower Street, where the ceremony took place of distributing the prizes for skill in shooting, awarded on the recent competition between members of the corps. Many ladies and other friends having been invited to honour the occasion with their presence, it rather assumed the aspect of a social conversazione, and speeches were made by the colonel-commandant, Lord Radstock, who presided, by Major Wilkinson, of the Highgate corps, Professor Key, Sir Thomas Philips, Sir James Hamilton, and the Rev. J. A. Cox, chaplain to the corps. Lord Radstock gave a most gratifying account of the zeal, discipline, and good behaviour of the corps, which musters now 600 men. He said that Colonel M'Murdo, upon inspecting them had expressed his satisfaction with the efficiency of their drill after only a twelvemonth's training. The prizes were then handed by Lord Radstock to the successful candidates, one in each of seven companies, and the battalion prizes, besides the special prizes of a silver cup won by Mr. Edward Lee, a Westley Richards' rifle won by Sergeant De Morgan, a long Enfield rifle won by Corporal Key, and the challenge cup won by Mr. C. Hall. The record of the number of points obtained by them in shooting these matches at the various distances successively prescribed, gave evidence of a high degree of skill in the use of their weapon.

NOTTINGHAMSIHRE.

VOLUNTEER INSPECTIONS.—The Volunteers of Mansfield, Worksop, and East Retford, have during the present week been inspected by Major Dick, who in each instance has congratulated the Volunteers upon their proficiency and numbers.

A PERFECT BULL.—A correspondent, in one of our contemporaries, declares that the men of the Volunteer corps to which he belongs, being dressed in dark grey, "are extremely invisible when seen individually." The editor wisely declares, in a precautionary notice, that he is not responsible for his correspondent's opinions.

AWARD OF PRIZES. — The following prizes have been awarded to the Volunteers under instruction at the School of Musketry at Hythe:—First Prize—a Whitworth rifle, value 25*l.*, to the Volunteer who made the most points from 400 to 900 yards—Captain House, 36 points. Second prize,—a Westley Richards Rifle, value 15*l.*, to the Volunteer who made the most hits from 400 to 900 yards—Captain Macgregor, 31 points, 28 hits. Third prize—a cup, value 5*l.*, to the Volunteer who made the most points standing—Captain Gough.

The Volunteer Gazette.

(Late Special Correspondent of *The Times*.)

The subscription is 7*s.* 7*d.* per quarter, or 30*s.* 4*d.* per annum, payable in advance, postage included (excepting abroad, which varies according to the route and destination). All Editorial Communications should be addressed to W. H. RUSSELL, Esq., and business letters and advertisements to MR. ARCHIBALD GRAHAM, to whom post-office orders, &c., are payable. Advertisements received up to Thursday evening. The Paper is published every Saturday in time for the Morning Mails.
Office, 16, Wellington Street, Strand, London, W.C.

STAFF EXAMINATIONS.—ALL BOOKS REQUIRED for Staff and other Examinations may be had at
MITCHELL'S MILITARY LIBRARY, 39, CHARING CROSS, S.W.

Just published, with Maps and Index,
THE ANNALS of the WARS of the XVIIIth CENTURY.
By Lieutenant-General the Hon. Sir E. CUST.
Volume I. 1700—1739. | Volume III. 1760—1783.
Volume II. 1739—1759. | Volume IV. 1784—1795.
Volume V. 1796—1799.
Each Volume is complete in itself, and may be had separate, price 5*s.* each.
"A military text-book."—*Athenæum.*
"The 'Annals' are invaluable to the soldier who desires to know the history of his profession."—*Times.*
"These volumes supply a store of profitable reading to the soldier or sailor."—*Saturday Review.*
"A lucid summary of all the most important operations (naval as well as military) of the eighteenth century."—*Army and Navy Gazette.*
W. MITCHELL, Military Bookseller, 39, Charing Cross, London, S.W.

BOX OF MILITARY BLOCKS, illustrative of the Field Exercise and Evolutions of the Army, 10*s.* 6*d.*
A CATALOGUE OF MILITARY BOOKS SENT ON APPLICATION.
W. MITCHELL, Bookseller and Publisher, 39, Charing Cross, S.W.

THE LONDON RIFLE BRIGADE BAND of 21 performers, is provided entirely by H. DISTIN with his newly-invented VENTIL-HORNS. Distin's new RIFLE BUGLE, adopted and sealed as the Government pattern for the Army, can now be had, complete, price 2*l.* 2*s.*, from the Contractor, at his Manufactory, 9, Great Newport Street, St. Martin's Lane, W.C. Estimates for Bands post free. Retail Depot, 21, Tichborne Street, Regent Street, W.

JOHN KÖHLER,
MILITARY MUSICAL INSTRUMENT MAKER,
35, HENRIETTA STREET, COVENT GARDEN, LONDON, W.C.

BUGLES FOR VOLUNTEER CORPS, Government pattern, corresponding to those used in the Line, very best make, price, in copper, 42*s.*, or strongly electro-plated, 63*s.*; green cord and tassels, 3*s.* 6*d*; silk ditto, 8*s.*; enamelled leather case, with strap and buckle, 12*s.* Sent carriage free on receipt of a remittance.—BOOSEY & SONS, Military Musical Instrument Manufacturers, Holles Street, London, W. Volunteer Bands furnished with instruments and music of every description.

RIFLE VOLUNTEER BANDS.—Officers in command are invited to apply to BOOSEY & SONS for a LIST OF THEIR MILITARY MUSICAL INSTRUMENTS, forwarded free.—BOOSEY & SONS, 24, Holles Street, W.

BENSON'S WATCHES.
"Perfection of mechanism."—*Morning Post.*
Gold Watches, 5 to 100 guineas; Silver, 2 to 50 guineas. Send two stamps for Benson's Illustrated Pamphlet, descriptive of every construction of watch now made. Watches sent to all parts of the world.—33 and 34, Ludgate Hill, E.C.
Established 1749.

TO OFFICERS ON THE HALF-PAY LIST, &c.—Messrs. W. R. LOOKER & CO., ARMY, NAVY, AND COLONIAL AGENTS, undertake Receipt and Remittance of Full and Half-Pay, Pensions, &c., and Agency generally, in London, at a fixed charge of ONE GUINEA PER ANNUM. A detailed Circular sent on application; and the necessary Power of Attorney can be sent by post, if desired.—12, Pall Mall East, London, S.W.

MONEY ADVANCED on BILLS, PROMISSORY NOTES, POST-OBIT BONDS, or other securities, and at 5 per cent., on property derived under wills or settlements, without publicity or delay. Confidential applications may be addressed to Mr. MORRIS, Solicitor, 11, Beaufort Buildings, Strand, opposite Exeter Hall, W.C.

MONEY.—CASH ADVANCES TO ANY AMOUNT.—LOANS upon REVERSIONARY PROPERTY at £5 per cent.—Apply to Mr. GUMMER, 14, Duke Street, St. James', S.W., personally and by letter.

NOTICES TO CORRESPONDENTS.

If "AN ADMIRER OF BOTH PAPERS" will be good enough to refer again to the conclusion of our article, he will find we were quite aware that 12 feet square and 12 square feet are very different, and did not suppose the *Saturday Review* could mean the former, in the unusual phraseology it employed to indicate "4 feet square." We noticed it to prevent others misunderstanding what is the real size of the Warrior's ports.

All correspondence, &c., must stand over this week, owing to unusual pressure on our columns.

The "SAPPER" who asked if he could count his former service of ten years in the corps from which he had purchased his discharge, and into which he re-enlisted six months afterwards for twelve years, is informed that by Circular General, No. 84, F. 8, Recruiting Depôt, dated 4th March, 1858, he will be allowed to reckon his former service towards pension if he re-enlisted after June, 1857.

RED JACKET is informed that he will receive the requisite information at the Austrian Embassy. There are much greater impediments to be overcome in the case of Prussia.

A SUBSCRIBER is informed that no decision has as yet been formed respecting the establishment and site of a second school of musketry.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the EDITOR cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

It is particularly requested that applications for copies of the ARMY AND NAVY GAZETTE, &c., and advertisements be sent to the Publisher, MR. ARCHIBALD GRAHAM, and not to the EDITOR.

Army & Navy Gazette.

LONDON, SATURDAY, DECEMBER 22, 1860.

The very unexpected telegram from St. Petersburgh, conveying the dénouement of the Chinese drama, has acted as a complete damper to all news-collectors, club oracles, and gossips. How many a leading article has been curtailed, how much vaticination and denunciation have been nipped in the bud; what hints, inuendoes, and Burleighan shakes of the head have been prematurely cut off. The loudest talker, the most vehement newspaper denouncer, the most mysterious purveyor of secret or special intelligence, has lost his occupation, and having suddenly jumped from the first act to the fifth, from the preface to the last chapter, they must now wait patiently for nearly a month till the details by which the grand result has been brought about gradually develope themselves.

Peace is made, and Pekin evacuated. Such is the sum and substance of our news—the final result of all our efforts; and as it has been quickly done, we trust and believe it has been well done.

By "well done" we mean that the treaty has been exacted from a humbled foe, not granted by a kind of reciprocity, which, while it insists upon our advantages, tacitly admits at the same time our weakness, and our anxiety to escape from the necessities of violence and compulsion which our position imposed upon us—of which the pillage and destruction of Yuen-ming-yuen was a striking sample.

We trust that a treaty has been dictated by us, not conceded to us; not that we value it at much more than its paper's worth at best. We trust that we did not merely hold a gate, or gates, of Pekin—that we did not haunt the outskirts of the city, as if fearful of treading on consecrated ground and dreading its guardian's vengeance. We sincerely trust there was no arguing and quibbling with men who acted such impudent lies as those with which we were recently juggled at Tien-tsin and Chang-kia-wan—and who, we are coolly told by Prince Kung, were not the real thing at all—not at all the right sort of persons to treat with—each new impostor damning the previous one as spurious.

Our position at Pekin, if it were to be of any value, should have been to act as a warning which, for our own and our enemy's sake, should never require to be repeated; this mercy at least should have been vouchsafed to them.

The treaty should have been dictated. The indemnity should have been paid, as a conqueror's tribute, in the most public spot in the capital—in the Imperial palace itself. The Imperial flag should have hung conspicuously beneath that of the allies. The mandarins themselves should have passed beneath the Caudine forks, to deliver, bound and with ropes round their necks, that Prince Kung who cynically assured us of the well-being of the victims who were perishing miserably under his hand,—and with him the President of the Board of Punishments, that grand inquisitor, who, under more favourable training, might have been a worthy follower of St. Dominick. These two should have hung high above the city gates through which our troops should have defiled in triumph, between kneeling ranks of unbonneted mandarins, with flags waving and drums beating.

There could be no mistake then about our triumph; there could have been no question of the footing on which we departed. Not a soul among the wondering crowd of Pekinese could have doubted how the case stood, and not one of those quaking mandarins, shortly to be dispersed to their posts throughout the empire, would have ventured to brave such vengeance again, or to dare to lay hands on British subjects, accredited bearers of a flag of truce, and to subject them to torture and death, and ignominy almost worse than death.

But if, on the other hand, we have ignored the position of conquerors, and allowed it to be slurred over,—if we have accepted a price for the blood of our murdered countrymen, and if we have shown a consciousness of the mistaken policy which we have pursued, and the false position in which we were placed, then we fear it has all been in vain—as vain as our first advance on Tien-tsin—as vain as any bargain must be with convicted and shameless impostors, who hesitate at no lie while under the influence of fear, and who are capable of any act of atrocity when relieved from the pressure.

Knowing all this, if we satisfy ourselves with the waste paper called a treaty, and allow ourselves to be tricked and humbugged out of the fruits of our toils, dangers, and extravagant outlay, we shall deserve to be treated as the thick-witted dupes we are too often said to be, who lose by the pen what we gain by the sword, through that infirmity of purpose, and haste to patch up or slur over difficulties, which have too often been the characteristics of our diplomacy.

The author of a little pamphlet called "The Volunteer Movement and Taxation," printed for private circulation, has expended a great deal of ingenuity in attempting to prove that the Volunteer force is a clear annual saving to the country of six millions sterling. As this pamphlet may fall into the hands of some of our readers, we wish to point out an error into which the author has fallen, more especially as our remarks may serve to correct a misapprehension under which we have reason to believe others, besides the author of "The Volunteer Movement and Taxation," at present labour.

The error lies, not in any of the calculations into which the author has entered, and which, we have no doubt, are scrupulously correct, but rather in the nature of the argument which he has adopted. He informs us that if our Volunteers had not come as they have done, the nation would have been obliged to consent to supply their places with a corresponding force of "regular troops." Of course, if this can be made clear to us, we shall be quite ready to admit that the number of troops who would have been so required is that fixed upon by the author; viz., 150,000 men, in which case it is probable that the annual saving to the nation is fully the six millions at which he estimates it; but it seems to us that an argument which proceeds upon such assumptions as these, which institutes a comparison between two such distinct bodies as the Volunteers and the regular Army, breaks down at the outset, and indicates an ignorance of the real nature and duties of the two forces, which if it became general would be prejudicial in the highest degree, not only to both the regular Army and the Volunteers, but to the best interests of the nation at large.

When the argument is employed simply in the manner in which the author employs it, it is comparatively harmless: but if, adopting his premises, we reason in a different direction, and endeavour to show, not what might have been, but what may be, and assign to the Volunteer movement a positive, instead of a negative effect upon taxation, we shall at once see wherein the danger and fallacy of such a line of argument lie. By taking as our data that a body of regular troops may be represented by a "corresponding force" of Volunteers, or *vice versâ*, we easily arrive at the point at which the regulars entirely cease to exist, and the Volunteers occupy their place; and it is with this question of how far Volunteers can ever occupy the place of regular troops that we have at present to do.

With every confidence in the patriotic spirit and devotion of the Volunteers, in their anxiety to acquire those habits of discipline and subordination which can alone qualify them for the duties which they have so nobly undertaken, and in the ultimate success of their well-directed efforts, it would be wrong to shut our eyes to the fact that the force might any day depart with the same silent steps with which it came, and perish—to apply the quotation of our author—

Like the snowfall in the river,
A moment white—then gone for ever.

We have no fear of such a result; there is sufficient indication of a stern, earnest spirit about the movement to entitle us to hope that it will be as lasting as the most ardent patriot could desire. But whatever may be the probabilities, no absolute reliance can be placed upon the permanence of the movement, and we cannot afford to allow the guarantee for the security of this country to be anything short of absolute. It will not suffice for the charter of our liberty and independence to be made out with however strict attention to forms and legalities upon paper; it must be written upon parchment.

Let us turn to another view of the case, and ask what "corresponding force" of Volunteers would be prepared to perform the duties of regular troops in garrisoning and guarding our foreign possessions? This is a consideration which appears to have been entirely neglected by the author of the pamphlet before us. It does not seem to have occurred to him that in instituting a comparison between the regular Army and the Volunteers, he is comparing—so to speak—the blood and muscle of the land. The former is as necessary to our existence and vigour as the latter, and must indeed, therefore, circulate freely through our veins to the furthest extremities. This fact, of the Volunteers not being available for foreign service, would alone suffice to make a comparison between them and the regular Army impossible. The two bodies must exist side by side; we must never, because of any increase to our Volunteers, seek to diminish the number of our regular troops. If the extent of our colonial possessions were to be doubled to-morrow, would it be possible or wise, because perhaps the number of our Volunteers were to be doubled simultaneously, to dispense with an augmentation of our regular Army; or if the numbers of the Volunteers were to be doubled, without any increase to our foreign possessions, should we therefore

Digitized by Google

be justified in dispensing with the regular troops at present reserved for home service? Such, it seems to us, is the compass within which the question resolves itself, and we are convinced that a little reflection will serve to show the author of "The Volunteer Movement and Taxation," that any attempt to establish a comparison between our Volunteer and regular Armies, or to prove that the one exerts any material influence upon or has a fixed responsible connection with the other, must be unsuccessful. Although within certain limits it is possible that the growth of the Volunteer force, and the further development of this vast defensive power, might justify our Government in abstaining from making such an increase to our regular Army as might otherwise have been necessary, the responsibility of such a measure would be so great, and the circumstances upon which it would depend must be so peculiar, that no rules can possibly be laid down on the subject, nor the Volunteer movement be shown to have the direct influence upon the regular Army and the taxation which the author of this pamphlet seeks to establish.

The excitement among the officers of the Royal Artillery of all ranks, to which we briefly alluded last week, consequent upon the incorporation of the officers of the Tipperary Militia, has by no means subsided; and deep anxiety as to the future prospects of the regiment is very generally expressed. It was stated in the beginning of the week, with every show of authority, that the Queen had expressed her disapproval of the measure, and as it was well known that the Commander-in-Chief had been strongly averse to it, confidence began to be restored; only again to be shaken by a report that the War Office were determined to carry the matter through, if possible. Never since its formation has this noble regiment received so heavy a blow; one which, it may be said, without exaggeration, has shaken its prestige and confidence to the very foundation. Whatever may be the result, it will at any rate be gratifying to its officers to mark the decided and universal tone which the press of the country has assumed upon this attempted injustice. Up to the last moment of closing our dispatch, the opinion among those supposed to be best informed was, that a number of subaltern officers from the Militia would be presented with commissions, on their passing the requisite examinations, and bringing in a certain number of men on the disembodiment of their own regiment; and the price said to be paid for this privilege is no less than 8*l.* to each man, without which the men, who know the strength of their position, will not volunteer; at any rate, another few days must clear the doubts away; and in the meantime the officers will do well to reassume their confidence in the justice of the superior authorities. Lieut. Nolan has joined from Gibraltar on appointment to the Staff College; and Lieutenant Hosier, on sick leave from China, has reported himself at the Horse Guards, and will appear before a medical board in London. Colonel Cleaveland and two batteries of the 15th Brigade, have been ordered from Fort Elson to Fort Gomer in the south-west district, in consequence of the Royal Engineers requiring the former fort for extensive alterations. Captain Tweedie has reported his arrival to the Adjutant-General in London from Bengal, and will be appointed to a battery in the 10th Brigade at Portsmouth. Second Captain Walker, now travelling on the Continent, has written home and requested permission to resign his commission, and he will not therefore, if his request is granted, rejoin the 15th Brigade at Gosport. We regret to learn that no doubt appears to be entertained of the fate of poor Captain Brabazon, although his name is omitted in the telegram from St. Petersburgh. Letters received from officers at the seat of war in China, speak positively as to his unhappy fate. He was a smart officer, and is much regretted. The letters all talk in glowing terms of the Armstrong gun, and state that it is immeasurably superior to the French canon rayé, a fact which our own accounts corroborate.

The week has been remarkable for an effusion of dinners and compliments to men who well deserve them. It is not necessary to make any further allusion to the Banquet of the City Artillery Company, on which there are some remarks elsewhere. The tried services, and the acknowledged merits of two distinguished officers have received the "imprimatur" which the City is wont to affix to the credentials which the Crown and the voice of the country present to its notice, and which is sometimes now, and has often been, given without the sanction of the one or the approbation of the other. In natural order first comes the honour granted by the Sovereign, then the praise and plum-pudding accorded by Parliament. Concurrently with the first and second, and ending before the first, if not so lengthened as the more solid reward of the second, is heard the "concensus populi"—the University of Oxford, as fashion determines, makes running for a forward place. Last comes the City, and its corporate and municipal honours.

Lord Clyde and Sir James Outram well deserve all their countrymen have done or can do for them. Both may emblazon on their shields what Burke told the Duke of Bedford he might claim as his "Nitor in adversum." Both have stood out on the grand canvas whereon are depicted the triumphs of our arms for half a century; and if the Royal General occupies a larger share of the foreground, and presents himself to us foremost in the stern fights of the Peninsula—in China, in India, the officer of the old Company's Service appears victorious in struggles not less arduous, if less glorious, because of their limited field, extending the influence of the British name by diplomatic exertions, of which the chief merit was the display of a spirit of honour and simple honesty, contending against terrible animosities, conquering the affections of natural adversaries, pacifying great provinces, subjugating savage races, humbling Persia in the dust, sacrificing in a few simple words on the altar of his own chivalry all natural ambition, standing between vengeance and its work, the faithful lieutenant of a great general, the gallant soldier who knew how to obey implicitly the enlightened administrator who could speak in the language of truth to a wavering Government, the man whom it is no compliment to call "the Bayard of India," because the world would find wherever he was placed that he was "*sans peur*," and—praise he would value more—"*sans reproche*." It is to be regretted that Sir James Outram could not attend at the Banquet which brought to a fitting close the ceremonies of last Monday, on account of ill-health. It was very touching to hear the few broken words he was able to utter, when one thought how the months of trial in his country's service within the walls of Lucknow and the lines of the Alumbagh, must have broken down his strength, and above all, when the last sentence which fell from his lips was the expression of his regard and devotion for the veteran chief, of whose skilful operations he was the most potent and trusted agent.

By a reference to the regimental news it will be seen that Sir Hugh Rose is acting with vigour in all departments; he has even invaded the favoured retreats of invalidism and convalescence, and has dared to overrule the decisions of the medical boards and to ignore the evidence of sick certificates. Two officers, who were at Simla on 15 months' sick leave, have been ordered to join their regiments and to resume their duty forthwith. The remarkably healthy-looking men who infested Simla, where they, under the title and style of invalids, afforded testimony of the salubrity of the station as substantial as that of the noble lord who kept a bad leg so many years for the sole use of Professor Holloway, are no longer to enjoy their little rides, or their billiards, racket, and club in peace and quiet. One has been ordered to do duty at a hill station, the others are trembling in expectation of orders leading to similar disruption of social bonds. They will have cause to remember "ubi sera Rosa moretur."

We are informed that Captain A. C. Key is not a member of the present Dockyard Commission, with reference to our last week's leader. We were aware he was not originally on the Commission, but we dealt with the rumour as it reached us, and as it actually appeared elsewhere in type, and we had no means of knowing that he might not have been appointed one day to be removed to a higher post the next, exactly as in the case of Mr. Frederick Peel. Our readers are aware that the tentacula of the terebella grow almost as fast as they are cut off, and we did not know how far the analogy was applicable to the Dockyard Commission.

A more important error crept into the concluding words of the article referred to, which we now beg to correct: "alium fit" was printed inadvertently for "serum fit," and we know too well that no other word can, as a rule, supersede "too late" in official matters.

SCALE OF INDIAN PRIZE.

In answer to many correspondents, who have what is called a vital interest in the question, although it really is only one of money, we beg leave once more to say that the distribution of Indian prize, whenever it takes place, will be regulated according to the scale laid down for Russian prize in 1854-5. The difference will be considerable. In India the rule was that a private received one share, a subaltern sixty shares; on the Russian scale the private will receive three shares, the subaltern twenty shares. The captain, instead of one hundred and twenty shares to the private's one, will get only thirty-five shares to the private's three shares.

We have lately alluded to the complications which arose in China respecting the relations of the Commissariat and the Military Train respectively. We believe that the subject has occupied the serious attention of the heads of the Military Departments, and the result will probably be the appointment of a Commission to report upon the question of field transport generally. Among the members are His Royal Highness the General Commanding-in-Chief, the Secretary for War, the Commissary-General, Colonel M'Murdo, Colonel Simmons, R.E., &c.

A reduction of men is about to be made in the Infantry regiments of the Line serving in India, and of both officers and men in the Cavalry. In the Infantry the total reduction will be about 100 men per regiment, and they will be taken off the strength of the depot. In the Cavalry the number of captains will be reduced from ten to nine in the first instance, and the subalterns in proportion. Eventually the second lieutenant-colonels are likely to be reduced, and (with the exception of a second major) the number of officers to be brought down to the establishment of regiments serving at home.

On Monday last a 62-pounder was dispatched to Shoeburyness for trial, to commence as soon as the projectiles follow, which we trust they will at an early opportunity. Whatever may be the result of this interesting competition, there is no doubt but that the impression runs very strongly, among Artillery officers, in favour of Sir William Armstrong's weapon.

Mr. Sidney Herbert promised last session some improvement in the plan for giving Cavalry officers the benefit of chargers for the ranks. The Secretary for War has not forgotten his promise, and we believe it is likely that means will be adopted for giving officers a class of horses superior to those in the ranks at such a moderate price as not to cause inconvenience.

With reference to the reports of the constitution of the new brigade of Royal Artillery from the Tipperary Artillery, we have reason to know that no decision has yet been arrived at. We may, perhaps, add our belief, that the reported arrangement which has caused so much anxiety to the officers of the Royal Regiment is not likely to be carried out.

In consequence of the great importance of the question, we understand that a Committee, to be composed of naval and military officers, is likely to be appointed for the purpose of inquiring into the whole subject of iron plates and their capability of resisting shot and shell.

By the death of Major-General Freke Williams, Lord Frederick Paulet, Inspector-General of Militia, becomes a Major-General, and relinquishes the command of the Coldstream Guards.

Colonel Le Geyt Bruce, of the Indian Artillery, has been attached to the depot brigade at Woolwich to take his share of duties, as men are raised to complete the Indian batteries.

Captain Blinkhorn, 7th Dragoon Guards, is likely to be appointed Riding-Master of the Cavalry Depot at Maidstone.

Major Manners, from the 15th Depot Battalion, will succeed Major Buchanan as Assistant-Inspector of Volunteers.

It is understood that the following changes in the Coastguard will take place from the 1st of January next: Captain James Willcox, C.B. (1850), who commanded the Dragon during the Russian war, will supersede Captain Leopold G. Heath, C.B., in command of the Dauntless, 31, screw steam-frigate, in Southampton water; Captain George E. Patey (1851) will join the Pembroke, 60, screw block-ship at Harwich, vice Captain Edward P. Charlewood; and Captain Edward A. Inglefield (1853) will be appointed to the Majestic, 80, screw liner, in the Mersey, vice Captain William R. Mends, C.B., nominated to be Deputy-Comptroller-General of Coastguard, vice Captain William H. Kennedy, whose period of service has expired.

The Lords of the Admiralty have set a very praiseworthy example to the other public offices. Their Lordships have resolved that Monday shall be kept as a holiday in their department. This decision will have the effect of giving to the clerks and others, whose attendance would otherwise have been necessary, a respite from work of three clear consecutive days.

The Masters of the Royal Navy have prepared a memorial, which has received the signatures of a very large number of their body; but, owing to the determination of the Lords of the Admiralty not to receive any document to which more names than one is attached, it cannot be brought under the notice of their Lordships in its present form.

We elsewhere give an extract from the *Levant Herald*, referring to the intentions of Russia respecting iron-clad ships. We are now informed that the Thames Yard Ship-Building Company have positively received an order from the Imperial Government to build a ship somewhat larger than the Warrior, but on the same model.

COURT-MARTIAL FOR DRUNKENNESS.—A court-martia assembled on Monday on board Her Majesty's ship Victory, in Portsmouth harbour, under the presidency of Rear-Admiral J. E. Erskine, for the trial of Mr. John Moire, Assistant-Engineer of the second class, on a charge of drunkenness preferred against him by his commanding officer. The court found the charge proved, and sentenced the prisoner to be dismissed his ship, and to be placed at the bottom of the list of second-class assistants for the term of one year. This is a most lenient sentence, and it is to be hoped that in his future career Mr. Moire will not lose sight of the consideration shown to him on this occasion.

DESERTIONS IN THE NAVY.

We think we may be able to throw some light upon the question that has lately been discussed in the leading journal, as regards desertion from the Navy generally, and especially from H.M.S. Hero, on her recent visit to America. We all know how much of the bitterness of private squabbles is due simply to misunderstanding, and how beneficially a friendly third party interposes in such cases. It is not the first time we have enacted the part of *amicus curiæ* in naval matters, and we think we can say a few words now to reconcile differences.

To deal, then, in the first instance with the particular case of the Hero. We have it stated by a gentleman whose veracity we suppose no one would doubt for an instant, that he was informed by some officers of that vessel that they had lost 100 of the crew at Halifax. To this, it is replied, that only 54 deserted. Assuming the latter to be correct, as regards the numbers left behind when the ship sailed for England, it is probable that many more actually "ran" from the ship, in the first instance, but were afterwards apprehended. If so, this of itself would reconcile the conflicting statements; but even if not, we know very well how a slight exaggeration creeps into one's expressions, and if five-and-twenty men ran one day, and five-and-twenty another, we can easily imagine an officer in common conversation, on the third or fourth day, saying, "Some hundred of our men must have cut!" But the 54 who did run are enough in all conscience, and yet not enough upon which to base an argument that every vessel in the Navy loses about that proportion of her men whenever and wherever she goes into port.

Naval officers are well aware that there are certain foreign stations where the temptations to desertion are greater than at others. Halifax is one of these. Australia is another, though probably in a less degree now, than during the gold-digging furor. Latterly California has become so. Now there is nothing strange in this. Sailors are more or less of a roving disposition, or they would not probably have gone to sea at all; and it ought really to be remembered that they run away from merchant ships just as freely as from the Navy. We had much pleasure in reading the straightforward and very able letters of Mr. T. M. Mackay, on this question in the *Times*; indeed, he has left us nothing to say as regards the mercantile marine.

In the ARMY AND NAVY GAZETTE of 7th of July we went into the question of desertions in the Navy, as exhibited for the years 1858 and 1859 in a parliamentary return moved for by Sir Charles Napier. In 1859 the desertions were 2338 out of 60,000 men then borne in the fleet; but this 60,000 is the residue of men borne, after abating the number of deserters, and the men who may have died in the year, or have otherwise quitted the Service. By the same return it appears we may add 6000 for such casualties; and an annual loss of 2338 men by desertion out of 66,000 is only $3\frac{1}{2}$ per cent., and a very different ratio than either 100 or 54 out of the crew of the Hero.

In the Blue-Book on Greenwich Hospital, the Commissioners state that the seamen desert or quit the fleet chiefly to join the American service. In other Blue-Books we find the same thing, and also comparative statements of the wages in America and in England. There can be no doubt that higher wages, real or supposed, is the grand lure which draws away men both from the Navy and mercantile marine of England. And yet, for ordinary rating, probably the wages in United States' ships are not much, if at all, higher than our best men obtain in the Navy, including all their extras. The warrant officers in the United States Navy, however, are paid very much higher than ours; and sailmakers are added, as such, besides gunners, boatswains, and carpenters. It would be interesting to know how far these grades are filled with British tars. The warrant is the certain prize for our best men, and we have already advocated its value being considerably enhanced in our own fleet. We think it has been abundantly proved that wages, food, and treatment are all on a more liberal scale in the Royal Navy than in our merchant ships. We have therefore to explain why desertions occur at all, when our vessels come into port at home, as, for instance, when the Channel fleet returned from Lisbon. We believe from all we can learn that three-fourths of such desertions are mere temporary leave-breakings, and that the men are tempted to this by those interested in pocketing the rewards paid for the apprehension of deserters and stragglers. Every naval officer is aware that these quasi desertions form a regular traffic with the ships' police and the policemen of the naval posts. We are glad, therefore, to learn that a stop is to be put to this discreditable system. We should also be glad to find a total stop put to all trafficking in seamen's wages and prize money, and to all that at present feeds the dastardly crimps, who are the real curse of the Service now, as they were sixty or a hundred years ago. Without this, even the establishment of Seamen's Barracks will do little to check desertion; for are there not desertions from the Army notwithstanding its barrack life? It is true these are chiefly ascribed to the bounty system, which we trust to see for ever abolished in both Services. What would our theoretical political economists say, who have been so impatient at Mr. Ruskin's "heresies" as to wages and labour, were it gravely proposed that manufacturers and other employers should engage their men on the bounty system, with a promise to serve for a term on lower wages? And yet this is the absurd plan upon which we have paid our soldiers for centuries, and which we have lately re-introduced into the Navy. Of course we know how the idea would be ridiculed as monstrous in theory. But why, then, are our politico-economical journals so silent, while the thing is carried out in practice before their very eyes?

THE AMALGAMATION SCHEME.

Although the details of the Amalgamation Scheme have not yet been formally made public, we believe that in a very short time they will be officially communicated to the Service. The principal features of the new system we some time since announced in this journal; and, as far as we can understand, they have been received with unqualified favour by those who are most nearly concerned, viz., those young officers who have a career of usefulness and distinction to which they may fairly look forward. The delay which has elapsed has caused a good deal of impatient anxiety, and some grumbling, which is not altogether unreasonable. It is not the Government, however, that ought to be visited with censure. They have done their duty in the matter, and some of the officials at home who were on principle opposed to the fusion, have come forward and cordially given their assistance in carrying it out, once they found that the decision of the Ministry and of Parliament rendered it inevitable. The delay in formally completing it may now be traced entirely to the impediments thrown in the way of the measure by the staff officers and others in employ at Calcutta. The original cause of the obstruction is the determination come to, to abolish the frames or *cadres* of regiments which no longer exist in substance. By this the particular system of promotion by Regimental Seniority, under which a certain unrecognised purchase system prevailed, will be put an end to. The senior officers of these various *cadres* or nominal regiments are, or may be, anxious to retire and "get their money," and they still cling with wonderful tenacity to anything leading to the hope that the *cadres* will not be broken up. When the mutiny took place and so many regiments vanished, the Government ought at once to have taken the bull by the horns and abolished all such *cadres*. But so far from doing so, they allowed the promotions to go on in these very mutinied regiments; and hence the obstructions now thrown in their way. The plan of the amalgamation depends upon the promotion of Staff Corps for service in India, and yet this Staff Corps which must have been constituted whether amalgamation took place or not, is not at the present moment in course of formation, so far as we can learn. The plan is quite ready, but it waits practical embodiment because of supposed legal impediments arising out of the clause of last session, securing to officers the same pay, privileges, and promotions they had hitherto enjoyed. What the pay, privileges, and promotions in question were is not very clear. From the line of argument taken up, their own view of them must be comprehensive indeed. These claims, it appears to us, must be settled by what is the "custom of war" generally; and, if so, we shall have to inquire whether in any army—the Royal Army of England, for instance—regiments cannot be reduced. If we do, we shall find that regiments and parts of regiments are being constantly reduced—that corps have been sent to the right about for breaches of discipline much less serious than were committed in the revolt of the local Europeans, in which the most extraordinary claims were put forward on the part of the soldiers. They were, however, scarcely more preposterous than those of officers who demand that regiments no longer existing, and which are not wanted, should be kept up for the sole purpose of giving them advantages, which they might have retained if they had done the service for which they were appointed, namely, preserved discipline in their armies.

THE IMPERIAL ATLAS OF MODERN GEOGRAPHY.*

This certainly is a magnificent Atlas, and in every respect as perfect a work of art of its kind as can well be achieved.

In the present age, when great events equal, if not surpass, in their continuous succession the rapidity with which their announcement is flashed from every corner of the globe, such a work as the "Imperial Atlas" has become an absolute and every-day necessity. The most important occurrences are constantly happening in connection with the names of places rarely or never heard of before, and with the exact position of which even the best informed among us are at first often unacquainted. For instance, we may any morning read in the *Times* an interesting account of a visit paid by some enterprising young Englishman to Enagnosi in the Oki group, which may probably suggest to the million indistinct visions of the Cannibal Islands; or we may probably hear of the same ubiquitous individual having made the ascent of Kini Baloo, a mountain higher than the Jungfrau; but no matter how strange or outlandish the name may sound to our ears, with the Imperial Atlas to consult, its exact position, as well as the relation in which it stands to other known places around, can be as easily and quickly as accurately discovered. We have but to turn to the elaborate index, which contains 120,000 names alphabetically arranged, to find the number of the map in which, with the aid of a given latitude and longitude, we may at once put our finger on the place required. The atlas contains 107 of such maps, of which 41 are devoted to the illustration of Europe, 22 to that of Asia, 10 to Africa, 21 to America, and 13 to Australia and New Zealand. Special prominence has justly been given to the geographical exhibition of Great Britain and her colonies, which take up one fourth part of the whole work, though not to the disadvantage of other regions, which are also profusely illustrated. When opened, the maps, which are printed on substantial paper of the finest quality, measure 22 by 15 inches, being sufficiently large to embrace with the utmost distinctness even the minutest details, without being in the least degree inconvenient for ready reference; while, altogether, they form a very handsomely bound volume, easily portable, and fitted in every respect to be a most serviceable ornament on every parlour, and even every drawing-room, table, to take a place of honour in every library, and to be a companion, not only to every student of modern history, military and political, but a most useful and acceptable friend to every general reader, in enabling him fully to understand and appreciate the every-day history of his own times. Considering the number of maps, their size, their unrivalled excellence and beauty, the extent of the index, and the great cost and labour everywhere apparent in the whole production, we can have no hesitation whatever in admitting the undoubted truth of the statement, that this is by far the cheapest atlas that has ever been offered to the public.

It is difficult to conceive it possible that any maps could be more artistically and beautifully executed; while their truthfulness and authenticity, without which every other quality would be worthless, have been acknowledged by a crowd of scholastic and scientific celebrities. They are not all of equal size; the political importance, the physical features, or the density or otherwise of the population of a country having been made judiciously to determine the scale of each, an arrangement by which space, where a little only was requisite, has often been economised in order to be lavishly devoted to the minutest possible illustration of countries of the most universal interest. Thus the British Islands are exhibited in a series of nine large maps, while four are devoted to the United States, three each to Germany and Austria, and two to Italy; whereas Holland and Denmark are each fully represented in one map, and in some instances two or more maps are printed on the same sheet. But every map has had equal justice done to it, all being crowded with names, which are as legibly distinct as they are beautifully engraved; while the grand physical features of each country stand forth sharply and prominently defined; and, "to add another hue unto the rainbow," all the maps are drawn and coloured in the richest and most perfect manner, forming so many brilliant pictures, which are as pleasing and agreeable to the eye as they are informing and instructive to the mind.

Much care has been taken always to show in each map the relative positions of conterminous countries and places, while some important geographical ideas, which cannot be gained from ordinary atlases, may be acquired from a study of the maps before us, showing the mutual relation which states and continents bear to one another. The work has lately been thoroughly revised, so that all the latest geographical discoveries, and the most recent cessions and acquisitions of territory (excepting only the annexation to Sardinia of the Papal States and the Kingdom of the Two Sicilies, which may be considered as hardly yet accomplished) have been introduced. Italy to the north-west looks wanting in her usual plump form.

* *The Imperial Atlas of Modern Geography.* An extensive series of Maps, embracing the most recent discoveries and the latest political divisions of territory in all parts of the world. Compiled and engraved from the most authentic sources. Under the supervision of W. G. Blackie, Ph.D., F.R.G.S., editor of the "Imperial Gazetteer." With an Index of about 120,000 names. (London: Blackie & Son, Paternoster Row, E.C.; Glasgow and Edinburgh. 1860.)

shorn of Nice and Savoy; while Piedmont, with the addition of Lombardy, the Romagna, and the Duchies, has assumed an unwonted appearance of imposing grandeur. Wherever such was necessary, the carefully minute hand of revision and improvement is apparent. If the place we seek after be a village awaiting the course of events to give it a world-wide fame, it is as sure to be found as any other village which has already obtained that extensive renown. With these maps to point out the way, we can march step by step with Garibaldi throughout his triumphant career, and sail with him to his island home; we can follow Livingstone through silent forests and over immense grassy plains into the heart of Africa, and trace his progress down the Leeba, or on the waters of the Leeambye or Zambesi; we can accompany Rajah Brooke to Sarawak and Labuan, and speculate minutely on the future greatness and glory of Borneo; we can join in every movement of the late Indian campaigns, and in the still later achievements of our gallant army in China: we can travel all over the picturesque islands of Japan, and take part in the various skirmishes of the little war which is now being waged in New Zealand. In short, with the Imperial Atlas for a guide, a moderate acquaintance with books of voyages and travels, and the current history of the day, aided by a little imagination, even the stay-at-home can become a great traveller, while he who has journeyed far in many lands can retrace, as we have done, with the utmost fidelity and accuracy, every step of his wanderings.

We have said, perhaps, more than enough to show the high opinion which we entertain of this most valuable atlas, though we feel that we have not done anything like justice to its great merits, which will be discovered by all who use it to increase in number exactly in proportion to the length of time and attention with which its multitudinous details are studied.

INTELLIGENCE FROM THE SEAT OF WAR IN ITALY.

[From Our Own Correspondent.]

Naples, Dec. 8.—Garibaldi's army seems to be breaking up altogether; as very few like to enter the regular military service of the king, preferring to return to their homes, and in many cases, those of students, of whom there was a large proportion, to resume their studies—all, however, to a man, declaring that when, as they confidently hope, Garibaldi sounds the recall next spring, they will respond to the summons. Meanwhile, it cannot be a matter of surprise to any one, that forces so devoted to the person of their leader should follow his example in retiring into private life during the winter. Two steamers, full of men and officers of the army in question, have already left Naples, and others are preparing to follow them. The British volunteers, now that the time of their departure draws near, are complimented on all possible opportunities, and the leading newspapers publish editorials on the importance and political significancy of a British legion having come out, evincing as it does the deep and wide-spread sympathy that must have existed for Garibaldi and Italian independence, when a country, the laws of which are specially averse to such expeditions, yet allowed it to enrol and embody itself under the eyes of all, and to quit its shores in open day—a fact which they account for by saying, that the universal feeling in favour of the cause was so strong, as to be able without altering the law to suspend its action, although there was no official act concerned. The Neapolitans regard the fact of the utmost importance, as binding them closer to England, with which country, as the greatest representative of constitutional government, they naturally desire a close alliance; and the more uncertain the game played by France, the more is English honest non-intervention prized, whilst the noble conduct of individuals in throwing their lives into the struggle for freedom is duly lauded. The seven officers under arrest as the seniors, all captains, who had in company with some twenty other officers signed the letter requesting Colonel Peard to resign, have been released. Major Styles has also been released from his arrest; so I suppose you will soon have most of them in England again. I am sorry, however, to have to add that General Dunne, better known as Colonel Dunn, who has always fought bravely and served Garibaldi well, who joined the national cause in Palermo, one of the few Englishmen then connected with it, and was, as your readers may remember, wounded in the attack on the 1st of October last, was fired at last night in the streets and badly wounded by a pistol-ball in the back.

15th December.—A storm physical, in addition to the storm political, has lately visited this city. It began on Saturday and lasted until Tuesday, and has not been equalled either in violence or duration for the last seven years. The English ships in the Bay had steam up all Sunday, and, with top-masts struck, rode it out well. The French ship Prony is said to have had a couple of boats swamped. The appearance of the sea, lashed into white foam, as the white horses rose in pursuit of each other poop high, or lashed in impotent rage upon the breakwater and rocks, was most grand and imposing, whilst the frightened barcajuoli at Santa Lucia and the Mole "hauled up their boats on shore," and would not launch one for love or money. Leaving the record of the shipwrecks and disasters at sea to other and more competent hands, I shall now turn to my more immediate province, the state of affairs on shore. And first upon the list of topics is the continuance of the storm political, which is raging with great fury against the present ministry. Farini is, perhaps, the most unpopular man in Naples at present, and the Press, abuses him in no measured terms, for having annulled some of Garibaldi's wisest and best measures, and having done nothing in the way of useful reform himself. It need scarcely be remarked that a more difficult position than that of Governor of Naples and the Provinces of Southern Italy could not well be imagined, nor one demanding higher legislative talents and administrative powers. Whether Farini, who, by the way, was educated as a medical man, and practised the healing art with great ability and success in early life, does or does not possess the requisite qualifications for ably discharging the important duties devolving upon him, is a question I do not presume to decide, but merely content myself with chronicling the fact of his unpopularity, and the discontent that exists almost universally against the existing state of affairs, whilst I must, in justice to a politician so placed, admit that much of the discontent prevailing amongst certain classes, arises from disappointment at there not being the harvest of places that was confidently expected. Nor were the old Bourbon *Impiegati* dispossessed from their places on the mere ground of political opinions, as was hoped would be the case by many who, having served and suffered for the popular cause, were sanguine in their expectations of place, if not of pension. That expectants under these circumstances should, when disappointed, become unreasonable malcontents, is a consequence that might more easily be foreseen, than justly or fairly prevented.

The preparation of the electoral lists is the topic now before the Naples public, and the papers teem with addresses, advices, and leaders, as to the manner in which the right of voting is to be exercised by everyone who really desires the regeneration of his country. The preponderance of public approbation is in favour of Garibaldi's programme, which renders the liberation of Venice necessary, and the possession of Rome as capital, essential—rather than that of Cavour, which proposes to accomplish the desired end by diplomacy. Meanwhile the National Guards have been quietly relieved of the important posts they were in possession of, and regulars now mount guard at all the castles. The fortress of St. Elmo is not to be demolished, but to be immediately put in an efficient state of defence. I am told the Sicilians, profiting by what had taken place in Naples, specially stipulated when they received the king that the guardianship of the castles was not to be taken from the National Guards. The approaching elections absorb all attention, and there is no more mention of Victor Emmanuel than if he were at Turin, instead of being here, saving one exception, which I had nearly forgotten. The ladies of Naples have been, as I mentioned some time since, raising subscriptions for the purpose of presenting a gift to the king, and have now announced that a military tent value 180,000 ducats, equivalent to 30,000*l.* sterling, is decided on as the most appropriate gift for a soldier king. The publication of the above has elicited a rather warm expression of disapproval from the press, as an expenditure not only useless, but unfeeling, at a time when so much misery prevails in the provinces, where the money could easily be applied to its removal in part. "If this large sum of money must be spent," argues one daily paper, "let it at least be expended in Naples, so that the manufacture of the tent and its costly fittings may yield some employment to native workmen." Soon the remnants of the Garibaldian army will have all left Naples to return to such ports as are nearest to their places of residence. Already several have left, and others are fast preparing for sea; so that the streets and cafés will soon be comparatively deserted by red shirts. As for volunteering into the Italian army, the Garabaldini do not seem to see it at all, and prefer returning to their homes. That is in part owing to the fact that very many of them never intended doing otherwise, and in part, I think, owing to the manner in which they have been slighted by the Sardinians. The feeling of animosity existing between the Garibaldini and the Piedmontese is most unnatural, and arises in a great measure from the overbearing manner of the latter, who do not like to find themselves second in public favour to the red-shirted irregulars, upon the fruits of whose labours they have entered. I heard a Piedmontese officer hail a ship last night from the Mole, and to judge from the muttered curse, not loud but deep, with which he received a boatman's offer to put him on board the Garibaldi, a steamer taking in Garibaldini for passage to Genoa, he did not regard it as a compliment to be mistaken for one of the heroes. I fancy the true state of affairs is that the Piedmontese troops are jealous of the Garibaldians, as all old traditions as to the essential necessity of long training and military drilling have been rather shaken by the events of the past six months, and the line of demarcation between military men and civilians is slightly rubbed out; at all events, more so than the Piedmontese seem to appreciate. I have heard that one lieutenant of Bersaglieri, who obtained six months' leave last summer, goes back into his regiment with his former rank, but the title of colonel, obtained during the rapid and successful career of Garibaldi within that period. And now a word or two about the British volunteers; some 250 rank and file, with a small proportion of officers, embarked on board the Milazzo yesterday afternoon in the most orderly manner. It was at first proposed that, as the bands of the 53rd regiment of the Line and of the National Guards had accompanied them from their barracks at Salermo to the railway station, the Naples National Guards would furnish a complimentary escort from the Naples station to the Mole; this was, however, changed, lest it might have the appearance of a guard, as the internal discipline of the gallant volunteer corps is well known not to have been of the highest order. Hence, dispensing with the guard of honour, they marched in regular military order, and arriving in the arsenal, received the order to "Pile arms," which they promptly obeyed, and were then conveyed on board, where they received a present of a warm Jersey, a good great coat and blanket, with a gratuity of seven or eight Napoleons—the corporals and sergeants proportionally higher sums. New clothes they had already received, and are evidently determined not to take the shine off them on board ship, but to lionise a little when they go home. It was at first proposed to send 18 officers in the same ship, but the latter, for some reason, declined going, with the exception of some five or six. The reason assigned for this is that several of them are very unpopular in the corps, and did not care to go home in company with them.

The accounts of General Dunne's state are more satisfactory, although the surgeons have not as yet succeeded in tracing the ball. The cause of this attempted assassination is still enveloped in mystery; it was at first supposed the cause was his refusal to sign a certificate of rank for a major whom he had deprived of that rank for cowardice on the 1st of October. Now as the major in question, although thus deprived of six months higher rate of pay on being disbanded, has in consequence no very great affection for Dunne, suspicion first fell upon him, but as fortunately for himself he was able to prove a most satisfactory alibi, he was at once declared free from all suspicion, and the general impression seems now to be that the cause was one altogether independent of General Dunne having held a military command. Colonel Wyndham is still here, but whether it is really his intention to continue in the Italian service I cannot say; that the men will not is already known, as of the 1400 or 1500 under his command, only seven accepted the offer of entering the Sardinian army, and these were English sailors who, having deserted, were afraid to return to England, and naturally prefer any service to spending the winter in Winchester jail. Victor Emmanuel was to have reviewed the whole National Guard of Naples in the Campo on Wednesday, but the weather prevented the review coming off, so it is postponed till to-morrow, and in order to prevent disappointment on the part of those wishing to see the King, his return route is made known to be by the Strada Constantinopli, Strada Toledo, &c. A letter from Caprera of late date gives some interesting news of Garibaldi, which I shall now subjoin, after having first extricated it from the mass of verbiage and sentimentality, without which it seems the letter would not go down with the public. It appears the writer in due time reached Caprera, where it is not difficult to find Garibaldi's house. On entering the garden he found the ex-Dictator employed in pruning trees and plants, cutting off all that was rotten and useless, an occupation similar to the great work he had been so lately performing on the kingdom of the Two Sicilies. Passing over the writer's salutation and reception, as well as his repetition of the "fine old crusted" comparison of Garibaldi to Cincinnatus, we come to a description of Garibaldi's house, in which it appears there are six rooms, a kitchen, and an entrance hall, which serves for breakfast and dining room. The sitting room is described as furnished in the simplest manner—a walnut table, an armchair, some five or six ordinary chairs, and a small sofa being the only moveables. Curiosity, however, did not allow the ardent admirer to remain there, he must, as some of our transatlantic friends once did at the reception given by a British minister, make his way into the bed rooms, to give an inventory of their contents. So from the sitting room the visitor proceeded into the chamber of Garibaldi. Here, in one corner was a couch, close to which were a writing table and a small bookstand. Another table supported a looking-glass, whilst, on the ground, lay a leather portmanteau. Now, with a description so minute, one has but to add one of the many red-shirted portraits of Garibaldi writing, as I have often seen him, and the picture is complete. The following morning the writer accompanied Garibaldi to inspect some small plantations he has made, and here the pruning work began again, and whilst Garibaldi continued this congenial occupation, the writer proceeded to inform him of the news from Naples and the provinces, the deep and lasting gratitude the people always evinced on every mention of his name, as well as the recent political and administrative intelligence. At the close of which he says that Garibaldi, who had not spoken during the recital, looking at him steadily, and with knitted brow, said—"Do not fear! These miserable parasites, who try to devour the beautiful body, cannot prevent Italy awaking. As soon as our free voice resounds they will vanish even from the memory of men." Whilst he spoke he seemed the impersonation of truth and justice, and the narrator was mute in admiration. Altogether the letter is interesting, and does not breathe a higher admiration for Garibaldi than is entertained by all who have judgment and honesty; and my belief is that the power and influence of Garibaldi's name are on the increase.

The garrison at Gaeta now consists of three regiments of the Guards, the Sixteenth "Cacciatore," the "Tiragliatori" of the Guards, and a few companies of artillery. This force is disheartened, and without discipline, and it is said that Francis II. has been insulted as he passed through the streets. The ignorance of the soldiery as to what has taken place in Naples of late, and the hopes of future plunder held out to them as the final reward of all their endurance, are the causes of their continued service, under circumstances of so great hardship.

The state of affairs within the walls is becoming more and more *triste* daily, as may be seen by the following translation of a letter written by a captain of the Bourbon garrison:—"We are in the most wretched condition. The rations for yesterday consisted of 126 raw beans and a half loaf, without either fat (dressing) or salt. The wives and children are not included in the number of those who receive rations. A loaf (32 oz.) costs two or three carlines (8*d.* or 1*s.*; the former price was 2½*d.*), and perhaps to-morrow the price will be doubled. The bombardment is imminent, and we await it with dread. All the families have taken refuge in the Granary and the Grotte di Conca, and every morning may be seen leaving these places multitudes of women, who return to their house pale with affright. A black flag has been hoisted on the hospitals, in order that they may be spared during the bombardment." A truce, it is said, of 15 days' duration has been made, the credit of which is attributed to the Emperor of the French, who is reported to have communicated to Francis II. his intention of withdrawing his fleet from Gaeta, if at the close of that time he, the king, had not departed from this the last spot that acknowledged him as sovereign. If this be the case, I suppose he is tired affording protection to the person of the king, a protection for which there was not the slightest necessity, as no person either in the army of Garibaldi, or of Victor Emmanuel ever entertained the slightest notion of inflicting personal injury on the king; so much is it otherwise, that nothing would please them better than to hear of his safe departure. The French policy at Gaeta is similar to that at Rome, whither so large a force was sent to protect the person of the Pope. Who for one moment supposed the Pope's personal safety menaced in the slightest degree? If recent accounts from Rome be true, the Pope may soon have reason to cry "Save me from my friends."

On Saturday afternoon last the Amalia, a screw steam-frigate, built for the Greek government, was launched at the premises of Mr. Henry A. Pitcher, Northfleet dockyard. The Amalia is intended to carry 36 guns, and is of 1000 tons burden.

THE DISAFFECTED LOCAL EUROPEANS.

The Bombay mail has unhappily brought a full confirmation of the disaffection of the 5th Europeans, the disbanding of that regiment, and the execution of one of the men, a private, named William Johnson. He was tried for disobeying the command of his superior officer by not taking a prisoner to the guard. He was found guilty, and sentenced to beshot, but recommended to mercy "on account of his youth and very good character." Sir Hugh Rose declined to act upon the recommendation, and issued the following most admirable documents upon the occasion :—

"Remarks by His Excellency the Commander-in-Chief.

"The court has recommended the prisoner to mercy on grounds which are not valid.

"The prisoner's age (23 years) renders him perfectly responsible for his actions.

"Good characters in the 5th Regiment—such is the spirit of mutiny and insubordination which exists in it—are no guarantees against the commission of the worst military crimes.

"All the men of the 5th Regiment who have lately been convicted of heinous offences have, with one exception, received good characters from their officers. All are in the first class.

"The prisoner's good character, the signal punishments awarded lately to comrades for gross insubordination and disobedience of orders, have had no effect in preventing him from committing the most serious, because the most deliberate, crime which has occurred this year in the 5th Regiment.

"The prisoner knew, also, that eight other men of his regiment were under trial by General Court-Martial for mutiny.

"Obstinately and repeatedly, Private Johnson, on the 25th ult., refused, by word and deed, to obey an order given to him by his superior officer, to confine Private Shields, who had just committed a serious act of insubordination by refusing to obey the order of his superior officer.

"The example of gross insubordination given by the prisoner and Private Shields was instantly followed by one on the part of Private Marnham, whose very good character, which he received from his officer on his trial, did not prevent him, either, from refusing to obey the order of his superior officer to confine Private Shields.

"In the space of a few minutes, three distinct cases of determined disobedience of important orders occurred on the same spot.

"Military authority, exercised for the suppression of insubordination, was rendered powerless by insubordination.

"Of the three culprits Private Johnson was by far the worst, because he was on duty. He was one of the barrack picket, and as such he refused to carry out the very duty for which he was told off.

"Disobedience of orders by a soldier on duty is justly considered one of the worst and most dangerous crimes that a soldier can commit.

"It may cause the defeat of an army in the field; the success of a mutiny; the downfall of a state.

"Because it is so dangerous a crime a separate article of war visits it with death, even when not aggravated by the soldier being on duty.

"If under ordinary circumstances disobedience of orders is dangerous, it becomes vastly more so when, as in the present instance, it is one of the series of the acts of mutiny, of the determined misprision of discipline, and of the insolent opposition to all authority which has characterised the 5th Regiment since May, 1859. The very numerous bad men of this regiment were determined to obtain their discharges; a free passage to England; the pleasure of enjoying themselves at home, fresh bounty, and the option of re-enlisting in the regiment of their choice. They had no more right to these things than they had to property which was not their own. Their attempt to obtain their discharge by force, after the most explicit order of His Excellency the Viceroy, dated Fort William, 11th of September, 1860, was an act of audacious fraud as well as flagrant insubordination.

"Under the circumstances set forth in these remarks the Commander-in-Chief considers that the safety of the discipline of the Army, for which he is responsible, requires that Private Johnson should suffer the extreme penalty of the law, as awarded by the Court. His Excellency's regret that he is compelled to enforce it is most sincere. But that regret is diminished when he reflects that the present example is necessary for the good of the Army and of the State; that it is an act of mercy to all misguided soldiers who may be tempted to follow the fatal examples in the 5th Regiment, which have caused sorrow and indignation throughout the Army.

"The above order will be read at the head of every regiment, or body of troops, on a general parade, at all stations in this presidency; and, subsequently, at the head of each troop, company, battery, and detachment of Europeans."

"Head-quarters, off Buxar, Nov. 12.

"The insubordinate and mutinous conduct of a large portion of the 5th Bengal European Regiment of Infantry, during the last and present years, and the evidence furnished by the regimental records, and the Court of Inquiry lately held at Dinapore, prove that the same bad spirit is general, and deeply rooted in the regiment, and is uncontrolled by authority, or by soldiers of the corps who have not committed themselves.

"More than a tenth of the regiment have, in the space of a few weeks, been tried and condemned by Courts-Martial for most serious offences, and yet the spirit is still working.

"The 5th Regiment, consequently, instead of being a support to the Government and the Service, is a source of most serious embarrassment and difficulty to both.

"The Commander-in-Chief, therefore, with the sanction of the Supreme Government, directs that the 5th European Regiment be broken up, and distributed in equal proportions throughout the other European regiments of infantry of Her Majesty's Indian forces.

"The criminal excesses committed last year by discharged soldiers acting under the same pernicious influences as those which have led to the breaking up of the 5th Regiment, rendered them the terror of the country through which they passed to places of embarkation. To prevent a recurrence of such scenes, and to provide for the public safety, the Commander-in-Chief directs that the detachment while marching to their new and distant destinations, shall not carry their arms.

"The conduct of the non-commissioned officers of the 5th Regiment, with a few exceptions, has been such that their reduction to the ranks is necessary.

"The privates will be draughted to their new corps with perfect impartiality as regards their characters. The future of these soldiers depends on themselves.

"All minor details connected with these transfers will be carried out by the Brigadier commanding at Dinapore under instructions from the Commander-in-Chief.

"Officers commanding divisions and stations will make it their duty to inspect minutely the detachments of the 5th Regiment as they pass through, and will make a special report direct to the Adjutant-General of the Army of their state on arrival and departure from stations.

"The Commander-in-Chief trusts that the fate of the 5th Regiment will be a warning to all ill-disposed soldiers, that mutiny, insubordination, and neglect of duties inevitably meet their doom.

"Sir Hugh Rose has much pleasure in recording his entire approbation of the discretion, firmness, and ability with which Brigadier Welchman, C.B., has exercised his command at Dinapore, in the suppression of the attempt made by the 5th Regiment to obtain by violence and insubordination their discharge, to which the General Order of the Viceroy in Council proves that they had not a shadow of right.

"His Excellency has the more pleasure in paying this tribute to the merits of Brigadier Welchman, because he selected him for his present command on account of his excellent services, of which those before Delhi, where he was severely wounded, are not the least. Sir Hugh Rose never forgets that the siege of Delhi is one of the most brilliant and important episodes of Indian military history.

"By order of his Excellency the Commander-in-Chief,
"W. Mayhew, Lieutenant-Colonel,
Adjutant-General of the Army."

THE COMMANDER-IN-CHIEF AND LORD CLYDE.

At the dinner of the Merchant Taylors' Company the other evening, to celebrate Lord Clyde's accession to the company, the Duke of Cambridge, in reply to the health of the Army, said—My lords and gentlemen, I rise to return thanks for the compliment you have paid me, and for the flattering manner in which the master of this worshipful company has proposed the toast of my health. I always feel that coupling my name with the Army is a high compliment; for having been from my early youth bred up a soldier, I naturally feel deeply interested in that noble profession, so that whenever I find my name associated with it I cannot but feel pleasure and satisfaction. The pleasure is derived from the fact that the Army has on all occasions deserved well of the country, and I am free to own that the country has never been slow to express its sense of obligation to the Army. It may seem that compliments, such as those bestowed upon it this evening, are of little value, but I assure you it is not so; for men returning from distant countries after their period of service has expired and meeting their countrymen, and hearing, perhaps for the first time with their own ears, expressions of confidence and gratitude, cannot fail to be sensibly affected, for these expressions sink into the hearts of all grades of the soldier—from the very highest to the lowest. With regard to the more active operations of the Army, we have had, unfortunately, of late years occasion to call for its service in the field. I flatter myself that the Army has come well out of the ordeal, and that the country has had no reason to be dissatisfied with the force which it had maintained in times of peace to meet the sudden exigencies of war. Recently, an expedition has shown its prowess in distant lands: and although as the head of the Army my name has been put forward as assisting in rendering it efficient, I confess that I am entitled to take very little credit in that respect. That credit is due to my noble and gallant friend who sits on my left—(Lord Clyde). The expedition came for the most part from India, and the merit of putting it in a state of efficiency devolved upon him as a general officer in command of the Indian Army. I have not the pleasure of personally knowing much of Sir Hope Grant, but I consider that he deserves well of his country, and I understand that such is the opinion of all who have had the honour of serving under him. And, my lords and gentlemen, I think it would ill become me if I did not pay a passing tribute to the valuable assistance which the Chinese expedition has received from the recent important invention in gunnery. Sir William Armstrong, who is present this evening, has the merit of having invented a most efficient and powerful weapon; and although this is not the time or place for drawing comparisons between the claims of other inventors (valuable and important as their inventions may be), still, as his invention has now been tested in the field, and has well come out of the ordeal, I am glad thus publicly to be able to express in his presence my sense of the great value which the Army and the country have received from his weapon. Having said thus much, I may perhaps be allowed briefly to allude to the compliment which has been paid to me in allowing me to be present on this particular occasion. I am glad as a member of this ancient company to meet my excellent friends at their hospitable board (and permit me to say I have never known a more hospitable board than that of this evening), but there never was an occasion when as a soldier I felt prouder or happier to be here than when I find myself invited to meet my gallant and distinguished friend Lord Clyde. If there ever was a man, in my humble opinion, who deserved well of his country, that man is Lord Clyde. His career has been one of unchequered success. He has obtained the highest position in which the favour of his Sovereign and the gratitude of his country can place him. His rapid journeys, his sagacity, his promptitude of action, his discretion, and his high and soldierlike qualities, have all conspired to command success, and I assure you that nothing can give me greater pleasure than to participate in any compliment which his countrymen can confer upon him. I again repeat the expression of my gratification at being present this evening; and if my noble and gallant friend will allow one who has far less experience than himself to pay him a compliment, I would say that Her Majesty does not possess a more devoted subject, or the Army a finer or more gallant soldier. Although I have now ventured to trespass on your attention at some length, I do not think I ought to sit down without referring for a moment to the defensive state of the country. I have served for twenty years in different parts of the world. Twenty years ago the standing Army was small, and it had no auxiliary. Now, on the contrary, I am happy to say that the nominal strength of the Army is much improved, while its condition is such as the country may be justly proud of. It has also two valuable auxiliaries in the Militia and the Volunteers; and I sincerely hope that all will be so thoroughly bound up and blended together in cordiality, good feeling, and harmony, as to make it utterly impossible for any one to interfere with the interests or prosperity of this great and universally respected country.

The Court-Martial on Commander Power and Mr. Macfarlane.—The naval court-martial which assembled on board Her Majesty's ship Victory in Portsmouth harbour on Tuesday last for the trial of Commander Power and Mr. Macfarlane, the commander and master of Her Majesty's ship Perseverance, wrecked on a reef of rocks off the north-west port of Mayo, Cape Verde, concluded its sittings on Thursday. The evidence for the prosecution closed on Wednesday evening, and the defence of the prisoners was appointed to take place on Thursday morning. The court opened at 10 a.m., and the written defence of Commander Power, which was first taken, was read by the chaplain of the ship. In it Captain Power recapitulated and reviewed several points of the evidence. He referred to the rules and regulations of the ship, together with his own special orders in the event of the ship being at any time in a position of doubt or difficulty, and to the reason the watch was intrusted to a warrant officer, a man who had always conducted himself extremely well, and who had been appointed to the ship for this special duty by the Admiralty, in compliance with an application to that effect from him. The rate of speed the ship was going at the time she went ashore was well known, and had been accurately calculated, and the loss of the ship could only be accounted for by the strong current existing, of which but little was known, and which was afterwards found to be always extremely variable and irregular in its movements. The compasses were tried at St. Vincent's by cross-bearings. The deep-sea and head-lands were not used, owing to the bold nature of the coast, as they would no sooner speak of danger than the ship would be upon it. Mr. Macfarlane, the master, had always displayed the greatest zeal and caution in his duties. In conclusion, Commander Power stated that the conduct of all, officers and men, in landing the troops, and throughout the whole of the operations consequent on the loss of the ship, was everything that could be wished for. He had served 24 years at sea, six of which had been as commander. At the time of the occurrence he was suffering from illness, and had suffered much since. He concluded by leaving his case in the hands of the court, and called no witnesses. Mr. Macfarlane read his defence to the court, which, like Commander Power's, was very lengthy, and reviewed the evidence given by the witnesses at some length. He respectfully submitted that the course the ship steered on the occasion of her loss was such as without any set would have carried her 11 miles to the north of Mayo, and 16 miles to the southward of the Laton Rocks, and that he should not have been justified in steering a more northerly course on account of those rocks, and the chances of a northerly current. He had no reason to anticipate a set of currents to the southward, having on former occasions experienced the contrary; the sailing directions were also silent on the subject. From the assumed position of the ship at 11 p.m., and the rate of steaming, it was not presumed that she was so near the land, not expecting to be within 12 miles at daylight, and, even if the ship had been steered direct for the land, she ought at daylight to have been 12 miles distant. The master of the bark Kingfisher, the master of the schooner (a coasting vessel) which conveyed some of the troops to St. Vincent's and the captain of the port of Porto Praya, a Portuguese naval officer, all stated in their testimony, which had been laid before the court that the currents in the vicinity of Mayo were exceedingly variable in their strength, and irregular in their set. Two foreign men-of-war had been recently lost (within two years) near the same spot as the Perseverance, but no details had been published. Two days after the wreck it was proved by the bark Kingfisher's anchoring that the current was then setting in a contrary direction to what it did on the day of the wreck, and strongly. Star observations were frequently taken, but in those latitudes were of little use, owing to the hazy state of the horizon. In conclusion Mr. Macfarlane said that he three days after the wreck navigated a bark to the river Gambia with troops, without the aid of charts or directions; that on his arrival at Sierra Leone he was struck down with fever and had suffered severely; in fact, he had only come out of Haslar Hospital to answer the present charge. Certificates of the highest possible character for qualities as an officer, a navigator, and a pilot were then handed in by Mr. Macfarlane to the court from numerous officers. Commander M'Killop, commanding Her Majesty's ship Bulldog, personally attended the court, and testified to his knowledge of Mr. Macfarlane's ability and caution in his duties as master of a ship, and that he should feel great pleasure in taking Mr. Macfarlane as his master in any future vessel he might have the honour to command. The court then closed to consider their finding, and remained in deliberation above four hours. On re-opening, the sentence was read by the Deputy-Judge-Advocate, awarding a severe reprimand to Commander Power, and the loss of one year's rank. Also severely reprimanding Mr. Macfarlane, with the loss of three years' rank, accompanied by the observations, that there was no evidence of currents to account for the loss of the ship, nor to account for her being 16 miles out of her course; that precautions were not taken where currents were known to exist in running between the islands; nor were soundings taken with the deep-sea or hand lead-lines. Neither was the master on deck, as he ought to have been, when the watch was left in charge of a warrant officer. The conduct of the remaining officers and crew after the grounding of the vessel was deserving of special mention from the court. Commander Power's conduct also on the vessel stranding, and the coolness and decision of his measures in getting the women and children, with the troops, on shore, and providing for their safety, were deserving all praise.

Obituary.

We have to record the death of Major-General William Freke Williams, K.H., who died on the 12th instant at Bath, at the age of 68 years. The late general served in Senegal, Goree, and Sierra Leone during 1811 and 1812, and in the Peninsula from August, 1813, to the end of the war, including San Sebastian, the passage of the Bidassoa, battles of Nivelle and Nive (the 11th, 12th, and 13th of December), and the investment of Bayonne. In 1814, he proceeded to America, under General Ross, and was wounded at the battle of Bladensburg—first, slightly in the left arm, and again severely by a musket ball through the left shoulder. He served subsequently for several years in the West Indies, and was sent on a particular service to Canada during the insurrection in that country in 1838-39, whence he returned in June, 1843, and soon afterwards proceeded to Ireland. For his military services he was made a Knight Companion of the Royal Hanoverian Guelphic Order, and had received the silver war medal with three clasps for St. Sebastian, Nivelle, and Nive. The last appointment he held was brigadier-general, at Malta. His commissions were dated as follows:—Ensign, August 30, 1810; lieutenant, June 10, 1811; captain, October 31, 1814; major, April 9, 1825; lieut.-colonel, June 28, 1838; colonel, November 11, 1851; and major-general, April 14, 1857.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

APPLEBY—December 16, at 10, Church Street, Durham, the wife of George Walton Appleby, Esq., 26th Cameronians, of a daughter.

BERRY—November 8, at Nussecrabad, the wife of Captain H. Berry, H.M.'s 28th Regiment, of a daughter.

DU CANE—December 17, at 13, Victoria Road, Kensington, the wife of Captain E. F. Du Cane, Royal Engineers, of a daughter.

HAVERFIELD—December 17, at "The Cedars," Derby, the wife of Captain J. T. Haverfield, Royal Marines Light Infantry, of a daughter.

HUNTER—November 6, at Neemuch, Bombay Presidency, the wife of Major W. F. Hunter, H.M.'s 2nd Light Cavalry, of a son.

POCHIN—December 15, at Leicester, the wife of Lieutenant Ralph George Pochin, R.N., of a son.

SMITH—At Foelallt House, Lee, Kent, the wife of Colonel J. T. Smith, of a daughter.

YOUNG—November 24, at Kingstown, the wife of Commander Young, V.C., Royal Navy, of a son.

MARRIAGES.

ANNESLEY—GOMONDE—December 10, at the British Embassy, Paris, and afterwards at the English Church, Rue d'Aguessean, by the Rev. E. Forbes, James O'Donel Annesley, Esq., 25th Regiment, to Sybil, only daughter of W. H. Gomonde, Esq.

Also excursions to London from nearly all stations.

For further particulars, see bills.

C. W. EBORALL, General Manager.

SHIPWRECKED MARINERS' SOCIETY, supported entirely by voluntary contributions.

Patrons—The Queen and H. R. H. the Prince Consort.

President—The Duke of Marlborough.

Chairman of Committee—Adm. Sir Henry Hope, K.C.B.

An earnest APPEAL is made to the public for aid to clothe and send home our destitute shipwrecked seamen, cast or landed on the coast, and to give temporary relief to the widows and orphans of those who perish. 4,666 of the former have been sent to their homes, and 3,179 of the latter have partaken of the Society's bounty since the 1st of January last. The pressure on the funds has been so great that £1,000 stock has been sold, with little hope of being able to meet the distress from the storms and tempests of the coming winter if not liberally helped. James i., 27; Job xxix., 12, 13.

Donations and subscriptions thankfully received at Messrs. WILLIAMS, DEACON, & Co.'s; by the Collector, Mr. A. F. STREETELL; and by the undersigned,

FRANCIS LEAN, Secretary.

Office, Hibernia Chambers, London Bridge, S.E., November, 1860.

THE SOLDIERS' DAUGHTERS' HOME, HAMPSTEAD, N.W. Founded May 8th, 1855. The only asylum in the kingdom for the daughters of soldiers of the whole British Army, whether English, Scotch, or Irish. This is the only asylum open to the soldier's daughter, whether orphan or not, without limitation to any particular war, or restriction as to infancy on admission.

Under the Patronage of Her Most Gracious Majesty the Queen; H.R.H. the Prince Consort; H.R.H. the Prince of Wales; General H.R.H. the Duke of Cambridge, Commander in Chief, K.G.; and a large Committee of Noblemen, Members of Parliament, General and other Officers, Chaplains of the Army, Clergymen, and influential Laymen.

There is no government asylum for the female children (whether orphans or not) of the whole British Army; they are excluded from the Royal Military Asylums at Chelsea and Dublin. The Soldiers' Daughters' Home receives no pecuniary support whatever from the Government or from the Patriotic Fund, and is entirely dependent upon voluntary subscriptions. Funds are very much needed to complete the number of inmates to 200; 170 are now in the Home; in addition to which 110 girls have been admitted and provided for satisfactorily since the foundation of the Home. Chairman of the Committee, Major the Hon. H. L. Powys, late 60th Royal Rifles.

Subscriptions thankfully received by the Treasurer, Sir John Kirkland, No. 17, Whitehall Place, S.W.; by the Bankers, London and Westminster Bank, St. James's Square, S.W.; and Messrs. Masterman, Nicholas Lane, City, E.C.; at the Home, Hampstead, N.W.; and at the Office, No. 7, Whitehall, London, S.W. Post-office Orders should be made payable to Mr. John Marsh, Secretary, upon the Charing Cross Post-office, S.W.

MISSIONS TO SEAMEN.—VICE-PATRONS.

His Grace the Archbishop of Canterbury.
His Grace the Archbishop of York.
His Grace the Archbishop of Armagh.
His Grace the Archbishop of Dublin.

The Society now employs 10 Chaplains and 12 Scripture Readers, provided with mission vessels, boats, &c. Contributions thankfully received by the Secretary, Rev. Theodore A. Walrond, 11, Buckingham Street, Adelphi, W.C.

GUSH & FERGUSON, ARTISTS AND PHOTOGRAPHERS, beg respectfully to invite the Nobility and Gentry to view their First-Class PORTRAITS, in Oil and Water-Colours.

GALLERY, 179, REGENT STREET W.

EXTRACTS FROM THE PRESS REFERRING to the NEW BRANCH ESTABLISHMENT of E. MOSES & SON, at the CORNER of TOTTENHAM COURT ROAD and EUSTON ROAD.

"Upon each floor, there are small apartments called the 'trying-on rooms,' affording customers an opportunity of avoiding the guess-work which has hitherto prevailed in ready-made emporiums, and everywhere immense mirrors are placed in which the buyer may satisfy himself with the fit and shape of the garment which he proposes to purchase."—*Standard*, 21st Nov., 1860.

"On the whole, the new establishment of Messrs. E. Moses & Son is decidedly the most complete of its class in the Metropolis."—*Morning Herald*, 21st Nov., 1860.

"The whole exterior of the building presents a noble aspect. It combines an appearance of lightness and solidity, grace and strength."—*Illustrated News of the World*, Dec. 1st, 1860.

"The interior arrangements are in a corresponding scale of elegance, whilst convenience and comfort have not been lost sight of. . . . . Nothing, in fact, that goes to constitute the completeness of an organised whole can be said to have been omitted."—*Daily News*, Dec. 11th, 1860.

"Like skilful logicians, they laid down the solid premises of their trade syllogism in the Minories; they next constructed their middle term in Oxford Street; and they have just now brought out their conclusion to Tottenham Court Road."—*Express*, Dec. 11th, 1860.

E. MOSES AND SON,

EDMISTON & SON, Sole Manufacturers of the only WATERPROOF CLOTHING guaranteed to withstand the climate of India. The POCKET SIPHONIA (weight 12 ounces), price 40s. This coat can be carried in the pocket. Shooting Boots, and every requisite for the Sportsman in India. Portable Folding Baths, Air-Beds, Water-Beds for Invalids, Pillows, &c. Portable Indiarubber Boats, to carry one or more persons, weighing from 40 to 50 pounds, price 7l. 10s., 10l. 10s. and 18l. 18s., folding in a compass of 3 ft.
THE SIPHONIA DEPOT, 5, CHARING CROSS, S.W., late 69, Strand, London.

RIFLE VOLUNTEERS AND THE PUBLIC.—The E. I. O. WATERPROOF will make Boots pleasurably soft for Summer wear, healthily impervious to wet, and improve the polish. Price 6d., 1s., and 1s. 6d. E.I.O. Royal Crimean Waterproof Company, 124, Aldersgate St., E.C. Knickerbockers, Capes, and Overalls.

SPORTSMEN AND GENTLEMEN OF THE ARMY AND NAVY.—S. & B. SOLOMONS, Opticians, 39, Albemarle Street, Piccadilly, W., opposite the York Hotel. Portability combined with great power in FIELD, RACECOURSE, OPERA, and general out-door day and night powerful waistcoat-pocket PERSPECTIVE GLASSES, weighing only 4 ounces each, containing 12 and 18 lenses, constructed of German glass, will show distinctly persons to know them at two-and-a-half and three miles. They serve every purpose on the Racecourse and at the Opera House. Country scenery and ships are clearly seen at eight to ten miles. They are also invaluable for Shooting, Deerstalking, and Yachting. Her Majesty's Coast Guards are making use of them as day and night glasses. The terms for them are powerful and brilliant Telescopes for both eyes. The most powerful Telescopes, possessing such extraordinary power that some, three-and-a-half inches, with an extra astronomical eyepiece, will show distinctly Jupiter's moons, Saturn's ring, and the double stars; with the same telescope a person can be seen and known three-and-a-half miles distant, and an object from fourteen to sixteen miles. They are in endless variety, of larger and all sizes, with increasing powers, and are secured by Her Majesty's Royal Letters Patent.

MAPPINS' TABLE CUTLERY.—SEASON 1860.

MAPPIN BROTHERS'

ONLY LONDON ESTABLISHMENT IS AT LONDON BRIDGE. Established in Sheffield A.D. 1810. All their manufactures are stamped with their corporate mark, the "Sun," granted to their father by the Cutlers' Company of Sheffield, June 26th, 1835. MAPPIN BROTHERS are Cutlers, by special appointment, to the Emperor Napoleon III.

Messrs. MAPPINS' Table Knives still maintain their unrivalled superiority; all their Blades being their own Sheffield Manufacture, are of the very first quality, with secure Ivory Handles, which do not come Loose in Hot Water; and the difference in price is occasioned solely by the superior quality and thickness of the Ivory Handles.

	Ordinary Quality.	Medium Quality.	Best Quality.
	£ s. d.	£ s. d.	£ s. d.
Two Dozen full-size Table Knives, Ivory Handles	2 4 0	3 6 0	4 12 0

MANUFACTORY, QUEEN'S CUTLERY WORKS, SHEFFIELD.

DINNEFORD'S PURE FLUID MAGNESIA
Has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for
ACIDITIES, HEARTBURN, HEADACHE, GOUT, AND INDIGESTION.
As a MILD APERIENT, it is admirably adapted for DELICATE FEMALES, *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the
ACIDULATED LEMON SYRUP,
it forms an *Effervescing Aperient Draught*, which highly agreeable and efficacious.
PREPARED BY DINNEFORD & CO., DISPENSING CHEMISTS, (and General Agents for the *Improved Horse Hair Gloves and Belts*),
172, NEW BOND STREET, LONDON, W.,
And Sold by all respectable Chemists throughout the Empire.

SAVARESSE'S PATENT FLEXIBLE CAPSULES, by which all nauseous Balsamic Medicines may be taken without inconvenience. These Capsules are made of animal membrane of slow solubility, thus obviating the usual nausea and unpleasant eructations which follow the use of those made with Gelatine. From numerous medical testimonials, EVANS & LESCHER, the Patentees, need only select the following by William Acton, Esq., see page 96 of his celebrated Treatise:—"In many instances I have known the gelatine capsule burst in the effort of swallowing, or dissolve as soon as it is in the stomach; an improvement has latterly been introduced by Messrs. Evans & Lescher, by enclosing the medicine in membrane, thus obviating the objection to all gelatine capsules." The Membranous Capsules may be obtained of all chemists, &c., in town and country.

RUPTURES.—HUXLEY'S IMPROVED PATENT MOC-MAIN TRUSS dispenses entirely with the lever spring. A flexible band, perfectly imperceptible, encircles the body (in lieu of the old steel spring), and an elastic pad secures the hernia. Measure required—circumference two inches below the hips. Price single, 12s.; double, 18s.; postage 10d. and 16d. Illustrated circulars on application to Mr. E. HUXLEY, 12, Old Cavendish Street, Oxford Street, W.

A BOON TO NERVOUS SUFFERERS.
HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., will send, post free, on receipt of a stamped directed envelope, THE WARNING VOICE, a new medical work on the most effectual cure of Nervous Debility, Loss of Memory, Indigestion, &c., which, if neglected, result in consumption and premature decay; with plain directions for perfect restoration to health and vigour. The true guide to those who desire a speedy cure. Every young man should peruse this excellent little work, if he values his health, happiness, and peace of mind. Sent direct from the Author's residence, 8, Burton Crescent, Tavistock Square, London, W.C.

DR. BUCHAN'S PATENT SUGAR-COATED VEGETABLE PILLS, VEGETABLE SKIN OINTMENT, and CONCENTRATED VEGETABLE ESSENCE, for Purifying the Blood, Regulating the Bowels, and Removing Vitiated Humours, Bilious and Liver Complaints, Rheumatism, Gout, Scorbutic Affections, Costiveness, Skin Eruptions, deep-seated Ulcers, and all Diseases of the Nervous System, from whatever cause, &c., affording at once a new lease of life to the sickly and aged of both sexes, also giving a beautiful and clear complexion. Proved by the sworn testimonies made before the Lord Mayor of London and sitting Magistrates. Sold by Buchan & Co., Patentees, 22, Newman St., Oxford St., London, W., and all chemists in town and country. Prices:—Pills, per box, 1s. 1½d., 2s. 9d., and 11s.; Ointment, per pot, 1s. 1½d., and 2s. 9d.; Essence, per bottle, 4s. 6d., 11s., or bottle containing four times that quantity, 33s. Agents:—Barclay, 75, Farringdon Street, E.C.; J. Sanger, 150, Oxford Street, W.; Hannay, 63, Oxford Street, W.; Butler, 4, Cheapside, E.C.; Hooper, 43, King William Street, London Bridge, E.C.; R. Howden, 73, Gracechurch Street, E.C.; Prout, 229, Strand, W.C.; &c. &c.

Gratis, or post free for one stamp, of all Agents, and 22, Newman Street, W., Dr. Buchan's Work, entitled, BUCHAN'S DOMESTIC MEDICINES, containing instructions for the cure of every ailment incidental to man, woman, or child.

A Physician and Member of the Royal College of Surgeons, England (Registered under the New Medical Act), attends daily to give advice, without fee, to those purchasing Buchan's Medicines.

TEETH.—MR. ESKELL'S INVENTION.—On the 17th July, 1860, Mr. ESKELL, Surgeon Dentist, 8, Grosvenor Street, W., obtained HER MAJESTY'S ROYAL LETTERS PATENT for an improved method of fixing ARTIFICIAL TEETH to the GUMS on MOVEABLE BASES, without plates, wires, springs, or any fastening, which may be thus briefly described.

The teeth are perfectly FITTED from first to last in TWO HOURS, without pain or extraction of stumps, by means of a Moveable Base, which is placed within a tube, and applied to the gums, on which it takes a most accurate and minute impression, and adheres with such tenacity by suction, that the teeth become quite immovable, except at the pleasure of the wearer. When any of the natural teeth fall out, by substituting a new base, which can be applied without the aid of a dentist, the Artificial Teeth are always useful, and last a lifetime.

Mr. Eskell's Patent, of which he is the sole inventor, can only be procured at his residence, where specimens may be seen and every information obtained. Decayed teeth stopped. Loose teeth fastened. All consultations free. Terms strictly moderate.—8, Grosvenor Street, Grosvenor Square, London, W.; 33, Old Steine, Brighton; and 39, Bennett's Hill, Birmingham.

MADAME RACHEL'S ROYAL ARABIAN PREPARATIONS, which render the hair, teeth, and complexion beautiful beyond comparison, and her ARABIAN PERFUMES, which have gained for her the patronage of royalty, can be selected at her residence, 47, New Bond Street, opposite Grafton Street, W. Madame Rachel forwards her preparations twice a week to Brighton and the continent.

THE VOLUNTEER'S CANTEEN (BUSSEY'S REGISTERED)
Will contain in the most compact and convenient manner one imperial pint of wine or brandy-and-water and a day's rations. It has been approved of by the Duke of Cambridge, Mr. Sidney Herbert, Lord Ranelagh, and other high authorities. See also *Army and Navy Gazette*, Oct. 27th; *United Service Gazette*, Oct. 20th; *Volunteer Service Gazette*, Oct. 27th; *Athenæum*, Oct. 25th; *Field*, Oct. 20th, &c. &c.

NEW GENERAL ATLAS.

Just published, imperial 4to. half morocco, gilt edges, price 5l. 5s., with Index of nearly 120,000 Names,

THE IMPERIAL ATLAS OF MODERN GEOGRAPHY.

A Series of One Hundred carefully-coloured Maps, embracing the most recent Discoveries, and the latest Political Divisions of Territory in all parts of the World.

Compiled, from the most Authentic Sources, under the Supervision of

W. G. BLACKIE, PH.D., F.R.G.S.

With an Index of nearly 120,000 *Names, the most copious ever published.*

"This fine series of accurate and beautiful Maps."—*Daily News.*

"A highly satisfactory publication. . . . . The maps are everything that could be wished, so far as accuracy, distinctness, neatness, and fulness of detail are concerned."—*Athenæum.*

"One of the largest and most complete Atlases ever attempted."—*Critic.*

"The fulness of detail may be judged of by the Index, which contains reference to 120,000 places; notwithstanding which profusion, there is not the least sacrifice of distinctness, owing to the exquisite beauty and precision of the engraving. . . . . It is an Atlas which we can safely recommend to the merchant, the traveller, and the student."—*Examiner.*

2 vols. imperial 8vo. 2670 pp. 4l. 6s.

THE IMPERIAL GAZETTEER:

A General Dictionary of Geography, Physical, Political, Statistical, and Descriptive.

Edited by W. G. BLACKIE, Ph.D., F.R.G.S.

With above 700 Illustrations, Views, Costumes, Maps, Plans, &c.

"All the articles that we have examined, whether long or short, have exhibited a greater degree of correctness in minute details than we should have thought practicable in so comprehensive a work."—*Athenæum.*

"By far the best Gazetteer in our language."—*Critic.*

2 vols. imperial 8vo. 2888 pp. including the Supplement, 4l. 17s. 6d.

THE IMPERIAL DICTIONARY:

ENGLISH, TECHNOLOGICAL, AND SCIENTIFIC.

WITH A SUPPLEMENT,

Containing an extensive Collection of Words, Terms, and Phrases not included in previous English Dictionaries.

Edited by JOHN OGILVIE, LL.D.

Illustrated by above 2500 Engravings on Wood.

"Dr. Ogilvie has not only produced the *best* English Dictionary that exists, but, so far as the actual state of knowledge permitted, has made some approach towards perfection."—*British Quarterly Review.*

THE PRINCE OF WALES IN CANADA AND THE UNITED STATES.

BY N. A. WOODS, ESQ.,

THE "TIMES" SPECIAL CORRESPONDENT.

"It has been his happy lot at the age of 19, to render to his country a very great and essential service. Many a man, born of a Royal family, has descended into the grave, rendering to his fellow men much less good service than has been rendered by this young prince. Whatever may be the destiny which Providence has reserved for him, it is a proud thing that he can reflect on this voyage across the Atlantic."—*Extract from the Duke of Newcastle's Speech at Nottingham, Dec.* 8.

London: BRADBURY & EVANS, 11, Bouverie Street, Fleet Street, E.C.

Now ready, with Twenty Illustrations, price 10s. 6d.

NARRATIVE OF TEN YEARS' IMPRISONMENT IN THE DUNGEONS OF NAPLES. By ANTONIO NICOLO, a Political Exile.

London: ALFRED W. BENNETT, Bishopsgate St., E.C., and all Booksellers.

THE ARMY AND NAVY.

Published on the 1st of every month, price 3s. 6d.

COLBURN'S UNITED SERVICE MAGAZINE, & NAVAL AND MILITARY JOURNAL. This popular periodical, which has now been established more than a quarter of a century, embraces subjects of such extensive variety and powerful interest as must render it scarcely less acceptable to readers in general than to the members of those professions for whose use it is more particularly intended. Independently of a succession of original papers on innumerable interesting subjects, personal narratives, historical incidents, correspondence, &c., each number comprises biographical memoirs of eminent officers of all branches of service; reviews of new publications, either immediately relating to the army or navy, or involving subjects of utility or interest to the members of either; full reports of trials by courts-martial, distribution of the army and navy, general orders, circulars, promotions, appointments, births, marriages, obituary, &c., with all the naval and military intelligence of the month.

"This is confessedly one of the ablest and most attractive periodicals of which the British press can boast, presenting a wide field of entertainment to the general as well as professional reader."—*Globe.*

HURST & BLACKETT, Publishers, Successors to Henry Colburn, 13, Great Marlborough Street, W.

Those who may desire to commence taking the United Service Magazine with the new year, are requested to send their orders immediately to their booksellers.

Now ready, 30th Edition, 1 vol. royal 8vo. with the Arms beautifully engraved, price 31s. 6d. handsomely bound, with gilt edges.

LODGE'S PEERAGE AND BARONETAGE FOR 1861; under the especial Patronage of Her Majesty and H.R.H. the Prince Consort, and corrected throughout by the Nobility.

HURST & BLACKETT, 13, Great Marlborough Street, W.

CHINA AND LOWER BENGAL.

BY G. WINGROVE COOKE.

In 1 vol. post 8vo. price 6s. cloth.

CHINA AND LOWER BENGAL. The Fifth Edition, reprinted (by permission) from the *Times*, with great additions by the Author, including, for the first time, the Lower Bengal Letters. Illustrated with Woodcuts, Plans, and Maps.

"If accurate information is desired about China and the Chinese, these letters give it, and we think no more important subject can occupy the attention of this present generation."—*Times.*

"We may safely assert these letters on China and the Chinese have never been surpassed."—*Saturday Review.*

London: ROUTLEDGE, WARNE, & ROUTLEDGE, Farringdon Street, E.C.

Now ready, in 16mo. with 64 Illustrations, price 7s. 6d.

ATHLETIC & GYMNASTIC EXERCISES: Comprising 114 Exercises and Feats of Agility performed with the Parallel Bars, the Horizontal Bar, the Suspended Bar, the Suspended Ropes, and the Indian Clubs; preceded by a Description of the requisite Apparatus. By JOHN H. HOWARD.

"MR. HOWARD'S is a thoroughly practical little book. A brief introductory chapter sets forth what are now the universally admitted advantages of gymnastic training; the most approved apparatus of the modern gymnasium is next described, after which the author—a well-known professor of gymnastics—gives directions for the performance of above one hundred feats, progressively from the simplest to the most difficult, but one and all feats which he and his pupils are able to accomplish. Throughout the book the written direction is admirably assisted by the accompanying picture, so that the student of ordinary intelligence may, without a master's assistance, perform his gymnastic exercises with advantage and security. In every family where there are boys, Mr. Howard's book ought to be a welcome guest; but it ought to be specially welcomed in every boy's school."—*Morning Chronicle.*

London: LONGMAN, GREEN, LONGMAN, & ROBERTS.

NEW EDITION OF MARSHMAN'S LIFE OF HAVELOCK.

Now ready, in 1 vol. 8vo. with Portrait, price 12s. 6d.

MEMOIRS OF MAJOR-GENERAL SIR HENRY HAVELOCK, K.C.B. By JOHN CLARK MARSHMAN. Second Edition, thoroughly revised.

"THE new Memoir of Sir Henry Havelock is written by one of his wife's family with an affectionate admiration which the reader will not fail to share. We obtain from it the most intimate acquaintance with its hero; and as the religious tone of the writer's mind is in perfect harmony with that which characterised Havelock himself, the memoir is in every respect the better for the point of view from which it has been written."—*Examiner.*

London: LONGMAN, GREEN, LONGMAN, & ROBERTS.

Price Two Shillings.

WELLINGTON'S CAREER. A Military and Political Summary. By EDWARD BRUCE HAMLEY, Captain R.A., and Lieutenant-Colonel; Professor of Military History and Art at the Staff College; Author of "The Campaign of Sebastopol."

GLASS AND CHINA.

PELLATT & CO. have for more than thirty years had the honour to supply Officers' Messes with the above articles, and continue to manufacture the quality which has during that period given great satisfaction. Patterns and Estimates forwarded to all parts of the Country.—Address, Falcon Glass Works, Blackfriars, London, S.E.

GARDNERS' £2 2s. DINNER SERVICES complete, best quality. A large selection of patterns of the choicest description. Breakfast, Dessert, Tea, and Toilet Services, at the lowest possible prices. Cut Wines, 3*s.* 6*d.* per dozen; Cut Quart Decanters, 7*s.* 6*d.* per pair.—H. & J. GARDNER (by appointment to Her Majesty, the Board of Green Cloth, Lords of the Treasury, Admiralty, Office of Works, Customs, and the other Government Offices), 453 and 63, Strand, Charing Cross, W.C. Established 108 years. Engravings free by post.

GARDNERS' LAMPS are the Best—The Largest, most Recherché, and Cheapest Assortment in London. Moderator Table Lamps, 5*s.* 6*d.* each. Engravings free by post. Finest Colza Oil, 4*s.* 6*d.* per gallon. Lamps cleaned, repaired, and rendered equal to new. H. & J. GARDNER (by Appointment to Her Majesty). Established 108 years, 453, Strand, Charing Cross, W.C.

EQUESTRIANS SHOULD ADOPT GULLICK AND CO.'S PATENT "ECLIPSE" SPUR BOX, which raises the spur to the top of the heel. It will fit all spurs, but when others are required, it will be desirable to procure his Bridle-TERED SPURS, which have the plugs reversed, to suit more perfectly the action of the improved Box.
GULLICK & Co., Military Boot and Spur Makers, 24, Pall Mall, S.W.

THE MOUNTED RIFLE CORPS BOOT. Can be worn outside the trowsers in wet weather, entirely superseding the trouble and inconvenience of leggings, forming, in fact, the most complete military boot extant. Suitable for a knock-about boot in the country, &c. Price 38*s.* Shooting and Hunting Boots in every design and material.
KING & SOTHERS, 21, Piccadilly, W.

Printed by JOSEPH SMITH, of No. 10, Malvern Cottages, Denmark Place North, Clapham Road, in the county of Surrey, at the office of Messrs. HEADBURT & EVANS, in the precinct of Whitefriars, in the city of London, and published by him at his office, No. 16, Wellington Street, Strand, in the county of Middlesex.—SATURDAY, December 22, 1860.

ARCHIBALD GRAHAM, *to whom remittances are payable. The subscription to the paper is 7s. 7d. per quarter, or 30s. 4d. per annum, payable in advance, postage included.*

THE subject of the incorporation of the Tipperary Militia with the Royal Artillery has attracted so much attention, and is one moreover of such paramount importance to the officers of the latter regiment, not only for the present but for the future, that we may be excused for again recurring to it.

We should perhaps have thought it unnecessary to do so had it not been for a letter from "An Officer of the Line," which appeared in the *Times* of last Saturday. If anything were wanting to strengthen the cause of the Artillery officers, after the various arguments which have been everywhere adduced against the proposed measure, this letter would supply the want.

Characterised by great ability, and an intimate acquaintance with the details of the plan, this letter probably expressed accurately as might be the views of the supporters of the measure, and whatever can be advanced in its favour, it is fair to suppose, is advanced here. The writer has neglected nothing which could strengthen his arguments, and these arguments he has disposed with considerable skill; and yet, with all these advantages in his favour, we shall see that he fails entirely to answer the main objections to the proposed plan, and has wholly avoided grappling with the more important arguments which may be adduced against it; and when so able an advocate fails, under such favourable circumstances, we may be sure his case is not a very strong one. If we examine the arguments which he advances, we shall find that they amount to very little; nor does he prove anything that was not perfectly well known before. That the Royal Artillery and the Service generally will gain by the addition of some 600 lusty and well trained Militiamen nobody would attempt to dispute; that by such an addition, whatever might be the proportion of Militia officers who accompanied their men, the officers of the Artillery would obtain a certain amount of immediate promotion, was equally apparent; and if these two considerations were the only ones that presented themselves, the measure would probably be not very unpopular. But the real question does not lie within this compass. We will pass over the consideration that by thus introducing Militia captains and others, a gross injustice would be done to the officers of the Artillery; we will not dwell upon the fact that existing interests would thereby be violently overturned; that such a precedent, independent of the bad effect which it must have upon the prestige and *esprit de corps* of the Artillery, would be indirectly opening the door to obtaining commissions in that regiment by purchase, and that henceforward no officer, of whatever rank, service, or merits, can feel assured that his high qualifications may not at any moment be set aside in favour of a gentleman who by means of a well filled purse and a few honeyed words, is able to induce a certain number of men to volunteer for the regular Service. We will pass over these considerations, not because they are unimportant, but because we consider them to be self evident, because the "Officer of the Line" is himself compelled to admit that "the precedent may be objectionable," and that "some innovation" is thus made upon vested rights; and because a stronger argument than all these yet remains to us.

In considering the expediency of the measure (to which he would entirely sacrifice principle) "An Officer of the Line" has completely ignored or intentionally avoided the question of whether the Militia officers thus commissioned in the Royal Artillery will be qualified for the post. He never for a moment alludes to, or explains away the fact that they are wholly innocent of that careful special education which has hitherto been considered a *sine quâ non* for Artillery officers, and that their want of theoretical professional knowledge cannot be said to be compensated for by any practical experience acquired on foreign or active service.

We would ask, then, what peculiar qualifications have these officers displayed to entitle them to privileges which have hitherto been reserved for superior attainments, displayed in a long course of special training and severe competitive examination?

We have nothing to say against the officers of the Tipperary Militia; on the contrary, the high state of efficiency to which their regiment has been brought reflects great credit upon every officer in it, from the noble colonel down to the junior lieutenant; nor have we any doubt that they would perform their duty in the field as their countrymen ever have done. Their attainments, too, may be, for aught we know, of the highest order (in the name of Lindley Murray, however, we except the gentleman, whoever he may be, to whose pen we are indebted for the unique address to the men, which has been reproduced in the columns of a weakly contemporary), but we wish to know upon what grounds all the money and time spent in a cadet's education, all the preparation, all the examinations hitherto indispensable for an Artillery officer, are to be set aside in this case?

That the Government are by no means disposed to forego their education scheme, is proved by the recent Order, directing that on and after the 1st of April next all subalterns of the Artillery shall be subjected to an examination before obtaining their promotion, and by the fact that at the last examination at the Royal Military Academy the rules of the institution were so strictly enforced, that a cadet who actually passed within the first three or four of his "batch" was prevented from getting his commission by a failure in one single subject, viz., French!

Either one course or the other must be right. Either Artillery officers can be found ready made in any Militia regiment whose men can be induced to volunteer for the regular Service; or the old idea that high attainments and a certain special education can alone qualify for the position, is correct. Which of these two alternatives is the Government prepared to accept? If the first, then parents who are desirous of obtaining commissions for their sons in the Artillery should be informed of it, and they will readily see that the Royal Military Academy is not the place to send them to, and that the money which would be spent in their education at that institution may, especially if the son be not over-bright, be more advantageously laid out in another direction; if the second alternative be adopted, then let us have no more letters from "An Officer of the Line," attempting to show that the Service generally, or Artillery officers in particular, will be benefited by the sudden introduction over their heads of a number of gentlemen, whose qualifications, however great, have been subjected to no test; or that the need of Artillerymen is so great, and the danger of offending Ireland so considerable, that to obtain the first we must make "innovations" on the rights and interests of a distinguished corps, establish "an objectionable precedent," and ignore regulations which we ourselves have made; while to avoid the second we must, at whatever cost to others, and in opposition to our own fixed principles, accept the services of any regiment of Irish Militia which on its disembodiment can be persuaded by money or words to volunteer for the "regulars."

We still hope that arrangements may ultimately be effected by which the errors, inconsistencies, and injustice into which this measure would lead us may be avoided, while we secure to the country the very valuable services of the six hundred "Tipperary Boys," whom we shall be only too glad to see bearing as their badge the famous "Ubique."

It is positively painful to a journalist to pass his literary life in a moral Mantalinism—"one demnition grind" about France and Frenchmen. "France is doing this," and "Frenchmen are doing that." *Ma che fare?* It is impossible for him, if he be honest, to hold his peace, or to roll off glib sentences that "everything is going on as well as can be expected"—to sink into the slough of official optimism, and, if he gets no pudding for it, at least to hold his tongue. It is mere vulgarity to talk of official optimism and of red tape, as if they were the only results and the inevitable concomitants of official life, labour, and aims. But somehow or other, so great is the pressure of responsibility upon the heads of departments, so limited the allowance of moral courage, so great the fear of the Chancellor of the Exchequer of the debates on the Estimates, or of the abstract M. P. who is always making motions, that the heads of our departments are unquestionably slow in their movements in the way of reform, experiment, or initiation, and they require the *vis à tergo* of the press of popular clamour, or strong national pressure indicated by either or both to serve either as their motive power or as their excuse. Some time ago there appeared in this journal a series of papers on cavalry organisation from the pen of Field-Marshal Radetsky, translated from an Austrian military contemporary, which we are fairly justified in considering as the most remarkable essay on the subject that has appeared of late years in English. Previously and subsequently we called attention to the changes which France was introducing into her cavalry drill, on the very principles which the veteran hussar leader laid down to meet the change produced by arms and artillery of precision in modern warfare. Have we yet done anything in that direction? Are we making one step to meet the dangers which other states have long ago sought to obviate? Are we to be content with having the biggest men and the fattest horses in the world, in order that they may move the most slowly, and be killed the most rapidly when they are put to the use for which they unfortunately are intended? Are we taking any pains to find out what our neighbours are doing, or are we content when Colonel Claremont has duly sent off the last batch of ordonnances from Paris, and then do we sit down to consider the grave question whether Jones is to have Brown's troop, or if Smith is to be allowed to catch a captain to come in and sell? Are our energies wasted in minute and laborious investigations of mess bills, the mint, anise, and cumin of our endless regulations? And are we exhausted with examining minute questions of forage stoppages and the distinctions between necessaries and non-necessaries in the kit of a dragoon? Unfortunately personal questions and individual considerations exercise great influence both at the Horse Guards and at the War Office. The authorities are compelled to inquire into the fitness of officers for command over and above that which is sometimes the officer's only qualification, a full purse. It is notorious that there is a want of good cavalry officers fit for command at this moment in our Service; so much is the want felt, indeed, that some time ago it was contemplated at the Horse Guards to break through the custom which forbids a field officer to exchange from infantry to cavalry, in order to secure in the command of a regiment of horse, the services of a lieut.-colonel of an infantry regiment who had paid some attention to cavalry questions Although we led the opposition on that occasion, we are bound to admit that if things go on as they are it is questionable whether the Horse Guards may not be justified in enlarging the limits of the right to exchange between officers of cavalry and infantry, provided that a proper examination be passed by

Digitized by Google

those who seek to alter the nature of their duties. It is alleged that it is difficult to get the ordinary regimental work of cavalry properly done as it is. What hope, then, would there be of introducing changes with profit? One system imperfectly worked would give place to another still more deficient. Among some cavalry officers the belief is established that the Service is going to the dogs because the purse is not so potent as it was, and they tell you that the "old set of men" are not coming in, and the new style of fellows are not gentlemen. There may be some sad truth in that, but as long as our memory serves us the purse was potent in the British cavalry. What good stories are there not told of snuff-makers', bill-brokers', upholsterers' sons undergoing their usual probations in crack regiments? But there they were, in the crack regiments as cornets, with their balances ready to make them captains and colonels in good time. In fact, the reason of the decline and fall of "crackism" in cavalry —not only in what is called style, but in efficiency— may be attributed more directly to the power of the purse, which rendered men careless of their duties and independent of or indifferent to their profession, than anything we know. But the country will expect English cavalry to be up to the mark. In hard fighting they are sure to do well, though the Duke said that British officers of horse seemed only to have one idea, and that was to go at full gallop either to the front or to the rear. And we ask once more, what is being done in that direction? If the cavalry are perfect—well and good—they will certainly beat the cavalry of France, Russia, and Austria, which are declared by the military authorities of those countries to require revision. In the *Moniteur de l'Armée* of December 26th, there are some remarks from a distinguished cavalry officer worthy of consideration; for, contrary to the opinion received in this country, and viewed with no disfavour by ourselves till recent experience satisfied us of its incorrectness, he maintains that even the recent developments of target practice and the exercise of firearms does not go far enough in the true direction. In fact he seems to think the horseman should be made more of a rifleman and less of a sabreur; that he should be armed with a light strong rifle, easily loaded; that his horse should not be burthened with useless saddlery and equipments. "Grand battles," he rightly argues, are "impossible without cavalry." So much the worse for the grand battles, and so much the better for mankind, say we. Of course he believes the French cavalry superior to any which it may be called on to fight, and unquestionably it is an arm of which France may well be proud, even when she thinks of Quatre Bras and Mont St. Jean; but at the same time he deplores the effect of the law of replacement, and the exonerating clauses in the law of recruiting, which tend to deprive the cavalry of the sons of farmers, and to fill its ranks with prolétaires. The conclusion is, however, that the Instruction Provisoire issued by the Minister to regulate the individual exercises of troopers, and to adapt their movements and drill *en masse* to the improvements in arms and in the accessories of war, has done its work, and has been received with gratitude by the whole army. His Royal Highness the Duke of Cambridge is an excellent commanding officer. No man can be more earnest and anxious to do his duty, or to carry the efficiency of the Army over which he presides to the highest possible point. We are sure the Duke could introduce such changes and improvements in our Service as would leave no ground for apprehension that we were behind any nation in the world, and if he did so he would have the support of the nation against any opposition he might have reason to expect.

A new boat-carriage for the 25-pounder Armstrong gun has arrived from the Royal Arsenal, Woolwich, and been transferred to the Excellent. It has been modelled to fit the rifled ordnance from the old 24-pounder howitzer boat-carriage, and fitted with India-rubber buffer rings to check the recoil. There are fifteen rings, with metal washers between; but we confess to having very little confidence in the success of the experiment. The buffer principle has been now employed in a vast number of experiments in carriages, but in no case has it succeeded: nor is that to be wondered at when we consider that it gives elasticity without resistance; and, the more the India-rubber rings are increased, the greater the evil. We shall of course be glad to confess ourselves mistaken, but past experience would apparently point out that we should look to other means for solving the difficulty of the recoil of carriages in the contracted space which a ship's boat affords.

THE ARMY.

6th Dragoon Guards. Lieutenant Forster is about to compete for admission into the Staff College.

Royal Artillery. As many non-commissioned officers and gunners and drivers as could be spared from the ordinary garrison duties were granted leave from Woolwich to pass the Christmas holidays with their friends.

Royal Engineers. Orders were on Monday morning received at Chatham by Colonel H. D. Harness, C.B., director of the Royal Engineer establishment, for the 27th company of the Royal Engineers, under the command of Captain A. H. Durnford, to embark for Gibraltar on Thursday, to relieve the 2nd company, whose period of foreign service has expired. The 27th company contains some of the most skilful mechanics and artisans in Her Majesty's service, the men having been employed on several of the public works of importance, including the completion of the factory at Woolwich, on the occasion of the works being suspended through the strike. The company has been raised to 100 strong. Captain Fowler has proceeded on leave of absence from the south-west district. Lieut.-Colonel Lothian Nicholson, C.B., will, it is expected, not rejoin at Portsmouth again, but will in future be attached to the London district. Captain Hewett has rejoined, from leave of absence, at Portsmouth; and Lieut. Papillon has returned home from China sick, and will appear before a medical board in London. The 27th company embarked on board of the Himalaya troop-ship in Portsmouth dockyard on the 27th inst., and sailed the following morning for Gibraltar, where they will be employed in executing the extensive alterations proposed in the fortifications of that important post.

1st Royals. A short time since we announced that a private named Mc Sully, of this regiment, stationed in Colchester camp, whose term of duty had expired, had by a decision of the Court of Chancery come into possession of several thousand pounds. There is now reason to think the whole affair is a hoax, and that under this pretence the fellow has been victimising all who were foolish enough to trust him. After some time swaggering about Colchester with seven gold rings upon one hand, and treating his friends to champagne dinners for which he never paid, and manifesting his liberality in various other ways, he suddenly vanished, and the next heard of him was that he had visited Dundalk and other places in Ireland, giving grand parties, making handsome presents, and promising large sums to charities, after which he disappeared, leaving the silly tradesmen to bewail their credulity, and minus some hard cash borrowed, as well as the amount of the heavy bills contracted. It would have been impossible for him to have squandered his thousands in so short a space of time, and the fact that he borrowed money wherever he could, strengthens the opinion that the whole affair has been a false pretence and a hoax. The battalion on service in China will, it is believed out there, embark for England.

3rd Buffs. The battalion on service in China, is stated to be under orders for England.

8th Regiment. Colonel Paul Haines commanding, at Gosport. The officers and men have been directed by General Hay, Commandant of the School of Musketry, to make up the whole of this year's practice, although they were unable to do it at the proper season in consequence of their being on the passage from India. It is unlucky that this may interfere with the winter's leave, which indulgence the brave and good service rendered to the country during the late fearful mutiny had well earned for this gallant regiment.

11th Regiment, 2nd battalion, Lieut.-Colonel Jenner commanding. A board of officers, composed of Lieut.-Colonel Moore, 11th Regiment, Lieut.-Colonel Payne, Royal Marine Light Infantry, and Major Bayly, 8th Regiment, assembled at the Anglesea barracks, Portsea, on the 27th inst., for the examination of Lieutenant Jordan and Ensign Tibbs as to their fitness for promotion in the next relative superior ranks.

13th Regiment. Captain Hall arrived in England yesterday by the mail steamer Celt, from the Cape of Good Hope. This regiment was on the *qui vive* to be sent to New Zealand.

19th Regiment. Lieutenant-Colonel Robert Warden, commanding the 2nd battalion of this regiment at Portsmouth, performed an act of prompt justice on a criminal when lately a visitor at the Military Prison at Gosport. While performing his duty there he was suddenly assaulted according to the present fashion of the day by a prisoner, when the gallant officer, who is well known as a good bruiser, by a straight one, well delivered from the shoulder, knocked the miserable wretch down as flat as a ninepin. The delinquent has been tried by court-martial, and altogether reckoned without his host in catching such a tartar.

30th Regiment. A detachment, consisting of 32 non-commissioned officers and men, under the command of Lieutenant J. Sharples, has arrived at Chatham from Bermuda, having disembarked from the § hired troop-ship Harvest Queen. After the troops had been medically inspected, seven of the number were admitted into hospital at Fort Pitt, and the remainder sent to the invalid depot at St. Mary's.

44th Regiment. A few evenings since a private of the depot of this regiment, named Field, stationed in Colchester Camp, attempted to commit suicide by cutting his throat whilst in a state of intoxication. He lies in a precarious state, but hopes are entertained of his recovery.

Royal Marines. Captain Haverfield, Woolwich Division, was on Saturday last recalled by telegram from leave of absence, and was ordered to hold himself in readiness for service on board Her Majesty's screw steam-frigate Narcissus, 51, together with Second-Lieutenant Swinton, one sergeant, one corporal, one drummer, and 46 privates, and 5 privates for the gun-boat Penguin, tender to the Narcissus. None but men of good character and passed soldiers are to be embarked. Two hundred men belonging to the Woolwich Division were on Saturday last granted five and six weeks' furlough to visit their friends for the Christmas holidays. By the death of Lieut.-General Willis, Colonel Stransham, Commandant of the Woolwich Division, receives his promotion as Major-General, and retires from the command, in which he will be succeeded by Colonel Campbell, Second-Commandant. The battalion of this gallant regiment on duty in China, may, according to accounts by this mail, be expected home in England.

52nd Regiment. There is a report that some disorderly proceedings have occurred at Sealkote on the part of men in this regiment. It is on its way to Jhansi.

59th Regiment. Major Maunsell and Assistant-Surgeon Crisp, arrived in England yesterday from the Cape of Good Hope by the mail steamer Celt. This regiment was held in readiness to go on to New Zealand if required.

87th Regiment. The accounts from China state that this regiment will probably be ordered home forthwith.

89th Regiment is ordered to Umballa.

Rifle Brigade. The 3rd battalion is to remain, according to the *Delhi Gazette*, at Agra for another season. The same paper states that there is probably no other reason for this arrangement but economy, and a desire to save trouble and expense to officers and men. But a bazar rumour has it that there is something unsatisfactory in the relations between the Indian Government and one of the neighbouring Rajpootana Courts, and in consequence the Rifles are to remain where they are.

We are informed that in consequence of the peace with China, the orders for shipment of a large additional quantity of war stores from Woolwich for that country have been countermanded; but the utmost activity still prevails at the military store department of the Royal Arsenal in the shipment of shot, shell, &c., for New Zealand, Gibraltar, and other foreign stations.

In consequence of its having been found that the "mixture for browning arms," supplied from this country, is liable to considerable loss from fermentation on distant voyages, it has been decided in future to issue to all foreign stations the ingredients unmixed for making the browning liquid instead of ready for use as at present. General instructions for mixing the chemicals and for browning gun barrels, have been sent out on the subject to all military storekeepers.—[We believe that ours is the only army in the world in which the musket barrels are browned.]

On the return of an old soldier, the Colour-Sergeant of H.M. 60th Rifles, George Lawrence, to Nazing, his native village, the church bells were rung in welcome—an unusual compliment to a wearer of the stripes.

Major Martin, of H.M. 4th Regiment, has forwarded from Aden the specification of a patent for "a war truck" and "portable rifle battery," intended for the use of unfortified coasts, &c., which seem to be of the sort commonly called "infernal machines." There is a great deal of ingenuity displayed in overcoming obvious difficulties, and in adapting these machines to warlike and field purposes, but we can scarcely believe that they will be brought into use unless Major Martin is able to give some practical proof of their superiority, and of their adaptation to the objects for which they are intended.

Her Majesty's "Mews."—If any Member of Parliament, curious in the little details of Government expenditure, will dive deep into the military estimates during the future session, he may find an item for feeding and tending a certain number of tom-cats, to account for the insertion of which may possibly, and not unnaturally, puzzle him. In order therefore to prevent his putting the War Minister to the trouble of an explanation, we volunteer to enlighten him in the matter. Some years ago it was found Government store-houses were so infested with vermin, that the property of the nation materially suffered, particularly in articles about or in which it was necessary to use a portion of grease or oil. 'At length it was determined to employ the natural enemies of the tribe to exterminate, or at any rate reduce their numbers—two cats were sanctioned for each store, which are to this day rationed by the storeman at 4*d.* a head per diem. We are happy to be able conscientiously to add that puss earns his grub of the public; for since his introduction, rats and mice have in a great measure disappeared from many of the buildings; and if it should be asked, why the necessity of feeding him in such excellent sporting grounds can exist, we may state that it is a well-known fact that Tom, like his master, does his work best when in comfortable circumstances, and that although he hunts as much for amusement as for the pot, he is not then a whit the less keen after the true instincts of his nature.

The New Ventilating Grates.—We understand that the reports which have been made by general officers in command to His Royal Highness the Commander-in-Chief, respecting the ventilating grates, which have been erected for experiment in various barracks, are of a character admitting no doubt whatever of the inefficiency of the substitute for the good old comfortable fireplace, to which we have been so long accustomed. These new affairs were so shallow that they scarcely held any coals, and consequently threw out no heat into the room; yet it was by this want of depth, and apparent semblance to a fire, that Government intended to save so many pounds of fuel a week. To increase the fire the men made an artificial front to the grate, but this mended the matter very little, and, moreover, was not altogether safe. However, it burnt out the small supply of coal in four or five days, and left them cheerless during the remainder of the week. It is said that the grates are to be altered in depth; but we beg to point out that this will not satisfy the men, nor, we may add, the women; for the want of a hob is a source of the greatest discomfort; and we ask what kind of a grate should we think it, if in a private house we found one where neither a kettle nor a teapot could be set or boiled, or a plate put to keep the meat hot, in case a man was late for dinner, as is often the case? The whole affair has a "green coffee" smack about it, which is inodorous and unrefreshing, and reflects no credit on the judgment of those officials who persuaded the authorities to experimentalise on one of the great necessaries of existence, at the season when nature compels us to employ artificial means to keep up the proper circulation in health and vigour.

A Black Sheep.—In accordance with orders to that effect, the whole of the officers and men composing the third battalion of infantry at Chatham garrison were drawn up on Monday on the parade-ground of the hut barracks, for the purpose of hearing read the finding and sentence of a district court-martial, which recently assembled for the trial of an incorrigible character named Francis Brady, a

Digitized by Google

private in the 1st battalion of the 19th Regiment. The prisoner was arraigned on a charge of striking with his fist in the face Lance-Sergeant Tanner, of the same regiment, whilst in the execution of his duty; and also with refusing to undress himself for medical inspection when placed under arrest. During the time prisoner had been in the service his character has been very bad, and before he enlisted into the 19th Foot he had deserted from another regiment. On the occasion of his trial his conduct was of a most outrageous character, and he frequently swore at the president and the other members of the court. The court found him guilty, and sentenced him to be imprisoned with hard labour for two years. At the expiration of that time he will be placed on his trial for his conduct before the court-martial.

REINFORCEMENTS FOR NEW ZEALAND.— The Bombay government, in pursuance of instructions from England, have chartered the Castilian, 1064 tons, at 24*l.* per head, and the Star Queen, 836 tons, at 19*l.* 10*s.* per head, for the conveyance of Her Majesty's 57th Regiment from Bombay to New Zealand. The Star Queen sailed on the 24th of November, with Major H. Butler, Brevet-Major J. Hassard, Captain W. E. Brown, Captain J. R. Grimstone, Lieutenants B. C. Bayntun, E. G. Hasted, R. A. H. Cox, Ensigns A. M'Clintock, P. F. Clarke, R. E. Brown, R. Murray, Assistant-Surgeon J. Davis, and 335 men of the 57th Regiment. The Castilian was expected to sail soon afterwards.

CONSIDERATE TREATMENT OF MILITARY INVALIDS.—The non-commissioned officers and privates of various cavalry and infantry regiments who have recently arrived wounded and disabled from the East and West Indies and the colonies, and have been inspected by the Commissioners of Chelsea Hospital, were discharged from St. Mary's invalid depot, on Thursday morning, and forwarded to their respective homes at the expense of the War Office. Each man, before leaving the garrison, was well supplied with a sufficient quantity of warm clothing to enable him to bear the journey to his home.

A SOLDIER KILLED BY HIS COMRADE.—On the night of Tuesday last a shocking event occurred at the Hut Barracks, occupied by the Military Train Corps, at the encampment at Woolwich. It appears that some dispute took place between John May, a private of the 2nd battalion of the corps, and a comrade named Charles Knight, the latter accusing the former of keeping possession of a pipe which belonged to him. May left the barracks, but was pursued by Knight, who attacked him in a savage manner, and May fell heavily, receiving a fractured skull from contact with a large stone. The sufferer was quickly conveyed to the hospital of the corps, where every attention was paid him; but the injuries received were so extensive that he died within two hours after admission. On hearing of his comrade's death Knight ran away from the barracks, and although several pickets were sent in pursuit he has not yet been found. Information of the occurrence has been sent to Mr. C. J. Carttar, coroner for West Kent, who will hold an inquest on the body.

SHORNCLIFF CAMP.

On Saturday last the whole of the 2nd Brigade assembled on the parade ground, on which triangles were erected for the purpose of hearing the promulgation of the sentences on four privates of the 2nd battalion 17th Regiment, who have recently been tried by general courts-martial, as reported in this journal, for assaults on officers of their regiments. The sentences in two of the cases, those of privates Watson and Connelly, took them and the whole brigade by surprise; for, seeing the triangles erected, the look of the first named prisoner, who marched up with a very confident air, seemingly anticipating fifty lashes and a few years penal servitude, was suddenly changed to one of intense dejection when the Brigade-Major, Captain Carleton, read the sentence, which was that the prisoner, Private Watson, be shot to death by musketry, adding, Her Majesty has been pleased to approve and confirm the same. On hearing this, the prisoner's chin sunk down on his breast, and his countenance became perfectly livid; the Brigade-Major then read that Her Majesty had been pleased to respite the capital sentence on the prisoner, who was sentenced to penal servitude for the term of his natural life. Thesecond prisoner was then brought forward and received a like sentence with the same commutation. Private Darkins was next brought forward and sentenced to ten years penal servitude, and the fourth, Private Chatley, was sentenced to penal servitude for two years, and to receive fifty lashes. The prisoner was at once fastened to the triangles, and received the latter part of his punishment, during the infliction of which a heavy fall of snow took place. He bore the punishment without a groan, and was marched to the general hospital, from whence he will be transferred to Aldershot District Military Prison, there to undergo the remainder of his sentence. The three other prisoners were on Wednesday sent under military escort to Millbank Penitentiary.

The Christmas festivities have been kept up with great animation in the camp. In the 2nd battalion of the 21st Lieutenant-Colonel Lowe, C.B., honoured the sergeants' mess by attending the ball they gave, and also sent a dozen of wine for the occasion. Since Colonel Lowe has had command of this regiment he has annually given a dinner to the wives and children of the non-commissioned officers and privates of the regiment. This year, however, the colonel, instead of a dinner, has headed a subscription with 5*l.*, which was increased to 30*l.* by the other officers, for the purpose of giving a quantity of warm clothing to the women and children in lieu of a dinner. This seasonable benevolence has much pleased the recipients, and reflects great credit on the colonel.

The weather at Shorncliff has been very severe, and the soldiers' huts are not impervious to the snow, which has fallen in great abundance; many of them find themselves in the morning enveloped in snow, which finds easy access through the ventilators and chinks in the woodwork of the huts; an additional blanket, or some means to exclude the unwelcome visitation would be a boon which would be no doubt properly appreciated.

The soldiers have taken advantage of the fall of snow, and the consequent release from their military duties, to erect at various parts of the Camp snow huts, which have a very singular appearance, and prove a great source of amusement to men condemned to the monotony of camp life.

COLCHESTER CAMP.

During the absence of Colonel the Honourable Alexander Gordon, in consequence of the decease of his father, the Earl of Aberdeen, the command of this camp has devolved upon Colonel Dixon, C.B., commandant of the 9th Depot Battalion. Major West, of the 10th Depot Battalion, has received an extension of his leave of absence to the 31st of January. Brigade-Major Cooch, of the staff of this camp, has returned after three months' leave of absence, and resumed his duties; Captain Craster, 38th Regiment, has been Acting Brigade-Major during his absence.

The intense severity of the weather has tried the men very much during the week, and notwithstanding the extra supply of fuel, the troops have found the greatest difficulty in keeping up the temperature of the huts to anything like a comfortable degree of warmth.

On Christmas-Day the troops had, as usual, an excellent dinner of roast beef, plum-pudding, &c., with an almost unlimited supply of old ale, subscribed for by the officers of each regimental depot. The model canteen was gaily decorated, and was the rendezvous of a very merry party of the men in the evening. The proposed reduction of the Indian depots to the extent of 100 men per regiment, will considerably reduce the strength of this camp, at present numbering 2200 men. The twelve regimental depots stationed here will all come within the category of those whose strength is to be reduced, which it is supposed will be accomplished by suspending recruiting for those regiments after the enrolment of 100 men less than their present completed strength. It is, however, currently reported that Colchester will shortly cease to be a depot station, and that the present camp will be occupied by two entire regiments of infantry.

The severity of the weather at the early part of the week, suspended the prosecution of the important sewerage works now being carried on in the camp, but on Thursday they were resumed. The excavations are very deep, and the soil being exceedingly treacherous, great care is necessary in carrying out the works.

The Army Gazette.

WAR OFFICE, PALL MALL, DECEMBER 28, 1860.

1st Regiment of Dragoon Guards—Charles Matthew Moran, Gent., to be Cornet, by purchase, vice Bowyer promoted.

6th Dragoons—Cornet and Adjutant Thomas Joseph Fitz Simon, to have the rank of Lieutenant; Cornet Alexander Frederick Stewart to be Lieutenant, by purchase, vice the Honourable William Oct. Beresford Annesley, who retires.

8th Light Dragoons—Captain Esdaile Lovell Lovell, from the 10th Light Dragoons, to be Captain, vice the Honourable Everard Stourton, who exchanges.

10th Light Dragoons—Captain the Honourable Everard Stourton, from the 8th Light Dragoons, to be Captain, vice Esdaile Lovell Lovell, who exchanges.

14th Light Dragoons—Charles Alexander Price Talbot, Gent., to be Cornet, by purchase, in succession to Lieutenant Graham, removed to the 18th Light Dragoons.

17th Light Dragoons—De Pentheny de Pentheny O'Kelly, Esq., to be Paymaster, vice George Berkeley Belcher, deceased.

1st or Grenadier Regiment of Foot Guards—Lieutenant and Captain Charles Napier Sturt to be Captain and Lieutenant-Colonel, by purchase, vice Sir William Thomas Francis Wallace, Bart., who retires; Ensign and Lieutenant Arthur Divett Hayter to be Lieutenant and Captain, by purchase, vice Sturt; Ensign William Duberly, from the Rifle Brigade, to be Ensign and Lieutenant, by purchase, vice Hayter.

2nd Foot—Cornet Charles Borlase from the 6th Dragoons to be Ensign, vice Pinkerton, promoted.

12th Foot—Ensign Henry J. MacDonnell to be Lieutenant, by purchase, vice Samuel Hall, who retires.

13th Foot—Lieutenant Edward Henry Hall to be Captain, by purchase, vice Thomas Chevalier Robertson, who retires; Ensign Gerard Septimus Burton to be Lieutenant, by purchase, vice Hall; William Charles Frederick Madden, Gent., to be Ensign, by purchase, vice Bell, promoted; Charles Edward Stanley Lee, Gent., to be Ensign, by purchase, vice Kemmis, promoted; Richard Leigh, Gent., to be Ensign, by purchase, vice Home, promoted.

14th Foot—Lieutenant Richard Seymour Lemon to be Instructor of Musketry, vice Heaton, retired.

16th Foot—Samuel John Pullin, Gent., to be Ensign, by purchase, vice Walpole, appointed to the Rifle Brigade; Lieutenant Lancelot Le Feuvre to be Instructor of Musketry, vice Bostock, appointed Captain Instructor at the School of Musketry.

21st Foot—The Christian name of Quartermaster Grahame is *George*, and not *J.*, as stated in the *Gazette* of the 17th August, 1855.

22nd Foot—The first Christian name of Ensign Grove, is *Edward*, not *Edmund*, as stated in the *Gazette* of 21st December, 1860.

25th Foot—Harvey Randel Seville Armstrong, Gent., to be Ensign, by purchase, vice Crossman, promoted; Charles Francis Barnardiston, Gent., to be Ensign, by purchase, vice Chisholm, promoted.

30th Foot—Henry Granville Sharpe, Gent., to be Ensign, by purchase, vice Eden, promoted.

31st Foot—Lieutenant George John Hamilton to be Captain, by purchase, vice John William Townsend Fyler, who retires; Ensign Alexander Cumming Gow to be Lieutenant, by purchase, vice Hamilton.

39th Foot—Henry Lewis Brooke White, Gent., to be Ensign, by purchase, vice Pope, promoted.

42nd Foot—Ensign Charles William Pole Warner, from the 43rd Foot, to be Ensign, in succession to Lieutenant Thomas Mansfield James, deceased.

57th Foot—Ensign Richard Edward Brown to be Lieutenant, by purchase, vice Samuel Hopper Powell, who retires; Archibald Kennedy Douglass, Gent., to be Ensign, by purchase, vice Brown.

60th Foot—Lieutenant James Arthur Morrah to be Adjutant, vice James Sturgeon Hamilton Algar, who resigns that appointment.

64th Foot—John Gee, Gent., to be Ensign, by purchase, vice Sams, promoted.

72nd Foot—Lieutenant Mostyn De la Poer Beresford to be Captain, by purchase, vice Henry Bentinck Coathupe, who retires; Ensign Herbert Barron to be Lieutenant, by purchase, vice Beresford.

82nd Foot—The appointment of Captain William Cooke O'Shaughnessy, from the 2nd West India Regiment, to be Captain, vice Brevet-Major Samuel Peters Jarvis, who retires upon half-pay, as stated in the *Gazette* of the 18th December, 1860, has been cancelled.

87th Foot—Lieutenant Anthony Butler to be Captain, without purchase, vice John Rawson Simpson, deceased; Ensign John Leigh Hollest to be Lieutenant, without purchase, vice Butler; Lieutenant Walter Carr Mackinnon to be Adjutant, vice Lieutenant Anthony Butler, promoted.

88th Foot—John James Davidson, Gent., to be Ensign, by purchase, vice Buchanan, promoted.

91st Foot—Major William Thomas Laird Patterson to be Lieutenant-Colonel, without purchase, vice Brevet-Colonel John Francis Glencairn Campbell, C.B., promoted to be Major-General; Captain William Benjamin Battiscombe to be Major, without purchase, vice Patterson; Lieutenant William Prescod Gurney to be Captain, without purchase, vice Battiscombe.

92nd Foot—Ensign William Grisdale Hicks to be Lieutenant, by purchase, vice Gordon Stonhouse Hughes, who retires.

93rd Foot—Frederick William Welch, Gent., to be Ensign, by purchase, vice Potts, promoted.

94th Foot—Lieutenant Francis Hamilton Elliot to be Captain, by purchase, vice Courtenay, W. A. T. Kenny, who retires; Ensign James Browne to be Lieutenant, by purchase, vice Elliot.

100th Foot—Major Hugh Rowlands, from half-pay Unattached, to be Major, vice Brevet-Lieutenant-Colonel Thomas Mathias Luz Weguelin, who exchanges.

Rifle Brigade—John Lionel Tuffnell, Gent., to be Ensign, by purchase, vice Duberly, appointed to the Grenadier Guards.

3rd West India Regiment—Ensign Charles Ramsay Gibb, from the 20th Foot, to be Ensign, vice O'Grady, promoted; Staff-Assistant-Surgeon James Ferguson to be Assistant-Surgeon, vice Carbery, deceased.

Ceylon Rifle Regiment — Richard Calvert, Gent., to be Ensign, without purchase, vice John Glover, who has resigned.

DEPOT BATTALION.

Captain John William Maddon, 4th Foot, to be Instructor of Musketry, vice Captain Bray, 83rd Foot, who has been removed with his Depôt to Chatham.

UNATTACHED.

Captain and Brevet-Lieutenant-Colonel James Dundas Gregorie Tulloch, half-pay, 84th Foot, and Staff Officer of Pensioners, to be Major, without purchase.

STAFF.

Lieutenant-Colonel James M. Primrose, 43rd Foot, to be Deputy-Assistant-General to the Forces serving in Madras, vice Lieutenant-Colonel and Brevet-Colonel Charles Albert Denison, 52nd Foot, whose period of service in that appointment, and on the Staff, has expired.

COMMISSARIAT DEPARTMENT.

Deputy-Assistant-Commissary-General Thomas John Hume has been permitted to resign his Commission.

MEDICAL DEPARTMENT.

Assistant-Surgeon George Youell, from the 54th Foot, to be Staff-Assistant-Surgeon, vice Ferguson, appointed to the 3rd West India Regiment; Staff-Assistant-Surgeon George Henry Dyer has been permitted to resign his Commission.

BREVET.

The undermentioned promotions to take place consequent on the death of Major-General William Freke Williams, on the 12 December, 1860:—

Lieutenant-Colonel and Brevet-Colonel Lord Frederick Paulet, C.B., from the Coldstream Guards to be Major General.

Brevet-Lieutenant-Colonel Sir Henry F F. Johnson, Bart., Major, half-pay, 5th Foot, Deputy-Quartermaster-General at Mauritius, to be Colonel.

Major John James Bull, 56th Foot, to be Lieutenant-Colonel.

Captain Edward Smyth Mercer, 94th Foot, to be Major.

Memorandum—The exchange between Lieutenant Lord Louth, of the 79th Foot, and Lieutenant Birch, of the 24th Foot, to be dated the 25th September, 1860, and not the 30th November, 1860, as stated in the *Gazette* of that date.

ARMY MEDICAL DEPARTMENT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR, — Concurring as I do with the remarks of your correspondent "M. D.," and which appeared in your impression of the 24th ult., perhaps you will permit me to trespass on your valuable space for the purpose of showing how some of the provisions of the late Royal Medical Warrant are nullified by reason of the classification of the medical department with the purely civil and clerical departments of the Army; and how others have been evaded by the evident desire on the part of those in authority to prevent medical officers enjoying the advantages which they were led to expect the Warrant would bestow. In this, however, their hopes were disappointed. Can it be, Mr. Editor, that the heads of the department do not exercise that jealous vigilance which others are wont to bestow in defending from encroachment what was won by the junior officers principally, backed by the powerful aid of public opinion through the medium of the Press, and I may add Members of Parliament. Such, sir, must be the case, for from the well-known interest Mr. Secretary Herbert displays in everything connected with the department, I feel confident that if his attention was drawn to the fact, the late Medical Warrant would not be nullified by each subsequent Queen's Regulations. In proof of what I have stated above, I would direct attention to the "classification" as laid down in the last Queen's Regulations, wherein medical officers are omitted from the regimental staff, and are enumerated under the head of the medical department in the list of the civil departments of the Army. Now, sir, I would ask why this innovation? for in the Queen's Regulations of 1857 medical officers were included amongst the regimental staff. If medical officers are in future not to be considered as regimental officers, notwithstanding that vacancies to regiments when filled up appear in the *London Gazette*, surely subscriptions to the band and mess, as well as change of appointments on joining the regiment should not be exacted. I do not for one moment wish to find fault or grumble at the sums so deducted; but if the authorities consider regimental medical officers merely attached, and not forming part and parcel of their corps, then the band and mess subscriptions must be considered as so much exacted under false pretences. But this is not all. It may be recollected that one of the grievances complained of in the Memorial of medical officers serving in the Crimea, was that proper funeral honours were denied to those who had fallen there, although exposed to the same dangers and hardships as their combatant brethren, and, in addition, to disease in the discharge of their hospital duties. It was supposed that this grievance was for ever removed by Clause 23 in the late Warrant, which reads as follows:— "Medical officers shall be entitled to the *same honours* as other officers of our army of equal relative rank." The italics are mine, and it is worthy of remark that so particular were the Commissioners in framing this clause, that the only exception they made was respecting compliments to be paid by guards. By the removal in the last Queen's Regulations of medical officers from the regimental staff and their "classification" with the civil departments, this clause is virtually nullified. I am sure that no combatant officer with any generous feeling, and who has been in active service, would wish to see a brother officer carried to the grave, and refused those honours that the youngest private in the Army is entitled to, because he is "only a doctor."

In conclusion, I may mention that the Warrant is not acted up to in so far as regards lodging money or detention allowance. With respect to quarters in barracks some allowance is to be made, inasmuch as that the majority of the existing buildings were constructed when field officers or those having the relative rank were but few.—I am, &c.,

OBSERVER.

LORD CLYDE AND THE INDIAN MUTINY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Would it not be a graceful and well-merited compliment to Lord Clyde were the Government to order a medal to be struck at the Mint, in commemoration of his Lordship's achievements in the suppression of the Indian rebellion?

The medal might bear on the obverse Her Majesty's head, with the words "Victoria D. G. Regina Britanniarum, Imperatrix Indiæ," and on the reverse Lord Clyde's head, with the words "India pacificata, Campobello duce, 1857-59."—I am, &c.,

D. F. C.

MILITARY OFFICIAL CIRCULARS.

The Adjutant-General, Sir James Yorke Scarlett, has issued a Circular Memorandum, addressed to the army at home and abroad, wherein His Royal Highness the General Commanding-in-Chief requests that officers commanding cavalry regiments will attach to each of the monthly returns rendered to the Horse Guards a statement of the number of chargers in the possession of officers, distinguishing which horses have been taken from the re-mounts.

A Circular Memorandum, dated the 20th inst., has been promulgated by the Adjutant-General, Sir James Yorke Scarlett, addressed to service and depot companies of regiments of infantry in India, stating that the distribution of regiments of infantry in India is to be as follows, until further orders, viz. :—10 service companies, comprising 3 field officers, 10 captains, 12 lieutenants, 8 ensigns, 6 staff, 56 sergeants (exclusive of schoolmasters), 21 drummers, 50 corporals, 950 privates ; 2 depots, comprising 2 captains, 2 lieutenants, 2 ensigns, 10 sergeants, 4 drummers, 10 corporals, and 90 privates.

A Circular Memorandum, addressed to the army at home and abroad, has been issued, of which the followingis a copy :

"Horse Guards, Dec. 21.

"As a means of facilitating and expediting the official correspondence, it is particularly requested that letters addressed to this office may invariably have the general purport thereof noted on the upper left-hand corner.

"A list of the ordinary subjects on which the Adjutant-General is referred to is shown in the margin,* and as a general rule, one of them will be found to meet the case, but if not, any other appropriate heading may be used.

"When a letter is a reply to one received, the word quoted should be that which appears in the Adjutant-General's communication. By command,

"J. YORKE SCARLETT, Adjutant-General."

NON-COMMISSIONED OFFICER CLERKS.

The annexed Circular Memorandum respecting non-commissioned officers for clerkships has been addressed to the Army at home and abroad :—

"Horse Guards, Dec. 18. 1860.

"With reference to the Circular Memorandum, dated Horse Guards, 6th July, 1857, relative to the appointment of retired or pensioned non-commissioned officers to clerkships in the six out-stations branches of the War Department, His Royal Highness the General Commanding-in-Chief hereby notifies that he has received a communication to the effect that the Secretary of State for War has decided for the future to appoint men of the class above mentioned only to clerkships in the manufacturing departments and purveying branch, admission to the military store branch being reserved for such candidates as may be found eligible under the general regulations prescribing the qualifications of clerks at out-stations of the War Office.

"All retired or pensioned non-commissioned officers from every arm of the Service, whose names may be favourably brought to the notice of the Secretary of State by His Royal Highness will, upon vacancies occurring, be eligible for employment as clerks in the purveying or manufacturing departments, provided they produce the certificates and pass the examination required by the annexed Memorandum.

"Candidates for these situations will continue to send their applications to the Military Secretary, with the necessary certificates. "By command,

"JAMES YORKE SCARLETT, Adjutant-General."

"ESTABLISHED AND TEMPORARY NON-COMMISSIONED OFFICER CLERKS IN THE PURVEYING AND MANUFACTURING DEPARTMENTS.

"Candidates for the situations of established non-commissioned officer clerks in the purveying and manufacturing departments must possess the following qualifications :

"1. They must be under 42 years of age.

"2. They must be of good character.

"3. They must be in good health.

"They will, consequently, be required to produce satisfactory evidence on these points, and will not be noted for appointments without the production of a good character from their late commanding officers, transmitted through the Military Secretary to the Secretary of State for War, with the recommendation of His Royal Highness the General Commanding-in-Chief. Candidates will be examined by the Civil Service Commissioners in the undermentioned branches of knowledge :

"FOR PERMANENT CLERKS.

"1. Exercises to test handwriting and orthography.

"2. Arithmetic (including vulgar and decimal fractions).

"3. English composition.

"TEMPORARY CLERKS.

"1. Exercises to test handwriting, orthography, and grammatical correctness.

"2. Arithmetic, elementary.

"In each of these subjects the candidates must pass a satisfactory examination."

DIVISIONAL ORDERS.—Aldershot, 22nd December, 1860. 10. The undermentioned officer has leave of absence for the period stated—Captain M'Crea, District Inspector of Musketry, from 24th Dec., 1860, to 31st January, 1861, on private affairs. 24th Dec.—3. A Board of examination assembled at 11 a.m. on Thursday last in the barracks of the 9th Lancers for the purpose of examining and reporting upon Lieutenants Evans and Thursby, of that corps, as to their qualifications for promotion to the higher rank. 27th Dec.—2. The undermentioned officer has leave of absence for the period stated—Assistant-Surgeon J. Atkinson, 5th Lancers, from the 23rd Dec., 1860, to the 23rd February, 1861, on private affairs.

* Adjutants for rifle corps, African duty, arms and ammunition bands, books, and records, claims, clothing, confidential reports, courts-martial, discharge of soldiers, discipline, embarkation, examination of officers, furloughs, guards of honour and Royal events, horses, invaliding, leave of absence, leave to proceed abroad, medals, for conduct, medical, messes, militia, newly-appointed officers, passages, posting of officers, promotions of non-commissioned officers, returns, salutes and state ceremonies, school of musketry, service and depot companies—interchange of officers and men between, schoolmasters, school of music, staff appointments and regiments, staff college, transfers, volunteering, volunteers attached to troops for instruction, and war medals.

FRANCE.

[FROM OUR OWN CORRESPONDENT.]

PARIS.—Monsieur Paul de Molènes, whose name is not unknown in literary circles, has just published "Les Commentaires d'un Soldat." The first part of this volume refers to the Crimean war, the latter to the Italian campaign. "God," says the author, "has been graciously pleased to permit of his being present at all the fighting which has taken place during the last twelve years," and he devoutly prays that Providence may provide in an equally bountiful manner for his future. M. Molènes is a soldier, not a man of science measuring war with a rule and compass ; not an historian, constantly leaving the field for the cabinet. The great fault of his work is the heavy ornamental phrase-making part, in which the name of the Deity is constantly invoked. In referring, for example, to Waterloo : he thought he was reading in characters "where God and French blood had traced one of those immortal pages which we would not wish to tear from our history, in spite of the pain it affords us." Again, a young man gives up a government situation and joins the army before Sebastopol ; and "he feels the spirit of a warrior pass near him, and he entered our ranks as a man enters religion, with faith, with enthusiasm, with ardour, with the determination to offer a noble example to the youth of his age." Then the French soldiers, carrying up shot to the front, resembled our Saviour bearing his cross. M. Molènes overlooks here that the cannon balls were not taken to the Russian batteries, but were being borne along for the special destruction of an obstinate enemy. Our Saviour carried his own cross, not that of Pontius Pilate. But notwithstanding these faulty trimmings, "Les Commentaires" are full of interest. In reading the first part, many a British soldier will feel pleasure in re-tracing his footsteps, or rather, in going over the ground again in French boots. He will not have much to complain of in the manner in which we are handled, for M. Molènes says distinctly that he only describes what passed under his own eyes. His greatest fault, then, in our regard, is omission ; but it is only just to say, that he does not expose our errors and hide what we did well. In what he has said of the English army, the good outbalances the bad. He was astonished to find Hotspurs out of the pages of Shakspeare ; he considered the slowness of our movements as a useless sacrifice of life : we are either one thing or the other, we calculate too coldly, or show a daring which strikes all with amazement. But the book of M. de Molènes is quite worthy of a rapid sketch, for the writer has an easy pen and loves his subject. Some look upon war as an affliction ; others lift up their eyes and term it impious ; but our author has always considered it as an expression of the Divine will, and the day when war shall be no more will be regarded by him not as a special blessing, but as a sign of heavenly wrath. It is with these feelings that he sees powerful nations clashing together, and himself joins in the strife. Serving in a regiment of Spahis in Africa when the war broke out, he was soon on his way to join his old chief, St. Arnaud, who loved to see around him manners and costumes which recalled many a darling souvenir. With a heart credulous of the future he embarked in the sailing vessel L'Espérance, and after having been much tossed about on the sea, and had an opportunity of visiting the plains where, "*Troja fuit*," he was at last landed at Gallipoli, to be there cursed of true believers and eaten of fleas. His first glimpse of Asiatic life was sadly disappointing. The wonderful mirage seemed to exist everywhere, in the dwellings, in the people : palaces, splendid in the distance, crumbled to ruin on drawing near ; and the people resembled the palaces. But nothing so hurt the Spahis commander as not to be noticed at all. He recounts with an aching heart how he and his troop passed by an old man sitting on a white mule and smoking his pipe ; he belonged to that happy race who go through life on a cloud, and he hardly deigned to turn his head on one side to see a northern warrior ride by. It was on the 7th of May that M. de Molènes effected his landing, and saw for the first time the English army which at Alma, Inkermann, and Sebastopol, was to be so severely tried. At every step, he ran up against a guardsman, who, with his lofty bearskin defied the Eastern sun ; highlanders, who carried anywhere but in their breeches pockets the poetry of the north ; and riflemen clothed in black—sombre, terrible—representing modern warfare. And the Turk, crouched at his door, looked as if there was nothing the matter. Marshal St. Arnaud went on to Constantinople, and the Spahis were his escort, and happy. On his way there, the author saw more of the Turks, and came to the strange conclusion that Turkey would be an admirable country if left to herself, or handed over to an industrious race of men. He fell in too with some Bashi-Bazouks ; how his followers, true sons of Ismael, looked down on these degenerate descendants of the prophet, who seemed as if they had sprung up from the tomb to revive the traditions of the past. Arrived at Constantinople, he pitched his tent and smoked his pipe in the midst of his faithful cavalry. St. Arnaud presented to the Sultan the division Napoléon, which was on its way to Varna, and the Spahis were present at the "solemnity." The Marshal loved them with a soldier's coquetry, and made them defile at full gallop. At a given signal, this wild troop with red burnous swept rapidly by, flying before the Sultan's throne like a flight of purple-winged birds. They were no common men, these Spahis, but the pick of the Algerian cavalry—men from the province of Oran, who had each his own servant, and set their feet in gilded stirrups.

The Marshal embarked for Varna, and M. de Molènes and his followers were towed up the Bosphorus in La Belle Poule, which has remained painted black ever since she brought home from St. Helena the remains of Napoleon. The first news that greeted their arrival was the repulse of the Russians on the Danube, and this great glory for the Ottoman arms was a cruel deception for the French and St. Arnaud, who had such imperious motives for at once meeting the enemy—the hand of death was already upon him, and it required the most heroic efforts to struggle against the grim monarch. The cholera came in from the Dobruska and smote the camp, and ranks of strong men went down as helplessly as children. How glad they all were to leave this land of human hecatombs and stand out to sea. Fire and plague had been upon them long enough, and their hosts had been wasting away without catching a glimpse of the enemy.

A week with a Turkish skipper, and Eupatoria was sighted, glistening in the sun, looking rich, and of marble. We Englishmen would have liked it better had some mention been made of Lyons and our fleet, but M. de Molènes was in the hands of the Turks, and only recounts how Canrobert first planted the French flag in Russian soil. Soon after the landing the Spahis made a reconnaissance, and brought in a few prisoners. "In spite," says the author, "of all I had heard of Muscovite discipline, my first interview with a Russian sergeant almost stupified me. He was an old soldier, broken in to the discipline of his country. When he had given up his arms I asked him some questions. He listened, with his hand raised in salute, his heels in line, and in an attitude so completely immovable, that it appeared as if he had been suddenly deprived of life. When he replied, his lips stirred, but without communicating the movement to any other part of his body. It was, indeed, one of those Rusian soldiers of whom our ancestors had told us ; soldiers not to be despised, but beings in whom an inflexible discipline had extinguished every trace of human will." The march on the Alma commenced, and the Russians were soon perceived established on a line of heights. "A Russian officer addressed some ironic remarks to a French aide-de-camp, who in carrying an order passed near the enemy's ranks." They thought themselves perfectly secure ; but if there was confidence on the hill above, there was confidence also in the valley below. In joining the broken link in the chain of French victory, St. Arnaud wished to give to the first combat a character of chivalry. All the standards of the army were unfolded, and the bands commenced playing national airs. But this music was soon intermingled with hoarser sounds. Bosquet's division, reinforced by the Turkish contingent, was placed on the right. The divisions Canrobert and Napoléon were to push rapidly forward, and overcome every obstacle.

"At a given signal the division under Bosquet moved forward, but had soon to halt. I have since learnt that this delay was caused by the necessity of awaiting the English army. The soldiers broke up into groups, and took their coffee, whilst I smoked my pipe at my horse's feet. The tambours beat the assembly, and the whole army got under arms, Bosquet's division in the van. Our men soon crossed the river, and began, like so many goats, to climb heights which appeared inaccessible. A moment there was an agony of uncertainty, then a sudden cry of joy issued from every breast : our flag was seen waving on the heights. . . . The French were masters of all the positions assigned to them to carry, but the English army had not yet accomplished its task. It advanced upon our left in deep masses, moving with an imposing slowness. I was so placed as to lose no movement executed by the Guards. I saw Russian balls enter their ranks and carry away whole files. I also followed their artillery, which offered a strong contrast to ours ; the French artillery was that day transformed into light cavalry. It crossed rivers, ravines, obstructed paths, and went everywhere in pursuit of the enemy. The English artillery, with its splendid horses, advanced at a solemn pace. This measured step, this methodical march of our allies in front of strong positions which they boldly face, is not wanting in grandeur, but one cannot but look upon it as a great sacrifice of men and horses, which a little dash would avoid. . . . The English army had now attained its object, and had laid its powerful hand on the enemy. The defeat of the Russians was complete, and in the horizon their long columns were seen quickly retiring."

The wounded, M. de Molènes finds much more deserving of compassion than we did. Probably no Frenchman, like Sir W. Young, was shot down while handing a glass of water to one who had lost the right to be considered as a foe, or to be one. He found them all young and interesting, for the soldier in every country has about him something of the infant's simplicity, candour, and as the poet says, "*la douce bonne foi*."

The picture of St. Arnaud in the arms of victory, and struggling against the most torturing pain, is vividly tketched. During the battle there was no visible sign of suffering. In the first hours of the fight, he turned round so his staff, and lifting his hat, said, "Gentlemen, this battle shall be called the battle of the Alma." And everywhere his presence was required there he rode, his pale features lighted with a joyful smile, which only died away when the sun went down, and the noise and excitement of the battle had passed away, leaving victory behind, with its glory and its tears. His strength failed him at last ; so pushing aside some of the dead bodies which incumbered the plain, they spread a red cloak on the ground, and St. Arnaud laid himself down to rest in the midst of the slain. The old Marshal died at sea, and M. de Molènes does not fail to spread out before his readers all his services and all his virtues. Translated into sober English, the fine phrases employed by the author would look like so much shabby finery. "Should hate, which at times loves to profane illustrious tombs," he cries, "endeavour to attack the Marshal St. Arnaud, this man of war will have to defend him two divine sentinels, to whom is eternally confided the care of his memory—his victory, and his death." In perusing his splendid eulogium, any one unacquainted with the events which happened at the commencement of the second empire would be tempted to exclaim, "What a divine character!" But St. Arnaud living had his faults. A cabinet in the Elysée could tell its tale.

The flank march on Sebastopol has been executed, the first fire opened, and no impression made on the enemy's works. The fight of Balaclava is thus described. "The Russians surprised four redoubts occupied by the Turks in the valley of the Tchernaya in front of the English lines. A portion of their cavalry was directed against the Highlanders who awaited them firmly. Suddenly two regiments of cavalry moved forward to cover the infantry. English and Russians precipitate themselves against one another, and we are afforded that spectacle so rare in war, a real cavalry combat. Sword-blades are seen to cross, pistol-shots are heard, together with those energetic hurrahs which come with such force from British chests. This action does not last long. The Russians are beaten. They retire, leaving on the field men and horses which lovers of large wounds afterwards examined with admiration." M. de Molènes expresses himself most warmly with regard to our cavalry and the charge made by the heavy Dragoons. But the light cavalry charge he views as it was viewed at the time, and as it always will be viewed—"They charge, let

Digitized by Google

what? Against whom? There is nothing before them, around them, but masses of bayonets and redoubts bristling with cannon. They disappear in a cloud of smoke, which is whitened by the frequent discharges of the Russian guns, and to attain what end?"—Ah! there is the mystery. The order given to charge was said not to be an order. Lord Lucan, who was in the valley and who could not see the Russian position owing to a slight swell in the ground, thought that Lord Raglan, who was on the hill, could see all, and Lord Cardigan, who received the order, without using any judgment, charged. Some laid the fault here, others there, but certain it is that the British light cavalry was destroyed in a mad and useless action. We all remember those celebrated words of Napoleon at Waterloo, after the Greys had captured 40 guns from Soult: "Comme ils travaillent ces chevaux gris." M. de Molènes appreciated them too, those Scots Greys, and says that they were the admiration of the whole French army.

The battle of Inkermann was the next stirring event, and in the short description that is given our Guard is honourably mentioned. The author does not insist, as some French writers have done with a sardonic grin, that the British army was saved by the French, without mentioning how, through so many cold grey hours, a handful of Englishmen had kept at bay 40,000 of the enemy's troops.

The winter came with its rain, its snow, its cold, its mud, and its terrible storm, all its weary siege duties, the long night passed in the trenches, the raising fresh batteries to crush the defences of the enemy, the carrying up guns and shot to the front, with now and again a lively little affair to relieve the monotony, such, for example, as the two attacks on the Mamelon.

Here is a sketch of a French Marshal in command. It was in the middle of winter, and the cold was intense; the ground was one sheet of ice, and no horse could stand. "Canrobert went out on foot to visit the bivouac of a regiment recently arrived. Death seemed to reign beneath those tents erected the evening before. With the exception of the sentinels, not a man was about. The new comers had no wood. Where were they to find any upon a desert plateau, which seemed only to produce cannon balls. The general turns into a tent; he calls, he shakes some of the men, who are all huddled together in a kind of stupor. He tells them to light a fire. They look at him with astonishment. We have no wood. Allons, mes enfants, follow me. They accompany the general, who after having made a few steps pauses, and with the end of his cane points out in the middle of the snow some shoots black, thin, brittle, almost imperceptible. There's the wood, says he. The soldiers begin to laugh and think that the general is joking. A pick-axe is sent for and put in requisition, and under the direction of their chief the soldiers soon discover to their astonishment a very little below the surface a large log of wood. Wherever you see those black shoots you will find them, says the general. Here was a regiment awaked, and warmed, and taught one of those practical lessons dear to all those whom God has made to be the pastors of warriors."

The news arrives in camp that the Emperor Nicholas is dead, and M. de Molènes strolls into a Russian monastry that the French have kindly protected. He hears chanting, and listens. The priests are celebrating a mass in honour of Alexander, and praying that God would be pleased to bless his arms with victory.

During one of those truces which were asked and granted to bury the dead, the Russians seemed much surprised on hearing of the English Races at Karani, and of the Zouave Theatre, in whose company their bullets often made sad havoc. They could hardly understand this "being as happy as one can under the circumstances." "As soon as the white flag was raised," says the author, "one saw our parapets garnished with the faces of our soldiers. In front of our parallels behind the Russian advanced works popped up other faces. They were no longer enemies, but neighbours who regarded each other. Each rifleman recognised above the loop hole which corresponded with his, the being with whom for many a long hour he had been exchanging shots. Each side examined the other without anger, and even with goodwill. When the flag told that the truce was at an end, all these heads drew back into shelter, and the fire recommenced. Sometimes a head was rather slow in disappearing, and then a friendly nod from the opposite side would explain the necessity of its getting out of the way."

The summer comes, and the siege drags on; the 18th of June brings no good luck, and soon after that Lord Raglan dies. "Over his coffin was spread the flag of Great Britain. Never did men throw over their chief a more splendid winding-sheet."

M. de Molènes did not stay till the end of the siege. He returned to France with Marshal Canrobert, who had several months before laid down the chief command of the army, and gone back to a general of division. So his work is deprived of the crowing event which ended in the fall of Sebastopol, and made Russia feel the necessity of concluding peace.

Paris, Thursday.

Le Monde, the ghost of the late *Univers*, a journal written with more vinegar than taste, reviews this week a brochure called "England such as She Is." According to M. Xavier de Fontaines, whose garbage is frequently translated more for amusement than instruction, England's sun indeed is set. His revelations are startling enough "to make all England tremble and groan from shore to shore." He shows how the lion, from being a strong and dangerous animal, worn out by age and decline, has lost the use of tooth and claw. *Le Nord* the other day, in a fit of enthusiasm, thanked its Maker that Providence had not created an amphibious race of beings; that Great Britain only ruled the waves, her power ceasing where they break. Had *Le Nord* perused "General Foy's Memoirs," it would have seen this very trite remark—"It would be absurd to suppose that the valour of men who fight so well at sea ceased directly they landed." But *Le Monde* demonstrates that even our naval supremacy is nought but a fiction; that neither on land nor yet on sea are we any longer to be dreaded. The decline of the English Navy is traced to several causes—the aversion to serving in the fleet, emigration, no prospect of promotion, half rations of rum, bad pork and worse beef, and then the cat-o'-nine tails, which we are assured is much more terrible than the Russian knout. Some people have remarked, says the writer, that the falling off in the English Navy was owing to the increased demands made by her mercantile marines. This is another fiction; for the repeal of the navigation laws have had the effect of throwing a great deal of trade which used formerly to be in the possession of British shipowners, into the hands of foreigners. The merchant marine and the Royal Navy both fall into decadence together, and the latter we are told has no less than 20,000 foreign seamen engaged in its ships.* How prophetic the concluding remarks: "There are in the life of peoples, as in the life of individuals, certain solemn moments when no matter to which side they turn the horizon is charged with clouds. Such is the position of England. In the interior a rotten society, weakened by immorality, egotism, and that accursed thirst of gold; between poor and rich an immeasurable gulf; avidity on one side, misery upon the other. Behind the masses, Revolution crying out "En avant!"

The picture of England's exterior is hardly more hopeful. "India, her principal possession, becoming a burden, and only waiting for an auspicious moment to rise again in rebellion. Russia gradually stealing along to the banks of the Indus; America coveting Cuba on one side, Canada on the other; Corfu reclaiming her country; and lastly, not many miles from her shores, France with the most splendid army and navy in the world. "France who remembers—"

This week there has hardly been a paper in France which has not given an extract from the *Mechanics' Magazine*, to the effect that the most bitter complaints had been made to our Government by the artillery officers in China, with regard to the Armstrong gun. None of the papers trouble themselves with observations on the subject, or no doubt they would have remarked it as exceedingly curious that Her Majesty's Government still continues the manufacture of these weapons. Letters from China cite some examples. One, for instance, says that when the Tartar cavalry charged an Armstrong battery, there was not a single gun which could open fire, and men and pieces were only saved by Fane's Horse. Another letter says that some of the guns actually burst, and that the English artillery were obliged to have recourse to Chinese cannon, cast by Père Verbiest, a French missionary, which were quite as good at Canton as at Pekin. Of course these reports, which are not official, may be untrue, but they most likely have some foundation; and one thing is certain, they afford immense gratification here. There is not a newspaper printed in France which is not at this moment chaunting the funeral dirge of Sir William and his gun.

The public here is not at all satisfied with the Chinese peace, protesting that not a stone of Pekin should have been left standing on another, as a lesson for the barbarous manner in which the entrapped prisoners were treated. The Emperor himself is said not to be content with Baron Gros in dealing thus tenderly with an unscrupulous foe. It will be remembered that when Louis XIV. was on the throne, one of his ambassadors was insulted at Rome, and not only was a nuncio forced to go to Versailles and apologise for the outrage, but the Pope was obliged to raise a pyramid in memory of the offence and the reparation. A similar erection in one of the principal squares of Pekin would have a very significant effect, and be worth a million protestations.

A Monsieur Benard, in describing the other day a new propeller, informs scientific gentlemen that the "screw" was invented by a man named Hagron, who lived at Honfleur. After remarking that art having made a plunge forward, nearly always returns to the point from which it started, M. Benard describes the new "propeller Leonard" as a system of vertical oars attached to the keel of a vessel under the counter. The inventor says that in the experiments which he has already made, he finds that his system utilises 52 per cent of the steam power, an amount which has not yet been realised by any other machine, and that a ship fitted with his vertical oars could carry sufficient coal for six months, a statement which will be considered by every practical man as exceedingly doubtful.

The Ville-de-Nantes and the advice-boat Forfait left Cherbourg on Sunday for Brest, but they had hardly got outside when the machinery of the former vessel went wrong, and she was obliged to put on sail. The Ville-de-Nantes was carrying soldiers, who were to be transferred to the Isis, a sailing-frigate of wonderful speed, which has by this time started for the Antilles.

The most important military news of the week is the determination to create a 4th Regiment of Grenadiers of the Guard, which will be an addition to the army of 4000 men. At present the infantry of the Imperial Guard is composed of four regiments of Voltigeurs, three regiments of Grenadiers, one regiment of Zouaves, and one battalion of Chasseurs à Pied, in all about 45,000 men.

On Monday numerous detachments of troops from the different regiments at Paris marched up in front of the Ecole Militaire for punishment parade. At 9 o'clock the drums beat, and immediately afterwards five soldiers, condemned by the Councils of War of the first division of the army, had their sentences read out.

This small number of prisoners in so numerous a garrison testifies to the excellent discipline which reigns in its ranks.

General Fleury, aide-de-camp to the Emperor, has been nominated Director-General of Studs.

LUMPS FORT, NEAR PORTSMOUTH.—We are glad to hear that the opinion expressed lately by this journal, relative to the necessity of resisting the encroachments of the sea, is likely to receive attention at the hands of the Royal Engineers. Arrangements at an early date will be made for driving heavy piles and groins into the slope of the earth facing the beach; hence it follows that the embankment once supported and no longer liable to be frittered away by the action of the waves, all matter held in suspension by the water will be deposited on the spot. The worst part of it is, that this groining operation is very expensive, and requires continual repairs. The sister fort of Eastney, a little further to the eastward, has been picketed out, and ground will be broken early in the spring for its erection.

* This is indeed a "mensonge" of the finest order of Munchausen.

THE NAVY.

ADMIRALTY, DECEMBER 26.

APPOINTMENTS.

Lieutenants—William Codrington and Claude E. Buckle to the Narcissus.

Mates—W. F. Boughey to the Aboukir; Henry T. Chantrey, confirmed in the Donegal.

Assistant-Surgeons—John Cruickshank to the Philomel; Robert E. Fisher to the Aboukir.

Second Masters—Edward Hinvest to the Edgar; Guido Harris to the Narcissus.

Masters' Assistants—W. L. Harrison and William P. Haynes to the Narcissus; Reginald V. Carlyon to the Philomel; Edward S. Chapp to the Immortalité; Richard G. Roe to the Narcissus for the Penguin; William Cousens and William J. Symons to the Impregnable for the Nautilus; Ralph A. Ramsay and George D. Moody to the Nile; Richard H. Hunter to the Emerald; and George H. Steale to the Sanspareil.

Chief Engineers—William Gill to the Narcissus; Charles Tucker to the Indus, for service in the Forte.

First-Class Assistant-Engineers—John Marwood to the Philomel; Thomas A. Clarke to the Indus, for charge of th Procris; William H. Steil, promoted, and appointed to th Narcissus.

Second-Class Assistant-Engineers—George Tidcombe to the Narcissus, for service in the Penguin; William H. Gill to the Indus, to take charge of the Sheldrake; William H. Croxall (acting) to the Philomel.

Third-Class Assistant-Engineers—William H. Nicholson to the Narcissus, for service in the Penguin; William T. Barry (acting), Joseph Kay, William P. Guyer, and William Giles to the Narcissus; Joseph C. Gray to the Donegal; Isaac Hall (acting) to the Cumberland, as supernumerary; J. Clinkskill (acting) to the Emerald; Samuel George Hill (acting) to the Philomel; James Torkington (acting) to the Hero; Ebenezer Bennett (acting) to the Bulldog.

ADMIRALTY, DECEMBER 27.

APPOINTMENTS.

Lieutenant—J. G. M'Hardy to the Narcissus, additional, for service in the Penguin, tender.

Paymasters—W. L. Inch to the Indus; R. F. E. Morrison to the Trincomalee.

Mate—G. R. Hope to the Ariadne.

Assistant-Surgeons—Charles Morton to the Indus; John Bishop to the Narcissus, for the Penguin; Anthony H. Woodifield, M.D., and John S. Lewis to the Narcissus.

Midshipmen—R. F. Warden, D. M. Smith, and H. St. C. Hammill to the Narcissus.

Naval Cadet—J. Hodgson to the Narcissus.

Master's Assistant—A. W. Miller to the Donegal.

Second-Class Assistant-Engineers—J. Lester to the Formidable, for service in the Wildfire; Joseph Rothery to the Asia, as supernumerary.

Third-Class Assistant-Engineers—J. K. Weatherley (acting) to the Indus, for the Thais; Thomas J. Warburton (acting) to the Algiers; Allan Bullions (acting) to the Bulldog.

COASTGUARD OFFICE, DECEMBER 27.

APPOINTMENTS.

Inspecting-Commander—Commander Mark R. Pechell to Sunderland Division, vice Heard to the Trincomalee.

Chief Officers—Messrs. Richard T. Saunders, master, to command Brighton; Elijah J. Kemp, master, Axmouth Station.

REMOVAL.

Chief Officer—Mr. Ambrose J. A. Berton, master, from Hope Cove to Lyme Cobb.

Aboukir, 90, screw liner, Captain Douglas Curry, has gone up Hamoaze from Plymouth Sound to make good defects.

Alarm, 26, sailing frigate, at Devonport, has been ordered to be fitted for a coal depot.

Amethyst, 26, sailing frigate, Captain Sydney Grenfell, was paid off at Chatham last Saturday. During the morning the ship's company were called aft by Captain Grenfell, who briefly addressed them, and expressed the satisfaction he had experienced in commanding for so long a period such a generally well-conducted body of men. In taking leave of them he wished them every happiness and prosperity, and trusted they would enjoy themselves during the present festive season. He then presented a silver medal, which, together with the gratuity, had been awarded by the Lords of the Admiralty to George Rimmington, boatswain's mate, for long service and good conduct. Out of the 230 blue-jackets who composed the crew of the Amethyst, about one-half are continuous service men, and these have been granted eight weeks' run ashore, after which they will have to report themselves on board one of the guard ships.

Amphion 36, screw steam-frigate, Captain T. Cochran, left Malta on the 15th inst. for Sicily.

Assurance, 4, screw steam-sloop, Commander Aynsley, was at Malta on the 22nd inst.

Barracouta, 6, paddlewheel steam-sloop, Commander William Wood, has been undocked at Portsmouth.

Coquette, 4, screw steam-sloop, has left the slip in Portsmouth dockyard, and been towed round to the old basin, where she lies alongside the Philomel, having received very extensive repairs, amounting, it is said, to nearly two-thirds of her original frame.

Eclipse, 4, screw steam-sloop, forwarded to Woolwich last week from the premises of Messrs. Scott Russell & Co., having been surveyed, has been removed into the basin to be completed for service.

Emerald, 51, screw steam-frigate, Captain Arthur Cumming, has gone up Hamoaze from Plymouth Sound to make good defects.

Foudroyant, 78, a sailing line-of-battle ship, at Devonport, has been ordered to be appropriated for the reception of Armstrong guns for the instruction of the crews of the ships belonging to the Plymouth division of the Channel fleet.

Hero, 91, screw liner, Captain George H. Seymour, C.B., at Devonport. The defects of this ship must have been of an extensive character when she returned from her American

Digitized by Google

trip, for it is stated that she will not be clear of the dockyard people before the 1st of February next.

Himalaya, 6, iron screw steam transport-ship, Captain John Seccombe, has embarked at Portsmouth supernumeraries for the Mediterranean squadron, and a detachment of the 23rd Regiment from Walmer, also for conveyance to the Mediterranean. She has also on board the 27th company of Royal Engineers, under the command of Captain A. W. Durnford, which will be landed at Gibraltar, and there relieve the 2nd company, which returns to England. The Himalaya left Spithead yesterday, and as she had a rattling breeze from the eastward, she bids fair to make a very rapid run to the "Rock."

Hornet, 17, screw steam-sloop, Commander W. B. Elphinstone, had, according to the last advices from the Cape of Good Hope, which reach down to the 21st of November, arrived in Simon's Bay on her way to the East Indies. The Hornet sailed from England on the 9th of September.

Illustrious, 72, guard-ship of sailing ordinary, Portsmouth Harbour. The eight 40-pounder Armstrong guns placed lately on board of this ship are now in full operation; detachments of blue jackets from the ships of the Channel fleet are daily instructed in the drill of the new rifled ordnance; and in a few weeks more the men of the Edgar, Algiers, Trafalgar, and Diadem, will have made considerable progress in the matter.

Lynx, 4, screw steam gun-vessel, Lieutenant-Commander Henry Berkeley. The crew were paid off at Devonport last Saturday. As the conduct of Lieutenant Berkeley was made the subject of comment in this journal, it is only fair to him to state that his certificates prove he has done very good service during his commission, and that he is a very energetic and zealous officer.

Megæra, 6, iron screw steam troop-ship, Commander Samuel H. Henderson, has completed her coaling at Portsmouth, and is now ready for further service.

Melpomene, 51, screw frigate, Captain Ewart, was at Malta on the 22nd inst.

Meteor, 14, iron floating-battery. The whole of the iron plates have been stripped off by the workmen after several weeks of hard and severe labour, and they are now employed in knocking away the waterways and beams which support the upper deck, consequently this deck with its enormous weight, is now entirely sustained by upright posts on the main deck. The upper deck and beams are apparently quite rotten; but the ribs of the vessel are not found to be so bad as they were expected to be.

Orion, 91, screw liner, Captain Frere, left Malta on the 20th inst., for Corfu.

Pembroke, 60, Captain Charlewood, lying in Harwich harbour, has been the scene of considerable hilarity and merry-making during the present Christmas season. With his wonted kindness, the gallant commander issued nearly 500 tickets of invitation to the principal inhabitants of Harwich, to witness a theatrical entertainment on board the Pembroke, the principal characters being sustained by members of the crew. The pieces performed were "Fortune's Frolic, or the Ploughman turned Lord," "Boots at the Swan," and "The Waterman;" and for the occasion a commodious stage was extemporised upon the lower deck, with suitable scenery, &c. The entertainment closed about 11 o'clock, with cheers from the officers and crew of the Pembroke. It is understood that Captain Patey, R.N., will succeed to the command of this vessel, vice Charlewood, early in the ensuing year, and that an entire change will take place in the staff of subordinate officers.

Philomel, 5, screw steam gun-vessel, now lying in the new basin of Portsmouth dockyard, was commissioned on Tuesday last, by Commander Wildman, for service on the West Coast of Africa. This is one of the new and superior class of gun-vessels built by White, of Cowes, with engines of 80-horse-power, on Napier's new principle, called by him "plunger," but better known to naval engineers as "trunk air-pump" engines. They are something of a medium between the Penn and Maudslay's designs, and gave excellent results; when tried at the measured mile, they then averaged 10·8 knots per hour, but when in proper trim it is expected she can easily accomplish 11 knots. The Philomel also promises to be a fast sailer under canvas only. As her rigging is not yet set up, and there is still a great deal to be done, this being her maiden commission, she will not be ready for her destination much before the beginning of February.

Retribution, 28, paddle-wheel steam-frigate, Captain Harry E. Edgell, C.B., was paid off on Saturday last at Portsmouth, in a manner highly creditable both to officers and men. Good conduct medals and gratuities of 15*l.* each were given to three of her crew—James Grant, boatswain's mate, 24 years' service; Richard Lee, captain of the forecastle, 24 years' service; and Robert Gould, quartermaster, 21 years' service. The Retribution's crew were a body of men such as are seldom seen together now in one ship. Many of her A.B.'s left England as boys. The appearance of the men at the pay-table sustained the character they had hitherto borne in the ship, for, although an extra degree of liberty has been allowed them during the process of clearing out and returning stores, not a single man appeared to be the worse for liquor; all were clean, smart, and respectable. Some of the men received large sums—as much as 100*l.* and 120*l.* each, and 1600*l.* was remitted by the men from the pay-table to their homes. The services upon which the Retribution has been engaged since she was first commissioned, in August, 1856, have been of a very varied nature. She has circumnavigated the globe, having gone to China by the way of Cape Horn, and returned home by the East Indies and the Cape of Good Hope.

Royal Albert, 121, screw three-decker, flag-ship of Rear-Admiral R. F. Stopford, Captain Henry J. Lacon, is at Devonport. It is reported that the mainmast of this ship is decayed. Her crew have been paid down and granted 21 days leave of absence.

Scylla, 21, screw corvette, Captain Rowley Lambert, left Malta on the 15th inst. for the Piræus and the Levant.

Spiteful, 6, paddlewheel steamer, Commander W. C. F. Wilson, left Sheerness on Saturday afternoon with those men belonging to the western ports who were paid off from the Amethyst. She arrived at Portsmouth on Sunday, and after landing a portion of her supernumeraries, proceeded on to Plymouth with the remainder.

St. George, 90, screw steam-liner, Captain the Hon. Francis Egerton, is at Devonport. The repairs of this ship have been completed, and it is expected that Prince Alfred will join her immediately after the Christmas holidays. The Lords of the Admiralty have given directions that suitable accomodation be provided on board for the Prince's governor. This gentleman will be a guest at Captain Egerton's table.

St. Jean d'Acre, 101, screw steam-ship, Captain the Hon. E. J. B. Elliot, C.B., sailed at daylight, on the 20th, from the Rock for Lisbon, after refitting, coaling, watering, and provisioning at Gibraltar, to which place she had a passage of 35 days from Malta, in constant and very heavy gales of wind. Her crew do not improve in health; but it is anticipated that the old reputation of Lisbon for the cure of pulmonary complaints will effect a great and beneficial change. Her new Captain is most popular on board, and enjoys the character among the officers and men of being a first-rate seaman. In one of the late gales, in a tremendous lurch of the ship, one of the forecastle guns broke away from the lashings and went overboard; it just reached the water, hanging muzzle downwards in the breechings. With very great exertion the gun was saved, instead of being cut away and dropped at once, a fact highly creditable to the cool courage and discipline of the crew, it being anything but pleasant or safe to have a long 32-pounder dangling to the side of a ship in a gale of wind. She will probably remain for some time at Lisbon.

Victor Emmanuel, 91, screw liner, Captain Clifford, C.B., was at Malta on the 21st inst., and likely to remain there some time, as the repairs which she requires are very extensive.

Warrior, 36, iron screw steam-ship, will be launched from the Thames Yard Ship-building Company's premises this day at half-past 2 o'clock. A staunch admirer of this ship, writing to us on the subject of the merits of iron-clad vessels, says, "I will take a heavy bet that the Warrior will prove a faster vessel than La Gloire by two knots, and that she will be in all respects an easier sea-boat." *Nous verrons.* The Warrior will doubtless do all possible credit to her builders. There never was a doubt upon this point.

Our Cousin Jonathan and his Navy.—The American Secretary of War, in his last annual report, dated the 3rd inst., speaks in the subjoined energetic manner on the necessity of maintaining a navy suitable to the position which the United States holds in the political world:—"The constant appeal of American citizens, coming to us from all parts of the world, asking for security and protection beyond what the government, with its present means, can afford them, speaks a language to which we are not at liberty to turn a deaf ear. To be able at any time, at short notice, to throw a powerful naval force upon any given point where our interests are threatened, or the lives of American citizens are in jeopardy, is not only a constitutional duty, but one of the safest, most beneficent, and salutary powers that can be entrusted to official hands under a republican form of government; and I cannot permit the present occasion to pass without most earnestly recommending the policy of a gradual, substantial, and permanent increase of the navy, accompanied by the universal introduction into it of the motive power of steam. Such policy is essential to the protection of our coasts and commerce, and of American citizens and their property on the ocean and in distant countries, to the preservation of peace, the efficiency of negotiation, the general advancement of our commercial interests, the maintenance of our appropriate position among nations, and the prompt vindication of our rights and of the honour of the country, and should be subject to none of the ordinary vacillations arising from the varied success of political parties."

A Galley Yarn.—A seaman attached to the Naval Brigade in New Zealand, writing home to a friend, says, in reference to the women whom they were called upon to protect, "They are always feasting us with currant cake, cheese, tea, porter, rum, and all other kinds of garbage." If the writer, who we are assured is a man before the mast, has such a poor opinion of the dainties thus showered upon him from the hands of the fair settlers, it goes far to prove that the provisions provided on board Her Majesty's ships must be of a higher character than those supplied by our merchant princes to the seamen in their employ, for we cannot believe that any one of these would ever designate the before-mentioned good things as "garbage." Jack is certainly getting fastidious — Somerset House must look to it—we are becoming too indulgent. We shall have a repetition of the old story of our Tars refusing to take turtle soup unless it be accompanied by an allowance of punch or Madeira. We are rather inclined to think that our contemporary who publishes the letter has been imposed upon, for his correspondent adds that "I have not had my clothes off since last April, whilst I was in hospital." Now, seeing that the date of the letter is the 16th of September, and giving the writer four weeks to be under the doctor's hands, he must at any one moment have been ready for a good wash. This is a "galley" yarn and reflects no credit upon the "spinner," nor upon the person in England who has sent it to the "papers."

Fatal Accident to a Naval Officer.—At an early hour on Friday morning of last week, Mr. Taylor, second master of the paddlewheel steam-sloop Geyser, 6, Commander George M. Jackson, in Hamoaze, from some cause unknown, fell into the water from that ship, and was carried away by the tide, which was running strongly at the time. The deceased was 24 years of age, a native of Chatham, and much beloved by his shipmates, officers, and men. [There is no officer of the name of Taylor holding the rank of second master in the Navy List for the current quarter. There must therefore be some mistake as to the position said to have been held by Mr. Taylor on board the Geyser, or he must have been promoted since the issue of the October number.]

Lifeboat Services.—Wexford, Dec. 22.—The Danish brigantine Freia, from Konigsberg to Dublin, grounded on the Dogger Bank Sand, off Wexford, on Thursday night. The Rosslan lifeboat, belonging to the National Lifeboat Institution, with her hardy crew, after some skilful management and incurring some risk of life, succeeded in taking off the whole of the crew, consisting of six persons. The lifeboat was reported to have behaved admirably, and to have given her crew every satisfaction. Dungeness, Dec. 22:—Last night the schooner Nathaniel, from Hamburg to Dublin, and the barque Kingston, of Hull, from London to Algoa Bay, got on shore off Dungeness. The lifeboat of the National Lifeboat Institution proceeded off to the assistance of both vessels, but neither of them would accept of its help, although the barque burned signals of distress. It was expected that one or both vessels, which are now in charge of Deal boatmen, will become total wrecks. Ardmore, County Waterford, Dec. 26th.—About 11 o'clock this morning, the brigantine Diana, from Bordeaux to Belfast, went ashore in Ardmore bay. The lifeboat of the National Lifeboat Institution was immediately manned by volunteers, and after much difficulty and danger in reaching the wreck, the crew of seven men were saved.

The Shipwrecked Mariners' Society.—A modest, but at the same time earnest appeal has been made by the Shipwrecked Mariners' Society for assistance. The society has sent in ten months nearly five thousand cast-away sailors to their homes. It has also during the same period of time supplied temporary assistance to upwards of three thousand widows and orphans. It is now in need of help, to enable it to carry on its good work. We have had very severe weather of late on the coast, and we fear the remaining funds will be very much taxed in order to meet the claims which will in all probability be brought forward. We are a seafaring nation, and this society therefore possesses a peculiar interest to us. It would be a sad reflection upon us if it should be crippled for want of means, when it is considered that it has been established with a view to render immediate assistance in the hour of adversity to those who have been and are the principal producers of our wealth.

Murderous Assault on a Seaman.—A seaman named Patrick O'Brien, belonging to Her Majesty's steam-ship Cumberland, is now an inmate of the Royal Marine Hospital, Woolwich, having, it is feared, received fatal injuries from a brutal and cowardly attack made upon him by four privates of the Woolwich division of Royal Marine Light Infantry. It appears that on the afternoon of Christmas Day O'Brien, who had leave of absence from his ship, now at Sheerness, fell in with the marines at Woolwich, and after treating them at several public-houses, proceeded to an eating-house, where the party had supper, for which O'Brien paid 2*s.* 6*d.* each. After leaving this house, the marines induced O'Brien to accompany them to a dark alley leading from High Street, where they knocked him down and kicked him so severely that the front portion of his skull was beaten completely in. The sufferer was found by the police lying apparently dead in a pool of blood, having been robbed of his money and watch. A marine named John Jones was yesterday apprehended at the barracks on a charge of being concerned in the outrage, and the police are actively in pursuit of the other offenders.

By accounts received last evening from the Cape of Good Hope, we find that the naval Commander-in-Chief, Rear-Admiral the Hon. Sir Henry Keppel, K.C.B., was still at the Mauritius. The Forte, as previously stated by us, had gone down with dispatches to Sir Henry, and would announce to him his removal to the south-east coast of America. The Forte will continue to be Sir Henry's flagship on his new station.

Court-Martial on a Marine.—John Fleming, private, Royal Marines, belonging to the St. George, at Plymouth, was tried last week by court-martial, on board the Impregnable, in Hamoaze, for striking Charles Bacon, lance-corporal, his superior officer, and sentenced to be reduced to the second class, and to receive 36 lashes.

The Navy Gazette.

ADMIRALTY, December 26.

Notice is given, to the Officers, Seamen, and Marines, and to all persons interested therein, that the distribution of the proceeds and tonnage bounty of the slave brig, name unknown, captured on the 16th July, 1859, by Her Majesty's ship Pluto, and cutter of Her Majesty's ship Vesuvius, will commence on Wednesday, the 2nd January, 1861.

The following are the shares due to an individual in the several classes:—

	£	s.	d.
Flag share	39	7	6
Lieutenant Commanding	93	10	5
Fourth class	28	15	2
Fifth class	15	14	0
Sixth class	14	2	7
Seventh class	9	8	5
Eighth class	4	14	2
Ninth class	3	2	10

PAYMASTERS, R.N.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Your correspondent, who writes on the subject of the pay of the Navy and Civil Service, in your Gazette of last week, remarks, that "Paymaster, R.N.," is mistaken in supposing the increase to salaries in the civil departments is "simply based on length of service."

By reference to "Paymaster's" letter, I think it will appear plain that no such assertion was made; but, when stating "that pay by servitude has been found to work well in the case of surgeons, masters, and engineers, in the Navy, the civil department under the Admiralty, as well as with certain classes in the Army," he considered it unnecessary to specify to what extent the rule applied to the civil departments, in which it appears the clerks are paid by length of service up to a certain limit, before promotion by merit to a higher grade—a very satisfactory system I should imagine, and which might with advantage be applied to the paymasters.

It is hardly fair to draw a parallel between the pay, &c., of naval paymasters and the gentlemen in the civil departments under the Admiralty, for the duties and responsibilities in the one service are of a very different nature to those in the other. When, however, the civilian on shore has the good fortune to attain to the well-paid position of an accountant, agent victualler, or storekeeper, and gives a heavy bond for the discharge of his responsible duties, he then holds a somewhat similar office to that of the civilian afloat, though having far greater advantages than the latter; who likewise gives a heavy bond for the correct rendering of accounts connected with the large sums of money passing through his hands annually in the shape of payments, at times, large, but generally in such small sums as to render him very liable to losses, besides being responsible for the correct administration of the perishable stores in his charge, the value of which forms no small item in the naval estimates. Added to the above duties of accountant and storekeeper afloat, the paymaster has to super-

Digitized by Google

intend the whole clerical duties of a ship, involving an amount of labour that few of the uninitiated can well conceive, and which has to be performed in a miserable den, ill-ventilated, and but too often by candle-light, and this in a tropical climate, under circumstances of a very trying nature.

Promotion is seldom or ever attained under thirty years of age, and after some fifteen or sixteen years servitude in a subordinate and ill-paid position. Now, it is absurd to suppose that any officer would attain to the maximum salary after twelve years; and your correspondent should know that twelve years actual sea-service does in most cases imply a standing of at least twenty years on the paymasters' list, so that fifty would be about the age at which an officer could hope to attain to the first-class and the maximum pay.

I perfectly agree with the opinion advanced by your correspondent as to the system on which the naval as well as military services should be paid, and the Admiralty would do well to take the Order in Council of the 30th January, 1816, as a guide in framing the regulations for that class whose case is now under consideration, adding, as they would, to their efficiency, and insuring that those in future selected for the heavy and responsible duties of the higher grades, should possess those qualifications which by present regulations are in no wise deemed essential.

The paymasters seek only to attain a fair and just system of remuneration for those services which have of late years been more than doubled, and they deem themselves fully deserving of a like measure of consideration as of late extended to the Commissariat and other branches in the Army to whose duties their own assimilate; and I feel assured that a comparison of the duties, pay, and position of these officers with those of the naval paymaster, would prove the latter to have few of those advantages so justly conceded in the sister service, where the prejudice so long existing against civilians seems to have given way to more enlightened views as to the worth of servants of the crown, who discharge duties of a most important nature.—I am, &c.,

PAYMASTER, R.N.

A NAVAL OFFICERS' CLUB.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—There appeared a few days ago in a professional contemporary of yours a proposal to form clubs for seamen at the different sea-ports in which there are naval dockyards. I should like much to extend the proposal, through the medium of your columns (should you be good enough to allow me the space), and advocate the formation of a club at Portsmouth, at least for the officers of the Royal Navy.

Difficult to be believed as it may appear to people unacquainted with the circumstances of the case, there is not a single club or fitting place of resort of any kind for naval officers in any of the places which they most frequent, with the sole exception of a club formed by the engineers of the Navy some years ago, which I understand in comfort and good management still exists a monument to the sagacity of its founders.

To few men are the comforts and conveniences of a club more necessary than to naval officers, as but a very small proportion of them have their homes in the ports which they are continually obliged to visit, and their only domicile is consequently their ship; once on shore from her they are cut off from their temporary home by a watery gulf, which cannot always be passed at a moment's notice, and consequently have no resource, when tired out or in want of refreshment, but to go to hotels, where prices are ruinous to their slender purses, or to frequent places of little better style than mere public-houses. The tone of conversation and manners of the habitués of the latter class of houses is, as may be expected, not of the highest kind, and many a man who has been timid and shy enough in his early visits, gets gradually drawn on till he becomes a constant sharer in the not very recondite conversation of the smoking-room. Besides this, there are other reasons why these places are unfitted for the convenience and unworthy of the patronage of those who support them; they are neither equal in size, comfort, nor style to what a naval officer has a right to expect; indeed, it has always appeared to me a great disgrace to our Service, that its officers have been content with mere public-house accommodation, when a little effort on their part might have given them all the luxuries and comforts of a club.

I myself can see no difficulties standing in the way of the formation of a club for naval officers, of which all ranks, above a certain age, might be members, in a style worthy of the Service, at a moderate expense of, say, five pounds entrance fee, and one or two guineas subscription.

Should you find space for this letter, already longer than I intended, you will greatly oblige,

A LIEUTENANT, R. N.

NAVAL CADETS AND THE BRITANNIA.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Captain Liardet, in his letter published in your GAZETTE some time back, states it is a great happiness to him that his son was placed within reach of the great advantages offered in the Britannia. I congratulate the gallant captain that his son has turned out so well, and could with pleasure introduce him to many equally as well passed out: my letter, however, did not refer to individuals, but to naval cadets in general, and I still maintain that the training-ship is in a decline, in fact, a rapid consumption, and unless change of air takes place death will be the result. The captain informs us that he knows smoking is strictly forbidden on board the Britannia! It would be odd, indeed, if allowed; let the captain, however, ask his son some day after dinner when and where the naval cadets smoked during the nine months he lived on board. I can tell him, if his son will not; no doubt, however, he will get the information he requires, and also hear how notes are received from affectionate aunts living in the vicinity of the port, begging their dear nephews to come and stop from Saturday to Monday, these letters being written by some one in a lady's hand. Other little eccentricities peculiar to lads of a certain age would amuse dear paterfamilias if he gets his boy home for the Christmas. Take a boy from the Britannia, and one from a public school, send them to sea for a year: at the end of the year the latter will walk round the Britannia like a cooper round a cask. It is no fault of any one in the Britannia, and I never wished to imply that it was: the fault rests with those who send so many to one ship, under one captain, and in such a port. More brooms and competitive training-ships! At sea frequently, in harbour occasionally.—I am, &c.,

THE ANONYMOUS PARTY.

P.S. Common sense will never send them cruising in the Channel or Bay of Biscay, but will point out the parts of the world most desirable for them to visit.

RELATIVE PAY IN THE BRITISH AND AMERICAN SERVICES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—At a time when non-plated ships and Armstrong guns render manifest the necessity for first-rate mechanical ability in our Navy, you may perhaps consider the subjoined contrast of the scales of rank and pay in the British and American Services worth publication, and by so doing you will confer a favour on the NEGLECTED BRITISH ENGINEER.

BRITISH NAVY.				AMERICAN NAVY.			
	Rank.	Pay per An. Full.	Pay per An. Half.	Rank.	Pay per An. Full.	Pay per An. Waiting orders.
		£ s.	£ s.		£ s.	£ s.
Third class Assistant Engineer.	With but after 2d Master	109 10	...	Midshipman ..	156 5	125 0
Second class Assistant Engineer.	Do.	136 17	...	Next after Master	208 6	156 5
First class Assistant Engineer.	Do.	164 5	...	Next after Lieut.	260 8	208 6
Chief Engineer ...	With but after Master	191 12	91 5	Lieutenant ...	375 0	250 0
Do. after 5 years ...	Do.	209 17	109 10	Do.	458 6	270 6
Do. after 10 years ...	Do.	237 5	146 0	Commander...	503 6	291 13
Do. after 20 years ...	Do.	328 10	237 5	Do.	541 13	312 10

The pay of the Engineers of the American Navy has lately been increased. The above is the present pay in each Service.

ORGANISATION OF THE NAVY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—A pamphlet, written by Rear-Admiral Sir Frederick Grey, has most ably laid before the public a plan for the organisation of Her Majesty's Navy. It now remains with the country to decide whether it will submit to England being the only maritime nation without a permanent navy.

I shall not dwell upon the present system of paying off ships. The reckless waste of *matériel*, and the entire want of consideration for the officers and men, are too well known. But perhaps it is not so well known that unless discipline be strengthened, I may say restored, by those ties between the officer and seaman which time can alone perfectly establish, the British Navy will stand no fair chance with its foreign contemporaries.

The details minutely gone into by the Admiral may or may not be modified, but the subject is dealt with by a master hand, and the project carries with it the best wishes of his profession.—I am, &c.,

A POST-CAPTAIN.

MILITIA ORDERLY-ROOM CLERKS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR.—The Orderly-Room Clerks of Militia having been deprived of their rate of pay as "Quarter-Master-Sergeant," by the Militia Act of last session, I trust that the Government will now, as an equivalent, assimilate their position to that of their brethren of the Line, by extending to them the benefits conferred by Royal Warrant, and par. 121, page 142, of the Queen's Regulations, viz:—6*d.* per diem after 3 years *bonâ fide* service as Orderly-Room Clerk. This, I conceive to be a just and reasonable expectation, and doubtless will, if granted, have the effect of inducing efficient clerks to remain on the Militia Staff, by affording them a prospect of their services being duly appreciated at a future period.—I am, &c.,

MULTUM IN PARVO.

THE MILITIA.

2nd Stafford (King's Own) Light Infantry Militia. A board of officers, composed of Lieutenant-Colonel Moore, 11th Regiment, President, Lieutenant-Colonel Payne, Royal Marines, and Major Bayley, 8th Regiment, members, assembled at the Colewort Barracks, Portsmouth, on the 27th inst., for the examination of Lieutenant Rowland John Lenthall, in accordance with the Horse Guards Memorandum dated 13th November, 1860.

The Militia Gazette.

WAR OFFICE, PALL MALL, DECEMBER 25.

Light Infantry Battalion of the Royal Sussex Militia—Robert Curzon, Gent., to be Ensign, vice Fuller, resigned; Edward Corbett Strutt, Gent., to be Ensign, vice Floyd, resigned; Robert William Hepburn, Gent., to be Ensign, vice Kerrison, resigned; George Ernest Ewes Blunt, Gent., to be Ensign, vice Peyton, resigned.

Northumberland and Newcastle Regiment of Volunteer Yeomanry Cavalry—Lieutenant the Hon. Henry George Liddell to be Captain, vice John Cookson, resigned; Cornet Henry Parker to be Lieutenant, vice Liddell, promoted; Cornet Cadogan Hodgson Cadogan to be Lieutenant, vice William John Lawson, deceased; George Henry Shum, Gent., to be Cornet, vice Henry Parker, promoted; Robert Leslie Parker, Gent., to be Cornet, vice Cadogan, promoted; Charles John Reed, Gent., to be Cornet, vice William Parker, deceased; William Strother, Gent., to be Cornet, vice Henry H. Forster, resigned.

1st Regiment of the Royal Surrey Militia—Captain Edward Hugh Leycester Penrhyn to be Major, vice Evelyn, promoted.

WAR OFFICE, PALL MALL, DECEMBER 28.

Light Infantry Battalion of the Royal Sussex Militia—Captain Richard Bingham Newland to be Second Major.

VOLUNTEERS.

METROPOLITAN.

15TH (LONDON SCOTTISH) MIDDLESEX RIFLES.—Last week the "Marching Chorus" of the London Scottish Volunteers, which now numbers nearly 90 members, gave a Christmas serenade to Lord and Lady Elcho at their residence in St. James's-place. A large crowd soon gathered in the Park, and the windows and balconies of the neighbouring houses were full of listeners. Lady Elcho addressed the chorus in a brief and characteristic speech, and with much feeling expressed her pleasure at the compliment. Three hearty cheers greeted this address, and the singers having been regaled with a sumptuous repast by Lord Elcho, went back to Charing-cross singing in chorus.

36TH (PADDINGTON) MIDDLESEX RIFLES.—This corps was inspected last week by Colonel M'Murdo. There were present on parade Major-General Downing, Officiating-Adjutant John Clarke, Lieutenant Penny, Ensign Allen, Ensign Child, Ensign Smith, and four companies of effectives. The corps was put through several battalion movements by Major-General Downing. Officiating-Adjutant John Clarke put the regiment through the manual and platoon exercises. After the drill Colonel M'Murdo came forward and congratulated the corps on their smart and soldierlike appearance and the steadiness of their drill, which reflected the highest credit on Major-General Downing, their drill instructors, and the corps at large.

37TH (BLOOMSBURY) MIDDLESEX RIFLES.—The prizes recently competed for by the members of this corps were distributed to the successful competitors on Saturday evening last, at the new Infant Schoolroom, Endell-street, Bloomsbury, which was tastefully decorated with flags and flowers. Major Jeakes, the major-commandant, presided, and on the platform were several ladies. A resolution having been passed, reducing the annual subscription from 1*l.* 1*s.* to 10*s.* 6*d.*, and another nominating Messrs. Gardner, Gregory, Butt, and Robert for the vacant commissions, to be submitted to the lord-lieutenant, the chairman proceeded to distribute the prizes as follows:—The first prize, the gold challenge medal and a handsomely bound Bible, the gift of Mrs. Corrie, the wife of Captain Corrie, for the best shot at each range of 150, 250, 300, 400, and 500 yards, five rounds each, to Sergeant Pearce. Sergeants Pearce and Hays scored 18 points each for this prize, and in shooting off the ties became equal again until the tenth round, when Sergeant Pearce won, Sergeant Hays receiving a silver medal as second best. The silver medal of the corps, for the best shot at 300, 400, and 500 yards, five rounds each, to Private R. Cansick, who made 13 points. An Enfield rifle, the gift of Major Jeakes, for the best shot at 150, 250, and 300 yards, five rounds each, to Private D. Dolamore, who made 12 points. A silver medal, the gift of Mr. Roberts, on the same conditions as the last, to Private G. Berridge, who made 10 points. A short Enfield rifle, the gift of Mr. Stedall, was won by Major Jeakes, making 10 points, but relinquished in favour of the next best—Corporal A. Constable and Private W. Elsmore, who each made 9 points, but in shooting off the tie Private Elsmore won, a revolver, given by Major Jeakes, being awarded to Corporal Constable. The last prize—a purse of 5*l.*, for non-commissioned officers, at 200, 300, and 400 yards, three rounds each, was won by Sergeant-Major Hooper, who made 10 points. A handsome flag, worked by the ladies of Captain Corrie's family, was presented to the corps. After which a vote of thanks was passed to the chairman, and three cheers having been given for him, the proceedings terminated.

1ST MIDDLESEX ENGINEERS. — On Christmas-eve, a very interesting ceremony took place at the ball-room, Cremorne-gardens (kindly lent by Mr. T. B. Simpson), namely, the presentation of a dress sword and belts, the gift of the non-commission officers and sappers of the above regiment, to Sergeant-Major Joseph Welham Garwood, as a testimonial of their esteem, and for the valuable assistance he has rendered to the corps. The amount subscribed, and paid into the hands of the treasurer of the funds, exceeds the cost of the above articles, and the surplus will go towards the provision of the sergeant-major's uniform.

4TH TOWER HAMLETS RIFLES.—On Wednesday morning the members paraded at their head-quarters, Flemming Street, Shoreditch, for the purpose of marching out; but, in consequence, probably, of the Christmas holidays, there were not more than between 50 and 60 present, including Captains Bale (the Captain-Commandant), Sparrow, and Sarson, and other officers. Headed by their band of fifes and drums, they marched through the principal public roads to Wanstead Flats, where they were exercised at skirmishing drill, firing blank cartridge, and, after executing other military manœuvres, returned to head-quarters, being joined on the march by a detachment of the East London Brigade (6th Tower Hamlets).

7TH (SOUTHWARK) SURREY RIFLES.—On Saturday last the members of this corps assembled at head-quarters, Newington Sessions House, in order to bury with military honours Private John Templeton, deceased, late a member of the corps. The procession proceeded to the cemetery at Norwood, the band playing the "Dead March" in *Saul*, the pall being borne by the members of the corps. The Burial Service having been performed in an impressive manner by the chaplain, three volleys were fired over the grave, and the corps marched back to head-quarters. The deceased was much respected by his comrades.

19TH SURREY RIFLES. —The officers of this corps entertained the men of the regiment to a dinner in the Crystal Palace, on Wednesday. The entertainment was prepared by Mr. Strange in a manner which gave general satisfaction to the corps. The regiment marched from head-quarters, under the command of Major Roupell, M.P. About 500 of them sat down to dinner, the major presiding. The Rev. F. F. Statham (hon. chaplain), Dr. Ladd, Captains Richard Roupell, J. R. Truman (regimental secretary and quartermaster), Greaves, Watkins, Plews, Prewett, O. Davis, Smithers; Lieutenants Smith, Hill, Grady; Ensign Stanley, &c., were also of the company. The band of the Scots Fusiliers, and that of the regiment performed during dinner. When the cloth had been removed the major addressed a few observations to the men, telling them that they were amongst 20,000 or 25,000 of their countrymen and women, and that they should be careful not to give their enemies (if

Digitized by Google

they had any now) an opportunity of making any unfavourable comment on their conduct. He knew that they had never shrunk from marching through hail, rain, or snow, but he should now put it to the vote whether they were to ride or march back to head-quarters (a general cry of "March back" and cheering). Well, he now called for a show of hands on the point. Every man present held up his hand for marching back. Cheers were then given for Her Majesty; and "The Health of the Major" was duly given and responded to.

DEVONSHIRE.

5TH (UPPER CULM VALE) DEVON RIFLES.—The Prince of Wales, who is the owner of considerable property at Bradninch, Devonshire, has presented 20 guineas to this corps.

ESSEX.

5TH (BEACONTREE) ESSEX RIFLES.—A meeting has been held at Forest Gate, for the purpose of forming a rifle corps for that district in connection with the 5th Essex. The project has been taken up with considerable spirit by nearly all the resident gentry, and there is every prospect of the corps becoming a very important part of the 5th Essex, which now numbers 1000 men, or nearly one-third of the entire force of the county. It was stated that an influential gentleman was ready to take the command of the corps, and would equip 30 men at his own expense. Mr. C. W. Tanner offered to provide regimentals and the necessary equipment for five men, and the chairman undertook to provide for a similar number, and also to give a handsome donation to the funds. The corps was formed, and several young men immediately enrolled themselves as effective members, a committee being organised for the purpose of carrying out the arrangements.

6TH (COLCHESTER) ESSEX RIFES. — This corps having become sufficiently powerful for the formation of a second company, the effective members met on Wednesday week, and the two companies were organised. On Friday week a second meeting took place for the election of officers, when Mr. Octavius Bawtree was chosen lieutenant, and Messrs. P. M. Duncan and James Cooke ensigns of the second company.

12TH (BRAINTREE) ESSEX RIFLES.—On Thursday se'nnight a magnificent silver cup, weighing 80 ounces, was presented by this corps to C. Basil Sparrow, Esq., the captain; at a splendid entertainment given in the Corn Exchange, Braintree, Essex. The cup was engraved with Captain Sparrow's crest, and the following inscription "Presented to Captain Sparrow by the effective members of the 12th Essex Rifle Volunteers. 20th December, 1860."

1ST (HARWICH) ESSEX ARTILLERY CORPS.—The ladies of Harwich and Dovercourt having contributed nearly 40*l.* for the purchase of a silver bugle for the use of the above corps, the men were, a few days since, assembled in full uniform, accompanied by their commandant, Major Bawness, and the other officers, when the presentation took place, by Mrs. Cox, accompanied by some brief but suitable remarks, which were duly responded to by the gallant officer.

GLOUCESTERSHIRE.

3RD (CHELTENHAM) GLOUCESTERSHIRE RIFLES.—The officers of this corps were last week entertained at dinner by Sir Alexander Ramsay, the Earl of Ellenborough, Colonel Pearce, Colonel Kennedy, and other promoters of the Volunteer movement being also invited. The band of the battalion played during dinner.

10TH (THE COTSWOLDS) GLOUCESTERSHIRE RIFLES.—The members of this corps have presented their colour-sergeant, J. Rees Phillips, Esq., with a gold Maltese cross, as a mark of their esteem and appreciation of the zeal and energy with which he had conducted the affairs of the company since its formation.

HERTFORDSHIRE.

2ND HERTS RIFLES.—The anniversary of this corps was celebrated by a public dinner in the Corn Exchange, Watford, yesterday, at which the Earl of Essex presided.

KENT.

FOLKESTONE ARTILLERY AND RIFLES.—On boxing-day these corps assembled at their respective armouries about half-past 8 a.m., and marched, headed by the Artillery brass band, to the upper railway station, for the purpose of welcoming the Artillery from Dover, which, under the command of Captain Wollaston, came by train to meet them. On alighting at the station, and marching out, they were received with arms presented, the band playing God save the Queen. The Dover Artillery then formed up, and returned the compliment by presenting arms. They then formed up in column, and, headed by the Dover band, proceeded to Hythe, for the purpose of fraternising with the Hythe corps. On reaching Sandgate, the Artillery corps then fell into the column, and from thence the whole marched to Hythe, where they were received right joyfully, the church bells ringing a merry peal in honour of the occasion. After dining, the whole marched back to Folkestone, which they reached in time to meet the 4 p.m. train to Dover. About 200 volunteers assembled on this occasion.

LANCASHIRE.

68TH (LYCEUM) LANCASHIRE RIFLES. — The officers of this excellent corps celebrated the close of the present year by giving a grand *soirée* at the extensive rooms of Messrs. Bradley, of Bold Street, on Friday evening. Although the corps has only been in existence since May last, it is now a most efficient body, the members having attended well to that important matter—drill.

RENFREWSHIRE.

GREENOCK RIFLES.—On Saturday last Lady Octavia Shaw Stewart presented the Volunteers of the Greenock district with a silver bugle. The Greenock, Gourock, and Port-Glasgow company met in a field behind the Academy, about 3 o'clock. A raised daïs was erected at the upper part of the ground, and in front of it the Volunteers were drawn up, forming three sides of a square. Lady Octavia, accompanied by Mrs. Grieve and Mr. Murray Dunlop, M.P., took their stand on the daïs, where her Ladyship presented the bugle to Sir Michael, who, as colonel of the regiment, received it, and after thanking his wife in the name of the Volunteers, handed it to the bugle-major, Captain Sicklemore, R.N. Major Latham called for three cheers in honour of the donor, which were enthusiastically accorded. The Volunteers were afterwards entertained at dinner in the Town Hall by Sir Michael and their officers.

YORKSHIRE.

HULL ARTILLERY AND RIFLES.—These corps have made very satisfactory progress since their formation. On Monday last, availing themselves of the holyday kept at the request of the Mayor, they had a parade and march out. About 280 of the Artillery assembled at the garrison at 2 o'clock, and after some evolutions on the ground they proceeded, under the command of Lieutenant-Colonel Samuelson, to the Market-place. The Rifles, to the number of 150, had also assembled about 2 o'clock at their barracks, and, under the command of Lieutenant-Colonel Pease, they likewise proceeded to the Market-place, where they were received with the customary honours by the Artillery. The demonstration was exceedingly gratifying, and the appearance and marching of the corps reflected upon them the highest credit.

CHESHIRE.—The Cheshire Rifle Association, formed at the meeting held at Chester, on December 1st, the Lord-Lieutenant, the Marquis of Westminster, in the chair, is going on satisfactorily. At the first meeting of the council, on December 8th, Lord Grosvenor, M.P., was appointed chairman, and Mr. John Laird, deputy chairman.

GLOUCESTERSHIRE.—A contest took place on the 24th inst., at Southam, near Cheltenham, between 12 members of the 7th Company, Captain Gibney, and 12 of the 13th Company, Captain Morphy, three ranges—200, 300, and 400 yards, five rounds each range. The score was:—7th Company, 139 points; 13th Company, 178; the latter winning by 39 points, being on the average 15 points per man.

RENFREWSHIRE.—The members of the four Paisley companies (second battalion) supped together in the Exchange Rooms on the evening of Friday 21st inst., on the occasion of the presentation of prizes to the successful competitors at their late shooting matches. Sheriff Campbell, Provost Pollock, and a number of other influential gentlemen who were present and who took part in the proceedings, were all much gratified by the turn-out made by the Volunteers. The room was tastefully decorated with evergreens, stars of bayonets, and a chevaux-de-frize of rifles and bayonets in front of the platform. After supper Major Fullerton presented the prizes to the sucessful competitors, consisting of a Sharp's breech-loading rifle and case to the best shot of the whole, given by P. Kerr, Esq., Whitehaugh. Four short Enfield rifles and four field glasses, presented by the officers to the first and second best shots in each company. The conditions were five rounds at 300, 500, 600, and 700 yards. The shooting, making allowance for the very unfavourable state of the weather, was most satisfactory, and in one instance, at least, such as we think has never been surpassed with the Enfield rifle, we allude to Corporal Gilmour who scored 9 points at 700 yards, viz.: 4 centres and 1 outer. We subjoin a list of the points made by the winners, and to show the keenness of the competition, may state that ties had to be shot off in all the companies—

			300	500	600	700	Total.

STAFFORDSHIRE.—Lord Hatherton, the lord-lieutenant of Staffordshire, convened a meeting to take place on Thursday, the 27th inst., at the Shire Hall, Stafford, for the purpose of forming a county association to promote efficiency among the several corps in musketry practice.

THE VOLUNTEER MOVEMENT IN INDIA.—The volunteer movement is making progress. A third company has been formed in Calcutta. The first two companies drill on the plain two or three mornings every week. A large corps has been formed in Lucknow.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, DECEMBER 25.

1st Rural Administrative Battalion of Aberdeenshire Rifle Volunteers—James Ewing, Gent., late Quartermaster Ross-shire Militia, to be Adjutant.

1st Battalion of Lincolnshire Rifle Volunteers—John Golden, Esq., late Major Royal North Lincoln Militia, to be Adjutant from the 20th of July, 1860.

2nd Battalion of Lincolnshire Rifle Volunteers—William Longstaffe, Esq., late Captain Royal North Lincoln Militia, to be Adjutant from the 9th of August, 1860.

3rd Battalion of Lincolnshire Rifle Volunteers—Augustus Laurent, Gent., late Lieutenant in the 19th Bombay Native Infantry, to be Adjutant from the 24th of August, 1860.

1st Battalion Warwickshire (Birmingham) Rifle Volunteer Corps—Major James Oliver Mason to be Lieutenant-Colonel, vice Sanders, resigned; Captain Thomas Aurelius Attwood to be Major, vice Mason, promoted.

3rd Brecknockshire Rifle Volunteer Corps—Peter R. Wakeman, Gent., to be Honorary Assistant-Surgeon.

9th Cumberland Rifle Volunteer Corps—Alfred Hodgetts, Gent., to be Ensign, vice Peile, resigned.

Memorandum—Her Majesty has been graciously pleased to accept the resignation of the commission held by Ensign Charles Peile in this corps.

2nd Cumberland Rifle Volunteers—William Barwick Clarke, Esq., to be Honorary Assistant-Surgeon.

Midlothian Coast Artillery Volunteer Corps—James Anderson to be Second Lieutenant, vice Graham, resigned.

9th Cornwall Rifle Volunteer Corps—William T. Plowman, Surgeon, to be Honorary Assistant-Surgeon.

15th Durham Rifle Volunteers—John Rimmington Fothergill to be Honorary Assistant Surgeon.

16th Durham Rifle Volunteers—Robert Calverley Bewicke, Esq., to be Captain; Robert Wilson, Gent., to be Lieutenant; John Curtledge Hawkes Johnstone, Gent., to be Ensign.

4th Oxfordshire Rifle Volunteer Corps—Lieutenant Thomas Fuller Maitland to be Captain; Ensign Arthur D'Oyley Brooks to be Lieutenant, vice Maitland, promoted; John Page, Gent., to be Ensign, vice Brooks, promoted; Bransby Brooks, Surgeon, to be Honorary Assistant-Surgeon.

1st Staffordshire Artillery Volunteer Corps—William Sarjeant Roden, Esq., to be Captain.

2nd Cambridgeshire Rifle Volunteers—Frederick Morehouse Metcalfe, Esq., to be Ensign, vice Young, promoted.

3rd Cambridgeshire Rifle Volunteers—Lieutenant John Armine Willis to be Captain, vice Hughes, resigned; Ensign John Bagot Scriven to be Lieutenant, vice Boulnois, resigned; William Downe Bushell, Esq., to be Ensign, vice Scriven, promoted; Lieutenant Alfred Edward Northey to be Captain, vice Holland, resigned; Ensign Richard Musgrave Harvey to be Lieutenant, vice Northey promoted; Charles James Graham, Esq., to be Ensign, vice Bayford, resigned; Robert Penrose Fitzgerald, Esq., to be Lieutenant, vice Willis, promoted; Henry Westwood Hoffman, Esq., to be Ensign, vice Harvey, promoted.

Memorandum—Her Majesty has been graciously pleased to accept the resignation of the commissions in the 3d Cambridgeshire Rifle Volunteers held by Captain Henry Salusbury Hughes, Captain Frederick Whitmore Holland, Captain Richard Digby Cleasby, Lieutenant Edmund Boulnois, Lieutenant Oswald Smith, Ensign Robert Augustus Bayford.

15th Company of Surrey Rifle Volunteers—The Rev. Lawrence Till to be Honorary Chaplain; George Harcourt, Esq., M.D., to be Honorary Assistant-Surgeon; John Madocks, Gent., to be Ensign, vice Dowling, promoted.

19th Surrey (or Lambeth) Rifle Volunteer Battalion—Lieutenant Frederick Thomas Prewett to be Captain; Ensign James Alfred Thornhill to be Lieutenant, vice Prewett, promoted; Alfred Porter, Gent., to be Ensign, vice Thornhill, promoted; Frederick Stanley, Gent., to be Ensign.

[The following article is substituted for that which appeared in the *Gazette* of the 18th December inst.]

1st Glamorganshire Artillery Volunteers—Henry Joseph Madge, Gent., to be Second Lieutenant, vice Brown, resigned.

WAR OFFICE, PALL MALL, DECEMBER 28.

2nd Manchester or 28th Lancashire Rifle Volunteer Corps—Henry Bathurst, Esq., late Lieutenant-Colonel Nova Scotia Militia, and Captain, Hampshire Militia, formerly Captain 23rd Royal Welch Fusiliers, to be Adjutant from 13th April, 1860.

15th Lancashire Rifle Volunteer Corps—Andrew Winter Lake, Esq., to be Adjutant, from the 21st of September, 1860.

6th Lancashire Artillery Volunteer Corps—Robert Valentine Kearney, Gent., to be Second Lieutenant.

19th Lancashire Artillery Volunteer Corps—Francis Preston, Esq., to be Captain.

10th Lancashire Rifle Volunteer Corps—Ensign Robert Hall to be Lieutenant, vice Satterthwaite, resigned; Joseph Fenton, Gent., to be Ensign, vice Hall, promoted; The Reverend Joseph Turner, M.A., to be Honorary Chaplain.

27th Lancashire Rifle Volunteer Corps—Thomas Hesketh, Esq., to be Captain; Thomas Hesketh Higson, Gent., to be Lieutenant; Charles Henry Bayley, Gent., to be Ensign.

2nd Manchester or 28th Lancashire Rifle Volunteer Corps—Ensign George Beattie to be Captain, vice Willock, promoted.

42nd Lancashire Rifle Volunteer Corps—Charles Pierre Melly, Esq., to be Captain; Ensign Henry Charles Lucy to be Lieutenant; Weir Anderson, Gent., to be Ensign; Percy Wollaston, Gent., to be Ensign.

51st Lancashire Rifle Volunteer Corps—Ensign John White to be Captain.

Memorandum—The title of Captain-Commandant has been conferred on Captain Samuel Robert Graves, of the 42nd Lancashire Rifle Volunteer Corps.

6th Gloucestershire Rifle Volunteer Corps—John Tuppen Woolright, Gent., late Ensign in the 4th Gloucestershire Rifle Volunteer Corps, to be Lieutenant.

11th Gloucestershire Rifle Volunteer Corps—The Reverend Sir George Prevost, Bart., to be Honorary Chaplain, vice Litle, resigned.

2nd or Cader Idris Company of the Merionethshire Rifle Volunteer Corps—William Williams, Gent., to be Honorary Assistant-Surgeon.

19th Sussex Rifle Volunteer Corps—John Francis Gottwaltz to be Ensign.

5th Norfolk Rifle Volunteer Corps—Lieutenant Francis Joseph Cresswell to be Captain, vice Swatman, resigned; Ensign Somerville Arthur Gurney to be Lieutenant, vice Cresswell, promoted; Henry Edwards, Gent., to be Ensign, vice Gurney, promoted.

Kent Rifle Volunteers—26th Corps—Edwin Rudd, Gent., to be Ensign, vice Ansell, resigned.

10th Lanarkshire Artillery Volunteer Corps—Second Lieutenant James Coats to be First Lieutenant, vice Ninian Bannatyne Stewart, resigned; Thomas Taylor Hay, Gent., to be Second Lieutenant, vice James Coats, promoted.

15th Lanarkshire Artillery Volunteer Corps—Archibald Campbell Holms, Esq., to be Captain.

5th Lanarkshire Rifle Volunteer Corps—Gavin Morrison Brown, Gent., to be Lieutenant, vice Hugh Colquhoun, resigned.

45th Lanarkshire Rifle Volunteer Corps—Lieutenant John Forbes to be Captain, vice John Gowland, resigned (appointed Major, 4th Administrative Battalion); Ensign John McCulloch to be Lieutenant, vice John Forbes, promoted; John Blaikie, Gent., to be Ensign, vice John McCulloch, promoted.

46th Lanarkshire Rifle Volunteer Corps—Robert Smith, Esq., to be Captain, vice Archibald Henderson, resigned.

96th Lanarkshire Rifle Volunteer Corps—David Marshall Lang, Esq., to be Captain-Commandant.

East York Rifle Volunteers—1st Corps—Ensign Gilbert Wilkinson to be Lieutenant, vice Lucas, promoted; John Spencer Galloway, Esq., to be Ensign, vice Wilkinson, promoted.

16th Middlesex Rifle Volunteer Corps — The Reverend Samuel Ruthven Anderson to be Honorary Chaplain.

19th Middlesex Rifle Volunteer Corps—The Reverend John Frederick Denison Maurice to be Honorary Chaplain.

20th Middlesex Rifle Volunteer Corps—William Blake Graham, Adjutant, to serve with the rank of Captain.

Civil Service Corps of Rifle Volunteers—Lieutenant William Wilks Dalbiac to be Captain, vice Ennis, resigned.

36th Middlesex Rifle Volunteer Corps—Octavius Adolphus Field to be Honorary Assistant-Surgeon; Albert William Gange, M.D., to be Honorary Assistant-Surgeon; Joseph Thomas Holt Dunn, M.D., to be Honorary Assistant-Surgeon.

44th Middlesex Rifle Volunteer Corps—The Reverend Edward Stokes to be Honorary Chaplain.

Memorandum—4th Administrative Battalion of Middlesex Rifle Volunteers—The 29th Middlesex Rifle Volunteer Corps has been detached from this Battalion, which now consists of the 20th and 37th Middlesex Rifle Volunteer Corps.

1st Administrative Brigade of Forfarshire Artillery Volunteers—Matthew Nimmo, Esq., to be Surgeon.

11th Forfarshire Rifle Volunteer Corps—David Carnegie, Esq., to be Ensign.

Memorandum—2nd Forfarshire Artillery Volunteers—Her Majesty has been graciously pleased to accept the resignation of the Commission held by William Mitchell, Esq., as First Lieutenant.

1st Brigade Ayrshire Artillery Volunteers—Captain Henry James to be Major.

3rd Fifeshire Mounted Rifle Volunteer Corps—William Drysdale, jun., Gent., to be Ensign.

8th Cornwall Rifle Volunteer Corps—Captain William Herbert Mausell has received permission to resign his Commission in this Corps.

VOLUNTEERS AT HYTHE.

The following is a correct list of the Volunteers under instruction at the School of Musketry for the present month:—

COMMITTEE, APPOINTED BY SECTIONS.

Chairman.—Captain MacGregor.

Section 1. Captain Elliot	Section 6. Lieut. Agnew
,, 2. Lieut. Thomson	,, 7. Captain Harrison
,, 3. Captain Steel	,, 8. Captain Falwasser
,, 4. Captain Cox	,, 9. Ensign Bonchier
,, 5. Ensign Jolly	,, 10. Captain Caldicott

RIGHT WING.

STAFF OFFICERS.—CAPTAIN COLES, LIEUT. WALKER.

First Section.—Staff-Sergeant Potter.

No. 1	Captain MacGregor	15th Middlesex
2	Mr. J. M. Jopling	2nd Middlesex
3	Lieutenant Phillips	9th Middlesex
4	Captain Mills	21st Middlesex
5	Ensign Allnutt	19th Middlesex
6	Sergeant Crispin	21st Middlesex
7	Lieutenant Tansley	19th Middlesex
8	Mr. C. Daniell	9th Middlesex
9	Captain Elliot	22nd Middlesex
10	Captain G. H. Elliott	11th Middlesex

Second Section.—Staff-Sergeant Dillon.

No. 1	Lieutenant Thomson	32nd Middlesex
2	Captain Hilliard	24th Middlesex

Digitized by Google

of the army to emigrating millers; remarkable appearance of Sikhs who had started with black beards, &c., but were now very grey indeed. Pass through Matoro, a large village with two male inhabitants, and a proclamation addressed to the two above-mentioned inhabitants, who sit on their hams to observe the locusts pass. Arrive at our camping ground. The trees are magnificent, and the spot poetical in the extreme. Parkes, *Times'* Correspondent, Mr. Loch, and others, go on to Tung Chau, as to-morrow is to be our last march; everything is settled. We are to be supplied with provisions.

18th.—Near Ho-ko-chawn, halted in village at the foot of a small wooded hill, occupied by French. Found all the baggage halted in a square. Everybody asking everybody what is up? Only about 8000 Tartar cavalry in front of us. Feel queer, army marches on, and converses with Tartarians, who are particularly anxious that we should encamp in that spot. Things look queer. I retire to the hill where the French are, in the rear, for there are several houses; sit in grass; assist a Frenchman to uphold his mule; bum bum go four or five guns. Breathless silence; general run to elevated spots; an ominous pause; anxious expectation. Bum, bum, a terrific row; large and small arms going off in various directions.

Fancy I hear round shots coming near us. Don't quite relish it. Wish I hadn't come; strong desire to be anywhere else; wonder where I shall be hit. Feel certain I shall be killed—horrible! I wish the firing would cease, the enemy is trying to come round to our rear, we shall be chawed up. Make for a house, get under ladder, near a pile of bricks. Frenchman armed comes in to look, mistakes me for a Tartar, and presents his musket; a few words reassures him; a dog won't leave the house, though all his friends are gone. Firing hotter and hotter; shake desperately; a tremulous motion in the hands at every gun. Heaven be praised, the firing has ceased! I peep out, and observe the end of the battle. Smoke and dust, and several maize stalks on fire.

We now perceived a two-gun battery, so very much like a natural embankment that we only knew what it really was by seeing the guns peeping over. Two or three dead and wounded men were lying beside the guns, with broken gingalls, soldiers' hats, trees cut in pieces by shot, and burning shot. The houses near were smoking, pierced with balls; and in a ditch there was a most horrible sight—a dead soldier on fire, with his legs burned to cinders. Further on lay another dead man with six lance wounds, and some dead men piled in a heap in a courtyard. As we advanced bullets and cannon-balls were lying about in all directions; and the road was strewn with clothes, hats, matchlocks, stirrups, &c. Crowds of our people collected round every corpse and made remarks. Slowly and anxiously we proceed, smothered in dust and faint with hunger, passed more bodies and more guns, through smoke and the smell of roast men. We have reached the French camp, where men in red breeches and shirt-sleeves are peeling onions and looking jolly. At sunset reach the gates of Chang-chai-wan, where two loud reports make us fancy the enemy are upon us, but we perceive the shape of the smoke, and recognise them to be explosions. The coolies rushed into a house on an embankment, and came out loaded with gorgeous apparel. Every house was entered, and plundering and smashing went on to a great extent.

19th.—I got up early and went into the town, where frightful looting was going on. The coolies *en masse* made for a pawnbroker's shop, where a scene of Pandemonium soon occurred. There were magnificent dresses, silks, and furs, and every person boned something. Every shop was broken into, drawers were lying about, doors were smashed; it was a regular case of sack. A gallant clerical gentleman has been rescuing a number of fair damsels who had made up a party to drown themselves. He carries them off in a cart, much to the edification of sundry Canton coolies, who make some elegant remarks by no means complimentary to the moral character of our above-mentioned friend. One lady manifested a desire to strangle her daughter—a notion that caused our friend S. to institute summary proceedings. The fair ones kept up a most musical entertainment—quite a sonata in F sharp, probably thinking that the barbarians—well, never mind. They were all safely lodged in a house, where they were well treated. We returned to our room, where the blackened wall indicates that the stove indulges in a smoke.

20th.—Rose up late, by way of a change. Mr. Wade went with a flag of truce towards Tung-chau yesterday, but was fired at. It is a gloomy afternoon, and we write letters on a box, by the light of a penny Chinese mutton fat.

21st.—Up at the dawn. Under the impression that our small treasure party is alone, and the main body far ahead, I feel an irresistible desire to run away and join the advanced guard. The silence is horrible. Though it is hot in the cart I don't like to get out, as I have made it bullet-proof—at least I fancy so—with blankets and bedding. A short way out of town there is a halt, to enable our gallant allies to pass. They have ducks and fowls attached to their knapsacks, and look like an animated poultry-yard going to Texas. Ah, behold my Vivandiere! once more she appears to my binocular, ocular orbits. The "artistic eye" is enchanted. Alas! she has passed. All have passed. I have been sitting under a hedge, with my plaid over my head, as if to keep off the sun, but, *entre nous*, it is to keep off erratic and perpendicular gingall bullets. At the next village we came to a halt for a short time, the fighting men having gone on ahead. I twist my neck looking for imaginary Tartars, but the search is vain. We then come to a bifurcated road, one portion of which brings us to a village where we halt, loot the houses, eat grapes and drink rum. Mem. War not so bad, after all. A pleasant individual remarks that the enemy's cavalry is very near, and suggests that if they come down we shall all be made mince-meat of. I finish off all the rum at one pull, and feel wonderfully courageous. The coolies having plundered sufficiently, all set to work cooking. Arriving at an open place, there are explosions and firing every minute. The enemy is beaten, and our troops are returning.

CONDEMNATION OF A SLAVER.—The slaver Lyras, taken on the 13th of October, had been condemned according to our latest advices from the Cape.

THE VICTIMS IN CHINA.

The following extract is taken from the *China Mail*, which, after some remarks on the surrender of Messrs Loch and Parke, says:—

"Next in comparative good fortune to them were Captain Brabazon, R.A., and the Abbé de Luc who were simply beheaded by the orders of a Tartar General who was mortally wounded at the time. We deeply regret to say that Mr. Bowlby, the *Times* correspondent, Mr. de Normann, and Lieutenant Anderson met a more horrible fate. Being tied up in the brutal manner in which the Mongols are accustomed to treat their prisoners, and most scantily supplied with food, they gradually sank beneath their sufferings, and finally expired. There is no reason to suppose that the Tartars actually intended to torture them to death, as they are always in the habit of so treating even prisoners whose lives they wish to preserve, but such was the fact to all intents and purposes. The French officers who were murdered were the Abbé de Luc, Colonel Grandchamps, Intendant Debut, and M. Aden.

"The retribution demanded for these cruel acts was certainly not a whit too severe, and it is to be regretted that some of the brutal perpetrators were not secured. As some of these dark deeds had been perpetrated at the Yuen-ming-yuen, that palace was utterly destroyed, and 300,000 taels, or about 100,000*l.*, was exacted by Sir Hope Grant for the families of his murdered countrymen, and as an indemnity to the survivors for the sufferings which they had undergone, while 200,000 were exacted by the French General, for a similar purpose."

"We have received private letters which give details precise and positive of the privations and sufferings consequent upon the cruel way in which the prisoners were tied, which caused delirium and death. There is no ground for stating that any other barbarities were perpetrated, but the remains of the deceased were treated with gross indignity."

The same paper gives an account of the funeral:—

"On the 17th at noon the procession formed at the Llama Temple, and marched in the following order to the Russian Cemetery, half a mile from the city, the band of the Rifles playing a slow march,

One Troop Dragoon Guards.
One Troop Fane's Horse.
An Officer and 20 men of each European Corps (armed).
The Commander-in-Chief, The Earl of Elgin, } Chief Mourners.

The corpses on gun-waggons each drawn by 6 horses. Mourners: Nearly all the Officers of the English, and a large number of the French army, including General Montauban, Commander-in-Chief.

Pall Bearers—		*Pall Bearers—*
Major A. Anson, Mr. C. S. Compton, Capt. Farquharson	MR. BOWLBY.	Hon. T. Thurlow, Col. Biddulph, Hon. — Wortley
Mr. H. Loch, Mr. T. F. Wade, Mr. H. S. Parkes	MR. DE NORMANN.	Capt. Grant, A.D.C., Capt. Lane, A.D.C., Lt.-Col. Crealock
2 Privates King's Dragoon Guards	PRIVATE PHIPPS, King's Dragoon Guards	2 Privates King's Dragoon Guards
2 Officers Fane's Horse	LIEUT. ANDERSON	2 Officers Fane's Horse

"The burial service was read by the Rev. Mr. McGhee, chaplain to the British Forces. The priest of the Greek Church attended by request, in his pontifical robes, holding on high the emblem of our faith. Father Makee, the Roman Catholic priest attached to the British Army, was present. Three volleys were fired by the infantry. It was a mournful and affecting ceremony to witness these poor Christian victims of heathen barbarism laid in their untimely graves. The cemetery is about a quarter of a mile outside the northern wall of the city. The grave is on high ground, just within the inner gate. The coffins were laid side by side from the north to south,—Private Phipps, then Lieut. Anderson, then Mr. de Normann, and then Mr. Bowlby. The Royal Engineers are to place a tomb over the poor fellows, and if the British Government does not erect a monument to their memory, it is to be hoped that it will be done by private subscription.

"The Chinese authorities have been made to pay the sum of 300,000 taels of silver (say 100,000*l.*) for the families and friends of the deceased. The exact amount for each will be decided by Her Majesty's Government, the maximum it is said will be 10,000*l.*, and the survivors who escaped will participate, in consideration for their sufferings. One sowar has died since he came into camp from the effect of his injuries."

CHINA.

[FROM A CORRESPONDENT.]

Camp, Pekin, *October* 26, 1860.

The war is over and fellows already on the way home; the treaty was signed with some mock ceremony on the 24th, and a very dull, uninteresting ceremony it was.

We had a very distressing duty to perform a week or ten days ago, to follow the remains of poor Bowlby to a decent grave. His body, with others, was produced at last; he had sunk under his tortures on the third day after he was captured.*

His companions, poor Brabazon, R.A., it was ascertained yesterday, was brought before a mandarin (on the morning of the 21st September, the day of the battle at Chang-kia-wan) who was dreadfully wounded himself,—and who, in a frenzy of pain and rage ordered Brabazon and a French priest (De Luc) to be beheaded at once, which was done, and their bodies were thrown into a canal. The prisoners are now all accounted for, and the bodies of all those we could collect, poor Bowlby's among the rest, were interred in the Russian cemetery with all the state that could be managed as to notable pall-bearers, &c.; Lord Elgin and Sir H. Grant, and all the chief French officials attended.

In revenge for these atrocious murders the Emperor's Summer Palace has been sacked and burned, and the pleasure-grounds broken up and devastated. It took two or three days to complete the work of destruction, and the smoke quite darkened the bright sun all the time, producing an effect similar to an eclipse. The palace was well looted first, and every one, from the ambassadors and generals down to the very coolies, got plunder and valuables.

The Chinese say there were tables of gold there, which they would give all the wealth of the empire for—tablets with the chronicles of their emperors for ages.

A rod was held over their heads that, if they did not at once pay down an indemnity to us for the benefit of the wives and families of the victims of their treachery, and sign the treaty on or before the 24th, the army would enter the city and burn the Winter Palace, which they say is even richer than Yuen-ming-yuen, but which none of us have yet seen. This was the right way to bring things to a crisis, and the only way; for, although they pleaded great poverty and an empty treasury, they agreed at once to pay 300,000 taels to us and 200,000 to the French.

The ceremony of signing the treaty was a very lame affair. It was signed in one of the palaces of justice in the city, the Chinese officials on one side of the hall, the English on the other. The Emperor's next brother represented him,—a young fellow of 28, reduced to imbecility almost by debauchery, as they say the Emperor also is. There were no greetings; all was done in solemn silence, the Chinese wearing a very subdued and sulky air, as if acting under sore compulsion. They have still a very large army outside of the city walls, but within three miles. It is said that San-ko-lin-tsin is with them, but reduced to the lowest grade of mandarins.

Whether it is really peace or not, remains to be proved; but, as a sign of the times, an officer and three men of the 67th were taken by the Tartars while strolling about, and we have no tidings of them since.

Lord Elgin is going to live for a day or two in Kung's palace. This Kung, the Emperor's brother who signed the treaty, and who was supreme in Pekin while the prisoners were in or about it, did not, or could not, interfere to save any except Parkes and Loch. Will he be better disposed, or better able, to observe the treaty wrung from his fears, under circumstances of humiliation which will so greatly increase his hate?

The 1st division of the army leaves here for Tien-tsin on 1st Nov.; the 2nd division on the 3rd. There will be left at that place some 3000 men, to consist of Fane's Horse, two batteries of Armstrong guns, the 31st, 60th, and 67th regiments, with the Military Train.

The other regiments go home and to India, and the 99th to Canton to relieve the 87th, going home.

[* From a private letter it would appear that Mr. Bowlby, whose loss has left us without the final record of the Chinese campaign, the value of which may be estimated by the minuteness of detail, vigour of description, personal enterprise, and graphic power, in those letters which all the world admired in the columns of the leading journal, died on the sixth day after he was taken prisoner. It is a poor consolation to add that the excitement and sufferings of the prisoners produced delirium, and rendered them unconscious of their sufferings.]

THE WAR IN CHINA.

THE DESPATCHES.

War-Office, December 28, 1860.

Major the Honourable A. Anson arrived yesterday evening with a despatch, addressed to Mr. Secretary Herbert by Lieutenant-General Sir J. Hope Grant, G.C.B., commanding Her Majesty's Forces in China, of which the following is a copy:—

No. 56. Head-Quarters, before Pekin, Oct. 22, 1860.

Sir,—In my despatch, No. 46 of the 20th September, I had the honour to report the illegal capture, by the Chinese, on the 18th of that month, of several officers and soldiers who had accompanied Mr. Parkes to Tungchau, when he went there to meet the Chinese Commissioners.

I have since reported the return of Messrs. Parkes and Loch, and of one Sikh soldier, on the 8th October, and of eight more Sikhs on the 12th October.

I have now to report that, on the 14th instant, two more Sikhs were brought back, the Chinese declaring that they were the last survivors of those who had been taken prisoners.

To prove their assertion, they brought out to us the bodies of Lieutenant R. B. Anderson, of Fane's Horse; Private John Phipps, King's Dragoon Guards; Mr. de Normann, of Her Majesty's Legation; Mr. Bowlby, *Times'* Correspondent in China; and eight Sikhs.

This accounts for all of those who are missing, except Captain Brabazon, Royal Artillery, and of him I cannot at present obtain any tidings, but I fear that there can be no doubt but that he is dead.

It appears from the statements of the surviving Sikhs, that after Messrs. Parkes and Loch had quitted the party, on the 18th September, to speak to Sangolinsin, as detailed in my despatch of the 9th inst., the Chinese crowded round them in great numbers to disarm them.

The position in which they found themselves precluded any attempt to cut their way out with any chance of success, upon which Lieutenant Anderson very properly determined to trust to the protection of the flag of truce, and ordered the sowars to make no resistance. They were accordingly disarmed and taken to the rear, being permitted to retain their horses. They halted for the night at a joss-house between Tungchau and Pekin; and the following morning Capt. Brabazon and the Abbé Duluc (a French Missionary who spoke Chinese) were taken out and sent back, ostensibly for the purpose of communicating with the Allied Commanders. The remainder of the party, being again mounted on their own horses, were taken through Pekin to Yuen-Ming-Yuen, where they arrived soon after mid-day. Up to this time they had been very well treated, but about an hour after their halt at the palace they were called out one by one, thrown on their faces, and their hands and feet tied together behind their backs. In this state they were left, without food or drink, for three days. On the 22nd September the Chinese, probably fearing, after our victory of the previous day, that we should advance and recapture their prisoners, took them out, and, dividing them into four parties, placed them in carts, with their hands still bound, and drove them off to four small hill fortresses, varying from twenty to forty miles from Pekin.

I beg to append a statement showing how these parties were divided, and which of the prisoners died in captivity.

Of the cause of their death there can be no doubt; the survivors of each party tell the same sad tale, of how they

Digitized by Google

remained with their hands tightly bound with cords until mortification ensued, and they died. The whole party would have doubtless shared the same fate, had not their cords been cut on the ninth day, or thereabouts.

Messrs. Parkes, Loch, and their Sikh orderly, more fortunate than their companions, were confined in the common prison of Pekin, and laid in irons for several days, a far more merciful treatment than that vouchsafed to the rest of the party.

I cannot conclude this report without adverting to the loss Her Majesty's service has sustained in Captain Brabazon, Royal Artillery, and Lieutenant Anderson, of Fane's Horse. The former, an officer of much professional ability, had proved himself to be an excellent officer in the field also, by his energy and intelligence whilst serving through the present campaign as Deputy Assistant-Quartermaster-General of Artillery.

The latter was Adjutant of his regiment, and had earned for himself both here and in India, the reputation of being one of the best Irregular Cavalry officers in Her Majesty's Indian army. Nor can I omit mention of Private Phipps, of the 1st Dragoon Guards, who, when last surviving European of his party, encouraged the Sikhs in every way he could, until his decease on the 14th day of his captivity, thus well sustaining the reputation of a British soldier, under the most trying circumstances.

By the kind permission of the Russian minister, General Ignatieff, the bodies of the Englishmen have been interred in the Russian cemetery here. They were buried on the 17th instant, with military honours, in presence of General de Montauban and many officers of the French Army, of the officers of the Russian mission, and of the majority of the officers of the English Armyand embassy.

I have, &c.,
J. Hope Grant, Lieutenant-General,
Commander of the Forces.

The Right Honourable the Secretary of State for War,
&c., &c., &c.

1st Party taken to Hill Fort.

Lieutenant R. B. Anderson, Fane's Horse, died on the 9th day of captivity, 27th September; Mr. De Normann, Attaché of Her Majesty's Legation, died on 17th day of captivity, 5th October; 1 duffadar, Fane's Horse, returned to camp 12th October, 1860; 4 sowars, Fane's Horse, 1 died, 3 returned 12th October. Bodies of those who died brought in on 14th October, 1860.

2nd Party taken to Hill Fort.

1 French officer, died; 2 French soldiers, 1 died, 1 returned 12th October; 5 sowars, Fane's Horse, 1 died, 4 returned 12th October, 1860. Bodies of those who died brought in on 14th October, 1860.

3rd Party taken to Hill Fort.

1 French officer, died; Mr. Bowlby, died on 7th day of captivity, 25th September; Private J. Phipps, King's Dragoon Guards, died on 14th day of captivity, 2nd October; 1 sowar, 1st Sikh Irregular Cavalry, died on 9th day of captivity, 27th September; 1 duffadar, Fane's Horse, died the 16th day of captivity, 4th October, 1860; 2 sowars, Fane's Horse, returned to camp, 14th October, 1860. Bodies of those who died brought in on 16th October, 1860.

4th Party taken to Hill Fort.

One French officer, 2 French soldiers, 4 sowars, Fane's Horse. Died in captivity; bodies brought in on the 17th October, 1860.

Pekin party.

Mr. Parkes, Mr. Loch, 1 sowar, 1st Sikh Irregular Cavalry, 1 French officer, 4 French soldiers. Brought back to camp on 8th October.

Missing.

Captain Brabazon, Abbé Duluc (French Missionary). Believed to have been beheaded in the Tartar camp during the battle of Palichiau on 21st September, 1860.

LATEST INTELLIGENCE.

REUTER'S TELEGRAMS.

The following telegrams have been received at Mr. Reuter's office:—

Milan, 27th December.

The *Perseveranza* states on good authority that the young Queen of Naples has left Gaëta.

Vienna, Friday evening.

An autograph letter of the Emperor, dated the 21st inst., and addressed to the President of the Imperial Chancery Court for Transylvania, orders the immediate organisation of the Chancery, and also of the *Gubernium*, for the same province. The same letter also orders the assembling of a conference of the most eminent persons from the various classes of the different nationalities and religious confessions—to deliberate on the early organisation of the Transylvanian diet. The privileges of this diet are to be determined according to the ancient public rights of the citizens, but within the limits prescribed by the Imperial diploma of the 20th Oct.

The said conference will also make propositions in reference to the re-establishment of the former administrative divisions of Transylvania and of the offices of Lords-Lieutenants (Obergespanne) and Chief-Captains (Obercapitane) of the counties. It will also discuss the re-establishment of the offices of Superior Royal Judges (Oberkönigsrichter) of the Szeckler and of the Saxon legal and administrative authorities (Sachsen, Stühle.)

Pesth, December 27.

The General Congregation of the City of Pesth has resolved upon making representations to the Court-Chancellor to obtain the release of Count Ladislaus Teleki, or if this be not possible, to have him tried by the Hungarian tribunals.

Madrid, 27th December.

The "Epoca" asserts that the Moors are making great efforts to collect the necessary funds for the payment of the second instalment of the indemnity.

Extensive inundations have taken place in Spain, causing great devastation.

Paris, Friday, 28th December, 3. 25 p.m.

The Bourse continues very flat, and business is stagnant. Rentes closed 6775 or 25c. lower than yesterday.

A WALK ROUND ALDERSHOT.

It is pleasant and instructive to take a walk through the lines of Aldershot, and note the changes which contribute to all the progress and order observable about the place At first, on leaving the station at Ash or Tongham, the walk to the Camp is not assuring: for a villanous piece of muddy road, some two miles long, ungarnished by either ditch or footpath, must first be passed. Houses, mainly in dull red brick, hastily run up without a thought of taste, line the whole road from the commencement of the village of Aldershot, past the face of the permanent barracks, constituting what is now almost a town; but which, if the increase is at the same ratio, will some day aspire to a more dignified title. Third-rate shops, with low public houses intermixed, all with flaring signboards, compose the major part of these dwellings, and drive a feeble business with the Camp—themselves a flagrant eyesore to the inhabitants of the barracks, which a little foresight on the part of the Government officials might easily have avoided. Indeed, looking at the long narrow strip of level ground on which the permanent barracks are built, and which intervenes between the base of Stannon Hill and the present boundary of the Government property, it is astonishing to think that, when it was determined to build permanently in that situation, this boundary was not extended further to the front. Then the ground could have been purchased at a reasonable rate; now they sell it by the foot, and ten years hence it will be retailed by the inch. Much trouble has lately been taken in improving, draining, and levelling this parade, turfing the banks which slope towards it, and redeeming it, in fact, from that state of quagmire, which still holds undisputed sway in rear of the barracks. The Artillery and Cavalry quarters are well enough, though why there should be so great a want of uniformity we cannot understand; but the elevation of the Infantry barracks is a positive discredit to the taste and education of engineers in the middle of the 19th century, and great as may be the Secretary of State's horror of ornament, as evinced in his General Circular to the Royal Engineers, we think he must have been amply satisfied on beholding their latest modern work. *Nemo repentè fuit turpissimus*, which, we suppose, in the language of the War Office, must be understood to imply that it takes some time to make a good Royal Engineer. The sweep of this parade is spoiled by the guard-house of the Royal Artillery, stuck most unhappily in the middle, emblematic of the regiment itself—we hope yet to be removed, in spite of the expense it may cause: as well as the huts now occupied by the clerks of works with their offices, when these gentlemen have contrived to pick out the snuggest situations, and to erect the most tasty houses somewhere else in the district, with that keenness and discretion proverbial throughout the world, wherever English soldiers are quartered. The Circular above alluded to never applies in that quarter; the sauces for the goose and gander of these ilks are of very different quality. A grey-headed captain, covered with medals, expected to keep up the position of a gentleman, with a wife and three or four children, has one room in a common passage allotted to him, with the eighth or tenth share of a cleaning-room attached, in the shape of a kitchen. A private in his company gets as much, or very nearly, now-a-days. If a field-officer, he has but two rooms, one of them no better than a closet, and even then rarely secures a kitchen. But a clerk of works! or an office messenger!—whew! —we are talking treason, with the orderly-room right in front of us; let us turn the subject towards it, where we can speak pleasantly, and note change with improvement. In all old barracks, the guard-room, the office of the commanding-officer, the lock-up-room, and the place where courts-martial are held, are all widely apart; prisoners are kept hours often waiting in the rain outside the orderly-room; the officers' mess-room, or ante-room, is occupied several days each week by their trials; and we might add many other inconveniences. Now, in this barrack, all these matters are arranged under one roof, and the adjutant of the regiment is able to keep things going under his eye while employed about his office-work. In truth, all the stores, offices, and houses for married men, are such an immense advance upon anything that has ever been built before, that we trust the lamentable deficiencies which still exist respecting the quarters assigned to senior married officers will next occupy the attention of the authorities. We are glad the men have been first thought of; and, judging from this, we have reason to think our hope well-founded. There ought to be a distinction between quarters for married and single officers, and the country would not grudge a small outlay in rendering, we will not say comfortable, but simply respectable, those gentlemen to whom it has entrusted the tremendous responsibilities connected with the management and discipline of the British Army. Mr. Herbert may be assured that these gentlemen neither require nor expect anything involving expense in grandeur or ornament; they simply ask for space, and the means of lodging a family in the commonest demands of decency consistent with comfort; and their just expectations ought not to be longer deferred.

The men's barracks, consisting of a double block, spanned across with an arched glass roof, is a new experiment in Government buildings; and, judging from the opinions of the men which we heard, may be considered successful. At any rate, we saw that the rooms were very clean and comfortable, each containing twenty-three beds, and a detached cabin in the corner for the non-commissioned officer in charge. A new feature also presented itself in the basins and plates supplied by the barrack department to the men, enabling them to eat their meals in a civilised way; and also to keep the barrack tables clean. The messing here is superior to anything else in the kingdom for the money. The ration of bread and meat is served at 4½*d.* to the soldier; the meat supplied by the Commissariat appeared of good quality; the bread superior to the generality of contractors' bread in other places; 1½*d.* more is charged for tea, coffee, sugar, salt, pepper, vinegar, mustard, &c. An ounce of tea serves six men, and all these articles are of superior stamp to anything that could be obtained at retail stores; placing their issue in the hands of the Commissariat has given great satisfaction, and it is to be hoped the plan will be generally followed in other large military stations. Then we must take 1*d.* for vegetables, and 1*d.* for washing, to complete the 8*d.*, which is daily deducted from the soldier's pay for his livelihood; and, taking it all in all, he lives well, and far better than a labouring man could afford to do. He has alternate dinners of boiled and baked meat; pies at least twice a week, soup and fruit-pie of a Sunday, whenever the mess can stand it. The remaining 4*d.*, which is the balance of his daily shilling, is at his own disposal, provided he keep up his kit; but, considering the excessive nature of the drill and field days here, and that a pair of boots costs 10*s.*, it will be easily understood that little is left for beer and amusement; and where the 6*d.* comes from, out of which he is poetically stated to spend half-a-crown a day, is an unfathomable mystery. Yet it is astonishing to think of the number of public-houses which, in addition to the canteens, are supported entirely by the little balances of the soldiers' pay. There are 13,000 men in camp, and supposing each man spent 1*d.* a day, that would amount to 54*l.* only; double it, and so make the extreme average which men have to squander, and what is it among so many! And when we remember the vast variety of other shops which divide the custom with the publics, the wonder becomes still greater how all these keep their heads above water. It is true that nearly 1000 of the above number are married men, but this will not help the matter much, nor yet the civilians who are attached to the Camp. And so we come to the inevitable conclusion that, considering the principal inhabitants are fed and clothed by Government contracts, trade must be to many of the shops in a poor condition, and that some of the buildings which we see running up on all sides may prove anything but remunerative speculations. Moreover, it is an astonishing thing to consider how, on a penny or twopence a day, so many soldiers contrive to get drunk, or at least well-primed, before tattoo. The secret is, that they save their pence four or five days running, and then go in for a good long drink, though happily in many cases they have not resolution to avoid the glass so long, and so keep themselves out of the defaulter's book by dribbling away their daily pence—proving the wisdom of the order which directed that soldiers should receive their pay daily, instead of monthly, or weekly, as was formerly the case. The rooms of these permanent barracks are clean, so are the tables and forms, and there is no close foul oniony smell saluting your offended nostrils on entering, proving that ventilation has been attended to—a new feature in the Service, very conducive to health and the thinning of hospitals. But the "rears" close behind are not emptied sufficiently often, and in hot weather, when the sun's rays pour down through the greenhouse sashes on top, the smell is quite insupportable. In summer, at any rate, the boxes should be cleaned twice every week at least: for, although the lime is regularly used by the Pioneers each morning, yet the good effect it produces is only transient; and it would be wiser to eradicate the cause, than to spend more in continued yet vain efforts to neutralise the evil, while the cause still remains.

Passing along at the back of the barracks, we cross the flat on which the new gymnasium has been erected, and which, we hope, will prove a popular amusement during the coming winter. The ground here is in a sad mess, and no doubt is reserved for improvement under future estimates, when drains, perhaps gardens, and railings, and shrubs round the officers' quarters, with turf and gravel paths, will give a very different appearance to the place—a civilised and home-like and less barracky look. There is a great deal yet to be done, but, judging from the facts before us, the future has a cheerful prospect. Little mistakes there are, but none which do not admit of easy rectification, always excepting that one of the size of the blocks, which were built for 1400 men—too large for one regiment, too small for two; and this can only be adjusted to the present standard of regiments by increasing the buildings.

VENETIA.—No. II.

[From a Correspondent.]

(*In continuation of article in* Army and Navy Gazette, *Dec.* 1, 1860.)

In my letter of December 1st, I endeavoured to show that the retention of the Venetian Quadrilateral by Austria was a measure imperiously required by her own safety, and the safety of Europe. If it were necessary to add anything more to the argument there developed, it would be enough to state that since that letter was written, I have become acquainted with the report on Venetia of the distinguished engineer, Marshal Niell, and that he has arrived at identically the same conclusion with myself. At the end of the Italian war, in 1859, he was charged by the French Emperor with the duty of investigating this great problem. After a very careful examination on the spot, he reported that the Quadrilateral was the glacis of the line of the Alps; that its possession both furnished the means of an easy attack on South Germany and Austria, and gave the command of both shores of the Adriatic, the Dalmatian as well as the Italian; that thus the Adriatic and Trieste would pass under the dominion of the masters of the Quadrilateral, cutting off Germany from the sea and that vast maritime trade which is the life-blood of the 19th and probably all future centuries; and then, as a sagacious soldier and a man of sense, he pronounced the conviction that a power of the first order, like Austria, could not stoop to the ignominy and the loss of selling Venetia.

Fas et ab hoste doceri. Marshal Niell studied Venetia and its bearings towards Austria and the Adriatic with an aggressive eye. A report from such a man is worth, for the purposes of this argument, a hundred from Austrian generals, or British ones either. If Austria sells the Quadrilateral, she must expect to be told, with a slight alteration in the words of the poet who was so emphatically a man of the world, *Prudens vendidisti.*

I have hitherto argued this great question from a German point of view; let us consider what its aspects are when seen with an English eye.

The one paramount necessity, the one central principle, of the foreign policy of England, is to provide a counterpoise to France; so it was in the days of Louis XIV., so it continued to be through the 18th and 19th centuries, and so it is pre-eminently in our day. "Aggression, aggrandisement, and war," are the terrible attributes which Mr. Horsman assigned to the government of France. Each succeeding day that passes over our heads bears witness to the profound truth of the denunciation. The long-sustained rivalry between England and France means, to a Frenchman's mind, the death-struggle for the dominion of the world. This feeling is never absent from a Frenchman's breast. The steady but gigantic progress of the commercial and colonial greatness of England keeps alive in the heart of France the consciousness that she is growing relatively weaker than her rival, and perpetually goads her to restore the balance by territorial aggrandisement in Europe. The character of her political institutions, which refuse a field to energy and talent in every other profession than arms, and the peculiar necessities of the Imperial government, combine to swell this irrepressible lust of conquest. Two years have not yet elapsed since the French legions crossed the Alps to found a French dynasty in Italy, or to establish an Italian confederation, which would render Italy a perpetual beggar for French aid. The little black cloud has risen on the horizon of Syria. The echo of the solemn words still resounds in our ears, with which Lord Palmerston, at the close of the session, stigmatised before all Europe the trickery and the falsehood by which France had accomplished the annexation of Savoy and Nice, and warned every state in Europe to take precautions. The glow of shame at the fraud by which we were duped is still burning in our faces. The deep-seated distrust created by this act of French ambition has called forth some 200,000 armed men, as though by the stamp of a god: it has filled our naval arsenals, burdened our finances, and will soon make our coasts bristle with fortifications. Who, that sees these things, can doubt the reality of this tremendous necessity, and the practical and terrible nature of the danger? To dam up this ever-threatening torrent of invasion: to restrain within the limits of moderation and peace a power armed with such might, and animated by such ambition: and to provide a counterpoise which shall prevent it from swallowing up the Continent, in order to burst with greater strength and fury on our own shores, is, and must be, the very soul of the foreign policy of England.

Austria alone, I fearlessly assert, can form such a counterpoise. Russia is conservative only of absolute government: she is the lion expectant of half Europe. Germany is a bundle of loose sticks. Prussia is weak from her divided territory, her conflicting religions, her inferior numbers, and the distrust which her historical and unquenched thirst for German territory inspires. Spain, Belgium, Switzerland, Holland are in the front of the peril, the first mouthfuls to be swallowed: they need protection, they cannot give it. Italy—who will commit himself to describe it, at the present hour? A mass of hopes and fears, and nothing more, as yet: it furnishes no materials for the statesman. Austria alone is the bulwark of continental order, the key-stone of the arch of continental stability. Austria alone, of the Great Powers, has a permanently identical interest with England—the abiding preservation of peace. The greatness and prosperity of England place peace in the foremost rank of all her objects of desire: and peace, and peace alone, is the one vital condition of Austrian welfare. Her geographical position, interposed as a buffer between the rival prowlers for prey, her compact territory, her grand and ancient history, the patriotism, the strong national feeling, the non-aggressive but stubborn and enduring courage of her people, their numbers, their vast military resources, the indomitable spirit which has ultimately triumphed in so many wars,—all these characteristics mark out Austria as the sole power permanently capable of checking and controlling French ambition on the Continent. Let Austria be broken up, and France and Russia will speedily, as Napoleon prophesied, divide continental Europe between them as their spoil. The kingdom of United Italy, for which so much enthusiasm is felt, will then not be worth ten years' purchase, Quadrilateral and all. The independence of Switzerland will then be reckoned among the things that are past. The whole of Europe will go into the crucible: disquiet, danger, and dissolution will be brought home to almost every State in Europe: and a century of wars will be the fatal harvest that will certainly be reaped. Is this, can this be, for the interest and advantage of England? Will it facilitate her trade, confirm her tranquillity, and diminish the burden of her armaments?

But, Austria is past praying for, it is contemptuously replied. She is on the eve of internal dissolution: no political combination can be safely raised on so crumbling a foundation. The man who can utter or listen to such shallow talk must know nothing of history, and is unworthy to be called a politician. Austria is passing through a severe internal crisis: but she is not the first country which has had to endure such a trial, or that is likely to emerge from it with increased vigour and power. The birth of abiding free institutions is not exempt from the natural pains of parturition. England was devastated by a civil war which shook society to its foundations: at its close her voice made the Pope tremble in the Vatican, and—which our boasted might could not do this year—imperiously commanded obedience in the valleys of Savoy. Charles II. became the hireling of France, and his brother lowered England to the lowest station in Europe: a short struggle, and she wielded a power whose leading all Europe followed, and which caused the days of the Great King to set in gloom and disaster. France seemed to the shallow observer on the verge of extinction under the blows of the coalesced powers of Europe: she repelled the invasion that insulted and would have annihilated her; and then trampled the whole continent under her feet. The internal crises of a great people, when they proceed from a struggle to win freedom, are but the throes of nascent strength and greatness. The loss is instantaneously repaired. Austria, reconciled within herself on the basis of liberty, —however difficult for a while the task may be,—will be one of the most youthful nations of the world.

But now is the hour of her trial, both within and without; and it behoves England to be most watchful that advantage be not taken of her momentary difficulties to inflict on her a blow which may permanently weaken her. In my former letter I showed that the Quadrilateral was essential to Austria's military safety; the considerations I now urge establish, I think, that the interest of England is deeply engaged in preventing that safety from being jeoparded. If the real fact of the case were, that by the loss of the Quadrilateral the safety of one of the two nations, of Austria or of United Italy, were seriously endangered, I cannot understand how any thinking man or sound English statesman could hesitate for one moment in subordinating to the security of Austria, which is European, the security of Italy, which is comparatively local.

But there is no need whatever for making so violent a supposition. By the loss of the Quadrilateral, Austria's position would be gravely compromised; under the altered circumstances of Italy, the Quadrilateral assumes the form of simply a strong frontier fortress of a foreign power, and does not threaten the real strength and liberty of Italy. This is a statement of great importance, and I am glad that it gives me an opportunity of expressing my feelings about Italy. United Italy is no longer a collection of little states, ruled by petty tyrants, who were shielded from responsibility by Austria, and who cruelly oppressed their subjects under the assurance that a foreign force would provide them with impunity against the indignation and revolt which their misdeeds were likely to excite. Of all forms of government this is the most iniquitous, the most mischievous, the most wicked. Providence has ordained that every excess should encounter its natural correction and punishment. The drunkard destroys his constitution; the reckless wasting of strength in youth brings a premature old age. The danger of insurrection is the provision made by nature for limiting the cruelty of rulers. But a foreign power, which does not itself govern, but enables a tyrant to do what he likes to his people, is an anomaly and a crime against the moral government of the world. This is the wicked system which Austria pursued towards Italy. If the Papal States and Naples had formed part of the Austrian empire, they would have escaped countless sufferings. This system is now at an end; the absorption of the small states and the union of all Italy have rendered it henceforth impossible. Only, in judging Austria and regulating our future feelings towards her, let us not lose our English love of fair play; let us not forget that this is precisely the system which we ourselves pursued for ages towards Ireland, and from which we reaped such bitter fruits.

Austria has no right, nor is it her interest, to be an Italian power. It is not as Italian territory that I claim the Quadrilateral for her; on the contrary, the very essence of my argument implies that Venetia shall henceforward be considered German and not Italian land. If I am met with an indignant outcry about natural limits and nationalities, I must reserve my reply for a future occasion. I will only remark now that the holders of Gibraltar, Heligoland, Malta, the Ionian Islands, New Zealand, India, and even Ireland, ought to be the last persons to talk of natural boundaries and the rights of races. The thought of these countries might teach moderation in the passionate outburst of generous sentiment. The geographical shape of Italy, and the position of the Quadrilateral at the extremity of so long a line of territory, are in themselves solid guarantees against those fortresses being used for the purposes of conquest against a united people of 22 millions, armed with a great army and a powerful navy. An Italian Quadrilateral strips Germany of the Adriatic, cuts her off from the sea, and makes her live under a perpetual menace of invasion. An Austrian Quadrilateral protects the heart of Europe, and is a lasting security for the peaceful progress of the world. As an ἐπιτείχισμα, an aggressive fortress against Italy, it would be detestable; but the character of the Austrian people, the union of Italy, the rising constitutionalism, it is to be hoped, of Austria, and, if need be, the guarantee of all the Great Powers, entirely dissipate this danger.

It remains to point out what would be the direct results to Italy, France, and Europe of the sale of the Quadrilateral; —but I have already trespassed largely enough on your indulgence in this letter. But before I conclude, allow me a few words on a form of argument with which the sale of Venetia is sometimes enforced on Austria. She is told that such a sale can alone save her from bankruptcy, internal insurrection, and a dangerous war. I answer that in all three respects she will be grievously damaged by the sale of Venetia. I have shown that the purchase-money of the sale would have to be laid out in the construction of fortifications of far inferior strength and efficiency, whilst a greatly augmented annual outlay would have to be encountered to meet the cost of maintaining 250,000 instead of 100,000 men. The popular account represents the garrisons of the Quadrilateral as occupied in coercing Venetia; and amongst others the new pamphleteer of Paris talks of the cost of their garrisons, and the feeble revenues of Venetia. Egregious and stupid nonsense. Those Austrian troops are guarding the empire at the minimum of cost and numbers, in the cheapest and best supplied localities, and with the maximum of efficiency.

As to internal insurrection, it would be impossible to devise a more stimulating encouragement to the party in Hungary which would sever that kingdom from Austria, a more direct confirmation of every doctrine which they plead, a more humiliating lowering of the feelings of national pride and honour, of the sentiment of belonging to a great country and confidence in its destinies, in those who would maintain the union of the two nations, than would be furnished by the sale of Venetia. Acts which involve disgrace or dishonour, or even defeat, are not those which give strength to governments and rally their people round them for counsel and support. If Francis Joseph sells Venetia, as it will be felt, against his own natural feeling and on compulsion, he must make up his mind to have to deal with a stronger and more disaffected Hungary, and to wield a much feebler public spirit in settling with them.

Equally so with a foreign war with Italy. The frontier line between the kingdom of Italy can be determined only by war or the fear of war. If Austria will not fight for the Quadrilateral, she will have to fight only the more surely for the Isonzo and the Adriatic. All talk about the gratitude of the Italians, their future friendly feelings towards Austria, their respect for her boundaries, is the veriest moonshine that ever bewildered mankind. The character and sentiments of the two nations, their relative chances and opportunities are so many pledges that their relative strength alone will determine the lines which separate them. By retaining the Quadrilateral, Austria is the stronger or weaker for the inevitable conflict, according as the value of the fortresses or the disaffection of the Venetians is held to be the stronger element. In any case the Italians will continue to be antagonistic and hostile, and if possible aggressive towards Austria. Francis Joseph is not likely to forget that by selling the Quadrilateral he will take the field with an army ashamed of its own rulers. A defeat from the enemy rouses the spirit of a brave army; desertion by its chiefs, as we found in Cabul, produces far other results.

It is easy to understand how an English ministry can desire to avert, by any practicable means, the outbreak of war in the spring. It is easy to comprehend their eagerness to avoid the vexatious embarrassments which must result to them from an Italian war; but it is impossible to believe for the honour of England that English statesmen, much less the depositaries of Whig traditions, can ever counsel the Emperor of Austria to tarnish the history of his country by repeating, under far less justifying circumstances, the infamy of the sale of Dunkirk. The policy which advocates the sale of Venetia is an anti-English policy.

INTELLIGENCE FROM THE SEAT OF WAR IN ITALY.

[From Our Own Correspondent.]

Naples, Dec. 22.—The past week was ushered in by a grand review of the National Guards by the king; this public inspection, at which the colours were blest and consigned to the different battalions, presented more interest to the inhabitants of this city than any other event, however great its political importance. The several battalions of the National Guards arrived at the Campo at an early hour, accompanied in their march by the more zealous of their admirers, but by far the larger portion of the spectators remained lining the streets along the published route of the royal cortége. The king repaired to the review ground in an open carriage, to the disappointment of many, who expected to see "the soldier king," as he is called, on horseback. A numerous and brilliant staff accompanied his majesty, who was further attended by the Guardia Nazionale a Cavallo. On arriving at the Campo di Marte the king mounted a splendid charger, and at once became the centre of attraction. The bands played, the Guards saluted, the banners were blest, and there remained nothing further to be done than to compliment the men and officers, and set about returning to the royal palaces. The return route lay through the Strade di Foria, Mercatello, and Toledo. These streets were densely crowded, and from the balconies, windows, whence gay tricolor banners were suspended, bouquets fell from the fairest hands in Naples. The recent demonstrations at the Teatro S. Carlo, wherein the performance was entirely interrupted by the audience continuing to demand the Inno di Garibaldi, and failing to induce the orchestra to gratify them by playing it, commencing to sing it themselves in a tumultuous manner, led to the closing of the theatre, several arrests, and in all probability to the publication of the following order of the day: "For the honour of the corps to which they belong, I recommend to the officers and soldiers of the Meridional Army to abstain from any act resembling a clamorous demonstration. Officers and soldiers, my companions in arms, now that the campaign is finished, the less occasion you give to be spoken of, the more will you be to be honoured and be honoured. Imitate Garibaldi, who betakes him to solitude, thinking of new enterprises. Signed, G. Sirtori, Lieutenant-General, Commandant of the Meridional Army." The official Gazette contains its daily supply of retirements, appointments, and decrees, and there has been a great impetus given to the discharge of public duties of late. The measures necessary for securing the popular education on a permanent and satisfactory basis have been ably decided on, and will without doubt be promptly carried out. The police force has been re-constructed; and, with the exception of one or two dismissals, and one resignation of inspectors, bids fair to be at last some safeguard to life and property, both of which are in great need of some protection. I regret to say that the page of Neapolitan history has been bottled of late by the occurrence of several assassinations, and in no one case of which have the offenders been brought to justice. A French commercial traveller was found stabbed in seven places lying in the Ciaja; the driver of the cab, the only witness in the case, declares that the unfortunate man in question was drunk, and had employed him to drive him, in company with three or four other persons; that, on reaching the spot on which he was found, one of the assassins stunned him, the driver, by a blow on the head, after which he believes they murdered his employer, but of course he cannot give any particulars of the latter event. General Dunne is slowly recovering under the treatment of Drs. Roskilly and Sims, and is pronounced out of danger, although the locale of the bullet has not as yet been discovered. Again, a man, name unknown, was found in the Villa Reale Gardens, with several incised wounds in several parts of his body, but being dead when found, no clue to the discovery of the murderers has as yet been obtained. A fourth murder, that of a young Garibaldino, whose body was found near the gate of the same gardens, makes the array of crime of this sort rather startling. It will need a strong arm, and vigorous measures to prevent the increase of crime here; and the sooner the government applies itself to that object, rather than to new excavations at Pompeii, the better. General Cialdini has published a proclamation to his troops. It relates to the last sortie of the Bourbon forces, commanded by General Bosco. He states that disorder and insubordination reign within the fortress; that the troops are demoralised, and refuse to fight. Animating his soldiers, and encouraging them to be ready, he declares that hitherto he has never had occasion to punish any for cowardice, and will greatly regret an opposite necessity, that of punishing the over-hardy and impatient, should they, in excess of zeal, exceed the orders of their leaders in advancing too close to the enemy's fire.

I am told, but cannot vouch for the accuracy of the information, that the "King of Gaeta," as the newspapers delight to call their former sovereign, has proposed three conditions of surrender: first, that all his private fortune lately confiscated by dictatorial decree be restored; secondly, that all his officers be guaranteed the grades he has conferred upon them; and thirdly, that he be recognised as King of Naples in a European Congress to be holden, &c. The first and second conditions the King Victor Emmanuel at once signified his willingness to grant, but the latter was of course declared impossible. Meanwhile the young Queen has left Gaeta, and all recent moves upon the board seem pointing towards a final struggle or a proximate surrender. The Queen Mother, Maria Teresa d'Austria, whose very name is hated in Naples, is now at Rome organising, it is said, a reaction, with the view of restoring the Bourbon dynasty—no very hopeful prospect at present. Great activity is beginning to exhibit itself in all the local departments for the discharge of public business; the finance, poor-house, and even the post-office, have begun to show new life, and not before the time, as the first was in confusion; the second was corrupt and fraudulently managed, neither sufficiently administered nor looked after in any way; whilst the third, the post-office, was a national disgrace. The transmission of letters was fair, but the receipt of them here doubtful, as the office closed at 4 p.m. daily; should the Marseilles mail not arrive at the usual early hour, the letters could not be distributed until the following day. Routine closed the office at a certain time, and the clerks leisurely put on their great coats and lighted their cigars at the approach of the time stated, without the least regard to the interests or anxieties of those who expected letters; and even in case of the mails arriving early on the day expected, there was still great delay and uncertainty, as it was customary to find letters turning up in some mysterious way for a day or two these naturally called down the justly deserved blame of the press, and will, it is to be hoped, now that the authorities have taken the matter up, be prevented for the future. The increased facilities for the transmission and receipt of letters *vid* Genoa at a rate of postage less than that by way of France, is a great boon, and promises well for other reforms. after the proper time of delivery.

The decree has been published in the official Gazette of Sicily: "Art. 1. That a commemorative medal be struck, and distributed to those who have fought for the liberation of Sicily, in the year 1860. Art. 2. This medal will be of bronze, three centimetres in diameter, and will have on one side the likeness of the king, Victor Emmanuel, and on the other the motto, *Italia e casa di Savoja—Liberazione di Sicilia*, 1860. Art. 3. This medal will be of silver for the mutilated and for the wounded. The Counsellors of the Interior, and Security, and for the Finance, each in his respective department, is charged with the execution of the present decree, which, sealed with the seal of state, will be inserted in the Acts of the Government, ordering to whom it may concern to observe it and cause it to be observed. Signed, Montezemolo la Farina. For the execution of the decree which confers the commemorative medal upon the combatants for the liberation of Sicily, a commission, composed of the following gentlemen, Principe Vignatelli, Generale Giacinto Carini, Colonello Giuseppe Poulet, Colonello Enrico Fardella, Barone Santanna, Tenente Colonello Mario Parizzolo, Casimiro Pisani-figlio, and Nesci, is charged to return a list of the combatants, noting in a particular column such as were mutilated or wounded. This medal will be given irrespective of the receipt of the former one by those who formed part of the first expedition under Garibaldi; and *à propos* of Garibaldi, the newspapers, following the lead of a private correspondence in a journal styled *Italia degl'Italiani*, announce the approaching marriage of the youthful and beautiful Teresita to the Professor Luciano Banchi, of Siena, to whom she is already affianced. General Türr is gone to Caprera to pay a visit to his former leader; their meeting will be an affectionate one, and the topics of conversation will no doubt be of great political interest, and principally connected with the campaign so confidently expected in the course of the ensuing spring. Late advices from Caprera describe the ex-Dictator as enjoying good health, and an early riser, busied all day long in agricultural pursuits. What the particulars of his plan for 1861 may be are mere matters of conjecture; and should Venice be sold, Rome and Hungary will be the centres of public interest. Meantime new regiments of the line—cavalry and artillery—are being raised with all dispatch at Genoa, where large reinforcements have been already made.

A garde mobile of men and officers chosen from the National Guards is in course of formation, with a view to their being sent to Northern Italy, in friendly exchange for a similar one expected to arrive here from Turin, Genoa, &c. And now concerning our countrymen, the British volunteers. The remainder of that corps will, as soon as a steamer arrives to convey them, return to England. Several of the officers are, I am told, to be given commissions in the Italian army. The sick and wounded are, with few exceptions, in a fair way of recovery. One poor fellow, Ross, a Scotchman, died, and was buried yesterday; another, named Wade, died this morning. The man Macarthy, who was shot through the lungs in action, is now progressing favourably, which is, humanly speaking, owing in a great measure to the unremitting kindness, not only of his medical attendant, Dr. Sims, but to the truly Samaritan goodness of an English lady, Mrs. White, who, when the sick and wounded were removed from the hospitals at Santa Maria and Caserta, kindly took this man, then the worst case, into her own house, and has since left nothing that could minister to his comfort undone. It is only justice to record that this lady has without ostentation done much towards improving the condition of the sick and wounded Englishmen. Before leaving the subject of the volunteers, I cannot help animadverting upon the thoughtlessness, to say the least of it, of people in England sending out unpaid letters, directed to the officers and men of their corps, especially to the latter, who are not overburdened with money, and who have occasionally the poor satisfaction of knowing that a letter lies for them at the post-office, to release which will require at least a day's pay, a sum which cannot always be conveniently spared. The swash-buckler gentry are, I fancy, nearly all gone from Naples; and the latest piece of news I heard connected with one of them, who figured in a leader of the Army and Navy Gazette as one of the *dramatis personæ* in the epistolary war at Naples, is that he has levanted, leaving his bill for board and lodging unpaid; thus defrauding a fellow-countrywoman, who meritoriously supports a large family in respectability by keeping an English boarding-house. I am sorry to say his example has been followed by three others, all of whom had been hospitably entertained by Madame Schiassi at the Pension Anglaise! There was a time when the fact of being an Englishman was a guarantee of common honesty—at least, it was so in Naples. Recent experiences will alter the value of the recommendation. It is to be hoped, in case of another British volunteer expedition, more care may be taken in its formation, and that it will not be possible for *soi-disant* colonels to come out here and become senior aides-de-camp on General Nobody's staff, running up bills, and departing without paying them. This morning's paper contains a proclamation from Francesco II., directed to the garrison of Gaeta, which being translated, runs as follows:—"Soldiers! Oppressed by the number, not by the valour of the enemy, after numerous combats, we find ourselves already a month in this fortress. Europe has admired your exertions during the months of September and October. She waits to behold them now continued here in this siege. The valorous garrison of Messina, remembering that which in 1848-9 strenuously defended the citadel, is disposed to do everything. It has suffered all disadvantages and privations now for the last five months, proud to defend the cause of right, and the honour of the Neapolitan banner. You have to rival a garrison of a more remote epoch; that of 1860 resisted—in this fortress, more deprived of means of defence than that which now possesses it with unequalled valour—the assaults of the bravest soldiers. History still registers these memorable deeds on her page. Now that the fortress is perfected (for defence) after many years of labour, of which you yourselves have executed part, you ought to defend it with equal glory or greater success. After so many great defences and fatigues in order to obtain that, this fortress might resist a long siege; after what the Neapolitan army has acquired in the open fields on the Volturno and the Garigliano, honour and renown, the same army will certainly know how to acquire another glory and a greater reputation by the firm defence commenced against an enemy who comes to snatch from us our ancient independence, trampling upon every principle of honesty and of religion. Your discipline will continue; officers, under-officers, soldiers, emulating each other, you will thus obtain the (favourable) recognition of your country which will admire you, and the esteem o Europe which now regards you. Francesco II."

I had nearly forgotten to mention the serious indisposition of the Naples correspondent of the *Times*, who was threatened with inflammation of the lungs, but was declared better yesterday, and will I hope in a day or two be, if not restored to health, decidedly recovering. The Marseilles mail's hour of departure being altered, I shall now post this at once, to ensure its going to-day.

THE COMMISSARIAT AND THE MILITARY TRAIN.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir, — I have been much interested in reading your Editorial remarks, as well as the recent letter in your columns on the relative positions of the Commissariat and Military Train, and as I happen to think that benefit to the Service and justice to individuals are likely to arise from discussion, I beg to offer a few observations in your columns.

I can enter into the feelings of "Koslov," when wishing his department another "try" at the transport of the Army, but we really suffered too much in the early part of the Crimean war to give it another chance; whereas the Transport Corps, when eventually commanded by officers of ability, was apparently organised and adapted for all the duties required of it, notwithstanding its being composed of raw levies, and a heterogeneous assemblage of soldiers from all branches of the Service ("mixed pickles," we used to call them), at which time the Commissariat and Military Train worked together both harmoniously and well for the public good, all requirements of the former upon the latter passing through the Quartermaster-General, who conveyed the orders and wishes of the General to both those distinct branches of the public service.

This being the case in the Crimea, how comes it that so lamentable a change occurs in China? It can only be accounted for in one way—the Quartermaster-General must have delegated his proper duty to some one less able and judicious than himself—either to the officer commanding the Military Train, who may have been wanting in courtesy to the Commissariat, or to the Commissariat, who may have been jealous of and overbearing to the Military Train. For it is preposterous to suppose that officers and men of the Military Train, who carried luggage and gravel about at Aldershot, were above carrying grub about in China.

If the Quartermaster-General has the power to delegate his authority, to whom should he give it? Surely not to an officer of the Commissariat or Military Train, either of whom might from such a position gain for his department an unfair advantage over the other, in allotting the responsibilities attending upon supplying the Army in the field with food. I fear from what the *Times* correspondent says of the Commissariat (after speaking of the Military Train) that this is precisely what has occurred in China. That the Quartermaster-General has delegated his authority to the Commissariat, and that they have ascribed their shortcomings to the Military Train. It would be well to ascertain who purchased the bullocks and transport animals? who hired the natives? and whether both were adapted to the service? As, unless they were so, the expecting the Military Train to conduct the provisions of the army in a satisfactory manner would be as unjust as requiring the Israelites to make bricks without straw.

One of your correspondents reminds you that the Commissariat is now open to lieutenants of the Line, and therefore thinks that any Commissariat officer can with propriety command a field officer; this being the age of advancement, we might as well expect an Ordnance clerk, with the relative rank of captain, to assume command of a portion of the Royal Artillery, except that those gentlemen have more sense than to put forward such pretensions.

I have my respect for the Commissariat in their proper sphere, and the Military Train in their proper place; and as I have asked for so much of your space I will not enter upon the organisation of the latter body—suffice it to say, that a distinguished officer is now at the head of that branch of the Service, who, judging from his many and various services, and the ability he has displayed at Aldershot, will soon put the corps on a proper footing. I may, however, say that I am one of the many who think the Commissariat and Military Train and the civil branches of the Service should have one responsible head, unconnected with either, who should allot, direct, and apportion their several duties and demands on each other—in fact a "Chief of the Staff" for the civil as well as military branches of the Service.—I am, &c., Attaché.

P.S.—I remark some people are gliding into an error, calling the Military Train "belaced dragoons." The fact is, their dress is the plainest in the Service, similar to the Royal Artillery, but with white facings, and without lace on the men's cuffs.

Lord Clyde.—General Lord Clyde, G.C.B., has lately been on a visit to Chatham garrison, during which he was the guest of Major-General Eyre, commanding the forces in the district. Although the visit of his Lordship was a strictly private one, great interest was manifested by the troops who served under him in India at the fact of the distinguished officer being in the garrison, and hopes were entertained that he would appear at a parade of the troops. His Lordship, however, did not appear in public during his visit, and left the garrison on Wednesday.

THE HORSE AND HIS RIDER.*

When the gentleman with whom so many of us have journeyed across the Pampas, and over the Andes, and steamed along the North-Western Railway on the tender of an engine, issues an invitation to his old friends to join him in a gallop with the Pytchley over the brooks, and posts, and rails of the "shires," and about the Surrey hills, it is not likely that he will meet with many refusals. For our own parts we were ready enough to don our pink and tops and accompany him; but we must confess the sport has not been as good as we had anticipated. In short, we have been disappointed with "The Horse and his Rider." We wonder at a Leicestershire steed with a Leicestershire rider on his back, being so "slow at his fences." We had expected that so experienced a "workman" as Sir Francis Head would have known all the short cuts, and his equestrian fame justified us at least in expecting that he would "take a line of his own," and "go straight."

We are quite sure that it is not the author's custom to take as much out of his horse as he has out of his Pegasus upon this occasion, or he would seldom occupy the position at the end of a Leicestershire run that he is in the habit of doing; and we need scarcely remind him that he has not earned his reputation as a "first-flight man" by "larking" over all the little fences by the roadside on the way to cover, or by making unnecessary detours during the run. We only regret that while composing the volume before us he did not sufficiently bear these facts in mind; had he done so, had he but written as he rides, we should have had to wade through but half the present number of pages, and should have been spared a great deal of irrelevant matter, and a continual tiresome straining after fun, to say nothing of some moral reflections which, in a work on horsemanship, we could very well have dispensed with.

Again, most of us who care for the subject, are pretty well acquainted with Mr. Assheton Smith—thanks to Sir J. Eardley Wilmot's pleasant "Reminiscences,"—and we cannot understand on what plea Sir Francis Head thinks it necessary to inflict upon us a précis of that work, thereby laying himself open to a serious charge of "bookmaking." We are afraid that it will hardly be considered a compliment to the author of a book containing 226 pages, to say that it is not until we come to the 195th page that we are able to bestow upon it that praise which when we first took the volume into our hands we were anxious to award. Although the earlier pages of the work contain some useful hints on riding and general horse management, they can hardly be said to add very materially to our stock of information on these subjects. It is, perhaps, satisfactory to have Sir Francis Head's authority, in addition to that of Mr. Assheton Smith, for riding slowly at timber and fast at water; it may be useful to be able to confute triumphantly the various arguments against clipping and singeing, in case, which is scarcely probable now-a-days, we should meet any one with ignorant and antiquated notions on the subject; and we are always glad to find a keen and experienced sportsman bearing testimony to the beneficial results of kind treatment towards a horse, even though we believe the doctrine to be almost universally assented to, and scarcely to need advocates. Young sportsmen, however, may peruse these pages with interest and profit. The advice which they contain is that of a gentleman whose intimate acquaintance with his subject entitles him to speak authoritatively; and if the tyro finds in them but little to learn, or which he may not gather from works perhaps already in his library, he may be glad to have it in his power to quote Sir Francis Head's testimony in favour of the Fitzwilliam girth, and Mr. Turner's system of "half-nailing," and it will give him the more confidence in plain-flap saddles and flannel shirts for hunting, to find that the author of "The Horse and his Rider" makes use of them too. Some of the anecdotes also in this portion of the book are both interesting and appropriate. The best is the one about Colonel Moore, which is really so extraordinary, but at the same time so well authenticated by a letter from Colonel Moore himself to the author, and by other evidence, that we cannot refrain from quoting it. In his letter Colonel Moore says:—"In June, 1848, at the island of Dominica, in the West Indies, I fell over a precipice of 237 feet perpendicular height, upon the rocks by the sea-side. This occurred at a quarter-past seven o'clock, p.m., then quite dark, as no twilight exists in the tropics. Every bone of my horse was broken, and I conceive my escape from instant death the most miraculous that ever occurred. . . . . My recovery from the shock I sustained was also as miraculous as my escape with life. I sent out an artist to take a drawing of the spot, and also had the place surveyed by an engineer. . . ." It appears that Colonel Moore was returning from dinner, and had some difficulty with his horse, which shied and started at numerous objects on the road. "At last he came to one which he seemed to be particularly afraid of." The colonel, thinking it caprice on the horse's part, rode him at it several times at full speed; each time the animal refused, until, at last, it cleared, with a violent bound, "the little, low hedge, for such it proved to be, bounding that awful precipice, which, like a wall, connected the upper story, or table-land of the island, with the ocean, which in solemn darkness reigned beneath it." The horse and man came to the bottom, after a flight through the air, during which every event of his past life flashed through Colonel Moore's mind, with "a concussion, which, depriving the rider of his senses, left him with his legs in the sea and his body on the rocks, apparently dead." We should have been better pleased i at this point of the story, Sir Francis Head had trusted to his readers to supply their own reflections, and had not introduced a page of very excellent second-hand morality.

Colonel Moore discovered that he was severely cut about the body and head, that his right ankle was dislocated, and his back benumbed or paralysed by the concussion of the fall. At last the sun rose, and two hours afterwards a boat full of natives rowed up, but seeing the strange figure with its head swathed in a cotton handkerchief, the two ends of which, stained with blood, stuck up like red horns, they imagined he was a devil and rowed off precipitately. His appearance had the same effect upon a fisherman who soon afterwards approached the spot, and Colonel Moore was too weak to shout. At last he was dicovered by his servant and conveyed home, where, "in due time the paralysed muscles of his back recovered their tone, and eventually without even being lame, he became completely restored to the health, activity, and energy, that had always characterised him" (pp. 45-50).

We now come to that portion of the book which has afforded us at once most pleasure and instruction. Pegasus has settled down to his stride by this time, and his rider has left off "larking;" and the chapters on "Military horse power," and "How to hobble and anchor horses," are consequently free from most of the blemishes which disfigure the earlier portions of the book. They contain, too, some valuable suggestions, principally the results of the experience acquired by the author during his travels.

He wishes to see introduced into our Service "less harness," not the lasso, or, more properly, breast harness, at present used by our horse artillery detachments, and by a proportion (ten men per troop) of our cavalry, but the more simple and generally useful contrivance in vogue in the South American prairie of a surcingle and a single trace, which, in addition to "its efficiency for all the requirements of either peace or war," has the advantage that "any description of horse, tame, or wild, uses it without noticing it; for if the single trace which passes immediately beneath the hip-bone happens, which it ought not, to press against his side, by shrinking from it only an inch, it instantly ceases to touch him; and as there then remains nothing to confine, tickle, or alarm him, he refrains from kicking, simply because there is nothing to kick at, and from quarrelling, because he can see nothing in the world to quarrel with." The Royal Engineer Train have demonstrated by public experiments in this country, that with this simple equipment, which would injure neither the efficiency nor the appearance of the cavalry, any number of horses, whether accustomed to draught or not, are capable of being at once harnessed to any description of carriage, not only in front to draw it forward, but in rear to hold it back, or even sideways to prevent its oversetting; in short that it is a power which can be made to radiate in any direction; and as its character stands upon a much firmer foundation—as it is *bonâ fide* the common mode of draught in South America—in constant use for all military and civil purposes—a practical invention which, under all circumstances, has been always found to answer, it is evident to demonstration: 1st, that if it can transport artillery, &c., across the lofty, vast, and rugged features of uncultivated America, it would surely be serviceable on the roads and bridges of civilised countries. 2ndly, that if it can be adapted to unbroken horses, it cannot be inapplicable to the trained horses of our cavalry. And, 3rdly, that as both the surcingle and trace are made, in America, of nothing but the skins of bullocks, we should on active service be able in all countries at least to obtain the material, and generally many others.

If this method of draught prove on further trial to answer Sir Francis Head's expectations, he will have rendered a good service in bringing it to the notice of the authorities, and we shall be glad to see it introduced into our Service. Another suggestion, not less valuable and novel, which the author makes, is the employment of hobbles, like those in Chili and Peru, for our cavalry horse. These hobbles weigh but two ounces, and fasten at each end with a little button round the fore fetlocks, and the horse soon acquires the habit of standing perfectly still when he has them on. This also has been demonstrated by the Engineer Train, and at Aldershot, says the author, "any one may see six or eight horses hobbled at intervals of about 30 feet asunder, standing motionless, while the riders of the rest of the troop to which they belong, with drawn sabres flashing in the sun, are galloping through them backwards and forwards." This plan appears, from Sir F. Head's account, to be so simple and so perfectly successful, that we recommend it to the notice of the different mounted rifle corps, for which service it appears to us to be peculiarly well adapted. It is not necessary to expatiate upon its advantages, which will be self-evident.

* *The Horse and his Rider.* By Sir Francis B. Head, Bart. (London; Murray, 1860.)

Obituary.

THE LATE COLONEL HUGH OWEN.—This gallant officer died on the 17th inst., at the age of 76. Few men saw more service during the French war, and none can boast a more meritorious career. Colonel Owen began his professional life in the Shropshire Volunteers, of which he was gazetted captain in 1803. Recommended by his patron, Field-Marshal Viscount Combermere, he was appointed cornet in the 16th Light Dragoons in 1806, and embarked for Portugal in 1809 with his regiment, and the 14th Light Dragoons, under the command of Lord Combermere. During the early campaigns he was always nominated as the outpost and skirmishing officer in the cavalry affairs of Albergaria, Greijo, and Oporto, as far as Salamonde. At the battle of Talavera he commanded the united skirmishers of the 14th, 16th, and 23rd Light Dragoons, and the 1st German Hussars. In 1810 he was gazetted captain of cavalry, under Marshal Beresford, and was acting aide-de-camp to the Hon. Sir Henry Fane, commanding the rear-guard of General Hill's division on the retreat to the lines of Torres Vedras. He was afterwards brigade-major to Sir Loftus Otway, commanding the 1st, 7th, 4th, and 10th regiments of Portuguese cavalry, when occupying the lines of Torres Vedras; and subsequently brigade-major and aide-de-camp to Sir Benjamin D'Urban, commanding a brigade of the 1st, 11th, 12th, and 6th regiments of Portuguese cavalry. In 1813, at the battle of Vittoria, as he was leading the brigade into action during the temporary absence of the general, who had been sent to reconnoitre the enemy, his name was written down by Lord Wellington, who next morning ordered him to memorialise for a troop in the 18th Hussars, to which he was gazetted, and consequently promoted to a majority in the Portuguese cavalry. In 1815 Major Owen was promoted to the rank of lieutenant-colonel, with orders to organise and discipline the 6th Regiment, which he rendered so efficient that it became famous in the civil wars for its moral character, as well as for its superiority in the field, under the title of "Os Dragoens de Chaves." In 1820 he accompanied Lord Beresford to Rio Janeiro, and was sent home with despatches in August, as brevet-colonel to the 4th Regiment of Cavalry. On his arrival at Lisbon, finding the King's Government had been superseded, and that Lord Beresford and all British officers had been summarily dismissed by a self-constituted constitutional Government, Colonel Owen retired into private life. During the subsequent civil wars Colonel Owen was offered by Don Pedro the rank of general officer or an appointment as personal aide-de-camp; but, not having permission to accept from his own Sovereign, he declined these honours. Colonel Owen received the nomination of Knight Commander of the Order d'Aviz, Knight of the Tower and Sword, the Gold Cross for Peninsular campaigns, the silver medal with four clasps for Talavera, Albuera, Vittoria, Pyrenees, and three Spanish medals.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

ALLEN—December 4, near Quebec, Lower Canada, the wife (née Weedon) of Lieutenant D. F. Allen, Instructor of Musketry, 17th Foot, of a son.

BABBAGE—October 18, at Murree, Punjaub, the wife of Captain H. P. Babbage, Assistant-Commissioner, of a daughter.

DOUGLAS—December 20, at Villa D'Este, Ryde, Isle of Wight, the wife of Lieutenant George Douglas, of a daughter.

FINCH—November 12, at Ahmednuggur, the wife of Captain Alex. U. H. Finch, Bombay Engineers, of a daughter.

HARRIS—December 20, at Villa D'Este, Ryde, Isle of Wight, the wife of Lieutenant George Douglas Harris, 19th Regiment, of a daughter.

HUGHES—November 22, at Peshawur, the wife of Lieut.-Colonel W. T. Hughes, of a daughter.

SWINBURNE—December 17, at Chettle, Dorset, the wife of Captain Swinburne, 2nd Battalion 18th (Royal Irish) Regiment, of a son.

WILSON—December 20, at 1, Crescent Place, Plymouth, the wife of Lieutenant J. E. M. Wilson, R.N., of a daughter.

MARRIAGES.

DEWAR—DE STEIGER—November 15, at Benares, by the Rev. G. J. Palmer, James W. Dewar, Major in H.M.'s 77th Regiment, second son of the late Sir James Dewar, Chief Justice of Bombay, to Anne Maria Charlotte, only daughter of the late Baron Alexander De Steiger, of Berne, Switzerland.

LEES—MCTAGGART—November 1, at Ootacamund, East Indies, H. J. Lees, Esq., 60th Rifles, eldest son of Sir J. Lees, Bart., to Charlotte, daughter of the late W. McTaggart, Esq.

ROBERTSON—STOCKDALE—December 18, at Milton, near Lymington, Hants, by the Rev. P. Somerville, incumbent, and brother-in-law of the bride, assisted by the Rev. L. Campbell, vicar of Milford, Major-General Wm. Donald Robertson, of H.M.'s Indian Army, to Elizabeth, third daughter of Captain Stockdale, R.N.

WALTERS—PARKER—November 13, at Laudour, Himalayahs, by the Rev. J. B. D'Aguilar, the Rev. Melmoth D. C. Walters, M.A., H.M.'s Indian Service, to Henrietta Anne Anburey, daughter of the late Major Neville Anburey Parker, Bengal Army.

VESEY—GRACE—December 20, at St. Marylebone Church, by the Rev. Sir Henry Thompson, Bart., assisted by the Rev. William H. Hoare, Captain Charles Vesey, R.N., son of the late Hon. and Rev. Arthur Vesey, to Harriet Alice Sheffield Grace, eldest daughter of the late Sheffield Grace, Esq., K.H., of Knole, in the county of Sussex, and grand-daughter of the late Lieut.-General Sir John Hamilton, Bart., G.C.T.S.

VON STURMER—REED—July 3, at Auckland, New Zealand, at the residence of the bride's father, by the Rev. D. Bruce, M.A., Spencer William Von Stürmer, Esq., fourth son of the Rev. Fredk. Stürmer, rector of Heapham, Lincolnshire, to Sarah Kaoni Reed, youngest daughter of Captain Reed, R.N.

DEATHS.

CARBERY—September 24, at Corosal, Honduras, after an illness of nine days, from yellow fever, William Declan Carbery, Assistant-Surgeon 3rd West India Regiment, third son of William Carbery, Esq., J.P., Green Park, county Cork, aged 25.

CHAMBERS—December 19, at "The Cottage," Benham, near Newbury, Berks, Commander Ennis Chambers, R.N., aged 34.

DALHOUSIE—December 19, at Dalhousie Castle, Midlothian, the Most Noble the Marquis of Dalhousie, K.T.

DALRYMPLE—December 18, at Clifton, Agnes Maria, daughter of the late Colonel William Dalrymple, of Fordel, N.B, aged 75.

DALSTON—December 19, at Swiss Cottage, Southsea, Hants, Esther Britain Dalston, widow of the late Brevet-Major Fletcher Dalston, Bengal Army, aged 76.

DENNE—September 13, at Christchurch, New Zealand, Thomas Planta Denne, late of H.M.'s 55th and 10th Regiments, eldest son of David Denne, Esq., of Lydd, Kent, aged 31.

FORBES—November 20, at Secunderabad, India, Charlotte, the beloved wife of Captain George Forbes, 5th Madras Light Cavalry, and youngest daughter of William Thomas Brande, Esq., of H.M.'s Mint.

HARVEY—December 17, at the residence of his father, Stamshaw Terrace, Portsea, Mr. John N. Harvey, Assistant Paymaster R.N., aged 24.

MOORE—At the Rectory, Wimborne St. Giles's, Dorset, Robert, eldest son of the Rev. Robert Moore, Captain in H.M.'s 5th Fusiliers, aged 25.

SHIPWRECKED MARINERS' SOCIETY, supported entirely by voluntary contributions.
Patrons—The Queen and H. R. H. the Prince Consort.
President—The Duke of Marlborough.
Chairman of Committee—Adm. Sir Henry Hope, K.C.B.
An earnest APPEAL is made to the public for aid to clothe and send home our destitute shipwrecked seamen, cast or landed on the coast, and to give temporary relief to the widows and orphans of those who perish. 4,666 of the former have been sent to their homes, and 3,179 of the latter have partaken of the Society's bounty since the 1st of January last. The pressure on the funds has been so great that £1,000 stock has been sold, with little hope of being able to meet the distress from the storms and tempests of the coming winter if not liberally helped. James i., 27; Job xxix., 12, 13.
Donations and subscriptions thankfully received at Messrs. WILLIAMS, DRACON, & Co.'s; by the Collector, Mr. A. F. STRETTELL; and by the undersigned,
FRANCIS LEAN, Secretary.
Office, Hibernia Chambers, London Bridge, S.E., November, 1860.

THE SOLDIERS' DAUGHTERS' HOME, HAMPSTEAD, N.W. Founded May 8th, 1855. The only asylum in the kingdom for the daughters of soldiers of the whole British Army, whether English, Scotch, or Irish. This is the only asylum open to the soldier's daughter, whether orphan or not, without limitation to any particular war, or restriction as to infancy on admission.
Under the Patronage of Her Most Gracious Majesty the Queen; H.R.H. the Prince Consort; H.R.H. the Prince of Wales; General H.R.H. the Duke of Cambridge, Commander in Chief, K.G.; and a large Committee of Noblemen, Members of Parliament, General and other Officers, Chaplains of the Army, Clergymen, and influential Laymen.
There is no government asylum for the female children (whether orphans or not) of the whole British Army; they are excluded from the Royal Military Asylums at Chelsea and Dublin. The Soldiers' Daughters' Home receives no pecuniary support whatever from the Government or from the Patriotic Fund, and is entirely dependent upon voluntary subscriptions. Funds are very much needed to complete the number of inmates to 200; 170 are now in the Home; in addition to which 110 girls have been admitted and provided for satisfactorily since the foundation of the Home. Chairman of the Committee, Major the Hon. H. L. Powys, late 60th Royal Rifles.
Subscriptions thankfully received by the Treasurer, Sir John Kirkland, No. 17, Whitehall Place, S.W.; by the Bankers, London and Westminster Bank, St. James's Square, S.W.; and Messrs. Masterman, Nicholas Lane, City, E.C.; at the Home, Hampstead, N.W.; and at the Office, No. 7, Whitehall, London, S.W. Post-office Orders should be made payable to Mr. John Marsh, Secretary, upon the Charing Cross Post-office, S.W.

COMMANDING OFFICERS, and COMMITTEES OF VOLUNTEER CORPS, in reply to their numerous Letters, are respectfully informed that samples of the "LACERNA" (a patented Infantry Cloak Coat), are now being exhibited at 114, 116, 118, and 120, Regent Street, London, W., and may, within a few days' notice of their wish to that effect, be also seen at Messrs. Nicoll's local Agents, established in every principal town in Great Britain or the colonies; it is moderate in price, considering the excellence of the material, and is well adapted for use when Volunteers are not in Uniform; but in a Military point of view it is by the *Times* and other public journals thus referred to:—
"An Infantry Cloak Coat, the patented design of the Messrs. Nicoll, has recently been inspected by the Military authorities, by the desire of the Secretary of State for War, with a view to adapt it to the Regiments of the Line and the Volunteer Rifle Corps. Its advantages consist in increased protection against cold and wet by a cape being pierced for the soldier's arms, to the movement of which, unlike other garments with capes, free play is given, while such arrangement prevents the cape getting in the wearer's way in gusts of wind. The whole of the stock of the rifle, when carried horizontally, and the cartridge-box, are protected by the cape from wet; the latter, if necessary, may be lined with a waterproof substance, without the ill effects of restrained perspiration, as it is almost detached from the person. But the hood, perhaps, is the most novel feature, as when not covering the shako it is within the cloak out of sight, and thus forms a pad for the knapsack. It is, however, to be feared that, inasmuch as this most desirable garment takes about a yard and a half of material above the officially-prescribed quantity of cloth, it will be almost exclusively confined to the members of Volunteer Corps and the Officers of the Regular Line, the Privates of the latter being excluded from its use."

A WEEK'S OUTFIT OBTAINED IN FIVE MINUTES, for Five pounds, consisting of a Black Portmanteau, Strapped, Patent Locked, and adapted to go under the seats in Railway Carriages; containing: Two Shirts, Three Collars, Three pairs of Socks, One pair of Drawers, One Flannel Waistcoat, with a Dressing-case holding a Razor, Shaving, Nail, and Tooth Brushes; "Bradshaw's Railway Guide," and a Railway Rug; the latter to act also as a waterproof cloak for shoulders, it being shaped with collar, pockets, &c. All these are articles of excellent quality, and fit for permanent use, and included in the above price.
H. J. & D. NICOLL, 114, REGENT STREET, W.

CHRISTMAS AND NEW YEAR'S GIFTS. —What can be more acceptable than something both useful and ornamental; and WHAT MORE USEFUL AND ORNAMENTAL than the garments made by
E. MOSES AND SON,
MERCHANT TAILORS, WOOLLEN DRAPERS, HATTERS, HOSIERS, BOOT AND SHOE MAKERS, AND GENERAL OUTFITTERS.

EXTRACTS FROM THE PRESS REFERRING to the NEW BRANCH ESTABLISHMENT of E. MOSES & SON, at the CORNER of TOTTENHAM COURT ROAD and EUSTON ROAD.
"Upon each floor, there are small apartments called the 'trying-on rooms,' affording customers an opportunity of avoiding the guess-work which has hitherto prevailed in ready-made emporiums, and everywhere immense mirrors are placed in which the buyer may satisfy himself with the fit and shape of the garment which he proposes to purchase."—*Standard.*
"On the whole, the new establishment of Messrs. E. Moses & Son is decidedly the most complete of its class in the Metropolis."—*Morning Herald.*
"The whole exterior of the building presents a noble aspect. It combines an appearance of lightness and solidity, grace and strength."—*Illustrated News of the World.*
"The interior arrangements are in a corresponding scale of elegance, whilst convenience and comfort have not been lost sight of. . . . . Nothing, in fact, that goes to constitute the completeness of an organised whole can be said to have been omitted."—*Daily News.*
"Like skilful logicians, they laid down the solid premises of their trade syllogism in the Minories; they next constructed their middle term in Oxford Street; and they have just now brought out their conclusion to Tottenham Court Road."—*Express.*

TEETH.—MR. ESKELL'S INVENTION.—On the 17th July, 1860, Mr. ESKELL, Surgeon Dentist, 8, Grosvenor Street, W., obtained HER MAJESTY'S ROYAL LETTERS PATENT for an improved method of fixing ARTIFICIAL TEETH to the GUMS on MOVEABLE BASES, without plates, wires, springs, or any fastening, which may be thus briefly described.

The teeth are perfectly FITTED from first to last in TWO HOURS, without pain or extraction of stumps, by means of a Moveable Base, which is placed within the tube, and applied to the gums, on which it takes a most accurate and minute impression, and adheres with such tenacity by suction, that the teeth become quite immovable, except at the pleasure of the wearer. When any of the natural teeth fall out, by substituting a new base, which can be applied without the aid of a dentist, the Artificial Teeth are always useful, and last a lifetime.

Mr. Eskell's Patent, of which he is the sole inventor, can only be procured at his residence, where specimens may be seen and every information obtained. Decayed teeth stopped. Loose teeth fastened. All consultations free. Terms strictly moderate.—8, Grosvenor Street, Grosvenor Square, London, W.; 33, Old Steine, Brighton; and 39, Bennett's Hill, Birmingham.

DR. BUCHAN'S PATENT SUGAR-COATED VEGETABLE PILLS, VEGETABLE SKIN OINTMENT, and CONCENTRATED VEGETABLE ESSENCE, for Purifying the Blood, Regulating the Bowels, and Removing Vitiated Humours, Bilious and Liver Complaints, Rheumatism, Gout, Corbutic Affections, Costiveness, Skin Eruptions, Deep-seated Ulcers, and all Diseases of the Nervous System, from whatever cause, &c., affording at once a new lease of life to the sickly and aged of both sexes, also giving a beautiful and clear complexion. Proved by the sworn testimonies made before the Lord Mayor of London and sitting Magistrates. Sold by Buchan & Co., Patentees, 22, Newman St., Oxford St., London, W., and all chemists in town and country. Prices:—Pills, per box, 1s. 1½d., 2s. 9d., and 11s.; Ointment, per pot, 1s. 1½d., and 2s. 9d.; Essence, per bottle, 4s. 6d., 11s., or bottle containing four times that quantity, 33s. Agents:—Barclay, 75, Farringdon Street, E.C.; J. Sanger, 150, Oxford Street, W.; Hannay, 63, Oxford Street, W.; Butler, 4, Cheapside, E.C.; Hooper, 43, King William Street, London Bridge, E.C.; R. Howden, 78, Gracechurch Street, E.C.; Prout, 229, Strand, W.C.; &c. &c.

Gratis, or post free for one stamp, of all Agents, and 7, Newman Street, W., Dr. Buchan's Work, entitled, BUCHAN'S DOMESTIC MEDICINES, containing instructions for the cure of every ailment incidental to man, woman, or child.

A Physician and Member of the Royal College of Surgeons, England (Registered under the New Medical Act), attends daily to give advice, without fee, to those purchasing Buchan's Medicines.

DINNEFORD'S PURE FLUID MAGNESIA

has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for ACIDITIES, HEARTBURN, HEADACHE, GOUT, AND INDIGESTION.

As a MILD APERIENT, it is admirably adapted for DELICATE FEMALES, *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the

ACIDULATED LEMON SYRUP,

it forms an *Effervescing Aperient Draught*, which is highly agreeable and efficacious.

PREPARED BY DINNEFORD & CO., DISPENSING CHEMISTS, and General Agents for the *Improved Horse Hair Gloves and Belts*),

172, NEW BOND STREET, LONDON, W.,

And Sold by all respectable Chemists throughout the Empire.

DAVARESSE'S PATENT FLEXIBLE CAPSULES, by which all nauseous Balsamic Medicines may be taken without inconvenience. These Capsules are made of animal membrane of slow solubility, thus obviating the usual nausea and unpleasant reactations which follow the use of those made with gelatine. From numerous medical testimonials, EVANS & PESCHER, the Patentees, need only select the following by William Acton, Esq., see page 96 of his celebrated Treatise:—"In many instances I have known a gelatine capsule burst in the effort of swallowing, dissolve as soon as it is in the stomach; an improvement has latterly been introduced by Messrs. Evans & Pescher, by enclosing the medicine in membrane, thus obviating the objection to all gelatine capsules." The membranous Capsules may be obtained of all chemists, and in town and country.

RUPTURES. — HUXLEY'S IMPROVED PATENT MOC-MAIN TRUSS dispenses entirely with the lever spring. A flexible band, perfectly imperceptible, encircles the body (in lieu of the old steel spring), and an elastic pad secures the hernia. Measure required—circumference two inches below the hips. Price single, 12s.; double, 18s.; postage 1s. and 1s. 6d. Illustrated circulars on application to MR. E. HUXLEY, 12, Old Cavendish Street, Oxford Street, W.

A BOON TO NERVOUS SUFFERERS.

HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., will send, post free, on receipt of a stamped directed envelope, THE BURNING VOICE, a new medical work on the most effectual cure of Nervous Debility, Loss of Memory, Indigestion, &c., which, if neglected, result in consumption and premature decay; with plain directions for perfect restoration to health and vigour. The true guide to those who desire a speedy cure. Every young man should peruse this excellent little work, if he values his health, happiness, and peace of mind. Sent direct from the Author's residence, 8, Burton Crescent, Brunswick Square, London, W.C.

SPORTSMEN AND GENTLEMEN OF THE ARMY AND NAVY.—S. & B. SOLOMONS, Opticians, 39, Albemarle Street, Piccadilly, W., opposite the York Hotel. Portability combined with great power in FIELD, RACECOURSE, OPERA, and general out-door day and night powerful waistcoat-pocket PERSPECTIVE GLASSES, weighing only 4 ounces each, containing 12 and 18 lenses, constructed of Gerspun glass, will show distinctly persons to know them at two-and-a-half and three miles. They serve every purpose on the Racecourse and at the Opera House. The scenery and ships are clearly seen at eight to ten miles. They are also invaluable for Shooting, Deerstalking, and Yachting. Her Majesty's Coast Guards are making use of them as day and night glasses. The terms for them are powerful and brilliant Telescopes for both eyes. The most powerful Telescopes, possessing such extraordinary power that a three-and-a-half inches, with an extra astronomical eyepiece, will show distinctly Jupiter's moons, Saturn's ring, and the double stars; with the same power a person can be seen and known three-and-twenty miles distant, and an object from fourteen to twenty miles. They are in endless variety, of larger and smaller sizes, with increasing powers, and are secured to Her Majesty's Royal Letters Patent.

THE ART-JOURNAL: a Record of the Fine Arts, the Arts Industrial, and the Arts of Design and Manufacture, under the editorial superintendence of S. C. Hall, Esq., F.S.A. Each Part contains Three highly-finished Engravings on Steel, and numerous Illustrations on Wood. The ART-JOURNAL is the only journal in Europe, or in America, by which the Arts are adequately represented. It is addressed first to the Artist, next to the Amateur and Student, then to the Manufacturer and Artisan, and, finally, to the general public: endeavouring to interest all by the varied nature of its contents, but striving also, regularly, to issue matters specially directed to each class.

The January Part contains the Engravings of "War," after Drummond; "Caligula's Palace," after Turner; and "The Friends," after Landseer; all engraved on steel. Among the literary contents will be found:—

I. An Inquiry concerning the Early Portraits of Our Lord. By Thomas Heaphy. Illustrated.
II. Rambles of an Archæologist. By F. W. Fairholt, F.S.A. Illustrated.
III. Artists and their Models. By Walter Thornbury.
IV. Hermits and Recluses. By the Rev. Edward L. Cutts, B.A. Illustrated.
V. French and English Paper-staining. By John Stewart.
VI. Modern Art in Florence. By Theodosia Trollope.
VII. The Bronze Penny.
VIII. Drinking Fountains. Illustrated.

The following series will be continued:—

The Hudson, from the Wilderness to the Sea. By Benson J. Lossing. Illustrated.
British Artists: their Style and Character. Illustrated.
Rome, and her Works of Art. Illustrated.
Visits to Art-Manufactories. By Robert Hunt, F.R.S., &c. Illustrated.

*** The Volumes for 1849 to 1860, inclusive, are all in print, and may be had in cloth gilt, price 1l. 11s. 6d. each.

London: JAMES S. VIRTUE.

NEW EDITION OF MARSHMAN'S LIFE OF HAVELOCK.

Now ready, in 1 vol. 8vo. with Portrait, price 12s. 6d.

MEMOIRS OF MAJOR-GENERAL SIR HENRY HAVELOCK, K.C.B. By JOHN CLARK MARSHMAN. Second Edition, thoroughly revised.

"THE new Memoir of Sir Henry Havelock is written by one of his wife's family with an affectionate admiration which the reader will not fail to share. We obtain from it the most intimate acquaintance with its hero; and as the religious tone of the writer's mind is in perfect harmony with that which characterised Havelock himself, the memoir is in every respect the better for the point of view from which it has been written."—*Examiner*.

London: LONGMAN, GREEN, LONGMAN, & ROBERTS.

Shortly will be published, in post 8vo.

THE CAMPAIGN OF GARIBALDI IN THE TWO SICILIES. A Personal Narrative. By Captain C. S. FORBES, R.N. With Plans, and Portraits of Garibaldi and of the King of Naples.

WILLIAM BLACKWOOD & SONS, Edinburgh and London.

ROUTLEDGE'S SHAKESPEARE. In 3 vols. royal 8vo. cloth, 2l. 16s.; or half calf, gilt, 3l. 7s. 6d. Edited by HOWARD STAUNTON. With 800 original Illustrations by John Gilbert.

From *The Times*, December 26, 1860.

"We have said enough to show our appreciation of Routledge's Shakespeare. For such an edition there is room. *The Pen*, *The Pencil*, and *The Printer*, have striven together in honourable rivalry, combining clearness of text, elegance of illustration, and beauty of type. The result is worthy of the labour, and we can say with a safe conscience to all who wish to receive or present the Bard in a becoming dress, buy 'Routledge's Illustrated Shakespeare.'"

London: ROUTLEDGE, WARNE, & ROUTLEDGE, Farringdon Street, E.C.

A COMPANION TO SOUTHEY'S "LIFE OF NELSON."

In fcap. 8vo. price 2s. 6d. cloth extra.

THE LIFE OF THE EARL OF DUNDONALD. By JOSEPH ALLEN, Esq., Author of "The Life of Nelson," "Battles of the British Navy," &c. With Portrait and Illustrations.

This highly interesting volume will become to every boy as interesting as "Southey's Nelson," to which far-famed book it is a fitting companion, detailing as it does the kindred exploits of his contemporary, all through the stirring period of the naval warfare of the earlier part of the nineteenth century.

London: ROUTLEDGE, WARNE, & ROUTLEDGE, Farringdon Street, E.C.

Dec., 1860. GEORGE HOPE, Capt. R.N. } Secs.

NAVAL CADETS, MARINE CADETS, ETC.

EASTMAN'S ROYAL NAVAL ESTABLISHMENT,
EASTERN PARADE, SOUTHSEA.

358 Gentlemen have passed from this Establishment as Naval Cadets, and more than 200 as Marine Cadets, &c.

In September Mr. Pyce passed First of Naval Cadets, and at last Examination Mr. Gwynne was First of the Master's Assistants of his class.

Applications to be addressed to the Head Master, Mr. G. EASTCOTT SPICKERNELL.

NAVAL CADETS.—Young Gentlemen are EDUCATED for the Navy by W. BELL, Chaplain; A. BURROW, Chaplain and Naval Instructor; W. JOHNSON, Naval Instructor. NORTH GROVE HOUSE, SOUTHSEA.

NAVAL CADETS, &c.—ALL the PUPILS prepared at the Royal Naval Academy, conducted by MR. CHARLES F. COOPER, R.N., have PASSED, and eight have taken 1st, 2nd, and 3rd places at the Royal Naval College. Terms moderate.—Address, Beresford Place, Southsea.

QUEEN'S COLLEGE, BIRMINGHAM.
Incorporated by Royal Charter.

Vice-Principal—The Hon. and Rev. G. M. Yorke.

Principal—The Earl of Lichfield.

Dean of Faculty—W. Sands Cox, F.R.S.

Medical Resident Tutor—Dr. Foster, Medical Department.

A complete education, qualifying for all examining boards and the public services, may be obtained without residence elsewhere.

The attention of parents and guardians is particularly directed to the Junior Arts Department, in which resident and non-resident students are prepared for the *new* Preliminary Examination of the College of Surgeons; the Middle Class Examinations of Oxford and Cambridge; and the Matriculation Examination of the London University.

Prospectuses of Prizes, Scholarship, and full particulars, may be obtained on application to the Dean of Faculty, or the Honorary Secretary to the Professors, Dr. WADE, 16, Temple Row.

UNITED SERVICE COLLEGE, RICHMOND, SURREY, S.W., for PREPARING the sons of Noblemen and Gentlemen for the ARMY, NAVY, and CIVIL SERVICE; also for the purposes of a first-rate General and Scientific Education.

Principal—HENRY CHARLES BURNEY, LL.D.

The terms, which are moderate, may be obtained by application to the Principal, at the College, for 20 years the Head Master of the Royal Naval and Military Academy at Gosport.

ROYAL NAVAL ACADEMY, GOSPORT.
PATRONS.
Her Most Gracious Majesty the Queen.
His Royal Higness the Prince Consort.

Eleven Pupils passed at the recent Examination at the Royal Naval College, nine for Naval Cadetships, and two for the competitive examination for Marine Cadetships.

A small class will be formed the first week in January for special preparation for the March examination. — Applications to be addressed to the Rev. E. BURNEY, M.A.

STAFF EXAMINATIONS.—THE CEDARS, MILITARY COLLEGE, has passed two officers direct at the examination held at the Staff College, Sandhurst, on December 6th, 1860, one of these officers passed the junior and the other the final examination. Four officers were passed at the competitive examination in July last, for entrance to the Staff College. References to numerous staff officers who have gone up from The Cedars. Applications addressed to OSWALD HUNTER, The Cedars, Putney, S.W.

ARMY EXAMINATIONS.—Candidates for the Artillery, Line, and Cavalry, are rapidly and efficiently prepared at an establishment, the pupils of which have, within the last two years, come out eight times first, five times second, and three times third on the list. Apply to Captain LENDY, Sunbury, S.W.

ARMY EXAMINATIONS. — MR. JAMES RAM, 93, Sloane Street, Chelsea, S.W., after eight years' experience in preparing exclusively for direct and competitive Military and Civil Service Examinations, continues to RECEIVE resident and daily PUPILS. Terms, and list of successful pupils, on application.

MR. PAICÉ, M.A. London, PREPARES GENTLEMEN for the various Military Examinations. Address Messrs. WALTON & MABERLY, Upper Gower Street, W.C.

HIGH MILITARY EDUCATION.

THE CEDARS MILITARY COLLEGE, for Gentlemen preparing for the Line, Cavalry, Artillery, Engineers, Staff, and Addiscombe. Director, Major Corte. Resident Professors:—Oswald Hunter, (Wrangler), Cantab.; Captain Siber, late of the Staff School, Berlin; and Dr. Hessel. Non-Resident Professor:—Monsieur Bard, Author of a French Grammar, &c. The number of Professors is arranged so as to afford to each Pupil the advantages of Private Tuition. Applications addressed to OSWALD HUNTER, The Cedars, Putney, S.W.

MILITARY TUITION.—MR. GRAY, Elm Lodge, Kilburn, N.W., who has passed upwards of 100 pupils during the last four years, continues to PREPARE GENTLEMEN for the various Military and other Examinations.

STAFF EXAMINATIONS. — Twenty-four Officers have already joined the Military College of Sunbury this year, to read either for the Staff College, or for direct appointment on the Staff. Apply to Captain LENDY, Sunbury, S.W.

ORIENTAL LANGUAGES.—SANSKRIT, HINDUSTANI, BENGALI, PERSIAN, and HEBREW are TAUGHT by the Rev. G. SMALL, M.A., M.R.A.S., &c., at 17, Church Street, Cliftonville, Brighton, and at 22, New North Street, Red Lion Square, London, W.C. Mr. S. was ten years a Missionary in India, and has had long experience as a Teacher in England.

ARTILLERY EXAMINATIONS. — Candidates for the Competitive Examinations are individually prepared at an establishment which receives six pupils only for that branch of the Service. Four resident professors. Apply to X., care of Messrs. PARKER, 445 Strand, W.C.

THRESHER & GLENNY, 152, STRAND, W.C.

THOMAS WILSON'S BREECH-LOADING RIFLE.

Mr. Thomas Wilson begs to call the attention of the public to his new BREECH-LOADING RIFLE, and to state that he has committed the working of the patent to Messrs. Rabone, Brothers, & Co., of 47, Broad Street, Birmingham, to whom all inquiries or other communications may be addressed.

This Rifle is well adapted for all branches of Her Majesty's Service, and is pronounced by the highest authorities to be the most simple, safe, and soldier-like form of breech-loader ever introduced. Among others it possesses the following important advantages:—

1st. The action is so simple and direct that it can be loaded and fired eight or ten times per minute.

2nd. It is free from screws, levers, and all complications, and is not liable to get out of order.

3rd. It is easy to manufacture, and can be made entirely by machinery.

4th. It is so constructed that accident from careless loading, or otherwise, is impossible.

5th. The breech-plug can be detached for cleaning the barrel, &c., in a moment, and can be replaced again as quickly, for firing, without the aid of tools. This facility would be occasionally valuable in rendering the Gun useless to an enemy, or to mutinous troops.

6th. The action is always in good order, requiring no adjustment in use.

7th. The action is equally applicable to single and double-barrel Guns, and may be used for sporting as well as military purposes.

8th. The principle can be applied to all ready-made Enfield guns, at an immense saving to the country.

Volunteers are recommended not to purchase their arms till they have inspected the above Rifle.

A pattern may now be seen at Mr. Lancaster's, No. 151, New Bond Street, W.; and at Mr. Pritchett's, No. 86, St. James's Street, London, S.W.; as well as at Messrs. Rabone, Brothers, & Co.'s, 47, Broad Street, Birmingham. Every information as to cost and other details can be obtained at either of the places named.

THOMAS', 153, New Bond Street, corner of Bruton Street, London, W.

OPENING OF NEW ROOMS for the display of JEWELLERY, SILVER and PLATED GOODS, CLOCKS, WATCHES, SEVRES and DRESDEN PORCELAIN, BRONZES D'ART, &c.—Messrs. HOWELL, JAMES & CO., have the honour to announce that, in order to present to their numerous and distinguished patrons a more extensive variety of useful and ornamental objects, they have rebuilt and entirely refitted their rooms, giving additional space for display, and increased facilities for selection. During the progress of these alterations, many of the most ingenious manufacturers on the Continent have submitted to them a large number of novelties, many of which have been exclusively retained; and English manufacturers, receiving encouragement, have prepared many ornamental articles of a peculiar and beautiful character. The whole of these goods are now being displayed in their new rooms, and Messrs. H., J. & Co. respectfully solicit the favour of a visit to inspect them.—5, 7, 9, Regent Street, Pall Mall, W.

CHRONOMETERS, WATCHES, CLOCKS, &c.

E. WHITE, for several years principal assistant at Messrs. Dent's, of Cockspur Street, having taken the above premises (formerly occupied by Messrs. Green & Ward), respectfully solicits an inspection of his Stock, comprising a choice selection of CHRONOMETERS, WATCHES, CLOCKS, &c., all of which have been recently manufactured on the most improved principles, by workmen of the first talent.

20, Cockspur Street, Pall Mall, London, S.W.

FREE TRADE IN CHRONOMETERS.—JOHN PENNINGTON, Chronometer, Watch, and Clock Maker, for many years Manufacturer for the Trade, purposes supplying the public at Manufacturers' prices. CHRONOMETERS, as supplied to the Royal Navy, 25*l.* Terms, cash.

WATCHES & CLOCKS OF EVERY DESCRIPTION.
12, Orchard Street, Portman Square, London, W.

DENT'S CHRONOMETERS, WATCHES, AND CLOCKS.—M. F. DENT, 33, Cockspur Street, Charing Cross, S.W., Watch, Clock, and Chronometer Maker, by special appointment, to Her Majesty the Queen.—33, Cockspur Street, Charing Cross, corner of Spring Gardens, S.W.

GOLD CHAINS.—PARIS FIRST CLASS MEDAL FOR JEWELLERY, AND LONDON PRIZE MEDAL FOR GOLD AND JEWELLED VASE.—WATHERSTON AND BRODDEN respectfully invite the public to an inspection of their GOLD CHAINS AND JEWELLERY, which have been honoured with a First Class Medal at the Paris Universal Exhibition, accompanied by the flattering testimonial of "*Excellente bijouterie courante; Modèles Spéciaux à sa Fabrique.*" "Excellent jewellery, comprising chains, bracelets, brooches, rings, necklaces, seals, &c., every article being remarkable for its high finish," all made on the premises.

WATHERSTON & BRODDEN, Goldsmiths.
